The delights of a garden don't need classifying, but some of the difficulties do. The first is to find the right place in which to make the garden. It should be in a locality where the sun will shine on it for at least five hours each bright day. It should not be where the soil is so thin and the rocks so near the surface that the garden will burn out during the summer. It should not be under or near large trees; the trees will not only keep the sun off, but will draw all the moisture and plantfood from the soil. Nor must the garden be in a spot that gets flooded.

Co-ordination of Work.

Through the association of commerce the city of Milwaukee is planning to centralize all of the city's activities among the foreign born. The plan calls for a general committee, whose representatives are drawn from the various civic, social, and patriotic bodies and for an executive committee of five members to be appointed from the general committee. The co-operation of a member from each of these bodies will obviate all duplication of work and will mean a large increase in the ground covered in the coming year.

Her Heartlessness.

"I hear tell that Gabe Gawkey is figuring on getting a divorce from his wife," said a neighbor. "What's the matter with her, anyhow?"

"She's plumb heartless," replied Gap Johnson of Rumpus Ridge, Ark. "He talked about taking some spring medicine and she up and told him that the best kind to suit his case was a buck-saw and ax. That there infernal lady ain't got no more feelings than a snapping turtle!"—Kansas City Times.

Community's Benefactor.

The man who owns an attractive home, large or small, is a real benefactor to the community. He is particularly fortunate if he can build the house himself. Then he can say with satisfaction: "When I am gone at least I shall have left a monument in the shape of this house. The town is more attractive than it would have been if I had not built my home here."

When Love Grew Cold.

My most embarrassing moment happened when I was twelve years old. I was in love. It was on a winter morning, and my mother was sending me to the store, when the boy I loved passed by. I went out of the house as fast as I could, but I slipped and fell down the stairs. It was so funny he laughed out loud at me. I never looked at that boy again.—Exchange

CONQUERED

By MILDRED WHITE.

(Copyright, 1920, Western Newspaper Union.)

Jack Wallingford stretched his long white-flanneled form on the grass and blinked his handsome eyes toward the ocean. Sunlight lay upon the waters, and nearby was the summer resort hotel. The veranda of this big hotel presented a rainbow appearance, with the variegated color costumes of its guests. Arthur Tanner gazed quizzically into his friend's averted face.

"Going to enjoy it here, Wallie?" he asked.

The young man addressed turned alertly and laughed.

"Waiting worlds for me to conquer," he replied, motioning toward the assembled girls on the veranda.

"As insufferably conceited as ever, I see," Tanner remarked.

"Merely stating a fact," his friend answered pleasantly. Which upon reflection seemed to be true. Wherever Jack Wallingford went, conquest not only awaited, but sought him out.

Moreover, Wallingford possessed unlimited confidence in his own powers of charming where young women were concerned; and his confidence was never over-rated. Arthur Tanner, looking down upon the smiling complacence of his friend, snorted in disgust.

"I wish," he said bitterly, "that you might be bowled over yourself, just for once, and lose out in the courting game."

Wallie shook his head.

"Can't be done," he said. "I've hoped often—that the girls would let me lose—but they don't."

Suddenly Tanner's disapproving expression gave place to one of amusement. "I'll introduce you to Mary Holly," he said. Wallingford arose, settling his ruffled attire.

"Same Mary being a charmer?" he asked.

But Arthur was already waving the signal of a white handkerchief toward the rainbow group of girls.

"Heavens!" his friend ejaculated, "You'll have the whole bunch over."

"I am not in the habit," Tanner responded with dignity, "of waving to the 'bunch.' Mary Holly understands my signals."

The girl who approached wore simple, ordinary white, and her face, at close view, appeared to be rather displeased than otherwise, at her summons. It was a small, dark face, crowned with quantities of loosely coiled hair.

"What do you want with me?" she demanded.

"Want you to meet Mr. Jack Wallingford," Arthur replied. He gave her an understanding smile. "And help to make his stay interesting." Absently nodding, Mary Holly acknowledged the introduction, and as Arthur Turner departed, she settled herself on the grass, where Wallingford had lately reclined and opened a magazine.

"You don't have to stay with me, you know," she told the winner of hearts, and prepared to become absorbed in her book.

Mary Holly certainly was an unusual girl. He found that out before he had been in her company an hour.

"Good morning," said Mary Holly abruptly—and Mary Holly was gone.

She looked much more attractive at the evening promenade. Wallingford was piqued into asking for a place on her program. The program was well filled, and she gave him place reluctantly, then removed the sting of her reluctance with a smile, and the small, piquant face was for the moment transformed. He sought to bring the radiant smile again, and sometimes succeeded. Also, he found himself returning again and again during the days which followed, to Mary Holly's side. Not that he did not bestow his charming presence elsewhere, Wallie was always the favorite of the rainbow circle, but invariably he returned to the indifferent welcome of the always unexpected Mary. And then one night came the climax; it was quite unpremeditated.

"I love you," said Jack Wallingford, then: "You must know that I love you."

"Of course I do," came the surprising girl's answer.

Wallie gasped.

Calmly Mary Holly regarded him. "Will you marry me?" she asked.

Wallie choked.

"It's leap year, you know," she quietly reminded him. "and if you will make love—well, there's your responsibility."

From near by came a man's exultant laugh. Arthur Tanner's face appeared above the stone boulder against which the two had been leaning.

"You really did do it, Mary," he cried. "You certainly are game.

"Mary Holly is my half-sister," he explained to Wallingford. "When I told her about your captivating powers she insisted that she'd teach you a lesson—and by George! from the looks of your face this minute, she has."

But Jack Wallingford, still white and serious of gaze, leaned toward the girl.

"Yes, I will marry you," he said. "It happens to be the truth that I love you. Now, what are you going to do about it?"

The unexpected Mary Holly turned to Tanner.

"You see," she said with a mock sigh, "you cannot beat a conqueror. I am going to marry Wally."

Simply Worn Out

How Many Women Are Like This?

Can anything be more wearing for women than the ceaseless round of household duties? Oh! the monotony of it all—work and drudge; no time to be sick; tired, ailing, yet cannot stop. There comes a time when something "snaps" and they find themselves "simply worn out," and to make matters worse, have contracted serious feminine disorder which almost always follows the constant overtaxing of a woman's strength.

Then they should remember that there is no remedy like Lydia E. Pinkham's Vegetable Compound—the experience of these two women establishes that fact:

Cedar Rapids, Ia.—"After the birth of my last child I had such painful spells that would unfit me entirely for my housework. I suffered for months and the doctor said that my trouble was organic ulcers and I would have to have an operation. That was an awful thing to me, with a young baby and four other children, so one day I thought of Lydia E. Pinkham's Vegetable Compound and how it had helped me years before and I decided to try it again. I took five bottles of Vegetable Compound and used Lydia E. Pinkham's Sanative Wash and since then I have been a well woman, able to take care of my house and family without any trouble or a day's pain. I am ready and thankful to swear by your medicine any time. I am forty-four years old and have not had a day's illness of any kind for three years."—Mrs. H. Kornig, 617 Ellis Blvd, Cedar Rapids, Iowa.

Sandusky, Ohio.—"After the birth of my baby I had organic trouble. My doctor said it was caused by too heavy lifting and I would have to have an operation. I would not consent to an operation and let it go for over a year, having my sister do my work for me as I was not able to walk. One day my aunt came to see me and told me about your medicine—said it cured her of the same thing. I took Lydia E. Pinkham's Vegetable Compound and used Lydia E. Pinkham's Sanative Wash and they have cured me. Now I do my own housework, washing and ironing and sewing for my family and also do sewing for other people. I still take a bottle of Vegetable Compound every spring for a tonic. I recommend your medicine to others who have troubles similar to mine and you can use my letter if you wish."—Mrs. Paul Papenfuss, 1325 Stone St., Sandusky, Ohio.

All Worn Out Women Should Take

Lydia E. Pinkham's Vegetable Compound

LYDIA E. PINKHAM MEDICINE CO., LYNN, MASS.

1920 Style.

In an Indianapolis barber shop a man got a shave, haircut and tonic and gave the boss barber a dollar bill, which the latter rang up as he said, "Just right."

After about a minute the customer exclaimed: "The only difference between you and Jesse James is that Jesse had a horse."

"There is a bigger difference than that," replied the boss barber; "Jesse was a piker. Why, I've got a seven-passenger car."—Indianapolis News.

SWAMP-ROOT FOR KIDNEY AILMENTS

There is only one medicine that really stands out pre-eminent as a medicine for curable ailments of the kidneys, liver and bladder.

Dr. Kilmer's Swamp-Root stands the highest for the reason that it has proven to be just the remedy needed in thousands upon thousands of distressing cases. Swamp-Root makes friends quickly because its mild and immediate effect is soon realized in most cases. It is a gentle, healing vegetable compound.

Start treatment at once. Sold at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to test this great preparation send ten cents to Dr Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

Jailed for Love of Books.

Lady Visitor—What brought you here, my poor fellow?

Poor Fellow—Love for books, mum.

"What! What sort of books?"

"Rich blokes' pocket books, mum."—London Answers.

Cuticura Comforts Baby's Skin

When red, rough and itching with hot baths of Cuticura Soap and touches of Cuticura Ointment. Also make use now and then of that exquisitely scented dusting powder, Cuticura Talcum, one of the indispensable Cuticura Toilet Trio.—Adv.

A youth always wishes he were older, and a woman always wishes she were younger.

BIG ULCER ALL HEALED

"Here is another letter that makes me happy," says Peterson, of Buffalo. "One that I would rather have than a thousand dollars.

"Money isn't everything in this world. There is many a big hearted, rich man who would give all he has on earth to be able to produce a remedy with such mighty healing power as Peterson's Ointment, to sell at all druggists for 60 cents a large box."

Dear Sirs:—

"I was an untold sufferer from old running sore and ulcers. I had tried most everything without any relief from pain. A friend told me of your wonderful ointment and the first box took away the pain that had not left me before in years, and after using just nine dollars' worth of the salve I am cured. The ulcer was 9 inches by 6½ inches, is all healed and I can walk. Never, never will I be without Peterson's again.

"You may use this to recommend your ointment, if you wish. I cannot say enough to praise it." Yours truly, Mrs. Albert Southcott, Medina, N. Y. Mail orders filled by Peterson Ointment Co., Inc., Buffalo, N. Y.

Catarrh is a Real Enemy and Requires Vigorous Treatment

Do Not Neglect It.

When you use sprays, atomizers and douches for your Catarrh, you may succeed in unstopping the choked-up air passages for the time being, but this annoying condition returns, and you have to do the same thing over and over again.

Catarrh has never yet been cured by these local applications. Have you ever experienced any real benefit from such treatment?

Throw these makeshift remedies to the winds, and get on the right treatment. Get a bottle of S. S. S., and begin a treatment that has been praised by sufferers for half a century.

S. S. S. gets right at the source of Catarrh, and forces from the blood the germs which cause the disease. Special medical advice regarding your own case free. Address Medical Director, 106 Swift Laboratory, Atlanta, Ga.

OFFICIAL PUBLICATION

NOTICE TO CONTRACTORS

Sealed proposals will be received by the Town Clerk of Klemme, Iowa, on the 27th day of July, 1920, between the hours of 8 A. M. and 8 P. M., for the construction of a Sewage Disposal Plant, Main and Lateral Sewers, in and for the Town of Klemme, Iowa, the extent of the work, kinds of material and method of construction to be as shown by the plans and specifications now on file in the office of the Town Clerk, which are by reference made a part hereof, and as provided by a Resolution of Necessity passed by the Town Council on the 13th day of July, 1920, which is by reference made a part hereof, said sewers to be built of vitrified salt glazed sewer pipe, cast iron pipe where required, hard burned building brick or concrete manholes and flush tanks, etc., and to be located as follows:

DISPOSAL PLANT

The Disposal Plant shall be located on a plot of ground approximately 600 feet west and 1500 feet south of the intersection of Iowa and Front Streets and shall consist of septic tank, dosing chamber, filter and sludge beds and connecting pipes there to.

MAIN SEWER

Shall start near above described Disposal Plant Site thence North 650 feet, thence Northeast across outlot 7 approximately 1150 feet to intersection of Iowa and Front Streets, thence on Iowa Street from Front to 3rd Streets using 12-inch Vitrified Sewer Pipe.

LATERAL SEWERS

On 3rd Street from Iowa Street to Jerusalem Street using 10-inch Sewer Pipe.

On Dakota Street from 3rd Street to East Corporation Line.

On State Street from 3rd Street to East Corporation Line.

On Jerusalem Street from 3rd Street west 1500 feet.

On Elder Street from 3rd Street West 200 feet and from 2nd Street west 250 feet. On Day Street from 1st Street East 730 feet. On Main Street from 3rd Street West 1000 feet and from 4th Street East 800 feet. In alley of block 9 from 3rd Street east 200 feet, on Iowa Street from 3rd Street to 4th Street,

On Front Street from Hancock Street south 600 feet, on 1st Street from Iowa Street south 600 feet and North 450 feet. On 2nd Street from Jerusalem Street south 170 feet and from Elder Street south 300 feet and from Iowa Street north 450 feet and south 900 feet. On 3rd Street from Dakota Street to Jerusalem Street and from Iowa Street to Greutmacher Street. On 4th Street from Jerusalem Street south 2050 feet. Morningside Road from 4th Street east 250 feet thence south 600 feet, On Paul's Drive from its intersection with Morningside Road east 500 feet. On Arthur's Lane from its intersection with Morningside Road east 400 feet using 8-inch Sewer Pipe.

All of said sewers to be built with tight joints, suitable "Y's" for house connections and to be laid to line and grade.

The work to be constructed in accordance with the plans and specifications above referred to, and shall be commenced on or before the 1st day of Sept. 1920, and fully completed on or before the 1st day of Jan. 1921. Payment for said work to be made after its completion and acceptance by the Town Council, to the contractor, for the Disposal Plant in bonds drawing 6 per cent annual interest. issued in anticipation of a fund to be created by a tax to be levied against all the property in Sanitary Sewer District No. 1, of the Town of Klemme, Iowa, or by Bonds or warrants drawn against such funds of the Town of Klemme, Iowa, as can by law be used for such purposes, or if insufficient to pay the cost of same by bonds drawing 6 per cent interest, drawn against a Special Assessment on all property benefitted, or by a combination of any or all of these methods, and upon completion of the Main and Lateral Sewers, and their acceptance, the cost of same shall be paid to the contractor in Special Assessment Bonds drawing 6 per cent annual interest and issued in anticipation of a fund to be created by a Special Assessment to be levied against all the property in Sanitary Sewer District No. 1 in proportion to its benefits as provided by law and said resolution of Necessity, or if insufficient to pay the cost of same, by bonds or warrants drawing 6 per cent annual interest, drawn against such funds of the Town of Klemme, Iowa, as can by law be used for such purposes. Said payment to be made as soon as by law provided after the completion and acceptance of said improvements. All proposals must be made on blanks to be furnished by the engineer and made separately for the Disposal Plant in one proposal and for the Main and Lateral Sewers in another proposal and each proposal shall be accompanied by a certified check in the sum of $1000 for the Disposal Plant and $2000 for the Main and Lateral Sewers, drawn on some known responsible bank in the Town of Klemme, Iowa, in a separate envelope and made payable to the Town Treasurer as security that the bidder, in case his proposal is the lowest and best legal bid submitted and contract is awarded him, will enter into contract for the doing of the work and give bond within ten days in the sum of 100 per cent of his contract price, conditioned upon the proper carrying out of the work and the faithful performance of the contract, and the contract and bond shall contain a condition requiring the contractor to carry Workmen's Compensation insurance, and the contractor and his bondsmen to keep said improvement in repair for a period of four years from and after completion of the Main and Lateral Sewers, and one year from and after completion of the Disposal Plant.

Certified checks will be returned to unsuccessful bidders and to successful bidders when they have signed contract and given bond as required. In case the successful bidder shall fail to enter into contract and give bond as required, certified check filed with his proposal may be retained by the Town Council at their option as agreed and liquidated damages.

The right is reserved to reject any and all proposals, and proposals will be acted upon at a meeting to be held by the Town Coucil at 8 o'clock P. M. on the 27th day of July, 1920, or at an adjourned meeting thereof.

Published by authority of the Town Council of the Town of Klemme, Iowa.

PUTS TIES ON TRACK; WANTED TO SEE THE TRAIN WRECK

Belmond Independent:—Special Agent Meehan of Minneapolis, for the M. & St. L. railroad, was in town one day last week looking up parties here who had been placing ties on the track recently. He located the guilty parties, and with the city authorities went to his home. The party was a fifteen-year old boy, who stated that he just wanted to see the train wreck and that he had no accomplices in the act. eH was given a good sound lecture and let off.

Prepare in case you should have

FIRE

Don't wait until your home has gone up in flames a then wish you had bought on of our handy and s

Fire-Gun *Fire Extinguisher*

Will put out any fire, always ready and cost little, s us at once and get a "Fire-Gun" and be prepared.

COURT INSTRUCTS YOUNG SMITH TO LEAVE COUNTRY

George Smith, the young man who threatened to commit great bodily injure on our citizen, Chas. Steihl a few weeks ago, and who was taken to the jail at Mason City by Sheriff Ross to await trial, was given a hearing by the Court at Garner last week. They let the young man off on the promise of good behavios and that he would get out of the country and never return to Klemme again. He was here Saturday to gather up his belongings but hung around several hours until he was warned by one of our townsmen to "beat it out quick" or the cop will get you. Young Smith followed the instructions and when last seen was boarding a stock train out of Klemme Saturday night.

We udnerstand the young man came from a reform school and did not carry a very good record and that he was out on parole. Well, Klemme is rid of him now and he will not give any moret rouble here. He has been working around with different farmers for the past season.

FIRST METHODIST EPISCOPAL CHURCH

Preaching service Sunday morning at 10 o'clock. Sunday School at the close of preaching service, 11 o'clock. Sunday evening union service out in Liberty township Methodist church at 8 o'clock. Epworth League at 7:30.

Midweek prayer service on each Thursday evening at 7:30 o'clock.

A. H. Meyer, Pastor

Nick Ell and Doc Thomas went to Clear Lake fishing Monday and as usually is the case at Clear Lake they caught a very fine string. They had them all counted up and the count reached the big sum of 35. But as all fish stories must be discounted a considerable number and when a recount had been taken and the story part taken off, the fish number exactly four, and one was so small that Nick threw it back. Now maybe Doc and Nick won't believe this as they ar ethe fishermen buta sk one of the guys at the garage, he counted them!

ABOUT THE BALL GAMES

The "Old Timers" met the Klemme Sox at the local diamond last Thursday evening and suffered defeat by one score. The game was good all the way through and the Regulars have regained their "socks."

Sunday the Klemme Sox journeyed to Clarion where they met the Clarion team. Our boys played in hard luck, but succeeded in gathering in a couple of scores. As for hitting, Klemme had Clarion outclassed as that team won their scores on errors more than on hits. Billy Busch pulled the big stunt of the day. There was a man on third and Billy knew the thing to do was to sacrifice a bunt hit and bring the man home. Billy got his head confused with the bat and stuck his head out instead and—goodnight for Billy, he heard the birds sing and woke up some time later with a big bump where his noodle hit the ball. He "bunted" all right but has a sore coco. Luckily for him he "came to" and was as well as ever, but as they say, it might have been slow music for Billy had the ball struck his head lower.

IT WASN'T EMPTY, EITHER!

Talk about fisherman's luck—a certain Klemme man has all the luck in the world when it comes to preparing for a trip after the finny tribe. The above mentioned man was going fishing the other day and as usual went out in the back lot to dig worms and you can believe it or not, but the first thing he dug up was a whole quart of bonded whiskey as old as the hills and the cork was sealed up tight and had never been touched. We are of the opinion that perhaps the cork has escaped from the bottle by this time and that the fishing trip was postponed. Talk about ancient history, this beats all the stories of digging mummies, this was a mummie with a real "kick." Can you beat it? We will say you can't!

The Times "Devil" Says

MYSTERY FLEES FROM ONAWA SKELETON CASE

ONAWA—What promised to be a first-class murder mystery for a few hours following the finding of a skeleton of a 16-year old girl in an old hayloft here late yesterday, exploded today when it was learned by the authorities that the skeleton had been the property of Prof. Whitfield, who studied anatomy in Onawa some seventeen years ago. Authorities are convinced that this explanation is the correct one, and will drop the investigation.

LOOK OUT MR. AUTOIST

Those who drive cars now days should be real careful that they comply with the law in regard to headlights especially. The law clearly states that automobiles shall be equipped with "dimmers" and that they must not show a glaring headlight. It will be well for you to see to it at once that your car is properly fitted with headlight dimmers or a diffusing device of some kind in compliance with the law.

During the past week dragnets have been set all over the country and autoists who were not driving with diffused lights were hauled before officials and fined and then made to get their cars equipped with dimmers.

Don't take any chances, but get your car fixed up at once. No telling when or where you may get nabbed for showing a headlight that glares. The officials will get you sooner or later and may dragnet this county at any moment.

Not only will you be complying with the law in using dimmers, but you are treating the other fellow squarely. You don't like to meet a glaring headlight at night and take chances of getting into the ditch, and neither does the other fellow, so get busy.

A large number of people from Klemme and vicinity attended the funeral of James Carr at Garner on Sunday.

Mrs. Lena Schroeder and daughter, Adella, left last week Monday for Tracy, Minn., where they will visit and then go to Valley City, North Dakota, to finish a three weeks' trip.

Mrs. G. A. Pabst and daughter, Eleanor, came to Klemme Tuesday for a visit with their many old friends and neighbors. Since selling the drug store here, Mr. Pabst and the family have been living in Los Angeles, California. George is still out there and Mrs. Pabst and Eleanor came for several weeks' visit with their relatives at Belmond. Their many Klemme friends were glad to see them again. They like California real well, but Iowa still looks awfully good to them.

We are now positive that Ed Kahrs is a lazy man. It comes about that the show window in his drug store has a double glass—like two storm sashes fastened together. Well Ed has told us since last Christmas that he intended to take the inner window off so that it could be washed; we waited in vain but no window cleaning occurred. We jotted down in our memory that Ed was a lazy man, too lazy to wash the window and here Tuesday morning our idea was correct. Ed had to send an S. O. S. to his father in California, he came and was on the window washing job Tuesday and now has the front all shined up for his son Ed, and Ed admitted his father had to come to help him with the window.

The Inner Meaning.

Remember that as you live your life each day with an uplifted purpose and unselfish desire, each and every event will bear for you a deep significance—an inner meaning—and as you learn their import, so do you fit yourself for higher work.—William Q. Judge.

JAMES CARR DEAD

This community was shocked to hear of the death of Jim Carr, who died at the hospital Friday morning after a short illness. Mr. Carr was well known all over the county, as he was a popular man, a stock buyer for years, and had a wide acquaintance. At the time of his death he was only a few days from being fifty years old. Funeral services were held on the lawn at the home and was the biggest ever held in the county, as friends from far and near came to pay respect to their deceased friend. The funeral was under the auspices of the Masonic Lodge and the members attended in a body, the Commandery also being present in uniform. The Masonic sermon was given by Rev. Wiggins of the Congregational church of Garner. Mr. Carr leaves his wife and two little girls, his aged parents, brothers and sisters, to mourn his death. He was a popular man in business and social circles and his loss will be felt for miles around.

LOUIE KNOKE'S FATHER DEAD

From the Democrat of last week we gather that Henry Knoke passed away at his home in Garner Tuesday evening at eleven o'clock, July 13th, following a lingering illness of about two years. Henry Knoke was born in Hanover, Germany, September 27, 1859, making him about sixty-one years old. Funeral services were held Thursday at the Lutheran Church conducted by Rev. Koch, and interment was made in Concord cemetery. Louie Knoke, of this city, is a son of Henry Knoke. The community extends sympathy to the bereaved relatives.

GIMER TO REMAIN

A. D. Gimer and family have decided to remain in Klemme, at least for the present, and have leased the former Mrs. Arnold house in the south part of the city from Mr. Sanderfeldt, the present owner. The family sold their house near the park with the intention of moving to Mason City but Art has changed his mind and saye he just simply can't pull stakes and leave Klemme. Klemme people will rejoice in hearing that the Gimer family will remain and we are also glad to have a man like Art in the business circle of Klemme.

Fire of unknown origin on the farm of William H. Cooper, near Hedrick, pure bred cattle raiser, burned 35 head of Aberdeen Augus cattle valued at $100,000. Two large barns, completed a short time ago, were destroyed and a few hogs being prepared for sale also were burned. Total loss is estimated at nearly $200,000, partly covered by insurance. A champion Aberdeen Angus bull, purchased a year ago for $35,000, was rescued from the blaze.

Raymond Fifield, 2, son of Mr. and Mrs. Clarence Fifield, Des Moines, caught his head in the clothes line swing in the backyard of his home and was hanged to death. His body was found by Mrs. Charles Farrell, neighbor, soon after the tragedy. Raymond was playing with his brother, Herbert, aged 5, when he tripped in the swing. He died instantly, it is thought. The mother was in the house. Funeral services were held from the home. Burial was in Glendale Cemetery.

Iowa has been terribly afflicted the past few months with practically impassible highways. Many roads that were supposed to be fairly well improved by the use of gravel have failed completely in supporting heavily loaded auto trucks, and roads that will support trucks must be considered in the future because they have become a large factor in the distribution of products. Hundreds of Iowa communities would have been free from congested freight conditions occasioned by railway strikes if the highways would have been in order so that local packing houses could have been reached by motor trucks, loaded with hogs ready for the market. The facts are Iowa's mud roads are costing fabulous sums of money when the cost of marketing or the failure to reach markets are taken into account.

W. O. Brant, in his farm exchange bulletin, tells about fruit tree spraying rings in Benton county. Mr. Brant says: "The first shipment of sprayers has been received, set up and given a try out. Talk about the days of real sport! It's a pleasure to get hold of a spray gun with 300 pounds pressure behind it. Perhaps when we get this gun operating with the vile, evil smelling solution we use for spraying the joy will not be so great. However, so be it, we would rather be a man behind the gun than a worm in front of it. Benton county farmers will spend $10,000 on the spraying project of the Farm Bureau this year and Oh! what a mist there will be in the air. Fifteen spray rings have been organized in thirteen townships. A rough count gives about 300 orchards averaging 40 trees each or between eleven and twelve thousand trees."

Revised lists of premiums which will be made in the cattle department of the 1920 Iowa State Fair, to be held at Des Moines Aug. 25 to Sept. 3, have been announced by Secretary A. R. Corey. The total is the largest ever offered by any state in the country for a cattle exposition. The tremendous increase in money offerings in all branches is largely because of the fact that the Iowa fair management will open a new $200,000 cattle barn this summer. This barn will house the entire cattle exhibit. Architects declare that it is the finest of its kind in the entire country. The pure bred show will be the chief feature advertised by the fair this year. The total money offered by the 1920 fair is $135,000. This is the biggest offering ever made by any fair. The 1919 money put up by the Iowa management was $106,000. The superintendent of the cattle department has issued a report to the effect that word has been received from a great number of the more important breeders of the country, announcing their intention of having a great number of entries for the 1920 exposition.

A few years ago Iowa produced over 80 per cent of the washing machines manufactured and sold in America. While the production of these machines in this state has increased enormously and is constantly increasing, the percentage of the output of the factories of the Hawkeye state has been reduced because of the inability of the plants to keep pace with the demand. Grinnell, Newton, Perry, Fairfield and Davenport are among the towns and cities with washing machine factories. Because of the high cost of laundresses extensive plants have been established in Peoria and cities farther east, but not to the detriment of the Iowa plants, as evidenced by the fact that the Grinnell Washing Machine Company is at the present time 8,000 machines behind its orders despite the fact that 100 men are employed. The Grinnell machine is sold largely to city users and to those rural residents who have access to electric current, as they are motor driven. Some of the other Iowa plants cater largely to the farmer trade by building a machine driven by gas engines. Both metal and wooden tubs are being manufactured, and the demand for the two kinds is about 50-50.

ANOTHER LARGE SHIPMENT

The Klemme Creamery shipped out one hundred and thirty-seven tubs of butter last week to New York city alone, and in addition several hundred pounds of butter were sold thru the stores of Klemme, and the creamery itself, representing a single week's output. The Klemme creamery was never in better condition than at the present time, in financial, equipment and management or in general. The Klemme creamery is doing a big business and is among the best creameries in the state.

HAIL DOES DAMAGE

The hail storm which passed west and south of Klemme last Friday night, damaged considerable property in the way of crops. Oats which was nearly ripe received the worst, and at best fifty per cent of the grain can not be harvested. Corn also received its share of the damage as the leaves were badly stripped in many fields. This is the only serious hail storm we have had here this year but it was not far reaching. Crop insurance will cover a part of the loss to the farmers.

METHODIST EPISCOPAL CHURCH

Public worship at 10:00 a. m. and 8:00 p. m. Sunday school at 11:00 a. m.

Morning sermon subject, "An open door, for state and church." Evening subject, "The harvest begun."

Do not aestivate. It is worth while to go to church in hot weather. Your neighbor thinks so, for the services are well attended and the Sunday schol attendance continues well above the 100 mark. But there is room for you, if you have not been in attendance.

Plain, practical sermons on vital topics and good music; with the friendly association of your neighbors; these make church going worth while. You will find a cordial welcome.

A. E. Buriff, minister

Hermoline

A BETTER LUBRICANT

—FROM THE FORMULA OF A MOTOR COMPANY

Refined Especially for Tractors

Tractor Service is hard service for a lubricant. While an automobile engine works at about 25% of its capacity a tractor motor works at 75% of its capacity or more.

There is no such thing as coasting with a tractor motor. Its great internal combustion engine carries tremendous loads and develops terrific heat. Even under average working conditions the cylinder walls are heated to 350 degrees. Naturally, then, the matter of a lubricant is vitally important in the efficient operation and life of a tractor.

HERMOLINE is especially refined for the extremely heavy work and the excessive heat developed within a tractor motor. Any oil expert will tell you that the best lubricants are made from Pennsylvania crude. And in developing HERMOLINE for use in tractors there was just one best field from which the finest oil could be secured—Pennsylvania—and the HERMOLINE engineers went there.

There was just one formula from which this Pennsylvania crude could be made into an ideal lubricant, and HERMOLINE engineers—the engineers of a motor company, not an oil company—did not stop until they had discovered that formula.

HERMOLINE possesses that much-sought-for but seldom-found feature of withstanding terrific engine heat without breaking down and allowing speeding metal surfaces within the motor to come in contact. HERMOLINE provides this protective oil cushion, stops overheating and retards wear.

For maximum efficiency of your tractor motor—for perfect safety—for long life—use HERMOLINE always. We know you will be better satisfied with HERMOLINE

Put it to any test you like, HERMOLINE is the lubricant you should insist on.

E. G. ELL, Klemme, Iowa

The Test of Oil Value

There are five tests by which the supreme quality of lubricants made from Pennsylvania crude oils are shown, and by these tests HERMOLINE lubricants are proved superior for use in your motor car, truck, tractor or aeroplane.

Gravity

The gravity of an oil shows its density. Lubricants like HERMOLINE, made from Pennsylvania crude oils, run high in gravity (from 30 to 33 degrees), and are invariably filtered oils that contain a small percentage of carbon.

Viscosity

The viscosity test shows the ability of oil to retain its body under extreme heats. Inferior oils usually have a high viscosity, while Pennsylvania oils have low viscosity (from 150 to 240 at 70°), but when subjected to a heat anywhere near the temperature of a working motor Pennsylvania oils surpass all in viscosity and lubricating capacity.

Flash and Fire

The flash test shows at what temperature the vapors coming off the oil will ignite when a small flame is brought close to its surface.

The fire test shows at what temperature the oil itself will burn. Oils refined from Pennsylvania crude show a flash of 400° Fahr. and over—a fire test of 450°.

Color

Some of the lightest colored oils often contain the most carbon, so that tests of color should never be taken as proof of quality without the other tests described in this column.

Filtering

Oils made from Pennsylvania crude may be depended upon as being truly filtered oils when they have a high gravity (from 30 to 33 degrees). You will note that HERMOLINE oil has both light and color and high gravity.

Ask your dealer for the HERMOLINE booklet—it tells in detail how to prove oil value.

FEW MARKS OF WAR IN HAMBURG

Streets Are Clean, Houses Freshly Painted and People Well Dressed and Fed.

BUT THERE IS MUCH MISERY

About 150,000 Are Out of Work, Prices Are High, Homes Scarce and Discontent General—People on Rations.

Hamburg.—Travelers from the United States landing in Hamburg find it difficult to realize that Germany has been at war for six years. The streets are clean, the houses freshly painted, and the people one sees in the streets look better dressed and quite as well fed as the average person on the streets of New York.

The Hotel Atlantic is filled with Americans who pay about 20 per cent less for their rooms than they would in New York, although these rates are more than double that paid by German travelers. The restaurants and cafes, which are now open until eleven o'clock at night, are crowded with people who appear to have plenty of money. The women are plainly dressed, and the rich gowns of pre-war days have vanished. The Alster, a charming lake in the center of the city, is covered with small yachts, canoes and rowboats.

Clothing is very expensive, a business suit costing 3,000 marks, and a pair of shoes 500 to 1,000 marks. Wooden shoes for the poorer classes cost from 24 to 35 marks, and are much worn, especially by boys.

The government issues new paper money every day in 5, 20 and 50-mark notes. Business men have to carry pocketbooks the size of miniature valises to hold the bills.

The working men earn from 50 to 60 marks a day, which barely suffices to keep them and their families. Every citizen in Germany has to have cards for bread, meat, sugar, butter, margarine and soap.

Pork Sells at 20 Marks a Pound.

Meat is 6 marks a pound, and pork 20 marks, butter 36 marks, eggs 1 mark 70 pfennigs each, and a common kind of bread 5 marks 4 pfennigs for a five-pound loaf. For Americans who get 40 marks for a dollar these articles are cheap, but for the German they are very dear.

Plenty of food of all kinds, including tea and coffee, can be bought by what is called in Germany the underhand system. The restaurants all have supplies on hand for customers who can pay high prices, and when the police hear any hotel or restaurant has too much food they make a raid and confiscate it.

The working people, and more especially the salaried educated classes, professors, school teachers, clerks, etc., cannot afford to pay for extra food for their families, and this is one of the chief causes of the present discontent which is prevalent throughout Germany. The only contented people are the profiteers, called "Scheibers," who rank from the millionaire contractors, who have licenses from the government to purchase entire cargoes as they arrive on ships or in freight cars on the railroad, down to the small "Scheiber" who makes a living by eluding the police.

Nearly everybody is trying to do a little profiteering to augment his income.

Strikes occur almost daily in Hamburg, as the workmen are continually demanding increases in wages.

150,000 Unemployed in City.

The rathaus, or town hall, which was spattered with bullets during the recent Kapp revolution, is now protected by barbed-wire barricades to prevent it being seized by another revolutionary group.

It is estimated there are 150,000 unemployed in Hamburg at the present time, of whom about 40,000 are seafaring men thrown out of work by the German merchant marine. They are paid 9 marks a day, which makes a heavy burden for the taxpayers, who will have to give up 40 per cent of their incomes under the new law coming into force soon. Several encounters have occurred in the streets between the unemployed and the Reichswehr, as the new soldiers are called, who wear gray uniforms and caps, carry rifles and short swords, and have orders, if attacked, to shoot and throw hand grenades and if necessary to use machine guns, which are always kept in readiness for an outbreak.

Some of the more desperate characters among the unemployed have formed themselves into bands and go around the city at night holding up people in their houses, in stores and on the streets. The Reichswehr have orders to line these bandits up against a wall and shoot them when they are caught redhanded.

The housing problem is a very difficult one in Hamburg, as thousands of workmen have come into the city from the smaller towns with their families, the unemployed allowance being larger here than in their own districts.

The American Express company and the International Mercantile marine are the only American firms which have so far opened offices in Hamburg.

Indian Village 1,200 Years Old

Though American history dates back but a little more than four hundred years, there is a village in the United States that is known to be at least 1,200 years old. It is the Hopi Indian village of Walpi, on the government reservation in the Arizona desert. The village still stands on the extreme point of a perpendicular-walled mesa, 250 feet above the floor of Keams canyon. It was originally built in this unusual spot for protective purposes, and it would be quite impossible to scale the rocky cliffs if the Indians did not want you to do so. Walpi is 112 miles from the nearest railroad town, Holbrook, Arizona.

Turkey's "Tree of Fate" Destroyed by Storm

Jerusalem.—A storm recently wrecked a tree known as "bulmi" (tree of fate), which stood outside the city walls and formerly was used as a gallows. Tradition has it that the end of Turkey would come when "bulmi" perished. To prevent destruction of the Ottoman empire iron hoops were placed around the withered trunk and the branches were supported by strong posts. All efforts to save the tree were in vain. Orthodox Turks are convinced that the empire of the Caliphs is doomed since "bulmi" went to pieces.

One the Movies Missed.

Columbus, Ind.—The rescue of Mrs. John Sprague from death in a runaway would have done credit to a movie thriller. When her horse ran away Charles Hiatt cranked up his flivver and with David Marr on the running board, gave chase. As the auto passed the horse Marr made a flying leap, grabbed the reins and brought the animal to a standstill on the brink of a high embankment.

War Dog Dies.

Shadyside, O.—Cammie, a dog which served thirteen months in the third division in France, is dead at the home of his adopted owner, John Hays. The dog was found in the town of Cohan, north of the Marne, during the Aisne-Marne offensive, and became the division mascot

NEWS REVIEW OF CURRENT EVENTS

Third Party Movement Comes to Grief in Bolts and Splits.

PLATFORM PREVENTS FUSION

La Follette Declined to Lead the Radical Hosts—Labor and Single Taxers Nominate—Important Sedition Trial in Chicago—Vermont Will Not Aid Suffrage—Germans Yield at Spa.

By E. F. CLIPSON.

The movement to amalgamate various organizations of Socialists, farmers, laborers, intellectuals, radicals, single taxers, idealists and others sailing under different party designations, into a third party steered by the Committee of Forty-eight in convention at Chicago, failed. At one time prospects of fusion appeared rather favorable; when the 48-ers marched in a body to the convention of the Labor party being held simultaneously, and amid a great love feast and every appearance of fraternity united the two conventions. Soon the Single Taxers, the Nonpartisan league, the American Party of Texas (former Governor Ferguson), the American Constitutional party (Hearst) and the World War Veterans, an independent organization of ex-service men, were in the fusion.

A platform carrying the principles, aims, demands and desires of all of them would have contributed materially to the paper shortage. It could not be framed, much less printed, and became an insurmountable obstacle. Cleavage was along pink and red lines. Labor which was red—at least red-blooded—had the best working organization and pushed through the adoption of its planks, leaving little chance for the pink or parlor radicals led by Amos Pinchot, George L. Record and J. A. H. Hopkins. First the Single Taxers, who wanted only one plank and could not get that, bolted. Then Senator La Follette of Wisconsin, who was expected to be the messiah of the movement, found the platform too radical and refused to run on it. Then the fusion dissolved in bolts and fadeaways. Governor Ferguson went back to Texas, representatives of the Nonpartisan league announced they would have nothing to do with the new third party, the more radical of the 48-ers were swallowed by the Labor party, the remainder withdrew, while the American Constitutional party was lost in the shuffle.

The Labor party and the Single Taxers serenely proceeded to carry out independent programs and each nominated a presidential ticket. The only victory was achieved by the Labor party which captured Parley P. Christensen, an attorney of Salt Lake City, Utah, one of the original 48-ers, and made him its candidate. Max S. Hayes, labor leader of Cleveland, O., was nominated for vice president. Pennsylvania, failing to land its favorite sons, Governor Sproul and Attorney General Palmer, as the standard bearers, respectively, of the Republican and Democratic parties has achieved its ambition to have a presidential candidate for the Single Tax party nominated Robert C. Macauley of Philadelphia, with R. C. Barnum of Cleveland, O., as a running mate.

After eight weeks of effort and the examination of several thousand veniremen, a jury was finally secured and the trial begun in Chicago of William Bross Lloyd and 19 other officials and members of the Communist Labor party, charged with conspiracy to overthrow the government. Prosecution is by the state of Illinois and follows the action of a special grand jury which last January indicted the defendants, after a series of spectacular raids on their headquarters and meeting places by State's Attorney Hoyne. Lloyd is a millionaire resident of Winnetka, Ill., who long has been identified with radical movements in the capacity of leader and financial assistant. Indicted with him were members of the national, state and Cook county executive committees of the party, secretaries of local branches, members of the organization and propaganda committee, organizers and agitators.

The trial is being conducted before Judge Oscar Hebel of the superior court and presents an array of legal talent such as never assembled before in a case involving radicals and their actions, unless the famous McNamara trial at Los Angeles be excepted. Leading counsel for the defense is Clarence Darrow, who occupied the same position in the McNamara case, and his principal assistants are William S. Forrest, a famous criminal defense lawyer, and William A. Cunnea, prominent Socialist attorney and former candidate of that party for state's attorney of Cook county. Associated with Prosecutor Hoyne are the full legal strength of his office and eminent counsel from the outside, including Attorney Frank Comerford as special prosecutor. The latter in the past has been identified with some of the biggest labor cases on the defense side, this being his first essay at the role of prosecutor in an important trial of any nature. He is regarded as an authority on mass and social problems, and returned a few months ago from a study in Europe of bolshevism and its effects.

The state scored in the preliminary sessions of the trial in securing the admission as evidence of acts and speeches of the defendants of a period prior to the passage of the state sedition law of a year ago. The prosecution is endeavoring to show that the defendants have declared themselves to be in full accord with the Moscow manifesto adopted in Moscow, Russia, by the third international congress in March, 1919; that the congress was composed of revolutionary socialists from Europe, Asia and America; that it was held for the purpose of forming a manifesto or program which would outline the means by which constitutional governments might be overthrown and dictatorships of the proletariat established, and all nations be governed from Moscow. Also that the Communist party is affiliated with the international body and is an integral part of the Russian organization; and that the defendants state in their platform that they are for the overthrow of the government of the United States. The state further contends that they advocate mass action, in other words, proceedings from the shops and factories to capture and annihilate the apparatus of government and that they tell the workers that the Constitution cannot be amendable in their behalf, and therefore must be destroyed.

The defense has not, at this writing, been outlined. Volumes of testimony are expected. It is the first case under the Illinois sedition law and if won will present that law as a model for other states as well as for congressional enactments. On account of the prominence of the defendants and the effect the decision will have on radical movements in general, it looms as one of the most important trials of recent years.

Gov. Percival W. Clement of Vermont has at last clarified his position in regard to the woman suffrage amendment, by refusing to call a special session of the legislature to consider or ratify the act; in spite of reports that he had been urged to do so by Senator Harding, Republican presidential candidate. Inferentially, the governor takes a rap at the Supreme court of the United States and also charges that there is too much lobbying in connection with constitutional amendments and other important legislation. As a reason for refusing to call a special session, the governor states that the present legislature was elected before the question of ratifying the suffrage amendment had arisen and the people of the state have had no opportunity to express themselves on the issue. He proposes that the matter be taken up by the next legislature and that candidates for election be required to declare themselves on woman suffrage. He alludes to the recent decision on prohibition by saying that the Constitution "as it is interpreted by the Supreme court today threatens the foundation of free popular government." Governor Clement declares: "The sixteenth amendment to the Constitution (on federal income tax) had been lobbied through congress and the s... legislatures by federal agents, and ... eighteenth (prohibition) had ... forced through by 'powerful and ... sponsible organizations operat... through paid agents' and it is ... proposed to force through the ni... teenth amendment, for woman ... frage, in the same manner and ... without the sanction of the freem...

PIPE SNOW TO DESERT

Arid Wastes of Arizona Transformed by Engineer.

Charles H. Spencer Found Hidden Water Supply From San Francisco Peaks.

Phoenix, Ariz.—Solving a problem that for years had puzzled the greatest engineers of the country, Charles H. Spencer has brought billions of gallons of water to the arid lands of Arizona. The water comes from an underground flow on the snow-capped San Francisco mountains. The mountains, 12,611 feet above sea level, are of volcanic origin, and the total precipitation is equal to nine and one-half billion gallons a year.

Irrigation experts had sought for years to solve the problem of saving this water, which was going to waste, and which, when turned on Arizona's deserts, would mean millions of acres available for use. Mr. Spencer spent four years searching through the mountains, making careful tests and examining the rock formations.

His tireless labors were rewarded when he discovered a rim of dacite cement, which carried the water to the stratums below. He found that by piercing these lower stratums he could reach the underground flow, and in the spring of 1918 he filled the first of his reservoirs, Crater lake, with 150,000,000 gallons of water of true underground flow.

Mr. Spencer used seven extinct craters for reservoirs, with a combined capacity of 2,000,000,000 gallons. There will be no such thing as pumping costs. There is not an ounce of power required anywhere, for it is entirely gravity flow. By solving the secret of the hidden water supplies he has made it possible for arid lands to be transferred into beautiful gardens, rich farming lands and verdant grazing grounds.

Has an Artistic Hen.

Cottage Grove, Ore.—J. W. Eddy has discovered to his entire satisfaction that the rations fed to hens have a great deal to do with the kind of eggs which the hens produce. A few days ago he gave his hens a ration part of which was sunflower seeds. Since then one of the hens has produced an egg with a perfect sunflower pictured in the shell. He has decided to name his place the "Sunflower chicken ranch."

CANADA'S EXPORTS DECREASE

Drop $19,717,349—Imports Increase Heavily, Says Dominion Report.

Ottawa.—The United States now is Canada's largest customer, according to export figures for the year ending May 31.

The total exports to that country, aggregating $472,449,294, showed an increase of $22,015,228 over the previous fiscal year, while exports to the United Kingdom, amounting to $450,479,143, showed a decrease of $101,729,035.

Total exports were $1,259,208,294, a decrease of $19,717,349, and which was accounted for by the cessation of munition shipments aggregating $229,694,196.

Total imports of dutiable goods were $752,077,597, an increase of $236,770,565, and of free goods $398,577,061, an increase of $37,138,564. The heavy increase in imports was principally from the United Kingdom, the United States, British West Indies and Cuba.

RICE EXPORTS GROW

Cereal Shipped to Japan in Increasing Quantities.

Unlimited Opportunities for Future Development of Industry, Says Agricultural Department.

Washington.—The United States exported more than 300,000 pounds of rice to Japan during the first three months of this year, according to figures of the bureau of markets, United States department of agriculture. In contrast, less than a thousand pounds of this commodity were exported to Japan during the entire year of 1919.

The average rice exports of the United States to all countries during the period 1910-1914 were less than 20,000,000 pounds a year. Today the exports range from 30,000,000 to 60,000,000 pounds a month.

This enormous export business has been made possible by the development of the rice industry in California based upon experiments made by department of ariculture scientists in growing rice in communities where it was said to be impossible to grow this commodity. The first commercial field of rice in California was planted in the Sacramento valley in 1912. There are now a dozen rice mills in operation in the Golden state, which handled $21,000,000 worth of rice last year.

There is an almost unlimited opportunity for future development of this industry in the United States, say the department's specialists. The rice growers are most enthusiastic over the outlook, and declare that they are going "to teach the American people that rice is one of the finest foods in the world."

A whale is able to remain under water for an hour and a half.

Canning Time

The Canning season is at hand and want to call your attention to the ny conveniences we carry in this e at our store:-

Fruit Jars--all kinds

ECONOMY wide-mouth and Self Sealing.
IDEAL GLASS TOP, the Quick Sealing jar.
MASON JAR, the old reliable jar.

Red and White Rubbers--

Don't take chances of spoiling your fruit--use our Rubbers, they are the best to be had.

Kettles and Racks

We have a full line of Aluminum and Enamel Kettles--just what you need for canning and preserving work. Our ANDROX Tray for Cold Packing and Blanching, best tray on the market and fits any boiler; also have Individual Racks for cold packing.

A FLORENCE Oil Cook Stove will make your canning a pleasure

NOTICE TO CONTRACTORS

For the construction of D. D. improvement known as D. D. No. 105, Hancock County, Iowa.

Notice is hereby given that the Board of Supervisors of Hancock County, Iowa, will be in session on August 2, 1920, at 1 o'clock P. M. at the Court House in Garner, Iowa, for the purpose of letting the contract for tile and construction work in Drainage District No. 105, Hancock County, Iowa, to the lowest responsible bidder —said work to be let, specifying the work to be done and the time fixed for the commencement and completion of the same, to-wit:

Average haul about two miles.

Main Tile

Size	Length	Av. Cut
30	3500	7.10
28	4100	8.15
24	2900	7.00
20	1536	6.40

1 Bulkhead 12 cu. yards.

	Dim.		Depth	Brick

Br. 11	12	280	5.10

Work to be commenced within thirty days of the contract is awarded, and to be completed on or before the first day of July, A. D. 1921.

All ditches and drains to be constructed in all respects in accordance with the plat, profile and specifications of the district filed by the Engineer in the Auditor's Office subject only to such changes and alterations as may be made as provided by law.

Sealed bids will be received at the office of the County Auditor of Hancock County, Iowa, up to 1 o'clock P. M. on the 2nd day of Aug. 1920.

All bids must be made at a fixed price per station of 100 feet for each size tile and also a fixed price for section complete in all respects including intakes and headwall and must also include the schedule of overdepth adopted by the Board of Supervisors of Hancock County and on file in the Auditor's Office for possible overdepth or underdepth beyond the average depth specified.

Each bid must be accompanied by a cash deposit or certified check in a sum equal to ten per cent of the total amount of the bid, as a guarantee of the good faith of the bidder.

The contract for the work of construction of said ditches and drains will be let to the lowest responsible bidder, or bidders, but the right to reject any or all bids and also the right to adjourn time of awarding contract is reserved.

The party to whom any contract is awarded will be required to attend at the office of the Auditor of Hancock County, Iowa, within ten days after said award and execute a contract thereby agreeing to all the provisions terms and conditions thereof and shall also file with the County Auditor a bond subject to his approval for the sum equal to the twenty-five per cent of the amount of his bid, and in case the party to whom any work is awarded fails to enter into this contract and furnish bond within ten days as therein required, the deposit of such party shall thereupon become forfeited to Hancock County Drainage District No. 105, together with all right under said award.

The deposit of the unsuccessful bidders will be returned to them within twenty-four hours after demand and the deposit of the successful bidder will be returned to them upon their executing the contract and filing with the County Auditor the bond as therein required.

By order of the Board of Supervisors.

Dated at Garner, Iowa, this 14th day of July, A. D., 1920.

County Auditor

Local News!

Mrs. L. T. Putnam, of Belmond, was a Klemme visitor last Friday.

Mrs. J. E. Baumgartner was a Garner visitor last Friday afternoon.

Mr. and Mrs. Chris Jacobs of Garner, were here Monday morning.

Mr. and Mrs. Clarence Johnson were Mason City visitors Sunday.

Mrs. R. A. Jorgenson was a Garner visitor Monday morning between trains.

Henry Church and daughter Octave came over from Garner last Wednesday for a visit with Klemme friends.

Mrs. M. O. Hocum and daughters, Avis and Helen, returned last week from their visit with relatives and friends at Grinnel and other points.

Mrs Henry Baack came from Woden Tuesday of last week and returned Friday after visiting Klemme relatives.

Mrs. Leo Wilkins and children, of Meservey, were Klemme callers Saturday. They had been visiting at Belmond.

Bert Mathews returned Saturday from a week's vacation spent in Minnesota and points in Iowa. The vacation added a little tan to Bert's complection but otherwise he looks normal.

A certain Klemme man remarked to us that he heard a fine sermon Sunday morning. We asked him why it was so good and he remarked in a casual way, "Well, you see it did not disturb my thoughts at all."

Mr. A. K. Zinn came Friday for a visit with his brother, Dr. George Zinn and nephew, Dr. R. N. Reuber. A. K. came here from Colorado where he has been looking up land and also purchased a section. He is in business in Battle Creek, Michigan.

Tom Nelson returned last week from his trip through the West where hes pent two or three months traveling about, seeing the sights and visiting. Tommy likes the West all right but says old Iowa is the best place after all.

Mrs. E. S. D. Kahrs left Saturday morning for Nevada, Iowa, being called there by the illness of her brother. Tuesday they left from that point for Rochester, Minn., where her brother expects to undergo an operation soon.

CAUSE OF MUCH WASTE OF FOOD

Large Losses of Farm Products Due to Improper Handling After Maturity.

PHOTOGRAPHS GIVE REASONS

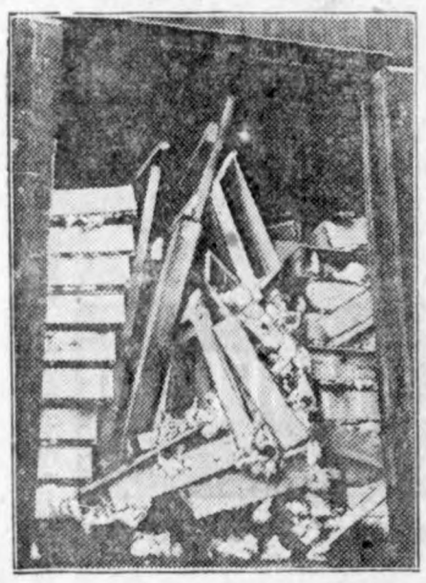
Problem of Proper Care of Perishable Fruits and Vegetables Appears Complex and Confusing Because of Details.

In the photographic files of the bureau of markets, United States department of agriculture, are many sets of pictures which tell a story of blasted hopes—a story of unnumbered growers of fruits and vegetables who have toiled early and late through the rains of the spring and the heat of the summer, only to meet with disappointment at the end of their labors, because, after doing all else well, they failed in one great essential—the method of handling their product after it matured. The photographs in those files, taken at numerous railway terminals, show quantities of celery, onions, potatoes, lettuce, apples, peaches, egg plant, and many other perishable products, mutilated or decayed because somebody failed to do his job of picking, packing, loading, or refrigerating properly.

The lesson is all very plain when one looks at these photographs and it is not difficult to picture the disappointment and loss of the growers and shippers represented. But it is by no means a simple lesson. Until one becomes familiar with his own special line the problem of proper handling of perishable fruits and vegetables appears very complex and confusing, so many are the details to be learned. Nowadays much of the grower's produce is shipped long distances, and if a full reward for the season's work is to be reaped he must learn the special requirements for his particular product on the particular journey that it is to take. Each item in the whole list of products has its peculiarities which must be reckoned with when it comes to marketing. The manner of picking, the size and shape of the crate or other container to be used, the fullness of the pack, the amount of pre-cooling, if any, the kind of freight car to be used, how many tiers can be loaded in the car—these and numerous other items have to be determined.

Useless Sacrifices of Food.

The bureau of market's photographs and the reports from the bureau food inspectors at various important terminals indicate that a large number of shippers who have been "in the game" for years persist in practices that are costing them dearly. A few seasons ago careless loading of western apples caused an average breakage of 50 box-



Profits of Summer's Work Lost Because of Careless Loading.

es per car in shipments to New York city, and experienced commission men in northern cities estimated that 10 per cent of the oranges shipped from Florida decayed before reaching the consumer. In 1918 the annual production of cantaloupes in the southwestern states was estimated at 4,000,000 standard crates of 45 melons each, and investigations showed that more than one-tenth of these melons reached the consumers so green as to be practically valueless for food.

The mistakes which western cantaloupe growers and shippers made illustrate the problems with which the producers have to deal. Many did not realize that to insure desirable eating and keeping quality, the cantaloupes destined for long-distance shipment should be picked just about the time at which they will slip cleanly from the stem, or slightly before this stage is reached. It was found, also, that the common practices in handling the fruit were unnecessarily rough and that instead of allowing considerable time to elapse between picking and loading into iced refrigerator cars, they should have been loaded as soon as possible. It was demonstrated that the wrapping of cantaloupes was undesirable because the wrappers retarded the cooling and often caused the cantaloupes to become moldy after they were removed from the refrigerator cars.

Why Strawberries Decay.

Strawberries may be cited as another example. The most successful shippers, including some in the Ozarks who send their product several hundred miles, have learned from experience and through investigations carried on by the federal bureau of markets experts and others, that quick cooling after harvesting is an essential in the proper shipment of this fruit. The chief strawberry decay is one that develops very rapidly under favorable temperatures, and the fungus which causes it gains a foothold in bruised fruit. Therefore poorly handled berries, even if shipped in properly refrigerated cars, will soon decay after being removed from the iced car. This is a point of much importance to the shipper, for a large number of small dealers have no facilities for keeping their stocks of fruit cool.

Problems for Celery Shippers.

There are problems also for shippers of lettuce and celery. It has been found, for example, that head lettuce cut so as to eliminate the lower two or three leaves and deprived of all diseased leaves, develops far less decay in transit than that handled in the manner followed by many shippers. Celery is often injured because it is loaded too high in the car to permit proper circulation of air.

The United States department of agriculture has given much time to the study of right and wrong methods of picking, packing and loading fruits and vegetables, and if a shipper is in

Manner of Picking Has Much to Do With Fruit Reaching Its Destination in Good Condition.

doubt, or finds that his produce is not reaching its destination in good condition, he should write for information, stating his case clearly. Inquiries should be addressed to the Bureau of Markets, United States Department of Agriculture, Washington, D. C.

BIG VALUE OF SUDAN GRASS FOR PASTURES

Results of Experiments Conducted at Kansas Station.

Six Holstein Cows Pastured on a 5.4 Acre Upland Field Were Unable to Keep Crop Eaten Down—Profit $47 Per Acre.

Additional evidence of the high summer pasture value of Sudan grass, as claimed by the United States department of agriculture, is seen in the results of experiments recently completed by the Kansas agricultural experiment station. It is declared that the grass will prove very important as a summer pasture grass, especially in the central West.

In a test carried out on the experiment farm at Manhattan, Kan., six Holstein cows were pastured on a 5.4 acre upland field of Sudan grass from July 10 to October 11. The grass was seeded June 6, and during the early part of the season cows were unable to keep the grass eaten down. This made it necessary to mow the grass in the latter part of July; and 7.33 tons of field-cut hay were obtained in addition to the pasturage.

Estimating the value of butter fat at 60 cents a pound and the skim milk at 50 cents per hundred, the six cows produced $183.09 worth of butter fat and skim milk above the cost of the grain fed in supplementing the pasturage. Crediting the field in addition with the 7.33 tons of hay at $10 a ton, gives it a total credit of $256.39, or $47.47 an acre. If the milk had been sold at 30 cents a gallon the credit for the pasture would have amounted to $73.55 above the cost of the grain.

The results of this definite experiment added to a large number of unsolicited testimonials of farmers, it is said, make the value of Sudan grass as a summer-pasture grass in favorable seasons seem beyond dispute.

GENERAL FARM NOTES

The main objects of cream ripening are to increase the churnability of cream and to develop desirable flavors.

* * *

It is impossible to produce clean milk and cream unless the cows, stable, milk utensils and separator are clean.

* * *

Remember that plants root shallow and that the roots run deep. Deep plowing and shallow cultivating suit the plant.

FORECASTS ARE OF MUCH VALUE

Illinois Farmers Highly Pleased With Aid Bulletins Had Been at Planting Time.

ENABLED TO FIGURE AHEAD

With Prediction of Rain Everybody Got Busy With Planters and Crop Put in Ground Ready to Be Soaked and Germinated.

That the farmers of the country find the weekly weather forecasts of immense value, especially during the growing season, is evidenced by a letter of appreciation recently received by the weather bureau of the United States department of agriculture from an Illinois farmer. He was highly pleased with the aid the forecasts had been to him and his neighbors in planting their corn. In part he wrote:

Of Untold Benefit.

"These forecasts have been of untold benefit to us this, an unusual backward spring, and we feel greatly indebted to you. With this very reliable advanced information you are furnishing us we are able to figure ahead and keep planting right up. For instance, this section began plowing for corn last week. When we received your bulletin predicting rain for Tuesday or Wednesday of this week, we got busy with our corn planters, some even turning the face of their calendars to the wall and letting one Sunday get away from them. To make a long story short, when your predicted rain struck us Tuesday noon and is still coming down this, Wednesday, morning, it found over one-third of the Illinois corn crop in the ground ready to be soaked and germinated. Had we not been put wise by your office am confident that not one-sixth would have been planted. While your daily weather reports, made up by your local observer, help out some, they cannot be compared with your weekly forecast sent out from Washington. I have watched it quite close since you began this part of the service five or six years ago, and have found it most reliable and dependable."

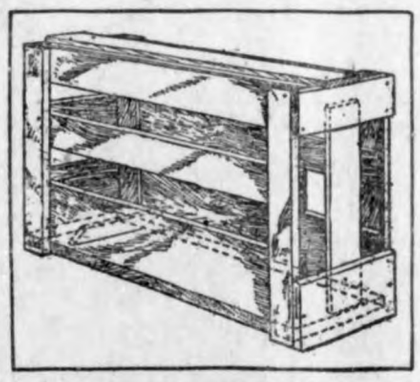
Weekly Forecast.

In addition to the daily weather forecasts published in practically all newspapers, the weather bureau issues on Saturday of each week a forecast for the six days beginning the following Monday. These forecasts are made for nine separate districts covering practically the entire United States, and necessarily are less specific than the daily forecasts. They are given wide distribution during the growing season, and the letter quoted records but one instance, among many, in which they have proved of great value to farmers.

CRATE FOR SHIPPING SWINE

Neatly Built Affair, With Shipper's Name and That of Farm, Is Good Advertisement.

A strong shipping crate for hogs is an easy thing to make. It should be well built of pine. A neatly built



Pine Crate for Hogs.

crate, a shipping tag bearing the shipper's name and that of his farm often will aid in selling stock. In case the shipment is to be a long one, wire a pan of water in one corner.

GOOD MARKET FOR CHICKENS

Minnesota Expert Predicts Strong Demand for All Forms of Poultry This Autumn.

N. E. Chapman, poultry extensionist at University farm, predicts good prices for all forms of poultry next fall, and says that chicks hatched by July 1 will get into the "soft roaster" class, weighing from one and one-half to four pounds each. Mr. Chapman also foresees a strong demand for broilers weighing from one pound to two pounds, to be dressed out and frozen by the packers for winter trade. During the early summer months the expense of feeding can be reduced and a larger percentage of the chickens reared because of more favorable conditions.

GET INFORMATION ON PRICES

Bureau of Markets, Department of Agriculture, Will Give Desired Market Reports.

Do you want direct information regarding market prices? Ask the bureau of markets, United States department of agriculture, Washington, D. C., to tell you about its market news services, stating the product in which you are interested.

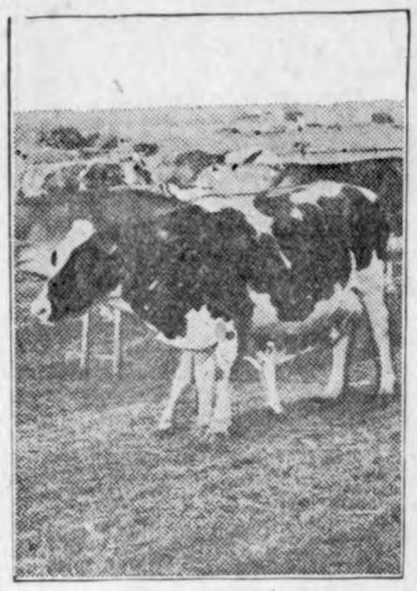
DECREASE IN NUMBER OF CATTLE AND HOGS

Swine Show Falling Off of 10 Per Cent in Births.

About 22 Per Cent Fewer Births of Calves This Year as Compared With 1919, According to Reports to Federal Bureau.

A falling off in the numbers of cattle and hogs in the United States occurred during the first four months of this year, as compared with the like period last year, according to reports of special livestock reporters of the bureau of crop estimates, United States department of agriculture.

In the case of hogs, the births during January, February, March and April were about 10 per cent fewer than in the same months last year. The marketings have fallen off about 15 per cent, the farm slaughter was about the same in both seasons, but



Dairy Herd Near Wichita Falls, Texas.

the deaths on farms this year are over 40 per cent heavier than last year to May 1. Taking into consideration both the births and the deaths (from all causes), it appears that there has been a relative reduction of about 5 per cent during the first four months of this year as compared with the trend during the first four months of last year.

The births of calves from January 1 to May 1 were about 22 per cent fewer this year than last year. The net disposition of cattle by marketings, farm slaughter and deaths was about 9 per cent greater than last year; it appears that there has been a relative reduction of about 6 per cent in total number of cattle as compared with last year during the four months January 1 to May 1.

PLOWING FATAL TO INSECTS

Countless Numbers of Crop Pests Can Be Destroyed by Disking Ground During Fall.

Various field insects pass the winter in the soil. Some of them make earthen nests lined with silk, while others hide at the base of the roots of plants. A. G. Ruggles, state entomologist of Minnesota, thus explains how countless numbers of crop pests can be destroyed:

"When the insect is in the transitional period between the larva or worm and the adult they are very susceptible to disturbances. Disking or plowing the ground in the fall disturbs these forms and many of them die. It is also known that alternate thawing and freezing weather has a destructive effect upon insect life. Many insects can endure freezing alone, but alternate freezing and thawing is fatal.

"Also many of the more delicate forms, if the plowing is done properly, can be covered so deeply with soil that they are unable to reach the surface the following year. Many insects exposed by the plow are also devoured by birds. For these reasons disking or plowing are operations recommended by all economic entomologists."

SUDAN GRASS YIELD FOR HAY

Average About Two and Half Tons Per Acre—Cut After Plants Have Passed Out of Bloom.

Cut Sudan grass for hay after the plants have passed out of bloom, but before the seed has become hard. An average yield is about two and a half tons of dry hay per acre, as compared with about three tons for sorghum on the same kind of land and two tons of millet.

RAPID GROWTH OF CHICKENS

More Advantageous to Feed Five Times During Day Than Three—Overfeeding Harmful.

Undoubtedly chickens will grow faster when fed five times than when fed only three times daily, but it should be borne in mind that more harm can be done to the young chicks by overfeeding than by underfeeding.

AUTUMN SUPPLY OF LETTUCE

Row Sown in Middle of August Will Insure Crop of This Most Succulent Vegetable.

A row of lettuce sown the middle of August will insure a fine fall supply of this most healthful and succulent vegetable. The quality will be even superior to the spring grown. Salamander is the best kind for late crops.

PE-RU-NA
Made Me a Well Man

Mr. Louis Young, 1652 Clifford St., Rochester, N. Y., writes:
"I suffered for thirty years with chronic **bowel trouble, stomach trouble and hemorrhages of the bowels.**
We bought a bottle of Peruna and I took it faithfully, and I **began to feel better.**
My wife persuaded me to continue, and I took it for some time as directed. **Now I am a well man.**"

Suffered thirty years with stomach trouble and hemorrhages of the bowels.

Even More Serious.

"Did you say that campaign manager used money?" inquired the horrified constituent.

"He did worse than that," replied Senator Sorghum. "He wasted it."

It is a great act of life to sell air well.

Two Views.

"What glorious roses you h exclaimed the optimist.

"But don't they attract a l bees?" queried the pessimist.

There is little consolation in the first to discover your own take.

Where is Relief From Blazing Skin Diseases?

Must I Endure Forever the Torturous Itching?

The skin is fed from the blood, and upon the condition of the blood depends whether or not your skin will be healthy and free from boils, pimples, scaly irritations, red eruptions and other disfiguring and unsightly disorders.

The sensible treatment that will show real results is a remedy that will cleanse the blood thoroughly and kill the germs that cause the trouble. And for this purpose no remedy ever made can approach the record of S. S. S. which cleanses the blood of the disease germs, at the same time building up the general health.

NOT MUCH VARIATION THERE

Old Resident Entirely Truthful When He Called the Town's Death Rate "Won'erful Steady."

Weary after 12 months' hard work, the pretty typist sought solitude among the healthy hills of Halehearty. The advertisements had attracted her. Halehearty was described as the best, prettiest, finest and everything-elsest spot in the world.

"Tell me," she said on her first day, when she met a staunch old relic of the district, "what is the death rate in Halehearty?"

The local walking advertisement nodded his head reassuringly.

"Won'erful steady, ma'am—won'erful steady!" he replied. "One death to each person."—London Tit-Bits.

Siberian Exports Ready.

According to a dispatch from Omsk, Siberia, a committee has been formed to prepare energetically for the opening of navigation in the Obi and Yenisei basins. Raw materials valued at $75,000,000 are being concentrated for export, comprising 2,500,000 squirrel pelts, 500,000 pieces of various furs, 360,000 pounds of various bristles, 2,700 tons of wool, 2,700 tons of flax, besides linseed oil, linseed and other raw materials. The first portion is estimated at 10,000 tons and efforts will be made to increase the second and third.

Religions of the World.

According to reliable statistics carefully-made estimates the adherents of the leading Christian religions number: Roman Catholics, 270,000,000; Protestants, 171,650,000; making a total of 564,510,000 Christians. The leading non-Christian bodies number: Confucianists, 300,830,000; Mohammedans, 221,825,000; Hindus, 210,000,000; Animists, 158,270,000; Buddhists, 138,031,000; Shintoists, 25,000,000. To these be added Jews and the unclassified, the total non-Christian number 1,081,981,000, who with the Christians make a world's population of 1,646,491,000.

Up to Her Old Tricks.

Skeptical Widower—May, is it really you?

Spirit of Dead Wife—Yes, dear, you don't doubt me, do you?

(Whereupon the excited man lights his lighted cigarette in his pocket where the matches are. A strong phurous smell invades the room. Violent heat in the region of his pocket.)

Widower—It's you, all right, dear, but you've got your hand in the wrong pocket. My money's in the overcoat.—Yale Record.

A laugh costs too much if it is bought at the expense of propriety.—Quintillian.

"AND HERE IS HIS CROIX DE GUERRE."

Synopsis.—In a base hospital at Neuilly, France, his face disfigured beyond recognition, an American soldier serving in the French army attracts attention by his deep despondency. Asked by the surgeons for a photograph to guide them in making over his face, he offers in derision a picture of the Savior, bidding them take that as a model. They do so, making a remarkable likeness. Invalided home, on the boat he meets Martin Harmon, New York broker, who is attracted by his remarkable features. The ex-soldier gives his name as "Henry Hilliard," and his home as Syracuse, New York. He left there under a cloud, and is embittered against his former fellow townsmen. Harmon makes him a proposition to sell mining stocks in Syracuse, concealing his identity. He accepts it, seeing in it a chance to make good and prove he has been underestimated.

CHAPTER III.—Continued.

—3—

He knew, from meticulous study and practice, the full effect of his manner, which was distinguished, patrician. He knew the almost irresistible magnetism which had befallen him by accident. He had been prepared—in his own imagination—for the battery of interest which was promptly trained upon him. And yet, as he pursued his passage toward the desk, he faltered in pride, he felt as though the sorrowful eyes of all Syracuse were riveted upon him; the well-recalled surroundings unmanned him, and he was compelled to halt, lift up his hands in token of surrender, and to cry out: "This is not I! This is not I! It is the man I might have been—if you and I had understood each other!" So great was his anguish that in that moment he honestly believed that it was the equal fault of the city, and of himself, that he had gone forth discredited.

Behind the desk stood a clerk and—Hilliard's heart tripped—the manager who had tendered him the ultimatum. Hilliard's pen spilt a blot of ink on the register; his ears were tuned for the speech of recognition which would blast his dreams of triumph, and send him off again in multiplied disgrace.

"Yes, sir," said the clerk with extreme deference, "and about what price, sir?"

The manager, who had been scrutinizing Hilliard intently, whispered something to the clerk; the clerk bit his lip and looked up sharply; the prodigal winced, and stiffened. "Parlor C—ten dollars?" asked the clerk. "Very comfortable room, sir . . . front!"

The manager, as Hilliard retreated, said impatiently to the clerk: "What's the matter with you, Jimmy, anyway? Don't you know how to size up a man yet? Don't ask a man like that what he'll have—tell 'em what we've got!"

Upstairs, Hilliard went limp from the reaction. He had doubted what he knew—and this was proof of his lack of innocence. But the manager—who two years ago had called him by his first name—the manager had looked him full in the face, and made not the faintest sign of recognition!

It was in improved confidence, then, that he went down to dinner; and deliberately chose a central seat in the most popular of the three available rooms. He was actively eager to be observed; now that he had passed his first examination, he craved test after test; no inquisition could be too urgent for him. And at the nearest table sat a business man he knew, and a girl he knew; from their matter-of-fact attentiveness, he judged that they had been married during his absence; they gazed interminably at him, but only in admiration. He mentally checked off his list—that made a trio of old acquaintances who failed to know him. Facing him, a dozen feet away, sat a man who had been Hilliard's employer for an epochal six weeks—this man, too, was obviously interested, but unenlightened. Four! A dinner party, comprising six girls and six young men, filed gayly past him; every one of the twelve he had known well, some of them intimately; they looked down at him in passing, and, without exception, went on in ignorance. A tiny roseleaf of a girl was rather noticeably attracted to him; she spoke to her partner, who turned, and stared, and nodded in the bored fashion of any escort to whom a handsome stranger is pointed out; and Hilliard could have laughed aloud at the irony of the incident. They had known each other for a dozen years, that girl and Hilliard; in the dozen and first, her mother had forbidden him her house.

He dined with considerable leisure, and smoked a cigar almost to the end before he left the table. When he quitted the room, it was with practical assurance that his gravest fears were groundless, but for an additional precaution he read an evening paper in the lobby and endured in safety the inspection of a score of men who had known him well enough to refuse to loan him money.

At half-past eight, vastly heartened and refreshed, he equipped himself with certain documents from his suitcase, and called for a taxicab. The address he gave the driver was high on the eastern hills; during the last half mile, Hilliard was peering out at the shaded lights of houses where he had played in his earlier youth. The car stopped; Hilliard went up a stone-flagged walk, up broad stone steps, and stood on a huge veranda. He was calm, and yet his knees were discomfortingly unsteady; he was determined, and yet his heart was pumping in uneven beats; for the moment, his throat was dusty dry.

As he gained the level of the veranda, there was a stir of activity off to the right, and an erect, middle-aged man clambered out of a hammock, and came briskly forward. Back in the shadows Hilliard could detect the soft outlines of a white dress.

"Yes?" The middle-aged man was politely brusque.

"Is this . . . Mr. Cullen? Mr. James Cullen?"

"Yes sir!" The middle-aged man was very convincing about it. "Yes, sir. What can I do for you?"

Hilliard bowed stiffly from the hips—a touch of foreign courtesy which had its effect.

"If you're at leisure, Mr. Cullen, I should like very much to have a word with you. On—I think I may call it so—urgent private matters. My name is Hilliard. In brief, I've come up from New York today to bring you a letter from a young man named Richard Morgan."

"Morgan!" said the older man sharply, "Dick Morgan!" Back in the shadows there was a sudden rustle. "Where's he?"

"He's dead," said Hilliard. "He died in France." Mr. Cullen stood perfectly still, and Hilliard, watching him intently, was overcome by resentment at the knowledge that two years ago this man had held Hilliard's fate in his thick fingers.

"No!" said Mr. Cullen. "Of all things! Well, what d'you know about that! Dick Morgan dead!" There was surprise, but little poignancy in his tone. "Isn't that terrible! And over in France! . . . Angela, did you hear that?"

More rustling from the shadows, and a slim figure stepping out of them into the foreground; it was Angela Cullen, just over the brink of seventeen, exquisitely small and blonde, and profoundly agitated by the news. Hilliard bowed mechanically; he had remembered her as a vivid little hoyden. Queer, that his heart should skip a beat or two at beholding her now. But she had brought the first remembrance of untroubled days back to him, and the contrast hurt—abominably.

"Oh, dad!" she said with a quick intake of her breath. "Oh . . . dad!" And clung to him for refuge, staring the while with wide and fearful eyes at the tall stranger who had delivered the laconic message.

Cullen held her close, and cleared his throat. He was in the common-enough situation of a man who feels that he ought to be deeply moved, and isn't, and wonders why; and his transparent effort to be funereal was slightly overdone.

"It's a great shock to us—of course," he said, speaking slowly. "A great shock. . . . Oh! Mr. Hilliard—my daughter. Well, I must say I. . . . Suppose we sit down and talk this over—"

Hilliard bowed again; Mr. Cullen, his arm encircling Angela, led the way to the hammock and its reinforcement of wicker chairs. The trio was seated: Hilliard coughed delicately, and after that, there was a brief silence. Gradually, the air was charged with constraint. Here he was, and there was Angela and Mr. Cullen—all of them a little older, all of them a great deal more repressed, but even so, here they were, these three, just as they had sat in the same place, on the same sort of summer evenings, when Dicky Morgan wasn't yet anathema, and when . . .

"This . . . this thing happened some time ago, did it? You were abroad yourself?"

"Yes, I was."

"I want to hear about Dick," said Angela in a dry little voice. "Please! And . . . and who are you, Mr. Hilliard?"

"Angela!" said her father, reproachfully, but Hilliard, coughing with great vehemence, felt a sudden inrush of triumph which gave him confidence. It was the triumph of dramatic success; the consciousness that whatever might come next, he had actually appeared before people who knew him best, and that they saw a stranger. He smiled, as a churchman smiles.

"All I pretend to be is a friend of Dick's. I—"

"Oh! A friend!" Cullen's intonation was curiously warped.

"Perhaps you'll understand better if I go back to the beginning. Shall I?"

"Do." Cullen motioned him carte-blanche, and Hilliard took a long breath, and began.

"Back in May, 1915," he said, "I went to England and then to France to arrange some government contracts for copper products. In France, I was stunned—as everyone—by the backlash of the war. And like everyone else, I did what I could on the spot . . . bought tobacco for the soldiers, and all that sort of thing. It isn't a question of charity, once you see the circumstances—you simply look, and realize that the most you can do is so trivial in comparison with what there is to be done that you . . . well, you do all you can and wish to heaven it were ten thousand times more. And then you try to find out where your mite will do the most good, and it staggers you because there are so many places where they need everything you have and everything everybody else has. It so happened that a friend of mine was in one of the American surgical units at Neuilly. I couldn't spread my own little contributions over all the institutions that needed it—there wouldn't have been enough to notice, so naturally I spent most of my time and most of my money at Neuilly. The cases there are all severe. The men need more help than the average, and there was one ward in particular . . . I won't describe it to you, but the first time I ever set foot in it, I knew I'd found the place to take all I had to give. And it was there that I met this man Morgan." He paused a moment. "And Morgan needed me more than anyone else in the ward."

"Was he . . . hurt so badly?" The girl's voice was taut with feeling.

"Yes, badly," he said, "but that wasn't the point. He was alone. He was friendless. He was under the darkest cloud that ever man can live under. You know what it was, Mr. Cullen."

The older man nodded tardily.

"I have an idea," he conceded.

"Well, there he was—wounded, and marooned in France, and with a bad conscience. Perhaps you can understand why he got my sympathy."

"Poor Dick!" said Angela, barely above a whisper, and Hilliard, looking across at her, was stirred by vague intuitions which rendered him guiltily uncomfortable. It had simply never occurred to him in announcing the death of a man who had run away from Syracuse in disgrace, he might find pity and forgiveness waiting for expression. Was there still an opportunity for him to change his tactics, to admit that it was only the unregenerate soul and the outward countenance of Dicky Morgan that had perished, and to maintain that a new being, a penitent and resolute being, had arisen phoenixlike to make atonement for the wasted years that had been ended by shrapnel fire from the Huns? And suppose he did so, what would they say? If public opinion were to model itself upon the sorrow of poor little Angela Cullen, was it not better to confess at once, to wipe the slate clean, and to begin afresh? Had he said so much that the pathway to truth was closed—or was a lie well stuck to better than the truth, half told?

Morals, which are nothing but negative virtues anyway, hang on trifles. Hilliard was tottering on the utter-

"Was He Hurt So Badly?"

most edge of decision—and Mr. Cullen flung the weight of an aimless charge against him, and settled the matter out of hand.

"He certainly had plenty to be sorry for," said Mr. Cullen.

"Oh, dad!" said Angela, with a quick intake of her breath.

Virtuous, was Mr. Cullen. A churchgoer and a communicant, was Mr. Cullen. A giver of alms, and a friend to his friends—but in forgetting that the evil that men do shouldn't rightfully be allowed to live on after them, and in remembering, perhaps too clearly at that moment, the final interview he had held with Dicky Morgan, Mr. Cullen throttled repentance into a state of furious helplessness, and brought back Hilliard to his senses.

"Yes," said Hilliard, "he had plenty to be sorry for, and he was. Of his troubles here, I'm not capable of sitting as judge. Instead, I sat as confessor. So that you'll be more interested in that part of his life which you evidently haven't known about, and I have. He left here, I think, in December. He hadn't any fixed purpose; all he wanted was to find a place where he could begin over again on a fresh basis, and make a man of himself. . . . For that much, at least, you can give him credit."

"And I do," said Cullen, approvingly.

Hilliard, swept again by the nearness of deliverance from his deceits, leaned forward. A strong indorsement of Morgan's ambition at this juncture might yet have brought about a recantation.

"I'm glad you do, Mr. Cullen. . . . I think myself it was the only course he could have taken." He hung perilously upon the response; it would either justify or condemn his present attitude.

"That's probably why he took it," said Mr. Cullen. "Oh, I'm fair enough to him, Mr. Hilliard, but as for judgment—" He shook his head firmly. "What made him go to France?"

Hilliard sat back. The gates of truth clanged shut.

"That came to him as the logical course," he said shortly. "He'd met with some brother adventurers in New York, and they put the idea into his head. He had no money, so that he worked his passage across on the Mouette, a French tramp, in January, 1915. On the other side, he met a lieutenant of artillery who took a fancy to him. As you undoubtedly know, he spoke French like a native, and that made it easy for him. France is a land of papers, and of records; and papers and records can be created, shuffled—when there's a reason. The reason was that a republic needed men—and the lieutenant was willing to be a forger if that were a condition to his being a patriot. His conception of patriotism was to enlist every able-bodied man in the service of France. But at that time, the war was still rather exclusive as far as Americans were concerned. So that Dicky Morgan disappeared from earth—and there was a new soldier of the sixty-ninth Territorials by the name of Pierre Dutout . . . 'Peter Nobody.'"

"What!" said Mr. Cullen.

Hilliard shrugged his shoulders.

"I said he told me much about himself. He sailed under his own name, and I dare say you can verify that in New York. But when he landed, he took an alias. He had wanted to start over again, unhampered. Nothing could have been more opportune than this chance. See what it gave him! He simply dropped out of the world. . . . It was the possibility of losing himself utterly that first appealed to him. And there must have been a good cause."

"Yes," said Mr. Cullen absently. "There was. But . . . always theatrical, Dick was. That was so like him—to do just that sort of thing, and to do it just that way."

"As nearly as I could gather," said Hilliard, "he had been practically . . . er . . . ostracized here. Is that correct?" He noted that Angela flinched at the suggestion, and that her head was drooping very low.

"Y-e-e-s, but there was a good reason for it."

"Oh! dad!" said Angela, pleadingly, below her breath. "Please don't say things l-like that—I can't stand any more—"

"What his offense may have been, I don't know," said Hilliard, plunging doggedly into his narrative. "But he left town, so he told me, in a tremendous revulsion of feeling. His one ambition was to make something of himself, to wash out the past—to justify his existence. And he went overseas with the idea of genuine service and sacrifice. And very soon, terribly soon . . . during a night attack . . . they got him." Hilliard paused effectively. "There wasn't a chance in a hundred for him to recover, and he knew it. And then it came to him, blindingly and desperately, that the world—that is, the world which had known him in his failures—would never hear what he had done. He had made his sacrifice, and it was useless. In hospital, he was Pierre Dutout, you see . . . and between that character, and his own, was the barrier of the subterfuge he had grasped so eagerly—his alias, and his false record. No one would have any reason to doubt that he wasn't what he purported to be. He craved to tell someone; to send back a message to his old friends; and I happened to be there—and he confided in me. And here I am, Mr. Cullen. Bringing credentials. Now, in the first place, I have a photograph of him, taken from his original passport." He produced it from his pocket, and offered it to Mr. Cullen. "Is there any mistake, sir? Or is it the Dick Morgan you know?"

Mr. Cullen switched on a standing lamp; Angela hid her face, and shrank back from the white electric glare.

"Yes—yes." He gave the tiny picture to his daughter. "There's no question about it, Mr. Hilliard."

"That's Dick!" said Angela agonizedly.

"With his signature, of course—you recognize it, do you?"

"It's his handwriting fast enough," conceded Mr. Cullen. He looked up at Hilliard, and his brows were furrowed, as though he were struggling to comprehend what all this had to do with the Cullen family. "Yes. Dramatic boy, he was—always. Shows—don't it?"

"Dramatic—yes. That is—imaginative. Venturesome. And it's a quality that sometimes makes heroes, Mr. Cullen. . . . Would you have called him brave?"

"I'm not sure of that, sir. I—"

"I would!" said Angela. "I would!"

"Foolhardy, often. But brave . . ."

"Wait, then!" said Hilliard, motioning. He was transfixed by the vision of Angela Cullen, who had started up in passionate defense of an old-time playmate; her cheeks were flushed, her eyes were shining, she was ineffably appealing in her tearless grief and in her loyalty. For the first time, Hilliard could see how the passing years had brought out the woman in her; he could see, under the dazzling light of the porch lamp, what an adorable champion he had left behind him. Her vehemence thrilled him; his own cheeks reddened, and his heart was abruptly quickened at the sight of her at the same time that it congealed from her father's estimate. "You know," he said, "that bravery under fire has a peculiar reward. It's called a citation. In orders. You think that Morgan wasn't brave, Mr. Cullen. But there's proof. A proof that even you must recognize." He tempered his voice. "For here," he said, whip-

"And Here Is His Croix de Guerre."

ping a folded paper into view, "is what the republic of France says about him! Here is the record that will endure as long as France does. Here, Mr. Cullen, is Dicky Morgan's citation! . . ."

Dead quiet—for second after second. Angela had turned pale; she was winking hard.

"His . . . citation!" Mr. Cullen mopped his forehead.

"His own copy of it was lost, but I brought the official journal . . . shall I translate?

"'Pierre Dutout, private of the sixty-ninth Territorials, during the battles of the fourth of May and the days following, has made exhibit of the highest devotion and the greatest courage; and especially by carrying out a volunteer duty, under heavy fire on the night of the sixth of May, has given to his whole detachment an extraordinary example of loyalty and heroic sacrifice.'"

He gave the newspaper to Mr. Cullen. "And here—is his Croix de Guerre." On impulse, he handed it not to Mr. Cullen, whose palm was ready for it, but to Angela.

She had taken the decoration half fearfully, and she had glanced at Hilliard with an expression so curiously combined of awe and joy and jealousy that his own eyes wavered, and he had momentarily averted his gaze. When he had ventured to turn to her again, she had carried one hand to her breast, pressed tightly, she was looking down at the bronze cross in her lap, and her shoulders were shaking perceptibly. Hilliard gripped the arms of his chair, and every muscle of him was drawn tense . . . his farce was sudden tragedy, and horror clutched at him. Angela was crying . . . stoical, by supreme effort, at the news of Morgan's death, she was crying, now that she believed he had died gloriously. It was a hard problem for him to analyze . . . it was so magnificently complimentary and inconsistent . . .

"It would seem to me," said Mr. Cullen, somewhat thickly, "that he wiped the slate clean enough for all practical purposes, anyway." He took the war cross from Angela's reverent fingers, and examined it curiously. He looked at Angela, and slipped his arm around her; she sat up straighter, and drew a shivering breath. "I may have been wrong in my judgment," said Mr. Cullen soberly.

Hilliard, who had been moodily sunk in revery, fumbled a third time in his inner coat pocket.

"He sent you a letter," he said. "I suppose you've been wondering, under all the circumstances, what brought me up here to you. It wasn't to eulogize him particularly; it was to bring you his message. And perhaps I'd better say now that he made me read it . . ."

Enter the one and only girl in Dick Morgan's life.

MAN'S BEST AGE

A man is as old as his organs; he can be as vigorous and healthy at 70 as at 35 if he aids his organs in performing their functions. Keep your vital organs healthy with

GOLD MEDAL HAARLEM OIL CAPSULES

The world's standard remedy for kidney, liver, bladder and uric acid troubles since 1696; corrects disorders; stimulates vital organs. All druggists, three sizes. Look for the name Gold Medal on every box and accept no imitation

Things Apart.

My little niece was studying her geography and asked me to bound the state of Nevada. Her grandmother looked up and said: "I am surprised that a little girl that has traveled as much as you have must ask any one to help them with their lessons." Caroline said: "Grandma, when I travel, I travel for joy and not 'jography.'"—Exchange.

ASPIRIN

Name "Bayer" on Genuine

"Bayer Tablets of Aspirin" is genuine Aspirin proved safe by millions and prescribed by physicians for over twenty years. Accept only an unbroken "Bayer package" which contains proper directions to relieve Headache, Toothache, Earache, Neuralgia, Rheumatism, Colds and Pain. Handy tin boxes of 12 tablets cost few cents. Druggists also sell larger "Bayer packages." Aspirin is trade mark Bayer Manufacture Monoaceticacidester of Salicylicacid.—Adv.

Foreign and Domestic Complications.

"Did you try any of these 'home brew' experiments?"

"Once," admitted Uncle Bill Bottletop. "The result was unsatisfactory. It turned out to be one of those near-yeast problems."

The Spell of Melody.

"Give me the man who sings at his work!" said the idealist.

"Yes," replied Farmer Corntossel. "It's all right for a man to sing at his work, unless he insists on singing himself to sleep."

Cuticura Soothes Itching Scalp

On retiring gently rub spots of dandruff and itching with Cuticura Ointment. Next morning shampoo with Cuticura Soap and hot water. Make them your every-day toilet preparations and have a clear skin and soft, white hands.—Adv.

Old Fashioned.

"Codger is an old fashioned cuss, isn't he?" remarked Blinks.

"He sure is," agreed Binks. "Why, he still refers to woman as the weaker sex."

Not Enough Room.

"Don't take your troubles to bed with you," said the doctor.

"I don't, doc. I sleep on a cot."

No one is useless in this world who lightens the burden of it for anyone else.

KLEMME, IOWA

OFFICIAL PUBLICATION

NOTICE TO CONTRACTORS

Sealed proposals will be received by the Town Clerk of Klemme, Iowa, on the 27th day of July, 1920, between the hours of 8 A. M. and 8 P. M., for the construction of a Sewage Disposal Plant, Main and Lateral Sewers, in and for the Town of Klemme, Iowa, the extent of the work, kinds of material and method of construction to be as shown by the plans and specifications now on file in the office of the Town Clerk, which are by reference made a part hereof, and as provided by a Resolution of Necessity passed by the Town Council on the 13th day of July, 1920, which is by reference made a part hereof, said sewers to be built of vitrified salt glazed sewer pipe, cast iron pipe where required, hard burned building brick or concrete manholes and flush tanks, etc., and to be located as follows:

DISPOSAL PLANT

The Disposal Plant shall be located on a plot of ground approximately 600 feet west and 1500 feet south of the intersection of Iowa and Front Streets and shall consist of septic tank, dosing chamber, filter and sludge beds and connecting pipes there to.

MAIN SEWER

Shall start near above described Disposal Plant Site thence North 650 feet, thence Northeast across outlot 7 approximately 1150 feet to intersection of Iowa and Front Streets, thence on Iowa Street from Front to 3rd Streets using 12-inch Vitrified Sewer Pipe.

LATERAL SEWERS

On 3rd Street from Iowa Street to Jerusalem Street using 10-inch Sewer Pipe.

On Dakota Street from 3rd Street to East Corporation Line.

On State Street from 3rd Street to East Corporation Line.

On Jerusalem Street from 3rd Street west 1500 feet.

On Elder Street from 3rd Street West 200 feet and from 2nd Street west 250 feet. On Day Street from 1st Street East 730 feet. On Main Street from 3rd Street West 1000 feet and from 4th Street East 800 feet. In alley of block 9 from 3rd Street east 200 feet, on Iowa Street from 3rd Street to 4th Street,

On Front Street from Hancock Street south 600 feet, on 1st Street from Iowa Street south 600 feet and North 450 feet. On 2nd Street from Jerusalem Street south 170 feet and from Elder Street south 300 feet and from Iowa Street north 450 feet and south 900 feet. On 3rd Street from Dakota Street to Jerusalem Street and from Iowa Street to Greutmacher Street. On 4th Street from Jerusalem Street south 2050 feet. Morningside Road from 4th Street east 250 feet thence south 600 feet, On Paul's Drive from its intersection with Morningside Road east 500 feet. On Arthur's Lane from its intersection with Morningside Road east 400 feet using 8-inch Sewer Pipe.

All of said sewers to be built with tight joints, suitable "Y's" for house connections and to be laid to line and grade.

The work to be constructed in accordance with the plans and specifications above referred to, and shall be commenced on or before the 1st day of Sept. 1920, and fully completed on or before the 1st day of Jan. 1921. Payment for said work to be made after its completion and acceptance by the Town Council, to the contractor, for the Disposal Plant in bonds drawing 6 per cent annual interest. issued in anticipation of a fund to be created by a tax to be levied against all the property in Sanitary Sewer District No. 1, of the Town of Klemme, Iowa, or by Bonds or warrants drawn against such funds of the Town of Klemme, Iowa, as can by law be used for such purposes, or if insufficient to pay the cost of same by bonds drawing 6 per cent interest, drawn against a Special Assessment on all property benefitted, or by a combination of any or all of these methods, and upon completion of the Main and Lateral Sewers, and their acceptance, the cost of same shall be paid to the contractor in Special Assessment Bonds drawing 6 per cent annual interest and issued in anticipation of a fund to be created by a Special Assessment to be levied against all the property in Sanitary Sewer District No. 1 in proportion to its benefits as provided by law and said resolution of Necessity, or if insufficient to pay the cost of same, by bonds or warrants drawing 6 per cent annual interest, drawn against such funds of the Town of Klemme, Iowa, as can by law be used for such purposes. Said payment to be made as soon as by law provided after the completion and acceptance of said improvements. All proposals must be made on blanks to be furnished by the engineer and made separately for the Disposal Plant in one proposal and for the Main and Lateral Sewers in another proposal and each proposal shall be accompanied by a certified check in the sum of $1000 for the Disposal Plant and

OFFICIAL PUBLICATION

$2000 for the Main and Lateral Sewers, drawn on some known responsible bank in the Town of Klemme, Iowa, in a separate envelope and made payable to the Town Treasurer as security that the bidder, in case his proposal is the lowest and best legal bid submitted and contract is awarded him, will enter into contract for the doing of the work and give bond within ten days in the sum of 100 per cent of his contract price, conditioned upon the proper carrying out of the work and the faithful performance of the contract, and the contract and bond shall contain a condition requiring the contractor to carry Workmen's Compensation insurance, and the contractor and his bondsmen to keep said improvement in repair for a period of four years from and after completion of the Main and Lateral Sewers, and one year from and after completion of the Disposal Plant.

Certified checks will be returned to unsuccessful bidders and to successful bidders when they have signed contract and given bond as required. In case the successful bidder shall fail to enter into contract and give bond as required, certified check filed with his proposal may be retained by the Town Council at their option as agreed and liquidated damages.

The right is reserved to reject any and all proposals, and proposals will be acted upon at a meeting to be held by the Town Coucil at 8 o'clock P. M. on the 27th day of July, 1920, or at an adjourned meeting thereof.

ORIGINAL NOTICE
In the District Court of Hancock County, Iowa,
October Term A. D. 1920.

Joseph E. Johnson, Plaintiff
vs.
Unknown Claimants of and to the West Half of the Southeast Quarter and the East Half of the Southwest Quarter of Section Twenty-three in Township Ninety-five, North, Range Twenty-three West of the 5th P. M. in Hancock County, Iowa, and Patrick Shandler and Mrs. Patrick Shandler, wife of Patrick Shandler, Defendants.

To THE ABOVE NAMED UNKNOWN CLAIMANTS AND DEFENDENTS, AND EACH OF THEM;

You are herby notified that on or before the 1st day of October A. D. 1920 there will be filed in the office of the Clerk of the District Court of Hancock County, Iowa, the petition of the plaintiff in the above entitled cause claiming that he is the absolute owner in fee simple of the West Half of the Southeast Quarter and the East Half of the Southwest Quarter of Section Twenty-three in Township Ninety-five, North, Range Twenty-three West of the 5th P. M. in Hancock County, Iowa.

That he and his grantors have been in the open, peaceable, continuous, notorious and adverse possession of the said premises for more than twenty-five years last past with claim of right and color of title and asks that all of the said Unknown Claimants and Defendants be forever barred and estopped from having or claiming any right, title or interest in or to the said premises adverse to the title and estate of the plaintiff therein and that the title thereto be quieted in the plaintiff and for equitable relief.

For further particulars see the petition when filed, which sets forth the plaintiff's claim in detail.

You are further notified that unless you appear thereto and defend on or before noon of the second day of the next term of the said District Court which will commence and be held at the Court House in Garner, Iowa, on the 11 day of October A. D. 1920, default will be entered against you and judgment and decree rendered thereon as prayed.

Dated this 24th day of May A. D. 1920.

Ramsay & Blackstone,
Attorneys for Plaintiff.

It is hereby directed and ordered that the foregoing notice be published once each week for four successive weeks in the KLEMME TIMES, a newspaper of general circulation published in Hancock County, Iowa.

Dated this 25th day of May A. D. 1920.

A. E. Baumgartner,
Seal Clerk of the District Court
in and for Hancock County,
7-29-20-4w. Iowa.

As stated last week the company at the Editor's house left for Kansas City Wednesday forenoon. They reached the city the following evening at nine o'clock. They expected to reach their destination in the early afternoon but a couple of blowouts and numerous detours delayed them. Miss Ruth Davis is still here and will spend several weeks with her sister, Mrs. R. A. Jorgenson.

Prepare in case you should have a

FIRE

Don't wait until your home has gone up in flames and then wish you had bought on of our handy and sure

Fire-Gun *Fire Extinguisher*

Will put out any fire, always ready and cost little, see us at once and get a "Fire-Gun" and be prepared.

We also want to call your attention to our

Moco *OILS and GREASES*

We have a big supply of all kinds of "Moco" auto and machine oil and greases for every purpose, also the best oil for harvesting. We buy our oils and grease in big lots and so

DAIRY

ROUGHAGE AIDS FAMOUS COW

Helen Uilkje Calamity Gained in Milk Production When Switched From Grain Ration.

When Helen Uilkje Calamity 145857 was switched from a grain to a purely roughage ration, it was thought that she might object to this change of diet and drop off in milk production, but she didn't. In fact, this cow actually increased her flow of milk and surpassed any of her previous years' production records by more than 2,400 pounds of milk.

Helen, who comes of a good old family, and is a granddaughter of Homestead Girl De Kol—Sarcastic Lad, was sent by the dairy division of the United States department of agriculture from Beltsville, Md., to Huntley, Mont., in May, 1918. When she freshened on June 21 it was decided to run her on a semiofficial yearly test without any grain in her ration.

Her ration consisted entirely of alfalfa hay, silage, and pasture, and she was milked three times a day. The alfalfa hay was of fine quality, and most of the silage was corn silage, although she received a little sunflower silage in December, January and February. The pasture was an irrigated tame-grass mixture and was of good quality.

At four years of age Helen had produced at Beltsville 11,476.6 pounds of milk, 382.05 pounds of butterfat, on two daily milkings, and a grain, hay and silage ration. Again, at six years of age she produced 11,778.2 pounds of milk, 388.29 pounds of fat, on two milkings and a grain, hay and silage ration. She was eight years and three months old when the test on roughage alone began, and her production for a year on that feed was 14,210.1 pounds of milk and 470.24 pounds of fat.

Helen is now being run on a second test, three milkings a day, with the same roughage but with a grain mixture in addition. She has milked as high as 91 pounds a day, and promises to increase considerably her record made on roughage alone. The dairy division, in co-operation with the Montana experiment station, will run other cows on roughage alone, and

Cows and Corn—A Good Combination in Profitable Dairying.

also on roughage and grain, at the Huntley experiment farm, to ascertain the maximum producing ability of good cows when they are fed on good roughage only, with access to pasture, and also when they are given grain in addition to the roughage and pasture.

RIGHT CARE OF COW'S TEATS

One of Most Delicate and Troublesome Parts of Animal's Anatomy—Influences Milk Flow.

One of the most delicate and troublesome parts of a cow's anatomy is the teat, and the keeping of this right has a lot to do with the milk-yielding part of the cow. The cow is kept to produce milk, and the teat is, as it were, the "neck" through which it must pass, and the condition of the teat must very much influence both the quantity and the quality of the yield.

SUMMER ATTENTION TO COWS

Fly Aggravation Can Be Reduced by Keeping Animals in Stable During Heat of Day.

Keeping cows in a cool darkened stable during the heat of the day and turning them out to pasture at nights will tend to reduce the fly aggravation. All stable doors and windows should be screened, and manure, which is the breeding place of flies, should be kept cleaned away and either scattered over the fields or kept in a place where it can be screened.

DESIRABLE TASTE TO BUTTER

Important That Utmost Care Be Taken in Production and Ripening of Cream.

Butter made from sweet cream has rather a flat taste and isn't desirable on that account. In order to obtain this clean, sour flavor in the cream it is important that extreme care should be taken in the producing and ripening of the same.

FARM ANIMALS

SOUND QUALITIES OF HORSE

First Consideration of Buyer and Breeder Should Be Soundness—Examine Thoroughly.

The soundness of a horse is one of the first considerations of the buyer and should be of the breeder, according to the United States department of agriculture. If the animal is not sufficiently sound to withstand the use for which he is intended, the logical time to learn of this is before the purchase.

Selection must be based primarily on a thorough, systematic examination; the examination should be based on a clear knowledge of desirable and undesirable qualities.

Not only the presence of unsoundness, but also the condition or seriousness of the unsoundness should be noted.

Temporary unfitness should be distinguished from permanent unsoundness.

A hurried examination is likely to prove a disappointment.

Observe blemishes, vice, faulty conformation, unsoundness and general characteristics.

Common blemishes are scars from old wounds, poll evil, scratches, shoe boils, and small ruptures.

Common vices are halter pulling, cribbing, kicking, stall walking, weaving, and biting.

Common faults of conformation are straight shoulders, crooked, weak, or improperly set legs, ewe neck, long, weak back, and drooping croup.

Common unsoundnesses are splints, thoroughpin, spavin, curb, extreme fistula, ringbone, side bones, extreme atrophy of muscles, contracted tendons, and broken wind.

Carnegie, a Well-Conformed Type.

General characteristics include fleshing, temperament, quality, color, and age.

In final selection, look for the good qualities and weigh them against the defects.

"BULSHEVIKS" OF LIVE STOCK

New Title Applied by Wisconsin Farmer to the Reactionaries of Bovine Society.

From a farmer in Wisconsin comes a new word for use in the "Better Sires—Better Stock" campaign now being carried on by the United States department of agriculture in co-operation with state and local agencies. He applies a new title to the reactionaries of bovine society, and cites the indubitable fact that scrub bulls are the enemies of good production; that they levy upon the milk, cream and butter checks and compel the farmer to keep cows, where the cows should keep the farmer.

With these charges in mind and with his eyes on the international situation, this farmer suggests that the scrub bulls be known hereafter as the bulsheviks.

SHY AT REGISTERED CATTLE

Poor Appearance of Some of Get of Pure-Bred Bulls Tend to Discourage Small Breeders.

One of the biggest reasons today why more farmers are not raising registered cattle is because many of them have seen the get of some registered bulls which they have observed are not much better, if any better, than some calves sired by a good grade bull. If more breeders of registered cattle would use the knife as needed, instead of sending out scrub pedigreed bulls just because they can put the papers on them, there would be more satisfied little breeders and eventually more satisfied big breeders.

LIVE STOCK NOTES

One of the biggest drawbacks to the sheep industry is the stomach worm.

* * *

Pigs that have not been vaccinated should not be placed on infected premises.

* * *

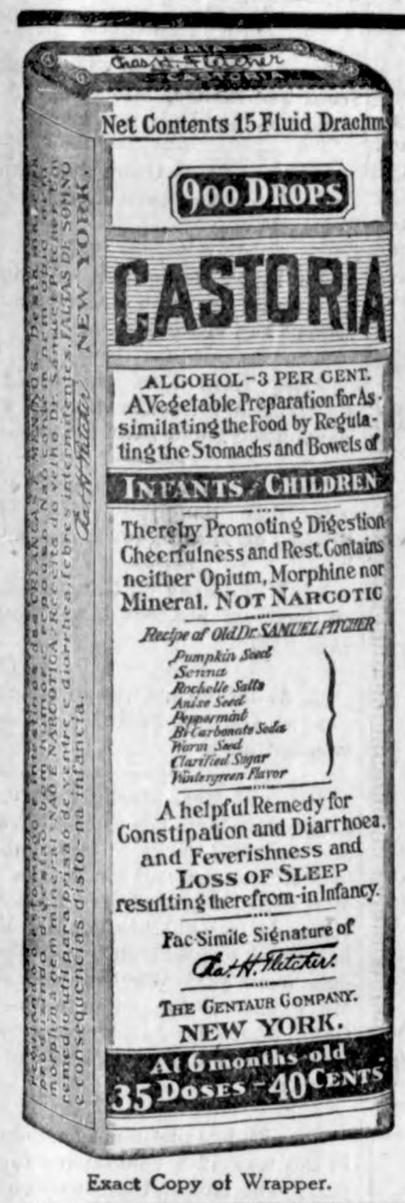
Prolonged confinement upon a concrete or dry board floor often induces foot-sore lameness in heavy hogs.

* * *

The best results come in keeping the young calf in a clean place in the barn until about three months old.

* * *

Sheep ticks cause great annoyance to sheep of all ages, but more especially to the lambs after the older sheep have been shorn. In extreme cases they cause loss in body weight



Exact Copy of Wrapper.

Children Cry For Fletcher's CASTORIA

Special Care of Baby.

That Baby should have a bed of its own all are agreed. Yet it is more reasonable for an infant to sleep with grown-ups than to use a man's medicine in an attempt to regulate the delicate organism of that same infant. Either practice is to be shunned. Neither would be tolerated by specialists in children's diseases.

Your Physician will tell you that Baby's medicine must be prepared with even greater care than Baby's food.

A Baby's stomach when in good health is too often disarranged by improper food. Could you for a moment, then, think of giving to your *ailing* child anything but a medicine especially prepared for Infants and Children? Don't be deceived.

Make a mental note of this:—It is important, Mothers, that you should remember that to function well, the digestive organs of your Baby must receive special care. No Baby is so abnormal that the desired results may be had from the use of medicines primarily prepared for grown-ups.

MOTHERS SHOULD READ THE BOOKLET THAT IS AROUND EVERY BOTTLE OF FLETCHER'S CASTORIA

Pretense Called For.

Edward had come to spend the time with Betty while his mother went to the club. She stayed so long they were tired of playthings and of each other. So finally in despair Betty said, "Well, Edward, let's just play we are having a good time."

Punishment Fits the Crime.

"They are railroading this man to prison."

"That's all right; he's a train robber."

Who betrays me once wrongs me; who betrays me twice serves me just right.—German proverb.

Hard to Believe

A workman in a factory on the west side received a bad cut on the face. Before they could get him to the doctor's office he fainted. The first thing the doctor did was to pour a large drink of bottled-in-bond down him. The doctor then dressed his wound and the man went his way. But in about a half hour the man was back at the office with his wife, and as he came in he said:

"She won't believe me."

"Won't believe what?" exclaimed the doctor.

With that the wife cried out: "I've lived with this man too long not to know when he's drunk and been fightin'."—Indianapolis News.

Capital Punishment.

How can you remove the letter "A" from the alphabet?"

By "B"-heading it.—Boys' Life.

Lemon Pies.

Frances had heard her mother tell repeatedly of her fondness for lemon pies, and then about the day when she ate too much of the dainty and could never be persuaded to taste one again. Frances has reached the age, in the teens, when the boys are beginning to show her attention.

The other day her mother happened to be in the room when one of her swains called her over the phone. From the one-sided conversation, the mother gathered that Frances was inventing excuse after excuse not to see him or have him call.

When the receiver was hung up her mother said: "What makes you treat Joe that way?" "Oh, well," said the young woman, "it's just another case of lemon pie."—Indianapolis News.

The best always goes first.—Italian proverb.

"Her Favorite for Thirty Years"

A generation ago Franco-American Toilet Preparations, notably effective in an age of fake skin nostrums, were faithful fixtures on the dainty dressing table of the girl who, as the mature woman of today, is envied by her admiring friends because of her fresh, blithe youthfulness.

For more than three decades the famous French formulaes first introduced by William Chase, founder of the Franco-American Hygienic Company, have been offered the particular women of America in the intimacy of their homes by their own personal friends; representatives trained through our Personal Extension Service in thorough understanding of skin requisites.

No more significant proof is to be had of the superiority of Franco-American Products, scientifically adapted to serve exactly the requirements of your individual skin, than the reliance placed today in their hygienic value by thousands of women to whom the name has been familiar since girlhood.

Typical of the individual service performed by Franco-American Products is "The Combination Treatment Box", illustrated above, which contains a complete day and night treatment for either dry, oily or the normal skin—six different creams, lotions and powder no woman can afford to be without. Learn the secret of how to look your best, the "Franco-American Way"; address The Franco-American Hygienic Company direct, or write us requesting that our Personal Service Retailer in your vicinity call at your home.

Would you engage in a dignified, profitable profession among your personal friends? If not already represented in your community, The Franco-American Hygienic Company offers women of energy and refinement an unusually attractive position as our Accredited Retailer. An inquiry will bring complete details concerning our thorough training and liberal profit sharing arrangement.

Franco-American Hygienic Co.

SUPERIOR TOILET PREPARATIONS

"Her Favorite for Thirty Years"

FRANCO-AMERICAN BUILDING 13[illegible] ST. & INDIANA AVE. CHICAGO, ILLINOIS

Mrs. George Elder and children of Eagle Bend, Minn., were visitors at the Ralph Elder home several days last week. Sunday Ralph and family and the visitors drove to Minnesota for a couple of days visit with relatives and friends at Garden City.

G. W. Kluckhohn & Sons have made an improvement in their display window in the hardware department of their store. They have extended the window platform back a couple of three feet and now have ample room to display stoves and other heavy hardware in their window.

Rev. Meyer was his own boss around the house a few days the latter part of last week. Friday he took Mrs. Meyer, her sisters Martha and Helen Lenz, who have been visiting here, to Dows where the ladies visited another sister. Mrs. Meyer returned the fore part of the week, but the other young ladies remained for a longer visit.

Miss Mildred McCullough spent Sunday with her friend, Miss Helen Collins, at Mason City.

Mrs. A. H. Meyer enjoyed a visit from her father, Mr. Lenz, of Wisconsin, a few days last week.

Mr. and Mrs. Olson and daughter from Kanawha, were Klemme callers Friday.

Dr. R. N. Reuber, A. K. Zinn and Ed Jacobs drove to Goldfield Sunday wheret hey visited friends.

Arno Tiegen, of Mason City, is spenidng his week's vacation at the Newberger home near Klemme.

Mrs. H. Hansen enjoyed a visit from her daughter, Mrs. Thirow Brown, of Manly, Iowa, last week.

W. H. Ramsay of Garner was here on business matters last Friday between trains.

R. A. Jorgenson was a business visitor at Garner Friday morning between trains.

Mr. and Mrs. Marlin Croner, Mrs. Schroeder, Mrs. Clarence Klutckhohn and son left early Tuesday morning in Mr. Croner's car for points east. Mrs. Schroeder and Mrs. Croner will visit relatives in Chicago; Mrs. Kluckhohn and son will visit with her parents near Fort Wayne, Indiana, and Mr. Croner will drive on to Cincinatti Ohio, where he has business to look after. They expect to be gone about a week.

Corwith has planned something new in the way of a chautauqua for next year. The entertainment will be free to all and the expenses will be met with a subscription taken up this winter or some time before the season next summer. Quite a novel idea and only one which a live town would tackle.

The public library acknowledges gratefully a donation by Dr. Missman of twenty-one volumes, including a number of volumes of short stories in English and in translation from the French and other languages. These books are being prepared for the use of the public and will be ready to be loaned by the time this item appears.

Mr. and Mrs. D. Kahrs, of Pasadena, California, came last week for an extended visit with their son, E. S. D., and Mrs. Kahrs. Mr. and Mrs. Kahrs left California in June and have been visiting in Illinois and Minnesota. They expect to stay in this country until October when they will return tot he land of sunshine for the winter.

From the Miller News in the Garner Democrat we learn that "Mr. and Mrs. Raymond White are the parents of a baby girl born Thursday of last week (July 8th). They are at Mrs. White's parents, Mr. and Mrs. C. P. Juhl in Forest City." Well, now that explains why Ray has been acting so queer of late and why we had to repeat our order to him at the Klemme Meat Market. This makes the second child in the family.

There was considerable disturbance in our little city last Thursday night. A couple of young men became somewhat hilarious and speeded up and down the street with their car. People residing on Main street got the full benefit of the race and lost a lot of valuable sleep. However the next day the mayor summoned the offender to the office where hedeposited coin of the realm for his boisterous festivitiy.

Fordson Demonstation

At Ames, Iowa, on
Aug. 11 - 12 - 13

You will be more than ordinarily interested in the coming Fordson Power Farming Demonstration. This will be the world's first complete Fordson Power Demonstration to be held August 11 12 & 13th on a 100 acre farm adjoining the Iowa State College at Ames, Iowa.

The big national demonstrations of former years have not been complete— this one will be. Every possible drawbar and belt operation will be shown. It will be the occasion of the most complete assemblage of tractor drawn and tractor-driven machinery the world has ever seen.

It will be exclusively a Fordson Power Farming Demonstration. Fifty or more Fordson tractors, operated by Fordson farmer owners, will be shown each day. You will be able to see with your own eyes just what the Fordson can do in every job of farm work.

Engineers from the Iowa State College will assist in conducting a series of tests during the demonstration to show the work accomblished, power developed, cost of fuel, lubricants, etc. This data will be invaluable should you be considering the purchase of a tractor soon.

A fair sized party, indluding myself, will leave here Aug. 12th— you should arrange to go with us and learn how to farm more acres and receive greator profit. More than 250,000 new Fordson farmers will be added to the present 100,000 owners during the coming year. Power farmiug means greater profits.

Are You Complying With This Law?

Better See to it That Your Lights Are Equipped With Diffusing Lens So You Will Be Playing Safe

IOWA ANTI-GLARE LAW IN BRIEF

Chapter 275, Laws of the 38th General Assembly, apropriate parts of Section 25—All motor vehicles in use on the public highways (except motorcycles, etc.) shall, during the period of from one-half hour after sunset to one hour before sunrise display two or more white or tinted lights, other than red, on the forward part of said vehicle, so placed as to be seen from the front, and of sufficient illuminating power to be visible at a distance of 500 feet in the direction in which displayed, and to reveal any persons, vehicles, or substantial object 75 feet ahead of the lamps. Such motor vehicle when in use shall display on the rear a lamp so constructed and placed as to show a red light from the rear and throw a white light directed upon the rear registration mark and render the numerals thereon visible for at least 50 feet in the direction from which the vehicle is proceeding; provided that the operator of any motor vehicle may proceed in a cautious and careful manner, in the event of a failure of one or more of his lights to operate, toward his destination, but shall take the first reasonable opportunity to put his lights in order, otherwise to be deemed guilty of violation of this provision. It shall be unlawful to use any lighting device of over four candle power, equipped with a reflector, unless the same shall be so designed or arranged that the directly reflected and undiffused beam of such light when measured 75 feet or more ahead of the light shall not rise above 42 inches from the level surface on which the vehicle stands under all conditions of load. Any vehicle equipped with auxiliary, light, projecting lights, or device other than the rear lamps shall be subject to all the restrictions of this section regarding direction of beam. If spot light is used it shall be unlawful o direct its rays towards the eyes of the driver or occupants of an approaching vehicle or to the left of the center of the traveled way when meeting another vehicle. No person shall operate a motor vehicle equipped with an electric bulb or other lighting device of a greater capacity than 32 candle power, no matter how the same may be shaded, covered or obscured.

SHERIFF GATHERS IN TWO STILLS AND SUPPLY OF BOOZE

Garner Signal—Hancock county's first arrest of anyone for running a still was made yesterday afternoon when Sheriff Ross went to Britt and captured one man and his still near the railroad transfer and another near Eagle Lake. A large amount of whiskey has been sold at Britt, and last Saturday night a number of young efllows drank some that came near killing them. They were partially paralyzed for a time. The Sheriff learned where some of this had been bought, and traced down his clue with the result that he brought home two men, two stills, two quarts of their whiskey and several gallons of mash.

Sam Harwald is the name of the fellow. He was operating about a half mile east of the transfer and was using a five gallon gasoline can for a still. It was at this place that the sheriff got two quarts of whiskey. Harwald is a beet weeder and has a wife and seven children.

John Eagle was located about four miles northeast of Britt. He had a copper-tubed still and was better prepared for business. He had no whiskey on hand but had a barrel about half full of mash made of wheat and raisins. He is also a beet weeder and has a wife and five children. Eagle had the mash souring in a galvanized iron tank, and where the mash was in the tank the galvanizing was all eaten off. It would sure take some constitution to stand a mixture that will eat the galvanizing off from galvanized iron.

Sheriff Ross brought his men and their outfits to Garner and a hearing will be held in a day or two.

DEMONSTRATION

The RONNING ENSILAGE HARVESTER will be demonstrated on the Roy Lawhorn farm north of Garner, on Saturday afternoon, July 31st, at 2:00 o'clock. The demonstration will be put on by the "Big Six." Everybody invited. 1p.

GEORGE, GRUETZMACHER,
Klemme, Iowa General Agent

Our Next President

HARDING SPEECH OF ACCEPTANCE A NEW KEYNOTE

Republican Nominee at Notification Ceremonies Discusses Problems Confronting Nation.

"HOLD HERITAGE AMERICAN NATIONALITY UNIMPAIRED"

Advocates Party Responsibility as Distinguished From Dictatorial and Autocratic Personal Rule—In Referring to League of Nations, Says We Do Not Mean to Shun a Single Responsibility of This Republic to World Civilization—Favors Protective Tariff, Merchant Marine, a Small Army, Woman Suffrage and National Budget.

Marion, O. (Special.)—Warren G. Harding was officially notified of his nomination as the Republican candidate for the presidency. His speech of acceptance is, in part, as follows:

Chairman Lodge, Members of Notification Committee, Members of National Committee, Ladies and Gentlemen: The message which you have formally conveyed brings to me a realization of responsibility which is not underestimated. It is a supreme test to interpret the covenant of a great political party, the activities of which are so woven into the history of this republic, and a very sacred and solemn undertaking to utter the faith and aspirations of the many millions who adhere to that party. The party platform has charted the way, yet, somehow, we have come to expect that interpretation which voices the faith of nominees who must assume specific tasks.

Let me be understood clearly from the very beginning. I believe in party sponsorship in government. I believe in party government as distinguished from personal government, individual, dictatorial, autocratic or what not.

No man is big enough to run this great republic. There never has been one. Such domination was never intended. Tranquility, stability, dependability—all are assured in party sponsorship, and we mean to renew the assurances which were rended in the cataclysmal war.

Our first commital is the restoration of representative popular government, under the Constitution, through the agency of the Republican party. Our vision includes more than a chief executive. We believe in a cabinet of highest capacity, equal to the responsibilities which our system contemplates, in whose councils the vice president, second official of the republic, shall be asked to participate. The same vision includes a cordial understanding and co-ordinated activities with a house of congress, fresh from the people, voicing the convictions which members bring from direct contact with the electorate, and cordial co-operation along with the restored functions of the senate, fit ing this call and knowing as I do the disposition of the congress, I promise you formal and effective peace so quickly as a Republican congress can pass its declaration for a Republican executive to sign.

It is better to be the free and disinterested agent of international justice and advancing civilization, with the covenant of conscience, than be shackled by a written compact which surrenders our freedom of action and gives to a military alliance the right to proclaim America's duty to the world. No surrender of rights to a world council or its military alliance, no assumed mandatory, however appealing, ever shall summon the sons of this republic to war. Their supreme sacrifice shall only be asked for America and its call of honor. There is a sanctity in that right we will not delegate.

Disposed as we are, the way is very simple. Let the failure attending assumption, obstinacy, impracticability and delay be recognized, and let us find the big, practical, unselfish way to do our part, neither covetous because of ambition nor hesitant through fear, but ready to serve ourselves, humanity and God. With a senate advising as the Constitution contemplates I would hopefully approach the nations of Europe and of the earth, proposing that understanding which makes us a willing participant in the consecration of nations to a new relationship, to commit the moral forces of the world, America included, to peace and international justice, still leaving America free, independent and self-reliant, but offering friendship to all the world.

It is folly to close our eyes to outstanding facts. Humanity is restive, much of the world is in revolution, the agents of discord and destruction have wrought their tragedy in pathetic Russia, have lighted their torches among other peoples, and hope to see America as a part of the great red conflagration. Ours is the temple of liberty under the law, and it is ours to call the Sons of Opportunity to its defense. America must not only save herself, but ours must be the appealing voice to sober the world.

It must be understood that toil alone makes for accomplishment and advancement, and righteous possession is the reward of toil, and its incentive. There is no progress except in the stimulus of competition.

The chief trouble today is that the World war wrought the destruction of healthful competition, left our storehouses empty, and there is a minimum production when our need is maximum. Maximums, not minimums, is the call of America. It isn't a new story, because war never fails to leave depleted storehouses and always impairs the efficiency of production. War also establishes its higher standards for wages, and they abide. I wish the higher wage to abide, on one explicit condition—that the wage earner will give full return for the wage received.

I want, somehow, to appeal to the sons and daughters of the republic, to every producer, to join hand and brain in production, more production, honest production, patriotic production, because patriotic production is no less a defense of our best civilization than that of armed force. Profiteering is a crime of commission. under-production is a crime of omission. We must work our most and best, else the destructive reaction will come.

The menacing tendency of the present day is not chargeable wholly to the unsettled and fevered conditions caused by the war. The manifest weakness in popular government lies in the temptation to appeal to grouped citizenship for political advantage.

It would be the blindness of folly to ignore the activities in our own country which are aimed to destroy our economic system and to commit us to the colossal tragedy which has destroyed all freedom and made Russia impotent. This movement is not to be halted in throttled liberties. We must not abridge the freedom of speech, the freedom of press, or the freedom of assembly, because there is no promise in repression. These liberties are as sacred as the freedom of religious belief, as inviolable as the rights of life and the pursuit of happiness. We do hold the right to crush sedition, to stifle a menacing contempt for law, to stamp out a peril to the safety of the republic or its people when emergency calls, because security and the majesty of the law are the first essentials of liberty. He who threatens destruction of the government by force or flaunts his contempt for lawful authority, ceases to be a loyal citizen and forfeits his rights to the freedom of the republic.

Continued next week

The Orange in Spain.

It is considered a very healthful thing to eat an orange before breakfast. But who can eat an orange well? One must go to Spain to see that done. The senorita cuts off the rind with her silver knife; then, putting her fork into the peeled fruit, she detaches every morsel with her pearly teeth and continues to eat the orange without losing a drop of the juice and lays down the core with the fork still in it.—Exchange.

NOTICE TO SUBSCRIBERS

We have revised our mailing list and have made all changes up to date. Look at the label and see when your subscription is due. The list should be accurate and if we have made any mistake in putting the wrong date on your label let us know at once and we will gladly make the correction.

There are a few subscribers who are back on their subscriptions and we ask those who are not up to date with their subscriptions to please pay up, either come to the office or mail your check. Remember we want our list up to date and paid up in advance.

It is a big job to re-set a mailing list and get all the names and dates correct and so if we have made a mistake let us know at once so we can get it correct.

LABOR SAVNG DEVICE

Shocking Cut Grain Without The Aid Of Men

The following item is taken from the Ackley World-Journal and may be quite interesting to the farmers here. The article is as follows:

Ralph Janssen and Fred Meinberg are the first farmers in this vicinity to use the new attachments to binders for the purpose of shocking oats or other grain. The bundles are thrown back on a platform until there are about seven bundles when they are all picked up and bound by twine and thrown on the ground in a standing position, eliminating the men who formerly followed the binder and did the work by hand.

Continuing on along this line, in time about all a farmer will need to do will be to wield a wand, fairy-like, and say, "grain be cut and stacked"—and after that "Hustle off to the machine and be threshed."

One surprise follows another.

Editor's Note—To the above we can cast further light on the wonderful machine. It was our privilege several years ago to see the first and also the second machine which the inventor constructed at the little town of Whittemore. We believe it is the same machine as the one described above. We had quite a talk with the man whoi nvented the machine and like all men who invent something of great use and time saving, he was discouraged because he could not get the necessary backing to go ahead with the work. We believe he sold the patent to one of the big machi e companies who are now making the shocker. The first machine was very curious and crude in it's working, but the inventor had the right idea and the second machine was built of steel instead of wood and was greatly improved. We saw this machine work in the field and it did good work. It was attached to the binder, on the side where the bundles dropped. The bundles as they came out were grabbed by "fingers," elevated on a carriage and when eight had been assembled they were set down. Later the inventor added the twine tying device to better hold the bundles and also he was working on a device to "cap" the shocks, but we believe he was not successful in this attempt. It is a great machine and no doubt some of our Klemme farmers will be using them.

FATAL AUTO ACCIDENT NEAR CLEAR LAKE

Last Friday morning a fatal auto accident occurred near Clear Lake. As we get it from reliable authority, a farmer by name of Jensen had gone to Clear Lake to get his new car. He had never driven a car and was taking it to his home between Clear Lake and Ventura. When he came to the crossing on the Milwaukee west of Clear Lake just beyond the detour he drove up on the track and perhaps did not notice the fast approaching passenger from the west. It is not known whether he saw the train or not, but evidently his engine stalled on the sharp up-grade and before he could get started the train had hit him. He was carried in the car for a distance of over twelve hundred feet on the cowcatcher of the engine and the auto was smashed all to pieces when the train was finally stopped. The man was instantly killed but was not badly mangled as was reported. He had a few bruises and cuts on his face and body. There is not enough left of the car to even tell about. We caught a glimpse of the car from the road on our way to Mason City Saturday and all we could see was part of a broken engine, some bent up steel and a wheel sticking up.

Palm Beach, Crash and Flannel Suits

We are going to extend the special sale on the above mentioned two-piece suits the balance of this work. Plenty of hot weather yet to come.

Prices $10 to $22.50

SHOES--Get lined up with us on our special weight shoes for the harvest. Some desire a light weight, some a medium or heavy--we have them and are specially pricing them for this week at

$2.89, $3.49, $2.98, and $4.39

We sold more work shoes last week than at any previous week in the history of the store. ***There's a reason***--we buy in quantities. Get the habit of looking for these special values coming at the opportune time they do.

AMERICA MAKES BIG DISKS NOW

Lens Manufacturers Solve Difficult Problem With the Aid of Scientists.

CATCHING UP WITH GERMANY

All Mechanical Difficulties in Making of Large Telescopic Disks Have Been Overcome—Process Is Delicate One.

New York.—Large telescope disks are being made in the United States. All mechanical difficulties have been overcome, according to an announcement made by Dr. George W. Morey, a member of the American Chemical society.

This remarkable achievement is due to preparation and handling of the ingredients required for pure and flawless glass and is the result of experiments begun at the outbreak of the world war, under the auspices of the geophysical laboratory of the Carnegie Institution in Washington.

Catching Up With Germany.

Before 1914 practically all the optical glass in the United States was imported from Germany. When the United States entered the war the field glasses, range finders, telescopes and other instruments of precision used by her army and navy were equipped with lenses fashioned beyond the Rhine. Private citizens even loaned or contributed opera glasses and binoculars to the fighting forces.

Optical glass of fine quality, however, is now to be had on this side of the water. The climax of this achievement of industrial chemistry has been reached by American makers in the manufacture of lenses for telescopes. At first disks which strengthened our view were made three or four inches in diameter. Recently a special four and three-quarter inch lens was ground for Lowell observatory at Flagstaff, Ariz.

The first nine and one-half inch disk was turned out last December. Six others have since been made and delivered. As their diameters increase disks are made with greater difficulty. Finally, on February 15, 1920, the first perfect 12-inch disk was furnished, and a large optical glass corporation now lists this size for short-time delivery.

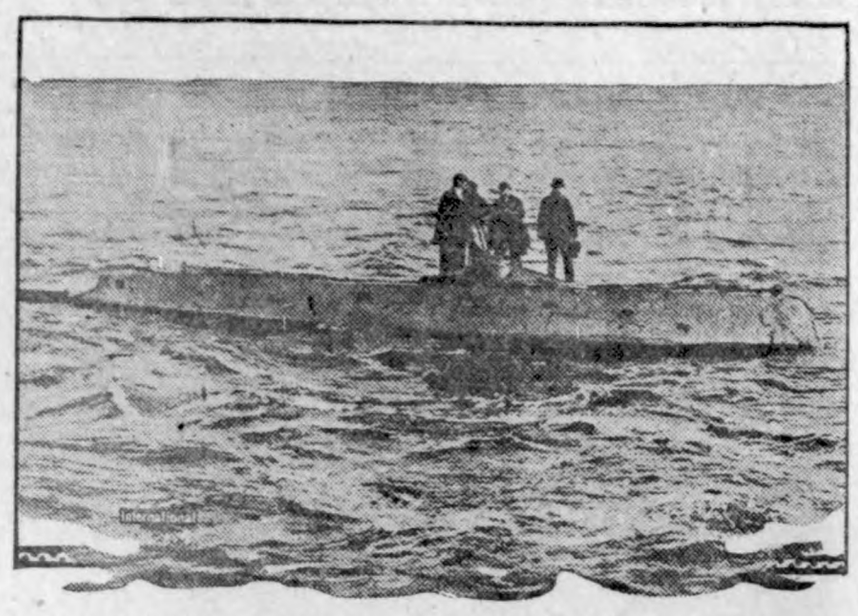
Making Larger Disks.

The next size attempted was a 20-inch disk, in the manufacture of which the problem was still more complex. Several flawless ones were produced, but they cracked in the annealing process. American ingenuity was brought into play to devise a means of slowly cooling these immense plates of glass, so that they might be free from the strain so likely to destroy them. Experiments by scientists of the geophysical laboratory showed exactly how slowly their temperatures must be lowered, and the cooling schedule outlined was closely followed. Owing, however, to the extreme cold weather of last March and the shortage of gas, this schedule could not be followed. One splendid disk strained and broke just when nearly ready to be taken from the oven.

Equipment hitherto used was then scrapped and an electric furnace was specially designed to meet the needs of the problem by experts of an electric company. This device is thoroughly insulated and provided with an automatic appliance which will hold the temperature absolutely constant to a fraction of a degree while the glass is being treated to remove strain. The temperature can be dropped a few degrees a week.

With the aid of this furnace now in process of construction it is believed that the last difficulty in the way of the American manufacture of the largest disks will be overcome. Orders have already been accepted for the production of several large guaranteed disks, including one pair of the 18-inch size for refracting telescopes, and a 36-inch disk for a reflecting telescope. The furnace will receive the 40-inch size. When that goal has been reached, the company will continue the development, so that eventually the largest and finest disks in the world will be American made.

One of the First Submarines



One of the first submarines ever built by John P. Holland, their inventor, of whom it is said that he conceived the idea of submarines as a means of destroying the British navy. Holland was an ardent Fenian and associate of many Irish patriots who have gone down into history. Leaders of the Revolutionary party in Ireland became interested in Holland's idea and commissioned him to build a trial submarine. He built it well enough, but on its trial spin on Long Island Sound it was struck by a coal barge and quickly sunk. The discouraged Irish leaders gave up the idea. Later Holland built his first successful submarine, "The Holland," which was accepted by the United States government in 1897. "The Holland" is here shown on her trial spin.

Marks New Era In U. S. Flying

All Metal Plane Will Revolutionize Aircraft Design and Construction.

BIG ADVANCE IN SCIENCE

Frail Spruce and Linen Ship That Did Its Bit in War and Has Been Used in Commerce Will Be Displaced by All Metal Type.

New York.—The presence in America of John M. Larsen's JL-6 all metal monoplane will completely revolutionize aircraft design and construction, according to statements made here by leading airplane manufacturers.

The frail spruce and linen ship that did its bit in the war and that has been used successfully, though precariously, in commerce will soon be displaced by the sturdy all metal type brought out after the war by the Germans, almost every aeronautical expert who has witnessed the performance of the JL-6 agrees. One American manufacturing company has already announced its intention of discontinuing operations.

The War Plane Passes.

There is little comparison between the JL-6 and the old type plane.

The only type of airplane that was successful prior to the JL-6's appearance was the wood and linen biplane. The wing beams, the long fuselage, the engine bearers, the struts, the under-carriage were made of either spruce or ash and the wings were covered with Irish linen. The fuselage between the wings gave support to the panels. It was a strong ship; only a cyclone or a crash could warp the wings around the fuselage.

But it appears as fragile and delicate as a china vase beside the JL-6. There is an all metal fuselage. One metal wing spreads from each side of the body, a wing that measures eight or ten inches in thickness at the leading edge, and has a trailing edge as thick as the blade of your knife. There are no interwing struts to offer wind resistance, no control horns on the ailerons, no flying or landing wires, no control wires free to the wind. It has been said that the flying, landing and control wires of the old type ship cut down its speed by as much as twenty-five miles an hour.

Wings Survive Side Slip.

The wings of the JL-6 are so rigid that only a head on crash will injure them. One plane that side slipped to the earth was immediately righted and flown away after a new propeller had been put on. Not even the fuselage to which the metal panels are attached was injured. Eighty-five men have stood upon the forty-seven foot spread without causing any ill effects.

The body of the plane contains a luxuriously furnished compartment that will seat in upholstered chairs six people. Two pilots may be seated in the control compartment. The motive power is furnished by a 160 horsepower Mercedes engine. It requires five gallons of gasoline to fly 100 miles. Present aeronautical motors require from ten to fifteen gallons for that distance. The motor is almost silent, compared to the deafening roar of the Liberty. A conversation can be carried on in the cabin with the motor wide open.

According to Mr. Larsen, the JL-6 represents the greatest step forward in flying in all time. He has purchased all American rights, from the Junker company of Germany, which first perfected the all metal plane. It was from an all metal battle plane that the boche shot down Maj. Raoul Lufberry in the most heroic air battle of the war. Dr. Hugo Junker, German engineer, is the original designer of the all metal ship.

NEED WEAPONS FOR SAFETY

German Farmers Reluctant to Surrender Their Firearms, Says Cabinet Minister.

Berlin.—There is a reluctance on the part of some German farmers to surrender their firearms, due to "the legitimate desire to protect their homes against marauders," Minister of Agriculture Braun said to a Tageblatt representative.

He added, however, that a number of farmers have been "storing arms deliberately for subversive purposes," but he said that these were not as numerous as generally believed.

"If the people only will keep their heads," Herr Braun said, "I do not believe there will be any organized outbreak in the near future. The rural situation at this time inspires confidence."

Vets Receive Money Due Half Century

Lansing.—Two Civil war veterans, each more than 80, received aid from the state, which was due more than half a century ago, when the board of state auditors granted them their unpaid bounty and interest.

They were the oldest ten who were similarly treated at the same session.

With the U. S. Navy at Vladivostok

NEWS REVIEW OF CURRENT EVENTS

Entente Allies Discover They Must Defend Poland Against Russian Bolsheviki.

EAST PRUSSIA THREATENED

King Feisal of Syria Yields to French —Drys Nominate Watkins—Harding Is Notified and Cox Declares for Wilson's League Policy—Rail Workers Offered Wage Increase.

By EDWARD W. PICKARD.

International attention was centered during the week on the Russo-Polish situation, in which the diplomats found plenty to disturb their equanimity. In the first place, the Moscow government, replying to the British note asking if it would arrange an armistice with Poland, rejected in substance the British proposals. The Reds declined to go to London for any peace conference, holding that Great Britain is not impartial, and, in language so sarcastic that it hurt the feelings of the English statesmen, made it clear that they could deal with Poland direct. Their next move was to send a wireless message to Warsaw expressing regret that Poland had seen fit to deal through the allies and suggesting that conversations on peace be conducted between the two governments without consulting or considering outsiders. So far as is known at this writing, the Poles have not replied definitely to this invitation, but a London report said they had been told to apply for an armistice in order to test the sincerity of Moscow.

Meanwhile, the soviet forces opened a general attack all along the line from the Roumanian border to the Pripet marshes, and though at first the Poles repulsed them in most places, at one point they broke across the border and were fighting on Polish soil. North of the Pripet the Reds moved rapidly and took Grodno. Their evident objective was Warsaw, and the civilians of that city were preparing to take flight, some already having left. American relief organizations were ready to quit the city, and the Red Cross was shifting part of its headquarters to Cracow.

In their advance through Lithuanian territory the bolsheviki seem to be threatening an invasion of East Prussia, and the German government is preparing to defend that region desperately. Fifty thousand of the best reichswehr troops have been mobilized and Berlin feels confident they can prevent an invasion if they can be maintained near the border. The danger, however, is that as the soviet army draws near the bolshevik elements in other parts of Germany may break out and cause a scattering of those defense troops and leave open to the Russians the way into East Prussia. No doubt Germany will take advantage of the conditions to ask leave to mobilize more of her regular troops, and also it is likely the threat of invasion will bring to light vast stores of concealed arms, including artillery.

Early in the week Ignace Paderewski was made Polish plenipotentiary to Paris and his return to power was taken as evidence that the Poles were willing to make peace with the Russians direct. The musician-statesman was expected to placate Lloyd George and Millerand. Pilsudsky, Polish chief of state, had refused to withdraw his armies to the lines specified by Lloyd George, insisting that national safety required the holding of the line of Baranowitz-Pinsk-Dubno.

As a result of the Spa conference Great Britain and France are pledged to support Poland against Russian aggression, and they intend to give this support in the form of arms and munitions; men also will be supplied if this is considered necessary by British and French missions that have just been sent to Warsaw. But the British government is greatly vexed with the Poles. Premier Lloyd George on Wednesday gave voice to this feeling in a statement to the house of commons. He said, "If ever a nation in history has gone war mad, that nation is Poland" and characterized its course as reckless and foolish. This, however, he asserted, does not justify the crushing of the new nation, adding: "The whole fabric of European peace depends on an independent Poland. There is no time for the machinery of the League of Nations to interfere. If the bolsheviks overrun Poland and reach the German frontier, they deprive the allies of the entire fruits of victory." If the Russian bolsheviki decline to come to terms, the allies will give material aid not only to the Poles, but also to Gen. Baron Wrangel and others who are fighting the soviet government.

For the present France's trouble in Syria seems to be over. According to a report from Beirut, King Feisal of Syria has accepted all the terms of General Gouraud's ultimatum and it is believed the French can now occupy the territory assigned them without further attacks. Feisal had been informed that Great Britain would not support him, taking the position that his independence is not inconsistent with a French mandate over Syria. At the time he yielded the French troops were ready to move on Damascus, his capital.

Operations in Anatolia ceased for a time, Kemal Pasha and his nationalists being held in check, but in Thrace there were signs of the outbreak of a new Balkan war. The Greeks, to whom western Thrace was awarded, had not advanced far inland, but according to reports Bulgaria, which claimed the territory, was getting into action against them, and had called the class of 1921 to the colors. The Bulgarian irregulars were helping Jafar Tayar, who, with headquarters at Adrianople, is trying to hold western Thrace for Turkey.

It was a lively week in Ireland. Several British officers were assassinated, at least one town was looted and partly burned, and there was desperate fighting in Belfast in which a number of persons were killed. The opposing forces in that city were Sinn Fein and Orangemen employees in the shipyards.

Bloody battles in the vicinity of Peking marked the progress of the civil war in China early in the week, and then came the news that the rebels had been defeated and had given up the struggle against the government.

The Prohibition party met in national convention in Lincoln, Neb., and rather surprised itself by nominating William J. Bryan for president at the first session. The nomination was made by acclamation and came after a stampede of the delegates started by the adoption of a resolution "tendering" the honor to the Nebraskan. On Thursday Bryan absolutely declined, so the convention named Rev. Aaron S. Watkins of Germantown, O., and gave the second place to D. Leigh Colvin of New York.

Formal opening of the Republican presidential campaign came with the notification of Senator Harding that he was the party's standard bearer and the delivery of his speech of acceptance. This took place in his home town, Marion, where most of the big party leaders and many thousands of others had assembled. Here are some of the salient points in the senator's speech:

"I believe in party government as distinguished from personal government, individual, dictatorial, autocratic or what not."

"Our vision includes more than a chief executive. We believe in a cabinet of highest capacity, equal to the responsibilities which our system contemplates, in whose councils the vice president, second official of the republic, shall be asked to participate."

"I promise you formal and effective peace so quickly as a Republican congress can pass its declaration for a Republican executive to sign."

"No surrender of rights to a world council or its military alliance, no assumed mandatory however appealing, ever shall summon the sons of this republic to war. Their supreme sacrifice shall only be asked for Americ and its call of honor."

"We approve collective bargaining

"Gross expansion of currency a credits has depreciated the dollar. W will attempt intelligent and cour geous deflation."

"When competition—natural, fair- pelling competition—is suppresse whether by law, compact or conspi acy we halt the march of progres silence the voice of aspiration a paralyze the will for achievement."

"The human element comes firs and I want the employers in industr to understand the aspirations, th convictions, the yearnings of millio of American wage earners."

"War establishes its higher stan ards for wages and they abide. I wi the higher wage to abide, on one e plicit condition—that the wage-earn will give full return for the wage re ceived."

Governor Cox and Franklin D Roosevelt began the week with lengthy conference with President Wil son in the White House. After th meeting it was formally announce that the president and the Democra ic nominees are in full accord on th League of Nations issue. Governo Cox said:

"We are agreed as to the meanin and sufficiency of the Democratic pla form and the duty of the party in th face of the threatened bad faith to th world in the name of America. H thought is still of the war and th pledges we gave to those who sacr ficed. What he promised, I shall, elected, endeavor with all my strengt to give."

The president announced that h had found, what he already knew, tha Governor Cox and he were "absolute at one with respect to the great issu of the League of Nations and tha he is ready to be the champion in e ery respect of the honor of the na tion and the secure peace of th world."

On Tuesday the Democratic natio al committee met in Columbus, O., prepare for the campaign. Mr. Cox choice for chairman was Edmund Moore, his pre-convention manage but Mr. Moore absolutely declined. Th governor then asked the election former Congressman George White Marietta, and the committee, most whose members were said to fav the retention of Homer S. Cummin in the place, yielded and named M White. To comply with the rules la down by the San Francisco conventio Mr. Moore resigned from the comm tee and Mr. White was elected in h place. Governor Cox is to be notifie on August 7 and Roosevelt two day later.

Whether or not to accept a wage i crease of $600,000,000 yearly, inclu ing about $140,000,000 back pay, w the proposition put up to the rail wor ers of the country last week by th United States railway labor board. T long awaited award was announc in Chicago to the representatives eighteen brotherhoods and unions, a it really did not please them at a as they demanded approximately tw as much. Some of the members the grand council were not empower to accept the award finally, so a re erendum vote of the two million r workers becomes necessary. The chie of one union, the Order of Railw Telegraphers, rejected the award, a they called for a referendum vote strike.

Of course the railway executives once began looking for means to p the advanced wages, and they alrea have worked out a schedule of in creased rates, both freight and pa enger, for presentation to the int state commerce commission. The pa enger increase asked is from one h to one per cent per mile. That f freight will undoubtedly be heavy.

In the death of William K. Vande bilt in Paris one of America's lead financiers and sportsmen passed. H inherited a large share of th vast estate of his father, and i believed to have left a fortune of be tween $50,000,000 and $100,000,0 Despite his wealth he worked his w up from the bottom in the railro business.

Another death of the week, inte esting but not important, was that Joachim, youngest son of the form kaiser. Distressed by financial di culties, he committed suicide in Ber

Chicks Will Not Grow Properly if Not Healthy.

Far Better Plan to Prevent Ailments Than to Attempt to Cure an Ailing Fowl—Give Good Attention to Their Houses.

Disease is one of the handicaps to successful poultry keeping and should be guarded against at all times. Unless kept in a healthy condition, chicks will not grow properly and mature fowls will lose their vigor and vitality and become unproductive and unprofitable.

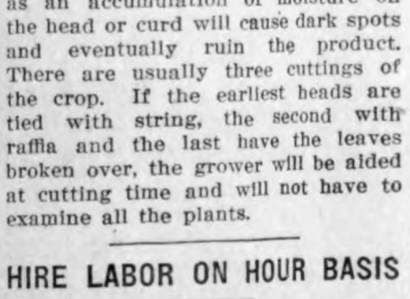
It is far better to prevent disease by proper care and attention than to attempt to cure a bird after it is sick. Therefore it is important to watch the flock closely at all times for any signs of disease, so in case an outbreak occurs it may be checked at once. Prevention is always better than cure, and all those who wish to succeed with poultry should give their birds such good care and keep their houses so well cleaned and disinfected that both fowls and chicks will keep hardy and vigorous.

Some diseases may be treated successfully, while others of a more serious nature usually prove fatal. If only one or two birds of a flock become sick it is usually advisable to kill them immediately (unless they are choice specimens) and burn or bury the carcasses, say poultry specialists in the United States department of agriculture. If the birds are kept and an attempt is made to doctor or cure them the disease may prove contagious and spread throughout the entire flock.

AXLE USEFUL AS GATE HINGE

Illustration Shows How Discarded Part of Wagon or Other Implement May Be Utilized.

On almost every farm can be found an old wagon or implement wheel with its axle. The illustration shows how it can be made to form one side and a very effective hinge for the farm gate.



An Old Axle, With Parts of the Two Wheels Remaining Upon It Forms an Essential Part of This Easy-Working Farm Gate.

The axle is set upright with the slats of the gate bolted to it. The lower end of the axle should be fitted with an old hub to serve as a bearing. The hub on the upper end should have at least one spoke remaining in it, so that the latter can be thrust through a hole bored in the gate post. Some stout wire, or iron strips, will be necessary to hold the hub up against the post.

PRODUCE BEST CAULIFLOWER

Tie Leaves Over Head to Protect It From Sun or Weather—Three Cuttings of Crop.

When the cauliflower head is about the size of a dollar, the leaves should be tied or twisted over the head to protect it from sun and weather. This method should produce a perfectly white product. The leaves should be so tied that snow or rain that enters may find a ready exit at the bottom, as an accumulation of moisture on the head or curd will cause dark spots and eventually ruin the product. There are usually three cuttings of the crop. If the earliest heads are tied with string, the second with raffia and the last have the leaves broken over, the grower will be aided at cutting time and will not have to examine all the plants.

HIRE LABOR ON HOUR BASIS

Specialist Says Farmers Will Find Employing Hands on That Plan Advantageous.

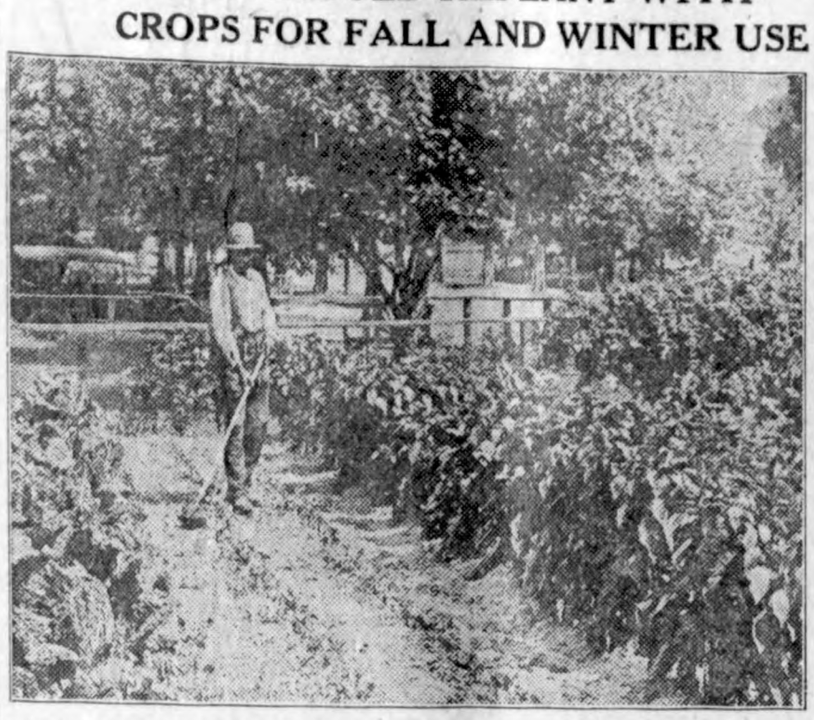
Experience the last several seasons, says W. L. Cavert, farm management specialist of the Minnesota College of Agriculture, indicates that farmers will find it advantageous to employ harvest and threshing labor on the hour basis instead of the day basis. "The hour plan," says Mr. Cavert, "is absolutely fair to both farmer and laborer and has the advantage that the help is not likely to object when it seems necessary to put in long hours."

FEW WEEDS ARE DESIRABLE

Detailed Purity Test Will Enable Farmer to Decide Whether He Wants Weeds or Not.

Not all weeds are equally undesirable in fields, hence a detailed purity test showing the various weeds in a sample will enable the farmer to decide whether he is willing to plant the weed seeds his sample contains or whether he will look farther for pure seed. Clean seed is always obtainable, usually at a somewhat higher price. The decision must be made on an accurate and detailed test of the seed under consideration.

GARDENERS SHOULD REPLANT WITH CROPS FOR FALL AND WINTER USE



Making the Best of the Replanting Season—Hoeing His Second Crop of Snap Beans.

(Prepared by the United States Department of Agriculture.)

To get the most out of the home garden a number of crops, such as snap beans, beets, lettuce, radishes and peas, should be planted at intervals to insure a continuous supply. In the case of snap beans as many as five plantings may be made in some sections of the country. In the southern part of the United States special attention should be given to the late planting of the semihardy crops for late fall and winter use. These crops include spinach, kale, cabbage, collards, turnips, lettuce and winter onions. The late-planted crops generally give the best vegetables for winter storage. Beans, peas, carrots and beats for canning purposes should be grown either very early in the season or quite late, in order to get the finest quality of canned goods. A late-planted crop of snap beans often yields an abundant supply of very tender pods which are ready for canning just before the first frosts. These usually make a better quality of canned product than do those grown at a time when they mature during the heated portion of the season.

Too much stress cannot be placed upon the need for gardeners to produce Irish potatoes during the remainder of the season. It is now time to begin thinking about planting a late crop in sections where a late crop is grown. In the southern part of the United States a late crop may be planted in July or August, provided enough moisture is in the ground to give the seed a start.

Gardeners are advised to plant the standard crops and varieties, leaving the fancy kinds of vegetables and the novelties off their list.

Throughout the greater portion of the South a very excellent crop of sweet potatoes may be grown by taking vine cuttings from those that have been previously planted and inserting these in ridges in place of rooted plants. The sweet potatoes grown from vine cuttings are usually free from disease and are smooth and uniform, making them very desirable for winter storage.

In many sections peas can be planted as late as September and will yield a very nice crop before cold weather sets in. For this purpose the early or quick-maturing sorts should be used.

Can or Store Vegetables.

Large quantities of garden vegetables are lost through want of suitable means of taking care of the surplus This can be done either by canning or by storage, depending upon the kind of vegetable to be cared for. The secret of filling the pantry shelves with canned goods is to can a little every day during the season when vegetables are plentiful in the garden. Storage facilities either in the form of a special room in the cellar or a suitable outdoor storage pit should be provided. In a few instances arrangements with the local cold storage or ice factory for the partitioning off of a small compartment in their ice storage room in which vegetables that should be stored at a temperature near the freezing point may be kept. This class of storage is especially desirable for apples and Irish potatoes. Sweet potatoes should always be stored in a warm place and given plenty of ventilation.

In planning the garden operations for the balance of the season, it is well to take into consideration all of the above features. First, grow the kind of vegetables that are needed for canning and storage; and, second, make provision to can or store all that are not needed for immediate use.

FAST WIRE SERVICE GIVES PROMPT NEWS

Information Is Vital to Intelligent Food Distribution.

Telegraphic Reports Sent From Big Market Centers Every Fifteen Minutes During Day—Much Spoilage Is Avoided.

The federal bureau of markets news services on live stock and meats, hay, feeds, and seeds, and dairy products, and fruits and vegetables, are designed to keep before producers, distributors, and consumers a picture of the movement of important crops to market, the supplies arriving in all of the principal consuming and distributing centers and the wholesale prices prevailing in each. To make its reports of the greatest practical usefulness, the bureau has equipped itself with the fastest system of communication available. Its branch offices in the great consuming and distributing markets are connected with leased telegraphed lines and operated by bureau telegraphers. These wires are busy from eight to twelve hours a day in the transmission of market information which is vital to intelligent and systematic food distribution.

From the time the live stock markets open in the morning until the close of the day's business, the bureau's representatives at Chicago, Kansas City, Omaha and East St. Louis send out a telegraphic report from one or the other of these markets every 15 minutes. The sales of live stock in the Chicago yards alone average more than $3,000,000 a day and the value of the live stock sold in the public stock yards of this country is more than $5,000,000,000 annually—figures indicating the importance of supplying information that is authoritative.

When a market is oversupplied with a product—particularly a highly perishable fruit or vegetable—a great waste results. The product spoils and becomes unfit for use and the dealers suffer a financial loss on account of this spoilage and also on account of the fact that they must sell their stocks at a sacrifice in order to dispose of them at all. Gluts of this kind used to occur frequently and were nearly always coincident with a scarcity of food in another place. Since the market news service on fruits and vegetables was instituted, this situation has improved materially.

STANDARDIZING FARM PRODUCTS WILL HELP

Recognized as Fundamental to Improved Marketing.

Prevents Waste and Shipment of Diseased With Sound Fruits and Vegetables—Much Loss to Shipper Can Be Avoided.

Standardization of farm products is being widely recognized as fundamental to improvement in marketing. Without well-recognized, acceptable, standard grades, the various market news services of the bureau of markets, United States department of agriculture, cannot be made fully effective because there must be a recognized basis for buying and selling, a common language through which grower, shipper, transportation company and dealer may clearly understand one another.

Standardization, moreover, eliminates waste and prevents the shipment of diseased with sound fruits and vegetables and of over-ripe with properly matured specimens. Failure properly to classify products before shipment frequently results in deterioration, decay and inefficient distribution. Much of this loss might be prevented by sorting products into grades at the point of production, packing each grade separately to minimize contamination, and converting inferior or unmerchantable grades into by-products.

GENERAL FARM NOTES

Clover seed may be grown on almost any kind of soil.

* * *

Pasturing high-priced land is profitable if handled right.

* * *

The high cost of sugar makes honey a very valuable crop.

* * *

Flax would make a good crop to plant on unused acreage.

* * *

If it is necessary to supplement the pasture, Sudan grass is satisfactory.

* * *

Clean seed will not always grow, hence it is necessary to have seed tested for germination.

DAIRY POINTS

RETAIN PUREBRED BULL CALF

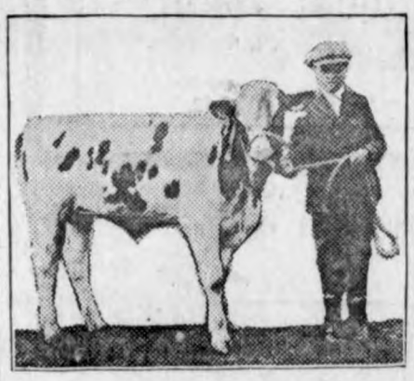
Good Dairyman Knows Value of Young Animal in Way of Improving Grade Herd.

Nature has her own percentage rules which are as infallible, in the long run, as the dealer's margin at a Monte Carlo gambling resort. According to this inflexible law of averages, there are about as many bull calves born each year as there are heifer calves.

Every good dairyman knows the value of a purebred sire of good record, and what such an animal may accomplish in the way of improving a grade or scrub herd. Despite their acknowledged value, it appears that 73,000 purebred bull calves of dairy breeds were killed for veal or were fattened for beef in 1918.

A chart has been prepared by the dairy division, United States department of agriculture, which furnishes a graphic illustration of what happened to the purebred bull calves in 1918.

The line representing purebred Holstein-Friesian cows registered in 1918



Farmers Are Urged to Conserve Their Purebred Bull Calves Wherever Practical Instead of Butchering Them.

runs out to 80,000. The line for the bulls of this breed registered during the same year extends only to 30,000. The difference, 50,000, represents the approximate number of bull calves not registered. Presumably most of them were either vealed or fattened as steers.

The Jersey breed in 1918 registered 30,000 cows and about 12,000 bulls—a loss of 18,000 purebred sires, many of which might be more profitably employed in the work of improving scrub herds.

Guernsey and Ayrshire totals are less, but the percentage of loss is heavy there also.

In the face of this waste it is estimated that five grades or scrub bulls are in use for every purebred bull. According to experts of the United States department of agriculture the replacement of scrub and grade bulls with good purebreds would quickly and materially raise the average production of dairy herds. One of the reasons for the surprising situation outlined is probably an underdeveloped system of distribution.

THUNDERSTORMS SOUR MILK

Theory Held by Many People, but Authorities Attribute Trouble to Other Causes.

The season for thunderstorms is at hand and a good many farmers' wives will be concerned about the souring of the milk. The theory is held by a good many that thunder will sour the milk, but authorities say the souring should be attributed to other causes. They say that the souring is caused normally by the acidity which results from bacterial growth and sterilized milk will not sour during a thunderstorm. Neither will milk that is kept on ice. The probable explanation lies in the fact that during the storms of this kind the temperature is raised sufficiently to favor the multiplication of the milk-souring bacteria where the temperature is not regulated by the use of ice.

BENEFITS OF SILAGE ACIDS

Fermentation of Feed Has an Important Dietetic Value—Keeps Bowels Regulated.

The acidity of silage caused largely by the formation of lactic acid by the fermentation of the feed has an important dietetic value, regulating the bowels and checking undesirable putrefactive processes in the intestines. The favorable influence of silage on the health of animals has been commonly noted, and is probably due to the silage acids.

DAIRY NOTES

Wash the separator thoroughly after each separating.

* * *

A normal calf should have all the good roughage it will eat.

* * *

Roughage to the calf gives bulk to the feed and satisfies the normal appetite.

* * *

Neatness in your own appearance and that of your barn never impresses your visitors unfavorably.

* * *

People of the dairy countries in Europe always feed some straw in the ration and they get good results.

Live Stock News

COMMON SCAB AMONG SHEEP

During Past Decade Great Progress Has Been Made in Eradication of Ailment.

Common scab was formerly the greatest drawback to the sheep industry of the United States, but during the past decade great progress has been made in its eradication. The system of grazing sheep on the open ranges of the western part of the United States was such that the flockmasters had great difficulty in keeping the flock free from the scab. The sheep were very frequently exposed to the disease by infectious ranges and trails, "picking up strays" from infected flocks, and in many other ways. It became desirable for the department of agriculture to extend aid to the

An Advanced Case of Scab, Showing Area Denuded of Wool.

industry by controlling the interstate movement of sheep to prevent the carrying of the infection from one state to another.

Scab is exceedingly contagious and is transmitted by direct contact with animals or objects that are carriers of the mites. Although unable to propagate except on sheep, the mites may be harbored temporarily by animals other than sheep and may live on goats for a long period.

A flock of scabby sheep will infect the roads, trails, sheds, yards, bed grounds, pastures, ranges, and the ground around the watering places. It is therefore important that the flock receive proper treatment as soon as the disease appears, before the infection becomes scattered over the premises.

SCIENTIFIC FEEDING IS BEST

Supply Food in Right Proportions to Meet Requirements Without Waste of Nutrients.

To supply food in the right proportion to meet the various requirements of the animal, without a waste of food nutrients, constitutes scientific feeding. It is by carefully studying the composition of feeding stuffs, the proportion in which they are digested by different animals and under different conditions, and the requirement of animals for the various food nutrients when at rest, at work, giving milk, producing wool, mutton, beef, pork, etc., that the principles of feeding have been worked out. In applying these principles in practice the cost and special adaptations of different feeding stuffs must, of course, be taken into account.

SIRES TO AID FUR BEARERS

"Better Sires—Better Stock" Campaign Indorsed by Breeders and Fanciers' Association.

The National Breeders and Fanciers' Association of America has indorsed the "Better Sires—Better Stock" movement. Through its secretary, the association has notified the United States department of agriculture of its aim, through better sires, to improve the quality of fur-bearing animals raised in confinement.

In addition to raising animals kept primarily for fur, members of the association also breed such creatures as rabbits, cavies, and mice used for pets and scientific purposes. The value of pure-bred sires is especially great for classes of animals like those mentioned because of their prolificacy.

DECLINE IN BREEDING SOWS

Decrease of 9.9 Per Cent Is Noted by Bureau of Estimates—States Affected.

Breeding sows declined 9.9 per cent during the year ending April 1, 1920, according to investigations of the bureau of crop estimates. The same number of these animals for both years is reported for South Carolina and Georgia, and increases for Florida, Texas, and New Mexico. The heaviest declines were found in Massachusetts, Indiana, Illinois, Missouri, North Dakota, Nebraska, Kansas, Kentucky, Tennessee, Montana, Wyoming, Colorado, Arizona, Utah, and Idaho.

PLAN FOR BETTER STOCK.

Boost better live stock in your community.

Advertise judiciously.

Exhibit at the county, state and other larger live stock shows.

Remember that a satisfied purchaser is your best advertisement. So be prompt in registering and transferring animals and make good all guaranties.

1 Junction Tile Lat. 75.58			
Br. 11	15	200	5.20
Br. 11	12	280	5.10

Work to be commenced within thirty days of the contract is awarded, and to be completed on or before the first day of July, A. D. 1921.

All ditches and drains to be constructed in all respects in accordance with the plat, profile and specifications of the district filed by the Engineer in the Auditor's Office subject only to such changes and alterations as may be made as provided by law.

Sealed bids will be received at the office of the County Auditor of Hancock County, Iowa, up to 1 o'clock P. M. on the 2nd day of Aug. 1920.

All bids must be made at a fixed price per station of 100 feet for each size tile and also a fixed price for section complete in all respects including intakes and headwall and must also include the schedule of overdepth adopted by the Board of Supervisors of Hancock County and on file in the Auditor's Office for possible overdepth or underdepth beyond the average depth specified.

Each bid must be accompanied by a cash deposit or certified check in a sum equal to ten per cent of the total amount of the bid, as a guarantee of the good faith of the bidder.

The contract for the work of construction of said ditches and drains will be let to the lowest responsible bidder, or bidders, but the right to reject any or all bids and also the right to adjourn time of awarding contract is reserved.

The party to whom any contract is awarded will be required to attend at the office of the Auditor of Hancock County, Iowa, within ten days after said award and execute a contract thereby agreeing to all the provisions terms and conditions thereof and shall also file with the County Auditor a bond subject to his approval for the sum equal to the twenty-five per cent of the amount of his bid, and in case the party to whom any work is awarded fails to enter into this contract and furnish bond within ten days as therein required, the deposit of such party shall thereupon become forfeited to Hancock County Drainage District No. 105, together with all right under said award.

The deposit of the unsuccessful bidders will be returned to them within twenty-four hours after demand and the deposit of the successful bidder will be returned to them upon their executing the contract and filing with the County Auditor the bond as therein required.

By order of the Board of Supervisors.

Dated at Garner, Iowa, this 14th day of July, A. D., 1920.

SEAL Chris Jacobs,
County Auditor

Defining the Heart.

The human heart, always a mystery, has become the subject of further speculation, since a Supreme court justice decided that "nobody can plumb its depths." It has been described as broad and hollow, and the jurist says, in effect, that it is bottomless. One is almost driven to the conclusion that, as was the world before the first heart began to beat, it is "without form and void."

OFFICIAL PUBLICATION

ORIGINAL NOTICE

In the District Court of Hancock County, Iowa,
October Term A. D. 1920.

Joseph E. Johnson, Plaintiff
vs.
Unknown Claimants of and to the West Half of the Southeast Quarter and the East Half of the Southwest Quarter of Section Twenty-three in Township Ninety-five, North, Range Twenty-three West of the 5th P. M. in Hancock County, Iowa, and Patrick Shandler and Mrs. Patrick Shandler, wife of Patrick Shandler, Defendants.

To THE ABOVE NAMED UNKNOWN CLAIMANTS AND DEFENDENTS, AND EACH OF THEM;

You are herby notified that on or before the 1st day of October A. D. 1920 there will be filed in the office of the Clerk of the District Court of Hancock County, Iowa, the petition of the plaintiff in the above entitled cause claiming that he is the absolute owner in fee simple of the West Half of the Southeast Quarter and the East Half of the Southwest Quarter of Section Twenty-three in Township Ninety-five, North, Range Twenty-three West of the 5th P. M. in Hancock County, Iowa.

That he and his grantors have been in the open, peaceable, continuous, notorious and adverse possession of the said premises for more than twenty-five years last past with claim of right and color of title and asks that all of the said Unknown Claimants and Defendants be forever barred and estopped from having or claiming any right, title or interest in or to the said premises adverse to the title and estate of the plaintiff therein and that the title thereto be quieted in the plaintiff and for equitable relief.

For further particulars see the petition when filed, which sets forth the plaintiff's claim in detail.

You are further notified that unless you appear thereto and defend on or before noon of the second day of the next term of the said District Court which will commence and be held at the Court House in Garner, Iowa, on the 11 day of October A. D. 1920, default will be entered against you and judgment and decree rendered thereon as prayed.

Dated this 24th day of May A. D. 1920.

Ramsay & Blackstone,
Attorneys for Plaintiff.

It is hereby directed and ordered that the foregoing notice be published once each week for four successive weeks in the KLEMME TIMES, a newspaper of general circulation published in Hancock County, Iowa.

Dated this 25th day of May A. D. 1920.

A. E. Baumgartner,
Seal Clerk of the District Court
in and for Hancock County,
7-29-20-4w. Iowa.

Contract Let For Sewer To Be Completed This Year

The council let the contract Tuesday night. The bid accepted for the sewer was a few dollars under $40,000.00, and the bid for the disposal plant being about $15,000.00. Work will begin in a couple of weeks. Further particulars in next issue.

KENDALL NOMINATED FOR GOVERNOR, HAMMILL OF BRITT FOR LIEUT. GOVERNOR

People in this locality were especially glad to hear that John Hammill, of Britt, received the nomination for Lieutenant Governor. Nate Kendall, of Albia, was nominated for Governor at the convention on the third ballot. Major Glen Hayes, of Mason City, for Auditor. B. J. Gibson of Corning for Attorney General, and Fred Woodruff, of Knoxville, was nominated for Railroad Commissioner. This section of Iowa was very fortunate in the convention for it brings the men into the capitol almost from our door step. Anyway, Hurrah for John Hammill and Major Haynes!

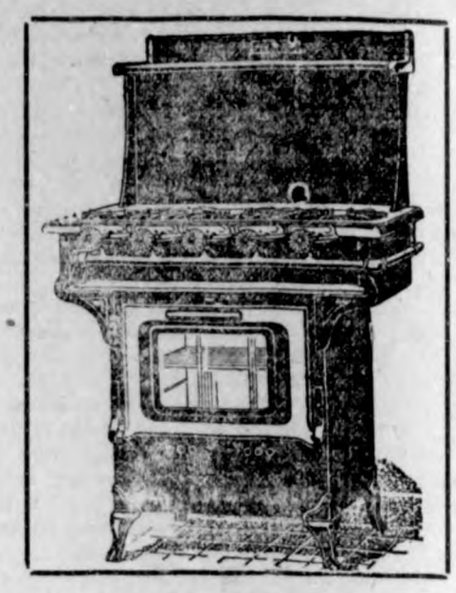
NOW WATCH OUT!

Treasurer Thos. Thompson tells us that he has received word from Secretary of State Walt Ramsay, to the effect that beginning the first of August, there will be thirteen special auto tax ferrets placed in the state whose duty it will be to look after those who have failed to come through with the required license fee, and that one of these men will be assigned to Hancock county. Take heed and govern yourself accordingly.—Democrat.

If It's Oil Stoves

That you have been Looking for, then--

Look at our big line!



Our line of Oil Cook Stoves is complete. We handle only the best stoves on the market, and have just received another big shipment of the following high grade oil stoves:-

RED STAR
Detroit Vapor Oil Stove

One of our best stoves and a big seller.

The New Perfection

is highly endorsed by Klemme housewives.

Nesco Perfect

A wonderful cooker that's hard to beat.

Quick Meal

Is just what the name implies--quick meals.

Puritan

A fine stove that makes kitchen work easy.

All of the above stoves come in two to four burners. We also have one and two burner ovens to fit these stoves.

We are closing out on Fruit Jars and have only a few left.

Jacobs & Son

This an

Underwear Store

above the average;

The underwear stock is a very impor ant part of this store and while we have a line or two that we think are beyond all others in quality and proportions still we carry six different lines.

We can give you what you want; in other words suit yonr idea.

Men's Spriug neddle bals $1.50, $2.00, $2.50, and $3.00.

Men's Athletics $1, $2, $2.25, $3 to $10.

Men's 2-piece garments, light and medium weights $1 to $1.50.

Boy's and Children,s· underwear—wide variety 75c to $1.50.

If your idea is choice, good fitting underwear reasonably priced come and see us.

Mail orders get prompt attention.

Patton Bros. Co.

N. L. Palmer was transacting business at Goodell last Friday between trains.

Miss Donna Baumgartner went to Garner last Friday morning for a week's stay with her grandparents.

Mrs. Mlle Smith went to Belmond Tuesday evening for a short visit with her mother.

The town council met Monday evening at Gruetzmacher's store to discuss business of the town.

Rev. Gauger, of Garner, was a business caller in Klemme Tuesday morning.

Mr. adn Mrs. Frank Clark of Goodell, were Klemme callers Monday afternoon.

Mr. and Mrs. Tom Burgess, of Goodell, were transacting business in Klemme Monday.

Mrs. J. W. Brooks from Belmond came Monday for a visit with her daughter, Mrs. Millie Smith and family.

Mr. and Mrs. Fritzell and daughter, from Grundy Center, Iowa, are here for a visit at the home of Mr. and Mrs. Chas. Fritzell.

LuVerne Smith came up from Des Moines Monday afternoon for a few days visit with his mother, Mrs. Mille Smith, and his sisters here.

Billy Keraus' brother and wife and their children were in Klemme visiting Thursday evening. They are moving to Aberdeen, South Dakota.

Mrs. Geo. Cleman's mother and sister have returned after spending a week or more with Klemme relatives and friends.

Mrs. R. W. Schultz, accompanied by her sister and mother of Chicago, drove over from Garner last Friday for a visit with Klemme friends.

Miss Warnock, of Iowa Falls, spent Sunday with Klemme friends. Miss Warnock was oneo f our teachers last year.

Mr. and Mrs. J. W. Waterman and Mabel, and Mr. and Mrs. C. G. Waterman drove to Mason City Sunday afternoon to hear the professional band.

Mrs. F. E. Blackstone and Miss Jennie Elder, of Garner, drove over to Klemme Tuesday for a visit with Klemme friends.

Mr. and Mrs. R. A. Jorgenson and Miss Ruth Davis, autoed to Mason City Saturday afternoon to hear the concert by Mason City's profesional band.

As usual there were many Klemme people enjoying Sunday at Clear Lake. It was a nice hot day to take a dip in the water and a ride on the coaster.

Work on the new sewer system to be put in at Bode commenced last week. There are many small towns in Iowa that are having sewerage installed this year.

Mrs. E. S. D. Kahrs returned Friday afternoon from Rochester, Minn. where she accompanied her brother from Nevada, Iowa. Her brother, Mr. Ludwig, went to the hospital for treatment.

Mr. and Mrs. Wilbur McGee and Mr. and Mrs. Wm. Trafford are taking an auto trip to and through Wisconsin this week. Mr. Traflord is taking his summer vacation, and while in Wisconsin Mr. McGee will look after business interests.

The Misses Helen and Martha Lenz returned from Dows last Friday where they had been visiting a sister for a few days. The young ladies are sisters of Mrs. A. H. Meyer at whose home they are spending their summer vacation.

Rev. A. H. Meyer left for Cedar Rapids Monday as a delegate to the Judiciary Convention. The Reverend gentleman will do his best to cast his ballot for the right Judge, so he says.

A. D. Gimer and family moved the fore part of the week into the Sanderfelt house, formerly owned by Mrs. Mary Arnold. Mr. and Mrs. Wm. Smith, who purchased the Gimer place, will move in there.

The play put on by the children of the Methodist Episcopal Sunday School at the Idle Hour last Friday evening was well enjoyed by all and the little tots done excedingly fine in their play entitled "Tom Thumb's Wedding."

Harold Gruetzmacher came from Ames last week for a few days' visit with his parents here. Harold is taking a summer course this year at the college so that he can double up on the work and get through school quicker.

Mr. and Mrs. D. Kahrs left Saturday for Elgin, Ill., after spending about a week visiting with his son, E. S. D. and wife here. They expect to return to Klemme again this fall before returning to their home in California.

The band boys had their rehearsal last Thursday evening instead of Friday on account of the play at the Idle Hour theatre. The band exchanged dtes with Garner and the latter town had thir practice Friday so that Mr. Crotty could be present at both rehearsals.

Ed Jacobs and Donnald Nissen drove to Perry, Iowa, in the former's car Saturday night after they quit work in the stores. They went to visit a former pal of Ed's who he chummed around with in the army. The boys got back Monday afternoon and report having had a good trip.

WE HAD ROASTING EARS

How many people in Klemme have had sweet corn big enough to eat this year? We will venture to say that not very many have "eaten off the cob." We had "roasting ears" for dinner Sunday, the first of the season and out of our own garden. We were all puffed up about our swell little garden when N. L. Palmer comes along and spoils it all by telling us that he had corn on the cob for dinner Sunday out of his own garden. Somebody is always taking the joy out of life.

The MAN NOBODY KNEW

by HOLWORTHY HALL

COPYRIGHT BY DODD, MEAD & CO., INC.

"DIDN'T HE SEND SOME WORD TO ME?"

Synopsis.—In a base hospital at Neuilly, France, his face disfigured beyond recognition, an American soldier serving in the French army attracts attention by his deep despondency. Asked by the surgeons for a photograph to guide them in making over his face, he offers in derision a picture of the Savior, bidding them take that as a model. They do so, making a remarkable likeness. Invalided home, on the boat he meets Martin Harmon, New York broker, who is attracted by his remarkable features. The ex-soldier gives his name as "Henry Hilliard," and his home as Syracuse, New York. He left there under a cloud, and is embittered against his former fellow townsmen. Harmon makes him a proposition to sell mining stocks in Syracuse, concealing his identity. He accepts it, seeing in it a chance to make good and prove he has been underestimated. In Syracuse "Hilliard" (in reality Richard Morgan) is accepted as a stranger. He visits James Cullen, a former employer, relating a story of the death of Richard Morgan, and is surprised at the regret shown by Cullen and his youthful daughter Angela.

CHAPTER III.—Continued.

—4—

With Angela peering hard over his shoulder, Mr. Cullen strained to decipher the uneven penmanship. He began to read aloud:

"Dear Mr. Cullen:

"I am asking Mr. Henry Hilliard to bring you this letter personally. I want him to tell you what I'm not writing, too. And you can tell other people, if you care to.

"I want you to know that since I've had time to think, I've changed my mind about a good many things. I've come to the conclusion that you were right and I was wrong. Maybe you won't remember the last talk we had together, but I do. You told me then that I didn't have it in me to make good unless I learned that I was about the most worthless young man in town, and the one with the hardest row to hoe in order to make something out of myself, and set out from there. Well, I've learned it. I had to. Of course, I couldn't agree with you at the time. That wouldn't have been expected. But over here I've had one lesson after another. Some of them were pretty bitter, but they've all helped. And since May, when I was hurt, I've had lots of time to think them over.

"I never deserved your kindness and now I can't ever repay it. But it may please you to know that this war has taught me what you tried to, and couldn't—that I was as close to zero value at home as a man could be. It's only through this war that I've got any pride in myself, and I'm sort of like Kipling's gentleman ranker—I'm proud of myself because I've done away with all the other kinds of pride I used to have. And I believe I've made good—not as a great general, but as a private soldier. That was the trouble at home—I was only fit to be a private, and I thought I could be a general off hand. You said I'd do well if I learned that, and I have. They gave me the Croix de Guerre, and in a way, that proves it, doesn't it? Notice that they didn't even make me a corporal, though! That's all right—I haven't had enough training yet to be a corporal! It's curious that I'll admit that, isn't it?

"I want you to know that I've thought of you a great deal. I don't blame you for letting me go. I did once, but I don't now. Please think of me, though, as a man who came through at the finish, even if he'd been pretty hopeless before.

"Hilliard, the best man in the world, has promised to bring you this letter. I hope you'll be glad to see him, and to hear his side of the story. This is my apology and my blessing, if that's worth anything to you. I send a kiss to Angela.

"R. M."

Mr. Cullen ended with a falling inflection, and let the hand which held the letter drop to his knee.

"The letter, as you might guess from the looks of it," said Hilliard, "was written at several different times—according to his strength. I want you to realize, too, Mr. Cullen, that it was no small effort for him to write it. And then I was in Switzerland when he died, and his possessions had all gone to one of those tape-bound bureaus, so that I had a fearful time to identify myself and get what he had meant me to have, and after that, I had to make a sudden trip to Russia, and back to England again. There were delays—delays. I was ill for several months myself; I had typhoid in London. I should have mailed these things to you long ago, but he had begged me to come in person, and I had promised. And every day I expected that in another week or two I should start for home. I feel that I owe you this explanation and a great plea for forgiveness for what must seem to you like gross indifference on my part. But I landed hardly two weeks ago, and I came up to you at the earliest possible moment."

"In some ways, he was a most remarkable young man," said Mr. Cullen, irrelevantly. "Nobody ever understood why he turned out such a black sheep. Came from a fine old family. I suppose his father was one of the most loved men in Onondaga [illegible] Dick lived for years on his father's reputation, after people stopped noticing him on his own account. Just took advantage of the fact that nobody could quite bear to be harsh to his father's son. But he was always a wild young chap, nothing very bad, except that just too much of anything—including liquor—was just enough for him! Had too quick a temper to be diplomatic enough to hold a job, and didn't care much about working hard, and finally the tide turned, and he began to get treated just as if his father hadn't been a sort of popular idol, and then his disposition soured, and he made some bad mistakes. I gave him the last job he ever had in Syracuse, but I had to let him go . . . and I told him some plain facts when I did. That's what he refers to."

"I assumed," said Hilliard, hesitatly, "that at one time he had been what you might call . . . disappointed in love? Something was weighing on him—he practically admitted . . . but that was one point that he didn't appear to want to confess, even to me."

"He was engaged to Carol Durant." Angela had taken the cross again, and held it like a precious relic. "She broke it off, just before he went away."

"The day before," added Mr. Cullen. "That was one of the two reasons why he went."

Hilliard nodded.

"I see. . . . On account of his habits?"

"That was the gossip," said Mr. Cullen heavily. "Doctor Durant was supposed to have—"

"Didn't he write to her?" asked Angela, raising her eyes.

"Not that I . . ." He stopped quickly. "I trust you'll forgive me, but I'd imagined from various remarks he made at different times, that he was really . . . that he was greatly attached to you." This last was addressed to Angela, who was both dignified and shaken by the suggestion. Her father, however, nodded in the negative.

"Angela wasn't much more than fifteen, sir. They were great friends; he was very fond of her. No, it was Carol Durant he was engaged to. Didn't he ask you to see her?"

"No."

"But you will, I hope, won't you?"

"You can see Carol here tonight, if you care to," said Angela, uncertainly. "She and . . . and a friend of hers are coming over to talk about another Red Cross drive. Carol's on the committee. They ought to be here any minute now."

"Yes," said Hilliard. "If I'm going to see her, I think I should rather—see her here."

Mr. Cullen sighed stertorously.

"Well, perhaps it's better . . . and I shall want to telephone this to the Herald if you don't object. It's the least we can do, all things considered." . . . He reflected a moment. "How long are you staying in town, Mr. Hilliard?"

"I've made no plans whatsoever," he said, after a slight pause. "I sold my interests to a British syndicate of bankers two months ago. My home is where my baggage is. I'm thinking of taking a day or two to see certain of Dick's friends—the ones he talked about most—and after that, the future is on the knees of the gods."

Mr. Cullen regarded him with sincere respect.

"It would give me great pleasure," he said, a trifle pompously, "if you would be my guest for the time you're here, Mr. Hilliard. It would please me very much indeed." Hilliard's heart pounded.

"And me too," said Angela, gently. Hilliard's heart threatened to suffocate him; not entirely because the game was going so infinitely better than he had dared to hope, but also because it was Angela who entreated him.

"It's wonderfully good of you," he protested, "but I couldn't disturb you to that extent. Thank you, but—"

Mr. Cullen stopped him by an inclusive gesture.

"You won't disturb us in the slightest! I wish you'd come with us, Mr. Hilliard. I should feel much better than having you stay downtown."

"Well—" said Hilliard, dubiously. His soul was filled with unholy joy, but his outward demeanor was deprecatory. "It's ever so kind of you; still—"

"As a favor to me," urged Mr. Cullen.

"As a favor to me," echoed Angela, and Hilliard looked attentively at her, and was obviously swayed. She noted it; he had intended her to notice it. He gave her a smile which had the power, even in her somber mood, to draw a faint response in kind.

"If you're sure it won't be a hardship to you—"

"Nonsense! It's settled, then, is it? I'll send one of my cars down for your things."

Hilliard's eyes flickered at the ingenuous vanity; he had recently learned that Mr. Cullen had made more money during the past twelve months than during the previous twelve years.

"Well," he said, "if you're so charitable as to insist—"

"I do, sir, I do! . . . You're at the Onondaga, of course?"

Angela, who had been listening intently, started up at the unmistakable echo of footfalls on the walk.

"Here comes Carol!" she gasped. "And . . . and Jack! Oh, Mr. Hilliard! Oh, dad! Who's going to tell her?"

As Mr. Cullen flinched, Hilliard put out his hand in a motion of supreme restraint. "Whatever Dick Morgan may have been at home," he said, "I knew him after he offered his life for a great ideal, and I'm proud that he called me his friend. I'll tell Miss Durant myself, please. It's my right."

And turned to face the girl he had tried to die for, and failed.

CHAPTER IV.

—

She had always been, when he last saw her, the outstanding beauty of Syracuse, but he was astounded to behold what the interval of two years had done for her. She had taken upon herself a new maturity; her figure, exceptionally graceful, was still slender; but suggestive of a more womanly, a more inclusive charm.

He was being presented to her! He, who had kissed her a thousand times, was undergoing the ritual of presentation!—and she was smiling at him with those grave, sweet eyes of hers, and calling him by his adopted name! His mask of protection had never seemed so slight, so insufficient; the fragrance of her, and the illusion caused by this, threatened his balance and set his nerves on edge; fortunately, the routine of the conventions intervened to save him from his inarticulateness. For one thing, there was the rite of introduction to Armstrong, and after that there was a dash of promiscuous conversation, with not a little weather philosophy in it. Then came the inexorable hush caused by the presence of a stranger whose fads and fancies are still a matter of conjecture, and out of that hush, a question, and Hilliard was suddenly visited by a species of self-hypnosis.

If he had been moved at all by the sight of Angela, whom he had loved as a younger sister, he was, by comparison, shaken as by a whirlwind by the sight of Carol Durant, whom he had loved as a woman. Not on the train, not at the hotel, not even when he witnessed Angela's severe grief, had he remotely conceived that this instant would be so difficult to surmount. What in New York had seemed a regeneration, and earlier on this same evening had appeared a very dubious deception, was rapidly taking upon itself the color of irremediable wrong. His imagination was aroused beyond belief; and as he stared in dumb suspense at Carol, recalling a thousand episodes and a thousand privileges of the long ago, he was preyed upon by a slow-stealing grimness of despair which left him sick with misery.

She was waiting for an answer—and the others were waiting, too, and watching him. He felt that guilt was stamped on his every feature . . .

And Turned to Face the Girl He Had Tried to Die For.

he felt that every thought of his must be as crystal to the four who waited for him to speak.

He was himself and he was not himself; he was ostensibly Henry Hilliard, a man in whom it couldn't be suspected that the heart and soul of Dicky Morgan were embodied; he was transcendentalist; a spectator at his own funeral. Sight of the Croix de Guerre of poor Pierre Dutout, who in bequeathing that impressive bit of bronze to him, hadn't dreamed that he was leaving a heritage of chicanery along with it, engendered in Hilliard a thrill which nearly found its outlet in a paroxysm of wild laughter. And the newspaper, with Dutout's most genuine citation in it! And the old passport photograph which he had hidden for fear that his real name, indorsed on it, might be cabled home, together with proof to the world that he hadn't been a hero—that he had failed in this, as in every other undertaking of his life. And all the dates in accuracy! And if anyone cared to trace back the story, where was the flaw? Where was there a loophole? And who would recognize Dick Morgan in his cloak and mask of utter miracle?

Who had?

Lightninglike, his brain included all the salient items of the picture in a single flash. There was Dicky Morgan, sailing away to France—which could be proved. There was a number, and a name attached to it, and—since Hilliard's sturdy defense of Dicky Morgan had had a grain of truth in it, and one of the steps of his many-sided progress carefully omitted—a name had really been assumed, and had endured from the date of enlistment to the date of discharge. It was the individual's recorded name in the army and at Neuilly—and it wasn't Morgan and it wasn't Hilliard and it wasn't Dutout. No one here knew it, or ever would know it; even Harmon didn't know it; it was the first sobriquet of a shell-torn individual who had been taken to Neuilly, and had been made whole again. No one at Neuilly had ever set eyes on Dicky Morgan's real face! But a certain man named Dutout had been decorated and died, and that could be proved—was proved! Hilliard had borrowed Dutout's name in perfect safety; and the trail was cold. And here was a fourth man, Hilliard—to take his word for it—and the world is larger than the curiosity of sincere people to encompass.

No—if a Neuilly surgeon ever told as one of the mysterious chapters of the war what had happened to a certain gloomy individual that summer, the name would suggest nothing. And as far as checking up the visits of a mythical Hilliard to a very real Dutout was concerned, who would profess to remember? The testimony of any single witness would be immaterial.

The voice of Carol Durant was echoing in Hilliard's ears, and Hilliard, yielding to a tidal wave of recklessness, and of swelling anger at imaginary wrongs, looked squarely into Carol's eyes, and spoke with winning urgency.

"Yes," he said. "I have news of Morgan. In fact, I'm here in Syracuse solely because I have it. I've just been telling Mr. Cullen—and Miss Cullen—that I was with him when he died."

She didn't speak, at first; she merely looked at Hilliard and grew very white, and her lips quivered. Presently she swayed a little, and reached out with her hand toward the back of a convenient chair. Armstrong stepped toward her, and Angela Cullen slipped an arm around her waist.

"He's . . . dead?" she repeated, and her tone was not yet free from a certain incredulity, as though the fact were of itself impossible, and the statement of it subject to discussion.

"Yes, Miss Durant."

She moistened her lips; her eyes were very bright, unnaturally bright, so that Hilliard was fascinated, and appalled.

"You . . . You know that?" she asked, again with that queer inflexion of amazed doubt.

"Yes, I know it."

The others were standing as statues; Mr. Cullen, snatching at the first idea of consolation to present itself, fumbled for his daughter's other hand, which still retained the trophy a better man had won.

"Here's what they gave him, Carol! Look! The Croix de Guerre! Don't let's think of anything but what he . . . let's be proud of him! I—"

"Oh, yes," she said inertly, and took the cross in her palm. She dropped her eyes for a moment, then raised them to the level of Hilliard's. "Didn't he send some word to me?"

"No." Hilliard's nod was very ministerial. "No, I'm sorry, but—"

Her eyebrows lifted, and her nostrils dilated the merest trifle. Her breath was coming more rapidly now; she was nearing the breaking point of her resistance, and all of them knew it. The moment was agonizedly prolonged. Hilliard, gazing without a quaver at the girl he had thought he loved beyond all else in this world or the next, was singularly relaxed as he observed her symptoms. She had really cared, then . . . so much the greater pity that she hadn't kept him caring . . . as she might.

"Can that be possible?" she said, hardly above a whisper.

"I'm sorry—but—"

"I wouldn't have believed it could be true." She gave a long, tremulous breath, and looked about her, half-dazed and half-perceptive. Her eyes strayed back to Hilliard. "Tell me about it," she said, almost inaudibly.

"Carol, dear!" Angela was stimulated to active sympathy. "Sit down—please! Oh, Mr. Hilliard!"

"No—yes, I . . . I'll sit down!" Her eyes seemed magnetized to Hilliard's. "Only I want to hear—I want to hear!"

"Tell her from the beginning," said Cullen, mopping his forehead. Get a glass of water . . . anything else, Carol?"

She shook her head. "Tell me!" she said. "I want to know!"

So that Hilliard, inspirited by the realization that he was under the protectorate of the shadows, and gathering fresh assurance with every sentence, went through that tragic narrative a second time. And as he told the tale of Dicky Morgan, he was greatly engulfed by the surge of Dicky Morgan's grievances; his voice trembled with righteousness; he gradually lost his loathing for the part he played, and played it with every atom of his energy; he was a defendant, and a witness and a judge for Dicky Morgan all in one—and his verdict was for acquittal. Miss Durant's eyes never left his face.

"And that," she said presently, "is all there is to tell?"

"That's the end," said Hilliard simply. And in the long hiatus which followed, he was wondering . . . wondering . . . vague aimless thoughts, with no beginning and no conclusive outcome, but the central figure, flitting, elusive, was always Carol Durant. He told himself fiercely that he hated her, that for two vengeful years he had hated her, that he had come back to Syracuse primarily to see her again, with his whole soul for the wounds in his heart, the wounds of his body, still . . . O God! why couldn't the surgeons have cut away his memory, and left him peace!

He was prodigiously relieved when Mr. Cullen, well-meaning but awkward, blurted out a paradox of eulogy. Armstrong, eager to relieve the congested ways of thought, ventured into the realm of platitude—and something in his manner caught Hilliard's attention. The man was actually possessive—and Hilliard, having no envy of his possession, cursed him on general principles nevertheless. And then

"Miss Durant!"

Hilliard was again in demand; there was a flood of incoherent questioning, and he was giving details, answering queries, volunteering information which might never have been asked, describing Neuilly, the hospital, the surgeons, the nurses, the wholly indescribable atmosphere of France in wartime. He was strengthening his position, phrase by phrase; his insouciance redoubled; he had laid a rock foundation never to be successfully assailed. There came an abrupt pause; Miss Durant rose and came to him, and he was on his feet to meet her.

"Thank you," she said, giving him her hands. His heart missed a beat; his blood ran gelid. "Thank you. If you can . . . I wish you'd talk to me again before you go . . . alone . . . I wish it very much. You've made me . . . at least, I can be glad you were there . . . to help him, but I want to know so much more . . . so infinitely much more . . ."

A fleeting impulse clawed at Hilliard's judgment; he yielded to it blindly. It meant the alteration of his plan of action, it meant a trifle more of danger; and a gratuitous risk at that, but it was genius—genius!

"Miss Durant!" He made sure that the others were beyond the range of his voice. "Miss Durant! I said he sent no word to you; that was true as far as I knew the truth, but there's one letter he started to write—just at the last . . . it wasn't addressed to anyone; I didn't know who it was for. I brought it with me on the chance that I'd find out. I didn't want to speak of it before every one, because if it's yours, I thought you'd . . . you understand, don't you? I'm almost positive it was meant for you. It's only a few lines . . . he wasn't ever strong enough to finish it . . . I've got it at the hotel now. May I bring it to you tomorrow?"

She held her breath for an instant; her mouth quivered. She looked at him searchingly.

"Surely. I . . . I live just across on the corner, Mr. Hilliard. The brick house. Can you come early?"

"How soon?" He was telling himself that his former passions were atrophied; she was no longer able to disquiet him. His inspiration was commercial—strictly commercial.

"In the morning? At . . . eleven?"

"I'll come gladly."

"But this Hilliard person—a live wire, boy, a live wire.

(TO BE CONTINUED.)

DO ALL MY HOUSEWORK

Before I took Lydia E. Pinkham's Vegetable Compound I could hardly stand, says Mrs. Kwarcinski.

Chicago, Ill.—"I suffered with displacement and irregularities and I did not know what to do. My mother advised me to take Lydia E. Pinkham's Vegetable Compound and use the Sanative Wash so I took her advice and used these remedies and cured myself. I feel fine and do all my housework which I could not do before, as I could hardly stand up and I have three healthy children. You can use this letter if you wish, for your remedy is certainly wonderful for sick, run down women."—Mrs. A. KWARCINSKI, 3627 W. Oakdale Ave., Chicago, Ill.

For forty years Lydia E. Pinkham's Vegetable Compound has been making women strong and well, relieving backache, nervousness, ulceration, and inflammation, weakness, displacements, irregularities and periodic pains. It has also proved invaluable in preparing for childbirth and the Change of Life.

Women who suffer are invited to write for free and helpful advice to Lydia E. Pinkham Medicine Co. (confidential), Lynn, Mass. It is free and always helpful.

"Can't Cut Off My Leg" Says Railroad Engineer

"I am a railroad engineer; about 20 years ago my leg was seriously injured in an accident out West. Upon my refusing to allow the doctor to amputate it I was told it would be impossible to heal the wound. I have tried all kinds of salves and had many doctors in the past 10 years, but to no avail. Finally I resolved to use PETERSON'S OINTMENT on my leg. You cannot imagine my astonishment when I found it was doing what over 100 things had failed to do. My leg is now completely cured."—Gus Hauft, 1 Myrtle avenue, Brooklyn, N. Y. Great for piles, eczema, old sores and all skin diseases. 60 cents. Mail orders filled. Peterson Ointment Co. Inc., Buffalo, N. Y.

Something Gained.

"It strikes me that $100 is a lot of money to pay for a suit like that."

"True enough," said Mr. Glipping, "but I'll have the use of the $100 for at least sixty days longer."

"How so?"

"I had it charged."

ASPIRIN

Name "Bayer" on Genuine

"Bayer Tablets of Aspirin" is genuine Aspirin proved safe by millions and prescribed by physicians for over twenty years. Accept only an unbroken "Bayer package" which contains proper directions to relieve Headache, Toothache, Earache, Neuralgia, Rheumatism, Colds and Pain. Handy tin boxes of 12 tablets cost few cents. Druggists also sell larger "Bayer packages." Aspirin is trade mark Bayer Manufacture Monoaceticacidester of Salicylicacid.—Adv.

OLD SOMERS, 150 De Kalb Ave., Brooklyn, N. Y.

Home Town Helps

IDEAL CITY OF THE FUTURE

Will Be Attained When Every Citizen Realizes the Importance of His Part of the Work.

A city sanitary, convenient, substantial; where the houses of the rich and poor are alike comfortable; where the streets are clean and the skyline is clear as the country air; where the architectural excellence of its buildings adds beauty and dignity to its streets; where parks and playgrounds are within the reach of every child; where living is pleasant, toil honorable and recreation plentiful; where capital is respected but not worshiped; where commerce in goods is great, but not greater than the interchange of ideas; where industry thrives and brings prosperity alike to the employer and employed; where education and art have a place in every home; where worth and not wealth gives standing to men; where the power of character leads men to leadership, where interest in public affairs is a test of citizenship and devotion to the public weal is a badge of honor; where government is always honest and efficient, and the principles of democracy find their fullest and truest expression; where the people of all the earth can come and be blended into one community life, and where each generation will vie with the past to transmit to the next a city greater, better and more beautiful than the last.—The Nation's Business.

NO EXCUSE FOR UGLINESS

Man Who Today Builds an Unattractive or Commonplace House Is Behind the Times.

There is no excuse in these days for building an ugly or commonplace house. A generation ago not many capable architects were available, especially in the western country. Even when they were, the prevailing taste ran to frills of turrets and jig-saw work. The beauty of simplicity was not known, and the architect who stood out for it often found his client obdurate.

All that has changed. A comparison of the bulk of the houses built in the eighties and nineties with those of more recent years will reveal how far the country has come. The number of competent architects has increased and of even greater importance, the stock of sound architectural ideas has become widely diffused.

Books and magazine articles on the subject have multiplied amazingly. The prospective builder ought, of course, to avail himself of the services of a good architect. But even if he fails to do this he can find in the public library excellent designs to meet his needs.

City Planning Public's Business.

Real city planning is neither a private enterprise nor a move for "the city beautiful." It is primarily a business enterprise and its benefits accrue to the public at large. A planning commission, with the aid both of planning experts and the city government, cannot hope to succeed in its work without the aid of the public.

The fact that planning must be made popular was emphasized at an important session of the realtors' convention. Whatever method is adopted, a planning commission, after first carefully preparing its plans must "sell" its ideas and aims to the people. Through constant publicity the public must be educated to see the needs and the benefits of a businesslike ordering of the city's development, and must be made to share the labor involved and to contribute to the cost.—Exchange.

Stagger Imagination.

Suggestions of distances more and more inconceivable are a feature of recent astronomical investigation. In studying the parallax of a sixth magnitude star, Dr. Robert Trumpler has found a tenth magnitude star more than eight minutes of arc from it that has the same large proper motion and the same parallax, and he concludes that the two stars must undoubtedly be connected. They are separated by not less than 13,200 times the distance of the earth from the sun. Revolving in a circular orbit around a common center, they must require hundreds of thousands of years to complete a single revolution, and yet they are so remote from the multitude of other star systems that there is no interference with their companionship.

"Ball" Lightning.

Occasionally readers report having seen or heard of a thunderbolt falling in some place, or an account appears of the damage done by a thunderbolt. Very often this can be accounted for by certain forms of lightning, particularly that known as "ball" lightning. The "ball" is probably an isolated sphere of ozone gas containing a considerable amount of energy stored in it by the action of electricity during a thunder storm, which falls earthwards as a luminous ball after a severe flash of lightning, and explodes with extreme violence on nearing the earth. The energy thus liberated is capable of causing all the damage attributed to "thunderbolts."

BIG IMPORTANCE OF HOME CANNING

Don't Neglect Home Canning—Let the Children Help.

Home canning—of utmost importance during the war—will be just as important this year, according to present indications as they are viewed by the United States department of agriculture. The shortage of labor on the farms makes it necessary for the canneries to pay high prices for the commodities that will be canned later in the season. Labor in the canning factories is expensive and difficult to obtain. Everything, from cans to cartage costs, has increased in price, and transportation is slow and more expensive than it was in war times. All this increase must be paid by the ultimate consumer; and there is not even assurance that there will be enough canned products to go around. The solution is home canning.

Can Without Sugar.

That sugar is higher in price than it has been hitherto is advanced by some as a reason for canning either less fruit or nothing but vegetables; but unless one intends to give up sweets altogether there seems no good reason for not using canned fruit on account of high-priced sugar. There are few desserts that do not take from one-half to one cupful of sugar, and no dessert is more healthful than fruit. It is not necessary to use such thick sirup as was used in the days of plenty. A ten per cent sirup made of one part sugar to nine parts water will make palatable any of the acid fruits. Such fruits as apples, pineapples and the like can be canned without sugar. In fact, ordinary glucose or corn sirup may be substituted for sugar in making the sirup. A palatable sirup is made by mixing one-half cupful sugar, one cupful glucose and eight cupfuls of water.

It requires about seven ounces of sugar for a pint jar. One cupful of sugar will make ten cupfuls of sirup. A pound of sugar will make 20 cupfuls. This last amount will be sufficient for 20 pints of canned fruit. Where the 10 per cent sirup is used the cost of sugar to can a pint jar is one and one-half cents with sugar at 30 cents a pound. It is not so expensive after all.

SIRUPS SAVE SUGAR IN MAKING JELLIES

Directions Given by Department of Agriculture Experts.

When Fruit Is Cheap and Sugar Expensive Jellies May Be Made to Advantage With One-Half Usual Amount of Sweetening.

To obtain the largest possible amount of jelly from fruit with the use of the smallest possible amount of sugar, follow the directions given below by United States department of agriculture specialists:

If a good jelly-making fruit, such as quince, green grapes, tart and partly ripe apples, Siberian crabs, or cranberries, is being used, make a second extraction from the fruit. That is, take the pulp from the jelly bag, add one cupful of water to each pound of pulp, cook 20 minutes, and drip a second time, using some pressure at the last. Second-extraction jellies are likely to be somewhat different in flavor from the first, and it is an excellent plan to combine the two jellies before sweetening.

When fruit is cheap and sugar expensive, jellies may be made to advantage with one-half as much sweetening as usual, that is, with one-half cupful of sugar to one cupful of juice. The yield of jelly will be less, for one cupful of a good juice plus one cupful of sugar should make between one and one and one-half cupfuls of jelly, whereas one-half cupful of sugar plus one cupful of juice makes between one-half cupful and three-fourths cupful of jelly.

One-half of the sweetening may be glucose sirup, light-colored corn sirup, honey or sorghum sirup. If the other half is granulated sugar, there will be little noticeable difference in sweetness in most cases. Grape with glucose or corn sirup will make a good jelly even when no sugar is used.

BIG ESSENTIALS IN CANNING

Among Other Things Necessary Are Fresh Products, Pure Water and Cleanliness.

The essentials in canning fruit and vegetables are these:

Fresh products, pure water, care, cleanliness, good jars, "live," standard rubber rings and sufficient heat to process the products thoroughly in the closed container.

CLEANING CARPETS AND RUGS

Vacuum Cleaner Operated by Hand or Electricity Removes Practically All Dirt.

A carpet sweeper or a vacuum cleaner should be used in the daily cleaning of the carpets and rugs. A vacuum cleaner operated by hand or electric power removes practically all the dust and dirt from carpets and rugs in dustless manner.

SPOILAGE OF BREAD PREVENTED BY CARE

Cover Lightly to Keep Out Germs and Dust.

When Cold It Should Be Placed in Close Receptacle That Has Been Thoroughly Aired—Food Is Easily Contaminated.

While cooling, newly baked bread should be lightly covered with a clean cloth or paper to prevent mold germs and dust from falling upon it, but should not be tightly wrapped in a thick cloth, as is the practice in some households, for unless it is aired, when taken from an oven, it is likely to become "soggy" and damp, and thus offer an excellent medium for cultivation of molds, say food specialists of the United States department of agriculture. When cold the bread should be placed in a close receptacle that has been thoroughly scalded and aired. If bread is to be kept for more than two or three days in damp, hot weather, the jar or box should be taken out and sunned for a short time now and then, and again scalded and dried. On no account should portions of a former baking be stored with a new batch.

Cake and cookies should be cooled after making and kept in tin boxes or in earthenware jars, which, like bread boxes, should be scalded and aired often. Even if these foods are to be eaten at the next meal, it is well to keep them in some such receptacle, as it insures protection from dust. A cake, pudding, or pie that has been left to cool unprotected from dust or flies is something that no careful housewife would place on her table, if she stopped to think how easily the food may be contaminated.

Household Questions

Wash the flatirons in soda and water before heating.

* * *

Japanese flower baskets are decorative for standing plants or to use in hanging basket fashion.

* * *

A blue denim cover to fasten over an ironing board saves the white cover and is good to use when pressing suits.

* * *

When making cake add two tablespoons of boiling water to the butter and sugar mixture. This plan secures a fine-grained cake with less labor and in no way interferes with the usual recipe.

* * *

In sewing white silk blouses by machine, place a piece of white paper under the material. If this is done the silk doesn't pucker or draw up and the paper is easily removed when the work is finished.

Perfect Health is Yours If the Blood is Kept Pure

Almost Every Human Ailment Is Directly Traceable to Impurities in the Blood.

You should pay particular heed to any indication that your blood supply is becoming sluggish, or that there is a lessening in its strong and vital force.

By keeping your blood purified, your system more easily wards off disease that is ever present, waiting to attack wherever there is an opening. A few bottles of S. S. S., the great vegetable blood medicine, will revitalize your blood and give you new strength and a healthy, vigorous vitality. Everyone needs it just now to keep the system in perfect condition. Go to your drug store and get a bottle to-day, and if you need any medical advice, you can obtain it without cost by writing to Medical Director, Swift Specific Co., 112 Swift Laboratory, Atlanta, Ga.

Easily Answered.

Chemistry Professor—"Name three articles containing starch." Student—"Two cuffs and a collar."

Important to all Women Readers of this Paper

Thousands upon thousands of women have kidney or bladder trouble and never suspect it.

Women's complaints often prove to be nothing else but kidney trouble, or the *result* of kidney or bladder disease.

If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.

You may suffer pain in the back, headache and loss of ambition.

Poor health makes you nervous, irritable and may be despondent; it makes any one so.

But hundreds of women claim that Dr. Kilmer's Swamp-Root, by restoring health to the kidneys, proved to be just the remedy needed to overcome such conditions.

Many send for a sample bottle to see what Swamp-Root, the great kidney, liver and bladder medicine, will do for them. By enclosing ten cents to Dr. Kilmer & Co., Binghamton, N. Y., you may receive sample size bottle by Parcel Post. You can purchase medium and large size bottles at all drug stores.—Adv.

The Flapper.

Mother—"Why don't you dress sensibly, Marie?" Daughter—"Oh, ma, it would seem so foolish."

HOT WEATHER Hits the Stomach Hardest

Chicago, Ill.—Hot weather upsets the strongest stomach and causes serious trouble for the weak ones, so word is now going out to thousands of eatonic users that they should, during this hot weather, be on the safe side and take one eatonic tablet about half an hour before meals, as well as after eating. Do this and keep the excess acids and poisonous gases from forming in stomach and bowels. Eatonic acts quickly; it will help the appetite and take away the hot-weather, feverish, thirsty feeling from mouth and stomach, because it takes up the excess acids, poisons and gases and carries them out of the body and, of course, when the cause of the trouble is removed, there can be no bad feeling. Eatonic is like a bit of candy, and is recommended to all as a safe, sure remedy these hot days for stomach and bodily troubles, caused from overeating and drinking cold things. Adv.

GAVE HIM UP IN DISGUST

Colored American Put Algerian to the Supreme Test and Then Delivered Stern Verdict.

The total lack of comprehension between the American negro and his Algerian brother will go down in history as one of the outstanding features of the war.

There was, for instance, the case of the dusky stevedore at Brest and one of the colored French troops on duty there. Long and laboriously the Yank tried to establish some means of linguistic communication, but there was no response.

Then a brilliant thought struck the boy from Georgia. He produced a pair of ivory cubes and rolled them enticingly under the Algerian's nose. Intelligence still registered zero.

"Man," said Sam in disgust. "You ain't no cullud pusson. You ain't even no human. You is just a corpse."—The American Legion Weekly.

Step by Step.

"Supposing," said the man who wants to see everybody happy, "that we somehow arrange to give you a six-hour day. Are you sure that you will be contented?"

"For the present. Of course, I shouldn't think of asking for less than six hours' work to the day. But I have an impression that in the course of time our chronological system will need revision so that we'll have 25 or 30 minutes to the hour."

Thousands of Happy Housewives in Western Canada

are helping their husbands to prosper—are glad they encouraged them to go where they could make a home of their own—save paying rent and reduce the cost of living—where they could reach prosperity and independence by buying on easy terms

Fertile Land at $15 to $30 an Acre

—land similar to that which through many years has yielded from 20 to 45 bushels of wheat to the acre. Hundreds of farmers in Western Canada have raised crops in a single season worth more than the whole cost of their land. With such crops come prosperity, independence, good homes, and all the comforts and conveniences which make for happy living.

Farm Gardens—Poultry—Dairying

are sources of income second only to grain growing and stock raising. Good climate, good neighbors, churches, schools, rural telephone, etc., give you the opportunities of a new land with the conveniences of old settled districts.

For illustrated literature, maps, description of farm opportunities in Manitoba, Saskatchewan, and Alberta, reduced railway rates, etc., write Department of Immigration, Ottawa, Can., or

Cold Water Has Odd Use.

For years steam has been used for thawing the frozen soil of mining claims in Alaska, in spite of difficulties. Now it has been discovered that cold surface water, which of course is warmer than the ground, is a much better thawing medium than either steam or hot water, states Popular Mechanics Magazine. This seeming paradox is explained by the fact that the superabundant heat units of steam rise rapidly around the pipe, and are wasted, while the few heat units carried by the cold water remain in the ground and do their work slowly but thoroughly. In one test in the Nome district, a 2-inch pipe was inserted in a 6-inch drilled hole, and fed with 20 gallons of water a minute at a temperature of 52 degrees F., the ground being at 28 degrees. In 36 hours an 8-foot cylindrical thaw had been made.

Multiplies Too Fast.

At one of the army schools the perspiring aspirants for knowledge were going through the intricacies of arithmetic. One raw youth was having particular difficulty with fractions.

"It's very simple," encouraged the instructor. "See this rule, now. How many tenths are there in it? Ten, of course. Now, how many hundredths? One hundred. Now, how many thousandths?"

"D——n!" explained the sufferer, "There must be millions of 'em."—American Legion Weekly.

More Local News

Mr. and Mrs. Julius Studt, of Lu-ne, Iowa, and Chas. Waterman d children of the same place, drove t Klemme Thursday in their car for a visit until Saturday with Klemme latives and friends. From here t y drove to Jasper, Minn., and var-s other points. Chas. Waterman is brother of our local postmaster, N.

The farmers have been pretty busy t past week getting their grain cut d shocked. Luckily the weather n was good and did not send any n tos poil the cutting. The small in near Klemme looks fine, with exception of a small amount which s hit by the hail storm, but as a ole the grain crop here is a good e. Corn is also on the jump and ks fine.

The August meeting of the W. F. S. of the First Methodist Church, l be held the 5th. Mrs. C. A. Ar-d will be the hostess, and all are ited to come. We are especially ious to have all the members pres-, as this will be the last meeting in missionary year, and the officers next year will be elected. Let each e be ready for the June Mystery x questions.

Mrs. Chas. G. Bracher and children, former residents of Garner and who are spending the summer at Clear Lake, were visiting at the John Gruetzmacher home Tuesday.

J. C. Pavey came from Garrison, wa, Monday for a few days' visit ith his brother, Wallace. Tuesday e two brothers autoed to Algona, where they went to look at a herd of ilk goats. J. C. is interested in milk oats and has one and wanted to see what Algona had to offer in that line as he wants to purchase another. And while we are on the subject we will ay that the milk goat industry is getting to be a great thing in this country. Men interested in the business are importing large herds of milk goats from the European countries, but mainly Switzerland, where the best varieties are to be had. And if you think a good milk goat is cheap, just buy one and see how many hundred dollars she will cost you.

A FULL SIZED MAN

The Britt News-Tribune in their issue of last week has the following to say regarding John Hammill, and we believe it worthy enough to bear repeating. The article follows:

"John Hammill, of Britt, is the choice of the republicans as their candidate for lieutenant-governor. He was nominated on the second ballot Tuesday afternoon, at the state convention at Des Moines, receiving 636½ votes, 114½ more than the number required to nominate.

"Britt, Hancock County and Northern Iowa, share with Mr. Hammill his pleasure. The community where he has grown to manhood and where he received his early education, is proud of him and his accomplishments. Mr. Hammill was one of the graduates of the first class sent out by the Britt High School. It is a singular circumstance that Mrs. E. P. Healy was a class mate. Her husband will represent Hancock County in the next legislature, as Mr. Hammill takes over the speakership of the Senate.

"Mr. Hammill started as a poor boy. He was industrious. He had ideals o which he has always aspired. He was not easily discouraged and never lost sight of the better and nobler sides of life.

"Mr. Hammill has been through many hard legal battles, sometimes going down in defeat, but he was never baffled by these. He has likewise been through many a hard political battle and sometimes has met defeat. It is one of his characteristics that he has never got any sore spots through these battles, but has always come back and has actually aided men, both legally and politically, who had been his bitterest opposition.

"Then Mr. Hammill has always been clean morally. His home life and his social life has ever revealed the largeness and the cleanliness of the man.

"Iowa will find him a full sized man in every sense of the word when he takes over the speakership of the Senate. No faction need fear fair play at his hands. He will be firm for what he believes is right and will honestly endeavor to give Iowa and her citizens the kind of service that will be for the greatest good of the greatest number."

Turns Eyes Inside Out.

The garden snail's eyes are on the very tips of a pair of very long tentacles and it has an additional pair of shorter tentacles with which it smells. When any danger approaches the eyes are drawn down within the tentacles and the tentacles themselves are pulled into the body in exactly the same way as you would pull a glove finger inside out."

THE SOX ALMOST WIN—BUT NOT QUITE

Locals Put Up a Good Game With Clear Lake Sunday

Sunday the Klemme Sox met the Clear Lake ball team at the park north of Klemme. The game started off good right from the start with "Bawlly" Kluckhohn on the pitcher's mound and Chas. Shirley in the catcher's box. We did not learn the Clear Lake battery. Up to about the first of the sixth inning Klemme ran up seven or eight scores and Clear Lake only got one score off Kluck- ohn. He was hard to hit and they couldn't find the ball. It was a little too strenuous for "Bawlly" to pitch any longer so M. O. Barr was put in for pitcher. Barr played in tough luck Sunday and was "off his feed" for Clear Lake found him and pounded out a number of runs and got up to about twelve hits in the last of the eighth. By this time "Bawlly" got his second wind and went in the box to finish the game. He held them down again and when he went to bat knocked out a home run, but too bad there were no men on the pans to bring home or the game would have looked different. There was some misunderstanding in the game as some claim that Clear Lake only had eleven scores and Klemme had the twelve, which we are of the opinion is correct, but the Klemme boys were generous and gave Clear Lake the benefit of the doubt. The Klemme boys are showing some real baseball stuff and are getting better with each game and just watch their smoke—you will see them win the next one.

CAPTAIN COLLINS PASSED AWAY

Capt. Collins passed away Monday at the Asa Gibbs home after a long period of suffering extending over a number of years. Mr. Collins was quite an old gentleman and was a Captain in the Civil War. He has made his home with the Gibbs family for a number of years and is a brother of Mrs. Asa Gibbs. At the time of this writing we were unable to se- cure the obituary of Mr. Collins, but will run it in these columns next week. Funeral services were held Wednesday afternoon at two o'clock. Funeral services were conducted by the Masonic Lodge, of which he was a member.

No Wonder He's Happy.—Krene De Berg of Kesley, was an Ackley business visitor Saturday, incidentally dropping in at the W. J. business office. There may be richer men in Butler county, than Mr. DeBerg, from the dollar and cent standpoint, but not from the point of family en- dearment. There are seventeen husky happy robust children in his home; they are all there too, and at dinner time Mr. DeBerg's table takes on the appearance of a hotel. A family of seventeen might strike terror to the heart of the average man, under present conditions, with the high cost of living at every turn, but not so with either Mr. Mr. or Mrs. DeBerg—they are happy in their possession of healthy sons and daughters. The big farm they own and occupy at the north edge of the village of Kesley, gives the youngsters a chance to "spread out and grow."—Ackley World-Journal.

GARNER WOMAN HAS SERIOUS ACCIDENT

Lower Limbs Severely Cut By Binder

Mrs. Harvey Rasmussen was seri- ously injured last Friday afternoon while she was out in the field assisting her husband with the harvest. Mrs. Rasmussen was running the binder, when the sickle clogged up with corn stalks. She got off the machine and walked in front of the sickle to loosen the stalks and as she was doing this some children rode up on a shetland pony, stopped a second and then said "gitapp" to urge their pony to go on. The horses hitched to the binder also started up with the command, with the result that Mrs. Rasmussen was caught in the binder before she could get out of the way and as the machine had not been thrown out of gear the sickle immediately started up and it cut her legs very seriously just above her shoe tops. She was given imme- diate medical attention and then rushed to the hospital at Mason City. At the last report she is getting along nicely and she will come out alright.

ELECTRICITY AT LAST

Meservey has electricity at last. The pawer was turned on Saturday evening and after a few minor alter- ations were made, were working bet- ter than was expected.

People coming into town at night might easily mistake Meservey for a much larger town on account of be- ing able to see the street lights for quite a distance.

Most everyone here seems pleased and well satisfied with the lights and power so far.—Meservey Register.

"OLD TIMERS" COP ANOTHER

Another hot game was pulled off between the Klemme Old Timers and the Sox. It was "hot stuff" from start to finish and some real keen tricks were pulled off by both sides. How- ever the Old Timers were on top with five scores when the smoke of battle had cleared away, and the Sox man- aged to save up four scores. The games between the Old Timers and the Sox are getting to be a weekly event and cause a lot of fun. Doc. Thomas pitched for the Old Timers and Fat Kluckhohn pitched for the Sox.

There are many towns in the state where coal has been almost impossible to get for threshing grain. The Klem- me dealers, M. O. Hocum and Walt Lau should be given a lot of credit for the efforts they have made to supply the farmers here. They have suc- ceeded in getting plenty of threshing coal and also have supplied a large number of residences and farm homes with coal for the winter. Many near- by towns have had only a very few cars of coal and some have not had a sngle car load for several months.

WE'LL ALL COME OUT, WALT!

Walt Bloom Invites Old Friends To Come Out For A Visit

Redwood City Cal.,
July 26th, 1920

Dear "Ed":—

Please find enclosed check for your valuable paper. As I will be in Los Agelens, my future home, by August 1st, and will be glad to welcome all my many Klemme friends when they come to California to see the country. Please send paper to 1403 West 37th Drive, Los Angeles. With best wishes to all,

W. R. BLOOM

P. S. Will be too glad to meet my old "corn fed" friends at the above address.

SURPRISE PARTY

A number of young people gather- ed at the Al White home last Thurs- day evening to have a surprise party on Wert Loger who was celebrating the event that day. Of course the evening was well enjoyed and games and sports were part of the enter- tainment, not forgetting the big feed following the sports and which we presume Mr. Loger was given an ample share, for a fellow who is cele- braing a birthday should have special privileges. Mr. Loger works for Al. White this year.

TEACHERS' SALARIES

At a meeting of the presidents of the school boards of the rural districts of the county held Friday, July 30, a resolution was adopted recommend- ing that the minimum wages for teachers in the rural districts of Han- cock County should be as follows:

1st grade and Normal Training, $100
2nd grade---------- $90
3rd grade---------- $75

Some townships had adopted a higher scalet than this. Teachers de- siring positions may receive more de- tailed information by writing County Superntendent J. R. Baggs, Garner, Iowa.

This community was blessed with a fine shower Tuesday morning. A little rain now will be great for the corn.

Threshing is well under way in the viciinty of Klemme. A few farmers got started with their threshing last week, but this week here are many threshing. The grain is pretty good this year and comes up to the ex- pectations of all.

The band concert was given in the park last Wednesday evening and we believe that that is the place where the concerts will be given the remain- der of the season as it seems to be the general wish of the people. Street concerts are all right, but those who want to hear the band are disturbed by the continual passing of cars which drowns out the music and also makes it hard for the band boys.

DIDN'T STAND TEST

Reader's Caustic Criticism of Modern Heroine.

They Lack the "Homey" Qualities of the Characters in the Pages of Dickens, Is One Thing He Has Noticed.

Doctor Pedbury picked up the gay- ly bound novel that lay on his patient's counterpane.

"Well, Hosea," he inquired, "how's the light literature prescription work- ing? Good story? Mighty pretty girl on the cover, anyhow."

"Ain't read it and ain't a-going to," declared Hosea aggressively. "Girl's pretty enough, but no three hundred pages of her doin's for me. She don't stand the test. They don't any of 'em. Cover or frontispiece; there's only two sorts of 'em, and I don't like either. I ain't pertick'ler whether they're tall or short, skinny or dimply, gypsyish or light complected; but I do want 'em a nice, likable-lookin' sort of humans—and they ain't. You put 'em to the button test, and it downs 'em."

"The button test? What's that?" asked Doctor Pedbury.

"Oh, I s'pose there's others," admit- ted Hosea, "but that's the easiest; jest s'pose a feller wants a button sewed on—wants it right off. Well, he hangs his coat on his arm and goes to one of those girls. 'Gwendolen Gertrude,' says he, 'I want to wear this coat, there's a button off. Can you fix it?' Well—" Hosea displayed the imperial beauty on the book cover—"jest look at her, doc. You know what she says without me tellin' ye. 'Base slave, be- gone!' or 'Minion, avaunt!' or 'Imperti- nent Rube, go ask your grandmother!' or some little thing of that sort. That's the general idee; that's the way Gwen- dolen Gertrude looks.

"And there's lots to her—chin up, head back, eyes shut; handsome crit- ters; but gosh! who'd want to ask a favor of 'em?—'less by telephone, so's he could drop the receiver quick before he got an answer. Well, that's some folks' idee of a lovely heroine, I s'pose—but it ain't mine.

"The other kind ain't so dangerous lookin', but she ain't much more use. Jest frivolous. Horsy or kitteny, one or t'other. 'Elsie Maree, here's a but- ton wants sewin'; s'pose you could do it?' Elsie Maree, she laughs pretty and shows nice teeth and says, pleas- ant, 'Why, yes, of course'; only she's got engagements up to the middle of next week, and, anyways, the buttons she sews ain't warranted to stay on more'n an hour or so; so maybe, after all, 'twould be as well to ask some- body else. Well, that's Elsie Maree; and she ain't my notion of a lovely heroine, either.

"Heroines were different when I was young. Dickens' heroines, now; they was real nice and lovable besides bein' pretty, and their picters looked it. That little Dot woman with the baby, and that Ruth girl that made the beef- steak puddin'—they'd ha' stood the button test all right.

"Goin', doctor? Say, reach me that seed catalogue off the table fust, won't ye; and, say, if ye would stop to the library as ye pass and ask Bill Hickens for a copy of Nicholas Nickle- by—mine's such bad print ma won't let me read it in bed—and bring it along next visit, I'd appreciate it a lot. Thank you, doctor! I thought you wouldn't mind."—Youth's Companion.

Famous American Clipper Ships.

In the days of the famous clipper ships, the American vessel was sec- ond to none, writes Frederick A. Col- lins in Boys' Life. No other country could build ships at once so staunch and so speedy. Records were estab- lished which have never been sur- passed by sailing craft and, even with the use of steam, were not bettered for nearly half a century. In 1852 the Sovereign of the Seas sailed 436 miles in a single day. The Lightning crossed the Atlantic in 13 days 20 hours, and the James Blaine of 2,500 tons made the voyage from Boston to Liverpool in 12 days and 6 hours. Although America led the way with the first transatlantic steamship, she allowed the sovereignty of the seas to slip gradually from her. At the beginning of the war most of her tonnage was afloat on the great lakes or engaged in constwise traffic, and her deep-sea fleet was small.

Joys of Tournament Golf.

Wouldn't it make you mad if you were entered in a golf tournament and you started out shooting the little old pill down the line, better than you ever had and finished the first nine holes in the lowest score you had ever made; slipped a little on the second nine, but still had a chance to make a respectable showing, and then on the eighteen hole in the presence of an admiring throng of friends you pro- ceeded to put the pill into the ditch three times and take eleven strokes where five should have been plenty?

Wouldn't it make you mad?

Well, the only consolation we know out of that horrible catastrophe is that we remembered even in our rage that there were ladies within hearing dis- tance. We came up smiling out of the ditch, but we sincerely hope the young woman in the pink gown and the big hat who grinned gleefully at us is no mind r [illegible]-change.

Beware!

Notice:- To Auto Drivers

It shall be unlawful to use on a vehicle of any kind oper- ated on the public highways of this state, including motor- cycles, any lighting device of over four [4] candle power, equipped with a reflector, unless the same shall so be de- signed, or arranged that the directly reflected and undiff- used beam of such light when measured seventy-five [75] feet or more ahead of the light shall not rise above forty- two (42) inches from the level surface on which the veh- icle stands under all conditions of load. If, in addition to headlights, any such vehicle is equipped with any auxili- ary light, projecting lights, or devices other than the rear lamp, such auxiliary light or lights shall be subject to all the restrictions of this section, regarding direction of the beam. If a spotlight is used on a motor vehicle it shall be unlawful for any perssn to direct its rays toward the eyes of the driver or other occupants of an approaching vehicle or to the left of the center of the traveled way when meet- ing another vehicle.

Any violation of this section shall constitute a misdemean- or, and upon conviction, shall be punished by a fine of not less than five dollars (5.00) nor more than twenty- five dollars (25.00) for the first and second offense, providing further that for the third conviction the department shall revoke the license and certificate of registration of the person so con- victed and no new license or certificate shall be granted to the person for a period of one (1) year.

It shall be the duty of the mayor of cities and towns, the police, sheriff, and all peace officers to enforce provisions of this act.

This Law will be Enforced.

James S. Ross

Sheriff of Hancock County.

FLP-BL

AVOID WASTE AT THRASHING TIME

Many Little Leaks Result in Total Loss of Many Millions of Bushels Each Year.

MACHINES NEED ADJUSTING

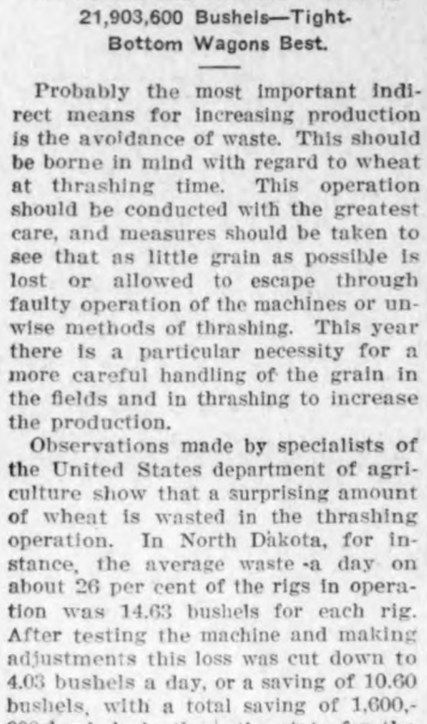
Estimated Total Saving in Dakotas, Minnesota and Montana Placed at 21,903,600 Bushels—Tight-Bottom Wagons Best.

Probably the most important indirect means for increasing production is the avoidance of waste. This should be borne in mind with regard to wheat at thrashing time. This operation should be conducted with the greatest care, and measures should be taken to see that as little grain as possible is lost or allowed to escape through faulty operation of the machines or unwise methods of thrashing. This year there is a particular necessity for a more careful handling of the grain in the fields and in thrashing to increase the production.

Observations made by specialists of the United States department of agriculture show that a surprising amount of wheat is wasted in the thrashing operation. In North Dakota, for instance, the average waste a day on about 26 per cent of the rigs in operation was 14.63 bushels for each rig. After testing the machine and making adjustments this loss was cut down to 4.03 bushels a day, or a saving of 10.60 bushels, with a total saving of 1,600,000 bushels in the entire state for the season.

More Than 21,900,000 Bushels Saved.

In South Dakota the testing and readjustment of the machines effected a saving of 13.3 bushels a day on 18 per cent of the machines tested, or 1,500,000 bushels for the state. In Montana, through proper adjustment of the machines and avoidance of waste, the saving on 15 per cent of the rigs was 706,-



The Blanket Test—A Waste of 8 Pints of Grain Out of Every 2½ Bushels Thrashed Reduced to 1 Pint After Readjustment of Machine.

925 bushels for the season; and in Minnesota, on 32 per cent of the rigs, 1,000,000 bushels. The estimated total saving for 21 states in which the work was carried on was 21,393,000 bushels.

This movement should interest both thrashermen and farmers. The thrasherman by means of the tests is better able to check up the work being done by his machine and can turn out more grain a day, which means more money both to himself and to the farmer. After the faults of the machine are once located and corrected it is an easy matter to check up occasionally and keep the machine running with the least waste.

The farmer can save a great deal of grain by the following methods: Raking the shock rows; using tight-bottom bundle wagons for shock thrashing; by a careful and thorough clean-up around the machine and the use of a large canvas spread on the ground under the feeder to catch the grain which shatters out in the process of feeding and that which leaks out around the front end of the machine. As to raking the scatterings along the shock rows, in Wisconsin one field of 22 acres gave a yield of 135 bushels. In Oklahoma 90 acres gave 110 bushels in one case and in another 70 acres gave 55 bushels. Oklahoma reported a saving of 5,063 bushels for the raking of scatterings on 144 farms. Kansas reported a saving of 1½ bushels an acre, and Illinois one-half bushel an acre.

Tight-Bottom Wagons Prevent Waste.

The use of tight-bottom bundle wagons in North Dakota saved between 600 and 800 bushels in thrashing 2,000 acres. In Wisconsin it is estimated that 280,000 bushels were saved by tight-bottom wagons. The idea of using the canvas on the ground under the feeder not only saves grain but saves time on the clean-up, and should certainly be considered by both thrashermen and farmers.

A very definite notion of the amount of grain wasted about the rig may be had from making a so-called blanket test. This consists of spreading a sheet of canvas or other suitable cloth about 18 by 24 feet in area convenient to the stacker of the thrashing machine. A man is stationed on the top of the machine near the weighing device. Immediately after a trip of the weigher, drop the hood, so that all the straw, etc., passes on to the sheet. Allow the straw to deposit there until the weighing device trips five complete times, indicating that the machine has thrashed 2½ bushels. Use a fork to winnow off the straw from the canvas, shaking as much as possible for any wheat that may be in it. This leaves a mass of small particles of straw and chaff and wheat on the sheet. Use the screen to sift off the small particles of straw and put through a fanning mill to blow out the chaff, leaving the quantity of wheat that has been wasted. Measure this in pint measure. One pint gleaned in this operation might be considered unavoidable waste; two pints, poor operation, to be corrected at the earliest opportunity; and three pints or more wasteful practice, and the machine closed down until improvement is obtained.

Watch Machine Closely.

In the middle West, where more moisture prevails, the adjustment of the machine should be watched closely throughout the day. In the morning the grain is apt to be moist and not easily shelled. If the machine is adjusted to overcome this condition it should be readjusted in the afternoon to provide for the dryer condition of the grain. If not so adjusted to meet the changing condition grain will be wasted.

Thrashing is looked upon generally as a very distasteful operation. This fact is to blame for waste in many instances. The farmer is anxious to have it over with and speeds up the work as much as possible. Haste makes waste in thrashing in many ways. Care should be taken in pitching from the wagon. If the machine is fed too fast or carelessly, it cannot function properly.

Probably more grain is wasted from failure to clean up at the end of a setting than from any other single cause. Just as much care should be taken in cleaning up all the unthrashed straw and loose grain that has accumulated around the machine as has been taken with the rest of the job. Even with the best of care a considerable amount of unthrashed straw will accumulate around the feeder in the course of the day's work. If the straw is very dry much grain will shatter from the heads as it is being pitched from the wagons or stacks onto the feeder.

COST OF 1919 WHEAT ABOUT $2.15 BUSHEL

Production Study Made by Department of Agriculture.

Fourteen Representative Districts Were Visited by Field Men in Making Investigation—481 Records Were Taken.

The cost of producing wheat of the 1919 crop was as low as $1 a bushel on just two farms out of 481 included in a cost of production study just completed by the United States department of agriculture. On 20 farms it was $5 or over. The bulk of the farms produced wheat at a cost somewhat less than midway between these two extremes. The average cost per bushel for all farms was $2.15. At such a price half the farmers in question would have lost money on their wheat.

Fourteen representative districts in the wheat belt were visited by the field men of the office of farm management in making this investigation a preliminary report of which has just been issued. Nine winter wheat areas were surveyed in Kansas, Nebraska and Missouri, and five spring wheat areas in Minnesota, North Dakota and South Dakota. For winter wheat 284 records were taken, for spring wheat 197.

In the winter wheat area costs ranged from $1 a bushel for two farms to $8.20 on one farm. The average cost was $1.87. If the price received had been $1.87 more than half of these winter wheat growers would have produced wheat at a loss.

In the spring wheat areas the average cost was much higher—$2.65—the range running from $1.10 for one farm to $5 or over for 17 farms. If the price received had equaled the average cost, between 50 and 55 per cent of these spring wheat growers would have failed to break even.

Yields averaged 14.9 bushels per acre for the winter wheat farms, and 8.4 bushels for the spring wheat farms, and the cost per acre $27.80 for winter wheat, as against $22.40 for spring wheat.

GENERAL FARM NOTES

Make plantings of vegetables for early fall use.

* * *

Baled hay and straw should bring a good price this year.

* * *

Keep the tractor under cover, even in the months of little rain.

* * *

Spraying is necessary to control insect pests and to prevent blight.

* * *

Peas and oats should be cut for hay when the peas are well podded.

* * *

Clover is ready to cut for seed when most of the heads have turned brown.

* * *

It is the dealer's business to label all seeds as to purity, germination and presence of noxious weeds.

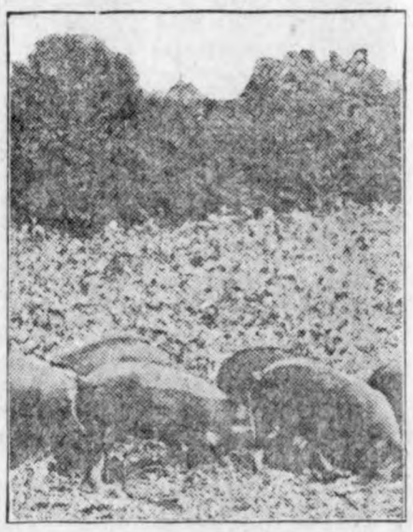
FARM STOCK

RAISE FEED FOR LIVE STOCK

Second in Importance Only to That of Producing Food Necessary for Use by Family.

The production of enough feed for its family live stock, work stock, and commercial live stock is second in importance only to producing food for the family, in the opinion of the United States department of agriculture. Farm management studies in the southern states indicate that the most profitable farms not only produce the necessary farm feeds but have a surplus of them to sell, and that the live stock is usually of better quality and better grade on the farms producing a surplus than on farms where staple feeds are bought. These facts are brought out in a series of 16 tests formulated by the department of agriculture to show whether or not a farm is being efficiently managed.

The average farm family, made up of five adult persons or their equivalent, requires for its proper maintenance 2 cows, 40 fowls for furnishing eggs and poultry meat, and 1 pig for each adult person or his equivalent. Enough calves should be raised to replace each cow reaching the age of 8 years. This family live stock, it is calculated, will require 1 ton of corn and cob meal, 1,234 pounds of cottonseed meal, 55 bushels of corn, 40 bushels of oats, 4,200 pounds of cowpea hay, 2,100 pounds of oat hay, 4,200 pounds of corn roughage, green forage from 2 acres, and 5 acres of pasture or their equivalent. A fair provision to a head for work stock is 60 bushels of corn, 40 bushels of oats, and 3 tons of



Hogs on Pasture Being Made Ready for Market.

roughage. The arrangement of crops and pastures to meet these requirements are suggested in United States department of agriculture circular No. 83, "Testing Farms in the South for Efficiency in Management."

VALUE OF HORSES ON FARM

Total Estimated at $1,993,000,000, or Just a Little Below Figures on Cows.

Even though it may be true that the motor-driven vehicle has begun to put the farm horse "on the run," there is no evidence that he has developed much speed, and his total value still compares favorably with other classes of farm animals. On January 1, 1920, the bureau of crop estimates of the United States department of agriculture estimated the total value of horses on farms in this country at $1,993,000,000, or just a little below the value of milk cows, which was $2,022,000,000.

SWINE DURING HOT WEATHER

Fattening Pigs Will Not Suffer From Heat If Given Plenty of Water and Ample Shade.

Fattening pigs require some attention in hot weather, but usually pigs weighing 100 to 150 pounds or more will not suffer from the heat or die if given plenty of cool water and protection from the sun. A concrete hog wallow is quite sanitary and if built in the overflow from a spring it keeps clear with the inflow of clean water. On hot days pigs will lie on the concrete feeding floor in the hog barn during the heat of the day and forage in the rape during the cool of the morning and evening.

LIVE STOCK NOTES

Every good dairyman knows the value of a purebred sire of good record.

* * *

If you have surplus stock to sell it will pay you to use a good purebred dairy bull.

* * *

Give the sheep some attention during the summer and increase the profits from the flock.

* * *

When sheep are on pasture they will not require much attention, but one must see that the pasture is not overstocked and that they have plenty of fresh water and salt.

DAIRY

SKIM MILK RATION FAVORED

Greatest Gain in Weight Made When Calf Is Fed Large Quantities in Daily Ration.

How much skim milk should be fed to calves daily?

Results obtained thus far at the dairy division experiment farm, Beltsville, Md., indicate that calves will make the greatest gains in weight when fed comparatively large quantities of skim milk daily (one-fifth of their body weight, or all they will drink), but that the most economical gains are made on smaller quantities.

In an experiment to determine the effect of feeding various quantities of skim milk, 16 calves were divided into groups of four calves each. These groups were balanced as nearly as possible with reference to breed and body weight at birth. One group was given a daily ration of one-seventh of the body weight, the quantity being regulated by body weights taken every ten days. Two other groups were fed at the rate of one-sixth and one-fifth of their body weights; and the fourth group was given all the milk the calves would drink, twice a day.

Each calf received its mother's milk until it was ten days old. The change to skim milk was then made gradually, and at the age of fifteen days the calf was on an entire skim milk ration. The experiment ran for 70 days. Weights obtained for three consecutive days, at the end of the 70-day period, were taken as the final weights. The average reslults from each group are given in tabular form:

Rate of feeding.	Daily gain.	Milk per day.	Milk per pound gain.
		Lbs.	Lbs.
Group 1 (one-seventh of body weight)	0.95	13.52	14.4
Group 2 (one-sixth of body weight)	1.09	16.99	15.6
Group 3 (one-fifth of body weight	1.26	20.96	17.0
Group 4 (all they would drink)	1.48	24.22	16.6

The groups were well balanced as regards weight and thrift of the calves.

The gains increased with the quantity of skim milk fed, the calves which received all they would drink making gains at least 50 per cent larger than those receiving milk at the rate of one-seventh of their body weight. To do this they drank about 80 per cent more milk. As a consequence the skim milk required for one pound of gain was greater with the heavily fed calves.

No bad results from heavy feeding were noticed, although all of the calves

Heavy Skim Milk Rations, It Has Been Found, Are Beneficial for Calves.

in group 4, with one exception, drank, at times, more than 40 pounds of skim milk a day. This leads us to believe that overfeeding is not in itself a common cause of scours.

TO PREVENT TAINTED BUTTER

Churn Must Be Kept Sweet and Clean at All Times—Small Brush Quite Convenient.

If proper care is not exercised in keeping the churn sweet and clean the butter will be tainted, no matter how well the milk and cream have been cared for before churning begins. A small brush is a convenient article to use about the churn, as it is somewhat difficult to clean the corners and joints with a cloth and it is these that hold particles of milk and cream and make breeding places for microbes.

BULL OF GREAT IMPORTANCE

Because of Extensive Influence on Herd Animal Should Be Best Breeder Can Purchase.

A cow is the dam of but one calf in the herd, but a bull is the sire of all the calves. Because of his extensive influence on the herd, the herd bull should be just as good as the new breeder can possibly afford to buy. In fact, the price of the herd bull should be of far less consideration than the price of the cow. The buyer should not be satisfied with a cheap bull, but when he pays a good price he should buy a good bull.

TO EVERYWOMAN HER·OWN·BEAUTY·PROBLEMS

Know your own skin intimately. Unless you are able to analyze its condition, or seek the advice of our trained expert, you cannot select intelligently the treatment to which it will best respond.

Is Yours an Oily Skin?

If your skin is excessively oily, it is shiny in appearance and the pores are probably enlarged. An oily skin is hard to keep clean and few powders can be effectively applied.

To expect such a skin to respond to the same treatment intended for a dry or normal skin is absurd. To every woman her own beauty problems: for every skin a Franco-American preparation especially devised to correct its peculiar condition. You will learn the secret of how to look your best through "The Combination Treatment Box for Oily Skins", illustrated above, which provides six different preparations no woman with an oily skin should be without. Address The Franco-American Hygienic Company direct, or write us, requesting that our Personal Service Retailer in your vicinity call at your home.

Would you engage in a dignified, profitable profession among your personal friends? If not already represented in your community, The Franco-American Hygienic Company offers women of energy and refinement an attractive position as our Accredited Retailer. An inquiry will bring complete details concerning our thorough training and liberal profit sharing arrangement.

PE-RU-NA

This Lady TELLS Her FRIENDS

MRS. MARY FRICKE

Mrs. Mary Fricke, 507 Bornman St., Belleville, Ill., is just one of the many thousands of ladies throughout the country who, after an agony of years, have at last found health, strength and vigor in PE-RU-NA.

Her own words tell of her suffering and recovery better than we can do it: "I suffered with my stomach, had awful cramps and headaches so I often could not lay on a pillow. Saw your book, tried PE-RU-NA and got good results from the first bottle. To be sure of a cure I took twelve bottles. I have recommended PE-RU-NA to my friends and all are well pleased with results. I will not be one day without PE-RU-NA. Have not had a doctor since I started with PE-RU-NA, which was about fifteen years ago. I am now sixty-three years old, hale, hearty and well. Can do as much work as my daughters. I feel strong and healthy and weigh near two hundred pounds. Before, I weighed as little as one hundred. I hope lots of people use PE-RU-NA and get the results I did." An experience like that of Mrs. Fricke is an inspiration to every sick and suffering woman.

If you have catarrh, whether it be of the nose, throat, stomach, bowels, or other organs, PE-RU-NA is the remedy. It is not new; it is not an experiment. PE-RU-NA has been tried. PE-RU-NA has been used by thousands who once were sick and are now well. To prevent coughs, colds, grip and Influenza and to hasten recovery there is nothing better.

PE-RU-NA will improve the appetite and digestion, purify the blood, sooth the irritated mucous linings, eradicate the waste material and corruption from the system. It will tone up the nerves, give you health, strength, vigor and the joy of living. Do what Mrs. Mary Fricke and thousands more have done—try PE-RU-NA. You will be glad, happy, thankful.

NO MERCY FOR THE FLIRT

According to Dream, Modern Girl Met With Deserved Condemnation at St. Peter's Hands.

Cortlandt Bleeker was talking at Piping Rock about the modern girl.

"I had a dream last night," he said. "I dreamed that a modern girl died and appeared before St. Peter.

"She wore a gown of filmy, almost transparent tissue. She was very beautiful, and she had a conquering air.

"'Let me in, please,' she said. 'My sweethearts were numberless, but my virtue remained unspotted. Though I skated over miles of thin ice, I never once fell through. I am a modern girl.'

"But St. Peter frowned and said, pointing downwards with his forefinger:

"'I condemn you to the same flames to which you condemned your foolish lovers.'"

Sixty-Year-Old Apple Tree.

In 1858 a Missouri farmer decided that he wanted to take Greeley's advice and go West to do a little growing up with the country. He took with him a tiny apple tree growing on his farm, to see what luck it might bring him. From all appearances he made a wise move, for the tree is still growing and showering apples all over the orchard each year.

Occasionally man gets rid of a bad habit by swapping it for a worse one

SOMETHING NEW TO MOTHER

Dear Old Lady Had a Good Deal to Learn About the Latest Idea in Silk Stockings.

Styles may come and styles may go, but an old-fashioned mother like Bab's can't be expected to keep abreast with the latest creations. She is always looking after the welfare of the family, whether it is preparing father's choice dish or skimping her own needs so that Johnny or Bab may keep up appearances with the twentieth century younger set.

Mother recently was going over the week's washing, putting a patch here, catching a button there and seeing to it that the stockings were carefully mended. She came across a pair of stockings that Bab had purchased the week before. They were the latest thing dictated by fashion, the lisle stocking with lace designs on the sides, which very much resembles the lowly "run."

"And bless you, mother sewed up every one of them," giggled Bab to a friend, a few days later, "and they cost me $8 a pair, too."

Waiter, One Dish "Milhi!"

The Chinese are very fond of an extraordinary dish called "milhi," which is made of live new-born mice dipped in honey.

Waste.

Samson pulled down the temple.

"Heavens, man," we cried, "don't you know how scarce buildings are?"

When Something Is Wrong With Your Comfort

Home Town Helps

UNSAFE AS WELL AS UGLY

Anti-Signboard Argument Made by Chicagoans Effective in Curtailing General Nuisance.

Of course, a signboard is designed to attract attention. In some cities they appear to be attracting attention which threatens their existence in certain districts. This is a good thing, for at their best they have not been much of a scenic attraction and at their worst they have been pretty bad.

In Chicago, where a good deal of thought has been given to city planning, an ordinance was passed prohibiting signboards on roofs of buildings and requiring majority consent for permission to erect signboards in residence districts. The signboard people fought this ordinance to the United States Supreme court and were worsted. And the decision gave the people the right to have no signboards in the neighborhood of their homes if the majority agreed.

It is interesting to note that the arguments on which this case was defended by the people had to do rather with public safety and health than esthetic considerations. The boards were to be kept from the roofs for fear of their falling into the street, and the charge was made that they were a fire menace and a convenient ambush for robbers in residence districts.

Perhaps these practical phases afford the most convenient point of attack for the present, but from an esthetic point of view the signboard is forever and everywhere an offense. —Detroit News.

CURVE PROPERLY HANDLED

The appearance of this retaining wall is improved rather than marred by the semicircular curves introduced to save the large trees which border the property. Weathering of the top is prevented by the neat concrete coping.—From Popular Mechanics Magazine.

Prophetic Fire.

The death of Levi P. Morton reminds me of a strange occurrence at Canajoharie years and years ago, before Mr. Morton became vice president. He was the guest of the late Senator James Arkell, they having long been intimate friends. During Mr. Morton's stay at the Arkell home a fire occurred in which the guest's suitcase, marked "Levi P. Morton," was burned on one end in such a manner that all the letters of the name were destroyed but the "v" and "P." Just at that time Mr. Morton was being mentioned in connection with the Republican nomination for either president or vice-president, and the versatile Senator Arkell ventured the opinion that the strange work of the fire pointed toward success in that "v" and "P" meant vice president. A few months after the fire Levi P. Morton was nominated for and later elected to the vice presidency.—Fort Plain Standard.

Old Saloon Made Over.

An old saloon in the Italian section of New York has recently been taken over by the Y. M. C. A. and turned into a community center for Italian women and girls. The brown woodwork has been painted blue and lively chintz has been hung at the windows. The old place is hardly recognizable. This center is being used during the day as a nursery for children whose mothers are working, for a babies' clinic, and for mothers' club meetings; in the evenings for social times for girls who work during the day.

Why the Buffalo Wallow.

The water buffalo of China writes C. O. Levine, associate professor of animal husbandry, Canton Christian college, in the Journal of Heredity (Washington), has few sweat glands in its skin, and for this reason cannot endure hard work in the sun for a long period, unless its body is wet with water. This accounts for the desire of the buffalo to wallow in mud or water. The animals are easily overcome by heat if worked hard in the sun and sometimes they go crazy and become very dangerous.

Costly Production.

In producing Sir Rider Haggard's famous story of "King Solomon's Mines" for the movies, $50,000 worth of ostrich plumes were used as part of the headdresses of the opposing armies. The film was produced in South Africa, where fortunately ostrich feathers are plentiful.—Brooklyn Eagle.

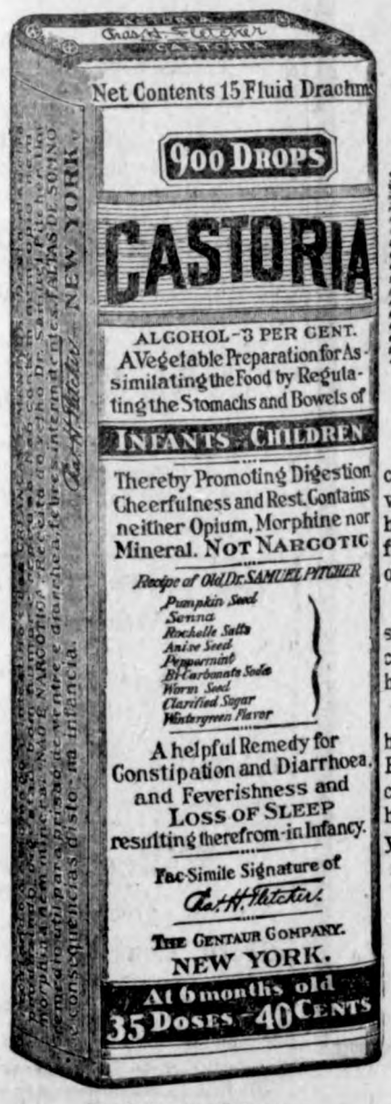
Some More Truths.

WOULD you use a steam shovel to move a pebble? Certainly not. Implements are built according to the work they have to do.

Would you use a grown-up's remedy for your baby's ills? Certainly not. Remedies are prepared according to the work THEY have to do.

All this is preliminary to reminding you that Fletcher's Castoria was sought out, found and is prepared solely as a remedy for Infants and Children. And let this be a warning against Substitutes, Counterfeits and the Just-as-good stuff that may be all right for you in all your strength, but dangerous for the little babe.

All the mother-love that lies within your heart cries out to you: Be true to Baby. And being true to Baby you will keep in the house remedies specially prepared for babies as you would a baby's food, hairbrush, tootbrush or sponge.



Exact Copy of Wrapper.

Children Cry For Fletcher's CASTORIA

Are You Prepared?

A doctor in the house all the time would be a good idea. Yet you can't afford to keep a doctor in the family to keep baby well or prevent sickness. But you can do almost the same thing by having at hand a bottle of Fletcher's Castoria, because it is a wonderful remedy for indigestion, colic, feverishness, fretfulness and all the other disorders that result from common ailments that babies have.

Fletcher's Castoria is perfectly safe to use. It is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. Children cry for Fletcher's Castoria, and mothers recommend it because they have found it a comfort to children and a mother's friend.

If you love your baby, you know how sweet it is to be able to help baby when trouble comes. You cannot always call upon a doctor. But doctors have nothing but good to say of Fletcher's Castoria, because they know that it can only do good—that it can't do any harm—and they wouldn't want you to use for baby a remedy that you would use for yourself.

MOTHERS SHOULD READ THE BOOKLET THAT IS AROUND EVERY BOTTLE OF FLETCHER'S CASTORIA.

GENUINE CASTORIA ALWAYS

Bears the Signature of

Chas. H. Fletcher.

THE CENTAUR COMPANY, NEW YORK CITY.

A Good Trader.

"Of course I realize from all you have said that you are the smoothest business man who ever hit this town," the quiet chap observed when the salesman slowed down for want of breath, "but there are some others. Now, for instance, I'll sell you an article for a dollar that I paid five for, and still make a profit on the deal."

"Can't be done. I'll take you!" the salesman responded briskly, and handed over a dollar.

Whereupon the quiet chap gave him a $5 meal ticket that had been punched for all but ten cents of its value.

Very Much So.

"Hungary seems inclined to go back to the monarchy."

"She would find that her crowning mistake."

Don't Let Catarrh Drag You into Consumption

Avoid Its Dangerous Stage.

There is a more serious stage of Catarrh than the annoyance caused by the stopped-up air passages, and the hawking and spitting and other distasteful features.

The real danger comes from the tendency of the disease to continue its course downward until the lungs become affected, and then dreaded consumption is on your path. Your own experience has taught you that the disease cannot be cured by sprays, inhalers, jellies and other local applications.

S. S. S. has proven a most satisfactory remedy for Catarrh because it goes direct to its source, and tends to remove the germs of the disease from the blood. Get a bottle from your druggist today, and begin the only logical treatment that gives real results. For free medical advice write to Medical Director, 104 Swift Laboratory, Atlanta, Ga.

Naming No Names.

Reading some of the present day effusions, one reflects that it is possible for a poet to make dollars out of lines that others can't even make sense out of.—Boston Transcript.

10 Billion Potatoes From One.

If there were but one potato left in the world a careful cultivator might produce 10,000,000,000 from it in ten years and thus supply the world with seed again.

Celebrating a Bountiful Harvest--

DEPOSIT WITH A STRONG BANK

PRACTICALLY every section of the country is enjoying a bountiful harvest and there is a natural desire on the part of most everybody to celebrate.

The one best way to celebrate harvest this year is to build up a good big bank account against the day when the harvest may not be so bountiful.

Bank accounts are no longer considered luxuries. They are necessities.

This bank has built its success on careful, courteous and comprehensive service.

You personally, as well as your account, are welcome--always.

Rev. and Mrs. Ortmeyer and son from Forest City, visited at the H. Griewe home Friday.

John Miles and family and Mrs. Levi Miles of Clear Lake, were Klemme shoppers last Friday.

A number of Klemme people went to Garner Tuesday evening to hear the band concert.

The Misses Mamie and Joy White of Goodell, were Klemme shoppers last Thursday.

Wm. Howard and Howard Doyle were business callers at Estherville last Thursday.

Mr. A. D. White was up from Goodell last Thursday for a visit with his son, Al, and family.

Mrs. Geo. Johnson and Miss Helen Johnson, of Belmond, were in Klemme last Wednesday, shopping with our merchants.

Mrs. Henry Wille and daughter, Emma, are spending a week visiting with relatives and friends at Vernon Center, Minn.

Mrs. Wm. Werner and daughter, Elizabeth, were over from Garner last Friday and Saturday, for a visit with Klemme friends.

Miss Steward came from Leland, Iowa, Monday evening, called here by the illness of her uncle, the late Capt. Collins.

Don't forget that school starts on August 30th. Sad but true for the youngsters that the summer vacation is almost over.

Mrs. Lena Schroeder and daughter, Adella, returned last Thursday evening from their three weeks' trip in Minnesota and South Dakota.

Editor "Ted" Tierney and wife dove over from Garner Monday evening to pay the Editor and Ms. Jorgenson a visit.

Arthur Wellemeyer and children drove to Charles City Sunday, for a visit with his mother. They returned Monday.

Dick Bamman of Garner, was a business visitor here last Thursday.

Mrs. Dan Miller, of Goodell, was a visitor at the Lew Newberger home last week Wednesday.

Mrs. John Bock has so far improved in health that she was able to come to town last Wednesday for the first time in several months. Her many friends were glad to see her.

A. L. Emerson came from Spencer, Iowa, Saturday evening for an over Sunday visit with Klemme friends. "Al" is working in a harness shop at Spencer.

O. J. Oleson, of Clear Lake, was a business caller here Monday. Mr. Oleson was formerly a part of the firm of Lake & Oleson, Contractors, but is now in the business for himself.

J. N. Day was at Hampton last week Tuesday and Wednesday where he had his tonsils removed at the hospital. Wednesday Mrs. Day went to Hampton and they both returned to Klemme the following day.

Mr. and Mrs. Marlin Croner, Mrs. Schroeder, and Mrs. Henry Schroeder of Chicago, who is here visiting, drove to Clear Lake Sunday afternoon and took their picnic supper with them and enjoyed an outing.

Mr. and Mrs. John Gruetzmacher, and Mr. and Mrs. P. M. Greisemer and Miss Emma Sampson, were guests at the Leonard Sampson home Sunday. Spring chicken was the big attraction at the dinner.

Levi Klotzbach is taking a vacation from his duties at the Jacobson store this week. Sunday he and his family left for McGregor, Iowa, for a visit with his folks and other relatives and friends.

Mrs. A. H. Meyer enjoyed a visit from her father, Mr. Lenz, last Wednesday and Thursday. Mr. Lenz had been visiting a daughter at Dows and stopped off here on his way to his home in Wisconsin.

Mr. and Mrs. Davis, of Estherville, Iowa, came Saturday for an over Sunday visit with Mr. and Mrs. M. O. Barr and family. Mr. Davis is a brother of Mrs. Barr. They left on Monday for their home.

M. O. Barr enjoyed several days' visit from his father last week. It will be remembered that the senior Mr. Barr was the subject of an accident last winter in which he was so severely injured that it was necessary to amputate the lower part of one of his legs. He is getting along well now and is able to be about with the assistance of crutches.

Lloyd Lau, Prop

Election of officers of the Iowa Medical association, held at the closing session of the state convention in Des Moines, resulted as follows: President, Dr. Donald Macrae, Council Bluffs; president-elect, Dr. A. M. Pond, Dubuque; first vice president, Dr. H. A. Howard, Iowa City; second vice president, J. W. Stone, Des Moines; secretary, Dr. Thomas Throckmorton, Des Moines; editor, Dr. David S. Fairchild, Sr., Clinton.

The campaign against the "black plague" in Iowa which was launched early this year by the State Board of Health in conjunction with federal health officers has now reached into practically every county in the state. Over 123,000 pieces of literature on the various social diseases have been sent out to parents and children since the inauguration of the campaign. The work of the movement embraces doctors, teachers, city officials and ministers in practically all counties. The system being established in Iowa is virtually the same as that used in the army to carry on the campaign for higher moral standards.

The boom on Iowa farm property for 1920 is officially declared "on." A rapid exchange of farm land is anticipated that will equal if not excel the unprecedented sales of one year ago. Last year prices of $300 and better were rare; this year the region of $400 and up will be the happy hunting ground of buyers and sellers. While land last year did in many instances sell for $400, there was generally a reason, either nearness to towns or unusual improvements. But this year the good black dirt without improvements in the form of cement walks and fancy barns will be sufficient to bring the price up to those figures per acre.

The Iowa Fleece Wool Growers' Association has secured the promise of Iowa bankers to recognize the wool receipts this year as collateral to finance growers while they are waiting for returns. The co-operation of the Iowa Bankers' Association was secured at a meeting of the wool growers' committee at Des Moines. A uniform county agent's receipt will be used. When the wool is weighed and loaded on the car the county agent or county secretary will issue a receipt, which will be collateral at any bank in Iowa for an advance of 75 per cent or more at the prevailing rate of interest in that county. The usual sight draft on bill of lading will be extended by the warehouse.

E. P. Gaddes near Griswold was found guilty of brutal treatment of his son, Russell, 12 years old, in Justice court. A fine of $100 was imposed upon him, the fine being suspended on his good behavior in the future.

Although the Mt. Pleasant school board has raised teacher's salaries this year the teachers are neglecting to sign contracts. They seek higher pay. Mrs. Mary Swaney, for years principal of the high school goes to Chili to teach under the direction of the Methodist church.

About Cataracts

So much has been written and said about cataracts, still current general knowledge is very indefinite.

CATARACTS develop INSIDE not OUTSIDE of the eyeball. The eyeball is not taken out in removing the cataract. When the cataract has developed so sight is reduced to only distinguishing light then only the REMOVAL of the CATARACT by operation will offer any cure. An average of 80 out of 100 of all cases operated obtain vision. Unless born with cataract or it follows injury or diabetes it rarely develops before 60 years of age. I operated for cataract for a ldy wh was 88 years old, with good results.

Cataract can be arrested by MEDICAL TREATMENT if treated in the early stages. I have cured hundreds with medicines in early stage. WHEN DIMNESS FIRST APPEARS IS THE TIME. 85 out of a 100 are successful, about the same percentage as operation, but when developed to practical blindness only removal by operation will cure.

VILLA GIVES UP; LONG CHASE ENDS

Bandit Surrenders After All-Night Conference With General Martinez.

RETURNS TO PRIVATE LIFE

Restored to Full Citizenship and His Men Given Money and Farms —Rejoicing Throughout Mexico.

Eagle Pass, Tex., July 30.—Francisco Villa, bandit leader, surrendered unconditionally after an all-night conference with Gen. Eugenio Martinez, commanding the Torreon military zone, according to advices received by the Mexican consul here.

Much rejoicing throughout Mexico is reported, with celebrations being arranged.

What the terms of Villa's surrender were, aside from the one calling for his return to private life, are unknown here.

Reports of the last few days were that Villa was negotiating by telegraph with President De la Huerta at Mexico City and General Martinez. The final negotiations with General Martinez were personal, however.

Refugees from Sabinas, which Villa recently captured, arrived at Piedras Negras, opposite here, and reported that Villa had killed more than a score of Sabinas women, after cutting off their ears, as well as killing every Sabinas policeman. These reports lack verification.

Reports of Villa's negotiations for his surrender included statements that he had from 300 to 3,000 men with him, and that unless he could obtain satisfactory terms would wage one of the bloodiest and most relentless warfares the revolution-torn republic had witnessed in the years of civil strife.

Mexico City, July 30.—Cordial telegrams were exchanged between Francisco Villa and Gen. Eugenio Martinez, chief of operations in the states of Coahuila and Nauvo Leon, who is arranging surrender terms with the rebel leader, according to advices received here from Torreon.

Addressing Villa as "Esteemed General," Martinez telegraphed him from Torreon that he would arrive in Sabinas for a conference and would leave nothing undone to render Villa and his followers elements of Mexican progress. Martinez concluded "embracing you fraternally."

Villa replied, among other things that he awaited Martinez to embrace him with all his heart. Villa signed himself, "your friend."

It was announced at Provisional President De la Huerta's office that Villa probably would arrive in Mexico City within three days and place himself at the disposal of the president.

EXPLORER NAILS OLD THEORY

Vilhjalmur Stefansson Says the Arctic Region Blooms With Flowers in Summer.

Winnipeg, Man., July 29.—The arctic region, according to a unique theory tentatively advanced by Vilhjalmur Stefansson, noted explorer, is the original home of the bluegrass that has made Kentucky famous and the bluegrass region of that southern commonwealth may have evolved from seed first dropped from an iceberg, drifting down from the north in the glacial epoch.

Stefansson, while on a visit to his mother in Winnipeg, deplored the general ignorance regarding the far North and said school geographies and text books which gave children false ideas of the region should be rewritten.

"There are 640 species of flowering plants in arctic Canada," said Stefansson, "and three times as many nonflowering species. The land, that is popularly supposed to be a frozen desert, is in summer one great flower garden, gorgeous with goldenrod, poppies, bluebells, dandelions, watercress, timothy and bluegrass as deep and lush as that in the thoroughbred pastures of Kentucky. If one were inclined to speculate, one might conjecture that eKntucky received its bluegrass from these arctic meadows millions of years ago in the age of ice."

QUAKE BRINGS OIL GUSHERS

Trembler in Los Angeles Causes Oil to Burst Thrrough Sidewalks—Shoots High in Air.

Los Angeles, Cal., July 30.—Two oil gushers were "brought in" here by an earthquake shock which jarred the city shortly before noon. The oil suddenly burst through the pavement and shot into the air. These are the first "oil springs" known in the experience of oil men, it is said.

Two Killed in Auto Wreck.

Chicago, July 31.—Mrs. Jessie Brown, who is alleged to have shot and killed her husband last April, was killed in an automobile accident. Robert J. Block, with whom she was riding, also was killed.

Spanish Bonds Taken in 17 Days.

Madrid, July 31.—The 300,000,000 pesetas treasury bond issue at 4½ per cent has taken 17 days to cover. The last subscription of 8,000,000 pesetas was taken by the municipality of Madrid

Lloyd George in Strange Company

Lloyd George, premier of England, photographed at Boulogne, France, during his recent visit, with M. Millerand, the French premier. The two distinguished statesmen were received in quaint costume by the native fisherwives, and were presented with huge bouquets of flowers.

Says War Cost Hundred Billions

English Financier Fixes Real Losses of the European Belligerents.

AMERICA WORLD'S CREDITOR

To Only United States and Japan Did the War Bring Prosperity, According to English Authority—Germany a Heavy Loser.

London.—The actual cost of the war to European belligerents was in excess of £20,000,000,000 ($100,000,000,000 normal value), represented by property destroyed, losses in investments abroad, depreciation of properties and by pensions, Edgar Crammond, English financier, told the Bankers' institute at a recent meeting here.

He fixed the following as the real losses of the European belligerents:

Germany	£8,700,000,000
($43,500,000,000 normal value.)	
France	6,250,000,000
The United Kingdom	5,200,000,000
Italy	2,100,000,000
Belgium	550,000,000

To only two belligerent countries—the United States and Japan—did the war bring prosperity, Crammond said, but Spain, Holland, Switzerland, Greece and Scandinavia also had grown wealthier. He believed the "liquid capital of the world," now distributed in centers which are unaccustomed to the exercise of their new powers," would eventually again find its chief outlet through London.

America the Gainer.

"The war has produced an extraordinary change in the economic relations of the United States with Europe," he said. "Whereas, in 1914 America owed Europe £2,000,000,000, at present Europe owes America £2,000,000,000 ($10,000,000,000)."

Assuming that the post-war purchasing power of the dollar was 70 per cent of its pre-war value, Crammond said during the last five years there had been an actual increase in the national wealth of the United States of approximately 30 per cent, and he estimated this wealth now in the neighborhood of £70,000,000,000 to £80,000,000,000.

The national wealth of Japan, he estimated, had been doubled by the war.

Germany Heavy Loser.

On the basis of a post-war mark valued at 50 per cent of its pre-war value he estimated Germany has lost, apart from the indemnity, 26 per cent of her national wealth, the whole of her mercantile marine, all her colonial possessions, and practically the whole of her investments abroad. If the figures suggested at the Hythe conference, £6,250,000,000, were fixed as the German war indemnity, he declared the total losses of the German people arising out of the war, would be equivalent to about £15,000,000,000, or one-half her national wealth.

"So far as the world as a whole is concerned, the principal loss is in the fact that Europe is not yet 'a going concern,'" he continued; "but the underlying economic forces which made her the great center of the world's commercial activities are still at work and will rapidly transform the economic situation in Europe."

He said the dominant characteristic of international trade in the next ten years will be a tremendous world demand for capital, and the internal financial policies of the nations should be framed with due regard to this condition.

COTTON CONSUMPTION GROWS

Amount Used During June Shows Big Increase Over Year Ago Says Census Bureau.

Washington.—Cotton consumed during June amounted to 555,521 bales of lint and 33,960 of linters, the census bureau announced.

During June a year ago 474,330 bales of lint and 15,083 of linters were consumed.

Cotton on hand June 30 in consuming establishments was 1,554,923 bales of lint and 270,171 of linters, compared with 1,363,049 bales of lint and 263,804 of linters a year ago, and in public storages and compresses 2,304,639 bales of lint and 374,648 of linters compared with 2,765,771 of lint and 207,781 of linters a year ago.

June imports were 19,635 bales, compared with 17,269, in June, 1919, and exports were 241,450 bales, including 3,860 bales of linters, compared with 690,169 of lint and 3,710 of linters in June last year.

Cotton spindles active during June numbered 34,503,754, compared with 33,950,358 in June a year ago.

Speech Lost in War Recovered by Bowling

Niagara-on-the-Lake, Ont. — Dumb for three years as the result of being shell shocked in the war, Trooper W. Hart suddenly recovered his speech here in the excitement of a bowling game. He was playing with the Davisville Military Hospital team.

Cannibals Once Peopled Texas

Discovery Made That Prehistoric People Were Different From Indians.

HAD REGULAR CAMP SITES

Life History Read From Records They Left in Their Burned-Rock Mounds —Advanced to Stage of Paleolithic Culture.

Austin, Tex.—Evidence that Texas was inhabited by a prehistoric people different from the Indian who roamed the plains when the first white man came has been unearthed by James E. Pearce, professor of anthropology of the University of Texas. The early inhabitants, he said, lived a nomad-like existence, roaming from one part of the wilderness to another and killing, with rude stone weapons, animals and even humans for food.

In co-operation with the Smithsonian Institution bureau of ethonology, Prof. Pearce has been investigating the mounds for more than a year, he reported.

"The life history of these people has been read from the records they left in their burned-rock mounds or kitchen middens," the professor said. "These mounds are piles of broken and charred bits of limestone three or four feet high and sometimes as long as 100 feet.

Had Regular Camp Sites.

"They are made up of the kitchen refuse of these prehistoric peoples, who had regular camp sites at frequent intervals along the Edwards plateau, extending from Austin westward to New Mexico.

"These people evidently were advanced to the stage of paleolithic culture, an earlier age than the period of heolithic culture, to which most of the American Indians belonged. These early Texas inhabitants had arrows and spears tipped with flint points, chipped but not polished. They did not polish their stone weapons, nor did they engage in any form of agriculture. They were, however, skillful skin dressers, for we have found scraping tools made of flint.

The kitchen middens which we discovered are the only thing of their kind in America, so far as I know, although they had been found in other parts of the world. At these sites, camps were located with a great fireplace in the center, over which huge slabs of limestone were placed as a sort of primitive stove, upon which to cook the meat the inhabitants killed.

Cannibalism Practiced.

"We know these people were cannibals, for among the refuse heaps have been found human bones split apart in order to get at the marrow.

"The soft limestone slabs, being exposed to the weather, broke from time to time, and were cast aside near-by, to be replaced by new ones.

"In the course of our investigations we have completely examined some fifteen of these mounds and in them have found thousands of splendid specimens of chipped arrow and spear heads, as well as scraping tools and other implements. Bones of the deer, which were prevalent in this region, are found in profusion, indicating that this was the principal article of diet."

BEEF IMPORTS GROW

Figures Are Given Out by Bureau of Animal Industry.

Canned and Cured Meats Show Big Falling Off for the Period Covered.

There was very little difference in the quantity of fresh and refrigerated beef imported into the United States in 1919 and 1920. The figures are taken from the meat inspectors' reports, bureau of animal industry, United States department of agriculture. In 10 months ended in April, 1919, 27,673,105 pounds of fresh and refrigerated beef were imported. In the period ending at the corresponding time in 1920 the quantity of fresh and refrigerated beef arriving in the United States from foreign countries was 27,968,880 pounds, an increase of about a quarter of a million pounds.

Fresh and refrigerated meats of other kinds jumped to twice the quantity in the 10 months ending April, 1920, as for the same period in 1919. The figures show 7,933,377 pounds for 1919 and 14,979,663 pounds for 1920. But the canned and cured meats imported during the same periods show a remarkable drop from 126,624,348 pounds in 1919 to less than 2,000,000 pounds in 1920. This item accounts for the marked decrease in the total meat products imported. The total weight imported in the 1919 period was 168,602,911 pounds, but 1920 brought only 50,246,655 pounds.

Finds Ring Lost Years Ago.

Chester, Pa.—John Hunter the other day excavated from the soil in the rear of his Holland street home near Eddystone a diamond ring, which he had lost there more than 12 years ago. It was while spading that Hunter lost the ring from a hole in his pocket. He had no idea where he had dropped it, and in time forget all about it.

He was turning over the soil again with a spade, and to his surprise the long-lost ring came up on a spadeful of dirt. A little washing and polishing restored it to its original beauty. The ring is valued at $200.

Chum Is Now Her Stepmother.

New Albany, Ind.—Estella Kelsall and May Deitzman were chums and Estella introduced May to her father, a widower. Now she'll never have to part from her chum, as "dad" has married her. Dr. Oliver Kelsall surprised his daughter when he telegraphed that he and May were on their honeymoon.

Needle Is Halted

Greensburg, Ind.—While lying on a davenport at her home Mrs. Noel Anderson felt a needle enter her shoulder. A physician was called and it was discovered that the needle was fast traveling toward the lungs. She was rushed to a hospital, where an operation was performed.

HIS INSPIRATION

By MILDRED WHITE.

(Copyright, 1920, Western Newspaper Union.)

The people sat spellbound by the music which came floating out to them across a hedge of flowers. Many willing hands had built that hedge around the platform of the church which was to hold the throng coming from far and near to rejoice in the success of a former townsman. Hal Rupert was only remembered as an ambitious boy who had early left the great house on the hill, to pursue musical study abroad. But Hal Rupert, the father, and the still older Hal had been honored and beloved by the entire community. For their sakes, though both had long passed away, this gifted musician was now lovingly welcomed.

It was the progressive Madame Weston who first conceived the idea of extending to Hal Ormond Rupert, an invitation to visit the town of his ancestors, so near the big city where he was now, on concert tour. And Rupert, the violinist, responding promptly and cordially, suggested that his services would be at their disposal for one evening.

So Madame Weston immediately planned a recital for the benefit of a local charity. Among all the eager faces upraised before him the violinist saw but one—the young, old face of a child. Enthralled, motionless, it was as though the boy were hypnotized by the music, hypnotizing in turn the player, by his tense, wrapt attention. Vainly, Rupert endeavored to withdraw his interested gaze from the boy's face. Then smiling whimsically, found that face, his inspiration.

When the last note had been lost in applause it was to the white-faced boy that Rupert made his acknowledging bow. And then, following an inexplicable impulse he seated himself on the end of the front seat beside the boy, as Madame ascended the platform to make one of her speeches of appreciation. With a shiver of delight the boy looked up into the man's face.

"That was great," he breathed.

"I want to see you when this is over," the musician said. He noticed that the boy sank back as if crippled. And true to his word, after what seemed an interminable time of handshaking, he sought out again his patient watcher.

"You liked my music?" he asked abruptly.

The little fellow drew a long breath. "If I could learn to play like that," he said, "I'd want nothing else—in all the world. I've got a violin," he went on excitedly. "They offered one at a grocery place as a premium, if you'd get enough grocery orders.

"I went out every day, and I got the orders. Cissy said—that's my sister—that she was afraid people gave me the orders just because my spine is bad. But, I told Cissy that they got their goods all right, didn't they?"

His pleading eyes were questioning.

"Of course they did," the musician agreed.

"And I learned to play myself," the boy went on, "little things that I'd hear. Cissy says my playing is 'beautiful unto tears.' Cissy says queer things, but oh! how she does wish she could let me have lessons.

"She does a darn lot too much for me as it is," he burst out unexpectedly. "You see first, she was mother to me when mother died. I don't remember her. Then she was dad to me after dad died—carns our living—I mean up in the bank office."

"Your sister," Rupert asked—he was strangely interested in this absorbed young admirer, "is not as fond of music as you are. She is not here tonight?"

The boy moved uneasily.

"She was crazy to come," he said. "I knew that all the time, though she said, she wasn't. But, a dollar means a lot to us. Cissy didn't know how she was going to let me come, when she read your bills in the store windows. Then all at once it came to her, just the way everything comes to Cissy. She had bought a new straw hat, cheapest little hat, but then everything looks pretty, on Cissy, and she was going to Miss Smith's, where they sell navy-blue pompons. Cissy was going to perk the navy-blue pompon up in front of her hat to make it stylish. And the pompon was just one dollar, don't you see?"

Rupert, the musician, put an arm around the child to guide him down the aisle.

"Thanks," the boy said cheerfully. "Crowds do jostle my spine, if you don't hold 'em back."

The girl waiting in the hall looked up wide eyed as the two approached.

"Paul, dear," she exclaimed, "I'm so glad you have come."

"This is Rupert," the boy said easily.

"Oh, Cissy—my! You should have heard him play."

"I must see Paul again," he said earnestly. "Such an absorbing love of music hints at promise. It may be my good fortune to help your brother to achievement. May I come to your home to hear him play?"

"Will—you—?" breathed the girl.

Beneath the faded roses on the plain little hat her luminous eyes spoke gratitude.

"I am staying over in the old town for some time," Rupert casually remarked, and this sudden decision caused himself no less surprise than satisfaction.

BIG CROPS ASSURED IN WESTERN CAN

Need of Farm Labor Urg Required for Harvest.

Rains of the past week which been general throughout all po of Western Canada, covering M TOBA, SASKATCHEWAN, and BERTA, have placed beyond all ner of doubt the certainty of grain crops throughout the entir trict.

Reports from all points in marvelous and rapid growth. conditions of a week or so back, were decidedly less promising a many to think that there might partial failure, have disappeare together and now there is a wi optimism circulating throughou entire country.

In 1915 there were enormous reported from all parts, and it appear now as if in many place yields of 1915 would be equal not beaten.

What might appear to be a back, is the apparent shortage of help. The Province of Ma through its Employment Bure Winnipeg, is asking for 10,000 ha hands and over, offering from $6 per day. The Province of katchewan is asking for 15,000 hands to take care of the ha harvest that is certain to be r in that Province. In Alberta the area is somewhat less, the labor ditions somewhat better, and is ing a request for 5,000 extra hands.

Interviewing the officials of th ferent Governments, they are in to the opinion that as the cro Kansas, Nebraska, South Dakota nois and other Central States are vested there will be a movement n ward that will materially help to care of the labor situation. Wit low railroad rates that may be se on application to the Employmen fices at Winnipeg and at bou points, or which may be se through the Canadian Governme fices at Chicago, Ill.; Detroit, M Milwaukee, Wis.; Kansas City, Omaha, Neb.; Des Moines, Ia.; W town, S. D.; St. Paul, Minn. Grand Forks, N. D., will give to seeking employment the opport to reach the harvest fields at a cost.—Advertisement.

Boys and Dog Dig Up $2,00

Four schoolboys, while spendin Whitsuntide holidays in Mulhudd village outside Dublin, ratting w terrier, discovered a hoard of than £400 in sovereigns (nea $2,000) in a rat hole. The news ly spread, and a local postman cl the money as his. He says about was left to him by his father, a smith, who had inherited it fro father, and to keep it safely in troublous times the postman hur in a field where it would still ha mained but for the inquisitive te

o black," he decided, and went to athroom, where he half-emptied eservoir of the pen and refilled it water.

hat ought to be just about right sort of pale and mysterious and trength."

seated himself at the table, took en in his left hand and inscribed s on the paper; scribbled a ingless sentence and laughed y.

nny how some people can be dextrous and take so long to e it. If I hadn't caught a bullet y arm, and tried to write left- d in the hospital, I'd give myself up here in no time. Writing's amed distinctive. But, as it is, Hand, very large and plain, is y Hilliard—" Here he shifted pen to the other hand—"And —and, small and curlicue, is dead Dicky Morgan—'one of her st friends.' I'm glad I killed that off—he never amounted to a hill eans anyway. But this Hilliard o—a live wire, boy, a live wire!" d with a grin of sardonic humor, rote on the flimsy paper, slowly a little irregularly, as though in cal discomfort:

"Neuilly, 7-19-15.

o matter what you ever think, no t what you have ever thought, I loved you."

grimaced, pondered diligently, made a correction.

have always loved you more than own life. You said my ideals had —do you think so now? I don't, ; I think they're almost what you would have them. And it may be that simply because of that, I've loved you more every day, and—"

Hilliard sat back, and his eyes were softly luminous.

"Suppose, by the luck of the very devil, I should fall in love with her again?" he said aloud. "Suppose I should!" He tossed away his cigarette and rested his head in his hands. "Oh, Carol! I did care . . .!" His shoulders shook spasmodically; then all at once he flung himself out of the chair and took to tramping the floor in a hurricane of emotion. His face was set in granite; he caught sight of it in a mirror, halted and himself was stunned by the transcendant mask which covered his soul in revolt. The work of the surgeons was not far short of miraculous; he couldn't upset it, not by any effort of his will. The eyes might flash, or lower, or chill—the other features were still calm and strong in their splendid glory. Even now, the face which he saw reflected in the mirror was one to convert the most hurried of all passing strangers to a new, if unformed, assurance in the brotherhood of man.

"You dirty blackguard!" said Hilliard, showing his teeth. He went pensively back to the letter, studied it, gazed at the floor.

"But after all," he said, "no matter what she or anybody else did to me . . . and if I can kill two birds with one stone, and be what I've wanted to be—all except this damnable way of going about it. . . . She acted as though this infernal lying letter would please her—that's not the point; it's a quicker way to get at the doctor. . . . Well, it gets her a letter I never intended to write . . . and Dutout's war cross, too . . . that'll make it all the easier. . . . I'll give her that. Angela was going to have it, still. . . . So I was 'one of her dearest friends,' was I? What's that worth to Henry Hilliard, bringing back the news from the front?" He sniffed scornfully. "Ten thousand dollars—I hope. And the doctor'll make twenty out of it. . . . Gad! that's turning the other cheek with a vengeance! Hanged if I don't almost wish he'd lose his rotten money! But that can't be helped—I'll get some satisfaction somehow."

He reread the unfinished note, folded it, creased it heavily for versimilitude, and gave it the final examination.

"Business . . . is business," he said, musing. "That was a pretty sporty thing for me to do . . . to tell her there was a letter. Bit of a chance, too. And after smashing our engagement, she could stand there and tell me . . . oh, rubbish! So suppose we say . . . fifteen thousand from the doctor! But confound it—the better salesman I am, the more I get out of him, the more he makes! Whew! Where's the satisfaction in that? . . ."

His pupils had narrowed again, giving the lie to the sweetness of his

Hilliard Was Staring Fixedly.

smiling mouth. Then the smile faded and Hilliard was staring fixedly at the document in his hands.

"I wonder who in thunder that man Armstrong is?" said the masquerader who had prided himself that he no longer cared.

CHAPTER V.

He wakened early; and in that state of half-conscious revery which has less of worldliness in it than perhaps any other state of human existence, he lay vegetating, subtly aware that he was very peaceful and content; but presently, when his brain had yawned and stretched itself, and begun to set about its usual functions (or, in other words, when Hilliard was sufficiently aroused to resume his usual introspectiveness) he was extremely unhappy, and not in the least vainglorious.

He scowled, and struggled to remember what it was that had risen out of thin air and angered him last night, at the very instant of his dropping off to sleep. Not the Cullens, nor Carol himself, nor Armstrong . . . but wait a moment! Who was Armstrong? Whence and whither, Armstrong? A newcomer to Syracuse (that is, within two years) and already proprietary—Hilliard frowned, and rubbed his eyes, and wondered anew. He was a trifle amused and a trifle ashamed of himself; was it credible that he could be jealous of a man who had merely appropriated what Hilliard had no further interest in? How inconsistent . . . and yet how superbly characteristic of human nature! Hilliard chuckled to himself in recognition of it and dismissed the proposition as unworthy of further attention. Dismissed it, yes . . . as a child dismisses a rubber ball with an elastic cord attached to it.

From below stairs a Japanese gong chimed softly and Hilliard, without delaying another instant, leaped to the floor. Half an hour later, bathed, shaved and dressed, he descended complacently; the second day of his remarkable performance was begun.

The Cullens, father and daughter, were waiting for him. They greeted him cheerfully; and he was glad that grief hadn't clung to their eyelids; he would have felt depressed, even although he would have sensed the hidden compliment. Quick to grasp the nearest handle of diplomacy, he saw that cheerfulness on his own part would help the situation, for now that his duty as a courier was over, there was no need for long protracted melancholy.

It was a cheerful trio, then, that sat down to breakfast; there was no exhilaration about it, but at least there was no somber cloud of mourning. Angela, behind the coffee urn, had occasional moments of pensiveness, but that was to be expected, and condoned; indeed, Hilliard held himself to be greatly favored by even this.

She was imaginative, and Hilliard's pose was calculated to appeal to a lively imagination. He treated her not as a young girl, but with the respectful deference which belongs to a mature woman, a mistress of a household, and a hostess in her own right. She was charmed and captivated, and so was her father—most assuredly he was! So charmed, in fact, that instead of leaving for his office at half-past eight, he lingered until half-past nine; so captivated, that as his limousine slid quietly down the long, steep hill of James street, he found himself ascribing a new degree of credit to Dicky Morgan for the simple reason that Dicky Morgan had gained the full esteem of such a friend as Hilliard.

A mighty nice young man, thought Cullen. A man of soundest judgment, through and through. A man of brilliant intellect and razor-edged analysis. Had he not said, and furnished illustrations from his broad experience, exactly what Cullen himself had said, in regard to labor, and materials, and transportation, and production, these half a dozen years? Cullen sat back and smiled triumphantly. It does a man good to hear his pet convictions approved, expanded and laid down as axioms by another wise man.

Back on the wide veranda Angela had curled up comfortably in the hammock and, beside her, Hilliard was enjoying a cigarette. He was enjoying, too, this rare interlude of respite; he looked across at Angela, and thanked his stars for the invitation which had made this quiet hour possible.

She lifted her eyes, caught Hilliard smiling at her and blushed furiously, not for any shame accruing to her, but because she had arrived at the age of easy blushes.

"I . . . suppose you're going over to Carol's pretty soon," she said, constrained to say something and grasping at the first available idea.

"So anxious to get rid of me?" he asked, amused.

"Oh, no!" Horror was in her tone and mortification. "Only . . . I wanted to talk to you before you saw Carol. Because Carol doesn't . . . I don't think she'll exactly feel as I do about this . . . I know she won't. Maybe it's because Dick and I were chums, and she and Dick were . . . oh, you know. It's different. You ought to take that into consideration—when you talk to her, I mean. I don't mean I don't care, because I do—terribly—but I . . . I can see what it meant to Dick . . . and I know how he'd have loved it, and picked this out of every possible way, to . . . end things, but Carol . . . she's different."

"How?" Hilliard's voice was even, but very low.

"Older," she said, looking away. "And . . . and they were going to marry each other some time."

"But wasn't that broken off?"

"Yes, but she was waiting."

"Waiting?"

"Why, of course."

Hilliard's breath quickened.

"I should have guessed that this Mr. Armstrong—"

"Oh, but that wasn't until she thought Dick wasn't ever coming back. And besides, she isn't really crazy about him—just lonesome."

"Indeed." Hilliard compelled himself to relax. "So you think she'll be . . . hurt?"

"Hurt?" Angela's voice was thin with emphasis. "Rather!"

"If there's anything you think I'd better say, or not say—" He rose, out of sheer inability to endure this ingenuous estimate of Carol's heartache. "Perhaps you'll tell me—because it's time for me to be going over."

Angela had risen, too, and stood beside him. Her features were composed, but still suggestive of inward emotions a little too tender to convey.

"If there's anybody in the world," she said, "who could give Carol any consolation just now, it's you. I don't suppose you ever were a minister, but you look as though everybody could come to you and tell 'most everything, and you'd help . . . anyway, you'd try to. So I wish you'd . . . you'd sit and listen . . . Carol's got to talk to somebody, and when you're hurt the way she is, you can't talk to your family . . . and you were a friend of Dick's. And . . ." She swallowed, and went on more slowly. "You can use your own judgment, of course, but if I were in your place—I'd lie."

"Lie!" he repeated, aghast.

"Yes, I would! He . . . he must have sent her some word, Mr. Hilliard! He must have!" She was desperately serious now, and thoroughly aroused. "It means the whole world to her! It's everything! Why, even I've got more than she has, and she was waiting for him to come back to her! I'd lie myself black in the face, but I'd tell her something—tell her anything I could think of to make her believe he hadn't stopped caring! It can't do any harm now. It can't hurt you. And I won't even ask you whether you do or not. Only you're here, and she'll trust you—"

"Will she?"

"How could she help it? And . . . and that's all. Please don't let her think he didn't care!"

Hilliard stood irresolute; chaos in his brain. "I'll . . . see," he said with difficulty. "I'll see."

"Won't you promise me? I won't ask you afterward, if you—"

"Does it mean so much to you?"

"Ever and ever so much. . . . Won't you please promise?"

He gazed at her a moment, yielded with a show of reluctance.

"Very well—I promise. Because you've asked it. And because it's the dearest, most generous, most thoughtful thing I ever heard of in all my life. . . . And after that, can't we be truly friends?"

Flushed, perplexed, honored, she gave him her hand with a hesitancy which betrayed the deep sense of compliment she felt.

"I don't think I could be prouder of anything that could possibly happen to me," she said.

Was it worth the blatant mummery he had conceived and executed? Was it not worth that, and infinitely more?

She was proud of his friendship . . . and she shared that distinction with no one else in the entire universe.

Proud of it! Hilliard was fulsomely abashed. Abashed—yes, and simultaneously glorified. He had come to make the city proud, ignorantly proud, of the man whose deeds had merited no renown. Here, at the very inception of his plans, a seventeen-year-old girl was proud of him as he was. Courage. Inspiration. Resolve.

He had won her respect by the promise of a lie; and in this instant he vowed to deserve, by other and increasing lies if need be, the prestige he was unalterably committed to gain, whereby the past should be as nothing, and the future should be a magnificent citadel of reconquered dreams.

She was proud of him, and she had approved the lie in behalf of Dicky Morgan's memory. Unwittingly, she had sanctioned the very purpose of his coming, and the method of his approach. She had confirmed his own intentions, and given him the will to advance. He was to act as the stanch defender of her playmate perished, and to make of himself a new and a better man, worthy of the eulogies which, as trustee, he now accepted for the unworthy Morgan. He consecrated himself to this end. Told himself fiercely that he would succeed. And she was proud of him! It was another omen.

* * * * * * *

It was eleven o'clock to the minute when Hilliard, not quite so blithe as a wedding guest, and yet not altogether as doleful as a mourner, waved his hand to a slender girl who stood on the veranda of a house diagonally across the street, and went slowly up the Durants' brick walk. He had anticipated the effect of this pilgrimage upon his nerves, he had discounted it; and Angela's advice had given him an artificial stimulus for the moment; nevertheless, as the front door opened to him, and he saw, over the head of a smirking maid-servant, a hallway and a vestibule unchanged, his breath came a little faster than usual, and his cheeks went a little darker. It was, so to speak, a return to a shrine, and a normal man might easily be pardoned for a little sentiment on the side, no matter how often he had changed his religion during the meantime.

The maid, having deposited him in the living room, disappeared in a quick flurry of skirts; Hilliard, standing at the end of the long, high-roofed apartment, found himself surrounded by a thousand goads to remembrance. Not an item was out of place; not an item was otherwise than as he had often recalled it; his memory had been photographic.

At the opposite end of the room, flanking the black-marbled fireplace, was a graceful, swan-necked sofa, beautifully carved and splendidly upholstered. Doctor Durant had once remarked that Carol represented the fifth successive generation of her family to be courted on it. And evening after evening, in the ages that had gone before, Hilliard had sat there and dreamed and loved; and sometimes when Carol had slipped away from him he had sat there and dreamed and

"Carol!"

loved and smoked, while she played Chopin and Rubinstein and Moscowski to him. And the piano—somewhat battle-scarred but withal a master instrument—was still over in its accustomed place, with the "Military Polonaise" perched open on the rack.

Then his pupils narrowed to gray necks of ice; for memory, by one of those tricks against which there is no defense, told him that he stood in this same position, in exactly this same spot, when two years ago the doctor had pronounced his sentence, and Carol, in terrible silence, had then and there confirmed it. His imagination conjured up that scene again; his blood chilled; he could fancy that Carol and the doctor were actually before him, and that he was staring at them in the flesh, and feeling the lash of the doctor's quiet peroration. . . .

At the threshold there was a faint rustle of fabric, and Hilliard turned. Carol! His hands went out mechanically, and hers to him; and Hilliard, tasting the acid of his somber mood, smiled benignly.

"I mustn't keep you waiting," he said, dropping her hands. "I've brought you the letter I spoke about." He gave it to her, and coughed his embarrassment. "I'm positive it's for you. And I'm sure you don't want anything to prevent you from reading it at once, so if you'd rather prefer to have me come back later for the talk you wanted—"

He was already moving toward the doorway; she restrained him gently, although her eyes couldn't be dragged from the folded paper he had given her.

"No," she said, "please don't go. I particularly want you to meet my father, Mr. Hilliard. He's anxious to see you, too. Won't you wait while I call him?"

He inclined his head; followed her with his eyes to the hallway, strained his hearing, and knew that she had opened the letter as soon as she was out of his sight. His lips twitched cynically—and then, as he remembered Angela's injunction, straightened. After all, this much was pure charity. Down the hallway, there was the reverberation of a closing door, and silence.

Justice to Dick Morgan's memory.

(TO BE CONTINUED.)

For Musical Beginners.

Builders of modern flats might well take a hint from a unique feature in Buckland's hotel in Brook street, now undergoing transformation to accommodate the new Guards club. This was a suite of "sound-proof" rooms called the "Handel suite," after the composer, who lived and died in Brook street, for the use of musically inclined visitors. This admirable arrangement enabled amateurs of such distressing instruments in the hands of the novice as the piccolo or the bagpipes to practice without disturbing their fellow-guests.—London Times.

FARMERS DO WELL

Record Prices Paid Wheat Growers of Western Canada.

Will Get Above 40 Cents Over the Fixed Scale Set—World Looking to the Dominion for Its Grain.

It will be of interest to many readers to learn that their farmer friends in Canada will do so well out of the wheat they grew on western Canada's prairies last year.

There was a fixed price of $2.15 per bushel paid for their wheat last season.

Not knowing the price at which it would be possible to market the crop, the Canadian grain board, which organization handled the whole of the crop last summer, fixed $2.15 as a minimum price for No. 1 wheat, and arranged that each farmer should be given certificates for the quantity of wheat he delivered. The amount received over and above the fixed price which was paid to the farmers when selling their wheat was to be divided pro rata at the end of the season, and the holders of these certificates will, therefore, participate in the extra price received according to the quantity of wheat sold.

The latest advices are that the wheat board will pay at least 40 cents a bushel over the fixed rate of $2.15 a bushel for their wheat of last season. This means that about $40,000,000 will be distributed among the farmers of Alberta, Saskatchewan and Manitoba. This sum represents the difference in the price at which the wheat crop was sold and the price that was fixed for last season's crop.

Canadian Wheat in Demand.

A declaration that Canadian wheat would in all probability sell this year at between $3 and $5 per bushel, was made recently before a conference of western supporters of the government by Dr. Robert Magill, who was one of a deputation from the Winnipeg grain exchange. Dr. Magill argued in favor of open trading from the aspect of world conditions. He stated that no wheat could be exported from Russia owing to internal troubles.

Roumania would have absolutely none to export, India was prohibiting export, while Australia's acreage would fall from 12,000,000 to 7,000,000. The result would be that Australia would scarcely have enough to feed herself, and there would be absolutely no wheat for Europe, except from the Argentine and North America.

Dr. Magill, according to formal announcement, though it would be impossible to secure as good a price for the producer by control as by the open market. The United States market was now open, and, according to present prospects, there would be mighty little to spare from that quarter. The net result would be that Canadian wheat would undoubtedly go to a record figure.—Advertisement.

Keep Up Fighting Spirit.

Be patient with every one, but above all with yourself. I mean, don't be disturbed because of your imperfections, and always rise up bravely from a fall.—Francis de Sales.

His Hearing Restored.

The invisible antiseptic ear drum invented by Mr. A. O. Leonard, which is in reality a miniature megaphone, fitting inside the ear and entirely out of sight, is restoring the hearing of literally hundreds of people in New York City. Mr. Leonard invented this remarkable drum to relieve himself of deafness and head noises, and it does this so successfully that no one could tell that he is a deaf man. This ear drum is effective when deafness is caused by catarrh or by perforated or wholly destroyed natural drums. A request for information addressed to A. O. Leonard, Suite 93, 70 Fifth avenue, New York City, will be given a prompt reply.—Advertisement.

So Says Tradition.

"I want to say it with flowers."

"Here are some daisies."

"But daisies won't tell."

END OF EIGHT YEARS MISERY

Used Lydia E. Pinkham's Vegetable Compound and Recovered.

Newark, N. J.—"The doctor said I had an organic trouble and treated me for several weeks. At times I could not walk at all and I suffered with my back and limbs so I often had to stay in bed. I suffered off and on for eight years. Finally I heard that Lydia E. Pinkham's Vegetable Compound was a good medicine and tried it with splendid effect. I can now do my housework and my washing. I have recommended your Vegetable Compound and your Blood Medicine and three of my friends are taking them to advantage. You can use my name for a testimonial."—Mrs. THERESA COVENTRY, 75 Burnett St., Newark, N. J.

You are invited to write for free advice

No other medicine has been so successful in relieving woman's suffering as has Lydia E. Pinkham's Vegetable Compound. Women may receive free and helpful advice by writing the Lydia E. Pinkham Medicine Co., Lynn, Mass. Such letters are received and answered by women only and held in strict confidence.

A number of fans went to Garner from here Friday to see the ball game between Garner and Kanawha. Garner won the game by 5 to 1. It was a good fast game and both teams played good ball.

Al Koerner and family went to Clear Lake Friday to clean up their summer cottage. They have had it rented most of the summer but now it is vacant. The Koerner's have a mighty fine place at the lake.

Mr. E. T. Wesson and Mr. R. W. Sinclair were over from Garner Tuesday afternoon to make arrangements for the Masonic funeral of Capt. Collins who passed away here Monday.

The judicial convention held at Cedar Rapids last week nominated for supreme judges Silas M. Weaver, of Iowa Falls; F. F. Faville, of Fort Dodge; Lawrence DeGraff of Des Moines, as the republican candidates for the supreme bench. Our townsman, Rev. A. H. Meyer, was a delegate to the convention and if you don't like the outcome just blame him for voting he opposie way to which you think—if yu're a Democrat.

Howard Doyle is now "braking" on the freight train between Estherville adn Dows, so we understand. Howard has been on the railroad before and knows the business of hooking up and unhooking cars and other jobs a "brakie" does.

Henry Freie is enjoying a visit from his daughter, Mrs. Braund and three children, of Williams, Iowa. They have been here for a couple of weeks.

Wilbur McGee and family and Mr. and Mrs. Wm. Trafford, returned on Sunday from their trip of about a thousand miles. Last week they drove to Wisconsin and spent a vacation at different points. They thoroughly enjoyed their trip.

Mr. and Mrs. Marlin Croner and Mrs. Schroeder returned last Thursday from ther auto trip to Chicago. Mrs. Henry Schroeder returned with them for a visit here for a couple of weeks. They enjoyed their trip immensely.

Dwight Smith, of the Garner Oil Company, was in town Thursday on business. Dwight reports that they have "shot" one well and although it has not yet been cleaned out it is yielding about twenty barrels a day. They expect a good producer when the hole is cleaned out.

Mr. M. O. Hocum and family motored to Newell and Varina, Iowa, last Friday for a visit with Mr. Hocum's two brothers and families. They returned to Klemme Sunday evening.

Harold Gruetzmacher came from Ames for an over Sunday visit with his folks.

Ernest Lewis and Harvey Stille returned Saturday from the harvest fields of South Dakota. "Stub" injured his foot while out there and so could not work much. They say that the Iowa farmers are paying much better wages for harvesting than they are doing in the Dakotas.

Mr. and Mrs. P. M. Greisemer and Mr. and Mrs. John Gruetzmacher left early Monday morning for points east. They will be gone on a two weeks' vacation and will visit at Chicago, Illinois; Milwaukee, Wisconsn, and will also spend some time near Mr. Gruetzmacher's old home, Columbus, Ohio. Mr. Gruetzmacher has not been back to his old home for a great number of years and he will no doubt see quite a change. They will also visit Mrs. Gruetzmacher's brother at Hebron, Wis., and with other relatives and friends in our neighbor states to the east.

Revenue Producers.

Goats, Sheep or Cattle Are Favored Order Named for Keeping Down Sprout Growth—Methods for Removing Stumps.

The fair-weather days of the autu afford the farmer an opportunity undertake the clearing of land which he has no time in the b summer months, and which can not done while the land is wet in spring. On thousands of farms th are cut-over tracts which should converted into revenue producers soon as possible. If the owner cides that the land in question is b ter suited to crop production than forest growth, a careful study of most economical method of removi stumps and small growth should made. Most cut-over land pass through three stages before reachi its greatest agricultural value. T waste and small growth is disposed first, then it is allowed to remain stumps for a few seasons, until smaller stumps are dead and decay during which time it is used for p ture or may be cultivated. Final all the stumps are removed.

Generally it is best to cut brush close as possible to the ground a avoid leaving sharp points that mig injure stock. However, if the wood of no value and the ground is not be cultivated before the stumps a removed, it may be best to cut t trees rather high above the ground. the stumps are left three feet hig there will be less sprouting than if c low down, and such stumps are mo easily pulled.

The most successful method of kee ing down sprout growth is by heav pasturing by goats, sheep, or cattle, the order named. Any sprouts n killed by pasturing should be cut knocked off with the head of an ax.

There are a great variety of met ods used in removing stumps, means of burning, pullers and dyn mite. Farmers' Bulletin 974, "Clearin Land," prepared by the United Stat department of agriculture, contains formation designed especially for p

OBITUARY

Edward Charles Collins, eldest son of James and Jane Collins, was born in Delgany, County Wicklow, Ireland, He died at the home of his sister, Mrs. Asa Gibbs, August 2, 1920, aged seventy-nine years, two months and seventeen days. He came to this country with his parents at the age of four years and settled in Cincinnati, Ohio, where he received his education.

He enlisted in the Union Army in the Civil War at the age of twenty years as sergeant of Company A, 83rd Ohio Volunteer Infantry, and was transferred as Captain to Company C of the same regiment on January 17, 1865; he was mustered out of the service with the latter company July 24, 1865. He was over three years in the military service of his country, during which time he fought many severe battles, among which was the siege of Vicksburg and the battle of Mobile Bay.

After his return from the war he engaged as contractor and in the building of bridges. In the fall of 1880 he moved to Hancock county, Iowa, where for a number of years he continued in the business of contractor. He afterwards engaged in editorial work in connection with the Garner Signal. He was for several terms sergeant at arms of the House of Representatives of Iowa, the memberso f which in token of their appreciation of his services, presented him with a valuable token of their regard upon his retirement. For several years he acted as cashier of the Ventura bank.

He was a member of the Masonic Lodge adn of the Grand Army of the Republic, his local membership in these bodies being in Garner. He was also a member of the Loyal Legion, of Cincinnati, Ohio.

For fourteen years he lived in the home of his sister, Mrs. Asa Gibbs. During that time he has been a patient sufferer from rheumatism and since last December he has been confined to his bed, a helpless invalid, patiently awaiting his time and with full knowledge that the summons would shortly come. His relief came and he peacefully passed away on August 2, 1920.

HOME BREW AND STICK CANDY

LuVerne News: The village of Wesley is planning for a big "Wesley Day" to be held some time in August. The celebration will consist of ball games, band, merry-go-round, flying machines, speaker, street sports and such. As Wesley never does things by halves you can plan on a good time there that day. Editor Sturdevant is going to have a keg of home brew for the newspaper man and Mayor Kunz will have a stick of candy for every baby and ldy there that day.

The Times "Devil" Says

Arabian Plant Produces Seeds That Cause People to Behave Ridiculously

In Arabia there is a plant whose seeds produce effects similar to those caused by laughing gas. The natives dry the seeds and reduce them to powder, a small dose of which has curious effects. It causes the soberest person to dance and laugh excitedly and to behave in a ridiculous manner for nearly an hour. By this time exhaustion sets in and he falls asleep, to wake up after several hours with no recollection of his antics.

The fruits of some plants destroy the taste of sweetness. A berry found in the district of Ashanti renders sour and bitter substances sweet. Electric shocks can be obtained in central India by merely touching the leaves of the electric tree.

In Brazil some plants show remarkable luminosity. One is so luminous that it can be plainly distinguished in the darkest nights for a distance of more than a mile. In its immediate vicinity it emits sufficient light to enable a person to read the smallest print. One of the most wonderfully constituted plants of this country is the ball-throwing fungus. It is a small fungus, about the size of a pea, which projects a ball to a distance of several inches with a distinctly audible report.

Giraffe Has Use for Long Neck in Defending Himself

The giraffe has neither claws nor beak nor sharp teeth with which to defend itself or to attack its enemies; so when it is out of temper with one of its own kind it does not attempt to disembowel its adversary, as a rhinoceros might, or tear it, as a tiger would. But nature has given it a long and pliable neck, and, according to a writer in the New York Herald, it uses the upper part of itself like a flail, swinging its neck round and round, and brings its head down at each swing with a thump on its antagonist. The other combatant uses precisely the same tactics, and the two animals, planting themselves as firmly as possible by stretching out all four legs to the utmost, stand opposite to each other and hammer away with their heads until one or the other has had enough.

"Pork Barrel" Legislation and What the Term Means

"Pork barrel legislation," in political parlance, is legislation involving appropriations for buildings and public work largely for the purpose of aiding representatives and senators in making a good impression on their constituents. The expression is based on the rural custom of sharing the contents of the pork barrel with a neighbor who has failed to lay aside a winter's supply, and the similarity of this custom to that of congressmen trading votes to help each other weather the political storms back home.

Using Wood With Concrete.

When wood is used as a reinforcing material for concrete it should be impregnated with magnesium chloride, and the wood must be so placed that any change in the cross-sectional area does not affect the durability of the structure. If the latter precaution is overlooked the concrete may crack.

YOUR SMILE

Doesn't Know His Luck.

Father—So you are beginning to find that married life has its troubles.

Daughter—Well, yes. Ernest sometimes won't listen to reason.

"The young scamp. He ought to be ashamed of himself! It isn't every married man that gets the chance."

That's All.

Busy Housewife—Well, what do you want—speak quick!

Hungry Hobo—An automobile, a flyin' machine, a rich wife, a brand new flivver, a steam yacht, private car, valet and ham sandwich with a cup of coffee.

Innuendo.

"When I was a little girl they wouldn't let me kiss anybody until I washed my face."

"Wouldn't be a bad idea now," said her old-fashioned uncle with a significant glance at her makeup.

Come High, but Must Have 'Em.

Kidder—I don't suppose you'd take his weight in gold for your new baby, would you?

Newpop—No; I should hardly like to sell out at cost.

The Situation.

"That fellow is a millionaire."

"I should think he'd be happy when he thinks of all the money he has."

"Trouble is, he seems to think mainly of all the money he hasn't."

Shakespearean Student.

"Yes, I may say I'm a close student of Shakespeare."

"And which of his plays do you like best?"

"Dromio and Juliet."

Its Advantage.

"What a flowing style that writer has!"

"Yes; I suppose that it is one thing which enables him to keep in the running."

Inconsistent Qualities.

"The follow you see yonder is nothing but a rounder."

"That's queer; somebody told me he was a sharper."

WORTH REMEMBERING

Righteousness.—He who deviates from a clear path may lose his way.

Rumor.—A whisper is louder than a sh

The earth has ears, rumor has wings.

Shrewdness.—If you want to fool, pretend to be a fool.

Talkativeness. — While the pumpkin vine creeps along, the fruit is left behind.

IT WILL BE "UBEN & GRANGE," BUTTERMAKERS

E. S. Uben, assitant buttermaker at the Klemme Creamery, and Paul Grange, book-keeper at the Northern Lumber Co. here, closed a deal with a party at Webster City, Iowa, whereby Messrs. Uben and Grange become the owners of a creamery at that city. They will take possession of the business on September first. Both of these Klemme men are very capable and industrious and they will make the business a success we are sure. Mr. Uben is an old experienced hand at the creamery business and we can truly say he is a master of the art of making butter. Mr. Grange, although being quite a young man, has had a wide experience in the business field and thoroughly understands business methods and will make a good partner for Mr. Uben. Summing it all up we will say they will be a pair of hustlers that will be hard to beat and although Klemme loses two valuable men and their families, Webster City will be the big gainer, but the good wishes of the business men and people of Klemme go with them to their new location and home.

TOO YOUNG TO DRIVE

Our attention has been called to the fact that there are parents in Klemme who are violating a section of the Motor Vehicle Law by allowing children under fifteen years of age to drive their car unaccompanied by an adult. The law is as follows, and should be observed:

Sec. 12. No person under fifteen (15) years of age shall operate or drive a motor vehicle by permission from the owner of the car unless such person be accompanied by a person of mature years and in all cases where damage is done by any car driven by any person under fifteen (15) years of age and in all cases where damage is done by the car, driven by consent of the owner, by reason of negligence of the driver, the owner of the car shall be liable for such damage.

JAILED FOR ODD COURTSHIP

American Gets 20 Months for Cave Man Tactics in England.

London.—The unusual methods of courtship pursued by Walter Earl, an American citizen, has just landed him in prison for twenty months at hard labor.

Earl said his father was a white American and his mother a fullblooded Cherokee Indian. He came to England at the outbreak of the war and secured work in a restaurant.

The prosecuting witness, Miss Edith Chilman, was a waitress.

She said when Earl first saw her he asked her to meet him after working hours, but she refused. He repeated his request every day for three months.

Then he disappeared, but later met the girl upon the street and threatened to kill her with a dagger unless she consented to his attentions.

Earl varied his courtship by writing threatening letters to Miss Chilman and all the members of her family.

He said on the witness stand that he and the girl were engaged to be married, but it developed that he had frightened the girl into consenting by throwing crockery at her.

"POST NO BILLS" IS UPHELD

Written Consent of Property Owner Must Be Obtained, New York Judge Says.

New York.—Following a John Doe hearing, Chief Magistrate McAdoo decided to send written warning to all New York theaters and bill posting concerns that they must not violate the law against posting bills on property without the written consent of the owner.

The hearing, at which representatives of five theaters and one bill poster were present under subpoena, was held at the behest of Arthur K. Wing, attorney for the National Highways Protective association, of 27 Cedar street.

Mr. Wing offered a photograph, which he said was one of Joseph F. Minturn of 2783 Eighth avenue, posting bills opposite Mount Sinai hospital. Minturn, who said he was in the employ of the Yorkville theater, testified he had had no written consent from the owner, but that a watchman had given permission to him and had received theater tickets in return.

Any Shape.

Butcher—"Will you have a round steak, ma'am?" Mrs. Youngbride—"I don't care what shape it is, so it's tender."—Boston Transcript.

Klemme Sox Trim Woden Sunday

Home Team Easy Victor

THE KLEMME BALL TEAM BEATS WODEN BY 5 TO 2

Regain The Title of Sox

The Klemme ball team beat Woden Sunday afternoon at Woden and thus regained their title of "Klemme Sox." For a time they were without any "sox," but now they have them on again and are going after the bacon. The line up for Klemme was as follows: C. Kluckhohn, catcher; Lightsinger, pitcher; Fred Kluckhohn, R. F. Geo. Lau, C. F.; W. Pavey, L. F.; W. Howard, S. S.; W. Schultz, 1B.; H. Doyle, 2B.; M. Barr, 3B.; John Baumgartner, Umpire.

The game was a good one and was hot right from the jump off. Barr scored in the 3rd inning and C. Kluckhohn, Geo. Lau and H. Doyle all tallied one each in the 6th. C. Kluckhohn scored again in the 8th. Woden ran in one score in the 5th and one in the 7th. Geo. Lau made a hit good for a homer and made three bags on it. There were several good two bag hits that brought home the bacon.

Well boys, we are so proud of you now that we are all swelled up over the game and fraid we will bust a spender button yet. Hop to it and win some more and we will smear the old Times with a lot a printer's ink and tell the world the Klemme Sox can play ball.

BILLIE BUSCH INJURED PLAYING BALL

Last week Tuesday evening when the "Old Timers" were playing a practice game with the Klemme Sox, Billie Busch made a slide for a base feet first, but came down with too much force and the impact of his foot against the sack dislocated his ankle and fracturing one of the bones. He has been confined to the house for about a week, but was able to be out again Monday for the first time when he made a trip around the street on crutches. "Billie" don't like the idea of navigating with wooden propellors but is making the best of it. This is Billie's second accident playing ball this year. The other time he "bunted" a ball with his coco which put him asleep for a short spell and raised another bump on his dome. We advise Bill to lay off the ball playing, it will get his nenny yet. He seconds the motion.

Salutes.

Some clever Englishman, commenting on French politeness, once remarked that when a Frenchman bows, two-thirds of the bow is to himself. That may be true, and we have to admit that even the other third is quite a fraction more than most Anglo-Saxons offer.

Saluting is the same proposition. A snappy salute pulled by a buck to the most second of second lieutenants draws heavy interest; and the colonel who jerks his hand a few centimeters from his still affixed cigar is only insulting himself and the army.

If some privates were a little more polite to themselves, the saluting trap never would be sprung and the joke would all be on the other side of the military fence.—Stars and Stripes.

Something Worth While.

Rankin—I never was so disappointed in my life!

Phyle—What's the trouble?

"In the city the other day I saw an aquatic exhibition advertised—"

"Yes—"

"And I immediately bought tickets."

"You were disappointed?"

"Yes, all I saw was a lot of men in diving suits."

"But what did you expect in an aquatic exhibition?"

"Girls in bathing suits, at least."—Youngstown Telegram.

Saved Venus de Milo From Huns.

M. Heron de Villefosse, the eminent French archeologist, whose death has just taken place, was for many years head of the Greek and Roman sculpture department of the Louvre. Twice in his career he had to superintend the removal of that priceless art treasure the Venus of Milo to a place of safety—in 1870, and again in 1914. In each case the same enemy was concerned. Heron de Villefosse was seventy-four years old.

4,000 War Men Study Farming

Disabled Ex-service Men Placed in Agricultural Training in Various Institutions.

1,500 READY FOR COURSE

Many of the Men Are Illiterate and Must Be Given a Course in Elementary Work to Fit Them for the Farm Course.

Washington.—More than 4,000 disabled ex-service men have been directly placed in agricultural training and in addition there are probably 500 engaged in prevocational work preparatory to a course in agricultural training. Perhaps 1,500 more have been approved for the course.

Special placement has been suggested and is being sought for tuberculous men in hospitals and sanatoria.

The men approved for agricultural training may be classed into three general groups:

(a) Men who went into the war from college or high school, and, returning, have entered the agricultural colleges.

(b) Men with an eighth grade preparation who are admitted into subcollege two-year courses, Smith-Hughes or other schools of agriculture.

(c) Men of elementary grade, ranging from illiterate to the seventh or eighth grade, who of necessity must have prevocational instruction in order that they may receive scientific training intelligently and benefit to the greatest degree.

The first and second groups have given the federal board and the institutions to which they have been recommended very little trouble, as they enter the classes if sent to the institution at the beginning of the school year or a term, and if not they frequently can be brought up to class work by coaching.

Third Class Troublesome.

The third group has given the federal farm board and all the institutions great trouble. Insurmountable difficulties seem to have arisen. In varying numbers they form the problem at every state agricultural college and school, and they constitute from 25 to as high as 50 per cent of the men approved for agricultural training.

This large percentage is due to the fact that these men for the most part are from isolated country districts where the opportunities have not been so great for early education.

Farmer parents have been unwilling to allow the boys more than a very ordinary education, for fear of losing them from the farm. Many have had no opportunity. Such are usually older men, 15 or 20 years past country school age. Many of the men are therefore practically illiterate, and to this number must be added the foreign illiterates; that is, foreigners who are illiterate from the English standpoint.

These difficulties constitute a real problem to the federal board and the institutions to which these men are sent. State institutions are not always prepared to do the elementary work necessary to advance the men to a knowledge of English and mathematics where they can receive and be benefited by the agricultural training.

However, without exception, the state institutions are convinced it is their patriotic duty to assist the federal board in making preparation to extend the necessary prevocational training, and have changed wonderfully in favor of training disabled men in spite of their educational handicaps.

Forms a "Guidance School."

Dr. Walter J. Quick, training officer, worked out an elementary school, which he termed a "guidance school," where such men were collected and instructed in the elementary common branches and in elementary agriculture. The school has been made prerequisite to certain courses that Dr. Quick has designed as agricultural unit courses. They are divided into units of one month each, cover one year continuously from month to month and may be entered any month.

A man may take one or several unit courses, one as a major and others as minors related to the major, while at the same time he continues in the common branches of the guidance school.

Nearly all the state institutions will allow the men credits for the work done in the unit agricultural courses, which now include a two-year course, as well as the one-year.

These plans of the guidance school and agricultural unit courses were reduced to definite form and mimeographed for the benefit of all institutions offering agricultural training to the disabled class.

Pastor May Protect His Flock.

Lexington, Ky.—Although evidence was introduced to show that Andrew Sear, minister, warned moonshiners of the approach of revenue officers, Sears was freed in the federal court, but his brother, Belia, paid a fine of $50 for the same offense. The court held that a minister had a right to warn a member of his flock of danger, if no criminal intent was implied.

The Perils of Cherry Picking.

Lawrenceburg, Ind.—The buzzing of a honey bee about his head resulted in serious injury to Anthony Steinmetz, aged 64, a retired farmer. Steinmetz was picking cherries, standing on a stepladder, when the bee resented his presence. While trying to fight the bee off his nose, Steinmetz fell twelve feet. His injuries consist of a cut head, both wrists broken and three ribs fractured.

Would Restore Mexican Mints

Association of Mine Owners Claims the Country Needs "Hard Money."

UNLIMITED SILVER COINAGE

Expert Says If Old-Time Minting Plan Is Re-established Mexico Will Coin 500,000,000 Ounces of Silver.

Nogales, Ariz.—The chamber of commerce has joined with Charles Butters, mining expert of New York and San Francisco, to promote the formation in Mexico of an association of silver producers to rebuild the abandoned mints throughout the nation and thus bring about once more the free and unlimited coinage of silver.

Mr. Butters states that if the old-time minting plan is re-established it will mean that Mexico will coin 500,000,000 ounces of silver.

The mining expert has extensive interests in mines in Mexico, Salvador and Nicaragua, and is known for his introduction of the cyanide reduction process into Mexico. He says the greatest need of Mexico today is small change and "hard money."

Too Much Paper Money.

The revolutions and the world war, says Mr, Butters, have stripped Mexico bare of silver coins. In its place, he says, is a vast quantity of paper money issued by the varying governments as fiat money. He blames the great flood of paper money in Mexico for most of the suffering in that nation in connection with the various revolutions.

His plan, backed by the Nogales chamber of commece, is to have the old mints rebuilt and placed in operation by the association of silver mine interests at the cost of the association. Then the cost of the renewed mints would be recovered by the association from the mint profits over the course of years. Upon the paying out of the capital charge in restoring the mints they are to be returned to the Mexican federal government as its property, to be thereafter operated under supervision of the federal government.

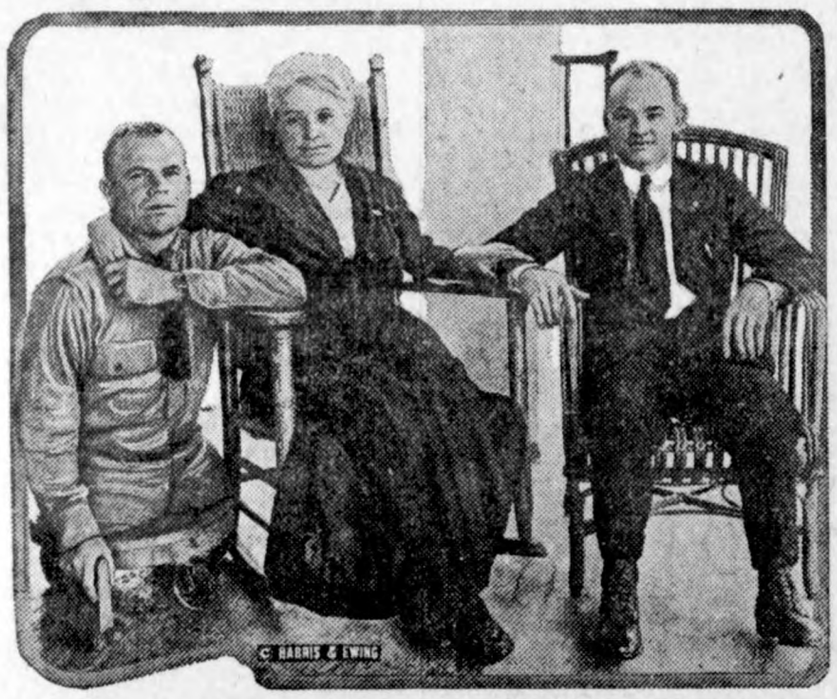
Benefits Are Threefold.

This system, according to the silver mine expert, has threefold benefits: First, it will at once restore to Mexico the "hard money" and small change needed by merchants, banks and business men and now lacking; second, it will provide a permanent primary market at home for large amounts of silver production; third, it will stabilize the silver market because the Mexican home requirements will take up a great quantity of silver now exported and sold on a speculation market through San Francisco for the Orient. Also this will serve to stimulate silver production because of the better market conditions and thus raise the primary market price for the semiprecious metal.

President Bracey Curtis of the chamber of commerce has named a committee of prominent men to take up the mint proposal with Gen. Alvaro Obregon on his impending visit to his home in Nogales, Sonora, this month.

Meanwhile the proposition will be submitted by the Nogales chamber of commerce to the civic bodies of all other border cities and the officials of border states.

French Nurse Visits Former Patients



Madame Henri Raquin, who nursed for four years in the French base hospital and for one year in the American base hospital near Bois, has come to America to visit the boys she attended in her own country. Here are two of her patients at Walter Reed hospital, Washington, whom she never expected to see again when they left France, both double amputation cases. Corporal Adolphus McKenzie, on the right, has two artificial legs which serve him well, but Lieut. Robert S. Fletcher has no stumps to which legs can be attached. Army surgeons are still wrestling with the problem of constructing a special basket for him.

FEAR IMPURE WATER

Supply of Many Cities in United States Menaced.

Impossibility of Getting Necessary Purifying Chemicals Alarms Federal Health Officers.

Washington, D. C.—The water supply of more than 30,000,000 city residents is in imminent danger of becoming disease infected, because of the impossibility of obtaining the necessary purifying chemicals, the public health service announced.

Emergency appeals have been received by the service from ten state and numerous city boards of health. It was said, for railroad priority on the movement of alum and chlorine, the chemicals largely used in ridding water of dangerous disease germs. Due to the congested traffic situation, the announcement said, an acute shortage of these chemicals has existed for several months, and at one of the largest chemical plants only eight cars of raw material for the manufacture of alum are being received a month, although 120 cars monthly are required.

"Officers of the United States public health service view the situation with alarm, as do health officers throughout the country," said Surgeon General Cumming. "The summer is always a critical time in dealing with water-borne diseases, for the demands on municipal water systems are then so great that usually every available source of water has to be utilized."

No Rent for a Year.

Pontageville, N. Y.—Here's a chance for some couple about to be married to drive all their prospective rent troubles away. Father Albert F. Rivers, pastor of the Church of the Assumption, announced that because a marriage has not been performed in his parish for four years, he will marry the first couple wishing to enter the matrimonial state, free of charge, provide an elaborate reception and will pay one year's rental for any available residence here, selected by the couple.

Flyer With Summons Overhauls Fast Train

Denver, Colo.—Harry G. Saunders, attorney, chased a Union Pacific train in an airplane to serve a summons on J. D. Bird, who Saunders says, was fleeing jurisdiction of the Denver courts.

Learning that Bird was to leave the state, he hurried to the Union station, but missed the train. In a friend's airplane he chased the train, speeding 120 miles an hour. They reached Hudson ahead of the train and served the summons.

FIVE MEN KILLED IN DENVER RIOTS

Streets Car Strikers and Sympathizers Engage in Orgy of Terrorism

NEARLY FIFTY PERSONS HURT

Plant of Denver Post Badly Wrecked —City Placed Under Martial Law With Funston Troops On Guard—Strike Ended.

Denver, Colo.—Denver has been placed under martial law following a series of riots by striking street carmen in which five men were killed, forty-seven injured, the plant of the Denver Post partially wrecked, a half dozen or more street cars demolished and thousands of dollars of other property destroyed. The reign of terror accompanying the disorders in the downtown district and at the several car barns was unequaled in the history of the city.

The first serious disorders attending the trolley car strike, which had been in progress for more than a week, occurred when two cars manned by strike-breakers, were forced to stop by a motor truck on the track. While the cars were halted a crowd of over 5,000 strikers and sympathizers quickly gathered and fighting immediately became general.

The first two cars stopped were badly damaged, windows broken, interiors wrecked and holes torn in roofs, but they were able to proceed to the barns under their own power. A third car was attacked near the downtown barns of the company and two others were turned on their sides in front of the Cathedral of the Immaculate Conception.

The mob systematically wrecked eight street cars, showered strike-breakers with bricks, stones and clubs, and fought desperately as they boarded stalled cars, driving off the armed strikebreakers and demolished the cars.

At Colfax avenue and Logan street, rioters pursued a car, halted it and dragged its armed crew to the street. The din of the fight could be heard several blocks as the terrified strike-breakers were clubbed.

Men imported from other cities under the leadership of "Black Jack" Jerome, noted strikebreaker, fled for protection to the Cathedral of the Immaculate Conception nearby, with the mob in pursuit. As the fugitives fled through the doors of the church priests stopped the rush of rioters, telling them the men would be protected.

One mob wrecked the business office of the Denver Post, which has been vigorously opposing the strikers. Police dispersed the mob. Water was poured on the presses, which were damaged also with hammers. The engraving room was wrecked, also. A virtual reign of terror prevailed as a mob of strikers and strike sympathizers roamed the downtown district, wrecking street cars and firing car barns. Shortly after the arrival of troops from Camp Funston, dispatched here to restore order, the strike was called off by the executive committee of the Tramway Men's union.

NOTED AVIATOR KILLED.

Lieutenant Locklear and Aide Fall to Death at Los Angeles.

Los Angeles, Cal.—Lieut. Omer Locklear, noted "stunt" aviator, and Lieut. Milton Elliott, his aide, were killed when their plane crashed to the earth from a distance of 1,000 feet here.

Locklear was engaged with Lieutenant Elliott in performing a feat for a moving picture concern. At a distance of 1,000 feet in the air he was given a signal by the motion picture director and started into a nose dive. A battery of searchlights were playing on the machine and fireworks were being set off from the plane by Lieut. Elliott. When he had dropped to within 200 feet of the earth, Locklear was seen to attempt to straighten his plane out. He was too low, however, and crashed to the earth. Both aviators were instantly killed.

Locklear was credited with being the first aviator to leap from one airplane to another while in flight.

Reds Sent to Prison.

Chicago, Ill.—William Bross Lloyd, millionaire socialist and nineteen other members of the communist labor party, were found guilty by a jury of conspiracy to overthrow the United States government. The defendants were given various sentences, most of them getting from one to five years in the penitentiary, a few being given fines in addition, and several were sentenced to one year in jail. Lloyd got the heaviest sentence, one to five years in the penitentiary and a fine of $2,000.

Seeks Divorce From Chaplin.

Los Angeles, Cal.—Mildred Harris Chaplin has filed suit here for divorce from Charlie Chaplin. Mrs. Chaplin married the motion picture comedian, on October 23, 1918, but the marriage was kept secret four months, she asserts in her complaint, on plea of Chaplin that announcement of the marriage would interfere with his professional career. Mrs. Chaplin asks that Chaplin be restrained from disposing of pictures he is making, said to be worth $75,000, pending adjudication of the suit.

statistical experts.

This figure is based on the rule laid down by Walter D. Hines, former director general of railroads, that to add 5 cents to the freight rate means an addition of 25 cents to the cost of the commodities which must move by freight.

Multiplying the estimated additional revenue by five and making a deduction for passenger traffic, it is figured that the per capita cost of the increases will be close to $73 per year. On the basis of the average family of five persons the cost of each family would be $365 per year, or $1 per day.

The basis for Mr. Hines' theory that freight increases may be multiplied by five to compute the effect on the cost of living is that severa' freight movements are involved in each manufactured article.

ILLINOIS TOWN FIRED.

Mob Terrorizes Populace of West Frankfort.—Five Reported Killed.

St. Louis, Mo.—Five men are reported to have been killed, many injured and several homes of foreign residents fired in West Frankfort, Ill., 104 miles south of St. Louis, by a mob bent on avenging the murder of Amiel Calcaterra, 19 years old, and Tony Hempel, 18, both of West Frankfort, whose bodies were found near here.

All deaths resulted from beatings administered by the mob, which, according to reports, drove the foreign population of West Frankfort out of the town.

Tennessee to Act On Suffrage.

Nashville, Tenn.—Governor Roberts of Tennessee announced that he would issue a formal call for a special session of the Tennessee general assembly and that the call would recommend that the legislators consider ratification of the woman suffrage amendment to the federal constitution. A single state, by ratifying the amendment, can make it effective in allowing women voting privilege in the 1920 presidential election in all states.

Drive to Stampede People.

Washington, D. C.—Howard E. Figg, special assistant to the attorney general in the enforcement of the Lever law against profiteering, charged that manufacturers and jobbers of wearing apparel were attempting through carefully prepared propaganda "to stampede retailers and the public into a renewed fictitious demand" for clothing and thereby force prices higher. "The department of justice," said Mr. Figg, "is fully advised of the several phases of this carefully planned campaign.

ASTURING HOGS MOST ESSENTIAL

teresting and Instructive Experiments Made With Sows at Illinois Station.

ZE OF LITTER INCREASED

pular Belief Substantiated That oung Mothers Produce Smaller Pigs—Variation in Length of Germination Period.

A careful study of records relating the birth of 720 litters of pigs at University of Illinois reveals many lights for those interested in hog sing. The 720 litters contained 0 pigs of seven distinct breeds. e following conclusions are drawn bulletin No. 226 of the University Illinois agricultural experiment sta-

On the whole, the belief that young s produce smaller pigs than do er sows is substantiated. Likewise data substantiated popular belief t up to a certain age, about three rs, there is an increase in the e of litter as sows grow older. The older sows farrowed 12.3 per t of dead or immature pigs as comred to 8.1 per cent by the younger ws.

t is doubtful whether there are any iations in farrow attributable to season at which pigs are farrowed.

Increase in Litter.

n succeeding litters from the same there was an increase in number pigs per litter and in the weight of ividual pigs until the fourth litter, which time the sows were threed one-half years old.

The records obtained from 549 litrs showed a wide range, 98 to 124 s, in the length of gestation period, h an average of 114.58 days. How-r, 93.6 per cent of the litters were

rmers Should Be Careful That Pig Pens Are Clean and Dry.

rowed between the one hundred d eleventh and one hundred and enteenth days. The general belief t old sows have a gestation period e to three days longer than young sows seems to have no very good sis.

Neither Sex Predominates.

There was little, if any, correlation tween the length of gestation period d the birth weight of pigs, and the of pigs in relation to the length gestation shows no tendency for her sex to predominate more than rmal.

The average size of litters was 8.1 s. The average weight of a litter s about 20 pounds. The average ght of pigs in litters with fewer s than the average was 2.67 pounds, t in litters with more pigs it was 7 pounds. The grand average of pigs was 2.55 pounds.

ROVIDE GOOD GREEN FEED

ccupied Space in Garden Should Be Seeded to Rapid Growing Crop of Some Kind.

The average poultry keeper is alys short of succulent green feed ring the late summer and early fall, provision should be made for a pply. Every bit of ground in the den from which early crops have n harvested should be seeded to rd, rape, lettuce, kale or whatever es the most rapid growth in your ality.

FALFA AND SWEET CLOVER

o Crops Are First Cousins But Decidedly Different in Making Their Growths.

ut alfalfa when the buds of the ond growth begin to show at the wns of the plants. Cut sweet clover en the blossoms are about half out raise the sickle bar at least four hes. These two crops are first cous but they are decidedly different this respect: Alfalfa shoots from a wn; sweet clover shoots from buds the main stem.

USE OF OVERGROWN WINGS

ult From Defective Brooding Conditions or Lack of Vitality—Clip Them Off.

AUTUMN IS CLEARING TIME FOR FARM LAND

Convert All Waste Places Into Revenue Producers.

Goats, Sheep or Cattle Are Favored in Order Named for Keeping Down Sprout Growth—Methods for Removing Stumps.

The fair-weather days of the autumn afford the farmer an opportunity to undertake the clearing of land for which he has no time in the busy summer months, and which can not be done while the land is wet in the spring. On thousands of farms there are cut-over tracts which should be converted into revenue producers as soon as possible. If the owner decides that the land in question is better suited to crop production than to forest growth, a careful study of the most economical method of removing stumps and small growth should be made. Most cut-over land passes through three stages before reaching its greatest agricultural value. The waste and small growth is disposed of first, then it is allowed to remain in stumps for a few seasons, until the smaller stumps are dead and decayed, during which time it is used for pasture or may be cultivated. Finally, all the stumps are removed.

Generally it is best to cut brush as close as possible to the ground and avoid leaving sharp points that might injure stock. However, if the wood is of no value and the ground is not to be cultivated before the stumps are removed, it may be best to cut the trees rather high above the ground. If the stumps are left three feet high there will be less sprouting than if cut low down, and such stumps are more easily pulled.

The most successful method of keeping down sprout growth is by heavy pasturing by goats, sheep, or cattle, in the order named. Any sprouts not killed by pasturing should be cut or knocked off with the head of an ax.

There are a great variety of methods used in removing stumps, by means of burning, pullers and dynamite. Farmers' Bulletin 974, "Clearing Land," prepared by the United States department of agriculture, contains information designed especially for persons interested in this subject. A copy can be had on request.

PREPARE LAND FOR ALFALFA

One of the Best Ways to Get Moisture and Well-Packed Soil Is by Disking and Rolling.

Fall seeding of alfalfa requires moisture and a soil which is well packed. One of the best ways of getting such a condition is to disk the ground as soon as oats or small grain is taken off, then plow it and pack it thoroughly by harrowing it or rolling. Soil which has been in a cultivated crop and removed early, such as early potatoes, makes good ground for fall seeding. On ground of this kind a thorough disking and harrowing will often put it in good shape for alfalfa. On many of our types of soil alfalfa will do better if limestone is applied. This limestone should be applied after the ground has been plowed and then harrowed in to give best results.

SWINE FOR WINTER MARKETS

Temptation to Fatten Quickly on Corn Alone Is Liable to Cause Loss of Animals.

Hogs for the early winter markets should be carefully fed. The temptation to fatten quickly on corn alone is liable to cause the careless farmer the loss of one or more animals. A better and a safer feed is wheat middlings and wheat bran made into a thick slop. Give a feed of this just what the hogs will eat up clean twice a day, then give a moderate feed of corn.

Keep a plentiful supply of fresh, clean water in the pens. See that the trough is clean. Have clean, dry pens and yards. Dust the pens once a week with air-slacked lime.

POTATO DISEASE EXPLAINED

So-Called Blight Due to Tip-Burn or Small Insect Known as the Leaf-Hopper.

Much of the so-called potato blight which is to be found is due to what is really tip-burn, or it may be due to a small insect known as the leaf-hopper. The tip-burn is caused by the dry weather and extreme heat as the sun and wind draw the water from the plant faster than the roots can supply it from the ground. The leaf-hopper is a small, greenish-like insect, which will be found jumping from one plant to another as the plants are moved.

BORER EATS CLOVER ROOTS

Here are three life stages of one of the worst clover pests, the root borer. The root borer will attack peas as well as clover. The larvae and the beetles of the borer literally riddle the roots of the clover plant. The borer may be the trouble with that sickly, "spotty" clover patch of yours. Do a little investigating.

EFFICIENT HANDLING METHODS ADD TO VALUE OF APPLE CROP

To Produce a Tight Pack the Barrel Must Be Rocked Back and Forth.

More efficient handling of apples than frequently is the case in regions where the crop is barreled will permit the growers to realize a greater return for their labor, will reduce the waste that comes in careless handling and will bring a better product to the consumer, according to recommendations of the United States department of agriculture. The apples grown in a great majority of the states are shipped in barrels.

A large amount of barreled fruit reaching the market each season is seriously impaired in quality by being picked at the wrong stage of maturity, either too early or too late. The grower must realize that fruit is not ready to be picked when it clings to the spurs so tightly that the spurs are pulled out or broken. Furthermore, the color of fruit which eventually turns red is not always a reliable index, because of differences in prevailing weather in different seasons. Whether or not the red color develops normally, a reliable indication of maturity is a ground color which, when the fruit is ready for picking, should be turning from clear green to a whitish or greenish yellow. Yellow, green, and russet varieties of apples are generally ready to pick when they have attained the proper size and the stems separate readily from the spurs.

Picking Utensils Used.

Apple growers use a variety of picking utensils, some of which are given special approval. It is generally advantageous in removing the crop, to use both sacks and round half-bushel baskets, as the latter are especially convenient for gathering fruit near the ground, while the sacks can be used best when the picker stands upright. In using sacks, special care must be taken to avoid bruising the fruit. In emptying either the basket or the sack, the apples must not be dropped. If a basket is used, it should be lowered to the bottom of the lug box or other receptacle and inverted gently. One type of sack is constructed with a drop bottom, so that the fruit can be emptied without bruising.

Efficiency in picking depends considerably on the use of ladders of the proper type. Several varieties are commonly employed. Stepladders are especially satisfactory when working in small trees and when picking from the lower branches of larger trees.

Where the crop is packed over tables that are moved about the orchard, the fruit is usually carried in the picking utensil to the packing table. While this is commonly done by the pickers, such a practice should be avoided. Certain members of the crew should be assigned as carriers and they should also furnish the pickers with empty receptacles.

In small orchards, when weather is favorable, apples are usually packed in the open, portable equipment being used; but in large orchards and in sections where the weather is generally unfavorable, the fruit is often packed in central houses, tents, or sheds. The use of packing houses has largely increased in recent years, and is regarded as a favorable development in the apple-raising industry. These houses are to be found in both large and small orchards. They afford shelter for the accumulation of unpacked fruit, which can be handled further without interruption due to unfavorable weather. They also prevent damage to equipment and packages because of rain or snow. Where there is adequate shelter there is a better opportunity for installing sizing machinery and other labor-saving devices. In small orchards, when climatic conditions are especially favorable, it may be advisable to pack in the orchards, but in most instances some sort of shelter will insure better results.

Types of Sorting Tables.

The apron table and the canvas or burlap sorting table are used almost exclusively where the fruit is graded in the orchard and they are also used to a large extent in packing houses. The apron table, or a variation of this type, is commonly employed and has a bed which is slatted so that the trash falls through. Being inclined, the fruit as it is graded rolls to the lower end, where on opening a stop or drop it is lowered by means of an apron into the barrel. While work can be done rather rapidly with this table it is not altogether satisfactory, as the fruit frequently crowds past the sorters, encouraging carelessness. The second type of grading table is made with a piece of canvas or burlap stretched over a rectangular frame, and is not fitted for running the fruit from the apron into the barrel. The apples must be sorted by hand into baskets in which they are lowered into barrels.

Sizing Machines Much Used.

At present sizing machines are being used quite extensively for barrel packing in all sections to meet the demand for apples of uniform size. In making a selection the apple grower must determine which machine has a capacity proportionate to the size of his orchard and can be operated economically. The apple grower raising any considerable quantity of fruit should give careful attention to the advantages of mechanical conveyors, which save a great amount of labor both in handling loose fruit and light packages.

Not a little importance is to be attached to the method of packing the barrel. Because the trade customarily demands an attractive pack, the better colored apples of uniform size may be placed in the face, but the packer should remember that the general quality and size should conform to the grade in the rest of the barrel.

CANNING IMPLEMENTS NEED NOT BE COSTLY

Few Simple Kitchen Utensils Will Be Satisfactory.

False Bottom Must Be Arranged In Boiler to Prevent Jars Coming In Contact With Metal—Several Types of Canners.

Expensive equipment is unnecessary for canning, the United States department of agriculture specialists say. A washboiler, lard can, or any container with a tightly fitting cover large enough to hold a number of packed jars, and a few other simple utensils generally found in the ordinary kitchen, will do the work. When such equipment is used, a false bottom must be placed in the boiler or other container to prevent the jars from touching the metal. A rack made of strips of wood is probably best for the purpose. The processing or boiling of the jars in the container may be done on the kitchen stove or on a furnace built out of doors.

Several types of canners, by which the work can be done more easily than with a homemade outfit, are on the market. The hot-water bath canner is the least expensive commercial type. There are two kinds, one, which may be placed on the kitchen stove, and another, which has a firebox and pipe attached for use out of doors. Each has a sterilizing vat, lifting trays, tongs for handling hot jars, false bottoms and tools necessary in sealing tin cans. Tin cans or glass jars may be used with any outfit.

There are also steam-pressure outfits for home use. They develop a higher temperature than the water-bath canners mentioned. Steam-pressure outfits are made to carry from 5 to 30 pounds of steam pressure and are regulated easily.

FOOD-PRODUCT INSPECTIONS

During Month of May 2,028 Cars of Fruit and Vegetables Were Carefully Examined.

In May 2,028 cars of fruit and vegetables were inspected by representatives of the bureau of markets. United States department of agriculture, located at 22 large marketing centers. This is nearly double the number of inspections made in May, 1919, at the same points.

The object of the food products inspection service is to establish an unbiased basis for the adjustment of differences among growers, shippers, wholesalers, and transportation companies, in connection with the quality and condition of fruits and vegetables moving in interstate commerce.

In addition to the general inspections in May, 202 inspections, comprising 1,693,169 pounds of fruits and vegetables, were made of shipments intended for the United States navy supply at New York. On account of unsatisfactory quality or condition, 144,641 pounds of the produce were rejected.

GENERAL FARM NOTES

Co-operation is winning on merit.

* * *

Let's grow a larger acreage of the legumes.

* * *

Celery must have abundance of moisture for best results.

* * *

Lights for driving the tractor at night are sold by accessory dealers.

* * *

Cauliflowers do not succeed well in dry weather, hence the importance of keeping the plants well cultivated.

DAIRY FACTS

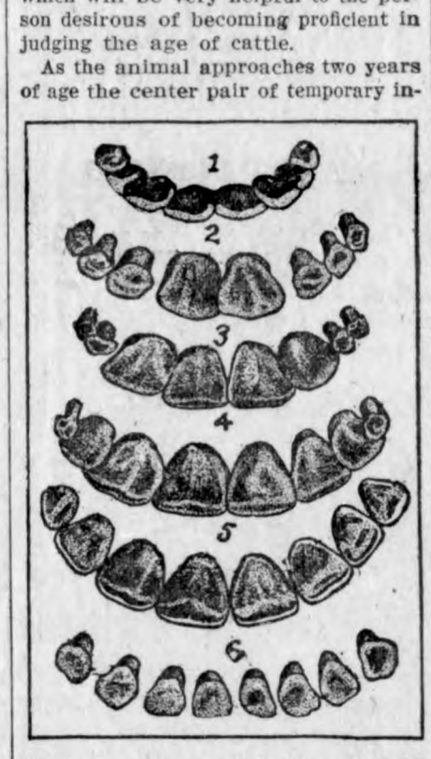
AGE OF CATTLE DETERMINED

Each Year Leaves Its Mark on Grinders of Animal, Gradually Wearing to Stubs.

The age of cattle can be approximated closely by the appearance, development and subsequent wear of their second incisor teeth, according to Farmers' Bulletin 1066 just issued by the United States department of agriculture.

Cattle have eight incisor teeth, all in the lower jaw. In the calf at birth two or more of the temporary or first incisor teeth are present. With the first month the entire eight incisors have appeared. Each of the six stages in the development of the teeth is shown in the bulletin by illustrations which will be very helpful to the person desirous of becoming proficient in judging the age of cattle.

As the animal approaches two years of age the center pair of temporary in-



(1) Internal Face of Incisors of Calf. (2) At Two Years. (3) At Three Years. (4) At Four Years. (5) At Five Years. (6) At Twelve Years.

cisor teeth or pinchers are replaced by the permanent pinchers, which at two years attain full development.

At from two and one-half to three years the permanent first intermediates are cut and are usually fully developed at three years.

At three and one-half years the second intermediates or laterals are cut. They are on a level with the first intermediates and begin to wear at four years.

At four and one-half to five years the corner teeth are replaced, the animal at five years having the full complement of incisors with the corners fully developed.

At five to six years there is a leveling of the permanent pinchers, the pinchers usually being leveled at six and both pairs of intermediates partially leveled and the corner incisors showing wear.

From seven to eight the pinchers are noticeably worn; from eight to nine the middle pairs; and by ten years the corner teeth.

After six years the arch gradually loses its rounded contour and becomes nearly straight by the twelfth year. In the meantime the teeth have become triangular in shape, distinctly separated, and show the progressive wearing to stubs.

NEGLECT BUTTERFAT TESTS

Operation Is Comparatively Simple Where Proper Facilities Are Available.

Many dairymen maintain milk record sheets continuously and well, but they fall short on doing the dairying sleuth work up brown, in that they neglect to make frequent and regular butterfat tests of their milk.

This chemical operation is relatively simple where the proper facilities are available and every farmer with a little practice will be able to get accurate and dependable results from its use. A simple, handpower Babcock test outfit is inexpensive and will pay for itself in a few months in the increased efficiency which attends its use.

DAIRY NOTES

Love for your work is the key to your success. Learn to love your cows.

* * *

The season of the fly pests, which make life miserable for stock during the summer, is on.

* * *

If it pays to raise calves at all it pays to feed and care for them from the day they are born.

* * *

Each calf should be fed separately, carefully regulating the amount of milk by the size of the calf.

* * *

Do not mix new, warm cream with cold cream until it has been cooled in the shotgun can provided for this purpose.

* * *

Use a metallic strainer. It is practically impossible to keep cloth strainers sweet and clean and free from bacteria.

POULTRY CACKLES

MAKE SURE EGGS ARE FRESH

Method Generally Employed by Commission Houses for Purpose Is Known as "Candling."

When supplying a fancy trade with eggs, or on receiving eggs from outside sources, it is often desirable to determine their freshness. The method generally used by commission merchants for this purpose is known as "candling," and consists in holding the egg between the eye and a light so as to note the contents. This should be done in a darkened room, using one of the egg testers on the market or simple home-made tester.

The air space in a perfectly fresh egg is very small, and as the egg loses part of its contents by evaporation this air space increases in size with the age of the egg. Fresh eggs should appear clear and bright, showing no dark spots. Those accustomed to "candling" soon learn to detect stale eggs with a good degree of accuracy and rapidity.

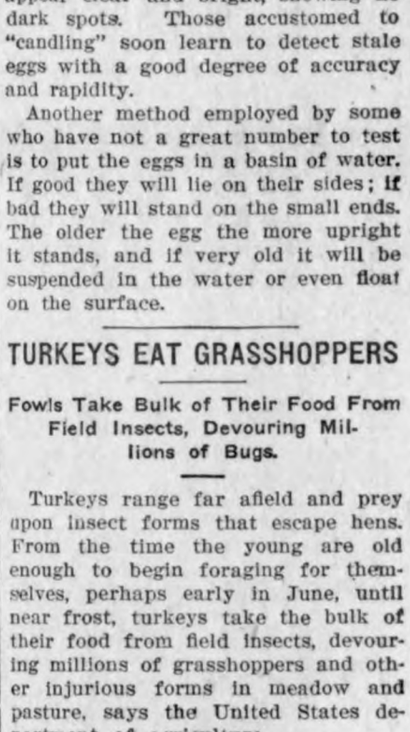
Another method employed by some who have not a great number to test is to put the eggs in a basin of water. If good they will lie on their sides; if bad they will stand on the small ends. The older the egg the more upright it stands, and if very old it will be suspended in the water or even float on the surface.

TURKEYS EAT GRASSHOPPERS

Fowls Take Bulk of Their Food From Field Insects, Devouring Millions of Bugs.

Turkeys range far afield and prey upon insect forms that escape hens. From the time the young are old enough to begin foraging for themselves, perhaps early in June, until near frost, turkeys take the bulk of their food from field insects, devouring millions of grasshoppers and other injurious forms in meadow and pasture, says the United States department of agriculture.

In regions where wooded areas are still fairly extensive mast is an important item in the diet of the turkey. When the insect stores begin to fail,



Turkeys Must Have Free Range to Thrive.

the mast larders are beginning to be filled. Feeding on acorns, chestnuts, beechnuts, and the like, turkeys will go a long way toward fattening themselves for the Thanksgiving or Christmas market and will not require much feeding of corn or other grain to finish them. Generally speaking, turkeys will require a larger feeding of grain than chickens to fit them for market, but, as they utilize forms of waste that hens and their broods would not reach, the keeping of a fair number of turkeys is good economy.

BEST BROILERS FOR MARKET

Squabs Should Weigh When Dressed From Three-Fourths to One Pound Each.

The market demand is for broilers of three sizes: Squab broilers weighing, when dressed, from three-fourths to one pound each; small broilers weighing from one to one and one-fourth pounds each, and large broilers weighing from one and one-half to two pounds each.

At the age of six months the increased weight is slight and the quality poor. As the age of the cockerel increases above 12 weeks the quality decreases materially.

POULTRY NOTES

Mites help to keep cost of eggs high.

* * *

There is no room for poor birds on the farm.

* * *

Heat is the great enemy of eggs, both fertile and infertile.

* * *

Of the infectious diseases of turkeys, blackhead is the most destructive.

* * *

Mites multiply more rapidly in warm weather, so that war should be made on them now.

* * *

Be sure that the early hatched pullets on which you are depending for winter eggs are making steady growth.

* * *

When we consider the fact that the cock is the sire of so many birds we may be impressed with the importance of a good male bird.

Men's Work Clothes

FOR clothes that will stand the hardest wear—the common sense kind that are good honest quality all through—give us a trial.

Our line of overalls and work shirts is giving exceptionally good satisfaction this season and our prices are very reasonable.

We Can Supply All Your Needs

To accommodate our many good customers, we are now carrying an unusually large and varied stock comprising practically everything you are likely to want. Before going elsewhere, see us first and get our prices.

GAVE FIRST MINSTREL SHOW

Ned Christy the Originator of the Long-Popular Entertainment. Conceded to Have Been

That the now popular minstrel show is an institution of American conception is to be assumed, for the negro as a character is, of course, the product of America exclusively. But that the impersonations which have sung and laughed their way to popularity all over the world were the outgrowth of a man's sentimental fancy, years before the civil war, is not generally known. nor the peculiar circumstances of its beginning.

For years Ned Christy, later world famous as the originator of the minstel entertainment, nursed a heartfelt desire to portray to the North the life of the southern darkies, their plaintive songs and dances that had been handed down through the generations of negroes in America.

In the spring of 1842 at a hotel in Buffalo he suddenly proposed to the proprietor of the establishment that he give some darky impersonations for the entertainment of the other guests. He had come unprepared, but with the assistance of the proprietor's son and another young man, some burnt cork and a banjo, violin, tambourine and bones, he gave his darky show. It met with so much favor at the hotel that he repeated the performance once or twice every day for several months.

That summer he received his first theatrical offer, which was speedily followed by national and international fame for the novel entertainment that was an exact representation of the most important institution of our great South.—Chicago Journal.

A Promising Outlook.

"I seed the start of what looked like it was going to be a right lively fuss over at Tumlinville yesterday," related Gap Johnson of Rumpus Ridge. "A couple of fellers jumped onto another feller, for something or nuther, I reckon, although I didn't learn what, and went to mauling him right sharp. Then another feller jumped in, to make it even. About that time the sheriff came a-running and started to pull 'em apart, and all four lit in on him. He deputized a passel of fellers that were standing around, and they sorter took hold, and another bunch of fellers that came up 'peared to figger that the process was too one sided, and so they tore in, too. About that time it begun to rain, and they all adjourned to the porch of the Tete Fair store and went to talking horse swap and politics. But for a spell I shore reckoned I was going to see something of a fight."—Kansas City Star.

Must Be a Fine School.

The six-year-old granddaughter of Judge D. W. Henry of Terre Haute had started to school in the training school of the Indiana state normal. William C. Ball, who lives across the street from the little girl, is trustee for the Indiana state normal and a great friend of the little girl. One morning, when her mother was taking her to school, she noticed Mr. Ball going up the steps to the main building. Looking up at her mother she said, "Gee, this must be a fine school if Mr. Ball goes to school here."—Indianapolis News.

Kept His Word.

"I suppose it serves me right," said Uncle Bill Bottletop, "for tryin' to do business with Si Simlin!"

"Si's a slicker, all right," replied Jud Tunkins.

"He is. He told me yesterday mornin' that for $20 he'd leave somethin' with a sure enough kick in it on my back porch. So I gave him the twenty, an' last night I found his mule that he's been tryin' to get rid of for twelve years tied to the kitchen doorknob."

Charitable.

Mrs. Flatbush—So your husband went to church with you?

Mrs. Bensonhurst—Yes, he did.

"What was the minister's sermon about?"

"Charity toward all."

"And did your husband derive any benefit from the discourse?"

"Well, I'll say he did, for when the preacher asked him what he thought of the sermon my husband refrained from replying."

Wanted His Place.

A young man who is painfully bashful called upon my niece who was visiting us. Our little grandson is very fond of attention and climbed upon the young man's knee, seated himself and began to chatter. He was called, and as he ran from the room he looked back and said: "Don't let any one get my place."—Exchange.

Limited Wardrobe.

Bix—Isn't it annoying when you leave your keys in the pocket of your other suit?

Dix—Don't know. I have never left my keys in my pajamas.—Boston Transcript.

A Handicap Race.

The Sire—You loaf too much. If you hustle prosperity will be sure to follow.

The Son—But I don't want prosperity trailin' after me all the time. I'm givin' it a chance to catch up.

Forced Honesty.

Dick—I picked up a quarter today and gave it to the owner.

Father—That's a good, honest boy.

Dick—Yes. I couldn't help it. The man that dropped it had me by the ear.

Soothing Cigar Has Been Overtaken and Passed by Popular Little Cigarette

Cigar types of tobacco are produced in New England, New York, Pennsylvania, the Miami valley in Ohio, Wisconsin, Georgia and Florida. Of the entire tobacco crop of 1,389,000,000 pounds in 1919, the cigar types constituted about one-sixth, and the chewing, smoking, snuff and export types most of the remainder, according to the bureau of crop estimates, United States department of agriculture. The cigar types are heavy producers per acre, the average for 1919 being 1,265 pounds, while the other types had an average of 679 pounds.

Before 1919, the average farm price of the cigar types of tobacco was always above that of the other types, as a whole, but in that year the extraordinary demand for tobacco other than the cigar classes and the immensely increased use of tobacco for cigarettes raised the average farm price of the composite chewing, smoking, snuff and export types to 41.3 cents on December 1, or greatly above the price of 21.9 cents for cigar tobacco. Indeed, the latter class of tobacco had a lower price than in either 1918 or 1917, not because of increase of production, but because of weaker demand. The cigar has been overtaken and passed by the cigarette.

BACK-YARD PULLETS MAKE GOOD RECORD

Chickens which lay so prolifically that they pay in a short time for their original cost and their feed are the kind of which all suburbanites dream. S. B. Horton of Washington, D. C., has them in his back yard.

On May 1, 1919, Mr. Horton bought 15 two-day-old White Leghorn chicks. The baby chicks were brooded with jars filled with hot water until they were old enough to be put in an outside coop. Later a six by eight-foot house was built for them, with an outside yard only four feet square.

Seven of these were pullets which began laying on October 22, when they were less than six months old. Their laying record for November was 115 eggs, and for December 137 eggs, a total of 252 eggs for the two months, or an average of 36 eggs a pullet for the two-month period. In all probability they would have made a record of 150 eggs in December but for the cold wave during the latter part of the month.

Crediting the birds with eggs at the market price of 90 cents a dozen (they were $1 part of the time) for the period, they had paid for their original cost and all feed by December 15. In figuring the total cost of the project, the cost of the seven other chicks raised, which were cockerels, was figured, and allowance was made for their market value when slaughtered. From now on the upkeep of this flock will be small compared with the revenue.

The pullets were fed scratch feed morning and night, with a dry mash made of equal parts of middlings, bran, cornmeal, and meat scrap, before them all the time. This ration is one used and advocated by the United States department of agriculture. Nearly every day they were given a little green stuff, such as cabbage or sprouted oats, as well as table scraps and grit and oyster shell.

Death Rate for 1918 Was Highest in History of the Country, Statistics Show

The death rate of 18 for each 1,000 of population in the death registration area of 30 states and 27 cities, with a total estimated population of 81,868,104 for 1918 was the highest on record, according to the census bureau's annual mortality statistics, which show 1,471,367 deaths for the year.

Of the total deaths, 477,467, or more than 32 per cent, were due to influenza and pneumonia, 380,996 having occurred in the last four months of the year when an epidemic of these diseases prevailed. The rate for influenza and pneumonia was 583.2 for each 100,000. Influenza caused 244,681 deaths and pneumonia 232,786, showing rates of 289.9 and 284.3 for each 100,000, respectively, the highest rates which ever have appeared for these causes. The rate in 1917 for influenza was 17.2 and for pneumonia 149.8.

The other principal causes of deaths were organic diseases of the heart, tuberculosis, acute nephritis, Bright's disease and cancer, which together were responsible for 391,381 deaths, or nearly 27 per cent of the total during the year.

Natives Employ Curious Methods to Heal Wounds

Inhabitants of the little mountain country of Montenegro employ curious methods of medical treatment, according to American physicians who did relief work there. The first thought of of the natives in healing wounds is to apply chewing tobacco, horsehair or fresh rabbit skin to a sore, with the hair facing inside. Common ink is considered to be a sovereign remedy for burns. Cobwebs are used in Montenegro to stop bleeding sores or wounds. When a person is bitten by a dog, the favorite remedy is to pull off the animal's ear and rub the wound with it. Since the arrival of American physicians, however, the natives are making numerous visits to Red Cross clinics and dispensaries as a means of curing their ills.

DELIGHT IN GUESTS

Pleasing Trait of Household Help in Palestine.

Presence of Company to Dinner Is Taken as a Compliment—Native Woman's Amusing Confession of Vanity.

Palestine is one place in the world which has no "servant problem," according to Miss Evangeline Metheny of Beaver Falls, Pa., just returned from Red Cross service in the Holy Land.

"The servants in Palestine," says Miss Metheny, who has lived there most of her life, "are a different set entirely from the servants we have here in America. They make their services personal; their interest in their employer's affairs is personal, whereas the American servant regards it impersonally.

"In Palestine, if I were to tell my house servants that there would be ten people in for dinner, they would be delighted. It would be a matter of personal pride with them that their dinner was the best to be had, and their service, too. They would be happy at the thought of working for a mistress who had so many friends that she could get together ten at one time. There would be no sulky looks or actions at the extra work; every servant would co-operate and the dinner would go off grandly.

"Here the mention of an extra guest or two creates a feeling of resentment. I know people who do not dare to invite a dinner guest until they have obtained permission from their cooks. Cooks in Palestine consider extra guests a compliment to their art. The servants in Palestine would ten times rather work for Americans than for the native population. The reason is not alone that we will pay higher wages—we treat them better. For one thing, American women do not swear at them, and native women do. They call down every kind of curse on the servant's eyes, and his children, and his grandchildren; they say the most untranslatable things as a matter of course. It is not in the least unusual, it is quite au fait, for an Arab woman to swear so."

Servants in Palestine may be different, but a woman is a woman the world over, Miss Metheny says with Kipling and other authorities.

"Once in a railroad train," she says, "I was sitting in the same compartment with an old native woman. In the East there are separate carriages for men and women. In our coach there was a particularly pretty girl, and from time to time a young English or American man passed through, watching her. My old woman was kneeling on the seat with her shoes off, praying. In order to pray toward Mecca she had to kneel crosswise on the narrow seat, and the rite of bumping her head on the floor several times in each prayer was an acrobatic feat under such circumstances. Every time a young man came into the carriage she had to struggle for balance while she pulled her veil down over her face. Finally she spoke to one. "My son," she said, "do you not know that you have no right in here with the protected ones" (women)?

He apologized, and she raised her veil when he went out.

"You know," she said to me in Arabic, "if I had any teeth left I would not pull down my veil. I only do it that people will think there is a nice face behind it."

In Practice.

"I see your wife has one of those hobble skirts."

"She was early in the game. I'm going to make some money this summer."

"How?"

"By taking her around the picnic circuit. She ought to win first coin in any sack race for ladies."—Louisville Courier-Journal.

Great Expectations.

A certain hard-boiled lieutenant called in a sergeant to letter his locker. After thinking it over, he said: "You might leave the lieutenant off as I expect to be made captain shortly."

"Why not," innocently suggested the sergeant, "leave a space between the lieutenant and your first name, so you could insert 'Col.'?"—Booster.

The Poet's Corner.

Visitor—Who caused that unsightly fence to be put up in this beautiful neighborhood?

"Oh, that is the home of John Sweetsinger, the famous portrayer of the poetry of child life, author of 'Songs of Childhood' and 'Prattling Voices at Twilight.' He had the fence built to keep out the neighbors' children."—Life.

A Surmise.

"What's the hubbub in the inside office?"

"The old man is savage today and the fool office boy let in an agent with a 'Life of Cromwell.'"

"Well?"

"I suppose he is selling his life dearly."—Louisville Courier-Journal.

Evolution.

"Do you believe in the theory of evolution?"

"I wouldn't venture to contradict it," replied young Mrs. Torkins. "Charley dear is always telling about animals that start as race horses and finish as dogs."

About Cataracts

So much has been written and said about cataracts, still current general knowledge is very indefinite.

CATARACTS develop INSIDE not OUTSIDE of the eyeball. The eyeball is not taken out in removing the cataract. When the cataract has developed so sight is reduced to only distinguishing light then only the REMOVAL of the CATARACT by operation will offer any cure. An average of 80 out of 100 of all cases operated obtain vision. Unless born with cataract or it follows injury or diabetes it rarely develops before 60 years of age. I operated for cataract for a ldy wh was 88 years old, with good results.

Cataract can be arrested by MEDICAL TREATMENT if treated in the early stages. I have cured hundreds with medicines in early stage. WHEN DIMNESS FIRST APPEARS IS THE TIME. 85 out of a 100 are successful, about the same percentage as operation, but when developed to practical blindness only removal by operation will cure.

First Milling Process.

The conversion of wheat into flour was one of the earliest developments of civilization, and even the primitive races in the dawn of history submitted the grain to a coarse pounding between stones. Perhaps the oldest flour "mills" in existence are the rude stones found among the remains of the ancient lake dwellings in Switzerland. By a mortar and pestle arrangement the wheat was reduced to a coarse meal. Crude as this method was, it contained the germ of the modern flour mill.

The Stars and Stripes.

When the American flag is draped on a flat surface the stars should appear in the upper left hand corner if the stripes are horizontal; in the upper right hand corner if the stripes are vertical.

Boiling Cracked Eggs.

The Man Nobody Knew

By HOLWORTHY HALL

(Copyright by Dodd, Mead & Co., Inc.)

"EVEN STEPHEN!"

Synopsis.—Dick Morgan of Syracuse, N. Y., a failure in life, enlisted in the Foreign Legion of the French army under the name of Henry Hilliard, is disfigured by shrapnel. The French surgeons ask for a photograph to guide them in restoring his face. In his rage against life he offers in derision a picture postcard bearing the radiant face of Christ. The surgeons do a good job. On his way back to America he meets Martin Harmon, a New York broker. The result is that Morgan, under the name of Hilliard and unrecognized as Morgan, goes back to Syracuse to sell a mining stock. He is determined to make good. He tells people of the death of Morgan. He finds in Angela Cullen a loyal defender of Dick Morgan. He meets Carol Durant, who had refused to marry him. She does not hesitate to tell him that she had loved Morgan.

CHAPTER V.—Continued.

—6—

It was perhaps five minutes before that door was reopened, and during the interval, Hilliard had an opportunity to wonder if the doctor had revised his office hours; otherwise, he should now be down in the Physicians' building, receiving patients. It occurred spontaneously to Hilliard that both Carol and her father were conceivably harassed by contrition, but as he estimated the extent to which their sorrow might go . . . judging by Carol's distress of last night, and the potential truancy of the doctor today—he was possessed of gripping emotions. Had they cared so deeply for him, then? Angela and Carol had said so; but he had doubted what he most wanted to believe. Was this additional proof? Had the doctor cared so deeply that in order to hold converse with Dick Morgan's sole executor, he would interrupt the sacred routine of his practice? Too late! Too late to care, too late to sympathize, only the winter garment of repentance was left for them! Hilliard couldn't comprehend why, when he had risen this morning so refreshed in mind and body, he should now be so unutterably wearied in both.

Carol returned, followed by a gentleman of sixty; and as the doctor entered, the room was suddenly permeated by an atmosphere of calm, and kindly peace. He was a large man, large of feature, and large of instinct; his forehead was that of an intellectualist; his eyes were those of a dreamer; his chin denoted rugged capabilities, and the stubbornness of unswerving ethics.

"Mr. Hilliard?" His voice was pitched low, but its resonance was striking. Thirty years ago the doctor had been a famous baritone; and there was still one church in town which dated its musical supremacy from the choir he had organized and directed.

"Doctor Durant!" The two men clasped hands firmly. Hilliard, experiencing the dreaded sinking sensation which came upon him as often as he exposed himself to yet another old acquaintance, hardened as he perceived no recognition in the doctor's eyes. The inevitable reaction left him momentarily weak.

"It was good of you to take this trouble, Mr. Hilliard. I appreciate it."

Hilliard's denial was highly courteous; it was harder to hate the doctor than he had planned.

"No, doctor—it would only have been blamable if I hadn't."

"I insist that it's good of you. . . . You knew Dick intimately, I understand."

Hilliard nodded.

"Very intimately, sir, considering the length of time." He perceived that Carol was holding the letter lightly folded in her hands; she intercepted his glance, and colored proudly.

"It . . . it did belong to me," she said, subdued. "And I can never thank you enough . . . never . . . !"

"My daughter," said the doctor, presently, "has told me the one great fact." He paused, then went on gravely. "I accept it, and it needs very little comment. What most concerns me now is to know the lesser facts. I have some hope, Mr. Hilliard, that you can make the lesser seem the greater; and the greater, the less. I want you to clear up the one cloud that still dims our knowledge. I hope you can tell us something about Dick's reasons for doing this thing—for going abroad at all, and for enlisting, and for—"

Hilliard winced; the doctor's autopsy on his character was considerably more disconcerting that Mr. Cullen's had been.

"Doctor Durant, I can't think it's fair to put Dick's motives under the microscope like that! Why not forget everything but the attending circumstances to the one great fact. He—"

"I'm not unfair," said the doctor slowly. "I've never been unfair if I could help it, and certainly not to this man, above all others. Here is a case in which a man who left us most unheroically comes back to us, in spirit at least, as a hero. The particular thing he did is a fact. I'm proud of him for it—and so far, for that, and for that only. But it isn't true that by itself alone it made him a hero. And when I said that I'm interested in the lesser facts, I mean that Dick's reasons for going into the war at all may be the proof that he was a hero—and that any physical bravery he may have shown has nothing whatsoever to do with it. Please don't misjudge us. We're not trying to belittle anything Dick did; it's neither fitting nor possible. But what we want to know is where the credit lies—with Dick, a reasoning, inspired, determined man, or with Dick, intoxicated by danger. In the latter case, his heroism would appeal to us as a detached incident, having no relation to his earlier life or to our own; it would be something to bring us pride for that, but for nothing else. In the other case, the knowledge of the why, in addition to the what, would bring us . . . But about Dick?"

"You can be happy, then," said Hilliard uneasily, "because he went over, I believe, in the firm conviction that every man has two countries—his own and France."

"Yes?" The doctor sat down abruptly.

"As long as you're interested in what he did before he was wounded—"

"And afterward, Mr. Hilliard."

"—Rather than how he was hurt, let me assure you that as far as I know, from the first day he landed, I don't believe he thought once about his own misfortunes. He had them, I know. But if you've got any manhood in you, you can't think of your own troubles, over there. It's too fearful. The Carrel-Dakin solution heals all sorts of wounds, Doctor Durant, all but the worst wound of all—and that's what every man who has any humanity and any sympathy about him gets when he first sees France. His heart is torn clear out of him. He can't sleep, he can hardly live with his own thoughts. And that quiet resolution you speak about—it's enough if it comes to a man there! I don't care what he had in his mind when he left you; I don't care what it was that led him to go overseas; I don't care what his purpose was when he sailed; I know that when he stood on French soil there wasn't an atom of selfishness or self-pity in him. It wasn't a question of adventure; it wasn't a question of drowning his sorrows; it was a question of his doing anything and everything he could to help out. Let me tell you something." Hilliard sat on the edge of his chair. "It's possible that you never thought of Dick Morgan either as a martyr or a fatalist. Nor do I think he was. But when he was brought to Neuilly there was among his papers a little sort of field diary—I'm sorry it was lost, so I haven't it to show to you, but I saw it often—and under the date of his first tour of duty in the front line trenches was scribbled this, quoted from Rousseau: 'The dead carry to the grave, in their clutched fingers, only that which they have given away.' Doctor Durant, Dick went into this war in the belief that the only way to reclaim his life was to sacrifice it. Does that answer your question?"

There was an utter stillness. It had been a superb fiction, but Hilliard,

"What's That?"

thinking obliquely of Angela, was only partly sentient of his baseness.

"Thank you," said the doctor, and glanced at his daughter. "Yes. He had the making of a splendid man. I knew his parents and his grandparents. His career in Syracuse hadn't anything to do with his heredity, Mr. Hilliard; it was the result of badly chosen environment. He chose it himself, and he had all a young man's interest in temptation. But when those temptations were removed, when he was free to revert to his family traditions, why then he could—"

"It would please me a great deal more, doctor, if you looked at him independently and maybe a little less academically—if you didn't go so far beyond the actual facts."

"How do you mean?"

"Why," said Hilliard, "for one thing, in laying so much stress on his grandparents. Dick was the one who went overseas; his grandparents didn't! And his grandparents didn't go into action on the western front singing Stevenson's 'Requiem' at the top of their lungs and knowing that it was mighty appropriate, as Dick did!"

"What?" said Carol, straightening. "What's that?"

"No." The doctor's negative was quiet, but decisive. "A man doesn't rise to heights of glory without some reason for it, Mr. Hilliard. But a man can resist his inheritance for a good many years, and suddenly stop resisting and revert to his family type. He can do it voluntarily or involuntarily. It's what we call atavism." He paused and smiled sadly. "The pity of it," he said, "is that in spite of his having failed in everything he tried to do in Syracuse, he would have made us proud of him, sooner or later, if he had stayed on here. I'm positive of that."

"Pity!" Hilliard straightened. This was the third time in two days that he had caught the intimation that he could have come home decently and humbly and been forgiven.

"Not that I pity him for what he accomplished, or what it cost him," warned the doctor. "I don't; I was very fond of the boy, Mr. Hilliard, but I wouldn't for the world have had him do anything else than what he did. No—but I do pity him because he can never know what we think; because he can never know how much we gladly forget; because he can never know why we are proud of him."

Hilliard's pupils were distended.

"You were rather harsh with him, doctor, as I"—

"We were just, Mr. Hilliard."

"But if you recall the gist of Portia's speech . . ."

"I do!" The doctor regarded him pacifically. "And it's very seldom that mercy is asked to temper justice except after it's become evident that justice is actually going to be just. Let's not deceive ourselves. And let's not put each other in the position either of attacking or defending Dick. It's not the time for that now. He's done all that any man can do, and he was a most lovable boy—most lovable."

Hilliard nervously addressed himself to Carol.

"I hope you agree with your father, Miss Durant—that eventually he'd have succeeded in Syracuse?"

"I never doubted it," she said loyally.

And then the three of them fell simultaneously to musing, and for the space of a minute or two there was quiet; the sort of quiet which comes just after the benediction. It was the benediction which Carol had bestowed upon a wretched sinner who sat there wondering how he could ever escape from the toils of his own cleverness.

"How long are you to be in town, Mr. Hilliard?" inquired the doctor, irrelevantly.

"That I can't say, sir. I had no other errand than this."

"You've never been here before? That is, you haven't friends here?"

He had expected this question and prepared for it.

"Several years ago," he said casually, "I came to Syracuse half a dozen times one winter—on business. I suppose I could find my way around even now, if I had to. But comparatively speaking, I'm a stranger."

"You're a business man, Mr. Hilliard?"

"I told you he was, dear," said Carol.

Hilliard nodded.

"Yes, Doctor Durant. That is—I was. I have no business connections now. That's why my plans are so uncertain."

Again a heavy silence. Hilliard was cursing the impetuous haste which had caused him to lie himself into an invulnerable network.

"I'm sorry," said the doctor, rising abruptly, "but I've a consultation at half-past twelve. Thank you again, Mr. Hilliard, for coming to us; you've lightened my heart tremendously. I hope we shall see you again before you go."

"I hope so," said Hilliard, dully. He was whipping his brain to find a way out; but how could he explain those manifold, cruel falsehoods which once he had thought to be his retribution?

The doctor gave him a cordial smile, a parting pressure of the hand, and went out directly, leaving the two young people quite alone.

Hilliard, impelled to go and equally constrained to stay, fidgeted in his vacillation. He was uncomfortable and unhappy, yet curiously enough he had no inclination to depart. He assured himself that he cared not the snap of his finger for Carol Durant; on the contrary, he was intolerant of her very presence; still he lingered, wishing that he hadn't stultified himself.

"And you really came all the way up here just to be kind to us?" she said.

"Just to be kind to Dick," he corrected.

Carol was winking hard; Hilliard sprang to his feet. He could never bear to see a woman cry; it was immaterial to him who she was, or what the circumstance; he was powerfully affected—distraught. His single aim was to console her—it was a selfish aim designed primarily to relieve himself.

"But it's easy to see," he said desperately, "why he was so anxious to have me come. I . . . I have twice as many reasons to envy him now, Miss Durant. . . . I really have. And . . . and, unlike your father, I can pity him, too, for—"

"Oh!" she said, smiling tremulously up at him through the misty veil of her tears. "But y-you see, Mr. Hilliard . . . you're quite mistaken . . . I . . . I wasn't pitying Dicky; I was pitying me!"

He bit his lip sharply No reproach could have gone deeper.

"That was your letter, you said?"

"Oh, yes," she said. "It c-couldn't have been for anyone else! Thank you so much . . . for bringing it . . ."

He was trying to analyze the emotions which stirred him. He had told himself over and over again that his love for her was numb; and yet here he was . . . unsteadily balanced . . . tormented by her grief . . . and lying to her in the next sentence—to protect his previous lies, and to give to her what comfort he could.

"I want you to have his war cross, Miss Durant . . . I think it belongs to you more than to anyone else. I . . ." He stopped and stood irresolute; for she had broken down completely. He watched her and slowly the blood burned in his cheeks! He tried to order his thoughts, to select his action . . . if he still loved her, he was there to console her; if not . . . he ought in all humanity to console her just the same, even if it took another of those inexcusable deceptions. For an instant he was on the point of succumbing to a wild impulse to blurt out the truth and take the consequences . . .

He started; for she had motioned to him—motioned him away. He hesitated . . . was it love, or repentance, or only his disquiet to see a woman cry? She motioned again, hysterically . . .

Hilliard's brain snapped; Syracuse had sung his praise too late. The doctor with his isms and dissections was too late—Carol herself was too late with tears. His jaws came together; he glanced at her once more and then, in obedience to her gesture, he turned and tiptoed quietly from the room. The front door closed quietly behind him. The danger of succumbing was over and, he believed, permanently, and yet . . .

"Even Stephen!" he whispered as he went down the steps.

CHAPTER VI.

Ordinarily Mr. Cullen was satisfied to bring a single evening paper home with him and when he laid it on the hall table it was generally creased down the financial page; but tonight he brought two, and each of them had wrinkles across the market reports and were folded so as to feature the departments devoted to local news. The Journal had beaten the Herald by two sticks and a subhead, but the Herald had honored Dicky Morgan with a kindly editorial and both papers had stated explicitly where Hilliard was making his headquarters. Mr. Cullen would have been seriously offended if he hadn't been mentioned at least once in each paper; and this is no more a reflection upon his vanity than the fact that he cherished a lively anticipation for what the Post-Standard was going to say about the case tomorrow morning.

Nevertheless, there was a fly in the ointment—not very much of a fly, to be sure, but still appreciable; and after all, it isn't the size of the invader that counts. Mr. Cullen was generous; Mr. Cullen was hospitable; but Mr. Cullen was also the tiniest bit of a snob—not a carping, contemptuous, supercilious snob, but a healthy, hearty, open-spirited snob, frank in his liking for the things he liked—and one of them was to be somebody, and have the neighbors know it. He liked to fraternize with important men; he liked to see his name in the paper now and then; he liked to feel superior—just one harmless little degree more consequential—than his next-door neighbor. And the neighbor, of course, had to share this conviction, or there wasn't any purpose in it.

And Mr. Cullen, with all his ingenuous weakness for prominence, hadn't known until the evening papers told him so, hadn't even suspected (although now he was trying busily to persuade himself that he had suspected it all along, from one thing and another) that his guest was a mining engineer of international reputation, and independently wealthy to boot. It was enough to discomfit any host! It was enough to annoy any man, whether average or not, who prided himself (and most of us do) that he had unusual discernment, and was a Good Judge of Human Nature. And so, when he met Hilliard and Angela at the head of the garden he began to fire away pointblank at Hilliard; and this was barely after the greetings, and a question as to the state of Hilliard's health, and before Angela had found an opportunity to get a word in edgewise.

"Understand you're a mining man, Mr. Hilliard," he said, pleasantly.

"I used to be," said Hilliard. "I've retired. I thought I told you so the first night I was here."

"Oh, yes—you did say something about it, but—" Mr. Cullen laughed with the fullness of one who has unearthed secrets. "It took some of our bright young newspaper crowd to ferret out the facts. You're too modest—that's what's the matter with you!"

As Hilliard smiled in deprecation Angela, crowing triumphantly, snatched for the papers.

"Where is it?" she cried. "Where . . . oh!" And relapsed into beatific calm, devouring the none too conservative paragraphs with all her might. The cold-typed repetition of the well-known story sobered her considerably; still, it was for Hilliard's and her father's names that she gloated; and as for the panegyric of Morgan, that was only an added garland to the wreath which was already his.

"Russian and English syndicate wasn't it?" asked Mr. Cullen.

"Yes," said Hilliard. "English and Russian."

Mechanically, he began to rehearse the technical subtleties which he hadn't expected to find use for within

He Began to Fire Away.

a brace of fortnights. It was well, however, to be prepared; and the time to plant the seed of desire is when the prospect is willing.

"Mighty interesting game—mining," said Cullen. "Let's wander down by the fountain; shall we? . . . I don't know why it is, but it sort of fascinates me—guess it does everybody. More romance in it than most lines." Here Angela looked up sharply, and gurgled with wicked satisfaction, and sent a lifted eyebrow signal across to Hilliard.

"Yes," said Hilliard, "but there's more tragedy, too. I suppose that's the law of compensation getting to work. Big profits call for big risks."

This was for sand in Cullen's eyes; and it had its effect.

"Oh, but the ratio's the same in almost any business, Mr. Hilliard, isn't it? It's about the same theory. Savings banks pay three to four per cent, but they never made a man rich yet. But copper has!"

The fascination of a mine for a man.

(TO BE CONTINUED.)

Uncultivated Philippine Land.

Surveys of the Philippine Islands have shown that of the total of 120,000 square miles, the cultivated area is only 14,000 square miles, the remainder embracing 61,000 square miles of commercial forests, 11,000 of non-commercial forests, 14,000 of unexplored and small islands, and various areas promising mineral products. The cultivated lands include 2,189,000 acres of rice, 1,236,000 of abaca or Manila hemp, 880,000 of coconuts, 440,000 of sugar cane, 145,000 of tobacco, 18,000 of mahogany, 26,000 of cacao, and 2,000 of coffee.

On Genius.

Genius gets the world's praise because its work is a tangible product, to be bought, or to be had for nothing. It bribes the common voice to praise it by presents of speeches, poems, statues, pictures, or whatever it can please with. Character evolves its best products for home consumption; but, mind you, it takes a deal more to feed a family for 30 years than to make a holiday feast for our neighbors once or twice.—Holmes.

Children's Theology.

A little girl explained God's omnipresence by saying that he was everywhere without going there. A small boy, reflecting on the misdeeds of Satan, remarked: "I don't see how he ever got to be so bad when he had no devil to put him up to it."

"Get Rich Quick."

Writing a song that catches on is one of the shortest cuts to wealth. Sir Arthur Sullivan received $50,000 in royalties for "The Lost Chord," and "My Pretty Jane" remunerated its composer to the tune of $10,000 a line! —Boston Post.

Opportunity is a fine thing. So in fact, that some of us miss it.

Hogs on pasture require grain fo... greatest profit in pork production, b... a full feed is not economical when pa... ture is plentiful and grain high-price... When corn alone is fed a limited ra... tion is considerably cheaper becaus... the forage crop takes the place o... much of the grain.

Some protein feed, such as tankag... or skim milk, is recommended to b... fed in small quantity along with co... and pasture to pigs weighing less tha... 100 pounds. Pork production is usua... ly too expensive when such feeds a... given to large hogs, especially if the... are on such pasture as alfalfa, clove... rape or soy beans, all of which ar... high in protein.

INDIANS FAVOR IMPROVEMENT

Live Stock Owned by Navajos in Ne... Mexico to Be Bred to Purebred Sires in Future.

More than 191,000 head of liv... stock owned by Navajo Indians i... New Mexico henceforth will be bre... only to pure-bred sires. The femal... stock includes 3,000 cattle, 8,0... horses, 150,000 sheep, and 30,0... goats, besides smaller numbers o... swine and poultry.

The Indians have signified their su... port of the "Better Sires—Bette... Stock" movement. The United State... department of agriculture is co-operat... ing in supplying the Indians wit... literature dealing with live-stock im... provement.

ESSENTIALS FOR SWINE

The following combination... should be kept before the hogs... at all times:

One hundred pounds of slaked... coal or wood ashes, four... pounds air slaked lime, two... pounds common salt, one pound... epsom salts.

Mix thoroughly and sprinkle... over the combination the follow... ing solution:

Two pounds copperas dis... solved in one quart boiling wa... ter.

IG CROPS ASSURED IN WESTERN CANADA

eed of Farm Labor Urgently Required for Harvest.

Rains of the past week which have en general throughout all portions Western Canada, covering MANIOBA, SASKATCHEWAN, and ALERTA, have placed beyond all manr of doubt the certainty of vast ain crops throughout the entire disict.

Reports from all points indicate arvelous and rapid growth. The onditions of a week or so back, which ere decidedly less promising and led any to think that there might be a artial failure, have disappeared altogether and now there is a wave of ptimism circulating throughout the ntire country.

In 1915 there were enormous yields ported from all parts, and it would ppear now as if in many places the ields of 1915 would be equaled if ot beaten.

What might appear to be a drawack, is the apparent shortage of farm elp. The Province of Manitoba rough its Employment Bureau in innipeg, is asking for 10,000 harvest nds and over, offering from $5 to per day. The Province of Saskatchewan is asking for 15,000 extra nds to take care of the immense rvest that is certain to be reaped that Province. In Alberta the crop rea is somewhat less, the labor conitions somewhat better, and is makg a request for 5,000 extra farm nds.

Interviewing the officials of the difrent Governments, they are inclined the opinion that as the crops in nsas, Nebraska, South Dakota, Illiois and other Central States are harested there will be a movement northard that will materially help to take re of the labor situation. With the w railroad rates that may be secured application to the Employment Offices at Winnipeg and at boundary oints, or which may be secured rough the Canadian Government Offices at Chicago, Ill.; Detroit, Mich.; ilwaukee, Wis.; Kansas City, Mo.; maha, Neb.; Des Moines, Ia.; Waterown, S. D.; St. Paul, Minn., and rand Forks, N. D., will give to those eking employment the opportunity reach the harvest fields at a low st.—Advertisement.

Southern Confectionery.

"Gee whiz! Dey got cherries an' trawberries an' all kinds of fruit overed with candy. What kind shall get, Rastus?"

"Give me a chocolate-coated waterelon."—New York Central Magazine.

Thousands Have Kidney Trouble and Never Suspect It

Applicants for Insurance Often Rejected.

Judging from reports from druggists ho are constantly in direct touch with e public, there is one preparation that as been very successful in overcoming ese conditions. The mild and healing fluence of Dr. Kilmer's Swamp-Root is on realized. It stands the highest for s remarkable record of success.

An examining physician for one of the rominent Life Insurance Companies, in interview on the subject, made the asonishing statement that one reason why many applicants for insurance are reected is because kidney trouble is so ommon to the American people, and the rge majority of those whose applicaons are declined do not even suspect at they have the disease. It is on sale all drug stores in bottles of two sizes, edium and large.

However, if you wish first to test this reat preparation send ten cents to Dr. ilmer & Co., Binghamton, N. Y., for a mple bottle. When writing be sure and ention this paper.—Adv.

In a Tender Spot.

Mr. Benover—No, I wasn't wounded any engagements in France, but I as sorely wounded in my late engagement with Miss Leech.

Miss Romantique—In the heart, I resume?

Mr. Benover—No, in the bank roll.

Nervous Spells—Near Heart Failure Eatonic Stopped It

Mr. C. B. Loats, writing from his ome at Lay, Md., says, "I had been king medicine from four specialists, ut believe me, friends, one box of tonic has done me more good than l the remedies I have ever tried. was in awfully bad shape. About lf an hour before meals, I got nervus, trembling and heart pressure so ad I could hardly walk or talk. One ox of eatonic stopped it."

Eatonic quickly produces these truly marvelous results, because it takes p the poisons and gases and carries them right out of the body. f course, when the cause is removed, he sufferer gets well.

Everyone that wants better health is old to have just a little faith—enough o try one box of eatonic from your wn druggist. The cost is a trifle hich he will hand back to you if you re not pleased. Why should you suffer another day, when quick, sure relief, is waiting for you? Adv.

Choice of a Prophet.

Jonah emerged.

"I certainly prefer a dark horse to dark whale," he cried.

POTAIRO

By SADIE STULL.

(©, 1920, by McClure Newspaper Syndicate.)

"Jane Emma Lane, what be you doin' in thet rubbish heap?"

Jane Emma straightened up so suddenly she almost dropped her precious "find."

"You threw Potairo away!" she accused with quivering lips.

"Land o' love! Wasn't it time? Th' old heathen has disfigger'd th' parlor mantel since yer Gran'father Jared's last voyage!"

"That's why I loved him—why I believe in him!"

"Stuff an' nonsense!" Aunt Jane's angular form disappeared from the porch. A moment later her tart voice reminded from the kitchen: "Them peas ain't shelled yet an' it's nigh 10 o'clock!"

Jane Emma gave Potairo's ugly bronze visage a final rub with the corner of her apron. Then, with a quaint little obeisance she placed the ancient idol atop the gate-post. The incongruity of it made her laugh aloud.

From the temples of Iris and Osiris to presiding oracle of Aunt Jane's prim New England garden was indeed a far cry!

As she surveyed the effect from the porch steps Jane Emma laughed again—this time more softly. The spell the strange talisman had cast over her since early childhood seemed more potent than usual this bright June morning.

As though touched by a flower magician's wand Aunt Jane's prize hollyhocks became queenly iris bordering the sluggish Nile. The rattle of the peas in the brightly scoured pan seemed the echo of tinkling cymbals, while above the weird strains of Egyptian music sounded a voice of beloved memory—

"Superstition and Jared Lane never sailed the same course till th' day a parcel o' slick-tongued natives spun their 'good luck' yarn about Potairo. Though one o' the lesser gods they vowed he wus a mighty powerful one—pertick'ly in affairs o' th' heart." A chuckle invariably punctuated the old salt's narrative at this juncture. "Ye see, there was a mighty important question I wus goin' ter ask a certain lass when we reached th' home port—so I up and shipped the queer little cuss—at their own price."

A big black touring car had stopped directly in front of the gate. Its occupant, a handsome woman just past middle age, beckoned to Jane Emma. In her haste to respond the latter nearly upset the pan of peas.

"My dear, how came you by this ancient idol?"

The voice was the sweetest and saddest Jane Emma had ever heard. It impressed her even more deeply than the stranger's somber dress. It inspired her to tell Potairo's story as she had never told it before.

When she had finished there was a reminiscent light in her listener's eyes that banished years from their pain-shadowed depths.

"My dear, I was reared 'mid just such surroundings. That's why your idol instantly caught my eye. In my girlhood home was a very similar one which my dear sailor father brought from a far Eastern port. Despite scoffing relatives I regarded it in the same romantic light as you do, Potairo—"

The lady smiled as she concluded softly: "My faith was richly rewarded—as I now pray yours may be! Ah, is there someone already?"

The telltale color deepened in Jane Emma's cheeks. Ere she was aware, she had confided to this kindly stranger, her heart's most guarded secret; the homely little romance of which Neighbor Peter Wayne was the hero.

"He is twenty-six you say?" The misty blue eyes rested on the mourning band on the chauffeur's arm. "Just the age of my own dear boy!"

When the evening shadows brought respite from household duties, Jane stole away to her favorite garden retreat—to live again the scene of the morning.

Came the sound of a familiar step and Neighbor Peter stood before her.

With the old teasing laugh he shook the flower-laden boughs above her head. Before she could brush the clinging petals from her hair he caught her close in his arms.

"It's come, girl—the turn o' fortune's tide! I've found a buyer for that shore property or rather"—his merry voice growing serious—"she found me. It's the dear lady you gave the flowers to. She's to build a bungalow—where she says her heart has always been—near the sea. Further, she says to watch our growing happiness will give her a new interest in life."

"We'll have a wedding the old town will long remember, eh, lass o' mine? What's that—I must properly thank Potairo? Sure, I will! No lover of old Egypt ever paid him more willing homage!"

They had taken but a few steps when Jane Emma uttered a cry of dismay. The gatepost loomed dark and unadorned. The little bronze god had vanished!

Followed a tense moment. Then Aunt Jane's voice rasped out of the darkness: "If you be lookin' fer th' old heathen you'll find him back on the parlor mantel." Jane Emma laughed softly at the new tone of apology: "Mebbe I wuz a bit hasty in throwing him erway—considerin' what's happened!"

CAN SOME GREENS FOR NEXT WINTER

Can Surplus Vegetables for Use Next Winter—In Some Cases Production Is Being Curtailed and There Is Need for Careful Saving of Every Bit of Surplus.

(Prepared by the United States Department of Agriculture.)

Greens of all kinds, both wild or cultivated, are well liked by most people and are valuable food in the human dietary. If more were eaten there would be less need of resorting to the doctor.

When the various kinds of greens are young, tender and at their best, some should be canned for use during the winter. Of the wild greens the dandelion is the most common. Among the cultivated greens are Swiss chard, kale, Chinese cabbage leaves, French endive, cabbage sprouts, turnip tops, young tender New Zealand spinach, dandelion, young tender dasheen sprouts, native mustard, Russian mustard, collards and tender rape leaves. All possess iron and other needed mineral substances, and are nearly as delicious when canned as when fresh.

The following directions for canning greens are given by the United States department of agriculture:

Can greens the day they are picked. Sort thoroughly, wash until clean and place the greens in a sieve or in cheesecloth. Blanch in live steam for 15 minutes. Remove the greens, place in a freshly scalded pan and cut into convenient lengths. Pack into hot jars which have been boiled 15 minutes and add boiling salt water, using one tablespoonful salt to one quart water. Put boiled rubbers on the jars, then the boiled tops and partially seal the jars. If a steam-pressure cooker is used, process for 40 minutes under ten-pound pressure. If a hot-water bath canner is used, place the jars on a false bottom in a commercial canner or a washboiler with sufficient water to cover. Process for three hours, timing after the water starts to boil. Remove and seal tight immediately. Cool in a place free from drafts, test for leaks and store in a cool, dry place.

The addition of a small amount of vinegar to vegetables which are being canned apparently tends to increase their keeping qualities. Not enough is added, however, to be very noticeable to most people.

HOUSEWIFE OF TODAY KEEPS FOOD ACCOUNT

She is Checking Up Weights and Measures of Products.

Decreased Buying Power of Dollar Makes Her Think and Avoid All Kinds of Waste—Lessens Prices in Many Ways.

The modern housewife is becoming expert in buying. She is reading the labels, in accordance with the suggestion made by the United States department of agriculture, and checking up the weights and measures of the food products she buys. She has learned when to buy in quantity and when in small amount, and when it is more economical to buy in bulk than in package. Many have compared the cost of making bread at home and of buying it and are choosing the way that is best for them.

The lessened buying power of the dollar has made her think and avoid all kinds of waste. The family must be kept well nourished, but the wife and mother should not provide more food than is needed. She must know what kind of food will fill her market basket to the best advantage. Along with this knowledge is that of how much of the family food should come from each food group and how far it is wise to save money by using more food from the less expensive groups. The housewife of today is keeping a food account and checks up her weekly buying by the plan she has made.

If she wishes to try to lessen prices for everybody here are some of the ways she is going at it: By producing food at home; by using local products; by choosing food that is plentiful in the markets; by lessening her use of such foods as are scarce; by co-operative buying; and by using the parcel post.

VARIETY NEEDED IN BREADS

More Important When Lunch Must Be Carried Than at Other Meals to Avoid Monotony.

Variety in breads is more important when the lunch must be carried than at other meals because of the danger of monotony. Wheat bread, whole-wheat bread, corn, rye or oatmeal breads; nut, raisin and date breads; beaten biscuit, crisp baking powder biscuit or soda biscuit, and toast, zwieback, and crackers may be used in turn to give variety.

MAKE OVER CLOTHES NEEDED

Careful Selection of Things Wardrobe Should Contain Is Involved in Planning Wardrobe.

Make over only things that are needed and suited for immediate use. This involves planning the wardrobe, and making a careful selection of the things it should contain. A made-over dress that does not harmonize with the coat and hat that must be worn with it represents a sad bit of misdirected energy.

CLUB GIRLS TAUGHT TO PREPARE SUPPER

Each Member Is Assigned Certain Part of the Meal.

Constructive Criticism Found to Be Valuable in Making Each Repast a Little Bit Better Than the Preceding One.

To make sure that the girls in the home-making clubs, supervised by the United States department of agriculture and the Connecticut State Agricultural college, are able to put to practical use what they have learned in the clubs about buying, cooking and serving food, their leaders have organized "supper clubs."

These clubs meet twice a month at the local leader's home. At the first meeting of the month a well-balanced meal is planned with the help of the leader. Each girl is assigned a certain part of the meal, for which she is responsible.

At the second meeting she brings the material and prepares, cooks and serves her part of the supper. Adults are asked to these suppers, and the invitations are highly prized. The usual menu consists of meat, potatoes, one vegetable, hot bread, sometimes salad, dessert, and a hot drink. So far the average cost per person served has been 24 to 26 cents.

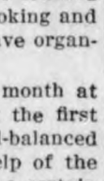
After the meal the club girls meet in a group and discuss and criticize the various articles on the menu and the serving. This constructive criticism has been found to be very valuable in making each supper a little better in every way than the preceding one.

GROUP UTENSILS IN KITCHEN

Equipment Should Be So Arranged That Everything Is Handy—Put Small Things on Hooks.

Group your utensils so that you can reach them easily. Put those most frequently used in the most convenient places. Small ones may be hung on little hooks fastened to the wall or the edge of a shelf.

All Around the House



Margarine contains nearly as much food value as butter.

* * *

Salt and soda is excellent for bee stings and spider bites.

* * *

Cooked dried apricots served with mayonnaise and grated cheese make a delicious salad.

* * *

Old linen dresses can be ripped apart and the best sections made up into dollies and table linens.

* * *

Starch the ironing board cover and it will keep clean longer, the clothes will slip over it more easily, making it a real pleasure to iron.

PESKY BED BUGS

(Pesky Devils Quietus) P. D. Q. is a new chemical that puts the everlasting to the Pesky bedbugs, roaches, fleas, ants and cooties—impossible for the pesky devils to exist where P. D. Q. is used.

Recommendations of Hotels, Hospitals, Railroad Companies and other public institutions are a guarantee to the public that the safest, quickest and most economical way of ridding the pesky insects is by the use of P. D. Q. as this chemical kills the eggs as well as the live ones, and will not injure the clothing.

A 35c package makes a full quart, enough to kill a million bedbugs, roaches, fleas or cooties—and also contains a patent spout to get the egg nests in the hard-to-get-at-places, and saves juice. Your druggist has it or he can get it for you, or sent prepaid on receipt of price by the Owl Chemical Works, Terre Haute, Indiana.

WANTED—Small farm, for 155 acre stock and grain farm, Van Buren County, Iowa. Meredith, Richfield Sta., Minneapolis, Minn.

Welcome Relief From the Tortures of Rheumatism

Can Come Only From the Proper Treatment.

Many forms of rheumatism are caused by millions of tiny germs that infest the blood, and until the blood is absolutely freed of these germs, there is no real relief in sight.

The most satisfactory remedy for rheumatism is S. S. S. because it is one of the most thorough blood purifiers known to medical science. This fine old remedy cleanses the blood of impurities, and acts as an antidote to the germ of rheumatism.

S. S. S. is sold by druggists everywhere. For valuable literature and advice address Chief Medical Adviser, 107 Swift Laboratory, Atlanta, Ga.

HAD LOFTY IDEA OF DUTY

Janitor's Sense of Responsibility Somewhat Embarrassing in This Particular Case.

The principal of a city school building is still young and has a very attentive admirer. Occasionally he comes to the school building after her and takes her home in his roadster. The other afternoon she was came into her room until she was finishing reports and the young man ready to go.

The janitor finished his work and she told him he could leave whenever he wished to do so, and they would close the building. But still he lingered until they left. The next morning he explained his stay by remarking that he was late getting home the evening before. "But you could have gone home," reminded the principal. "I told you we would close up."

"Yes, I know," he returned, "but you see, Miss T—, it's this way. The board holds me responsible for this building and I'm not willing to leave it in charge of a perfectly strange man."

When the Clothes Give Out.

"You seem to be in a quandary, Obediah."

"I am. With a few alterations this barrel could be made to fit me, but I don't know whether to take it to a carpenter or to a tailor."—Judge.

REAL REASON FOR HIS TEARS

Teacher Flattered Herself That Youngster Was Crying Because She Was Leaving Them.

The graduating class of a Terre Haute school gave the teacher a parting gift. During the speech she made acknowledging the gift she noticed that one boy was weeping. Then she told how touched she was by the emotion displayed by this boy. "What greater tribute could a teacher have than to have a child cry because he was leaving her?" she later asked the class.

One of the other boys remained after the others had left. "Miss N——," he confided, "you thought Jim was crying because he was going to leave you, but he wasn't. It was because that was going to be the last time he would see that present. I had the hardest time to get his 50 cents toward it out of him I ever had getting anything. And when you took that package he was just bidding that 50 cents a tearful farewell.

Very Likely.

"I heard of a new comet that lost its tail." "Probably it got into a fight with the dog star."

Naturally.

"How was the actor who took the part of the fop in the play?"

"Oh, he was a dandy."

16 STORES *GARNER, IOWA*

Local News!

Mrs. Voiles, from Belmond, was a Klemme caller Friday afternoon.

Chas. Papousek, of Belmond, was here on business last Friday afternoon.

Levi Klotzboch and family returned Monday evening from their week's vacation and visit at McGregor, Iowa.

J. Jorgenson, of Garner, was a visitor in Klemme Tuesday between trains.

Miss Anna Kelly and Glenn Busch are the new clerks behind the counters at the Crystal Cafe.

Little Lois Howard went to Des Moines last week for a visit with her aunt.

Chas. Gibbs, of Big Lake, Minn., came last Wednesday to attend the funeral of Mr. Collins.

Andrew, Ethel and Clarice Wellemeyer went to Garner last Friday morning for a visit with friends.

Miss Lola Smith went to Belmond Friday for a few days visit with her grandmother.

Remember the Hancock County Fair which will be held at Britt, August 1, September 1, 2, 3, day and night.

A number of Masons came over from Garner last Wednesday to attend the funeral of Capt. Collins. He was formerly a resident of Garner.

Mr. and Mrs. Ed Rooks are rejoicing over the arrival of a fine baby boy who came to make his home with them Friday morning.

You will be entertained every minute of the afternoon and evening at the Hancock County Fair, August 31, September 1, 2, 3, at Britt.

Mr. and Mrs. C. W. Wiles left last Thursday for Morris, Minn., where Mr. Wiles went to look after the crops on his farm. They returned yesterday.

Mrs. A. E. Buriff and daughter, where they spent some time visiting Miss Doris, went to Des Moines last Wednesday for a couple of days stay.

Miss Bailey, the young lady who trained the children for the Tom Thumb play, was a Klemme caller last Wednesday.

Mrs. L. A. Mulroney, of Fort Dodge and Mrs. J. Jorgenson, of Garner, were Klemme visitors last Wednesday between trains.

That big "one-ring" circus in town last Thursday evening drew a fair sized crowd to their tent near the Western States Lbr. Co.

Mrs. Henry Schroeder left yesterday for Chicago, after spending a couple of weeks visiting at the Mrs. Schroeder home.

Miss Bernice Skinner came from Algona Saturday for a few days visit at the A. H. Meyer home. She left again Wednesday.

The A. A. Ridder family of Watertown, South Dakota, came Wednesday of last week in their car, for a visit with Klemme relatives and friends.

Grandpa Smith died at Belmond last Tuesday, and Wednesday evening Mrs. Mille Smith and daughters went there to attend the funeral which was held the following day.

Wert Loger, who has been working for Al White this summer, left Tuesday in his car for Ingram, Wisconsin, where he will stay for six or seven weeks.

Mr. and Mrs. F. C. Grosz and daughters Evelyn and Wannetta, of Brock, Canada, were guests of the former's sister, Mrs. Jay Griggs, last week.

Mr. and Mrs. John Atterbury, of Goldfield, drove up to Klemme Sunday for a ride and also to visit. They have intentions of buying land here as they were greatly impressed with the farms near Klemme.

Mrs. Ed. Wellemeyer of Garner, and Mrs. Bickel and daughter of Washington, Iowa, were visiting at the Arthur Wellemeyer home last Friday between trains.

Miss Martha Lenz, who has been visiting with her sister, Mrs. A. H. Meyer, the past two months, left last Thursday morning for her home in Wisconsin.

Be sure and not miss the big free attractions, ball games, races, fireworks, in fact everything which furnishes high class amusement and entertainment at the Hancock County Fair at Britt, Aug. 31, Sept. 1, 2, 3.

Do not fail to visit the new floral hall or the new hog house or the new poultry house, and be sure to have your exhibits ready for the big Hancock County Fair, to be held at Britt, August 31, September 1, 2, 3.

Klemme people arei nterested in knowing that Albert Yahnke and family and friends, of Buffalo Center, are taking an auto trip to Minnesota and are camping along the way as they go, and are having a fine time.

Miss Ruth Davis left for Kansas City Monday night after visiting with her sister, Mrs. R. A. Jorgenson, for about a month. After a week's stay at Kansas City she will leave for her home at Lincoln, Nebr., where she will take up college work.

Messrs. John Larsen and Oscar Ziegler drove up from Goldfield Sunday afternoon for a visit with Dr. R. N. Reuber. Dr. Reuber practiced at Goldfield about six months before coming here and so is quite well acquainted there.

Harl Gimer was operated upon last Wednesday at the Park Hospital at Mason City, for appendicitis. He is getting along fine now and will be able to come home in about a week. The Gimer family and Mr. and Mrs. Clarence Johnson were over to Mason City Sunday to see him.

The Missionary Society of the First Methodist church had a meeting at the home of Mrs. Clarence Arnold last Thursday afternoon. It was a good meeting. They had a good time and to top it off the ladies were treated to home made ice cream and delicious cake.

Miss Anna Griewe is taking a week's vacation from her place behind the counter at the Wellemeyer store, and went to Lake Okoboji on Tuesday to spend the week there. We imagine Anna will have some big fish stories to tell on her return.

Miss Mabel Smith is taking a vacation from her duties at the J. N. Day store. She left for Illinois by auto last Friday, with the Walter Ross family of Garner. They reached Iowa City the first day a distance of 212 miles. Their trip will take them to Joliet, Manhatten, Campton, and other places in Illinois.

ggmen Loot Bank t Thornton Sunday

TO BANDITS ROB SAFE AFTER FOUR BLASTS, GET $4,000

Six gunmen successfully entered bank at Thornton Sunday night after four attempts at blasting safe finally opened it and got away in a Buick touring car to parts known to divide the spoils of about 000.

The men were first seen about ornton Saturday, according to citi- of Thornton. The men drove out the street and particularly past bank a number of times. Sunday were still in the neighborhood were again seen to drive about street.

So quietly did they go to work Sun- evening that no one noticed them all the telephone and telegraph res leading from the town and ortly after midnight they entered bank. Two men went inside, two avily armed guarded in front of bank, one at the rear and another ayed near the car. A young man o had been out to see his girl rlier in the evening was lying on a nch in the park just across from the nk and saw the entire performance the robbers but was afraid to move he was less than sixty feet from

e gunman who was guarding the ont and to move might have meant ath to him should the bandit dis- over him. He heard them blast four mes, watched them get into the car, d drive away and then he turned in e alarm and the sheriff was notified t by the time he and his men could t there the bandits had gotten away.

The reports vary on the amount of oney secured. Some say $5,000 in sh and $40,000 in Liberty Bonds, we are unable to say just how uch the robbers got away with.

HEN AND NOW—TIMES HAVE CHANGED—NO DONATIONS

Waverly Independent: Last week e received and paid for two tons of rint paper. This shipment cost us 280 per ton. Four years ago we got much better grade of paper at $80 er ton. That's a mere increase of 200 per ton. And some papers are asting paper sending out sample opies. And there are still a few sell- ng their papers at $1.50 a year with direct loss staring them in the face. The newspaper that sells for $1.50 these days must have a mighty poor pinion of itself, or has a graft where- by it can make somebody else pay its oss on newspaper subscription.

$1,000 PER QUART

A story is being told on one of our former residents who does not live 100 miles from here now that is pretty good. He made a deal to buy five cases of Canadian Club Whiskey of a bootlegger. The deal was to be put across at 10 o'clock at night at the edge of town where he lives. He met the fellow, sampled the whiskey and paid him $1,000. He returned home to find that he had one quart of "good" whiskey, the one he had sampled, the other bottles being filled with water. Now we can not vouch for the truth of this story. We can say though that we believe this man would be willing to pay the thousand for what he supposed was five cases of whiskey, and further he could raise the thousand all right.—Garner Signal.

ANOTHER CRIPPLE

Adolph Lauritzen came home the other day from Ringstead where he has been working with his brother in the carpenter trade this summer. Adolph came home on crutches which came about when he was working in a corn crib a few weeks ago when the ladder on which he was standing slipped and he fel to the ground, breaking the bone below the knee on his right leg. Klemme is truly the home of cripples the past two weeks and no doubt Adolph came here so he would have plenty of company with the rest of the "crips."

EXPECT SEWER GANG NEXT WEEK

The city dads expect the sewer men to arrive in Klemme by next week and begin work on the sewer system. The contractors will ship in four big machines to do the work, two machines for digging and two for covering the trench. It is expected that the work will be hustled right through and Klemme will soon have the sewers put in. The water mains will also be laid and extended at the same time.

FORMER KLEMME PEDAGOG MARRIED

Friends of Miss Manila Carlson have received announcements stating that she was married to Mr. Weave Williams on the second day of August at the home of her parents, Mr. and Mrs. G. H. Carlson, at Ingram, Wisconsin.

Mrs. Williams was a teacher in the Klemme schools last year in the primary department.

Her many friends here wish them a happy and prosperous married life.

NOT "EASY PICKINGS" IN THIS FIELD

Henry Lau has a couple of sample stalks of corn in front of his implement store that ought to take all the prizes at the State Fair for height. The salks measure twelve feet and seven inches and as they lean up against the building they look like twenty-five feet high. Henry has a whole patch of corn like that at home and he figures he will not have "easy picking" because it is so tall that he will have to husk the ears from a step ladder. Can you beat it?

THRESHING RINGS FINISH ROUNDS

Louie Katter was in our office on Tuesday morning and informed us that his threshing ring finished up Monday, and he thought they were the first outfit to make the rounds near here. But along comes John Bock and tells us that his outfit finished up threshing Saturday afternoon, so wem ust hand the medal to him. Mr. Katter has a gasoline tractor outfit and has finished seven jobs. We did not learn the number of jobs the Bock threshing gang finished.

Wes Lau and Anna Kelly Married

Yesterday afternoon (Wednesday) at four o'clock P.M. occured the marriage of Miss Anna Kelly to Mr.Wesley Lau, both of this city.

The ceremony took plase at the home of Mr. and Mrs. Henry Lau and was solemnized by Rev.Meyer of the First Methodist Church. The affair was a quite home wedding and only the immediate relatives were present.

Both of the young people are so well and favorably known that no introduction is neccessay. Congratulations are extended.

Agriculture Best.

Agriculture for an honorable and high-minded man is the best of all occupations and arts by which men procure the means of living.—Xenophon.

Proud of His Ignorance.

"Do you know anything about the stock market?" "Not a thing. That's one place where I am sure ignorance is bliss."

Versions of "Star-Spangled Banner."

The third line of "The Star-Spangled-Banner" has had two versions. Bryant, in his "Library of Poetry and Song," gives it "Whose broad stripes and bright stars through the perilous fight," and Stedman, in his "American Anthology," makes it read, "Whose broad stripes and bright stars through the clouds of the fight." No version of the song makes the line end with "night" instead of "fight."

The Faith Cure.

"Mamma," said little Betty, "my kitty is sick and I have been trying to give her some of my medicine, but she won't take it." "Of course not," replied her mother. "Cats never take medicine when they are ill." "Well, I declare!" exclaimed Betty. "Who'd think a little kitten like that would use the faith cure?"

FOR SALE—I have my home for sale. Call on E. S. Uben, Klemme, Iowa. 3wc.

The Times "Devil" Says

NURSING SERVICE IS RAPIDLY EXPANDING

This American Red Cross Work Flourishing in Small Towns Throughout Country.

More than 37,000 graduate nurses have been enrolled in the American Red Cross to date and its department of nursing is daily increasing this enrollment.

The department of nursing has been authorized to maintain an adequate reserve of nurses for the army and navy. It will continue to supply the needs of the United States Public Health Service to which it has assigned more than 1,000 nurses in the last year.

It will assist in establishing proper nursing service in foreign countries where the American Red Cross has organized hospitals, dispensaries and schools for nurses. Courses in home hygiene and care of the sick have been started for thousands of women who have never received any education in this direction. Rural nursing which was in its infancy a short while ago has been put ahead at least a decade through the work of the department of nursing and local Red Cross chapters.

Public health nursing has been extended to many rural communities and now flourishes actively in hundreds of small towns and counties. Nearly a thousand efficient nurses have already been assigned to this kind of work.

The department of nursing is uniting with other organizations in a year's campaign in recruiting nurses for training schools, in educating the general public as to standards of nursing education and in showing communities their responsibility toward schools of nursing. It will endeavor to meet all these needs as well as to continue the enrollment of dietitians who will be utilized as instructors in home dietetics, in developing nutritional clinics, and in supplying dietitians for the United States Public Health Service and the civilian hospitals.

The Nursing Service will continue to offer to women and young girls the opportunity of securing instruction in home hygiene and care of the sick in every community in the country. This instruction has not only laid the foundation for public health but in some places has given impetus to the establishment of hospitals and community school houses.

"As a community profits by the work of the nurse," says Miss Clara D. Noyes, director of the department of nursing, "it is logical that the community should be aroused to its responsibility. The American Red Cross stands ready to help in a general campaign of recruiting and must have the support, sympathy and understanding of the medical profession as well as the intelligent co-operation of the people at large."

HOME SERVICE FOR EVERYBODY IN NEED

Do you know what the present day Home Service of the American Red Cross is?

Many people do not know that, besides completing the work for ex-service men, especially the disabled, it provides the same neighborly service to families in general that it formerly gave families of soldiers, sailors and marines.

"Home Service covers a wide and varied field," says Frederick C. Munroe, general manager of the American Red Cross. "It gives aid to families in solving such problems as budget planning, marketing, tiding over times of financial stress, keeping children in school, helping crippled children, widowed and deserted mothers, children backward in school and children in conflict with the laws. It renders service to the homeless and transient, to the illiterate, to tenement dwellers, to the unemployed, and gives friendly assistance and advice to foreign speaking groups."

In addition to helping families in the solution of their own problems, Home Service helps in strengthening the weak spots in the social life of communities. It joins hands with others to make communities safer, healthier and happier.

Organizing action along lines in which the community is already interested is one of the objects of Home Service. It has established community meetings, patriotic celebrations, pageants and picnics. Rest rooms, recreation facilities, play supervisors and moving pictures have been provided. Through Home Service other agencies are influenced to bring about improved commercial amusements and better school facilities and to promote traveling libraries as well as to secure county agricultural and home demonstration agents.

If you need assistance at any time, go to the secretary of the nearest Red Cross chapter and describe the situation. Your confidence will be sacredly respected and every possible effort will be made to aid you.

American Red Cross Roll Call.

The Fourth Annual Roll Call of the American Red Cross will be held this year from Armistice Day, November 11, to Thanksgiving Day, November 25, inclusive. During this period the men and women of the United States will pay their annual dues and renew their membership.

No Two Persons Are Alike

Difference in Hands, Feet and Limbs

It is a scientific fact that no two persons in the world are alike. Stop for a moment and think and one will realize that this is true. Take any one of your friends and you will easily recall that while two have one or more points of similarity there are a dozen different features in which they do not agree at all. Whoever heard of twins that were alike in everything? They may look the same in a general way, but they are not; there will be one or more characteristics that will absolutely identify one from the other.

Getting down to actual facts, no two sides of a person are alike; the left is different from the right. The right hand is larger than the left, but the left foot is nearly always larger than the right. A person's right arm is longer, heavier and larger than the left, possibly because it is the working arm of the body, while the law of opposites decrees that the left leg shall be slightly larger than the right. Again, one ear is always larger than the other or one shoulder is higher than its companion, and so it goes on down the line.

DR. ZINN RETURNS FROM TRIP

Dr. Zinn returned Friday evening from a three weeks' trip in the west. About hree weeks ago the Doctor and his brother from Battle Creek, Mich., left on a tour through the west. They went from here to Des Moines, then to Denver, Colorado, where they spent a few days. They took a five day trip through the Yellow Stone National Park, visited at Colorado Springs and then their journey took them farther west. They stopped off at Salt Lake City, Utah, and enjoyed a swim in the famous salt lake. Dr. Zinn says the water contains about twenty-five per cent or more of pure salt and the water buoys a person up so that he can sit in the water without sinking. This is the famous Mormon city and Doc. thought perhaps he might be able to land a couple of wives, but says they wouldn't even give him one. From Salt Lake City they went to Billings. Montana, for a visit and then to Round-Up, Montana, where they visited their sister. Their next trip was toward home and they headed for Minneapolis where the brother of Dr. Zinn went hrough the flour mills as he is interested in that line of work and the Doctor went on to Rochester, Minn., to visit he Mayo Bros. famous hospital and from that place he came home. About the first thing he told us was that he enjoyed the trip all of the way and saw a great deal but old Iowa looked the best of any of the wonderful places he had visited.

Louis Crommelin Chiefly Responsible for Progress of Irish Linen Industry

Louis Crommelin, who fled from France after the repeal of the Edict of Nantes in 1699, is chiefly responsible for the Irish linen industry. When he left France he was accompanied by a number of refugees who helped him greatly improve the Irish linen trade. In 1711, when the board of trustees was formed to encourage and extend the manufacture of linen in Ireland, the machinery in use was very simple and was worked principally by hand. Soon after, in 1725, new machinery was invented and applied for many of the processes.

In 1765 Dr. James Ferguson of Belfast received a premium from the linen board for the successful application of lime in linen bleaching. He introduced the use of sulphuric acid in 1770. Up to that time the acid employed was buttermilk and soil of cattle applied instead of alkali.

After that improvements took place rapidly. Potash for making dye to boil the yarns and cloth came into use in 1789, and choride of lime, the bleaching agent, in 1795.

America Is Surpassed by Europe in Eating Potatoes

In this country the chief and practically only interest in the potato today is as a vegetable for the table. We are greatly surpassed in this use by Europe, and Germany in particular. In that land the average annual per capita consumption was seven bushels in normal times, while our own was two and a half. The laborers of eastern Germany ate seventeen bushels per annum. The other European countries are, as a rule, far above us and the diet of many an Irishman is said to be potatoes and spring water—for breakfast, dinner and supper. In addition to this direct consumption, uses of the potato largely unknown to Uncle Sam are for flour, starch, dextrine, glucose and alcohol.

Duty to Childhood.

Men of today have a duty to childhood because they themselves have once been children. Each generation is a recipient in its turn of the accumulated wisdom and piety of previous ages, and is in duty bound to pass that on, "plus a certain increment due to its own exertion."

FIRST METHODIST EPISCOPAL CHURCH

A. H. Meyer, Pastor

Preaching service Sunday morning at 10 o'clock.

Sunday School at the close of the preaching service at 11 o'clock.

Union service in the country church Sunday night.

Midweek prayer meeting on each Thursday evening at 7:30.

All are invited to our services.

Klemme Sox Trim Clear Lake Nine

THE KLEMME SOX WIN ANOTHER ONE

Local Tossers Defeat Clear Lake

A few weeks ago Clear Lake came over here one Sunday and beat the Klemme ball players in a close game by one score. Sunday the Sox went to Clear Lake for a return game and came back victorious. Our boys are coming right to the front now and have gotten over their streak of hard luck. They have taken two games straight now and are owrking fine. Lightsinger opened the game for the Klemme Sox and did some real fast twirling but he injured his arm and went to the bench after three innings. "Bally" Kluckhohn stood on the mound the rest of the game and threw a fine game. "Fat" Kluckhohn was the man behind the bat and he also played a good game. The line up was about the same as last week throughout the field. Klemme won the game 14 to 11. They are coming right up now and we expect to see some real ball team here this year. You can call them the "Silk Sox" now, and they won't get peaved at all.

GARNER TO HAVE BALL TOURNAMENT

Grner baseball fans are planning to have their annual baseball tournament this year September 7, 8 and 9. This is generally quite an event and Klemme people are always interested in the ball tournament at Garner.

YOUNG BOY LOSES FOOT

Oliver, th efifteen-year-old son of Mr. and Mrs. Carl Robinson, residing southwest of town, suffered an accident Tuesday that necessitated the putation of his right foot.

He was at the John Ross farm occupied by Laurence Perkins, assisting with the threshing and while helping about the grain elevator the accident occurred. The connection in the tumbling rod to the elevator became loose and a punch was used to fasten it, and in working about this rod Oliver accidentally stepped too close and the whirling punch struck him, cutting and tearing the flesh and completely dislocating the ankle joint. It caught his clothing and before the team on he power sweep could be sopped his enire limb was badly lacerated. Fortunately John Ross was near and hastily stopped the team or the result would certainly have proven fatal as the boy's clothing was tightly wound about the rod which was gradually pulling his body under the whirling punch.

The littles ufferer was rushed to the Dr. Sams hospital at Clarion and today (Wednesday) the injured foot was amputated and at last reports he was getting along as well as could be hoped for.—Kanawha Reporter.

TEAM RUNS AWAY

Emil Beier's team ran away last Friday morning and tore things up in general for a few minutes. Emil had been in town and was on his way home when the bridle came off one of the horses which frightened it and the team started on a run. Mr. Beier could not hold them back with the one bridle off and the team ran into Henry Ludeke's fence where they piled up and were subdued. The harness was damaged some and one horse received a cut on the fron tleg but no other damage was done.

SCHOOL OPENS HERE AUGUST 30

The summer vacation will soon end for the students of the Klemme schools. School will open Monday, August 30th, and all are expected to be on hand and be ready for another year of study. At his time we are unable to secure a list of teachers for the coming semester but expect to run the names in the next issue of the Times.

First Milling Process.

The conversion of wheat into flour was one of the earliest developments of civilization, and even the primitive races in the dawn of history submitted the grain to a coarse pounding between stones. Perhaps the oldest flour "mills" in existence are the rude stones found among the remains of the ancient lake dwellings in Switzerland. By a mortar and pestle arrangement the wheat was reduced to a coarse meal. Crude as this method was, it contained the germ of the modern flour mill.

Thoughtful Bobbie.

When Bobbie went to see his grandmother he was much interested in whatever went on in the kitchen. One morning she said to him: "I'm going to make you a nice little pie in a saucer, Bobbie, all for yourself. Don't you think I'm pretty good to take so much trouble?" Bobbie thought about it a moment. "Grandma," he said, "mamma told me not to be a bother, and if it's going to be any trouble you can just as well make my pie the reg'lar size."

Road to Wickedness.

The many prove the wisdom of Hesiod, who says that the road to wickedness is smooth and very short, and there is no need of perspiring. But before virtue the immortal gods have placed the sweat of labor, and long and steep is the way thither, and rugged at first; but when you have reached the top, then, however difficult, it becomes easy.—Plato.

The Oldest Joke.

Johnny Hoy claims that the oldest joke is one about the farmer's wife who went to the door and found an agent. "Can I sell you an exterminator for vermin?" asked the agent. "No," said the farmer's wife, who had been pestered to death with agents. "We have all the vermin we need."—Milwaukee Sentinel.

Most Sacred Thing.

Everything that is mine even to my life, I may give to one I love, but the secret of my friend is not mine to give.—Philip Sidney.

Where Water Is Precious.

In Cape Town, where water—especially in the hot summer months—is a very precious fluid, it is the custom to shut off the supply at night, in order to eliminate waste as far as possible. The authorities complain that persons frequently go to a tap to draw water after the supply has been shut off for the day, and finding no water, thoughtlessly leave the tap open. Consequently the next morning when the supply is turned on a large quantity of water runs to waste unnoticed.

The Orange in Spain.

It is considered a very healthful thing to eat an orange before breakfast. But who can eat an orange well? One must go to Spain to see that done. The senorita cuts off the rind with her silver knife; then, putting her fork into the peeled fruit, she detaches every morsel with her pearly teeth and continues to eat the orange without losing a drop of the juice and lays down the core with the fork still in it.—Exchange.

True.

"I understand that once he served a short term in prison. Yet he has redeemed himself and lived it down absolutely." "Well he would have lived it down, if it wasn't for the fools like you and me who continually keep digging it up for conversation purposes."

Playing a Deep Game.

Ethel had been shopping with her mother. When they returned home she was tired and hungry, and, prompted by a desire for a good meal, she said: "Mamma, let's play I'm your guest and am going to stay for dinner."

Answers the Purpose.

"Your true lover is often at a loss for words." "But nature makes that up to him by supplying him with an extensive vocabulary of gurgles, sniffles and sighs."—Louisville Courier-Journal.

Uncle Pennywise Says:

I've often heard a man offer to whip another with one hand tied behind him—but I've never seen it tried.—Kansas City Journal.

Water-Loving Trees.

Water-loving trees along streams often consume more water than they save. Estimates are that a beech forest will transpire nearly 50 per cent of an annual precipitation of 20 inches, while a coniferous forest but eight per cent of the same or like precipitation.

Flying Moth Not Destructive.

When a woman opens a closet and a moth flies out she thinks, as a rule, that the moth has been eating her clothes. As a matter of fact, however, the creature does its eating in the grub stage, and is harmless when it has become a flying thing—save that it will produce a ravenous progeny.

The Inner Meaning.

Remember that as you live your life each day with an uplifted purpose and unselfish desire, each and every event will bear for you a deep significance—an inner meaning—and as you learn their import, so do you fit yourself for higher work.—William Q. Judge.

Washington Honored While Alive.

Washington was the only American whose birthday was publicly celebrated while he still lived. February 22 was quite widely observed while he was president.

King David's Militia.

King David organized a national militia, divided into 12 regiments, under their respective officers, each of which was called out for one month in the year. At the head of the army when in active service he appointed a commander in chief.

Make Haste Slowly.

Remember that some training is necessary before a man can become a farmer. Even potato raisers have to know how to drill.

What Men Do.

We owe thanks to Machiavelli and all others who write what men do, not what they ought do.—Bacon.

Boiling Cracked Eggs.

Cracked eggs can be boiled safely by placing a little vinegar in their water.

AMERICAN RED CROSS TO GIVE RURAL HELP

Program for Public Health and Community Welfare Is Now Well Under Way.

Rural communities and towns of less than 8,000 population benefit in a very large part by the public health and community welfare work of the American Red Cross. Almost all of the 3,600 Red Cross chapters have some rural sections in their territory. Therefore the Red Cross Rural Service.

Briefly, the purpose of Rural Service is to assist people to get out of life more health, wealth and happiness. In this purpose public health instruction and general educational progress of both children and adults play a big part.

Recreation is found to be one of the biggest needs in rural life. There is lack of sufficient play-life for the children and social life for the adults. Picnics, pageants, debating clubs, baseball leagues, community singing and other social events which bring the people of surrounding communities together have been organized and carried on under the guidance of Red Cross rural workers to great advantage. In many instances solving recreational problems and getting people together proves to be the awakening of the community to other conditions which may be improved by united action.

As a result of community organization, townships in which there had been neither plans nor interest in community progress have been organized to work together with the unified purpose of bringing their community up to the most enlightened standards. Lecture and musical entertainment courses have been started as a result of community meetings, as well as circulating libraries, Red Cross schools of instruction in Home Nursing, Care of the Sick and First Aid. In the larger towns the need for restrooms and public comfort stations is being met. Playgrounds for the children have been established and recreational activities worked out for the year.

In order that there may be concerted effort in carrying on the programs of the various welfare agencies in the rural districts, Red Cross Rural Service helps the organizations already on the ground. The main object of the service is to lend a hand everywhere and take the lead only where necessary.

JUNIOR RED CROSS ACTIVE IN EUROPE

Garden seeds for Polish orphans, milk for anaemic Greek babies, carpenters' tools for Czecho-Slovakian cripples—these are only a few of the gifts that young Americans are sending to the war-crushed children of the Old World.

Through the Junior Red Cross the boys and girls of the United States are giving a fresh start in life to little war orphans scattered all over Europe. They have set up orphans' homes in France, school colonies in Belgium and Montenegro, and day schools in Albania.

They are sending dozens of young Syrians, Montenegrins, and Albanians to American colleges in Constantinople and Beirut, and maintaining more than a hundred orphans of French soldiers at colleges and trade schools. In orphanages and farm schools up and down the peninsula of Italy there are nearly 500 wards of American Juniors.

Last winter a thousand French children from the inadequate shelters of the devasted regions were sent by the Junior Red Cross to spend the cold months in warmer parts of France. At the same time five thousand little Belgians were having a hot lunch every day at Junior Red Cross school canteens.

American school children have already raised something like a million dollars for these enterprises, and they are still hard at work.

In China, through campaigns of education, the Junior Red Cross is helping to combat widely prevalent blindness and cholera.

RED CROSS RELIEF IN CENTRAL EUROPE

But for timely assistance of the American Red Cross during the last year, a large proportion of the 20,000,000 population of the Balkan States might have starved or perished from disease or exposure. Six million dollars worth of food, clothing and medical supplies have been sent to the Balkans—Roumania, Bulgaria, Albania, Montenegro, Serbia, Bosnia and Greece—since the beginning of Red Cross relief operations in Central Europe, while millions of dollars worth of food alone has been sent to the needy in these states.

The money expended by the Red Cross in this stricken portion of Europe has been used to set up hospitals, orphanages, dispensaries, mobile medical units and to help in the general reconstruction of devastated areas. American tractors and other farming implements have been sent to the agricultural regions where aid has been given in plowing the land.

By the last of this year probably all American Red Cross agencies administering relief in Central Europe will have withdrawn. By that time, it is believed, the people will have approached a normal state of living and will be able through their own agencies which the Red Cross has helped set up to provide for themselves.

TIRE SALE

We are overloaded on tires and have

$3,000 Worth On Hand

and we need the Money, so we must Reduce Our Stock!

For the next 20 days we will sell tires at a discount, also giving away--

Three Premiums with Each Tire!

$2 worth of Premiums with each tire we sell.

ALL SIZES IN STOCK

GOODRICH, GOODYEAR, FIRESTONE--all new, most of them came in the last 30 days. These are the best brand of tires on the market. *Guarnteed 6000 miles.*

Come on!

TABLES ARE ST FOR DUCKS

fitable Returns Obtained Green Feeds Pre-minate in Rations.

G EGGS FROM PEKIN

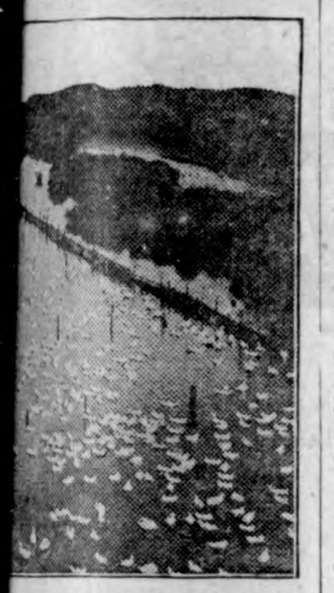
wls to Be Marketed Should tened for Two Weeks Be- Killing—Fish Aid in Reducing Feed Bills.

may be fed on the rations nded for fowls and chickens, r results are usually secured g more green and vegetable l a larger proportion of mash. n Pekin ducks are used large- tching, and the profit is se- producing green ducklings; these ducks are fed a main- ration after they stop laying mmer until about December a laying ration is given and unt of mash increased.

Runners for Eggs.

Runner ducks have been in- as producers of commercial they should be fed laying ra- roughout the year if kept for duction.

ducklings to be marketed e fattened for two weeks be- ing on a ration made of three y weight, of corn meal, two low-grade flour or middlings,



e Duck Farm on Long Island.

rt of bran, one-half part of beef with 3 per cent grit and 10 per reen feed. Feed this mash three daily, or use a mash of three corn meal, one part low-grade flour, one part bran, 5 per cent crap, and 3 per cent oyster shell, the green feed and grit added.

Influence of Feeds.

green feed is sometimes left the ration during the last seven of fattening, as it tends to color eat and may produce a slightly rather than a firm flesh; how- it is easier to keep the ducklings od feeding condition on a mash ining green feed. Boiled fish may e the beef scrap, but should only d up to within two weeks before are killed, as it may give a fishy to their flesh, United States de- ent of agriculture specialists st. A considerable quantity of fish is also fed in the mash to ducks in sections where the farms border on the water and e fish is available at a very small This fish aids materially in re- g the cost of feeding.

ER KICK HORSE ON FOOT

al Cartilage Is Liable to Be ruised, Causing Inflammation and Lameness.

hen examining the foot of a horse ule never kick the foot to make animal lift it off of the ground. In ing the foot you are liable to se the lateral cartilage causing in- mation and deposit of bone cells. deposit of bone cells is the start- of a side bone, which will cause eness. This lameness once started xtremely hard to stop. So never the horse on the foot.

PERIOR FALL VEGETABLES

ishes and Lettuce Are Appreciated and Are as Easily Grown in Autumn as in Spring.

adishes and lettuce are appreciat- gain, as the hot weather has made r growth difficult and their quali- poor. In the fall they are as easily wn as in the spring and as good. ittle frost does not hurt them, and last over a long season. The ge varieties of radishes planted in the summer will make immense ts that can be stored and kept r winter.

EEDING OATS TO CHICKENS

wls Will Take to Them Readily f Sweet, Clean and Heavy—Dis- like Long Points.

ats make good summer feed if you get the fowls to eat them freely. st fowls will take readily to clean, eet, heavy clipped oats weighing 40 nds per bushel, while they would use that which has long points or ght in weight or musty. A bushel oats contains only half as much rients as a bushel of corn or wheat.

FISH MEAL GOOD AS SUPPLEMENTAL FEED

Excellent in Hog, Poultry or Dairy Rations.

Bureau of Chemistry Knowing High Protein Content of Scrap Has Been Active in Converting Material Into Food.

The common domestic pig will never be able to write a book on table manners but he knows how to order a meal as well as anyone. He is in a fair way to demand a fish course to supplement his salad and vegetable diet. He will take his fish in the form of fish meal, the refined by-product made from sound, wholesome raw material at the sardine, tuna, and salmon canneries, or from the menhaden.

The fish meal is not to be confused with "fish scrap," a coarser by-product much used for fertilizer; the meal is made from clean, sound material and is intended to be used as food for cattle and hogs. Formerly, the cannery waste was all made into "scrap" for fertilizer purposes, but the bureau of chemistry, United States department of agriculture, knowing the extremely high protein content of the scrap, has been active in converting this material into a high-grade protein feed. The cleaned, selected portion is ground to a fine, palatable meal which may be used to replace tankage in hog, poultry, or dairy rations.

Fish meal has been recommended as a supplementary ration before now, but popular prejudice against a badly prepared product has discouraged its use. The department of agriculture has proved by feeding experiments that fish meal equals the high-priced tankage as a ration ingredient, and better methods of selecting and milling have removed the causes of prejudice.

The oil content of the meal adds materially to its feeding value. So far the experiments have shown that the meal does not taint the animal product, whether it be pork, butter, eggs, or milk. Moreover, by diverting the fish meals to his animals instead of supplying it directly to his land as fertilizer, the farmer loses but a trifle of its fertilizing value and gains its entire feeding value—thus making the material yield two profits in the place of one.

KILL OUT PERENNIAL WEEDS

Quack Grass and Canada Thistle Are Most Troublesome and Offer Greatest Resistance.

Perennial weeds offer the greatest resistance and require more thorough and persistent effort to destroy them. Two of the most troublesome of our common weeds are quack grass and Canada thistle. The former may be distinguished from other grasses if its characteristic features are known. Whatever method will destroy quack grass will also kill Canada thistle or any other perennial weed.

Fallowing or cultivation without a crop is the most certain method of eradication on large areas and may be used to good advantage except on sandy soils and those continuously wet or very porous. Success depends upon the depth of plowing and frequent cultivation. The prevention of all leaf-growth in weeds means their certain death. Certain cropping systems will usually be successful with quack grass.

SUCCULENT FEED INSURANCE

Mighty Good Plan to Fill Silo During Favorable Seasons for Feed in Dry Seasons.

The silo is the best feed insurance that can be provided. Even when seasons are favorable and there is plenty of rain it is a mighty good plan to fill the silo with green succulent feed and carry it over to the next year, when a dry season may come and cause a shortage of both feeds and pasture.

LESS HOGS AND CATTLE

Hogs have been reduced relatively about 5 per cent during the first four months of this year on the farms of the United States as compared with the trend during the first four months of 1919, reports the bureau of crop estimates, and there has been a relative reduction of 6 per cent in cattle during these four months of this year in comparison with the same time last year.

OPEN-AIR MARKETS FOR CLUB PRODUCE STIMULATES DEMAND

Two Junior Star Saleswomen at the Lincoln (Neb.) Boys and Girls' Garden Club Market.

At Lincoln, Neb., there is a boys and girls' garden club that has created a new departure in the marketing of garden products. The members of the club—4,000 strong—produced more garden fruits and vegetables than they could use. How could they dispose of the surplus crop? An open-air market was suggested. The board of trade and chamber of commerce favored the plan, and a Saturday morning open-air market was created.

At first the business men of Lincoln complained that it would interfere with the regularly established produce trade; later they learned that, on the contrary, the boys and girls' Saturday market created a larger demand for produce during the week, and they are now enthusiastic over the arrangement. That open-air market has become a regular factor in the economic scheme of things at Lincoln and, curiously enough, 85 per cent of the members of the club are girls

It may be popularly believed that the marketing end of farm production should be conducted by the men. That may be true with regard to some commodities, but marketing experts of the department of agriculture maintain that sometimes women are better qualified to handle the marketing work in connection with poultry, eggs, and canned products. The production of poultry and eggs is largely a matter attended to by farm women. Canning is left entirely to the women.

This Youngster Finds the Marketing of Garden Produce a Profitable Business.

If farm products can be marketed to best advantage by those who have the greatest intimacy with them, does it not follow that the department's contention is correct?

Several hundred thousand gallons of apples are used in Spokane, Wash., each year in the manufacture of bakers' pies. Two years ago 130,000 gallons of apples annually were shipped to Spokane from the state of New York. Today, although the demand is greater, the quantity of imported apples has been reduced considerably, for the demand is supplied at home. That accomplishment was made possible by 70 young girls—girls between the ages of ten and eighteen—who knew that thousands of gallons of cull apples were going to waste on farms in the vicinity of Spokane. Through the assistance of the United States department of agriculture and Washington state agencies, a girls' canning club was formed, with the result that these small canners are furnishing Spokane bakers with a large part of their canned-apple supplies. Not only do these young girls attend to the work of canning, but they handle the entire transaction from start to finish.

Learning Better Methods.

It is conservatively estimated that 55 per cent of the membership of boys and girls' club work throughout the nation consists of girls. Within a few years the majority of those girls will take their places as American farm women. They are now, in their teens, studying and working out problems that will confront them later on. And while they are doing that they are learning the fundamental principles in scientific production and marketing methods that must supplant those being used at present in order to meet the increasing food requirements of our country.

The grown-ups would do well to emulate their example. On every hand are instances where, by the use of improved methods, boys and girls are securing larger crop results with a minimum of effort, and by proper grading, packing, and marketing methods receiving a maximum of reward for their labors.

Some of the finest eggs in the country are produced in Kansas and Colorado through the activities of boys and girls. Boys and girls in every state are prize winners for dairy, beef, and pork production. In New Jersey, through proper grading and packing methods, the boys and girls generally top the egg markets by at least 5 cents a dozen. When eggs were 80 cents a dozen in Massachusetts last year the eggs marketed by boys and girls' clubs brought $1 a dozen because of their superior quality. Boys and girls' poultry generally sells at a higher price than the prevailing market level.

A Young Business Woman.

There are many individual instances of notable achievements by boys and girls. One is that of a fifteen-year-old girl in Massachusetts who marketed about 3,000 cans of high-grade fruits and vegetables last year. The products were so well put up that the Colony club of Springfield, Mass., desired to contract for the entire output. At the present time this young woman has difficulty in meeting her orders, which call for 5,000 cans of produce this year. There is a potential business woman who is destined to be one of America's highest types of useful citizen.

CARPET GRASS LIKES WELL-PREPARED BED

Seed May Be Sown Any Time Till After Midsummer.

Method of Seeding Often Used Is to Cut Grass With Mature Seed and Scatter Hay Over Land Where a Pasture Is Desired.

On cultivated land, carpet grass succeeds best on a well-firmed seed bed. The seed may be sown any time from early spring till after midsummer, when the moisture conditions are favorable. To secure a full stand of the grass promptly, seed should be sown at the rate of ten pounds per acre. A method of seeding that has often been used is to cut grass with mature seed and scatter the hay over the land where it was desired to establish carpet-grass pasture.

To establish carpet-grass pasture in open forests or on cut-over land, without going to the expense of clearing, the standing trees should be deadened by girdling. The land to be seeded should be burned over in winter in order to remove all the tall straw or broom sedge, wire grass, and other bunch grasses. Plowing or disking is not necessary. Carpet grass at the rate of five pounds per acre may then be sown at any time after the weather becomes warm, but preferably when there is ample moisture.

Farmers' Bulletin 1130 on "Carpet Grass" may be had free upon request of the United States department of agriculture, Washington, D. C.

COTTONSEED MEAL FOR FEED

Superior for Work Horses and Mules, but It Must Be Fed Sparingly —Safe Amount.

Cottonseed meal makes a fine feed for work horses and mules, but it must be fed sparingly. Experiments show that one pound per day for each 1,000 pounds of live weight of the horse is a safe amount to feed.

GENERAL FARM NOTES

Why not grow more alfalfa?

* * *

Rule for taking care of machinery: Keep it lubricated, adjusted and clean.

* * *

As a crop to sow in wheat or oat stubble, cowpeas should not be forgotten.

LIVE STOCK

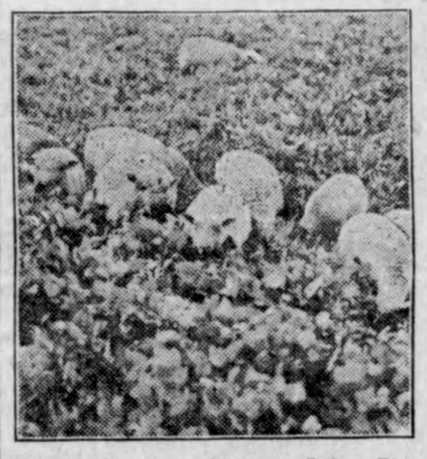
ELIMINATE ALL POOR LAMBS

Carcasses of Improperly Finished Animals Do Not Find Ready Sale on Market.

Just why the latter part of August and early part of September invariably demoralizes the lamb market has puzzled market students for many years. A large percentage of lambs coming out of Illinois, Wisconsin, Michigan, Ohio, Indiana, and Iowa are small native animals that have to be sold for what they will realize. These lambs coming on a usually congested market sell for a marked reduction and since the consumption of lamb is limited in certain sections of the country, carcasses from these improperly finished lambs do not find a ready sale. This annual occurrence in this section not only penalizes the growers of good lambs but means a loss to the producers of the inferior kinds. Since the product is inferior it has a tendency to prejudice consumers against lamb.

Farmers in the corn belt states surrounding the Chicago market are advised by United States department of agriculture specialists to make a concerted effort to put their lambs in better market condition. It is thought certain that most of those who were responsible for this year's native lambs could have put them in much better market condition, with good profit to themselves. It is regrettable that so large a number of undocked and uncastrated, poorly finished, scrub-bred lambs fill the markets from these sections.

The man who keeps a small flock on the farm is advised to remember the importance of handling sheep wisely. The ewes should be bred early enough in the fall so that they will produce their lambs in March and April. The lambs should be docked and castrated when they are ten days old. They should receive sufficient feed to keep them growing in order that when they are ready for the market in about four months they should weigh from



Young Sheep on Pasture Being Prepared for Market.

65 to 70 pounds and carry a uniform covering of flesh. Lambs which are well bred, properly cared for, docked and castrated, and in good flesh will go onto the market a credit to the man who has produced them and will find a ready sale.

KEEP FLIES OFF LIVE STOCK

Mixture of Laundry Soap, Water, Crude Petroleum and Naphthalin Is Recommended.

The following mixture is very effective in keeping flies off live stock and its cost is very small:

One pound of common laundry soap, four gallons of warm water, one gallon of crude petroleum and four ounces of powdered naphthalin.

Shave the soap in very thin slices into warm water and stir it until thoroughly dissolved. Put the naphthalin in the crude petroleum and stir until dissolved. Pour the soap and water into the petroleum and thoroughly mix them together.

RAISING REGISTERED CATTLE

Many Farmers Hesitate to Start With Pure-Bred Animals Because of Lack of Knowledge.

Many farmers would like to raise registered cattle, but because of their lack of knowledge of pedigrees or individuality, or both, hesitate to start with pure-bred animals. A safe way to start is to buy a few bred cows or heifers and grow in experience as the herd increases in numbers.

LIVE STOCK NOTES

The amount of concentrates fed can be greatly reduced if the sows have access to good pasture such as bluegrass, clover, alfalfa or rape.

* * *

Good pasture and considerable range for exercise not only lowers the cost of maintenance, but also serves to keep sows in healthy condition.

* * *

An old but correct statement that "the bull is half the herd" needs to be heeded more than ever, owing to the high prices of grain, labor and overhead expense connected with production.

OATS BEST CROP

Statistics Show Advantages Over Corn Growing.

On Comparatively Cheap Land in Western Canada Farmers Get Record Yields—Cost Per Acre Much Less Than Corn.

How much more does it cost to grow an acre of corn than to grow an acre of oats? To get a proper comparison it is necessary to take an illustration from a farm on which both crops are grown successfully. An example has just been brought to the writer's attention of the comparative cost of growing corn and oats on a Minnesota farm. It is furnished by Albert Inmer, a well-known farmer in Cottonwood county, Minn., in an article which appeared in the Cottonwood Citizen.

Mr. Inmer says: "I had a curiosity to know how much it would cost to raise an acre of oats and corn. To find out I kept account, during the year, of the time required and the cash expended to grow the above mentioned crops." His figures show that it cost him $31.49 to grow an acre of corn and $18.13 1-3 to grow an acre of oats, or a difference of $13.00 an acre in favor of oats.

Provided the respective crop yields are not altogether out of proportion to the cost of growing the crop, this seems to be a good argument in favor of growing oats. But to grow oats successfully it is not necessary to use $150 or $200 land. In western Canada some of the best oat-growing land in the world can be bought for about $20 an acre. On this land good yields and a high quality of grain is obtainable.

Fifty to sixty bushels to the acre in properly prepared land is a fair average yield for oats in western Canada in a normal season but yields of up to 100 bushels, and even more, to the acre have been frequent in good years. The quality of oats grown in western Canada is attested by the fact that at all the international exhibitions for many years past oats grown in western Canada have been awarded the leading prizes. There is on record oats grown in western Canada that have weighed as much as 48 pounds to the measured bushel, and the dominion grain inspector is authority for the statement that 85 per cent of the oats examined by him in western Canada weigh more than 42 pounds to the measured bushel. The standard weight for a bushel of oats is 34 pounds.

Samples of these oats weighing upward of 45 pounds to the bushel are on exhibition at the Canadian government information bureau, located in various cities in the United States.—Advertisement.

Earthquakes.

The origin of earthquakes has been traced to two principal causes, the first of which is tectonic, and the second volcanic. The former refers to movements in the earth's crust, known as faults, possibly caused by the shrinking of the interior of the earth by reason of cooling.

DEPENDED UPON IT 20 YEARS

Lydia E. Pinkham's Vegetable Compound Has Been This Woman's Safeguard All That Time.

Omaha, Neb.—"I have used Lydia E. Pinkham's Vegetable Compound for over twenty years for female troubles and it has helped me very much. I have also used Lydia E. Pinkham's Sanative Wash with good results. I always have a bottle of Vegetable Compound in the house as it is a good remedy in time of need. You can publish my testimonial as every statement I have made is perfectly true."—Mrs. J. O. Elmquist, 2424 S. 20th Street, Omaha, Nebraska.

Women who suffer from those distressing ills peculiar to their sex should be convinced by the many genuine and truthful testimonials we are constantly publishing in the newspapers of the ability of Lydia E. Pinkham's Vegetable Compound to restore their health.

To know whether Lydia E. Pinkham's Vegetable Compound will help you, try it! For advice write to Lydia E. Pinkham Medicine Co. (confidential), Lynn, Mass. Your letter will be opened, read and answered by a woman, and held in strict confidence.

"Watch Your Feet"

Install your Furnace Now!

COME in this week and see the Globe Pipeless Furnace. Learn how it will heat every room of your house evenly and thoroughly with about the same amount of coal you burned last winter to heat one or two rooms.

Let us show you just how the Globe Pipeless Furnace cuts coal bills 25% by getting the maximum heat out of every pound of fuel—hard, soft, slack coal or screenings, coke or wood.

GLOBE

PIPELESS FURNACES

Think of the ease and economy of installing a heating system that requires no pipes, no tearing up of floors, no mutilation of walls or ceilings. *One* register heats the entire house! And no dust or dirt can come upstairs to settle on floors, walls or furniture.

No unnecessary heat in cellar. Simple and dependable in operation. Holds fire from twenty-four to thirty-six hours. Lasts a lifetime. Reasonably priced, too.

It puts you under no obligation to come in and learn all about the Globe Pipeless Furnace.

You'll find the fifteen or twenty minutes well spent.

Jacobs & Son

A House Full of Clean Heat at Little Cost

NATIONWIDE FIGHT AGAINST DISEASE

American Red Cross Will Have Health Centers in All Parts of United States.

The American Red Cross has launched upon a nation wide campaign of fighting disease and physical defect among the American people. A new and unique health institution has come into being as the result of several months' study by the Red Cross Health Service Department at National Headquarters.

Officials in charge of the department predict that before long this new health activity will be in actual operation all over the country, and that the sign—"American Red Cross Health Center"—will become as familiar to the people everywhere as are now the signs of the telegraph companies.

Busy Long Before War.

The interest of the American Red Cross in the fight against disease is not, however, of recent origin. Long before the war the organization began this health service through its medical units in disaster relief work and its department of Town and County Nursing. During the war and following the armistice thousands of American Red Cross officials have been fighting disease in the war-stricken countries. At the same time tens of thousands of local Red Cross officials have been engaged at home fighting disease, notably during the influenza epidemics.

The American Red Cross has determined that all this valuable experience in health service abroad and at home shall not go to waste. So long as there are a half a million people dying yearly in this country from preventable causes, and so long as more than one-third of the American children and young people are victims of physical defects, the Red Cross recognizes the urgent need for continued Red Cross health service at home.

How Organization Works.

The Red Cross Health Center is governed by business principles, applies business methods, and, in its more simple form, can be established and conducted by lay people.

It proceeds upon the demonstrated fact that health is a commodity that can be bought and sold like brooms and soap. Therefore, it establishes itself in a storeroom in the principal business section of the community. It displays its goods in the form of attractive health exhibits in its show windows. It advertises constantly and extensively. And it uses every business and social device to attract customers.

The Red Cross Health Center is of service to the sick in that it gives out reliable and complete information about existing clinics, hospitals, sanatoria and other institutions for the sick and the defective; about available nurses, both trained and practical; about when to consult a physician and why to shun the quack and his nostrums.

Teaching Disease Prevention.

The Red Cross Health Center is, however, of even greater service to the well. It teaches people how to prevent sickness and disease. This is done in many interesting and attractive ways—first of all, by the distribution of popular health literature and through health lectures illustrated with lantern slides or with health motion picture films. Then special exhibits are given, one after the other, on various health subjects. Practical demonstrations are made; also health playlets by children to interest and instruct themselves and their elders. Classes are organized in personal hygiene, home care of the sick, first aid and in food selection and preparation. Health clubs, both for younger and older people, are formed; also Little Mothers' Leagues. Nutrition and growth clinics are conducted for children.

Already more than a hundred of these Red Cross Health Centers are in actual operation throughout the country. Many of them also conduct medical clinics, but the one chief, outstanding feature of the American Red Cross Health Center is its health education service which teaches well people how to keep well.

FRENCH PRAISE FOR OUR RED CROSS WORK

Lauding the work accomplished by American philanthropy for war-stricken France, Andre Tardieu, former high commissioner from that nation to the United States, in a recent article widely commented on throughout the French press, says:

"The American Red Cross has accomplished a work which calls for the heartfelt gratitude of every true Frenchman. In 1918 this great relief organization spent in behalf of France nearly 87,000,000 francs, and in 1919 its expenditures on charitable projects in our country attained the tremendous total of 171,000,000. It has recently turned over to the French relief organizations huge stocks of supplies whose value must be counted in the hundreds of thousands of francs.

"Fifteen million American boys and girls, banded together in the Junior Red Cross of America, are back of a movement to establish the closest ties between themselves and France's younger generation through the charitable works they have financed, and are now carrying out among our little war sufferers.

"The bonds of friendship between France and America is cemented with mutual admiration, respect and gratitude."

AMERICANS ABROAD IN RED CROSS WORK

United States Citizens Far Away Enthusiastic Members of the "Fourteenth" Division.

Among the most enthusiastic and energetic members of the American Red Cross are those citizens of the United States who live outside the continental boundaries of their country—sons and daughters of the Stars and Stripes residing at the far corners of the earth.

These people compose the Insular and Foreign Division of the parent organization, generally known as the "Fourteenth" Division, which has jurisdiction of all territory outside the country proper; that is, Alaska, Porto Rico, Hawaii, Virgin Islands, the Philippines, Guam, and even the island of Yap, which came under our flag as a result of the world war. For the year 1920 this division reported 30,808 paid up members.

The main object of this division is to give our citizens everywhere the opportunity to participate in the work of the organization which stands for the best national ideals. Americans in far places intensely loyal and patriotic, treasure their membership in the Red Cross as the outward expression of their citizenship. It is another tie to the homeland and to each other. There are chapters of this division in Argentine, Bolivia, Brazil, Canal zone, Chile, China, Costa Rica, Cuba, Dominican Republic, Ecuador, England, France, Guam, Guatemala, Haiti, Hawaii, Honduras, Japan, Manchuria, Netherlands, Nicaragua, Paraguay, Peru, Philippines, Porto Rico, Siberia, Spain, Sweden, Switzerland, Syria, Turkey, Uruguay, Venezuela and Virgin Islands.

During the war these scattered members of the Red Cross contributed millions in money, and millions of dollars' worth of necessary articles for the men in service, and sent many doctors and nurses to France. At the same time they carried on an excellent Home Service in their respective communities for the families of those who had gone to war, and in some regions gave large sums of money and immeasurable personal service to the relief of disaster and disease victims.

The division is now establishing service clubs in foreign ports for the benefit of sailors in the American Merchant Marine, making plans to aid Americans in trouble in foreign lands and completing arrangements for giving immediate adequate relief in case of disaster.

It is the Fourteenth Division's part in the great Peace Time program of the American Red Cross.

RED CROSS ASSISTS DISABLED VETERANS

The American Red Cross is carrying on a wide program of service for the disabled World War veterans receiving treatment in United States Public Health hospitals, and those being trained through agencies of the Federal Board for Vocational Education.

In each of the Public Health Service hospitals Red Cross workers devote their time to the general welfare of the service men from the day they enter the receiving ward until they are discharged. After the soldier's discharge the Red Cross continues its friendly service through the Home Service Section in his own community.

The Red Cross maintains a convalescent house at all of the hospitals, where patients can amuse themselves after they are well enough to be up and around. Parties and picture shows in the wards are also furnished, with occasional excursions when convalescence comes.

Great service has been rendered by the Red Cross in mental cases in identifying those who have appeared in state hospitals for the insane, and helping them secure compensation due from the Bureau of War Risk Insurance.

In the Federal Board's various district offices the Red Cross worker, acting with the Home Service Section, makes necessary loans to the men, arranges suitable living conditions, helps collect evidence and supply facts to the Board, assists in "appealing cases" and settles various personal difficulties for the men. The workers also follow up and aid all men who discontinue training.

The Red Cross agents find men "lost" to the Board, help clear up delayed cases and aid the college counselors in their friendly work with the men. Many Red Cross chapters have set up recreation facilities, and in some instances living clubs, so these victims of war may have attractive surroundings and the fun which must go with effective school work.

To the American Red Cross Institute for the Blind near Baltimore, Md., more than half of all the Americans blinded in the World War have come for training. The Institute, through the Red Cross, long ago conducted an exhaustive industrial survey to determine the vocations for which blind men could be fitted. As a result it is putting forth well trained men equipped to meet the social, civic and economic requirements of their respective communities.

Aid for Spanish Red Cross.

The Iberian chapter of the American Red Cross, composed of Americans resident in Spain, has just contributed $480 to a fund being raised by the Spanish Red Cross and the League of Red Cross Societies for the purpose of fighting malaria.

BASE BALL

Klemme Sox vs. Thornton

at the Klemme Ball Park

Sunday, Aug. 22 at 3:00 P. M.

This will be a "speedy" game between 2 well matched teams

Thornton has a good fast bunch of clean ball players who are after "scalps.', The Klemme Sox won over Clear Lake last Sunday and also trimmed Woden the week before, both games away from home, so come out Sunday and see them trim Thornton on the home grounds.

Come out and Yell for the Klemme Sox

COMPLETE — THE EDUCATION OF YOUR CHILD WITH A — BANK ACCOUNT

The business training of a bank account in his own name is the most valuable and lasting education he will ever receive.

Habi s of thrift, insight into financial matters, familiarity with the proper handling of funds, is as important as any part of our lives.

Start an account for the child, direct his handling of it. He will thank you in after years.

JUNIOR RED CROSS WORKING AT HOME

Production of Sound American Citizenship the First Aim, Says Dr. Farrand.

On the badge of every member of the Junior Red Cross are the words "I Serve." That tells the story of the school children's branch of the American Red Cross and its efforts to bring happiness to children throughout the world.

Realizing that the time never was so propitious as right now for teaching the highest ideals of citizenship, the entire present program of the Junior Red Cross has been framed under the very inclusive phrase, "Training for Citizenship Through Service" for others. Since the Junior Red Cross is the agency through which the American Red Cross reaches the schoolboys and the schoolgirls, all its activities are designed to come within the regular school program, and without creating new courses or increasing the number of studies to lend its aid in vitalizing the work of the schools.

"The thing that is needed," says Dr. Livingston Farrand, Chairman of the American Red Cross Central Committee, "is not a perpetuation of the Junior Red Cross, but the training and breeding of sound American citizenship inspired by the true, fundamental ideals of sound democracy. One of the great conceptions in making the Red Cross a contributor to better citizenship in our American democracy is the realization that after all the sole hope of any nation is with the children of the country."

The plan of organization of the Junior Red Cross makes the school—public, parochial and private—the unit, not the individual pupils. Mutual service, helpful community work such as clean-up campaigns, care of the sick, promotion of health regulations, participation in civic and patriotic movements—all these creative agencies designed to translate into life and action the regular school program are parts of the machinery which the Junior Red Cross places at the disposal of the school authorities.

Graded study courses giving practical methods of civic training, supplemented by pamphlets and helpful suggestions, are supplied to the local schools by the Junior Red Cross. An elaborate plan for promoting an interchange of correspondence between children in different sections of the United States as well as with children in foreign lands is being devised and will take a prominent place in the established classroom program.

In promoting the general cause of child welfare, Red Cross courses in home hygiene and care of the sick, first aid, and dieting may be established in all Junior Red Cross Auxiliaries.

The ideals and the objective of the Junior Red Cross are embodied in the pledge of service which the pupil takes when he signs the membership roll and pins on his coat the Junior's badge. The pledge which binds together service and citizenship reads:

"We will seek in all ways to live up to the ideals of the Junior Red Cross and devote ourselves to its service.

"We will strive never to bring discredit to this, our country, by any unworthy act.

"We will revere and obey our country's laws and do our best to inspire a like reverence and obedience in those about us.

"We will endeavor in all these ways, as good citizens, to transmit America greater, better and more beautiful than she was transmitted to us."

At the foundation of this school program of the Junior Red Cross is a great love for America's children.

RED CROSS ACTIVE IN DISASTER RELIEF

When disaster hits a community—fire, flood, earthquake, explosion, bad wreck or tornado—the American Red Cross can be depended upon to follow right at its heels with help for the stricken people. Red Cross relief is almost immediately forthcoming—food, clothing, shelter and funds; doctors, nurses and special workers with long experience in handling similar trouble elsewhere.

During the last year, ending June 30, there was an average of four disasters a month in the United States. One hundred and fifty communities in twenty-seven states suffered. The largest and most destructive of these were the tidal wave at Corpus Christi, Texas, and tornadoes in Mississippi, Louisiana, Alabama, Georgia, Ohio, Indiana and Illinois.

In these events of horror 850 persons were killed, 1,500 were injured, 13,000 were made homeless, about 30,000 families needed help, the property loss was nearly $100,000,000 and almost $1,000,000 in relief funds, not including emergency supplies was expended.

To the sufferers from all disasters during the year, the American Red Cross sent $120,000 worth of supplies, 110 Red Cross nurses and seven special relief trains. To meet the needs of the stricken, the organization set up ten relief stations, operated thirty food canteens and as many emergency hospitals. One hundred and twenty-five Red Cross chapters gave disaster relief service.

If disaster ever strikes this town or county, the citizens can be absolutely sure the Red Cross will be right on hand to help them in every way.

YOUR RED CROSS

The American Red Cross, by its Congressional charter, is officially designated:

To furnish volunteer aid to the sick and wounded of armies in time of war, in accordance with the conventions of Geneva.

To act in matters of voluntary relief and as a medium of communication between the American people and their Army and Navy.

To continue and carry on a system of national and international relief in time of peace and to apply the same in mitigating the sufferings caused by pestilence, famine, fire, floods and other great calamities.

To devise and carry on measures for preventing these causes of suffering.

FIRST AID TRAINING TO MEN AND WOMEN

American Red Cross Is Teaching Hundreds of Thousands Life-Saving Methods.

The purpose of instruction in First Aid to the injured offered by the American Red Cross is to train men and women to administer First Aid treatment promptly and intelligently when emergencies demand it. First Aid treatment is not intended to take the place of a physician's service. A surgeon should always be summoneed as a precautionary measure where there is an injury of any consequence, but when one cannot be secured a few minutes' delay may mean a fatality. In such a case a person trained in First Aid is invaluable not only to the individual, but through him to the community in which he lives.

There is perhaps no way of ascertaining the number of deaths or serious disablements which result from lack of proper safeguards or prompt emergency treatment. It is safe to assert they number thousands daily. There can be no doubt that the application of First Aid methods to each case would immeasurably lighten the country's toll of suffering and death.

The dissemination of First Aid training and information has already produced a farreaching and beneficial influence in the prevention of accidents on railroads, in mines and in great industrial concerns.

The benefit of a widespread knowledge of First Aid in the event of a great disaster, such as a train wreck an explosion, an earthquike, etc., is obvious. Laymen who have had First Aid training can render efficient assistance. Many lives may depend upon such emergency care.

Red Cross First Aid work includes (1) the formation and conduct, through Red Cross chapters, of classes for instruction in accident prevention and First Aid to the injured among men and women in all communities and in every industry; (2) the introduction of courses of instruction in high schools and colleges.

The Red Cross is prepared to supply First Aid books and equipment at reasonable prices.

Every person in this country able to do so should, in his own interest, receive Red Cross First Aid instruction. Information about the course and instruction classes may be had at the nearest chapter headquarters.

RED CROSS EXTENDS RELIEF TO POLAND

More than $5,000,000 has been spent by the American Red Cross in aiding the stricken people of Poland. The organization has nursed the sick, fed the starving, clothed the naked, sheltered the homeless, schooled the children and cared for the orphans there. It has conducted a relentless fight against typhus, cholera and other terrible diseases. So today millions of men and women in that resurrected nation speak in grateful appreciation of "The Greatest Mother in the World."

Nearly 200 American Red Cross workers are now engaged in relief activities in Poland. Four large relief bases are in operation and eleven mobile units are in the field. During the last twelve months this organization was largely instrumental in the re-establishment of a million refugees at a cost for general relief of more than $1,000,000. Last winter one-half million war orphans were aided materially, and since then a series of large orphanages have been established to give them permanent care.

But for American Red Cross aid, officials of Poland declared recently, millions of people in that country would have perished of disease, exposure or starvation the last eighteen months. And the work there must be kept up for another year.

GETTING RICH QUICK.

Synopsis.—Dick Morgan of Syracuse, N. Y., a failure in life, enlisted in the Foreign Legion of the French army under the name of Henry Hilliard, is disfigured by shrapnel. The French surgeons ask for a photograph to guide them in restoring his face. In his rage against life he offers in derision a picture postcard bearing the radiant face of Christ. The surgeons do a good job. On his way back to America he meets Martin Harmon, a New York broker. The result is that Morgan, under the name of Hilliard and unrecognized as Morgan, goes back to Syracuse to sell a mining stock. He is determined to make good. He tells people of the death of Morgan. He finds in Angela Cullen a loyal defender of Dick Morgan. He meets Carol Durant, who had refused to marry him. She does not hesitate to tell him that she had loved Morgan. Hilliard finds he still loves her and is tempted to confess.

CHAPTER VI.—Continued.

—7—

"I'll have to admit," said Hilliard lightly, "that the odds are on the side of the experts. But as for the romance—" He smiled at Angela and wondered if he dared begin so soon to build up the framework of his mission. "I've been telling Angela that it's mostly hard work. Once in a while you do run into something lurid, of course—romantic, if you want to call it so. I remember one bit out of my own experience," Angela had dropped the papers, and was listening as closely as her father. "A few years ago some friends of mine bought up an old abandoned property out in the Butte region; bought it for a song, and it was a very quiet peaceful little song at that, because metals had been dull, and— to continue the metaphor—my friends weren't in particularly good voice just then. But after they'd taken title, they realized that they'd only sung the first verse of the song, and there were a lot more verses and a pretty strenuous chorus. There was a shaft to be unwatered and a lot of timber-work to be done; they were in for a big expense, and their credit had tucks in it, and the outlook wasn't any too rosy. But thirty yards from the main workings there was a fairish sort of tunnel, with the start of a winze—that's a blind shaft running down obliquely from a horizontal tunnel—and it pointed straight toward the main shaft, and it occurred to them that they could continue that winze another few feet, strike their main shaft about the hundred and fifty foot level, and save a lot of labor and expense that way by getting a clean approach to the shaft instead of taking a lot of bother with it in its decrepit condition. Well, they began to go down that winze, and inside of ten feet they struck a brand new and unsuspected vein—there hadn't been any outcrop showing; it was sheer, unadulterated luck. Then they had credit—they certainly did! To make a long story short, they pawned their futures, and begged and borrowed every penny they could lay their hands on, and they developed that property to the last cent, and when they had perhaps two hundred thousand or so tons of four per cent copper in sight, and there were indicated ore reserves of another half a million tons, they sold that property to a group of New Yorkers for an utterly phenomenal price, without ever having so much as touched the original shaft for which they'd bought the property!"

"Ouch!" said Cullen, and "Goodness!" said Angela.

"And," said Hilliard, smiling reminiscently, "if the original owners had pushed that winze for a couple of days more than they did, or if my friends hadn't decided to go at the problem in exactly that way . . . well, as I say, what's one man's romance is another man's tragedy. My friends got their investment back in something less than four months, and after that it was velvet. And the selling price was in the neighborhood of two hundred times what they'd paid for it. That's mining history, Mr. Cullen." And indeed it was—and the only fabrication about it was Hilliard's claim of friendship for the lucky owners. This, as he assured himself, was salesman's license—every successful operator is a "friend" of any salesman.

Cullen nodded thoughtfully; his eyes were bright. Angela was alternately regarding him with indulgent pity, and sending I-told-you-so messages to Hilliard.

"Where was this—in Montana?"

"Silverbow county. Near Butte. Yes, there is romance in that country, Mr. Cullen. It's in every tree and every rock, and in every hill and valley and under the ground. And I'm afraid I'm just enough of a realist to find most of my own under the surface."

"To save my life," said Cullen, "I can't help thinking of that region as a Mark Twain sort of country—sombreros and six-shooters and Vigilantes and stage coach hold-ups and gold dust as a medium of exchange. I know it's childish, but I've never been out there, and it's hard to get over what we learned at school." He surveyed his fountain, which in his moments of complacence had all the attributes of a geyser for him, was suddenly a feeble faucet, and the tidy lawn was no more seductive than a window-box.

"The up-to-date schoolbooks," said Hilliard, laughing, "have a good many changes in them. The West of the early eighties is all gone, the atmosphere is all gone, the old-style miners are all gone; you used to see some picturesque sights even ten years ago, but nowadays you best realize how the industry has changed when you see a couple of pals hunting for work in an auto drive up to a camp, ask for a job, get it, park the auto, take the tools out of the delivery body on behind, and pitch in. And you can imagine the other changes that accompany that one. Of course, that's especially typical of Arizona, but we get it in Montana, too. I'm not saying that the color has gone out entirely, because it hasn't, but in the old days the West was the West, and now it's moving East as fast as it conveniently can, so that if you want to get the pure spirit of it, as it is today, you'll have to go down to Wall street. That's where it lives."

"Mining—mining!" mused Mr. Cullen. "Sounds adventurous just to say it." He gazed at the fountain.

"And no industry is less understood—even by intelligent men, Mr. Cullen. As a matter of fact, the public doesn't even understand most of the commonest terms. The buying public doesn't even know what it is buying. That's why it's so easy to sell worthless stock."

"Oh, Mr. Hilliard!"

"For instance," he said. "I spoke of a certain number of tons in sight, and that's one of the very commonest expressions in a fake prospectus. I suppose you know you couldn't see it, don't you?"

"Why, no!" said Mr. Cullen, blankly. "Couldn't I?"

"You might actually see a few thousand dollars' worth."

"Why," said Angela, surprisedly, "I thought it stuck right out on the walls! In gobs! And you knocked it off with a pickax! And shoveled it up!"

"Not, exactly that," said Hilliard kindly. "Sometimes you go at an ore body with steam shovels, and other times you don't. But when you remember that three or four pounds of copper to every hundred pounds of rock means a very handsome profit, if your costs aren't excessive, you have some idea of how little you could knock off a wall. No—you tear down the whole mass. You go at it wholesale."

"What I meant by romance," said Mr. Cullen, "wasn't necessarily luck. And besides, this yarn you've just told us doesn't illustrate what I call a business proposition. What I'm trying to get at is that you've got an occupation that isn't a cut-and-dried one like the average. There's breadth to it—vision. There's drama. There's the outdoor side to it. There's—"

"Don't forget," Hilliard warned him, "that I purposely gave you that illustration, and I think you've missed the moral. It was a business proposition. My friends bought the mine for the values they knew were there. They'd have made money if they'd gone ahead

"Now You Just Wait a Second."

unwatering and timbering and developing the old shaft—so that it wasn't all bull luck, not by any means. And I claim that the romance and the drama and the excitement is in the combination of business sense with that wonderful possibility of accident. You don't go in at random; you use your best judgment, and expect about ten per cent on your money—and it's the chance of getting a thousand per cent that keeps the game alive. Some men don't even get the ten . . . mighty few ever get the thousand. I'm satisfied, and more than satisfied, that the gods have been good to me, and put me somewhere in between."

"I suppose for the people on the inside," said Mr. Cullen, "a mining prop-

as anything else. The trouble comes in knowing when a mine's a mine, and when it's a swindle, and I guess you have to be a metallurgical shark to know that anyway. But the way things have been going for the last year or two, with all this speculation in the metals, and all the fortunes that have been made, sort of set me to thinking that with good advice, you—"

"I beg your pardon," said Hilliard quickly. "There's been mighty little speculation in metals, Mr. Cullen; but there's been a tremendous amount of speculation in stock. The difference between West and East; the difference between insider and outsider; the difference between the capitalist and the gambler is this—the East, the outsider and the gambler buy stock; the West, the insider and the capitalist buy mines. Buy them outright and develop them first and exploit them afterward. If they're good, the West keeps them to itself and pockets the profits; if they're shaky, the West sells stocks to the East, and gets its profit that way, and calmly steps out from under. The art and science of underwriting . . ."

"Now you just wait a second," interrupted Angela, who had been fidgeting and playing with her wrist watch. "Dad—Mr. Hilliard! This is awfully interesting, but dinner's in just a few minutes, and—"

"Plenty of time," said Cullen, waving her off. "Plenty of time! Go ahead, Mr. Hilliard. This is too good to miss. Smoke a cigarette for an appetizer?"

"Thank you." Hilliard, having decided to take complete advantage of the present opportunity, marshaled salient details as he held a match for his host. "Well, perhaps I can show you best by an actual example. I'm out of the game entirely, as I said, but I was invited a day or two ago to join a New York syndicate in financing a property I appraised myself in 1914. It's owned at present by four boys with a shoe-string apiece. They can't finance it themselves, so they need help, and they've come to Wall street and whispered their secret through a megaphone. Now suppose, just to make it clear all around, that you and I and Angela are to form a syndicate to underwrite the company." He was sustained by the reflection that even though he came in the guise of a mountebank, there was nothing dishonorable about the wares he had brought to sell.

"Ooh!" said Angela, joyously, "Thanks!"

Simultaneously her father gave her a little frown of affectionate remonstrance, and Hilliard gave her a little smile of affectionate esteem.

"Now, the boys who own it," said Hilliard, "are in such straits that we can practically dictate our own terms. I don't mean to imply that we'd take too great an advantage of them, but it's a plain case of supply and demand, and we're naturally interested in a bargain. We go over the mine very carefully, and find that although it isn't actually producing any copper just yet, because the owners ran out of money before they could get that far, it has enough ore reserves to guarantee at least ten thousand tons a year for twenty years, provided the necessary equipment is bought and put into operation. That tonnage, with the price of copper where it is now—around thirty cents—and the cost of production what it is now, and other factors what they are now would eventually mean a net profit of about a quarter of a million dollars a year. So first we have these present owners organize a corporation, capitalized at two million dollars."

Cullen smoked violently, and looked puzzled.

"You're getting out of my depth. How do you arrive at that?"

"That's so as to insure ten per cent dividends. And the mine can pay ten per cent, provided we can arrange to get the capital. You see, Mr. Cullen, a copper mine isn't like a factory, and you can't figure it the same way, because a factory runs on indefinitely, and if you simply replace the machinery whenever it wears out, there's nothing to prevent the same plant from keeping on making the same sort of product for a hundred years. But every pound of ore you take out of a mine leaves that much less for the future, and eventually your ore's going to be all gone. And if this particular mine is going to be exhausted in about twenty years, it stands to reason that it's being exhausted at the rate of one-twentieth, or five per cent, a year. You must take that always into consideration. And therefore, every stockholder is entitled to get back at least five per cent of his money each year to cover that depreciation, in addition to whatever he ought to get for ordinary profits, which is another five per cent. Otherwise—"

"Oh! I see!" cried Angela.

"Prove it!" commanded Hilliard indulgently.

"Why, if the company just paid five per cent for twenty years, and at the end of it, your ore was all gone, the people would only just have got their money back, and they wouldn't have made any real profit at all!"

"Exactly!" said Hilliard. "So the company must pay at least ten per cent—half for bona fide dividends and half for depreciation."

"Oho!" said Cullen, opening his eyes. "Is that why the big mining companies pay such big dividends? I thought it was all clear profit!"

"No, sir. The dividends of a mining company have to be very high to be attractive at all; they have to make good that depreciation. Well, we make the boys incorporate, as I said, for two million dollars, on which we can pay ten per cent. I'll show you what the setup looks like." He wrote on the back of an old envelope: Capitalization $2,000,000 — 200,000 shares at $10 each.

"Now, the company (and you must remember that so far we haven't any official connection with it), agrees to take over the property, and pay the present owners for it with 80,000 shares of stock, and it also agrees to sell to you and Angela and me the other 120,000 shares at a dollar apiece, or $120,000, of which we agree to pay half in cash, and the balance in about ninety days.

"Now then, we own 120,000 shares for which we've paid, and agreed to pay $120,000. That is, we've underwritten these shares for a dollar apiece, and paid down half the amount. Now let's begin to look at it from the public's standpoint. Here's a mine with plenty of ore; and a company with cash enough on hand to begin producing at a profit very soon—although nobody pretends that it's actually producing now. It has $60,000 in the bank, and another $60,000 due in ninety days. It can go ahead and contract for machinery and workmen, and it does, and you and Angela and I are still letting the former owners manage it, but since we're in control of the stock, we either elect ourselves as directors, or elect other people whose names carry weight with the public, so that we can always direct the general policy, and see that it's careful and conservative. From every angle, then, financial and moral, the venture looks like a big success. So you and Angela and I go to a good broker, or to a group of brokers, and make them a proposition. We convince them of the value we have; we let them send their own engineers out to make a report, and as evidence of good faith, we pay all their expenses; we let them go over our books. Everything's fair and square and aboveboard. And we agree that these brokers will take some of this stock off our hands to sell to the public (because they've got a selling organization already established, and plenty of customers who look to them for advice) and it's agreed that they'll pay us—say, four dollars a share for what they think they can sell. The brokers then do some advertising, send out their circulars and bulletins and pamphlets to their customers, and sell that stock to the public for anywhere from six to eight dollars a share. That is, the public is glad enough, when the prospect's a good one, to pay seven or eight dollars (because every share's going to be worth ten) for what cost the broker four dollars, and cost us one dollar—which we've already got back from the brokers, and we've still got the half of those 120,000 shares of ours left besides! So here's the final balance sheet!" He hastily totaled the list, and handed it over to Cullen.

Capitalization $2,000,000—200,000 shares at $10.	
Stock paid to individual owners	80,000 shares
Stock sold to syndicate for $120,000	120,000 shares
Total	200,000 shares
	Of our 120,000 shares
We sell to brokers	30,000 shares
Leaving	90,000 shares
We give brokers a two year option at $5 apiece on	20,000 shares
Leaving	70,000 shares
We pay lawyers, experts etc.	10,000 shares
Leaving	60,000 shares

"And that balance of 60,000 shares," he said, "belongs to us three. The brokers are making a market and establishing a price; and in order to protect themselves, they can't afford to let the stock sell under the price they're charging the public—because if they did, the public wouldn't buy up the rest of what the brokers have to sell, but they'd buy it in the open market. So the brokers protect the market by what's considered perfectly legitimate means, although some folks call it manipulation, and they keep the price up by main strength until the first dividend is paid, and after that they don't have to worry, because now everybody sees what a good thing it is, and flocks in to take advantage of it, and the quotations jump up to twelve or fifteen. Everybody's made money; the brokers have made theirs; the public's making theirs, and when the price is right the syndicate sells in open market the 60,000 shares it had left, and you and Angela and I have each made a quarter of a million dollars without really risking a single cent! Because, as I said, we got our money back right at the beginning."

Angela, who had followed the intricacies of the setup with the liveliest interest, turned pale; and Cullen's jaw sagged. Hilliard, returning his fountain pen to his pocket with the utmost nonchalance, had no more apprehension left in him, for Cullen had swallowed the bait whole. Cullen, Average Man that he was—a good enough manager of his own small enterprise, but woefully ignorant of the financial world at large—Cullen coughed raspingly.

"It's a very pretty picture, but suppose the market never goes up?"

"It will as soon as there's a dividend in sight; that's inevitable. And even if it stays pegged at seven or eight, there's a huge profit for us, isn't there?"

"But suppose there's never a dividend?"

"Don't we know there will be? Didn't I say we control the board of directors?"

"But suppose you can't find brokers to—"

Hilliard gesticulated broadly.

"Why, as a matter of fact, we don't care very much if we don't! That's the commoner method, and that's the way to get our money back almost at once, and then play on velvet. But if instead of working through brokers, we were willing to tie up our capital a little longer, we'd make considerably more money in the long run, as you can plainly see. We'd advance our hundred and twenty thousand dollars, wait until dividends could be declared, and then get the stock listed on the curb and begin to feed it out to the public through a fiscal agency. There'd be twice as much in it for us, but we wouldn't be in that perfectly delightful position of owning a lot of valuable stock which literally hadn't cost us anything. Or, of course, we could offer some of the shares to our personal friends at a fair price, and reimburse ourselves that way. Knowing that it's

Cullen Had Swallowed the Bait Whole.

worth ten or fifteen, we wouldn't feel very guilty about selling it to personal acquaintances at eight or nine, would we? Why not—when we know for a certainty that it ought to go up to fifteen? They'd bless us for it!"

"But the main point; the staggering thing about it, is—"

"Is that if the public gets ten or fifteen per cent dividends," said Hilliard, "or buys at ten and sells a few dollars higher, it thinks it's lucky; and in the meantime, the underwriters make anything up to a thousand per cent, and get it in a few months. And I've known some of these syndicates to turn over in a few days."

"Oh, I want to do it!" said Angela ecstatically. "I want to do it! Dad! Let's be a syndicate and go out to Montana until it's over! Come on! Let's!" Hilliard laughed cheerfully at her.

"In this particular case," he said, "the syndicate's about half formed. Nothing final, but it's pending. And it is good—so good that I doubt if any layman could break into it with a cold chisel." Again, he excused himself on the ground of salesman's license. "But that's the fundamental, Mr. Cullen—that's how the thing is done, and that's how the public carries the whole burden of financing, and doesn't know it."

He assumed an attitude of easy unconcern. Angela, her breath coming rapidly, was regarding him with awestruck eyes. Mr. Cullen, his mouth drawn to a perfectly straight line, was gazing spellbound at the orderly array of figures on the envelope.

"And this—is a genuine mine?" he managed presently.

"In my opinion, it's a very wonderful prospect," said Hilliard, and he believed every word of that solemn statement.

Mr. Cullen folded the envelope, and then suddenly, as though too cautious to betray his profound absorption (which he had been betraying frankly for at least twenty minutes), tossed it back to Hilliard.

"When you've got a syndicate that'll let me in for say, thirty cents," he said, with elaborate humor, "just pass along the good word, will you?"

"I never try to do business with my friends," said Hilliard, with the most delicate touch of reproof.

A lonely man in his home town.

(TO BE CONTINUED.)

"Give" and "Get."

The two little words "give" and "get" sum up the differing creeds of earth and the ambitions of mankind. Those who are eager to bestow, to enrich the world around them, to bless, to help, to uplift, constitute the one class. The other crowd grasps everything for self, only its own.

Traits of the Grizzly.

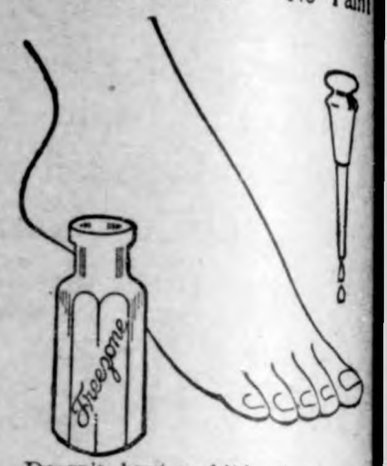
The grizzly rarely hibernates, preferring to prowl the forests in the winter months. He is a meat eater, as well as being fond of honey, roots and eggs, and usually kills his own food. Two cubs come to the mother bear in her den among the rocks, and she is insanely courageous in defense of them.

SAY "DIAMOND DYES"

Don't streak or ruin your material in a poor dye. Insist on "Diamond Dyes." Easy directions in package.

"FREEZONE"

Lift Off Corns! No Pain!



Doesn't hurt a bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers. Truly! Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the calluses without soreness or irritation.

Proper Pride Necessary.

Pride, like laudanum and other poisonous medicines, is beneficial in small, though injurious in large quantities. No man who is not pleased with himself, even in a personal sense, can please others.—Frederick Saunders.

Puts *I Will* In You

Easy to Get Strong

Everyone wants more pep and surely needs it this hot weather. Hot weather takes away the appetite and makes one feel listless, lifeless, miserable, even when you have a strong stomach, but for those who have weak stomachs, it is really a dangerous trying time.

Be on the safe side this kind of weather and help nature all you can, by taking an eatonic tablet about half an hour before you eat and one or two an hour after you eat; it will be of wonderful benefit. Eatonic simply takes up the excess acids, poisons and gases, and carries them right out of the body. With the cause of the trouble removed, of course you will feel fit and fine—full of pep all the time. Eatonic will cool feverish mouth and stomach and give you a good appetite, even in hot weather.

Get a big box at your druggist's for a trifling cost and let eatonic help you for a few days; then you will never be without it. Adv.

He Kept On.

"Why are you staking out a l here, my man?"

"Gonna live here."

"But you can't live here. This the great American desert. It's dry."

"I can't see that it's any dryer here than anywhere else."—Louisville Courier-Journal.

Cuticura for Sore Hands.

Soak hands on retiring in the hot suds of Cuticura Soap, dry and rub in Cuticura Ointment. Remove surplus Ointment with tissue paper. This is only one of the things Cuticura will do if Soap, Ointment and Talcum are used for all toilet purposes.—Adv.

The Magic Distance.

Guest—You advertised a magnificent view.

Proprietor—Yes, you can see three miles out at sea.

THOUSANDS PROCLAIM THE MERITS OF PE-RU-NA

Read Their Letters

Mrs. Martha C. Dale, R. F. D. 4, Cannon, Del., writes: "I am entirely cured of chronic catarrh of the stomach and bowels by PE-RU-NA."

Mr. J. Bayer, Glendale, Oregon: "There is no medicine like PE-RU-NA for catarrhal deafness."

Mrs. Kate Marquis, Middleburg, Ohio: "PE-RU-NA cured me of catarrh of the head and throat."

Mr. J. H. Collins, Wesson, Mississippi: "PE-RU-NA makes me feel vigorous and able to work without that tired, weak feeling I usually have otherwise."

Mrs. P. Ludvigsen, Austin, Minnesota: "I got rid of my liver trouble and can eat anything since taking PE-RU-NA."

Mrs. L. Hearing, 283 East 169th St., New York City: "For catarrh of the head and stomach, I have found PE-RU-NA better than any other medicine."

Mr. W. H. Edgar, 49 Cooper St., Atlanta, Georgia: "PE-RU-NA cured me after I had suffered fifteen years with rheumatism."

Mrs. Leona Dodd, R. No. 3, Medon, Tennessee: "PE-RU-NA is a grand medicine for coughs and colds."

So many diseases are due to catarrh and catarrhal conditions, it makes PE-RU-NA the best medicine in the world to have on hand for emergencies and general health protection. Thousands of families are never without a bottle of PE-RU-NA or a box of PE-RU-NA Tablets in the medicine cabinet. That is the safe way.

You can buy PE-RU-NA anywhere in tablet or liquid form.

BIRD BREEDING PLACE MENACED

Most Remarkable Refuge in the World in Danger From Hunters.

MANY RARE SPECIES THERE

Bird Reservation Is Under Control of the Department of Agriculture—Protecting the Birds There Is Precarious Business.

Washington.—Sticking out in the Pacific ocean 900 miles beyond Honolulu is a group of little islands, the largest not more than two square miles in area, and several of them barely rising above the waves at high tide. Yet on those islands are many hundreds of thousands of birds and among them are at least six species not found anywhere else in the world. In 1911, one of those species was represented by six birds—all that were left as the sole means of perpetuating the species, and they concentrated on a single little island, where one man might kill them all in one minute's shooting.

That species—the Laysan teal—has fortunately increased until there are, by estimate, thirty-five individuals. For the United States department of agriculture, for a few years, has controlled the islands as a bird reservation—the Hawaiian islands reservation, it is called. But protecting the birds there is a precarious business. The possibility has existed always that one or more of the rare species might be wiped out in a day.

Albatross Destroyers Arrested.

By way of illustration, this: One day in 1909 the crew of the cutter Thetis found an old shed absolutely piled full of albatross wings. A search revealed the fact that 23 plume hunters had landed on Laysan island and had killed at least 300,000 birds. The men were captured, taken to Honolulu, and formally arrested. Since that time there is not known to have been any repetition of such depredations, but it is always imminent.

Just now many fishermen—largely nationals of countries other than the United States—are extending their operations from Honolulu out to the region of the bird reservation. Landings on the islands are constantly imminent, and such landings would be a menace to one of the most remarkable bird-breeding places in the world. The bureau of biological survey, having direct charge of the reservation, is calling attention to the fact that disturbing the birds on Laysan or any of the smaller islands is forbidden, and announcing that the reservation will be protected, by whatever means are necessary, for the benefit of all the peoples of the world.

Laysan, the largest of the group, is one of the most westerly of the Hawaiian islands. It has an area of about two square miles, and within it, conforming generally to the coast line, is a large lagoon. This island is one of the most populous bird-breeding places on the globe, literally hundreds of thousands of birds resorting there to lay their eggs every year.

Specialists of the biological survey call attention to the fact that the ostensible occupation of fishermen does not mean that men may not be very destructive to birds. The great auk, they recall, was exterminated by fishermen. The rarest of all the species that exist only in the Laysan group is a duck-like bird, excellent for food, and therefore most likely to be shot by fishermen.

Rare Birds on Island.

The species that nest there and nowhere else are the Laysan teal, the little Laysan rail, the Laysan honeyeater, the Laysan finch, the miller bird (a small warbler), the Hawaiian tern, and the Laysan albatross. Other species that nest principally on Laysan and adjacent islands and would be in danger of extermination if molested there, are the red-tailed tropic bird, the black-footed albatross, the gray-backed tern, and the sooty tern.

The number of individuals of the exclusive species in 1911 were estimated to be: Six of the Laysan teal, perhaps 100 of the miller bird, 300 of the honey-eater, 2,000 of the rail, 2,700 of the finch, and 180,000 of the albatross.

LONELY HORSE GOES TO TOWN

Merely Follows His Owners to Home They Had Gone To for Winter.

Great Falls, Mont.—The ranch of Mrs. Wilhelmina Kincaid lies 20 miles north of Great Falls. The family recently moved to this city to pass the winter. Mrs. Kincaid decided to leave an aged family horse on the ranch.

The Kincaids arrived there in the morning. That evening, while they were eating supper, the old horse trotted down the street and walked into the front yard.

Enjoyed His Own Funeral.

Hillsboro, Pa.—James H. Houser, seventy-five years of age, is all ready to die now. In fact, he has already buried himself. Believing funerals should be enjoyed while living, he has had his staged here recently. Many friends attended. They sang "Nearer, My God, to Thee," and a lot of other funeral songs after a minister delivered Houser's burial services. Houser has prepared his own obituary. The ceremony was held at a church and at the Houser home.

DESCRIBES SIBERIAN MISERY

Col. Teusler of Red Cross Says Filth Was Cause of Army's Reverses.

Tokyo.—That a chief cause for the recent reverses of the Siberian army was to be found in its unsanitary conditions, was the opinion expressed recently by Col. R. B. Teusler, American Red Cross commissioner to Siberia.

Col. Teusler said that bad sanitation, both in the army and among the population, with the agonies of starvation, brought about extreme misery and a moral breakdown, which was especially reflected in the troops, who felt they had no support behind them. The minds of the population seemed to have become almost benumbed and absolutely indifferent to what happened, or to the suffering of others.

Col. Teusler added that although such numbers of the people were starving, there was sufficient food, but lack of transportation facilities prevented its distribution where most needed.

"Thirsty for Words" Is Her Bigamy Defense

London.—The excuses and palliations, brought forward in bigamy cases are monumental in their ingenuity, but I think this one from the north of England will take a prodigious lot of beating. A girl was had up for a triple bigamy—surely oughtn't it be called trigamy when it's three? Her mother was called for the defense, but all she could say in explanation was: "She can't help it, my lord. She's got a reg'lar thirst for 'aving the words spoke over 'er!"

FILIPINO LEGISLATORS DEBATE IN ENGLISH.

The English language recently was used for the first time in the debates of the Filipino House of Representatives.

The fact was cabled to the United States Insular Affairs Bureau. The principal speakers were Messrs. Benitez, De Guzman and Virata. These members are graduates from the University of the Philippines.

English is taught exclusively in the public schools of the Philippines, and it is announced, will continue to be if independence is granted. According to an estimate, based on the census just completed, seventy per cent of the inhabitants of the Philippines over 10 years of age are literate. This is a higher percentage of literacy than that of any South American country.

First Annual Exhibition of the New Hancock County Agricultural Association, or the

HANCOCK COUNTY FAIR

AT BRITT, IOWA

August 31, September 1, 2, 3, 4, 1920

The biggest and best fair ever held in Britt. Great free attractions consisting of many different acts at different hours of the day and evenig. Ball game each afternoon by different teams of the county. The different Bands of the county will furnish plenty of lively music day and night.

Splendid harness races and saddle races. The best fireworks ever shown in Britt will be displayed by Martins Fireworks Company of Ft. Dodge, Wednesday, Thursday and Friday evenings. Tuesday will be entry day. Wednesday the real fair begins. Something doing all the time.

Come and bring the children with you day and night!

No admission will be charged for children under twelve years of age when accompanied by parents.

Local News!

Henry Freie and family spent Sunday with relatives at Williams, Iowa.

Herman Coobs was visiting at Vinton a few days the past week.

Mr. John Zook was up from Belmond Friday on business.

Mrs. Henry Griffin was up from Goodell one day last week shopping with Klemme merchants.

Mrs. Ted Dutheridge is enjoying a visit from her mother who came last week for a visit with her.

Mrs. Everet Amey went to Illinois Tuesday evening for a visit with her people.

Mrs. Ben Nieman is enjoying a visit from her mother who came Saturday from Eldora, Iowa.

Mrs. Hans Josten, of Garner, spent Sunday vsiting the Josten families in Klemme.

Casey Blank, of Belmond, was up from Belmond one day the past week for a visit with home folks.

Prof. Fyler adn wife, of Belmond, were Klemme shoppers Saturday afternoon.

Mr. and Mrs. Will Rhodes and Mrs. Gee, of Goodell, were Klemme callers Monday.

Mr. and Mrs. Henry Church, and daughter Lois of Garner, were calling on Klemme friends last Friday.

Mrs. Wm. Howard and Mrs. Walter Schultz were Garner callers last Friday morning.

Mr. and Mrs. Jim Trumbell and daughter, Florence, of Goodell, were Klemme traders last Friday.

Miss Minnie Lenz has returned from her vacation of several weeks and is again on duty at the Post Office

Mr. Neil Hanson, of Kanawha, was a business caller here Tuesday morning.

Miss Dora Lau came Friday from Tracy, Minn., for a visit with Klemme relatives and friends.

The Fred Ridder family and the A. Rdder family who are here from South Dakota, enjoyed last week by staying at a cottage at Clear Lake.

Mr. and Mrs. "Bill" Thompson, of Belmond, were Klemme visitors last Saturday. They were proprietors of the Crystal Cafe a few years ago.

Mrs. Henry Lewis returned from Clear Lake Sunday evening after having spent several days visiting there.

The J. W. Waterman family and Mr. and Mrs. Clarence Waterman, spent Sunday at the Keraus cottage at Clear Lake.

The G. W. Kluckhohn family, the Wm. Keraus family, and Mrs. Turgeson and two boys, all left in George's big car for points in Minnesota and Wisconsin, expecting to be gone a week or more. They left here last Friday morning.

Mr. and Mrs. Fred Francis, of Belmond, accompanied by Mesdames Fritzsimmons and Pratt, of Dubuque, Iowa, were Klemme visitors Monday.

Mrs. Chris Gram was confined to the house last week due to an attack of appendicitis, but she has fully recovered and is again able to be about.

Miss Abell, of Marseilles, Illinois, has been visiting at the N. L. Palmer home for about a week. She is a cousin of Mrs. Palmer.

Mr. and Mrs. Marlin Croner and Mrs. Schroeder and Mr. and Mrs. R. A. Jogenson ,autoed to Clear Lake Sunday afternoon.

The W. F. Pavey family autoed to Waterloo Sunday and from there they went to Vinton, Iowa, the following day for a visit with his parents.

Quite a number of Klemme people attended the North Iowa Fair at Mason City each day this week. They report that the fair is better than ever this year.

Miss Emma Lauritzen came last week to spend her vacation of about a week with her folks here and with friends. Miss Lauritzen is operator at the Dispatch office at Ringsted, Iowa.

Arthur Wellemeyer and son "Jack" drove to Springfield, Minn., Sunday and returned the following afternoon. Springfield is the "home of White Swan Flour."

Mr. and Mrs. E. S. D. Kahrs drove to Nevada, Iowa, Sunday, for a visit with her folks. They returned the same evening and found the roads were good all the way.

Mr. and Mrs. Chris Gram left by auto Tuesday morning for points in Minnesota and South Dakota, for a visit with relatives and friends. Chris is taking his vacation from duties at the Ell garage.

Adolph Ridder and family, who have been spending a week or more visiting with his brothers, Fred and August, and other relatives, left Monday in their car for a few days' visit at Fenton, Iowa, before leaving for their home in South Dakota.

Mr. and Mrs. T. F. Mitchell drove down from Swea City Saturday night for a visit with Klemme relatives and friends. Sunday they drove to Clear Lake for a visit with Mr. and Mrs. C. F. Keraus.

The preachers of Hancock county that is, most of them, had a picnic at Oakwood Park at Clear Lake, Monday. The Rev. Winterstein of Britt, and his family, have a cottage at the lake this summer and so he invited the other sky pilots of the county to enjoy a day's outing with him.

The Misses Gretchen and Minnie Blank left last Thursday for Estherville, where they will visit their brother Ralph and family, for a few days and then they will go on to South Dakota, where they will visit their brother Fred for a few days before coming home.

Mrs. A. H. Meyer and sister, Miss Helen Lenz, left Monday morning for Tomah, Wisconsin, for a visit with their folks. Mrs. Meyer will remain there until the first part of September. Reverend Meyer is his own boss again now and we are afraid he will become quite a loafer before his wife comes back to straighten him out.

It may be a trifle late in recording the event but we did not learn of the happy event until just the other day. A fine baby girl arrived at the home of Mr. and Mrs. Frank Kluckhohn a week or ten days ago. She was considered such a fine grand-daughter and the only one he had that Grandpa George Kluckhohn presented the parents of the young lady with a $50 check as a suitable reward for giving him the first grand-daughter.

CHILDREN OFFERED AS BAIL

Pueblo Strikers Seek Release of Wives After Mayor Is Beaten.

Pueblo, Colo.—Children as surety for bail is something new in Colorado. Five women were among those arrested here following a riot in which Mayor Mike Studzinski was knocked down and severely beaten by striking steel workers. Husbands of the women made frantic attempts to obtain their release on bonds, saying they needed the women to "keep the home fires burning," and one man, who could not raise the $200 bond required, took his three little children to the police station and offered to leave them in custody as surety for his wife's appearance in court. The offer was refused. Later the women were released on a cash bond of $1,000 given by the strike committee.

The rioting followed the attempt to reopen the Minnequa steel mills, closed since July. Austrian women stoned the workers who tried to enter the plant.

NUTS BROUGHT FROM CHINA

Shortage of Texas Supply Makes It Necessary to Import Large Quantities.

Marshall, Tex.—Peanuts are being imported from China by a Marshall oil mill owing to the inadequacy of the Texas crop to supply the demand for peanut oils. Several consignments already have been received from Shanghai, the nuts having been grown in Shantung.

The foreign peanut is no better than the native product, according to local oil men, but they come already shelled and therefore are more easily and less expensively handled. The Chinese nuts are about the size of the ordinary Spanish variety.

Invents Typewriter on Which to Write Music

Wichita, Kan.—Will Kansas wonders never cease? A typewriter on which one can successfully write music is the invention of H. P. Flauth, a composer of this city.

The machine is said to have 135 characters which can be written on, below or above the staff. The typewriter differs from the ordinary model only in that the printing surface of the roller is flat.

Flauth is understood to have worked more than 18 years on the invention.

RUSS REDS SELL CZAR'S GEMS

Lenine Government Trading in Holland Through Germany to Avoid Blockade.

Amsterdam, Holland.—The Lenine government in Russia, balked by the world financial blockade from sending money abroad for propaganda purposes, now is conducting an extensive traffic in confiscated jewels through Germany to Holland markets, according to the Handelsblad, which comments on a charge that the communist member Lisser of the Amsterdam council offered the Russian emperor's diamonds for sale.

Turns Eyes Inside Out.

The garden snail's eyes are on the very tips of a pair of very long tentacles and it has an additional pair of shorter tentacles with which it smells. When any danger approaches the eyes are drawn down within the tentacles and the tentacles themselves are pulled into the body in exactly the same way as you would pull a glove finger inside out."

An Evil Genius.

Asmodeus is an evil genius or demon. In the apochryphal book of Tobit he is represented as slaying the seven husbands of Sara. In the Talmud he is described as the prince of demons and is said to have driven Solomon from his kingdom.

MME SOX WIN OVER THORN-TON IN A CLOSE TWELVE INNING GAME

nday the fast Thornton team e to Klemme with the intention of g the Sox a good trimming, but was not the case as they found our boys were wide awake and a little too fast for them.

fter a hard fought game lasting ve innings he Klemme Sox came of the smoke of battle carrying scores against the seven held by nton It was a n.ip and tuck game the start and Thornton was af- scalps and were fighting hard to he Sox on the loosing end of the e card.

hornton is considered one of the teams around here and Klemme well feel proud of the fact that Sox took them to a trimming. Klemme Sox have won three es straight now and are out for e scalps and we are here to say if you want to see the other team their shoes beat off, just sic the me Sox after them.

ee the ad the Sox have in this is- —that will tell you who they will Sunday at the home diamond.

A Warning

T IT OUT BOYS, IT'S NO JOKE WHATEVER

he citizens of Klemme were in- ant when they heard of what had spired on our streets Sunday t. There seems to be a gang of g men who think they are very r if they can torment a certain who is not of normal condition of d and who works on a farm ad- nt to Klemme. He was in town day evening, tending to his own ness and harming no one and r has. When he started home this g" waylaid him and frightened and then threw stones at him in ark, some striking him and caus- bruises. Now boys, we will give a warning not to attempt to both- is man again, for if you do you suffer serious consequences and are liable to meet up with men are not going to handle you with gloves on either. Just cut out e of that rough stuff and act like lemen with this poor fellow who ot help he is in such condition. have been asked to give this ing and if you, whoever you may need not the warning—look out buck-shot from the men who are g to see that this man mentioned otected.

nother outrage that occurred on day evening was undoubtedly mitted by the same gang. They a car from a young man residing e country and after using it in- d of returning it to where they d it they drained out the oil, left ar setting alongside of the road beat it. The young man had to home that night and come in morning and look for it and take the garage to get it repaired, n was an expensive item. Do you that was a joke? Nobody with mon sense would call that a joke, s a downright dirty trick.

e gang mentioned above are sus- d and clues are being pushed to them before the law. It will be for them to take notice and act gentlemen when on the streets lemme or anywhere else.

ere were five or six in the above and they were in a Ford car they do not live a hundred miles here either.

SE SHOE CONTEST AT FAIR

n Greiman, of this place, and s Schleusner of Garner, will leave ay for Des Moines to take part in Horse Shoe Tournament at the Fair at Des Moines. These men in the contest held in this coun- d will be entered at the big con- t Des Moines Monday and Tues- We wish the boys good luck and they have a rabbit's foot tied to hoe and will bring home all the rs.

SUPPOSED TO BE A SECRET

Valentine Josten and E. S. Uben are perhaps the two coolest men in town according to our way of thinking, at least they should be cool as cucumbers by this time. They accidentally got in a tight place the other day, but as we said, they kept cool, yes, they kept cool for quite a long time until Uben discovered that he could crawl thru a hole in the wall one foot square. He made that discovery about the time that he and Valentine were so cool that their sweating brows were freezing icycles. You see they accidentally got locked in the refrigerator room at the creamery one morning last week and there was no one around to let them out. That's the secret they didn't want let out. We spilled the beans! Uben crawled thru a little window on the outside wall and let Valentine out by unhooking the refrigerator door. Now take a look at Uben and then take a look at that little window and try to figure it out.

WE MISSED ONE GRAND-DAUGHTER

In an item last week we overlooked one grand-daughter of George Kluckhohns when we said that the young lady woh came to the home of Mr. and Mrs. Frank Kluckhohn was the first and only grand-daughter of G. W. Now that is where we made a big mistake as Fred Kluckhohn and wife are the possessors of George's first grand-daughter. Fred jumped all over us and then George jumped all over us too for trying to beat him out of his other grand-daughter, so now we hope we have it all straight, and we tell the world that George has two mighty fine grand-daughters that are hard to beat.

Mr. Harold Nissen, of Milford, Iowa, came Saturday for a visit with his brother, Donald, and with the J. N. Day family and other relatives and friends. Tuesday afternoon John Day and family and Donald accompanied him to Garner in Day's car where he took the Milwaukee for Milford.

Marlin Croner has had a sore throat the past few days and was unable to talk back to his wife. However, he was very proficient in the "sheeny language" and could manage fairly well to argue by signs with his hands. But suppose she tied his hands, then what? But Marlin says it's no fun to have trouble with tonsils.

Last week we stated that G. W. Kluckhohn and party autoed to points in Wisconsin and Minnesota. This was his intention but as they did not have enough time to make this northern trip he pary went to Des Moines, Webster City, and other points in the southern part of the state on their vacation, returning to Klemme last week

Drs. Reuber & Zinn had their office redecorated the past week. Joe Miller was the man who handled the brush and did a very fine job painting the waiting room and refinishing the wood-work in the rest of the building. John Baumgartner was called upon to hang some new paper in one of the other rooms. The doctors have a very fine and up-to-date office now.

Art Wellemeyer has been doing some changing about in his store the past week and we believe it makes a fine improvement. He has changed his large shw cases about so that one entering the store now from the front has an unobstructed view of the entire interior. He later plans to build a balcony in the main part of the store building so that he can increase his floor space and show his goods better.

Mr. and Mrs. P. M. Greisemer and Mr. and Mrs. John Gruetzmacher returned from their auto trip last Wednesday evening. Their trip took them over a thousand miles and they went to points in Illinois, Wisconsin, Ohio and other eastern states. They enjoyed their vocation immensely and had good weather and good going all the way.

Fred Schlichting and family and Mr. and Mrs. H. F. Ludeke returned Monday evening from a few days spent visiting relatives at Fenton, Ia.

Miss Mable Smith is again back of the counter at J. N. Day's store, after a vacaton of a couple of weeks. She accompanied the Walter Ross family of Garner on an auto trip to states east of here. Their trip took them a route of about a thousand miles, all of which was thoroughly enjoyed. They got back to Klemme Monday afternoon.

The Times "Devil" Says

CONDENSED CLASSICS

THE HEART OF MIDLOTHIAN

By SIR WALTER SCOTT

Condensation by T. L. Hood of Harvard University

Walter Scott was born in Edinburgh on Aug. 15, 1771. His father was a lawyer, the first of the Scott line to leave the open country for the town.

For a man who wrote such a prodigious amount, Scott was surprisingly late in getting started. He was 34 years old when his first original work appeared, "The Lay of the Last Minstrel." From that moment until his death, on Sept. 21, 1832, he was, with the possible exception of Byron, the most popular writer in English.

When the public seemed to be tiring of his long romances in verse, he turned to novel writing, and in 1814, when he was 43, he came into his career of greatness with "Waverley." For 18 years novel after novel followed in rapid succession, stirring romances of history or colorful tales of Scottish life. They were all published anonymously until the financial disaster of 1825 made it seem wise to reveal the author's name.

Fully a dozen of the Waverley Novels, if not more, might be included in any list of 100 novels and many loyal lovers of Scott would even then think that one or two more might be added. He was, as Stevenson remarked, "the king of the romantics."

"Waverley," "Ivanhoe," "The Heart of Midlothian," and "Kenilworth" are representative of Scott at his best. But "Old Mortality," "Quentin Durward," "The Talisman," "Guy Mannering," "The Fortunes of Nigel," "The Antiquary," "St. Ronan's Well," "Rob Roy," and indeed others have all been ranked as favorites among the innumerable admirers of the romances written by "the Wizard of the North."

THE Heart of Midlothian, by many called the finest of the Waverley Novels, was published anonymously in 1818. It takes its name from the Tolbooth, or old city jail, in Edinburg (pulled down in 1815), the "stony heart" of Midlothian, which reared its ancient front in the very middle of the High street of the city.

On the afternoon of September 8, 1736, Reuben Butler, assistant-master of the school at Libberton, and licensed minister of the gospel, found himself in unexpected trouble. First of all, he had become entangled with the crowd of good citizens of Edinburg in the Grassmarket, murmuring at the postponement of the execution of Captain John Porteous of the City Guard. They were still in the heat of anger from the events of the preceding day, when Porteous had ordered his men to fire, and had fired himself, upon the crowd, some of whom were attempting to cut down the body of "Scotch" Wilson, the famous smuggler. Several innocent citizens had been killed. Now that the chief offender seemed likely to escape, there was no knowing what the mob might do. The quiet young pedagogue would gladly have returned to Libberton. Then, to his consternation, he learned that Effie Deans, the younger and more charming sister of his sweetheart Jeanie Deans, was imprisoned in the Tolbooth.

When he had last seen Effie, more than a year before, she had been a beautiful and blooming girl, the lily of Saint Leonard's. Many a traveler past her father's cottage had stopped his horse on the eve of entering Edinburg, to gaze at her as she tripped by him, with her milk-pail poised on her head, bearing herself so erect, and stepping so light and free under her burden that it seemed rather an ornament than an encumbrance. Now the poor girl, scarce eighteen years of age, lay in the Tolbooth, charged with childmurder.

The facts were that after working for a time in a shop in Edinburg, the unhappy prisoner had disappeared for the space of a week, and then made her appearance before her sister at Saint Leonard's in a state that had rendered Jeanie only too certain of her misfortune. But to all questions she had remained mute as the grave, until the officers of justice had come to apprehend her.

Before Reuben Butler could see her, the Tolbooth was closed; and before he could escape from the city a crowd of rioters compelled him to return with them to the jail and administer the last rites to Porteous, whom they dragged forth to death.

The leader of the mob, a young man disguised in woman's clothes, seized a moment in the midst of the turmoil in the jail to beg Effie to escape. "For God's sake—for your own sake—for my sake—flee, or they'll take your life," was all that he had time to say.

The girl gazed after him for a moment, and then, faintly muttering, "Better tyne life, since tint is gude fame," she sunk her head upon her hand, and remained, seemingly, as unconscious as a statue, of the noise and tumult which passed around her.

In the morning, on his way to see Jeanie and her father at Saint Leonard's, Butler encountered in the King's park a young man of noble bearing, but strangely agitated, who bade him "tell Jeanie Deans that, when the moon rises, I shall expect to meet her at Nicol Muschat's Cairn, beneath Saint Anthony's chapel."

After attempting in vain to induce Jeanie to explain the message, he returned to visit Effie again, in the Tolbooth, only to be compelled, on his arrival there, to tell the whole story, lest he be convicted of guilt in the Porteous affair. And then he was sent home, under bail not to leave Libberton, nor to communicate with any member of the family of Effie Deans.

But if his experiences were to him incomprehensible they were by no means so to the authorities. By piecing together his testimony with those of others, they rightly determined that the stranger in the King's park, the leader of the Porteous mob, and the father of Effie's child were one and the same person; namely, Geordie Robertson, comrade of Wilson the smuggler, and but lately escaped from the very prison in which Effie Deans was now confined. Accordingly, they planned to capture him that night at Muschat's Cairn. But before they could reach that place, Robertson had time to beg Jeanie to save her sister at the trial by testifying that Effie had disclosed to her her condition. Then he escaped.

Merely that slight falsehood would have removed the case of Effie Deans from under the letter of the cruel Scotch statute. But Jeanie, steadfastly, devoutly truthful, was utterly unable to placate her conscience in bearing false witness. Nor could the disappointment of Effie herself, whom she was at last permitted to visit in the strong-room of the prison, alter her resolution. "He wanted that I suld be mansworn," she said. "I told him that I daurna swear to an untruth."

At the trial, when Jeanie was brought in to testify, Effie, in human weakness, cried, "O Jeanie, Jeanie, save me!" But when the solemn oath, —"the truth to tell, and no truth to conceal, as far as she knew or was asked," was administered "in the name of God, and as the witness should answer to God at the great day of judgment," Jeanie, educated in deep reverence for the name of the deity, was elevated above all considerations save those which she could, with a clear conscience, call Him to witness. And when the advocate came at length to the point of asking her, "what your sister said ailed her when you inquired?" Jeanie could only answer, 'nothing." When the sentence was pronounced by the doomsman, Effie's own eyes were the only dry ones in the court. "God forgive ye, my lords," she said, "and dinna be angry wi' me for wishin' it—we a' need forgiveness."

The next morning found Jeanie Deans traveling alone and afoot on the long road to London "to see the Queen's face that gives grace," and beg for her sister's pardon. Her tartan screen served all the purposes of a riding habit, and of an umbrella; a small bundle contained such changes of linen as were absolutely necessary. She had a few guineas, and a letter from Reuben Butler to the Duke of Argyle, whose grandfather had been under obligations of the deepest to the famous Bible Butler, grandfather of the poor assistant-schoolmaster, now sick at Libberton.

She passed luckily, on the whole, through so weary and dangerous a journey, and at length, through the intercession of the duke, secured the pardon which she sought.

Before she reached Scotland again, Effie had eloped with her lover, who was in reality George Staunton, son of an English nobleman. The sisters, who had last met when Effie was sitting on the bench of the condemned, did not meet again for many years, though Lady Staunton wrote sometimes to Jeanie—now Mrs. Butler, wife of Mr. Reuben Butler, pastor of Knocktarlitie.

Finally, by chance, Sir George learned that Meg Murdockson, who had attended Effie in her illness, had not murdered the child, as they had always supposed. He traced the boy to a certain troop of vagabonds, of which Black Donald was the chief. In an affray with Black Donald's men, Sir George was shot by a young lad called "the Whistler," who proved to be the lost son. The lad disappeared, and escaped to America. Lady Staunton, overcome by the tragedy, after vain efforts to drown her grief in society, retired to a convent in France. Although she took no vows, she remained there until her death. But her influence at court accomplished much for the children of her sister Jeanie, who lived happily on in the good parish with which the bounty of the Duke of Argyle had provided her husband.

The Heart of Midlothian is notable for having rather fewer important characters, a smaller variety of incidents, and less description of scenery than most of Scott's novels. One of the most remarkable scenes in all fiction is the meeting of the two sisters in prison under the eyes of the jailer Ratcliffe. The interview of Jeanie with Queen Caroline is also most noteworthy. There is much humor at the expense of the Cameronian wing of the Presbyterian faith in Scotland. In this work also appears the strange character of Madge Wildfire, daughter of the old crone, Meg Murdockson. Into her mouth is put the famous song, "Proud Maisie is in the wood."

Seemed an Apollo Then.

Maud—So that's the young fellow you were raving about. I thought you said he was handsome.

Ethel—I—I thought he was. You see, I met him at Exclusive beach and he was the only man there.—Boston Transcript.

Such It Was.

Twelve baldheaded men were jurors in a Massachusetts hair-restorer case. "Is this justice?" asked the Brooklyn Eagle. "It may be retributive justice," suggests the Albany Argus. Let's call it destiny.—Buffalo Times.

Peculiar Form of Dowry.

Leo Ugardi, a Naples hairdresser, married his sweetheart subject to an undertaking on the part of her father to spend $60 for tonsorial attentions within two years of the wedding in lieu of dowry, failing which the wife is to be returned to her parents.

HEAVY RAINS HERE, WORST EVER

Old timers say that the rain we had last Friday was the heaviest that has fell here for a number of years. It sure was a hard rain and quite a number of people complained that there was water in their cellars, although the rain had been falling but a few hours. A number of basements began to fill which had never been affected by the rains before. The river was way over it's bank south of town on the Wilson Highway and water stood almost three feet over the road and made car driving impossible for a day. A couple of cars were driven off the grade by traveling men who were not well acquainted with the road. Many cars passed over the grade with water up to the running boards but as it is a good gravel road there was no danger in getting stuck. The rain was followed by several days of cold weather, but at this writing the weather is again warm and just fine to help along the bumper corn crop here.

SCHOOL BEGINS MONDAY

The Klemme schools begin Monday, August 30, with the following teaching staff in their places: In the High School department we will find Prof. Collins, of Eldora as superintendent, with the Misses Belken, of Iowa Falls, and Ebert, of Charles City, as his assistants. In the Grade department we find Mrs. Emma Gibbs, of this city, and Miss Sullivan, of Osage.

The teaching staff has been carefully chosen and all are highly recommended.

The directors have purchased several hundred dollars worth of play ground equipment for the use of the students, which will add greatly to the athletic and amusement side of their school course.

Mr. Yahnke has been hired as janitor for this year and has everything in ship-shape and the school is already for the tsudents to march in Monday when the bell rings.

HERE ARE THE FAIR DATES

Here is a handy list of Fair Dates for this part of the country:

HANCOCK COUNTY FAIR—Aug. 31, Sept. 1, 2, 3.

WINNEBAGO (Forest City)—Aug. 24, 25, 26, 27.

KOSSUTH (Algona)—Sept. 6, 7, 8, 9, 10.

IOWA STATE (Des Moines)—Aug 25th to September 3rd.

MINNESOTA (Minneapolis)—September 4th to 11th.

THE CASUALTY LIST FOR THIS WEEK

Henry Johnson, who works for Clark Bredbenner is carrying his right arm around in a sling as the result of getting kicked by the business end of Clark's Ford Truck. Henry was trying to crank the thing Saturday afternoon and got it snorting all right but the crank buzzed around and caught him on the wrist, fractuing the same. It was tough luck fo Henry (we mean both Henrys) because after Henry Ford knocked the stuffng out of Henry Johnson, then Henry Johnson turned around and kicked the stuffing out of Henry Ford Truck.

Casual No. 2 is no other than Art Kuck, although he has practically recovered by this time. Art was one of the main rooters at the ball game Sunday and was gleefully dancing around when he slipped and fell on that part of his anatomy where he keeps his pocket book. The pocket book was not so badly injured but it made Art have a lame — hip for a few days.

As to the rest of the casuals they are geting better. Billy Busch is recovering from the busted ankle he got playing ball. Adolph Lauritzen has gone back to Ringstead after recuperating a few days here getting over the effects of a broken leg, and Henry Lau's window which got busted up by a ball is now healing up fine with a metal patch in the middle.

FIRST METHODIST EPISCOPAL CHURCH

A. H. Meyer, Pastor

Preaching service Sunday morning at 10 o'clock.

Sunday School at the close of the preaching service at 11 o'clock.

Union service in the country church Sunday night.

Midweek prayer meeting on each Thursday evening at 7:30.

All are invited to our services.

Local News!

"Bill" Miligan was up from Goodell Tuesday talking to old friends.

A. C. Ripley of Garner, was a business caller in Klemme Saturday.

Supervisor Burhow, of Kanawha, was here Tuesday.

The Misses Minnie and Gretchen Funk returned last Wednesday from their weeks trip to South Dakota.

Mr. and Mrs. Anthony Ahrenkeil and baby were Klemme visitors last Wednesday evening.

The misses Alma and Edna Schmidt of Garner were calling on Klemme friends Saturday.

Mrs. Sumner Trumbell and Iva Christie of Goodell were Klemme callers last Wednesday.

Mike Haskins, of Garner, was here Monday reading meters for the Iowa Falls Electric Co.

Mr. and Mrs. Arthur Durfee, of Austin, Minn., were Klemme visitors Tuesday.

Mrs. J. B. Spittler informs us that the monument for Joe has been erected by a party of workmen from Watloo who were here last week.

Dr. Missman spent several days the past week in Chicago on business matters pertaining to his profession.

Mr. and Mrs. George Nissen and family of Iowa Falls, were visiting relatives and friends here Sunday.

Mr. and Mrs. N. L. Jacobson from Celar Lake, were Klemme callers on Tuesday.

Fred Haupt returned Monday evening from his trip through the west. He thoroughly enjoyed his stay in sunny California.

Mr. C. V. McCullough, of Garner, was here last Thursday for a visit with his son, Gearald, and daughter, Mildred.

Chris Jacobs of Garner, and Mr. Rolf, a relative, were transacting business in Klemme Monday afternoon.

You are overlooking a good thing if you pass up the ads. Read each page, there are eight pages in this edition.

E. S. D. Kars has installed a new adding machine to bettre be able to take care of his business. The machine is a hum dinger alright and will be a great time saver for him.

Harold Gruetzmacher came home from Ames Tuesday morning. He has been attending summer school there. Harold came home to "borrow Dad's car" as he plans on takink a vacation for a few days and will return to Klemme again Sunday.

Miss Arvella Emerson came last Friday evening from Spencer, Iowa, for an extended visit with her father, A. L. Emerson, who is now employed in the Gruetzmacher Harness Shop.

Mrs. Johnson and daughter Grace, of Los Angeles, California, came Saturday evening for an extended visit at the E. S. D. Kahrs home. Mrs. Johnson is a sister of our druggist.

Mr. and Mrs. H. Ludwig and Mr. H. D. Ludwig drove up from Nevada, Iowa, last Wednesday for an over Sunday visit at the home of Mr. and Mrs. E. S. D. Kahrs.

Mr. and Mrs. Ray Clemann, who live east of Klemme, are the proud parents of a fine baby girl who came to make her home with them last week Tuesday.

Mrs. W. F. Pavey and son Wayne, left last Wednesday for Hayfield, Minn., for a visit with Mrs. Pavey's sister, Mrs. Verner Lewis. They returned to Klemme Monday evening.

Mrs. Frank Gruetzmacher's and Miss Minnie Lenz' Sunday School classes had a picnic dinner southeast of Goodell Sunday near the James Schneider home. They thoroughly enjoyed their outing.

Art Kuck has been enjoying a visit from his father from Knoxville, Ohio. The senior Mr. Kuck has been spending a few days in Garner this week visiting relatives. He intends to be here a couple of weeks.

Henry Lau & Sons have been retouching their implement building the past few days and have painted all the door and window frames and also put a water-proof mineral paint on the outside brick walls.

Fred and Casey Blank were both here for an over Sunday visit with their parents, Mr. an Mrs. Tom Blank and family. Fred has a depot at Ward, South Dakota, and Casey works in the depot at Belmond. Both boys are making good as railroaders.

Fred Griewe and family drove over from Rudd last Wednesday for a visit with the Henry Griewe family here until Saturday. During their stay here the two Griewe families drove to Burt, Iowa, for a visit with Rev. Wessel and family.

Mrs. Louis Strieby and baby were visiting with Klemme friends last Wednesday evening. The Strieby family formerly lived in Klemme and Louis was working in the meat market. The family now lives at Garner.

Miss Anna Griewe returned last Wednesday evening from her ten days vacation spent at Lake Okobopi. We have not heard her tell of any big fish she caught yet but presume she got her share of fine pike and pickerel.

The professional band which has been playing at Mason City this summer, closed their season with a concert in the park there Sunday evening. It was perhaps the best band in the middle west. Most of the musicians in the band will play in symphony orchestras this winter.

Mrs. Thompson was here the latter part of last week from Waterloo. Mrs. Thompson was formerly in the hotel business here and still owns the hotel and wa here looking after business interests. She and her daughters live in Waterloo now and she also told a Times reprter that Mable is holding a good position as one of the instructors in the business college there and Faye has a position clerking in one of the large stores.

The Second of a Series of Advertisements on Practical Skin Hygiene

For Every Skin, Its Own Restorative

Few women know definitely the condition of their own skins. Yet hundreds permit some uninformed storekeeper to prescribe their facial treatment—a "hit or miss" beauty plan which rarely results in satisfaction.

Is Your Skin Dry?

Usually the dry skin is tight and drawn; it sometimes flakes off like fine dandruff. There may be fine lines about the eyes and it is inclined to burn in the wind.

Knowing that your skin is dry, you would not wittingly accept a "cureall" intended for an oily or normal skin—or "any skin at all". Only a treatment especially prepared to correct its peculiar condition can serve your purpose. You will learn the secret of how to look your best through "The Combination Treatment Box For Dry Skins", illustrated above—containing six invaluable preparations scientifically devised to keep exactly such skins as yours smooth, pliable, youthful. Address The Franco-American Hygienic Company direct, or write us, requesting that our Personal Service Retailer in your vicinity call at your home.

Would you engage in a dignified, profitable profession among your personal friends? If not already represented in your community, The Franco-American Hygienic Company offers women of energy and refinement an attractive position as our Accredited Retailer. An inquiry will bring complete details concerning our thorough training and liberal profit sharing arrangement.

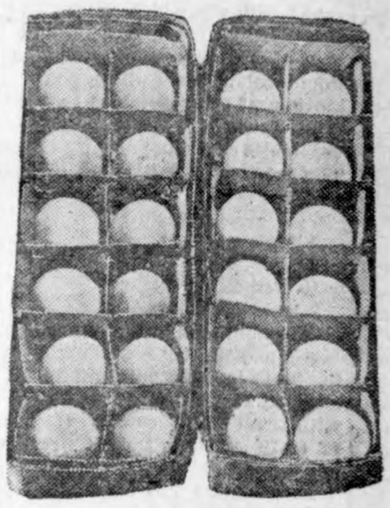
POULTRY

PROFITS IN POULTRY FLOCK

Farmer Should Be Careful to Gather Eggs Regularly and Market Them Promptly.

The marketing of the product, particularly eggs, has an important bearing on the profits of the flock. Under most conditions it is impossible for the farmer to seek a special market for his eggs, but he should be very careful to see that the eggs are gathered regularly and frequently and promptly taken to market. Failure to do this is responsible for the spoiling of a great many eggs.

When the methods of buying are such that payment is made for good eggs only, a plan which is becoming more widespread and bids fair to be compulsory in most states, the farmer will suffer a decided money loss if he



Carefully Packed and Graded.

does not make it his business to see that all the eggs delivered are fresh and marketable at full value.

One of the greatest causes of spoiled eggs during the hot summer season is the development of chick embryos in fertile eggs, poultry specialists of the United States department of agriculture say. This loss is preventable simply by producing infertile eggs. All that is needed to accomplish this is to separate the male birds from the females as soon as the breeding season is over. All the eggs sold will then be infertile and incapable of embryo development.

DISPOSE OF SLACKER FOWLS

Hens, Too Old or Too Lazy to Pay Their Way Should Be Eaten, Canned or Sold.

The slackers are hens too old or too lazy to pay their way, those using their feed for making fat and those that have finished their year's production of eggs and are beginning to molt. The poultryman cannot reasonably expect to maintain a high production if he has many birds of this stamp. Cull them out at once. They should be eaten, canned or sold.

DON'T CHANGE FEEDING PLAN

Various Methods May Be Successful as Conditions Are Different—Make Study of Flock.

If your method of feeding gives good results do not change it just because you read of other methods used by other poultry raisers. Various methods may be successful; conditions are so different that they demand different methods. A poultry raiser must study the conditions of his own flock, their surroundings, the climate, etc.

FOR BETTER EGG PRICES

Produce infertile eggs.
Gather twice a day.
Keep in a cool place.
Market twice a week.
Protect eggs from sun on way to market.
Feed oyster shell for stronger egg shells.
Do not market eggs from stolen nests.

EXERCISE FOR LAYING HENS

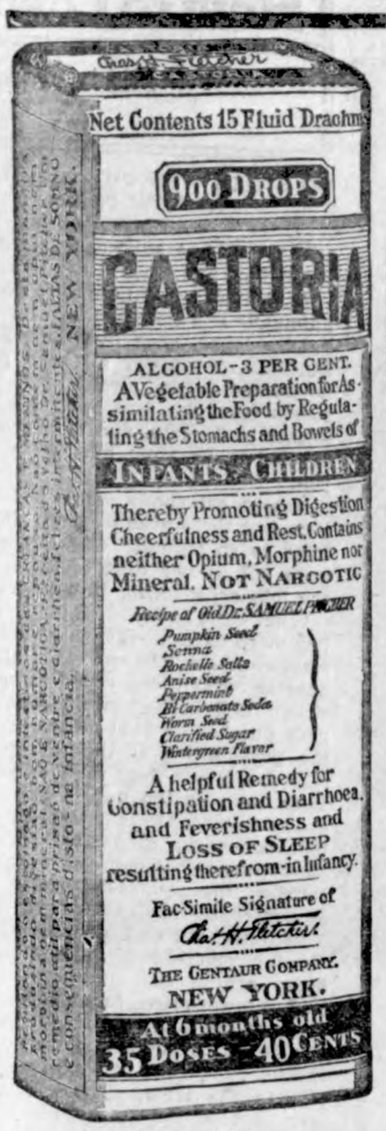
Good Way Is to Feed Oats, Wheat and Barley in Litter—Change the Straw Frequently.

One way to furnish exercise for laying hens is to feed oats, wheat and barley in litter. The floor is covered with straw 6 inches deep. In this the grain feed is scattered. The straw is changed frequently as it becomes soiled from droppings. Some of the poultry diseases are spread through droppings.

DOUBLE YARD SYSTEM BEST

While Fowls Are Using One, a Crop of Oats or Rye is Planted in the Other.

The double yard system is the best for yarded fowls—that is, each pen has the run of a front and back yard, and while they are using one a crop of oats or rye is planted in the other. As soon as the green blades are up three inches the fowls are turned into it and the other yard dug up and planted.



Exact Copy of Wrapper.

Children Cry For Fletcher's CASTORIA

Special Care of Baby.

That Baby should have a bed of its own all are agreed. Yet it is more reasonable for an infant to sleep with grown-ups than to use a man's medicine in an attempt to regulate the delicate organism of that same infant. Either practice is to be shunned. Neither would be tolerated by specialists in children's diseases.

Your Physician will tell you that Baby's medicine must be prepared with even greater care than Baby's food.

A Baby's stomach when in good health is too often disarranged by improper food Could you for a moment, then, think of giving to your *ailing* child anything but a medicine especially prepared for Infants and Children? Don't be deceived.

Make a mental note of this:—It is important, Mothers, that you should remember that to function well, the digestive organs of your Baby must receive special care. No Baby is so abnormal that the desired results may be had from the use of medicines primarily prepared for grown-ups.

MOTHERS SHOULD READ THE BOOKLET THAT IS AROUND EVERY BOTTLE OF FLETCHER'S CASTORIA

Terrible Tortures From Itching Skin Diseases

No Sure Relief Until the Cause Is Removed.

When the blood becomes infested with millions of tiny disease germs that attack the skin, then the fiery irritation and intense itching will remain with you until these germs are removed from the blood.

Genuine relief therefore, can only be expected from a treatment that goes right to the seat of the trouble, and strikes at its cause. Such a remedy is S. S. S., the reliable old blood purifier that kills the germs of disease, and sends a new supply of rich red blood coursing through the veins.

S. S. S. has been used successfully in some of the worst cases of eczema and other skin disorders.

For valuable literature write to Medical Adviser, 108 Swift Laboratory, Atlanta, Ga.

YOUNGSTER MADE WORD GOOD

Though, as It Turned Out, It Was at the Cost of Some Personal Discomfort.

Marshall, who is five, lives in a flat building. He is a real boy and although he has a rear yard and a sand pile in which to play, his mother has more or less trouble keeping him off the streets. A neighbor saw him across the street one morning and the next day called his attention to the fact that he was out of the zone mapped for him. He was one of the busy ones about a vegetable wagon. "Yes," he said, "I had to get some sings." The next morning he asked his mother for the market basket. He immediately disappeared and soon returned, accompanied by the vegetable man. In the basket were three pounds of potatoes, a box of berries and two cantaloupes. Mother had to settle whether she needed the goods or not. At any rate, Marshall made his word good with the neighbor that he had to get "some sings." When questioned by the same neighbor about his shopping expedition he said: "Yes, and mother spanked me, too."

His Favorite Time.

"Wouldn't my little man like to go and visit grandma in the country?" asked his mother.

"Yes, mamma, if the chickens are ripe now," replied the six-year-old.—Boston Transcript.

WAS TO BE MORE YELLING

Safe to Say That Father's Prediction Turned Out to Be Absolutely Correct.

The sweetly peaceful scene in the little sitting room was suddenly disturbed by a loud yell, and the honored guest sprang wildly from the chair into which he had just sunk, while the daughter of the house felt her face grow pale.

She had had hopes from this visit. Alas, poor girl, were they to be blighted?

But father took the matter—and his small son—firmly in hand. With a graceful apology he removed the bent pin from the chair and the aforesaid small boy from the room.

"Now, look here, Charles," he said sternly, in the back yard, "why did you do it?"

"It—it was an experiment, father!" faltered the laddie.

"An experiment!" snorted father. "The only man who has visited your poor sister for years, and you go and drive him away!"

"Well, dad," explained the boy, "he advertises that he is a painless dentist, an' I wanted to find out if it was true, an' it wasn't. You should have heard him yell?"

"Yes," was the father's grim comment. "And some one else is going to hear you yell now?"

Equivocation is first cousin to a lie.

POET'S WORD GOOD ENOUGH

Student Was Absolutely Satisfied Without the Necessity of Seeing Any Proofs.

A good story is going the rounds of Princeton about Prof. Alfred Noyes, the English poet.

Professor Noyes, it is well known, likes very much to read his works aloud to his friends, and at Princeton, with so many young men under him, he is usually able to gratify this liking to the full.

The other day Professor Noyes said to a junior, who had called about an examination:

"Wait a moment. Don't go yet. I want to show you the proofs of my new book of poems."

But the junior made for the door frantically.

"No, no," he said, "I don't need proofs. Your word is enough for me, professor."

The best time to kiss a pretty girl is any old time.

Twenty Five Years of Success

proves that the originator of

Postum Cereal

was building upon a sure foundation when he devised this most famous of all cereal beverages.

Where one used it in place of coffee, in the beginning, tens of thousands drink it today—and prefer it to coffee.

Healthful, delightful to taste and satisfying to every one at table.

Postum is now recognized as coffee's one and only great competitor among those who delight in a coffee-like flavor.

How to Lower Your Meat Bills

Hints From the Department of Justice

NO STEER WITHOUT GOOD MEAT AT LOW PRICE.

WANTED—A steer composed entirely of loins and ribs.—H. C. L.

Unfortunately, "there ain't no such animal." If a porterhouse steer could be developed by a live stock Luther Burbank, we could all have porterhouse or sirloin steaks and rolled roasts from the first and second ribs —next to the loin, and therefore most expensive, as your butcher will tell you.

Nearly everybody wants high-grade cuts, but there aren't enough ribs and loins to go around. These cuts compose but 27 per cent of the carcass, the loin constituting 18 per cent.

What's the answer? If people would buy more chucks—they make excellent steaks—or briskets and clods (all fore-quarter cuts) there would be cheaper sirloin and porterhouse steaks. Ask your butcher or food economist about the possibilities of the fore quarter, also cheap cuts from the hind quarter. Then there is the flank. Ever eat a good flank steak? It possesses a flavor that cannot be duplicated. The full flank composes 4 per cent of the beef carcass, the square-cut chuck about 24 per cent.

In New York and other Eastern cities far removed from the packing house center, ribs and loins can be sold at lower prices than in Illinois, because of the heavy demand by the foreign-born population for rounds, chucks, rumps and other cuts less popular in the West. The least expensive part of the beef carcass is the shank, which is excellent for stews and soups. The round will supply roasts as well as steaks. Pot roasts, steaks and braising meat are furnished by the rump at medium expense. Chucks supply roasts, steaks and stews. The shoulder clod, another economical cut, is used by well-taught cooks for steaks and pot roasts. There is a large variety of extra portions that many housewives know little about, such as the heart, liver, kidneys, lungs and sweetbreads.

But you must know something about beef cuts to know what to buy and how to buy. Then you can neglect the costly steaks for the time and return to them when the price has been equalized by the more general buying of the less-familiar cuts.

Woman purchasing agents of the home, in learning more about the various cuts and their culinary possibilities, will have impressed upon them a knowledge of the limited quantity of loins and ribs and the excessive demand for them which causes the price to keep up.

When ordering the foods for the day, the meat part of the meal is always the first planned, and the remainder built around it. Housewives should be familiar with all cuts and then cook them so as to get the best flavor.

Rump Pot Roast of Beef With Dumplings.

3 pounds beef rump,
¼ pound salt pork,
¼ cupful carrots, onion, celery and turnips.
1 teaspoonful parsley,
1 bay leaf,
4 cloves,
¼ teaspoonful pepper,
Salt.
3 cupfuls water.

Wipe the meat, dredge with flour and brown the entire surface in pork fat. Place on a rack in a kettle, surround with vegetables, spices and water. Season, cover closely and simmer slowly four hours, keeping the liquid below the boiling point. Remove meat and vegetables to hot platter. Thicken stock and serve with vegetables as a sauce around the meat. The sauce may be strained if desired.

Dumplings.

2 cupfuls flour,
4 teaspoonfuls baking powder,
½ teaspoonful salt,
2 teaspoonfuls fat,
2-3 cupful milk, more if needed.

Mix and sift dry ingredients. Work in shortening, add milk gradually, pat out one-half inch in thickness, cut with small biscuit cutter. Cook from 12 to 15 minutes. Do not lift the lid while cooking.

This mixture may be made slightly thinner and dropped from a spoon into the stock for cooking.

Smothered Beef.

3 pounds of rump or clod,
3 large onions sliced,
3 tablespoonfuls oil or drippings,
2 tablespoonfuls mild prepared mustard,
Flour mixed with salt and pepper,
1 teaspoonful celery seed,
1 cupful strained tomatoes or ½ can tomato soup.

Dredge meat with flour. Brown well in heavy pan. Brown onions in oil; add mustard, celery seed and tomatoes. Pour this sauce over meat and cook slowly three hours or more on top of stove or six hours in a fireless cooker.

How to Lower Your Meat Bills

Hints From the Department of Justice

CUTS THAT COST LESS HAVE HIGH FOOD VALUE.

From Maine to California women purchase meat in practically the same way. Nine out of ten have learned for years, as do some even now, that the more expensive and most tender cuts of meat must naturally be most nutritious and that the cheaper and tougher cuts are to be discarded or left with the butcher to dispose of, not realizing if they purchase only the tender cuts, he must keep the prices high enough to cover the loss of what isn't sold. Our leading dietitians of today are teaching the women that the tougher cuts of meat are exactly as nutritious as the more tender, if not more so, because the blood is drawn to the parts in which the muscles are constantly used.

In a beef animal of 500 pounds about 75 pounds are tender meat, the loin in the hind quarter composed of sirloin, porterhouse and single steaks and the prime ribs of the fore quarter. These two commercial cuts being the most tender are most in demand and every butcher, no matter what the locality, will tell you he has no difficulty in disposing of them. The difficulty lies in selling the cheaper cuts as well as the extra meat portions.

The greatest trouble in selling the cheaper cuts comes from the fact that women do not know how to cook them to make them palatable. A long slow cooking is the secret of converting tough meat into delightfully tender roasts or steaks. Excellent dishes may be served from flank, chuck, rump steak or neck, providing the meat is carefully seasoned, seared to seal in the juices and then cooked to a delicate brown. This necessitates a moderate temperature.

Just as many tender expensive steaks are ruined in cooking by keeping on the fire too long; tougher ones are condemned because of the lack of the proper cooking. Whereas a long slow cooking will ruin a porterhouse, it only adds to the excellent qualities of a rump or round steak.

For every meat animal handled there is a heart, liver, kidney, tripe, tongue, sweetbread, tail and head to be used. We know that an animal has to have a neck, fore and hind shanks, legs and shoulders to hold together the choice loin and ribs.

What is true of the cuts of beef is likewise true of other meats.

Beef a la Mode.

Three pounds of either of the following cuts, chuck, brisket, rump, neck or hanging tenderloin will make a splendid dish treated as follows: Crush half a dozen kernels of black pepper with as many cloves. Rub this well into the meat. Skewer or tie the meat together as for a pot roast and put into a crock with one small onion, sliced, one sliced carrot, a bit of thyme and three bay leaves. Add a cupful of vinegar and water enough to barely cover and let stand in a cool place for 24 hours. When thoroughly marinated, remove the meat from the liquor and sear on all sides in a pan of hot vegetable shortening. Sprinkle a tablespoonful of flour over the meat and gradually pour the liquor and seasoning, adding salt, over the meat. Add a pint of boiling water. Allow all to boil up, then set to simmer until meat is done, turning frequently. When beef is done, strain the remaining liquid and add cooked carrots, turnips and small onions. Let cook three minutes and pour over the meat. Serve with plain boiled potatoes.

Table Showing Caloric Value of Commercial Cuts of Beef.

Inexpensive Cuts.	Calories Per lb.	Use.
Shank	875	Stews, casserole, soup stock
Round	950	Steaks, roasts, stews, braising
Rump	1,400	Steaks, roasts, braising, stews
Flanks	1,240	Steaks or made dishes
Plate	1,285	Stews, pot roasts, boiling, soup, corning.
Chuck	1,105	Stews, roasts, steaks, boiling piece
Shoulder and clod	840	Steaks, stews, roasts
Neck	1,070	Steaks, soups, braising, corning
Expensive Cuts.	**Calories Per lb.**	**Use.**
Loin	1,190	Steaks and roasts
Prime ribs	1,450	Roasts

Making Thrift Compulsory.

In the police courts of New York state it is getting to be a common practice to sentence minor offenders to a term of saving, and in Syracuse last year $5,000 was invested in this way in War Savings stamps, all later returned to the men or used to help their families. At Niagara Falls, when David Broderick was placed on probation six months ago and ordered to give the probation officer $12 a week for War Savings stamps, he complained bitterly. At the end of six months he received $230.50 worth of stamps, and he voluntarily placed himself on indefinite probation, promising to bring $10 a week to continue his savings investment.

Outguessed Him.

Pauline Lord went to call on William Harris, Jr., anent an engagement just before he set sail for Europe.

"What's your salary?" demanded Harris, after the other details had been discussed. Miss Lord told him.

"Ouch!" decried the manager, wincing at the sum.

"Why, don't you think I'm worth it?" Miss Lord asked.

"Yes," admitted Harris, "but I didn't think you did."

Some Kicks.

"And you say the mule kicked you, Sam?"

"'Deed he did, boss."

"How far did he kick you?"

"Watcher mean, boss?"

"How far were you from him after he kicked you?"

"Does you mean how fur was I from him after he kicked me de first or de las' time, boss?"—Yonkers Statesman.

Land for National Forests.

To date the national forest reservation commission has approved for purchase 1,751,145 acres for national forest purposes in the mountain areas of the eastern national forests.

Division to Two-Mile Trench.

A division, which is the largest body known in the organization of the American army, will fully man two miles of trenches. The regulation distance in the manning of a trench is a yard to a man. There are three lines, however, needed to fully man such defenses—the firing line, which is down in the trench, a yard behind each man; the support, which is back a short distance, and the reserve.

Depends on Circumstances.

"One should always serve from the left side. That's right, I believe." "All depends. In serving subpenas you sneak up from the rear."

Johnny Was Curious.

As a great privilege, John was taken to church to see his baby cousin baptized. Just as the minister had the water all ready and there was a hush in the congregation, John leaned toward his mother and asked in a too audible stage whisper, "Hot or cold?"

Great Expectations.

A mosquito fleet may be expected to come up to the scratch.—Wall Street Journal.

How "Rubbers" Were Produced.

"Rubbers," as Americans have named them, were the invention of Charles Goodyear, father of the man who helped produce the Goodyear welt machine. In 1833 it was found that India rubber, dissolved in turpentine and mixed with lampblack, would give a waterproof surface to leather. But the leather so treated was subject to atmosphere changes, heat causing it to melt and cold to crack. Mr. Goodyear mixed sulphur with the other combination and produced rubber.

Mothers' Cook Book

Follow the true course of your life, but keep your eyes open for all beautiful sights, and the ears responsive to all harmonious sound, as you go steadily forward.

A Day's Meals.

When it is not possible to have fresh fruit for the morning meal, or when a variety is liked, a dish of well stewed prunes with very little sugar is a most wholesome fruit. They can always be kept on hand at any season, and are a storehouse of medicinal as well as food value. In buying prunes it is never economy to take the small ones as they are usually all pit. Examine the stones or pits and buy the kind that has the least waste; you will pay a higher price, but they are worth it. Wash them well in warm water and then soak them over night. Simmer until tender in the same water in which they were soaked. They will require little sugar, for which, these days "we are very thankful."

Whole wheat right from the granary is especially good for growing children. When well cooked, and served with top milk it is the ideal breakfast food for the whole family. It will need to be soaked over night then cooked all day at a low temperature to soften the grain.

—

When a small supper dish, something hot is desired, try

Escalloped Celery.

Cook the outer stalks cut in small pieces until tender, drain and add to a rich white sauce. Bake until thoroughly heated and serve from the baking dish. Another which is very good is

Cheese and Crumbs.

Take two cupfuls of soft bread crumbs, a cupful or less of grated cheese, one and one-half cupfuls of milk, one egg and salt and pepper to taste. Soak the bread five minutes in the milk, add the other ingredients and bake. Serve hot.

—

Filled Cookies.

Take one-third of a cupful of butter substitute, one cupful of sugar, two teaspoonfuls of cream of tartar and one of soda, half a cupful of milk and three cupfuls of flour. Salt and flavoring to taste. Roll out and place a filling (cooked) of half a cupful of sugar, a tablespoonful of flour, one cupful of chopped raisins and half cupful of water with the rind and juice of half a lemon. Cover with another cooky and when all are covered bake in a hot oven.

—

Swiss Steak.

Take a pound and a half of round steak, lay it on a meat board and with the edge of a heavy saucer pound in as much flour well seasoned with salt and pepper as it will hold. A good cupful will not be too much. Brown in a very hot frying pan with a sliced onion, add water to cover and simmer for an hour or two over a low burner or on the back of the range. A tablespoonful of vinegar added with the water if the meat is very tough will help to soften the tough fibers of the meat.

BOLSHEVIK PEACE TERMS ARE HARSH

Polish Nation Must Submit to Severe Conditions if War is to Terminate

WANT TO SOVIETIZE NATION

Plebiscite in Russian Poland With Propaganda Rignts to the Enemy, One Condition—Warsaw Likely to Fall Soon.

Washington, D. C.—A plebiscite to determine the future of Russian Poland is one of the peace terms drawn up by the bolsheviki coincident with the first proposal of an armistice by the Polish government. The right of unrestricted propaganda in this territory during the year intervening before the plebiscite would be demanded.

These and the other terms of peace, which are believed to have been formulated for submission at the meeting between the soviet and Polish emissaries have been received in official circles.

While not regarded as final the terms are accepted here as illustrative of the intention of the invaders to impose peace conditions of a drastic nature.

The other terms include the right of the soviet government to unrestricted transmission of all code messages across Poland between Russia and Germany, the turning over of salt and coal mines in Poland for operation by the soviet government and the right of unrestricted travel for all soviet nationals across the Polish frontiers without Russian vise on passports.

The provision for a plebiscite in the portion of Poland formerly belonging to Russia and the stipulation that the bolsheviki be granted permission to disseminate propaganda in that territory is viewed by officials as likely to be obnoxious to the Poles.

Officials are inclined to believe that the peace terms to be submitted at Minsk will be more severe than those prepared for the Baranovitch conference, which ended abruptly when the Polish armistice emissaries replied they had no authority to conclude peace.

Closing in On Waraw.

Paris.—Closing in on Warsaw from the north, east and southeast, the bolshevik hosts are within 20 miles of the capital, and little doubt is felt here that they will be in the city before the peace negotiations are concluded.

One hundred thousand citizenn of Warsaw have pledged themselves to defend the capital to the last breath. But it is felt here that such an unorganized effort cannot seriously affect the fate of the city. This apparently is the view of the Polish government which is reported considering moving to Posen.

Express Rates to Go Up.

Washington, D. C.—Authority to increase express rates 12½ per cent was granted the American Railway Express company by the Interstate Commerce commission.

The increase by unofficial estimates will add $35,500,000 to he annual income of the company. The commission's decision does not take into consideration the recent award of the railroad labor board of increased wages approximating $43,000,000 to express company employes, and it is expected the company soon will apply for an additional advance to meet new wage scales.

Attempt to Slay Venizelos.

Paris.—An attempt was made to assassinate Premier Venizelos of Greece here as he alighted from an auto to board a train for Marseille. Two bullets struck him, in the shoulder and side. One bullet grazed the thigh bone and the second lodged against the shoulder blade. Venizelos, it was stated, is in no danger. The assailants, declared to be followers of former King Constantine, whose overthrow Venizelos caused, were arrested. Premier Venizelos is one of the heroes developed by the war.

Poles Leaving Warsaw.

London.—The Polish government is leaving Warsaw, its capital, it is asserted in a wireless dispatch from Moscow received here. The government is being removed to Kalisz, the message says. Kalisz is the capital of the province of Kalisz and is about 150 miles west-southwest of Warsaw, close to the old German border. It is on the direct railway line from Warsaw to Posen, for which latter place all the foreign legations in Warsaw have left, it was announced.

Poles Outnumbered.

Washington, D. C.—Polish forces defending Warsaw are outnumbered about two and a half to one. Details as to the bolshevik military organization, received in official circles, place the ration strength of the soviet army at 350,000 men. The strength of the Poles has been estimated at 140,000. It is estimated that in rifle and saber strength alone, the soviet forces composing the army north of the pripet river consists of 46,000 men. Bolshevist rifle and saber strength south of the river is 48,000 men.

SOLUTION FOR POLE-RUSS WAR

WilsonOutli ens Program for Curbing Menace in Europe. Clarifies America's Position.

Washington, D. C.—President Wilson has set forth America's position in the Polish situation in a 2,500 word letter to Baron Camillo Romano Avezzman, Italian ambassador to the United States. The principal proposals for settling the Russo-Polish conflict outlined by the president are:

Withdrawal of all Russian forces from Poland, and withdrawal of all allied troops from Russia, together with assurances by the allied and associated powers that Russia will not be dismembered.

Contingent upon the retirement of the Russians from Poland and the withdrawal of any foreign forces now in Russia, the president suggests that the allied and associated powers issue a declaration guaranteeing respect for the boundaries of ethnographic Russia and proclaiming that aggression on Russia by Poland or any other power will not be tolerated.

This policy, the president believes, not only would restore peace between Poland and Russia, but weaken and aid the eventual overthrow of the bolsheviki. He proclaims himself unalterably opposed to the recognition of the soviet government of Russia.

What material aid the American government is ready to contribute to carrying out and enforcing this policy, the president did not state. He did say, however, that to aid in maintaining the independence and territorial integrity of Poland the "policy of this government will be directed to the employment of all available means."

The president denounced the bolsheviki unreasoningly and would limit dealings with them to a minimum. He approves of the effort to arrange an armistice between the soviets and Poland, but he is opposed to entering a general peace conference with them, which probably would involve recognition of the bolsheviki and dismemberment of Russia. Beyond the narrowest armistice negotiations with the soviets he would not go.

Without regard to political and social considerations, the United States is unable to recognize the bolshevist government of Russia because it is faithless, without honor and bent upon promoting by diplomatic agencies the overthrow of the governments of other nations.

Father Held for Daughter's Death.

Hebron, Neb.—Frieda Bostelman, 18-year-old Chester girl, died of poison administered by her own father, Fred Bostelman, on the day before her wedding, according to a verdict rendered by a coroner's jury here. The father had objected to the girl's proposed marriage to W. J. Butske, young Hebron school teacher. Bostelman has been in jail nearly two months following his daughter's sudden death. The inquest was several times postponed to allow authorities to gather evidence in the case.

Bostelmann was returned to jail here to be held without bond for trial in the district court.

Kansas Miners Back to Work.

Pittsburgh, Kan.—Several thousand Kansas coal miners, who were on strike for two weeks in protest against penalties imposed by operators for observing a five day week, returned to work last week. Alexander M. Howat, district president of the United Mine Workers, said the men did not go back at his direction, but on their own accord under protest.

Various local unions are holding meetings and adopting resolutions condemning John L. Lewis, international miners' president, for interfering in the Kansas situation.

Lamb Prices Lowest in Years.

St. Louis, Mo.—Lambs sold here last Friday for the lowest price in four years. Prices have dropped steadily recently, and the top was $11.500 per hundredweight. In 1917 and 1918 the price of lambs ranged from $16 to $20.

Going After Landlords.

Chicago, Ill.—Two petitions requesting Governor Lowden to call a special session of the legislature to take some action toward curbing profiteering landlords are being signed by thousands of Chicago tenants.

Sugar Market Breaks.

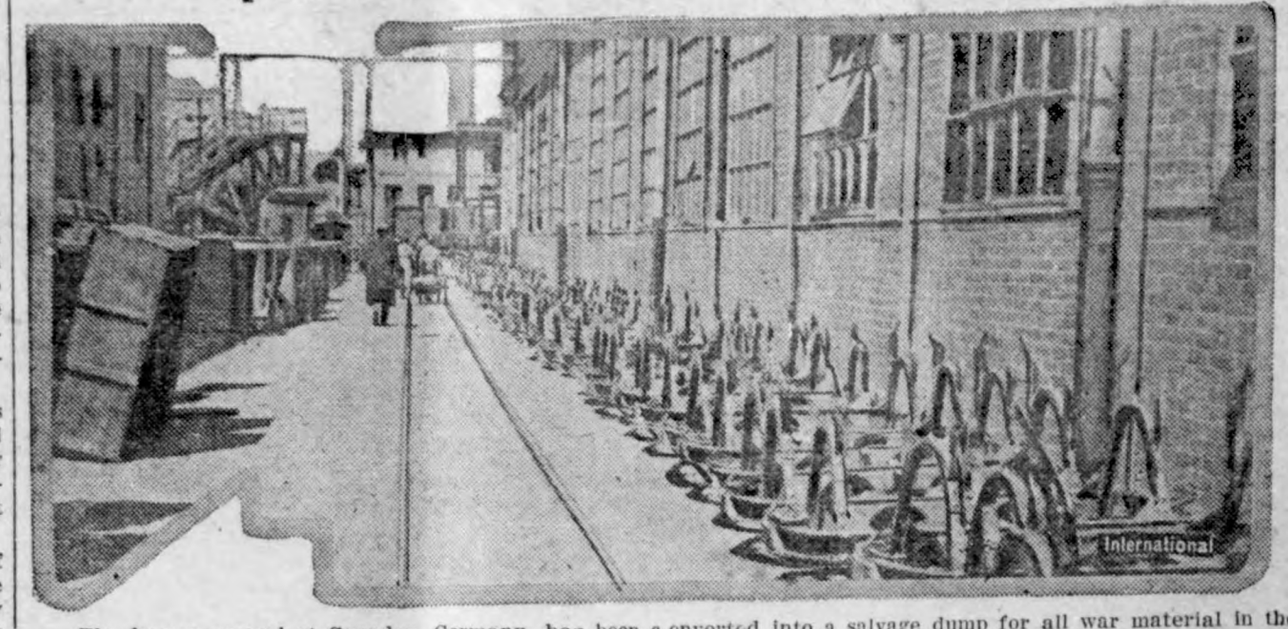
New York.—The feature of the sugar market has been the decline in fine granulated, Arbuckle Bros. announcing a new price of $17.10, less 2 per cent for cash, their last previous allotment basis being 21 cents, less 2 per cent. This decline is made possible by the recent sharp break in raw sugar to a basis of 12 cents, cost and freight, for Cuban, which presents a decline of about 10 cents per pound within the last three or four months.

Auto Industry May Suspend.

Indianapolis, Ind.—Refusal of banks throughout the country to extend credit to auto dealers and makers will force suspension of every branch of the automobile industry within a short time, said H. C. Deming, production superintendent of the William H. Small company here.

Thousands of automobile factory employees of this city have been laid off and the forces are being reduced further. "People simply are not buying cars now," said an official of the Nordyke & Marmon company.

Spandau Arsenal Is Now a Salvage Dump



The former arsenal at Spandau, Germany, has been converted into a salvage dump for all war material in the Berlin area, and the metal is being used in the manufacture of peace-time articles. This photograph shows one of the many small metal trucks being made for shipment to France to be used in reconstruction work.

U. S. HOSPITAL AT CONSTANTINOPLE

Designed Eventually to Be Nucleus of Important Medical Center in Near East.

BALKAN WOMEN MAY TRAIN

Equipment of the Hospital, Which Will Have 100 Beds, Will Be Supplied by the American Red Cross.

Constantinople.—Americans in Constantinople have established a hospital which is designed eventually to be the nucleus of an important American medical center in the near East. Admiral Bristol, the American high commissioner, is chairman of the hospital's board of directors, which includes G. B. Ravndahl, the American commissioner and president of the American chamber of commerce; Maj. G. Claflin Davis, director of the American Red Cross in the near East; Col. James P. Coombs, director of the American committee for relief in the near East; Dr. Mary Mills Patrick, president of Constantinople College for Women; Dr. W. W. Peet, representing the various American missionary boards, and Mrs. Huntingdon, representing Robert college.

Red Cross Gives Beds.

Equipment for the hospital, which will have 100 beds, will be supplied by the American Red Cross. The personnel will be supplied by the American Red Cross and the American committee for relief in the near East, both of which have many doctors and nurses working in Turkey among war refugees of various nationalities.

Dr. A. R. Hoover, who has lived for many years in Turkey, will be director of the hospital and Dr. Elfie Richards Graff, formerly physician to Vassar college and a member of the Wellesley unit of the American committee for relief in the near East, will be his assistant. Mrs. Anna E. Rothrock of Glenside, Pa., will be superintendent of nurses and her assistants will be Miss A. Estelle Sutton of Detroit, Miss Roberta K. Sharpe of New York and Miss Mary E. Coughlin of Acton Center, Mass.

Constantinople College for Women will open a school for nurses in connection with the hospital, and within a year will open a woman's medical college to afford medical training for women of all nationalities and religions. The Rockefeller foundation has promised to send a board of inspection to Constantinople and the hospital board hopes to get the assistance of that organization in a general improvement of health and medical conditions in the near East.

Need Is Urgent.

The need for a hospital for English-speaking patients is very urgent. American firms are opening branches in Constantinople every week. This has become a great rendezvous for the American navy. The Young Men's Christian association and Young Women's Christian association have large organizations, in addition to many relief and missionary bodies, which are constantly in need of hospital space for their personnel.

Under the direction of the Constantinople unit of the American committee for relief in the near East, an open-air hospital for tuberculous children has also been established on the shore of the Bosporus a few miles north of Constantinople. This hospital is under the direction of Dr. Elfie Richards Graff. It has 50 beds, and is designed as a model institution which the Americans hope to get the Turkish, Greek, Armenian and Jewish communities to duplicate.

The new American hospital has leased a large private residence in Stamboul, the Turkish section of Constantinople.

Camden Buys Whitman House.

Camden, N. J.—Walt Whitman's home here, in which he is said to have written many of his best poems, has been bought by the city of Camden for $600. The house will be converted into a museum.

GERMANY'S COAL KING

Latest picture of Herr Hugo Stinnes, German coal king, industrial magnate and newspaper owner, who led Germany's fight against the allies' demands for coal and who was finally forced to yield at the Spa conference.

LIVES SIX DAYS IN GLASS CASE

British Scientist Makes Daring Experiment in Interest of Aviation.

WAS HERMETICALLY SEALED

Question Involved Was Would It Be Possible to Calculate Quantity of Oxygen Necessary to Airmen at High Altitudes.

London.—Six days sealed up in a glass case is a daring experiment bearing on aviation which has just been carried out by a middle-aged British university professor, Joseph Barcroft, F. R. S., reader in physiology at Cambridge university. The question involved was whether it would be possible to calculate the quantity of oxygen necessary to an airman at high altitudes.

The case in which Mr. Barcroft was shut up for six days was specially erected in a quiet room in the physiological laboratory. It was about seven feet high and about ten feet broad. The floor, walls and roof were made of glass, hermetically sealed and divided into two compartments—one fitted with a lounge chair and table and the other with a simple bed.

Took Regular Exercise.

At the foot of the bed was a pedaling apparatus consisting of a frame of a bicycle, from which the front wheel had been removed, and a small back wheel with a frame attached, to enable Mr. Barcroft to get some exercise and cause a certain amount of work to be done.

During his six days in this case Mr. Barcroft spent his time in work relating to the experiments, in taking exercise on the bicycle and in sleeping. He was kept under observation day and night to insure his personal safety, college students and others taking their turn to keep watch.

Nitrogen was continually introduced into the chamber and the air became gradually rarer in oxygen until it approximated that at an altitude of 16,000 feet, when Mr. Barcroft, who has had experience in mountaineering, experienced considerable inconvenience from sickness and sleeplessness, and also an indisposition to take any food.

Felt Rather Shaken.

At the close of the experiment some blood was taken from Mr. Barcroft's arm. The oxygen the blood contained was separated and it was found to agree with the expectations of the experiment.

Mr. Barcroft confesses to having felt rather shaken up after his release from the glass case but did not look much the worse for the experience.

The experiment is regarded here as thoroughly successful and a scientific report of it will be laid before the next meeting of the British association, where Mr. Barcroft will be president of the physiological section.

Dry Cleaners "Cleaned."

Columbus, O.—There are two suits of convict clothing at a local dry cleaning establishment which await a couple of convicts. When the place was opened for business the proprietors were surprised to see the clothing carefully arranged on the rack, where the night previous two suits of customers' clothing awaited their owners. Two convicts who had escaped from the state prison farm had made the exchange during the night.

IOWA IS MADE A TARGET

Famous Battleship To Be Objective of Big Naval Guns.

Will Go to Sea Unmanned, Under Own Steam and Controlled by Wireless for Unique Experiment.

Washipgton.—The once famous battleship Iowa, which played no small part in the destruction of Cervera's fleet at Santiago, is being prepared at the Philadelphia navy yard for what naval officers say will be one of the most unique target experiments ever attempted.

Proceeding unmanned, but under her own steam and controlled by radio, probably from seaplanes, the old sea fighter will become the objective of the big guns of the Atlantic fleet superdreadnaughts in Chesapeake bay late this summer. This will be the first time that American warships have used a moving craft for a target except in actual war.

Two of the Iowa's coal-burning boilers are being converted to burn oil so the ship may continue under way with no one aboard once its fires have been started burning and its engines placed in motion.

It is expected that the unique practice will give the gun pointers of the Atlantic fleet an opportunity to test their ability under conditions as nearly like those to be expected in battle as can be obtained. Smoke screens will be thrown around the Iowa during the runs and the course will be changed at will through the radio control system, necessitating a change in range on all the firing ships, exactly as would occur in action.

The Iowa has already been stripped of some of its guns and much valuable metal and the practice will be continued until the old vessel, a mass of twisted metal, sinks beneath the waves to join the old Texas, which, as the San Marcos, was used as a stationary target years ago.

The battleship Ohio has been turned over to the bureau of steam engineering for purposes of experiment in radio control and a staff of expert technical officers has been placed on board to arrange the Iowa practice.

Edison Uses Telegraph Key First Time in 19 Years

Orange, N. J.—Using a telegraph key for the first time in 19 years, Thomas A. Edison sent from here to a committee of the Old-Time Telegraphers and Historical association a message to be inscribed on an imperishable phonographic disc to be placed in the association's archives as a record of his style of "sending." The last time Mr. Edison used a telegraph instrument was in 1901.

Home Town Helps

GOOD CITIZENS, AND OTHERS

Vital Difference Between Them Though It May Not Always Seem to Be Recognized.

Two men went to a man who keeps a small retail store on a residence street the other day and said:

"We will paint your whole building every year if you will let us put a sign on the blank wall." And he said:

"I can't do it." So they got up a painting his store and paying $100. And then he told them:

"This is a residence street. The people are willing to have me here because I render service. That wall of mine doesn't make the street look any worse than is necessary."

They told him other men did it; that no one noticed it; that it didn't bring him a dollar's more business, but he refused all the arguments they could think of. His answer was that he owed something to the people of his neighborhood.

There is a citizen who is an asset to his community. And it is true that there is no recognition in it and probably not a dollar in trade.

There are others like this man. The man who is holding vacant lots for an increase and ekes out the taxes by renting space for disfiguring signboards is criticized, but his pocket doesn't suffer—at least he is convinced that it doesn't.

The man who refuses to do this, who keeps the grass cut and allows no accumulations of rubbish is an asset. But there is no sign to remind his neighbors that he is a decent citizen.

So with the man who doesn't let his chimney smoke, who keeps his place in repair, who doesn't have the public sidewalk forever blocked.

And they aren't paid? Well, that depends on how you look at it. Some men are pretty well paid by the consciousness that they enjoy the society of a decent citizen and good neighbor when they are alone.—Milwaukee Journal.

LEARN TO DEFEND GARDEN

Interest and Willingness Not Sufficient to Make Up for Lack of Practical Knowledge.

There is, perhaps, a love for the soil latent or rudimentary, in most of us, an agricultural instinct that has come down to us through the generations since the first gardener. It is a thing easily developed. Soon comes a liking for the smell of the earth upturned by the plow, an interest in watching the breaking of the plants through their covering and in noting the various characteristics. But skill does not always equal the interest and there must be intelligence and skill if the garden is to be a success. The habits of each variety of plant, its special needs, the nature of its insect enemies and the means of circumventing them, all must be learned by experience, but it is better not to wait for this, since disappointment may intervene. It is wise to take the instruction that experts will give and it was a happy thought on the part of the Gardeners' association to plan for this. Lectures on the subject should be well attended and productive of good results.—Indianapolis News.

Great Men From Small Towns.

The little town should be away from all main lines of travel; otherwise it is apt to be small instead of little. The infrequent motorist may dub it "as dull as Julius Caesar," but it likes it that way. It piques itself on its resents innovations, has no use for "booms" or reformers. Its people noted for "a sweet unreasonableness" their kindly neighborliness and moral rigidity quite out of fashion yet becoming. Many great men have borne witness to its charm by returning to end their days in the place where their characters ripened. After all, the little towns are the seed plots which came the best of our American manhood.—Chicago Tribune.

Whitewash for Trees.

Whitewashing the trunks of fruit shade trees has a two-fold purpose. First it adds much to the attractiveness of the lawn or orchard, second whitewash causes the old loose rough bark to be replaced by smooth healthy bark. Grubs and insects are killed and the life of the tree is prolonged.

Here is a good recipe for making the whitewash:

Mix in one-half pound of sulphur four gallons of water, add enough lime to make the whitewash, put in a handful of salt. Paint the trees. If they are very rough, they should have a second coat.—The Thrift Magazine.

Old Titles Favored.

The multiplicity of newspapers has not given rise to many new titles. "Advertiser" is the favorite. There are 160 newspapers of that designation in the United Kingdom. "Times" comes next with 150; "News" with 1[illegible] zette" with 128; "Chronicle" with [illegible] "Herald" with 119, and "Journal" with 104. The "Expresses," "Gazettes" and "Observers" muster over 50 each. There are forty-eight "Standards" and only thirty-eight "Telegraphs."—London Tit-Bits.

NOTICE OF ASSESSMENTS OF BENEFITS

Drainage District Number 103.

To A. D. White, William E. Smith, A . D. Gimer, Elmer Arnold, Amanda Township Trustees and L. W. Wesenberg Clerk of Avery Township, ock County, Iowa.

You and each of you are hereby notified that the commissioners ap- d by the Board of Supervisors of Hancock County, Iowa, to view and fy the lands in Drainage District Number 103 and to apportion to the lands and tracts, the total cost of said Drainage District made and filed their report in the office of the County Auditor as re- d by law which report follows:

r	Description Sec. Twp.	Class	Amount
White	Pt. NE¼ NW¼ 5-94-23	21.6	$202.00
White	Pt. SE¼ NW¼ 5-94-23	30.7	287.00
m E. Smith	Pt. NW¼ NE¼ 5-94-23	53.0	495.00
m E. Smith	Pt. NE¼ NE¼ 5-94-23	8.0	75.00
Gimer	SW¼ NE¼ 5-94-23	100.0	935.00
Gimer	Pt. SE¼ NE¼ 5-94-23	4.7	44.00
r Arnold	Pt. NW¼ SE¼ 5-94-23	18.8	176.00
da Tice	Pt. NE¼ SW¼ 5-94-23	30.6	286.00
way in Section 5-94-23			600.00
			$3100.00

You are further notified that the 23rd day of Sept. 1920 has been as the date for final hearing on said assessment and all objections o must be made in writing and filed with the County Auditor on or e noon of said date..

Witness my hand and official seal this 20th day of August A. D. 1920.

EAL)

Chris Jacobs,
County Auditor of Hancock County, Iowa.

BELMOND HOME BUILDING COMPANY HOUSES OCCUPIED

At this time the Belmond Building Company has practically completed ten of the houses which they planned to relieve the housing problem in Belmond and eight are now occupied. Two of the houses built in the Barry addition have been sold. One on the west side of the street was bought by Harold Claussen and the one farthest north was bought by Frank Baldridge. The other six have been rented as follows: The two on water street by Carl Heinisch and August Heinisch. The three on the west side of the river have been rented by Carl Kalvig, Lee Stacy, the middle one and Wm. Nicholei the west one. The other one occupied, the south one in the Barry addition is rented by J. W. Bray.—Herald-Press.

FORMER CLEAR LAKE RESIDENT IS DEAD

In a letter to Mrs. D. W. Hurn from her husband at Spokane, Wash., an account of the death by drowning of B. L. Wallace of that city is given. He was at his cottage at Newport and with his son went bathing and was drowned. Several years ago Mr. Wallace was an employee of the Woodford-Wheeler Lumber company in this city, later being promoted to manager of their yard at Klemme. He was, at the time of his death engaged in the lumber manufacture at Newport, Wash.—Clear Lake Mirror.

There is a growing demand all over the state for the rigid enforcement of the automobile law. Many counties are enforcing the statute to the letter and right they should. There has been an inclination on the part of almost every county in the state to overlook the statute in regard to the lighting of autos, but the increase of accidents directly attributable to glaring headlights has caused the public to demand the enforcement. The winking at certain statutes only encourages to violation of others. If the legislature saw the necessity of such a statute and made it a law, there is no common sense reason that will excuse a community for sidestepping the enforcement. The sooner all autos are equipped with lighting facilities that will conform to the state laws, just so soon will a large reduction of the number of automobile accidents be evident.—Waukon Standard.

E. C. WALLER INJURED WHILE HUNTING SPEEDERS SUNDAY

Chief of Police Stepped Off Running Board While Automobile Was Going 30 Miles an Hour.

E. C. Waller, fo any years a member of the Clear Lake police department and recently appointed chief to succeed the late W. W. Hyde was painfully but not seriously injured Sunday night when he stepped off an automobile going 30 miles an hour while chasing speeders on the paved highway between Mason City and Clear Lake.

The chief declares that the glaring headlights of an approaching automobile led him to believe the car which he had commandeered to give chase to the violators of the speed law has come to a stop and he stepped off the running board backwards.

He was thrown to the cement pavement with great force, receiving a seevre gash on the back of his head and very painful injuries to his back and side. Members of his party picked Mr. Waller up and rushed him to his home where he was cared for by Dr. A. B. Phillips and later Dr. Tom McMahon, a son-in-law of Garner.

His recovery has been rapid and it is expected that he will be able to again resume his duties within the near future. In the meantime Roy Wooldridge is acting chief.—Clear Lake Mirror.

CROPS ARE FINE

The hum of the thresher is still to be heard but much of the grain has been threshed as the weather has been ideal. Oats are good quality and the average is from 40 to 45 bushels. The corn crop looks excellent and with the right kind of weather conditions we believe will be a bumper. The sugar beets are looking good in fields where the weeds did not get the best of the workers and this crop will no doubt pay out well owing to the high prices prevailing on sugar. As a whole crops are fine this year. —Kanawha Reporter

Wheat recently took a drop of 75 cents per bushel in fifteen days. This was going down some. Sugar and print paper have not gone down a cent. The trusts are more than holding their own and the government does not think of interfering. Our officials are too busy looking after the interests of the Armenians and the countries that have escaped from oppression from the central powers to give serious attention to purely domestic affairs.—Emmetsburg Democrat.

BIRTHDAY BREAKFAST

Miss Ruth Ramsay was ten years o'd last Wednesday and celebrated the event by entertaining some nine or ten of her girl friends at a nine o'clock breakfast at the Ramsay home. After the serving of the cantaloup, waffles, cocoa and ice cream and cake the young misses spent the rest of the morning in playing games dear to the heart of girls. Belmond Herald-Press.

The man who advertises is the one who believes in modern business methods, who thinks there is "news" in his store for you, who buys to advantage to you; who knows that the more he can sell the less margin he can sell on; who wants his business to grow, to be of more service to you and your family; who wants your business, merits your confidence and protects your interests. And don't forget the man who advertises is the man who is working for a better town and who pays taxes that go toward a better town.—Buffalo Center Tribune.

READ METERS BY MATCH LI[illegible]

The Commonwealth meter man was here a few mornings ago reading meters. The gentleman struck the town when the juice was not working the best—and if we don't forget, that morning it wasn't on—making matches a necessity for the reading of the meters. The Topic is keeping a record of the dates when the juice is switched off, so that a report can be made to the company at the end of the month.—Titonka Topic

RECORD OATS YIELD ON CHESTER PLACE

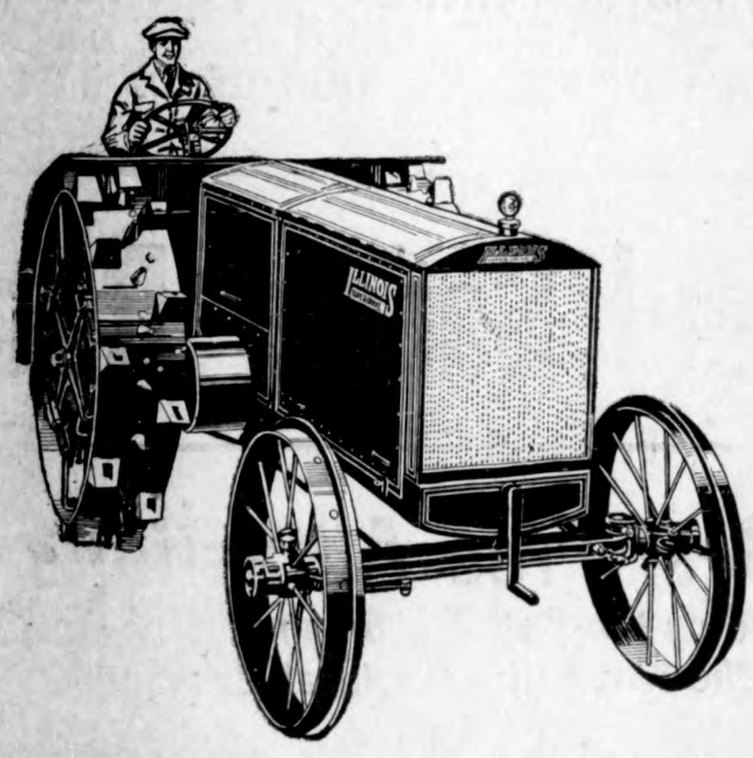
Oots on Chester Place, Senator P. C. Holdoegel's farm south of Rockwell City, averaged 80.4 bushels to the acre. This is the largest average yield yet reported in this vicinity.

A few acres of Iowar oats, the new strain developed by the Iowa State college experts, averaged 87 bushels to the acre on Chester Place. Senator Holdoegel states that he is holding all the Iowar oats for seed and will plant all Iowar oats next year. After next year's yield he expects to have Iowar oats to sell to Calhoun county farmers who want this brand of oats.—Rockwell City Advocate.

A new principle is now used in connection with spinal adjustments for the cure of chronic ailments. Many conditions that were formerly very difficult and unsatisfactory to handle are now, with this combned method, cared for to the complete satisfaction of the patient. The difficult conditions for which the new principle is especially recommended are high blood pressure, kidney trouble (Bright's disease), diabetes, bowel trouble, constipation, auto-intoxication, indigestion, billiousness, severe nervous symptoms, rheumatism, neuritis, and some other troubles not necessary to mention here.—adv. tf.

ILLINOIS SUPER DRIVE

The Master 3-4 Plow Farm Tractor of America



A tractor five years ahead of it's time!

THE LOWEST COST TRACTOR

When you figure your tractor investment you must consider first cost, operating cost, maintenance and repairs, and the unmber of years of use you can obtain from the tractor you buy.

Figured from the standpoint of low operating, maintenance and repair cost, and years of dependable, uninterrupted service, the ILLINOIS SUPER-DRIVE is the lowest priced tractor in the world.

It has a dependable, high-powered heary duty kerosene burning engine which will give you great reserve power for unusually hard pulling and for running threshers up to 28 inches.

Its unit construction gives lightness of weight, combined with extreme rigidity, which insures freedom from twisting of frame and prevents undue strain on gears and misalignment of bearings.

The transmission is entirely enclosed, preventing destruction caused by dust, dirt and grit. Gears are case hardened steel and run on Hyatt heavy duty roller bearings—in a bath of oil.

The Illinois Planetary Spur Gear Final Drive is a "Master Stroke of Genius." This principle delieves excessive tooth pressure on the final gears, prevents stripping of gear teeth, and insures perfect lubrication. This final drive combined with the high efficiency of the transmisson is the means of delivering 20 per cent more engine power to the draw bar than any other driving principle in tractor use. The drive wheels sustain 75 per cent of the tractor weight and are equipped with sixteen powerful cushion springs, which together with the powerful spring on the drawbar absorb the shocks to tractor mechanism and operator. The ILLINOIS is easy to operate and to maintain. Its construction is simple, and all mechanism is easily accessible. It has a short turning radius.

Here is the tractor you should use for your farm work—it will be the means of getting larger, better crops, and will be the wisest investment you could possibly make. The ILLINOIS SUPER-DRIVE TRACTOR is fully guaranteed. Let us show you—without cost or obligation what an ILLINOIS SUPER-DRIVE TRACTOR will do for you.

Ran 2800 miles--Still Like New

Amarillo, Texas, December 6, 1919
Illinois Tractor Co.,
Bloomington, Ill.

Dear Sirs:

Since August, 1919, with my ILLINOIS Tractor I have prepared 1,460 acres of land for sowing, using 10-foot Oliver Tandem Disc Harrows, going over the land one way, then later, after vegetation had started to grow, cross discing to destroy weeds and wheat, making it equal to 2,000 acres disced once. The harrows were handled at all times on high gear at a speed of 34.10 miles per hour. The cost of fuel in discing was never more than 18c per acre. As nearly as I can figure it, these tractors have been driven up to date 5,600 miles or 2,800 miles each.

After preparing my land with Disc Harrows, I sowed with 10-foot Drills and found no difficulty in pulling two 10-foot Drills with each tractor on high gear. The cost of drilling wheat runs about 10c per acre.

After driving these tractors 2,800 miles each, after careful examination, I find the gears as good as the day they were started.

This condition is due, in my opinion, to the good material used and to the further fact that every workng part is thoroughly protected from dust and dirt and receives perfect lubrication.

After testing these tractors thoroughly for my use I can heartily recommend them to any one needing better and cheaper power for farm work.

Yours truly,
(Signed) L. P. PARKS,
307 W. 7th Street

Have tractors on hand for immediate delivery. Will give Free Demonstration anytime right in field at actual work.

Klemme, Phone 817

How can we make your fall clothes as inexpensive as possible?

THAT'S our problem; we're here to serve you in clothes; we want to do it better than anyone else. If we can get the best clothes for wear and style--no one can beat that. We have them in

Hart Schaffner & Marx Clothes

If we sell them on close margins, we're giving more value. We're doing it and we're here to prove it.

The new styles for young men

Plain simple styles are correct for yon. We have any number of smart models from Hart Schaffner & Marx. It takes designing art like theirs to make plain clothes hat don't look that way.

Business suits that save money

Meu who used to think they had to go to tailors are coming to us. In our Hart Schaffner & Marx suits they get the quality and tailoring they paid 50 to 100 per cent more for. They get fitted perfectly. Sizes for every figure.

Note--Dr. Scholl's foot specialist here August 31 and September 1. Those who have foot trouble--See him.

H. V. Reed,
John H. Darrah,
Eugene Hills, Commissoners.
H. D. Kurl, Engineer.

Owners of the above described lands, comprising Hancock, Cerro Gordo and Franklin Joint Drainage District 1-86-31 of Cerro Gordo, Hancock and Franklin Counties, Iowa, and to all actual occupants, and to all persons having or claiming any right, title, or interest in and to the above described lands.

You and each of you are hereby notified that the Commissioners appointed by the Board of Supervisors of Hancock, Cer-ro Gordo and Franklin Counties, Iowa, to inspect and classify the lands benefitted by the location of Hancock, Cerro Gordo and Franklin Joint Drainage District No. 86-1-31 of Hancock, Cerro Gordo and Franklin Counties, Iowa, in tracts of forty acres or less, in a graduated scale of benefits, to be numbered according to the benefits to be received by the proposed improvement, and to make an equitable apportionment of the costs, cost of construction, expenses, fees, and damages as-sessed for the construction of said improvement, did on the 28th day of August, 1920, make their report to the Board of Supervisors of Hancock, Cerro Gordo and Franklin Counties, Iowa.

That the real estate owned or occupied by you and each of you, and situated within Joint Drainage District Nos. 86-1-31 of Hancock, Cerro Gordo and Franklin Counties, Iowa, a description of which is set opposite the name of the owner thereof in the foregoing schedule, has been classified by said commissioners, that the amount of special assessment apportioned to you and each of you by said commissioners is hereby set opposite the description of each tract of land on which assessment is made.

That said report will come up for hearing before the Boards of Supervisors of Hancock, Cerro Gordo and Franklin Counties, Iowa, on the 1st day of October A. D. 1920, at the Court House at Mason City, that all objections to said report must be made in writing and filed with the County Auditors of Hancock, Cerro Gordo and Franklin Counties, Iowa, prior to the day of hearing, all objections not filed prior to the day of hearing should be filed with the Boards of Supervisors at the place where the hearing is to be held.

Dated this 30th day of August, A. D., 1920.

(SEAL)

Chris Jacobs, County Auditor,
Hancock County, Iowa.
E. D. Haecker, County Auditor,
Franklin County, Iowa.
Paul Weigand, County Auditor,
Cerro Gordo County, Iowa.

NOTICE OF ASSESSMENTS OF BENEFITS

Drainage District Number 103.

To A. D. White, William E. Smith, A . D. Gimer, Elmer Arnold, Amanda Tice, Township Trustees and L. W. Wesenberg Clerk of Avery Township, Hancock County, Iowa.

You and each of you are hereby notified that the commissioners appointed by the Board of Supervisors of Hancock County, Iowa, to view and classify the lands in Drainage District Number 103 and to apportion to the said lands and tracts, the total cost of said Drainage District have made and filed their report in the office of the County Auditor as required by law which report follows:

Owner	Description Sec. Twp.	Class	Amount
A. D. White	Pt. NE¼ NW¼ 5-94-23	21.6	$202.00
A. D. White	Pt. SE¼ NW¼ 5-94-23	30.7	287.00
William E. Smith	Pt. NW¼ NE¼ 5-94-23	53.0	495.00
William E. Smith	Pt. NE¼ NE¼ 5-94-23	8.0	75.00
A. D. Gimer	SW¼ NE¼ 5-94-23	100.0	93.00
A. D. Gimer	Pt. SE¼ NE¼ 5-94-23	4.7	4.00
Elmer Arnold	Pt. NW¼ SE¼ 5-94-23	18.8	176.00
Amanda Tice	Pt. NE¼ SW¼ 5-94-23	30.6	286.00
Highway in Section 5-94-23			600.00
			$3100.00

You are further notified that the 23rd day of Sept. 1920 has been fixed as the date for final hearing on said assessment and all objections hereto must be made in writing and filed with the County Auditor on or before noon of said date..

Witness my hand and official seal this 20th day of August A. D. 1920.

Chris Jacobs,
County Auditor of Hancock County, Iowa.

CLEAR LAKE BEATS KLEMME SOX

Sunday the Clear Lake ball team came over to Klemme to play off the "rub" or to see who would be the victors two games out of the three, as Klemme beat Clear Lake one game and Clear Lake had beat Klemme one game. The game staged here Sunday was one of the fastest and hardest played games of the season and after the dust had cleared off the field Clear Lake came out viitorious with four to two. It was tough luck for he Klemme Sox to lose this game of course after their brilliant playing of late, however they played a good game and it was close all the way thru. This Sunday the Sox will go to Thornton to play the return game. Klemme beat Thornton a couple of weeks ago after a hard fought game lasting twelve innings. A good big crowd of Klemme boosters are wanted to go with the boys and help them beat Thornton's fast team the second time. Remember the game Sunday at Thornton, and be there with the Sox.

Harold Gruetzmacher returned on Sunday from his visit at Iowa Falls.

The big ball tournament is on at Garner next week. See the ad.

TEAM RUNS AWAY

Friday evening as they were about to finish up the day's work after threshing, a team belonging to Wm. Bell started to run away. They done considerable damage to a fence, breaking down four or five posts and tearing down the wire. The team made a few circuits about the field and then ran nto the yard where they were caught. The horses or the wagon were uninjured except for a slight scratch on one of the horses received in the barb wire fence which they were dragging.

SYLVAN JOHNSON AND HAZEL BUSS MARRIED

A simple, quiet home wedding took place last week on Thursday evening at eight 'clock, August the 26th, when Miss Hazel Buss was united in marriage to Mr. Sylvan Johnson at the home of her parents, Mr. and Mrs. Elko Buss, who reside in the country. Only the immediate families of the young couple witnessed the ceremony as read by Dr. A. E. Buriff, minister of the Methodist Episcopal Church of Klemme, of which both of the young people are members.

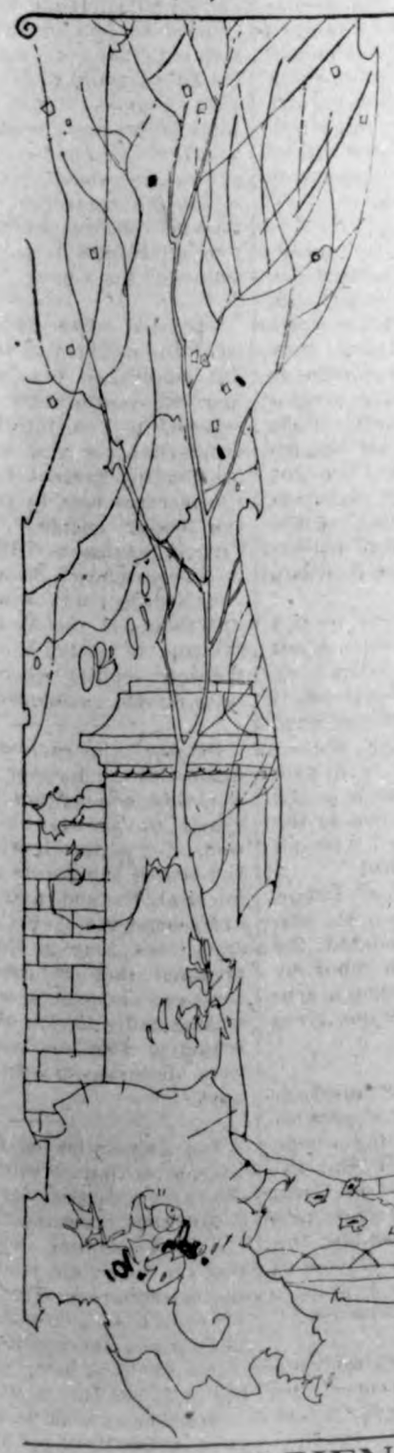
Both young people are well known in and around Klemme. The Bride is the daughter of Mr. and Mrs. Elko Buss, one of the estimable families of the community. The Groom is a young man fo sterling qualities, and a son of Mr. and Mrs. Wm. Johnson, another of the fine families residing in the country.

The happy young couple have gone to housekeeping on the farm which Sylvan has rented from Mr. Gimer and has farmed this year.

Congratulations are extended and we wish the couple all happiness.

BUICK

AUTHORIZED Buick SERVICE
Emblem of Satisfaction



POWER, sturdiness and dependability have been qualities of Buick Valve-in-Head Motor Cars from the time that the name Buick first became linked with the automobile industry. Today, in equal measure as in the past, the Buick Motor Company is dedicated to a continuance of the policy that has caused the Buick car to occupy the position it holds in the public mind.

To all that the name Buick has meant in twenty years of automobile history, the new Nineteen Twenty One Buick brings that grace of movement, that refinement of every line and feature, that sheer beauty of design which inspire a pride of ownership in a fine motor car.

The new Buick line comprises seven models, one for every possible demand. Each has the famed Buick Valve-in-Head Motor, as rugged and powerful as ever, yet refined into a mechanism of unusual quietness.

The improved radiator, hood and cowl lines give a finished touch of trimness to the body, yet without any sacrifice of Buick individuality.

A more resilient spring suspension gives these new Buick models a riding comfort as delightful as their exterior appearance is pleasing.

Each of the seven models has its own value particularly adapted to a distinct class of service. All possess those inherent Buick qualities that assure the owner the uninterrupted use of his investment.

WHEN BETTER AUTOMOBILES ARE BUILT, BUICK WILL BUILD THEM

FIGHTING STORM HIGH UP IN AIR

Navigator in Plane Tells of Thrilling Experience During a Fierce Cyclone.

BREAKS WITHOUT WARNING

Hail and Rain Lash Machine Mercilessly, Making It Toss From One Side to the Other Like a Cork on Surface of Sea.

New York.—An observer in an airplane describing an experience in a storm thousands of feet above the earth writes:

"The sky was strewn with the remnants of a morning cirrus, as the climb was made carefully but swiftly on the wings of a warm wind. Eight thousand feet was reached with the merest effort. The salient features of the countryside could be picked out without glasses. The air had a milky tinge, but it was such as the eye could 'speak' through, and it gave no impression of the moisture with which it must have been heavy. It seemed warm and brilliant, and as the machine throbbed its way through it two warm slip streams flowed back over the wind screen.

"Some time must have elapsed before the pilot, in twisting the craft round to a new direction, caught a glimpse of a livid purple-gray bank of clouds which had crept up from the south. It had come quite unheralded by thunder, but although the sight was not attractive there seemed neither cause for alarm nor need for a premature descent. Even the growling rumble of thunder at a great distance, which came at last, failed to disconcert, and the airplane soared on with bracing wires singing and the engine in deep, full-throated roar.

"Then, without further warning, the storm broke in full fury. A mighty crash of thunder, which seemed to deafen and almost shake the machine out of the skies, was accompanied by a wild burst of hail and rain which lashed the machine mercilessly and made it toss from one side to the other like a cork on the surface of the sea. In a steaming cloak of rain and mist it was impossible for the eye to see the ground.

"Peal after peal of thunder followed in swift succession between vivid flashes of furious summer lightning. The heavens had opened to pour forth the accumulated passion of centuries. At nearly 7,000 feet up it would be suicidal to descend into the unknown and unseen. Which was safer—air or land? To the pilot, anxious almost beyond endurance, came the thought, common to every flying man, of fire in the air, and as if to confirm this horror a flash in a moment illuminated the whole machine as though it were caught in the probing beam of a searchlight at night. The sky was rent from vault to horizon by a vivid streak of electric fire. The indicating fingers on the navigation instruments oscillated wildly.

Like Wounded Bird.

"It seemed the last moment; but it passed, and still the machine was airworthy. The hail still tore fiercely at the fabric of the planes; the machine was becoming more and more unstable; but it still hummed on. Down below a cloud of vapor made it impossible to see the earth or to sight a stretch of ground whereon to land. The thunder broke with unabated fury at regular intervals, and at each onslaught the machine quivered like a wounded bird.

"If the pilot continued to fly on it could only be a matter of moments before all control of the craft would be wrenched from his hands. It was equally hazardous to plunge down into the sea of mist in total ignorance of the lie of the land beneath. But to the latter course only could a shred of hope cling. The engine therefore was suddenly shut off and the nose of the machine dropped.

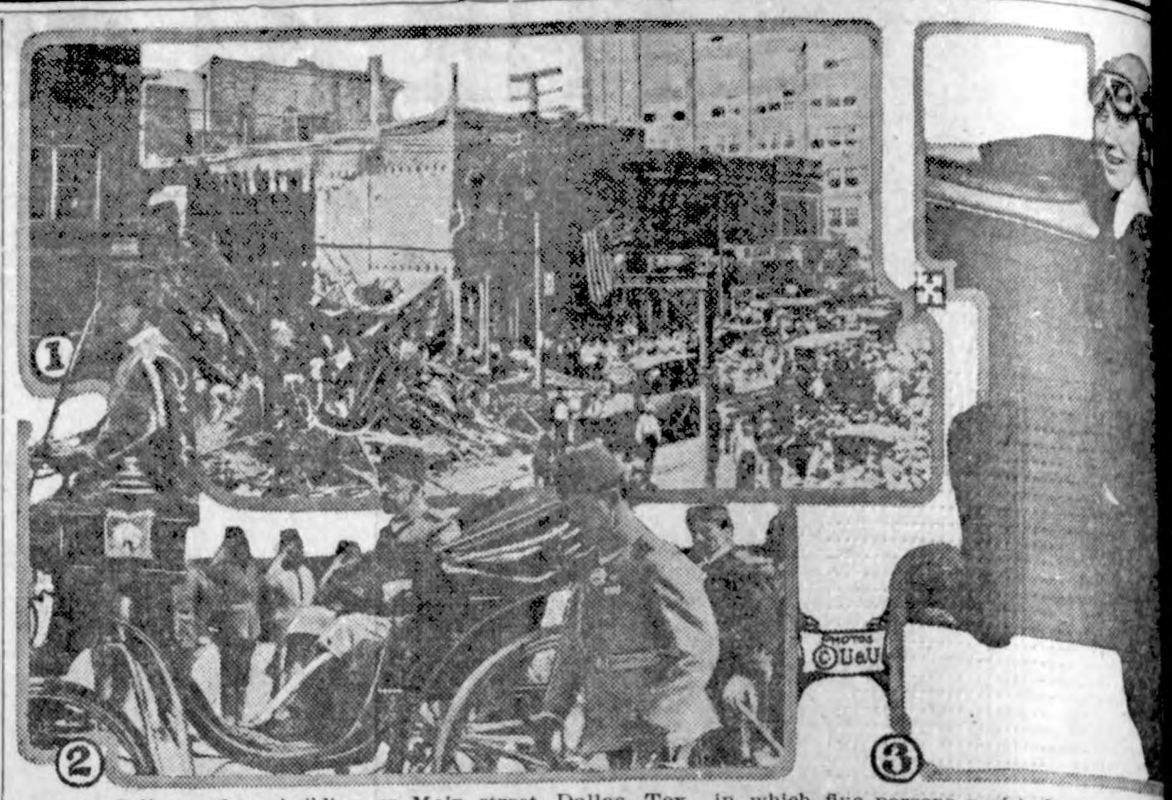
"By the altimeter, watched feverishly, the descent of a few thousand feet seemed to take many minutes. In the thick of a swirling mist a sudden and violent contact with the earth was momentarily expected. But down—down; until at what seemed the critical second there came a sudden inrush of steady, grateful air from a region of smiling content and peacefulness, with the earth a thousand feet below. There was no sunshine, but there was also no storm. It had been a cyclone of the upper regions only."

Lightning Bolt Kills Chickens.

Pontiac, Mich.—When a bolt of lightning killed 40 chickens in the yard of Smith Ames of 104 Forest street it laid them all out nearly with their heads pointed in the same direction. Mr. Ames says he appreciates the orderliness of nature, but he wishes the bolt had picked the feathers off also.

Funeral of Gen. Gorgas in London

The coffin of Maj. Gen. William C. Gorgas, U. S. A., being carried into St. Paul's Cathedral, London, where impressive funeral services were held.



1—Collapse of two buildings on Main street, Dallas, Tex., in which five persons perished. 2—Recent photograph of sultan of Turkey on his way to the mosque of the Yildiz palace. 3—Laura Bromwell, who set world's record by making 87 loops with her airplane above Mineola field, Long Island.

Cattle Ranges Fast Disappear

For More Than Year Average Raiser Has Been Losing Money in Middle West.

HERDS ARE BEING DIMINISHED

Everywhere Feeders Are Quitting Operations in Discouragement—Land Over Which Cattle Roamed Being Turned Into Wheat.

Sioux Falls.—The cattle industry is admittedly in a bad way. For more than a year the average raiser has been losing money. The herds are being diminished. More beef is sent to market direct from the grass, corn being too costly for fattening at the present live stock quotations, which means more waste and less meat per head.

More land over which the cattle roamed is being turned into wheat, and this also adds to the depopulation of America's herds. But in the butcher shops of the hamlets and villages, the smaller cities and the great centers, the consumer finds Old Doc High Cost has as strong a clutch as ever. Out here in regions where the raw material is raised the traveler finds the price of beefsteak and pork chops over the counter is as much a problem for the family budget as it is in the big cities.

Cattle Question Important.

Some gloomy prophets say if the reduction of the herds continues at the present rate steak may jump to 90 cents or $1 a pound within a year. They may prove wrong or they may prove right, but in any event the cattle question is one of deep concern. At every stop that has been made in six states, the farmers have talked with emphasis.

Everywhere evidence was presented that feeders are quitting operations in sheer discouragement.

During the last year after buying cattle from the grass, then feeding them corn at $1.50 to $1.80 and upward a bushel, they have sent their stock to market, only to receive for the finished product far less than it cost them.

In Nebraska the state authorities say hundreds of men are sending cattle to market direct from pasture because feeders will not buy.

In Kansas one-fourth of the pastures this year are without herds, so the state live stock association at Topeka reported a few days ago.

They are marketing them light these days at 2 or 3 years old. The association's experts say that last year the average market weight of steers at Kansas City slumped 100 pounds, meaning a greater percentage of waste and a smaller proportion of beef.

Everywhere on the trip stories of losses have been retailed to the tourists. At first they appeared to be highly exaggerated, but after hearing the same type of complaint for 1,200 miles, one takes a different view. Here are a few random instances:

Farmer Reports Loss.

At Monmouth a 1,000 acre farmer said he had a prime herd on which his loss amounts to more than $100 per head.

At Chillicothe, Mo., three farmers said their losses during the year ran between $100 and $125 a head and that some raisers had fared even worse. At Topeka a state official in all seriousness reported one case where a raiser had sold a bunch on which his loss had run to $185 per head.

At Fremont, Neb., a former congressman, in close touch with farmers, said losses of $150 to $180 per head had not been at all uncommon during the last year.

One comment is heard in every village. The only difference is in the words, but the tune runs like this:

"I bought a bit of meat and the butcher charged me 60 cents a pound. I asked him what my cattle would bring and he said about 9 to 10 cents. They dress one-half, which would make meat on the hoof worth 20 cents. Where does the other 40 cents go?"—Arthur M. Evans in Chicago Tribune.

Shoe Heels Solid Gold, Corset Bones Costly

Geneva.—A young woman arrested near Geneva while trying suspiciously to steal across the frontier into France was found after shrewd search to have corset "bones" of gold and platinum covered with cloth, and shoe heels of solid gold under white varnish. She was trying to smuggle bullion into France.

Women Best on Guard Duty.

Warsaw.—Women make the best soldiers for guard duty at barracks and food supply depots, according to the Polish war ministry. An appeal for women volunteers asserts that women are especially noted for their trustworthiness and honesty.

Poland's Volunteer Legion of Women for the army already has more than 600 members, and nearly 2,000 applications waiting to be passed on.

NEWS REVIEW OF CURRENT EVENTS

Soviet Russians Put to Rout by Poles Following Strategy of Foch and Weygand.

WARSAW APPARENTLY SAVED

Baron Wrangel Scores More Victories Over the Reds—Tennessee Legislature Gives Final Touch to Suffrage Ratification—Miners and Operators Can't Agree.

By EDWARD W. PICKARD.

Once more French military genius has triumphed over that of the Germans. Following the strategy of Marshal Foch and General Weygand, the Poles last week put to rout the invading Russians who, if reports are to be credited, are directed in their movements by former officers of the German army.

At this writing the final outcome of the struggle cannot safely be predicted, for the battle is still in progress, but all dispatches indicate that Warsaw has been saved and that the Danzig corridor has been cleared of the reds. Rejecting the first suggestion of Foch and Weygand, that they give up their capital and meet the Russians behind the Vistula, the Poles adopted the alternative plan of their French advisers. This was that all advanced units should be called back and heavy forces concentrated on a short defensive line before Warsaw; that the enemy should be permitted to advance in open order and to "infiltrate," and that the Poles should then launch counter-attacks with all their forces and with the aid of tanks. At this time the most advanced of the reds were within a few miles of Warsaw. Within four days the Russians were reported as fleeing in disorder along the front between the Vistula and Bug rivers, as retiring hastily from the Danzig corridor and as being pushed back rapidly in the southern sector.

The Polish left wing, led by French Generals Henry and Billotte in person, drove the Russians out of the fork between the Bug and Narew rivers, which is considered the key to the defenses of Warsaw, and a part of this Polish force moved swiftly northward toward Mlawa, threatening to cut off the reds who had advanced far on the roads to Thorn and Plock, and regaining control of the direct rail route between Warsaw and Danzig. Airplanes, tanks, armored trains and artillery were used by the Poles most effectively and thousands of prisoners and great quantities of supplies were captured.

General Pilsudski, chief of the Polish state, led the troops operating east and south of Warsaw, and this movement was considered of the greatest importance because its complete success would result in the cutting of the lines of communication of the bolsheviki. This force was strengthened by the shortening of the front in Galicia, where the Poles continued retreating for the purpose of releasing many units for the battle to the north. By Friday Pilsudski was in possession of Lukow, 41 miles southeast of Warsaw, and was going strong.

The two movements of the Poles concentrated a pincers operation which promised to force the Russians altogether out of Poland. The latter, flushed with their successes, seem to have forgotten the basic principles of modern warfare and rushed ahead without regard to their communications and supports, as though against a foe that was already utterly beaten. Large bodies got entirely out of touch with the main forces and were easily cut off and captured after they had been allowed to filter through the Polish lines.

One thing that greatly annoyed both Poland and France was the action of Sir Reginald Tower, allied high commissioner at Danzig, in forbidding further debarkation at that port of French munitions for Poland. Several French ships were anchored outside the port with war supplies for the Poles, but Tower said he had not sufficient allied troops to preserve order if more munitions were unloaded there. The French government formally protested against his ruling.

In south Russia General Wrangel continued his gains against the soviet army, and in Moscow Leon Trotzky issued a call for volunteers for service on the southern front. He denounced France for recognizing and aiding Wrangel and accused England of also giving help, directly and indirectly. The anti-bolshevik leader is said to have the support of the entire population in the south, for he is giving the land to the peasants, and he has been joined by many Cossacks. Though Lloyd George asserts that Great Britain has not helped and will not help Wrangel, the recognition of the general by France has not yet brought about the breach between the two countries that was predicted by alarmist correspondents and hopeful Germans.

Armistice negotiations between the Poles and the Russians opened in Minsk, and the latter set forth the terms they were willing to grant. It may well be that these will be modified by the military operations of the week. According to Wigdor Kopp, who is in Berlin for the soviet government, the latter in its dealings with Poland and the allies will insist on direct communication with the Baltic, probably by way of Bialystok, and will demand that Poland give Russia the right to transport goods direct to and from Germany. He says the bolsheviki are determined to restore economic relations with Germany. In this he has the support of Felix Deutsch, head of the great electrical manufacturing company of Germany, who asserts that Russia's immense supplies of raw material must be brought to the world's markets, that Russia must be developed immediately, and that Germany is best equipped for that work. Deutsch ridicules the danger of the spread of bolshevism outside of Russia, which does not accord with the official German view, often expressed when Berlin urges that the allies permit the organization of a stronger German army.

So far, the only "available means" that the United States government has found of aiding Poland is the dispatch of a cruiser and two destroyers from Cherbourg to Danzig. Officially, they were sent to protect American citizens and their interests. A large delegation of Americans of Polish origin called on Secretary of State Colby, after carrying an appeal to President Wilson. Mr. Colby did not overlook the opportunity to tell them that the government's hands were tied, mainly by the refusal of the senate to ratify the peace treaty.

The threat of British labor to call a general strike as a demonstration against a war on Russia stirred up such protests that the labor council has announced it never had any such intention. Lloyd George told the laborites that "any attempt to dictate the policy of parliament strikes at the root of democratic constitution in the country and will be resisted with all the power of the government."

The Chicago Federation of Labor, long under the control of radicals who are tinged with pink, imitated the supposed action of British labor by adopting resolutions demanding a general strike if the United States gives military aid to the Poles.

Rioting in Ireland was resumed on a large scale and a number of persons were killed in fights with the troops and constabulary close to Dublin castle. McSweeney, lord mayor of Cork, was convicted of sedition and deported to England. Hope of settling the Irish question of the basis of dominion rule is increasing, but a large part of Ulster has yet to be convinced.

The big news of the week at home was the final enfranchisement of the women of America through the action of the Tennessee legislature, the necessary thirty-sixth state to ratify the suffrage amendment to the Constitution. The senate had ratified previously, but it was a narrow squeak in the lower house. The vote was 50 to 46, the speaker, leader of the anti-suffrage forces, changing his vote to the affirmative in order to move for reconsideration.

But the women must still fight projected litigation by the opponents of suffrage, designed to attack the legality of the Tennessee ratification. In the state constitution there is a clause which says:

"No convention or general assembly of this state shall act upon any amendment of the constitution of the United States proposed by congress to the several states unless such convention or general assembly shall have been elected after such amendment was submitted."

The present legislature was elected in November, 1918, and the suffrage amendment was not submitted to the state until months afterwards. The Supreme court's decision in the attempt last spring to overturn the legislature's action on the dry amendment is taken as an indication that the action of the Tennessee legislature will stand.

Leaders of both the Republican and Democratic parties claimed to have the suffrage victory an advantage for their respective tickets in the presidential campaign. The women have been conducting the fight that both Senator Harding and Governor Cox for their help. Secretary of State Colby was prepared to promulgate the amendment as soon as the action of the Tennessee assembly was confirmed.

The North Carolina house of representatives defeated the ratification of the suffrage amendment by a vote of 71 to 41.

The wages of soft coal miners in the central competitive field again were put up to President Wilson. The large-scale conference of operators and miners at Cleveland spent five days in fruitless discussion and then sent word to the president that the conference, which was called by him, was unable to adjust inequalities in pay. The operators wanted to refer Mr. Wilson to appoint a board of inquiry and adjustment, but the miners refused to join in the request. The miners ask that the wages of day workers be advanced $1.50 a day. The editor Ellis Searles, editor of the United Mine Workers' Journal, said that there was little or no danger that the wage agreement would result in another strike, the operators were not so pessimistic. It was believed the operators of Illinois might grant the demands of the miners.

The post office department has at least discovered that foreign exchange has depreciated in value in late years and the postmasters have been instructed to sell international money orders under a new scale closely approximating present exchange values. Under rates now in effect an American dollar equals 10.30 francs in France, Belgium and Italy; 5.15 francs in Switzerland; 5 krona in Denmark and Norway; 4.17 krona in Sweden; 2.63 florins in the Netherlands, and 20 shillings in England. Switzerland is the only country where the exchange rates remain unchanged.

Despite injuries and complaints of favoritism and poor training, the American competitors in the Olympic games at Antwerp are doing quite well. Up to the time of writing they had scored 118 points and their nearest rival, Finland, had only 49 points. Correspondents aver that every other nation has gone to the games better prepared than is America, and that American managers are accused of making bad selection of entries and of letting in Pacific coast athletes who were failures in their preliminary work.

The Association of Railway Executives, reporting on the applications of the various carriers for loans from the $300,000,000 revolving fund created by the transportation act, recommends that the interstate commerce commission distribute nearly $200,000,000 to the railroads. Under the recommendations, loans for additions and betterments would be increased from $7,053 to $8,217,945; those for additional cars and equipment would be increased from $35,050,289 to $78,349,389, and those for freight and switching locomotives from $28,868,629 to $52,839,323. A total of $52,839,043 was recommended for loans for building 10,000 new box cars and loans to meet maturing obligations would total $28,800,000.

LIONESS CARESSES 41ST CUB

Helen of New York Zoo Shows Affection for Her Latest Offspring.

New York.—Helen, a lioness caged in Central park, licked her forty-first offspring as affectionately as if the cub were her first born.

Her keepers explained this unending maternal affection by saying that her other children, save two, which died in infancy, have all been sent away to populate other zoos.

Ackbar, the father, roared fiercely when the youngster was born, but later looked upon the event as simply representing one more lion in the world.

Fought at Altar Over Marriage Vows.

Manitowoc, Wis. — Declaring the marriage vows should be pronounced in German, Martin Basil caused an instant protest from Eleanor Klaiber, his bride-to-be, who wished the ceremony to be in English. An argument ensued until the priest complied with the bridegroom's wishes.

AVENGE ESSAD PASHA

"Blood Brother" Is Ready to Keep His Oath.

Gambling Incident With Slain Albanian Cemented Friendship Long Ago.

Paris.—Vengeance for the assassination of Essad Pasha, head of the Albanian delegation here, is being quietly awaited by a "blood brother" of the Balkan leader, according to a circumstantial story by a French writer, published by the Excelsior.

This man, now rich and influential in France, the story goes, was one of several poor young men who 30 years ago met Essad Pasha, then known as the "Black Dagger of Abdul Hamid," in Constantinople, when he crowded into a card game and insisted upon playing with them. Fearing Essad Pasha, they protested they were too poor to play with him, but he insisted, emphasizing it by placing his revolver on the table as a threat.

To meet this, the "blood brother" put down his dagger, poisoned, he said. Essad Pasha showed his surprise, then his pleasure.

"Young man," he exclaimed, "this is the first time anyone has dared defy me. Men like you are rare."

Essad Pasha took his own dagger, opened a vein in his wrist and also in that of the young man, each sucked a few drops of blod from the other and they became "blood brothers," according to Albanian customs, sworn to avenge each other's deaths.

"I am ready," this, "brother" now is quoted as saying, "to keep my oath, but I have confidence that French courts will make it unnecessary for me to interfere."

Rustem Aveni, arrested on the spot for shooting down Essad Pasha as the latter was entering his automobile in the downtown district recently, is awaiting trial.

PRODUCTION AND MARKETING ARE AIDED BY COMMUNITY EXHIBITS

Vegetables Must Conform to Score Card as Well as Other Exhibits.

If a community bloweth not its own horn by some form of community activity, verily by whom shall it be blown?

Advertisers have discovered that good characteristics of their products which are so familiar to them as to seem commonplace, are often not so well known to the great buying public. Goods must be talked about if business is to be secured. The same holds true with communities. The excellence of neighborhood products and the special lines in which various individuals excel may seem like a very old story to those immediately concerned, but there are plenty of folks near by who have not heard this story, of, if by chance they have heard it, it is very much worth while from a business standpoint to repeat it—and more than once.

Exhibits Stimulate Business.

It follows that promoting some form of community fair, such as an exhibit of local products, is profitable from many points of view. It stimulates better production of stock, farm produce, and garden truck. It engenders community pride, and advertises in an attractive fashion good products and those who produce them.

As a result of careful study of the methods of conducting community fairs specialists in the United States department of agriculture outline a definite procedure for those interested in promoting such neighborhood events. Community fairs—the successful ones—are not gotten up in a day or a week. Preparations should begin weeks in advance. It is not too early now to begin planning for an exhibit this autumn. The first step is to get together the leaders of different organizations for a discussion of the proposed fair. At this meeting a general outline of the plan to be followed should be presented for approval. The meeting, to be thoroughly representative, should be well advertised with posters, newspaper notices and post cards addressed to each family.

If the community decides to hold a fair, an organization should be formed, officers elected, and committees appointed. The latter should include committees on amusement and entertainment, arrangements, decorations, and publicity. These are general committees. In addition, there should be exhibit department committees for such exhibits as live stock, farm products, orchard and garden products, women's work and fine arts, school and club exhibits, and historical relics.

Too much emphasis cannot be placed upon properly advertising the fair through articles in the local papers, printed handbills, handmade posters, notices read, preferably several times, in the schools and churches, and in various other ways. The publicity committee should give special attention to advertising in neighboring communities, extending an invitation in such cordial terms that many who ordinarily do not visit the community holding exhibit will be induced to do so.

Grouping of Exhibits.

The exhibit should represent as nearly as possible the normal production of the community, for one of the purposes of such a fair is to stimulate interest in increasing the quantity and improving the quality of the average produce, as well as giving special recognition to the leaders in different lines. The committees should make it a point personally to solicit exhibits from all persons eligible, not failing to emphasize the business benefits which may result.

Satisfactory results are usually obtained by grouping certain classes of exhibits. In the live stock department, horses, cattle, swine, poultry and pets are exhibited. In the farm-products department are shown grains, seeds, grasses, forage crops, beans, peas, peanuts, potatoes, together with dairy products and bee products. The orchard and garden department includes such exhibits as fruits and vegetables, ornamental shrubbery and flowers. The women's work and fine arts department has large possibilities, and can include a great variety of products prepared by the mother and daughters.

Much of the success of the exhibit depends upon securing judges of ability and experience—preferably persons from outside the community. Usually judges are available who can be secured at little or no expense.

Cash Prizes Not Necessary.

A community effort is most successful when the primary aim of an exhibitor is not to win money prizes as compensation for preparing his exhibit. Experience has proved that the awarding of money prizes not only makes the cost of a community fair prohibitive, but places the emphasis on money instead of the honor of achievement, and so tends to defeat one of the purposes of the event. Excellent results have been obtained merely by awarding blue, red and white ribbons to designate first, second and third prizes, respectively.

Such a fair as described here does not require the expenditure of large sums of money. No charges need be made for entry of exhibits or gate admissions. A small fund, however, is needed for printing, general advertising, lumber for tables, shelves, live stock pens, premium ribbons, decorations, etc. This can be raised either by subscription or by selling advertising space in the premium list or fair catalogue.

Persons interested in securing further information on the successful management of community fairs should write the United States department of agriculture for literature on this subject.

WHY DANISH BUTTER BRINGS HIGH PRICE

Quality Must Be Satisfactory to Government Inspection.

National System for Grading Dairy Products Produced in United States Would Be Advantageous, Says Bureau of Markets.

No better illustration can be cited of the value of a system of grading backed by the government than that of Denmark. This nation boasts of an extensive export trade in butter and has developed a system of inspection and branding of all butter destined for exportation whereby the government supervises the grading system and allows only those creameries to use the national trade-mark whose products are proved to be of satisfactory quality. The Danish system recognizes only one grade of butter—the best. As a result the producers and sellers of Denmark's butter always find a ready market in every country.

Holland, New Zealand, and Ireland likewise maintain government inspection and branding systems which have gained for these countries a ready market for all the butter they export.

Therefore the bureau of markets, United States department of agriculture, contends that a national system for grading dairy products produced in the United States would be advantageous to all who are engaged in this important branch of agriculture. If the dairy products of this nation are to be received with favor and the demand for them increased in foreign lands, a national grading system must be adopted.

POULTRY CLUBS BENEFICIAL

Among Other Things Boys and Girls Are Given Better Knowledge of Marketing.

The object of forming boys' and girls' poultry clubs is to give a better knowledge of the value and importance of the poultry industry and the marketing of a first-class, uniform product, to teach better methods of caring for the poultry and eggs, and to show the increased revenue to be derived from well-bred poultry where proper methods of management are pursued.

GENERAL FARM NOTES

Better selection with kafir seed will pay well.

* * *

The use of commercial fertilizers is increasing.

* * *

Give the pasture a chance. Don't over-graze it.

* * *

Sweet clover is the best crop for renewing poor soils.

* * *

A farmer who has faith in his calling even when many problems perplex is the one who is most likely to succeed.

WARN OF INJURY BY CHINCH BUGS

Spring Flight of Insect Continued Over Much Longer Period Than Usual.

HARM TO CORN APPREHENDED

Department of Agriculture Urges Steps Be Taken to Check Infestation—Kerosene Emulsion Will Stop March of Pests.

Warning messages from Missouri, Indiana and Illinois state that the chinch bug is appearing locally in the southern portions of these states and somewhat farther north in Indiana. The spring flight of the bug continued over a longer period than usual, and for that reason the infestation has been extended to larger areas. The bureau of entomology, United States department of agriculture, apprehends severe injury to the corn crops later

on unless steps are taken to check the infestation, and is assisting to the extent of its ability toward putting control measures into effect.

Where Bugs Hibernate.

The bureau of entomology offers the following information: The chinch bugs spend the winter in clumps of bunch grass and under dead leaves and rubbish. In the spring they emerge and fly to fields of young wheat, where they lay their eggs on the root tops and stems. When the wheat commences to ripen and dry, the young bugs leave the wheat fields in armies and walk—for most of them cannot fly—to the cornfields, where they do the greatest damage.

The fact that they make the migration from the wheat to the corn by walking gives the farmer his opportunity to check the invasion by pouring road oil along the bottom of a shallow furrow dug across the line of march. Deep holes should be dug every 25 feet along the furrow on the side nearest the wheat to trap the bugs.

Spray Infested Corn.

Corn already infested may be sprayed with kerosene emulsion along

Chinch Bug.

the first rows to prevent the bugs from going farther. Some corn will be injured by the spray, but the balance will be safe from the bug.

As a preventive measure, burn all trash and dried grasses, especially such as grow in clumps like "broom sedge" during early winter or early spring. Roadsides and pastures should receive most thorough treatment of this character.

WORKING FOR BETTER SIRES

Virginia Farmer Enrolls in "Better Sires—Better Stock" Movement—Discards Grades.

Illustrating the results of the "Better Sires—Better Stock" movement, a Virginia farmer owning 40 grade cows and ewes recently enrolled in the campaign. He listed no purebreds of any kind, but agreed to sell his grade bull and to get a purebred ram. Hereafter he will use purebred sires only.

SOW TURNIPS IN SEPTEMBER

Good Crop May Be Secured but Better Plan to Have Them in Ground Six Weeks Earlier.

Turnips do well if sown before the middle of September, though it is better to have them in the ground a month or six weeks earlier. The rutabagas must be planted a month earlier than the turnips.

Information on Wheat Growing.

The following Farmers' Bulletins on wheat growing may be obtained free on application to the division of publications of the United States department of agriculture, Washington, D. C.:

596. The Culture of Wheat in the Eastern United States.

616. Winter Wheat Varieties for the Eastern United States.

678. Growing Hard Spring Wheat.

680. Varieties of Hard Spring Wheat.

732. Marquis Wheat.

827. Shalin, or "Egyptian Wheat."

895. Growing Winter Wheat on the Great Plains.

1006. The Wheat Jointworm and Its Control.

1041. Eelworm Disease of Wheat and Its Control.

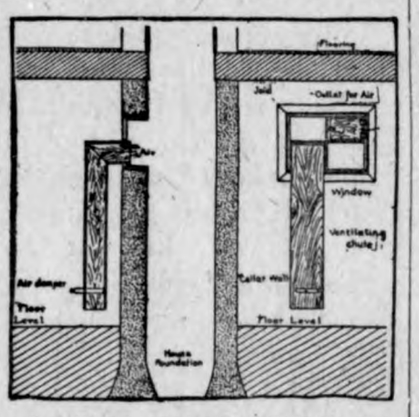
1063. Take-All and Flag-Smut, Two Wheat Diseases New to the United States.

VEGETABLES REQUIRE PROPER VENTILATION

Plan Outlined for Securing This in Storage Room.

Lacking Essential Can Be Overcome by Providing Air Duct of Wood, Metal or Terra Cotta, Fitted in One of the Windows.

It is necessary to have good ventilation if food and vegetables are to be kept safely in storage. In many cellars under dwellings the lack of ventilation is the only essential that is lacking. However, this can usually be easily overcome by providing an air duct constructed of wood, metal or terra cotta, which, fitted in one of the windows, is desirable, as it permits the cool air to enter at the bottom of the room. Two or more joints of 6-inch stovepipe, one with a damper, and an elbow may be used. A piece of board with a hole the size of the pipe is fitted in the window in place of one of the panes of glass. Another pane of glass may be removed from



Details of construction for the ventilation of a storage room in a basement. The air duct may be made of wood, terra cotta, or metal and installed in place of a pane of glass, thus avoiding cutting through the cellar wall. A hinged door the size of another pane of glass may serve as an outlet for the warm air.

the sash and a small hinged door fitted in its place, which when open allows the heated air to escape. In cold weather both the hinged door and the damper in the stovepipe must be closed. The windows in the storage room should be darkened in order to protect the vegetables from the light.

Barrels, crates, boxes, or bins may be used as containers for the various vegetables, but movable containers are preferable to built-in bins, as it is possible to remove them for cleaning. It is advisable to construct shelves or a slat floor to keep the crates, boxes, baskets, and other containers off the ground. This is highly desirable to insure a free circulation of air and to prevent the containers from harboring mice, rats, and other vermin. The shelves for canned goods along one side of the room need not be more than 6 inches wide.

MARQUIS WHEAT IS POPULAR

Yielding Quality Greater Than That of Any Other Variety, With Exception of Durum.

The popularity of Marquis wheat is still gaining in the spring-wheat states. This variety contributed 67.8 per cent of the spring wheatcrop of 1919 in Minnesota, 47.5 per cent in North Dakota, 63.8 per cent in South Dakota, and 71.4 per cent in Montana. It was hardly in evidence in the sowings of 1914. The yielding quality of the wheat is greater than that of any other variety except Durum, a variety that is gaining in popularity, although less than Marquis.

SANITARY QUARTERS NEEDED

In Order to Insure Pigs Greatest Amount of Vitality Everything Must Be Clean.

A point that should receive the earnest attention of every progressive hog raiser is the necessity of having all quarters clean, with sanitary hog wallows, fresh, clean drinking water, and well lighted, ventilated and comfortable quarters in order to insure for the pigs the greatest amount of vitality and resistance to disease.

Live Stock Facts

SELECT BROOD SOWS IN FALL

Animals Should Be Fed in Manner Different From Way They Are Prepared for Market.

Early fall is the time of year when hog growers should select from the spring crop of pigs the sows to be used as next year's dams. From now on until the breeding season these sows should be fed in a manner different from the way they were to be fattened for market purposes. Good forage crops are practically a necessity. A self-feeder containing a good quality of thrashed oats makes good feed for these sows. In addition, they may be fed a small amount of corn and some shorts or middlings, and fish meal or tankage.

Careful attention should be given to the selection of sows for breeding purposes. First, they should be selected from a good-sized litter and from a litter whose dam has good suckling qualities. The brood sow should be

Profitable Type of Sow and Litter.

of a good rangy type, with a good, strong arched back, deep sides, rather thin neck, and not too broad in the face. By all means she should be a "good-footed" animal with good, strong legs and pasterns and rather upstanding from the ground.

The sow that takes plenty of exercise freely is the one that is most likely to make a desirable brood sow. Do not select a sow from a litter whose dam is cross and irritable. The sow should be gentle and easily handled.

Attention should also be paid to the eyes. A blind sow is likely to step on and injure her pigs. Careful attention to these details at this time will have a tendency to add to the number of pigs that may be brought to maturity.

CHILDREN TO STUDY STOCK

Wyoming Teacher Asks for Pictures of Different Breeds and Types of Animals.

Times have changed. The sequel of the incident, Mary had a little lamb, which was turned out of school, etc., is the desire of a Wyoming schoolteacher to display in the schoolhouse framed pictures of well-bred animals. In a request to the United States department of agriculture a teacher in Fremont county, Wyo., has asked for—and will receive at the cost of the prints—approved photographs of the different breeds and types of horses, cattle, hogs, sheep, and poultry.

The display of such pictures on schoolroom walls will do much, it is believed, to encourage the keeping and breeding of well-bred stock in the locality.

DISPOSE OF ALL POOR EWES

Animals With Bad Udders or Broken Mouths Should Be Discarded Before Breeding Season.

Ewes that have bad udders or broken mouths, or ewes that have previously failed to breed, will make no money and have no place in the breeding flock. It is a sign of poor management where they are not marked that they may be identified and thrown out before the breeding season. Sometimes the end of a teat is clipped off in shearing, the shearer neglects to mention it, and unless a close inspection is made before breeding the owner knows nothing about it until lambing time. Such details do not escape the successful shepherd.

FEED THIN HOGS ON PASTURE

Several Combinations of Grain and Skim Milk Enumerated That Are of Much Benefit.

For thin hogs on pasture, try these rations: Equal parts of wheat middlings and corn; equal parts of ground rye and skim milk; equal parts of corn and ground oats; equal parts of corn and skim milk; equal parts of rye and ground oats; ten parts of corn or ground rye and one part of tankage.

IMPROVEMENT OF STOCK

Choose a breed and stick to it.

Breed with the correct type in mind.

Study pedigrees for inherited characteristics, relative merit and value.

Keep your herd or flock free from disease.

Develop the young animals and maintain the breeding animals through wise feeding and management.

Mr. and Mrs. Wes Lau returned f om their honeymoon trip Friday.

Saving by Spending

THOSE common-sense people who have acquired the habit of saving by rational spending are pretty likely to be owners of Ingersolls. Often an Ingersoll is their only watch; sometimes they own an Ingersoll to save wear and tear and upkeep expense on a high priced watch; but in any case, they have bought it because it has meant a definite saving of money.

We have Ingersoll Watches in all styles from $2.50 up to $12.50 in plain and luminous dials.

E. S. D. Kahrs

First National Bank
KLEMME, IOWA

Homer Butcher and wife came Monday from Austin, Minn., for a few days' visit with his sister, Mrs. Fred Kluckhohn. Mr. and Mrs. Butcher go from here to Michigan where they will make their future home.

Mrs. John Gruetzmacher has been enjoying a visit the past week from her father, Mr. Schaeffer, of Garner.

Mr. and Mrs. R. A. Jorgenson went to Garner Saturday for an over Sunday visit with the Editor's parents.

Mr. and Mrs. White, of Big Lake, Minn., were visiting at the Henry Griewe home last Thursday. They were in this state visiting relatives and friends at Iowa Falls, Clear Lake and other places.

Mrs. George Kessler entertained company from Belmond last Friday.

Miss Annta Schult and Miss Merton of Gladbrook, came Friday to begin their duties as "school-marms" near Klemme.

On account of the fair being held at Britt this week no band concert was given on the street here Wednesday evening. The concert will be given Saturday evening when Mr. Crotty will be here to direct and an extra large concert will take place.

Papa Richard Bamman since Tuesday evening of this week. It is a boy the finest ever, and if one is to find Dick at his accustomed place in Bamman Brothers Garage, he must call early and often. Uncle Harold too is quite as interested as is "Dad."—Democrat.

Mr. and Mrs. Clarence Reed and little daughter, Lavaughn, of Manson, Iowa, were guests at the home of Mr. and Mrs. Raymond White several days last week. "Red" is the proprietor of the leading barber shop at Manson. While here they also went to Garner for a few days' visit with relatives and friends. "Red" was also operator at the Rock Island depot at Garner at one time.

KLEMME FOLKS SEE FATAL AUTO ACCIDENT ON TRIP

Mr. and Mrs. Chris Gram returned Friday from their auto trip into Minnesota and South Dakota. The trip took them northwest of Minneapolis about seventy-five miles where they visited his folks. They then went to Watertown, South Dakota, for a visit. On their way to Watertown, near Clear Lake, South Dakota, they witnessed a fatal auto accident. A Ford containing a young man and a girl, and another car, an Overland, with two young men and girls, were racing and the one car tried to beat the other over a bridge with the result that both cars smashed together and were completely wrecked. Chris says he drove up in a few minutes and a couple of other cars had stopped to help them. One young man was instantly killed and Chris says another boy was all crushed and dieing. One girl had a broken arm, the other a broken leg and the third girl escaped. The other young man was unconscious but the doctor who happened to drive up said he would come out alright. Chris said it was a gruesome sight and they were glad to get away from it. Outside of viewing this sad accident they thoroughly enjoyed their trip of about a thousand miles. Chris said the crops in South Dakota looked better than those farther north in Minnesota but that Iowa crops had them all beat.

SUNDAY SCHOOL PICNICS

Mrs. August Ridder's Sunday School class enjoyed an outing last Friday down near Goodell at James Schneider's pasture near where the spring is located. Weiners roasted and marshmallows th same, were the chief attractions on the bill of fare for the picnic supper. Lots of fun, and plenty of good eats, helped the picnic to be a success.

Sunday Mrs. Otto Lemke's class enjoyed a picnic lunch in the woods near Goodell. Picnic lunch and fine day's outing were all enjoyed by the class.

METHODIST EPISCOPAL CHURCH

"ANGELA KISSED ME!"

Synopsis.—Dick Morgan of Syracuse, N. Y., a failure in life, enlisted in the Foreign Legion of the French army under the name of Henry Hilliard, is disfigured by shrapnel. The French surgeons ask for a photograph to guide them in restoring his face. In his rage against life he offers in derision a picture postcard bearing the radiant face of Christ. The surgeons do a good job. On his way back to America he meets Martin Harmon, a New York broker. The result is that Morgan, under the name of Hilliard and unrecognized as Morgan, goes back to Syracuse to selling a mining stock. He is determined to make good. He tells people of the death of Morgan. He finds in Angela Cullen a loyal defender of Dick Morgan. He meets Carol Durant, who had refused to marry him. She does not hesitate to tell him that she had loved Morgan. Hilliard finds he still loves her and is tempted to confess. Hilliard tempts Cullen, his former employer, with his mining scheme.

CHAPTER VI.—Continued.

—8—

"A good principle, too, but—" Mr. Cullen glanced at his watch. "It's dinner time, and more too. We'd better get along up to the house, or the first thing you know, we'll have servant troubles in our midst. And you didn't bring up that subject anyway—I brought it up." He took Angela's arm paternally. "Just as a matter of fact," he said, clearing his throat. "As a matter of fact, Mr. Hilliard—whereabouts did you say this property is located?"

* * * * * * *

Shortly after dinner Angela, who had fled to the telephone in answer to a peremptory summons, came back complacent.

"Dinner at the Durant's on Sunday," she announced. "All three of us. Very quiet, Carol said. So I accepted—and that means you've got to stay with us two days more anyway, Mr. Hilliard. Do you mind very much?"

"Mind!" Hilliard had risen half out of his chair. His tremendous yearning to see Carol again, and his violent reaction at the prospect, had greatly influenced his voice, which was strident, explosive. The Cullens were laughing aloud at his confusion.

"He's blushing!" crowed Angela. "Look at him! Look at him!"

Indeed, he was crimson to the temples. Sunday—forty-eight hours! How he had spurned her!—and how he had suffered from that moment until now! To see her again . . . merely to see her! Business was business, and the farce must go on; no matter what else happened, he must hew out his success; he had ceased to love her, and he had come prepared for guerilla warfare . . . but to see her again! To hear her voice! To watch that smile of hers, and remember the tears she had shed for Dicky Morgan!

Sunday—forty-eight hours!

The Cullens were still laughing at him, and in Angela's soprano there was a note of feminine resentment, but Hilliard's ears were suddenly stone deaf.

CHAPTER VII.

Since Friday night, Hilliard had lived only for Sunday; his whole existence had been turned to Sunday, and when at last the morning dawned, his greatest fear was that he might not live until dinner-time.

On reaching Carol's side, he was both awkward and incoherent; and he failed to derive encouragement from the realization which gradually stole over him, that the Durants had asked a number of other guests to dinner. Armstrong was waiting patiently in the aisle, and keeping closer to Carol than Hilliard liked, and there was also a bright-faced boy of nineteen or twenty who had promptly attached himself to Angela—his name was Waring, and he was the grandson of the patriarchal clergyman, with the head of Moses and the spirit of youth, who presently came down to join the little group, and complete it. So that altogether there were nine people who finally sat down to table; and Hilliard's dream of quiet progress and harbored conversation was shattered in a twinkling.

It was all very homelike, and all very friendly, but to Hilliard, sitting there between Carol and her mother, the occasion was peculiarly acute. He had long since discarded any residue of his active fears; he was confident in his disguise to the point of recklessness, for he had covered the windings of the trail by an infinite variety of methods; and yet without having any tangible facts to grasp, he was subtly warned to remain on sentry duty over his poise.

He was gratified that the conversation, after one natural enough eddy, was whirled away from the vicissitudes of Dicky Morgan, for he had talked a time, he amused himself by watching Angela and Waring playing their world-old game across the table; after that, he paid a little polite attention to Mrs. Durant, and to the clergyman; and then snatching an opportunity unlooked for, he gave his kindest smile to Carol, and for an instant took the monopoly from Armstrong. And he had hardly looked down once into her October-brown eyes before the mystery of his restlessness was as clear as crystal, and Hilliard was thoroughly dumfounded, and confused.

It had come upon him, a quarter of an hour ago, as they exchanged their first superficial sentences, that he was lonelier than he had ever imagined, but he hadn't realized, until this immediate contingency, that this sensation had carried over until now. He was prevented, by the very limits of the project which had brought him here, from releasing any of his sincere thoughts; he hadn't comprehended, until he had learned the truth just now by actual experience, that loneliness is nothing but an aggravated state of self-repression. Never in all his life, not even when he had lain for months in hospital in France, had he been as lonely as today, and at this moment, when he was surrounded by people he knew intimately, and when he was enjoined from sharing in their community of mind.

Carol, looking up at him with what wasn't exactly a smile, but was at least a cousin to it—that well-remembered flash of sympathetic interest—Carol spoke to him under cover of the general conversation.

"A penny for your thoughts!" she proffered.

"They aren't worth it," said Hilliard. "I was thinking about myself." He continued to regard her steadily, and he was alarmed to discover that he was losing one of the abilities which had made him so sure of himself. He continued to hold that she had treated him shabbily, mercilessly; but notwithstanding that, as he gazed at her, and perceived the sweet naturalness which was developing out of last week's shock, he was secretly perturbed. In spite of himself, he began to see, as though by camera obscura, dim visions of the past; he was righteously annoyed that they should rise to torment him, and still the visions came.

"But after all that you've been through," she said, "I should think your thoughts about yourself would be extremely interesting!"

"I'm afraid they're rather gloomy, Miss Durant, whenever they touch on what I've been through. And when anything like this gathering here today builds up a comparison. . . . I'm sorry, but I can't always master it."

"You mean the difference between a family over here and a family over there?"

"Exactly," he said. "Down to the last detail—what we eat, and where we live, and what we talk about, and what we think about—everything."

"I've thought of that, too," she said soberly. "But I'll have to confess that it wasn't until you came—it wasn't until after that first night at Angela's—that the great difference came home to me. It's made me feel that it's al-

He Was So Close to Her That Their Sleeves Touched.

most wrong—almost unendurable—that we should be so warm and comfortable, and well-fed, when over on the continent . . . well, I wonder whether we won't have to pay for this some time?"

It was at this juncture that Mrs. Durant rose; and Hilliard, with keen foresight, cannily guided Carol after her mother into the living room, made for a familiar piece of furniture and

ple, and no more—there wasn't the slightest use in Armstrong's loitering disconsolately in the neighborhood; it had a maximum capacity of two. Furthermore, it was removed by several feet from the nearest listening post.

He was so close to her that their sleeves touched; he looked into the beautiful eyes which were so clear, so unsuspecting; and his will swayed perilously. Had he prepared so long and savagely for his requital, only to lose his impetus at almost the first glance of those brown eyes? He reflected that there was nothing to prevent him from being a good salesman, and from renewing his predilection for Carol at the same time. The idea of courting her again, in his false character, was highly dramatic. . . .

"I know you won't misunderstand me," he said, his heart shaking, "and I hope that you won't consider it as too presumptuous—but—the other day you spoke of Dicky Morgan as a very dear friend of yours. Miss Durant, I want to do everything in the world I can for you, and he was my dear friend as well as yours. I'm not disloyal to him, or to you, or to myself—but I should like more than I can ever tell you to feel that I had done my utmost to take his place. No one can do that literally—I am not so vain—but I feel, and I have felt from the time we met each other, Dicky would have wanted us to be friends."

"That's—that's wonderfully thoughtful of you," said Carol, softly. "And . . . and I think he would have wanted that . . . if he'd known. . . ." Her eyes were suspiciously dim and Hilliard's loneliness dissolved into a great spasm of longing which held him and shook him and left him weak with impotence

"Then I'll stay in Syracuse," he said abruptly. "Provided—provided you won't be offended if I do have to want to know you for yourself—just a little selfishly. I'm afraid that isn't very clear—it's difficult to separate it—but you see—"

"Don't try to explain," she said, subdued. "I know how hard all this must be for you—and I think perhaps you need my friendship as much as I need yours."

Before he could reply, there was a flutter of indescribable gracefulness before them. Angela was courtesying in mock obeisance to the floor. Behind her, Waring was watching her possessively.

"If your majesties will wake up half a second," she said, "everybody's going to walk up around the Sedgwick farm tract to get some fresh air. Coming?"

As they stood together, drenched with regret for the confidences that might forever remain unsaid, a maid appeared in the doorway.

"Please, ma'am," she said breathlessly, "it's the Western Union—for Mr. Hilliard."

"Right in my study," called the doctor, hurrying. "Just across the hall. There you are!" and ushered him into the sanctum and considerately closed the door.

Despite the urgent summons which the average person feels under such circumstances Hilliard was astonishingly tardy in sitting down to the receiver. For one thing he was still vibrating from his recent stress of passion; for another he knew pretty certainly what the message was going to be, and for a third, he was somewhat emotionally under the spell of the doctor's room. Hilliard had spent a hundred hours in it—pleasant hours, so that involuntarily yielding to its kindly atmosphere, and all that the atmosphere implied, he took time to survey all four walls before he took up the receiver. And after he had listened to the telegram, and ordered a copy mailed to him in care of Mr. Cullen, he took time to survey those walls again, more closely; and this was partly for their intrinsic significance, and partly because his feelings were so fresh and tender that he dreaded to return at once to the gathering which, as a whole, couldn't be expected to defer to them. His eyes fell upon the doctor's desk, wandered and suddenly focussed hard and piercingly. He went over to the desk and slowly put out his hand and lifted up a small photograph in a metal frame.

"Well, I'll be darned!" said Hilliard, just above a whisper. The turning of the doorknob roused him; he wheeled with the photograph still in his hand.

"Hello!" said Doctor Durant, cheerfully. "Get your message all right? What's that you've found? Oh, yes—Dick's picture."

Hilliard swallowed hard, and found that his voice was queerly out of control.

"It's—it's the same one—"

"Yes—it's the same as the one you brought back. I've had it there ever since he gave it to me."

He took it gently from Hilliard's hand; replaced it on the desk. "How that boy would have made good if he had lived!" said the doctor, in an undertone. "Well—they're waiting for us."

Hilliard, following him outside, encountered the two Cullens in the hall, and at sight of his florid host, he collected his wits, and resumed his part in the play.

"Oh!" he said. "I—I—that was from one—that was a telegram from the manager of the syndicate, Mr. Cullen; he said it's decided not to try to resyndicate any stock, but to hold it ourselves for the long pull—everything's put off for three or four weeks anyway. I'm having a copy mailed to the house—there's some news in it I thought you might like to see."

"Good! That leaves you free, doesn't it? You'll stay on with us then? Don't say no. I insist on it!"

"No, I couldn't do that! It's awful kind of you, but—"

"You talk to him, Angela!" laughed Mr. Cullen. "You make him stay. You've got more influence over him than I have, anyhow. And don't you dare to let him get away without a promise—understand?" He passed on, and left them together.

"You walk along with me, sir!" said Angela, imperially. "And you'd better behave yourself—I'm fierce!"

At the same moment that he looked yearningly toward Carol, who up ahead by the doorway was already captive to the wily Armstrong, young Rufus Waring was glaring belligerently toward Hilliard.

The masquerader smiled in defeat, then smiled with sudden realization of the woman-child clinging to him. He squeezed her arm out of sheer affection.

"Your gallant cavalier'll cover me with horrid welts and bruises for this!" he said warningly. "Don't make him jealous, now!" They were now bringing up the rear of the procession in the hallway.

"I'll make 'em well again," said Angela. "I am a good nurse, aren't I?"

He was convulsed by her air of conquest.

"By the old-fashioned method?" He could hardly believe that this was the girl he had taught to climb trees, and make slingshots.

"I'll—" She stopped and blushed. The others were all on the steps; these two were in the dusky vestibule. Waring was fretting impatiently outside.

"Would you?" asked Hilliard. He intended only to tease her; but all at once her head came up, and he could

He Had Been Observed.

see that her eyes were big and soft and frightened. She was hardly seventeen, and to Hilliard she had never ceased to be the child of two years ago. He bent and kissed her; her lips were trembling, expressive.

"Now we've got to hurry," he said. "Come, dear!"

It was the tone he would naturally use to a child, but he had an uneasy feeling that he had used it to a woman. Children's lips aren't expressive.

And he had another intuition—still more upsetting to him—which was that he had been observed. For on the threshold of the outer door Carol and Armstrong and Rufus Waring, as though turned back to inquire into the cause of Hilliard's and Angela's delay, were standing. . . .

He could not tell, of course, whether they had actually seen him. It was possible that in the dusk of the hallway he had escaped; certainly there was nothing in the manner of any one of the three, when Hilliard joined them, to convince him one way or the other. But he knew that he was in a critical situation; he knew that to any reasonable person who had seen him at that spontaneous little outburst of sentiment, his motives wouldn't appear to be very opaque.

No, the manner of those three who had stood on the threshold was astonishingly casual. Perhaps too casual. . . . Hilliard frowned, and tried to glimpse their various expressions. Ah! Waring, striding stiltedly ahead, had thunderclouds on his forehead, and as for Carol . . .

She turned to speak to Armstrong, and Hilliard knew.

For the remainder of the first stage of that walk, he spoke not a word to Angela, who trudged along by his side with God knows what tumults in her bosom. He thought not of Angela, nor concerned himself with the storm he had stirred within her. He was absorbed solely with the puzzle which lay before him, which was to detach Carol as soon as possible, and to explain himself. Otherwise, his reputation was ashes even now.

And, to his unbounded joy, the opportunity came soon—at the end of the road, where the party halted for a moment, to take a referendum as to the route. Armstrong strayed a yard or two too far, and on the instant Hilliard was at Carol's elbow. She said nothing, nor did he; but when the march was resumed, he was beside her—and beating his brains for an introductory remark. He had to convince her he had been trifling with neither herself nor Angela, and he walked a good furlong before he could devise so much as an opening sentence. At length he cleared his throat.

"I've just decided," he said, "that I'm growing old."

"Yes?" She was immeasurably sweet and distant, and Hilliard's courage faltered.

"I have indeed. I've made a most touching discovery. . . . Do I look grandfatherly, Miss Durant?"

"No; I'd hardly say that."

He made a gesture of gratitude.

"You've earned my permanent thanks. But I am growing old. How do I know? Didn't you ever read Leigh Hunt?"

"Just a little." There was a trace of warmth creeping into her voice. Hilliard held his breath:

Say I'm weary, say I'm sad;
Say that health and wealth have missed me;
Say I'm growing old, but add—
Angela kissed me!

He had spoken the lines magnificently, with the precise humor and pathos which go to make them immortal. "I'm glad she fits into the meter," he said thoughtfully, "because I can understand just how Leigh Hunt felt about Jennie."

"And—how do you think that was?"

"Very sensitive," said Hilliard, "and perhaps a little repressed and—decrepit." He smiled reminiscently. "I suppose there are very few things in life that make a man feel more mindful of his own crudity and general worthlessness than to have a child's spontaneous affection." It was the testing venture. She looked at him sidewise.

"More than if—if it weren't a child?"

"I think so." His tone was faultless. "A woman can make a man feel like Romeo, but it takes a very young girl to make him feel like Launcelot—at my age."

"She is adorable, isn't she?" His heart jumped at her cordial acceptance of his statement. "Only—she's seventeen, Mr. Hilliard."

"I know," he said gravely. "And that's why I'm so conscious of my own senility. Because all that beautiful innocence and ignorance is doomed, Miss Durant—who knows that I'm not the very last person to see it? Today, I'm only a much older man, some one she likes; tomorrow, I may be a man without the 'only,' and the more she liked me, the less she'd show it. But there's been so very little of that sort of thing for me in the last few years from anybody, and I do appreciate it, and I'm not ashamed of it, either."

"No," she said, "you couldn't be. You're too human." She smiled at him, and he was transported at the proof of her sympathy. "If I were in your place, I'd want to feel the same way about it."

He thanked her in his heart. He had saved both Angela and himself, and held his pristine advantage.

But there was no disputing the fact that he had made an active enemy of Waring, and an alert rival out of Armstrong. He smiled grimly as he looked at the man ahead.

"Mr. Armstrong seems to be very nervous," he said. "Not that I can blame him for wanting to be in my place. On the contrary, I'm sorry for him."

"That shows a very good disposition," she said demurely.

"Perhaps it does, and perhaps it doesn't. I believe every man owes it to himself to get what he wants. If he does, he's a success; if he doesn't—it's his own fault."

As he said this, they came abreast of the others, and Armstrong, who had heard the final sentence, whirled toward Hilliard.

"Regardless of methods?" he demanded.

"Why—to some extent," laughed Hilliard. "Why not?"

Armstrong delayed, so that the two men were a few paces behind the rest of the group. "Is that your regular creed, Mr. Hilliard?"

"My creed isn't composed of words, Mr. Armstrong, but of actions."

They had spoken so quietly that no one perceiving them would have remotely suspected that a challenge had been offered and accepted.

"Actions do speak louder, of course."

"Mine," said Hilliard, "will give you no offense. But—I generally get what I want."

"So do I Shall we shake hands on it?" Armstrong was very affable, but tremendously in earnest.

"With pleasure. I can count on your generosity, I see."

"And I on your courtesy."

"Thank you." He went complacently forward; but inwardly he was steeped in perturbation. The man was so deadly sure of himself. Could it be that he was tacitly engaged to Carol, in spite of what Angela had surmised, or so nearly on the road to an understanding with her that Hilliard was only making a fool of himself?

Armstrong laughed gently. It was like a dagger thrust in Hilliard's heart.

"One chance in a thousand!"

(TO BE CONTINUED.)

Walk That Tells Character.

A peculiar walk is that of the lord stride with the decided swing of the shoulders. This walk is generally to be seen in authors, actors and artists, and is characteristic of the art world, the man who has ideas of his own and is quite untrammeled by convention. It denotes independence and, if accompanied by an emphatic planting down of the left foot, a stamp in fact, resolution and determination.

High Prices in Early New York.

During the British occupation of New York in Revolutionary days, the method was to sell in wholesale lots at public auction and to issue revocable licenses to retailers. The best flour then sold for $14 a barrel, bacon at 32 cents a pound and beef at 18 cents a pound. Wages were less than 50 cents a day.

Back Lame and Achy?

Do you get up mornings tired and achy? Evening find you "all worn-out?" Likely your kidneys are to blame. Hurry and worry, lack of rest, and eating too much meat, throw a strain on the kidneys. Your back gives out; you are tired and likely suffer headaches and dizzy spells. Take things easier and help the kidneys with *Doan's Kidney Pills*. *Doan's* have brought new strength to thousands. Ask your neighbor!

An Iowa Case

J. B. Fiedler, blacksmith, 113 S. Davis St., Ottumwa, Iowa, says: "Horseshoeing is hard on the back and kidneys and several years ago my kidneys became weak. When I bent over sharp pains would shoot through my kidneys when I tried to straighten. My kidneys were weak and the secretions were highly colored. Doan's Kidney Pills relieved me in a short time."

MISTAKEN IN HIS SURMISE

Mr. Brown Somewhat Hasty in Blaming the Gramophone for Those Unearthy Sounds.

Perfect peace reigned in the Brown's household. The head of the family, his day's work over, was reading, in blissful anticipation of the evening meal which Mrs. Brown was busy preparing in the kitchen.

The gentle stillness was suddenly broken by eerie sounds, apparently coming from the next house—a weird moaning, developing into heart-rending wails and harrowing shrieks.

Mr. Brown jumped up.

"It's Mrs. Wood's confounded gramophone playing Tosti's 'Good-by'" he cried. "Lizzie"—to his oldest daughter—"go and implore her to stop it! Tell her I'm ill—tell her we're all ill, anything you like, only make her leave off!"

The child obediently hurried out, and two minutes later came rushing back.

"It's not Mrs. Wood's gramophone, dad," she said. "It's the Murphys down the street opening a tin of corned beef!"

Among the equipment of an up-to-date salvage ship are searchlights, line-throwing guns, rock drills, hoisting machines, etc.

If a man is smart he can always catch on, and if he is wise, he will always know when to let go.

Naturally.

"When you go to Europe now, you have to have your birth certificate."

"Of course you do. If you haven't, somebody else on the steamer might get your berth."

FAMOUS OLD BOSTON ABODE

Province House, Once One of the Most Famous Colonial Mansions, Has Been Partially Preserved.

There stands today on Bossworth court in Boston but a portion of the old Province house, a most interesting relic of Colonial days; and the rest of the court is lined with modern office buildings. But in 1820 it was considered a very genteel part of town. Oliver Wendell Holmes lived in the old Province house for 18 years.

At the farther end of the court stands an iron-wrought archway, decorative of design, which was used in the early part of the nineteenth century as an entrance to the governor's garden, a part of the Province house grounds. This has been carefully preserved, as have the stone steps which lead to the lower level. The Province house was immortalized by Hawthorne in his "Twice-Told Tales."

The historic staircase now is gone, and only a portion of the exterior of the house if left. It was built in 1697 by Peter Sargent, a wealthy London merchant, and was considered one of the handsomest residences in town. During the days of its popularity the governor gave many balls there.

Failings Ignored.

Mrs. Hodge—How do you write references for your cooks?

Mrs. Hiram Daly—Oh, epitaph style.

A silent, keyless clock, which contains only four wheels and no springs, has recently been patented.

requires no added sweetening, for it contains its own pure grain sugar, developed from wheat and barley by twenty hours' baking.

Sprinkle Grape-Nuts over ripe fruit or berries and you'll save sugar.

UNTANGLED

By W. A. PEACH.

(©, 1920, by McClure Newspaper Syndicate.)

It was lunch hour in the restaurant run by the big mail order firm for the use of its employees. The girls were seated about, talking or reading. Ruth was the only one to whom no young man of the many men in the great building had seemed to turn an interested eye—that is, no man of the kind she wanted to know.

The girls had joked her about the situation so much that when Mary Kennedy had come to her and showed her a picture of a whimsical masculine face, handsome in a clean, pleasant fashion, and told her that he came from her town upstate, she had said glibly:

"Oh, yes, I know him; he's an old friend of mine!"

And she did not know him from Adam!

"You do?" said Mary. "Well, that is fine. He is a friend of Fred's and is coming in on the evening train—just in time to go to the dance; and you can take care of him. All the other girls are tied up."

And Mary, walking gayly away, had announced to the gathered girls that at last Ruth was to have a beau.

Thinking it over in her room, Ruth felt tears come to her eyes; but a glance at the clock startled her into action. She got out the simple dress that was her sole evening gown, and with unwilling fingers prepared herself for her ordeal.

She went alone to the hall where the girls were giving the dance—a little, lonely, and somewhat pathetic figure. She was welcomed with smiles and questions. "Is he good looking?" "May I see the snapshot?" "Is he an old flame of yours?" and similar queries were asked her. She forced herself to smile in a tantalizing way, but her heart was not as gay as her smile.

The dance began, and to her surprise she found she was asked to dance more than ever before. She wondered why.

The fateful hand moved around on the big hall clock to the train time, then to a little after. Perhaps, he would not come; and she prayed that her hope might be true. She had about reached the conclusion he had not when a slight confusion at the door drew her attention, and she saw Mary bearing down upon her.

"Ruth, he's come and waiting. As long as you know him, just get him and give him a good time," Mary said. "This is my favorite dance."

Setting her will to the effort, she went down the hall and up to a tall young fellow who was watching her with an odd expression on his face.

She stopped before him, panic-stricken until she saw the brown, friendly eyes looking down at hers. She held out her hand and he took it in a close, friendly grasp.

"Mary had just time to say 'Hello! I'll get a friend of yours—an old one!' Are you the one? I hope so," he added.

It was enough. Forgetting that he still held her hand, she blurted out the whole miserable story. He listened soberly—she was a bit frightened at that—and then spoke the words that brought some peace to her stormy heart.

"We ought to be old friends if we aren't. Let's dance. That music is great," he said smiling.

She drew a long breath and swung with him into the dance.

Four hours later it was a tired but supremely happy little girl that crept into the small bed in the hallroom, after a long examination at the mirror and the old verdict, "What a homely pug nose! If I could get rid of that! Never mind—I have had one good time that no one can ever, ever take away from me!"

At the office the next day, she was the subject of much interest. But she parried all comments that were suggestive. "He goes home today," she said quietly.

But he did not. She was called to the telephone at noon, and his pleasant voice asked her to promise the evening to him. In a voice that must have been faint to him, she agreed.

Then the wonder days began—golden, glorious days when hearts are finding their way to each other in a union that even death, supreme over all else, can never sunder.

And then came the last evening. They were alone in the little reception room. He was standing and saying simply: "I must go tomorrow. Before I go, Ruth, I want to know something; can you grow to love me while I am away?"

She could not find the words though her lips moved. The keen, searching strength came into his eyes. Suddenly, something strong and steadying went about her, and from his shoulder she was looking up.

"But nobody ever loved me!" she whispered, dazed and confused, and shaken by what had entered her life with overwhelming force. "Just see my homely nose and my——"

Something gentle and kind burned softly in eyes above hers. "And my dark, pretty hair and—little girl, there are all kinds of flowers; the one I love is the simple rose that used to grow in my mother's garden; you are it! As for that nose——" His gentle hand tipped her face, and he inspected the turned-up nose critically. "I like it, but most of all I love the girl who hates it!"

And then he kissed the lips beneath it.

ODD CONTESTS, OLD AND NEW

Belgium Cock-Crowing Matches and English Lark-Singing Contests—Turtles in Exciting Races.

From the dawn of time man has delighted in contests, whether between individuals who match their strength and skill, or between animals.

Some of these contests are decidedly quaint, or, for instance, the cock-crowing matches of Belgium, where specially bred and trained fowls are matched to see which will crow the greatest number of times within a certain time limit.

The lark-singing contests of England are far more musical, these contests being promoted and conducted by an association having a good membership. The birds are kept for some time in a dark room, and then placed before a mirror in the light. Imagining his own reflection to be a rival, the bird at once bursts into song, a careful record being made of the length of the song.

There used to be in Hamburg a famous collection of wild animals which included a number of giant tortoises, each weighing several hundred pounds. Children would mount upon the backs of these strange steeds, and, holding a lettuce leaf on the end of a stick just beyond the reach of the tortoise, coax them into an amusing race toward a fixed goal.

Much more exciting are the turtle races which may be witnessed in some of the South American countries. Turtle fishers select a number of the great sea turtles, and, attired in bathing costumes, mount their backs, grasping the forepart of the shells with both hands. The turtles are then released and at once make for the sea. Ordinarily the turtle would plunge with his rider to the bottom of the sea, but this the jockey would prevent by throwing his weight on the back part of the shell and at the same time pulling the forward part up with his hands, which keeps the animal's head above the surface. By pulling the shell to the right or left, the rider is able to guide his mount, and a circle is made about a boat anchored off shore, and so back to the starting point. These turtles cover a course of eight or nine miles in an astonishing short time.

In Siam is found a particularly warlike fish, and fish fighting is almost a national sport in that country. When a contest is to be staged, two of the fish are placed in a large glass bottle, and these natural gladiators do the rest.

Infinite Variety at Geneva.

Those who had the rare pleasure of looking in on a plenary session of the international woman's conference at Geneva were, in a few instances, unconvinced that out of such a variegated group unity of action and opinion could be possible, writes Alice La Maziere in Figaro. There were delegates from all parts of the world—blonde and heavy Scandinavians, robust and energetic Americans, frail and brunette Spaniards, Italians and Greeks, expressionless and saffron-colored Japanese and Hindus in over-embroidered gowns. And there were Frenchwomen despite the fact that though France has marched at the head of so many movements of emancipation, it will be a long while before she enfranchises her daughters. And we must not forget the delegate from Iceland, who journeyed for 30 days to be with us and came dressed in festival costume.

But Lady Astor, our good colleague from England, was the charm and grace of the conference. What will come of it all? Notwithstanding the opposition the women are meeting in certain countries—Spain, Italy, Switzerland, Turkey, France—the day is not far distant when we will act as a body in moral, political, educational and domestic questions. And our voice shall be heard when the specter of war threatens to arise.

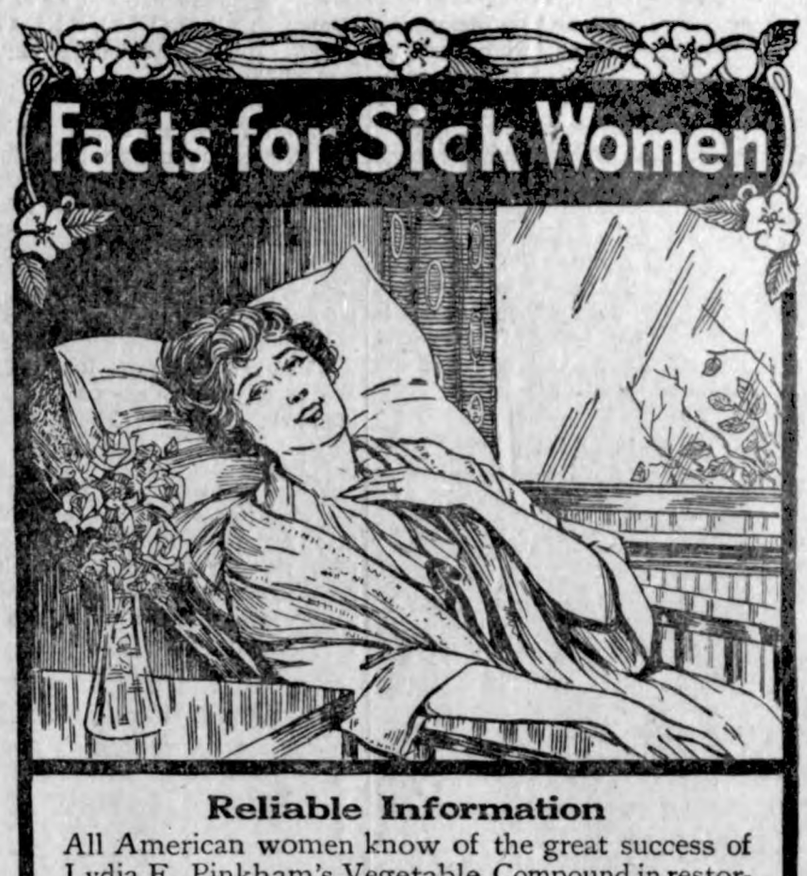
The War Horse.

Mud-spattered, high power motorcars, careering along military roads, replaced foam-flecked chargers in the work of carrying generals and their staffs in the World war when it came to the actual business of a campaign. No panting charger carried a Wellington from a town 20 miles away—a motorcar did the work in 20 minutes without exciting comment. But the horse was not entirely robbed of his glorious place in the war. Motorcars might do the work better in actual campaigns, but when it came to the pomp and panoply the horse was not entirely robbed of his glory. An army headed by a fat general cuddled in the deep upholstery of a mere machine would not stir the imagination. He must sit on a prancing, arch-necked steed and return the cheers with sharp salutes while handling his mettlesome mount. So it was that the high officers of the allies had horses for ceremonial occasions.

Warning to Airmen Who Smoke.

An airman who drops a lighted pipe from his plane is responsible for any damage his pipe may cause. This was decided at a moot, or discussion, in Gray's Inn hall, London, recently, at which Justice Darling presided.

Mr. Justice Darling, in the course of his judgment, said that for an airman to take a lighted pipe and smoke it when flying at a point where if it fell it would fall by gravitation to the earth instead of to the moon, to allow it to fall or not to prevent it to fall—that was in itself prima facie negligence. If the pipe fell to earth and set fire to a haystack or did any other damage, the person injured was entitled to an action to recover damages for negligence.—Brooklyn Eagle.



Reliable Information

All American women know of the great success of Lydia E. Pinkham's Vegetable Compound in restoring to health women who suffered from ailments peculiar to their sex, yet there are some who are skeptical and do not realize that all that is claimed for it is absolutely true—if they did, our laboratory would not be half large enough to supply the demand, though today it is the largest in the country used for the manufacture of one particular medicine.

The Facts contained in the following two letters should prove of benefit to many women:

Buffalo, N. Y.—"I suffered with organic inflammation and displacement. When lifting I had such pain and bearing down that I was not able to stand up, and it hurt me to walk or go up or down stairs. I was going to a doctor without any results and he said the safest thing would be to have an operation. I met a lady who told me she had three operations and was not well until she took Lydia E. Pinkham's Vegetable Compound.

I felt relief after taking two bottles of Vegetable Compound and I kept on with it until I was cured. I always use Lydia E. Pinkham's Liver Pills and they are fine. Everything used to turn sour on my stomach and the Liver Pills relieved that."—Mrs. A. ROGERS, 593 Fargo Avenue, Buffalo, N. Y.

Sacramento, Calif.—"I had organic trouble and had such terrible pain and swelling in the lower part of my side that I could not stand on my feet or even let the bed clothes touch my side. I gave up my work thinking I would not be able to go back for months. My mother advised me to take Lydia E. Pinkham's Vegetable Compound as it had saved her life at one time, and it put me in a wonderful condition in a couple of weeks, so I can keep on working. I work in a department store and have to stand on my feet all day and I do not have any more pains. I surely recommend your Vegetable Compound to all my friends and you may use these facts as a testimonial."—BERTHA J. PARKER, 3320 M St., Sacramento, Calif.

The fact is, the Best Medicine for Women is

Lydia E. Pinkham's Vegetable Compound

LYDIA E. PINKHAM MEDICINE CO., LYNN, MASS.

A Leading Clue.

"What made the pohibition enforcement agents suspect a staid, respectable elderly woman of having whisky bottles concealed about her?"

"I'm sure I don't know, unless it was her corkscrew curls."

Father and Daughter Get Relief by Eatonic

R. J. Powell, Sweetwater, Texas, says, "Eatonic helped me at once, but it was my daughter who got the marvelous benefits. She could not even take a drink of water without awful misery, but it relieved her; she is feeling much better. All this from one box, so send me four more at once."

Hundreds of people now take eatonic; one or two tablets after each meal keeps them in good health, feeling fine, full of pep. Eatonic simply takes up the excess acidity and poisons and carries them right out of the system. Of course, when the cause of the misery is removed, the sufferer cannot help but get well.

You will find it a quick, sure relief for heartburn, indigestion, sour, acid, gassy, bloated stomach. It costs but a trifle and your druggist will supply you. If you don't feel well, you give eatonic a test. Adv.

Easily Remedied.

"So the race was called off because there was not breeze enough to fill the yachts' sails."

"That was queer. With Sir Thomas Lipton spending $1,000,000 on the effort to lift the cup, he ought to be able to raise the wind."

WOMEN NEED SWAMP-ROOT

Thousands of women have kidney and bladder trouble and never suspect it.

Womens' complaints often prove to be nothing else but kidney trouble, or the result of kidney or bladder disease.

If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.

Pain in the back, headache, loss of ambition, nervousness, are often times symptoms of kidney trouble.

Don't delay starting treatment. Dr. Kilmer's Swamp-Root, a physician's prescription, obtained at any drug store, may be just the remedy needed to overcome such conditions.

Get a medium or large size bottle immediately from any drug store.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

In some English hospitals nurses are on duty for periods totaling up to 71 and 84 hours per week.

No man can afford to have contempt for another.

Harvest 20 to 45 Bushel to Acre Wheat in Western Canada

Think what that means to you in good hard dollars with the great demand for wheat at high prices. Many farmers in Western Canada have paid for their land from a single crop. The same success may still be yours, for you can buy on easy terms.

Farm Land at $15 to $30 an Acre

located near thriving towns, good markets, railways—land of a kind which grows **20 to 45 bushels of wheat to the acre.** Good grazing lands at low prices convenient to your grain farm enable you to reap the **profits from stock raising and dairying.**

Learn the Facts About Western Canada

Klemme is fortunate in the coal situation. Coal haulers estimate that so far about two-thirds of the Klemme homes have their winter's supply of coal laid in.

They say prices are coming down. Potatoes are getting cheaper, sugar is coming down to 10 cents by the first of the year—maybe. We are from Missouri and "show us."

The Garner ball team played the Kanawha team Sunday at the park at Twin Lakes. The game was won by Garner who carried away seven scores against Kanawha's four.

Miss Arvella Emerson returned to her home at Spencer last Thursday after about a week's visit with her mother here and numerous Klemme friends.

Wm. Smith and family spent the latter part of last week and the forepart of this week in the pleasant (?) occupation of moving. They have moved into the house which they purchased by A. D. Gimer, east of the park. They have moved three times since March first this year and have become expert in the art of moving.

Ben Reemstma is a Government Licensed Auctioneer and he recently received his licens which is No. 17526. All auctioneers now have to pay a license of $50 a year.

C. W. Wiles left Friday for Kenosha, Wisconsin, and returned Monday with a new Dodge Bros. car, for which he has taken the agency for this territory.

Mrs. Boran came Monday from Milwaukee to join her husband who has already lived in Klemme several weeks. Mr. and Mrs. Boran live in one of the Ell houses a block east of the park.

Frank Gruetzmocher and son Harold, Paul Griesemer and John Gruetzmacher autoed to Mason City Tuesday. Harold went over to pitch ball for one of the cement company or tile plant teams. He also played with them the following day.

Mr. E. C. Crotty, who instructs the Klemme Band, will leave about the first of October for his former home in Massachusetts, where he and Mrs. Crotty will spend the winter months. They expect to return to Iowa next spring.

Miss Donna Baumgartner has returned from Des Moines where she spent several weeks visiting with relatives and friends and taking a general vacation. Monday she began teaching in the school two miles south-east of Klemme.

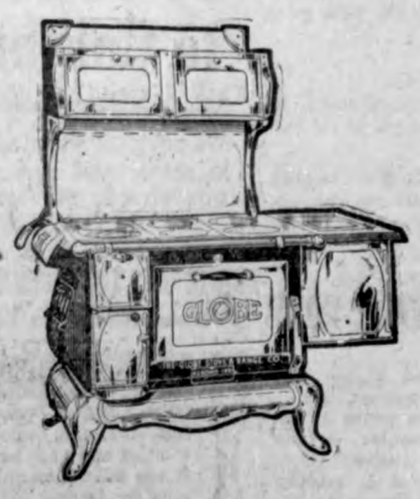
To all lovers of well-cooked food

YOU who love food cooked thoroughly---like mother used to cook it--meats roasted to a delicious brown--wholesome, generous biscuits, crisp from the air after the heat of the oven--cookies, big toothsome cookies, baked through and through--and most of all, pies, juicy, flaky cherry pies that melt in your mouth and carry you back to the days of mother's tempting pantry--



¶ Everyone of you who love the better things from the kitchen--you will want a Supreme Globe, you must have one to prepare the meal you've been wishing for.

¶ The Supreme Globe will cook food in less time and with less fuel than any other range on the market. And it will cook it thoroughly--the oven is absolutely air-tight and heat is evenly distributed. Food is cook-every bit as thoroughly on the bottom and sides as it is on the top.

We carry a number of styles and sizes of ranges.

NOTE--We are selling these ranges at the old price as we bought early and before the raise and also the raise in freight--you get the benefit of this saving.

Hancock County's Honor Roll

The State of Iowa s preparing an Honor Roll of all the men who lost their lives in the World War which is to be placed in the Historical Building in Des Moines.

They desire the name and picture of every man in Hancock County who lost his life in the World War and with the name and picture desire as much information about the man as possible, especially his Company, Regiment, Division, when and where he died.

Following is a list of those men in Hancock County as I have them and I am giving them below that any correction or additions may be made.

I am asking, therefore, that any one knowing of other men whose names do not appear in this list will please send me the name with the name of some near relative.

The list as I have it is as follows:

Name	Address
Babb, Herbert	Garner
Christensen, Harvey	Garner
Schaffer, Ben	Garner
Olson, Gifford C.	Garner
Addam, Frank E.	Klemme
Krubes, Joseph M.	Britt
Anderson, Tommie O.	Corwith

Ward, James M.	Britt
Severson, Sanford	Kanawha
Rasmusson, James	Crystal Lake
Kelly, John W.	Woden
Robbins, Kenneth	Goodell

Send information as soon as possible to E. D. Calkins, Britt, Iowa.

Rev. Meyer Officiates Wisconsin Wedding

Rev. A. H. Meyer left Monday morning via. Garner, for Tomah, Wisconsin, the object of his trip being to officiate at the wedding of Mrs. Meyer's sister, Miss Martha Lenz on Wednesday of this week, when she will be married to Mr. E. M. Wentland, of Charles City. Miss Martha is well known in this city as she has spent over a month visiting here this summer. Mr. Wentland also is quite generally known as he has made numerous trips to Klemme for a visit at the Meyer home. Their many Klemme friends extend congratulations. After the ceremony they leave for the west where their wedding trip will extend over abut six weeks in taking in the wnderful sights. Rev. and Mrs. Meyer are expected to return to Klemme this morning.

CREAMERY COMPANY SHOWS GOOD GAIN

The Klemme Creamery Company has shown a gain of 15 per cent for August over the same period last year This further goes to show the ability of Buttermaker Gimer and the creamery staff in their excellent method of conducting the business. This is very good considering the fact that most creameries in this territory show a loss at this time of the year in the amount of butter produced. Buttermaker Gimer has shipped out for the creamery sixty tubs more butter for the month of August than was shipped out last year. Klemme has one of the best creameries in the state and they sure do set a good pace for the others to follow.

The Oldest Joke.

Johnny Hoy claims that the oldest joke is one about the farmer's wife who went to the door and found an agent. "Can I sell you an exterminator for vermin?" asked the agent. "No," said the farmer's wife, who had been pestered to death with agents, "We have all the vermin we need."—Milwaukee Sentinel.

The Times "Devil" Says

THANKS, FOLKS

Last week we mailed out a nice little letter to all our subscribers who were somewhat in arrears on their subscription to the Klemme Times. They have been very prompt in paying up, but there are some yet who have not paid for their paper in advance and we ask those who are not paid up and who received a statement to please remit. We thank all those who paid up so promptly. Editor.

EDITOR'S WIFE HAS SURE CURE FOR "SETTIN' HENS"

Mrs. Tierney should be given credit for the scheme she has figured out for curing hens from the bad hadit of sitting when they are supposed to be laying eggs to feed a hungry editor. The following from the Garner Democrat gives Mrs. Tierney's new discovered secret:

The sitting hen is a problem that bothers a great many poultry raisers, and how to stop her is even a more perplexing one to many. Not so at our house. On the 15th day of May last, our wife, who has charge of the poultry at our house, caught a hen wasting her time sitting in an empty box with no prospect of hatching anything but mites. She gathered the old sitter in, placed her in the oven of a discarded cook stove that stands in the barn. That was the 15th of May. August 2th she though7t of what she had done May 15th. That hen will never again bother as a sitter. We have no objections to other poultry raisers copying this idea of breaking up sitters, but insist that Mrs. Tierney be given credit for the discovery.

WEATHER MAKES SEED CORN SELECTION IMPORTANT

"The weather conditions thruout Iowa for the past week or two make it very important that every corn grower be active in the matter of selecting his seed corn carefully and putting it away," say the corn experts at Iowa State College. They point out that the cool weather, cupled with rains or showers, has kept corn from maturing and that in some sections the crop hs alost ten days or more. That means that the crop is that much more in danger of injury by frost.

The governor of Iowa has set aside the weeks of Sept. 20 to Oct. 2 as "Seed Corn Weeks" and it is urged by the corn men that every grower go into his fields at that time to select his seed and then put it away carefully where it will dry out promptly.

They urge, also, that a surplus lot of seed be selected—enough for next year and the year after. Experience in Iowa has again and again proved the value of a surplus amount of seed.

NO 2-CENT RAILROAD FARES

Curt Stops Re-establishment of Pre-War Rates in Iowa

The Iowa railroad commission and officers of the state of Iowa have been temporarily restrained from enforcing the state 2-cent fare law in an order which was issued by Martin J. Wade, judge of the United States District Court. Ten Iowa railroads asked for the court order.

Notice to Tax Payers

The second installment of taxes are now due, penalty attaches October first. If taxes are paid through banks bring the receipt for the first installment as that receipt has the description of the property.

THOMAS H. THOMPSON,
County Treasurer. 4wc

They Wore Their Collars Turned Backwards

Wm. Trafford and Marlin Croner left last week Wednesday for Burlington, and returned the following Saturday morning, their object in being there was on a business mission. But there hangs the tale. Having completed their business Friday afternoon quite early they were strolling about and their wanderings took them to the docks. A river steamer was just ready to take a party of picnicers down the river and Trafford nd Crner decided to go along. They paid their fare of ixty cents for a round trip of sixty-four miles, and pondered on the cheapness of it. Soon after they were well on the trip they discovered that there were many children on board, and strange to say, although Trafford and Croner were not related to any of the party, the children would address them as "father." It was not until they were on the return trip back that they discovered why the children addressed them as "father" each time they would speak to them. Trafford asked one of the sailors what the doings was all about and he said, "Catholic Sunday School Picnic." Immediately Bill and Croner turned their collars around and got away with it.

ROAD FENCE SIGNS MUST GO

So Says an Opinion of the Attorney General of Iowa

Iowa farmers whose fences are plastered with signs of all kinds, some lurid, some weatherbeaten, most of them dilapidated, will be interested in learning that those sgns have no right along the public highway.

Recently the Cerro Gordo county supervisors determined to eliminate the signs from their county highways, if possible, and they ask the attorney general's office for an opinion as to their rights. The attorney general said in effect that the signs had no right and could be removed by the supervsors. So notice has been given to all sign advertisers to remove them within thrty days. If that is not done, the highway patrolmen will be directed to remove them.

Unsigned Letters Containing News

We received a letter yesterday morning mailed at Minneapolis, evidently from a Klemme party taking in the fair. Although the news is interesting we cannot publish it as it was unsigned except the unreadable initials of two persons. We protect ourselves and readers by throwing unsigned manuscripts in the waste basket as we cannot take the time to look up the truthfullness of statements or existing conditions of unsigned "news."

Hancock County Teachers Institute

Hancock County Teachers Institute will be held in the high school building at Garner, Thursday and Fridao September 16th und 17th. An institute faculty of the very best educators in the country has been secured.

The law states that teachers institutes shall be held at such times as the schools are generally in session and that any teacher failing to attend such teachers institute two days shall forfeit his or her average salary for each day of none attendance. While attendance is plainly the duty of of every teacher, we prefer to extend this call as a great priveledge to meet for help and conference with some of the best educators in active service today. Let all teachers and school officers heartily co-operate to make this institute a source of benefit and inspiration to all teachers of the county.

J. R. BAGGS
County Supt. of Schools 1wc

Walter Johnson and Jeff Bell left on Monday to take in the Minnesota State Fair, They intend to go from there to Canada to work during threshing and will then go to Seattle, Wash., returning to Klemme during the holidays.

The Wm. Hward family left last Friday night for Des Moines, where they will make their home in the future. Mr. Howard, we believe, has a job on the railroad there as brakeman.

Things Not to Be Hidden.

Three things cannot be hidden—love, a cough, and smoke—yes, even a fourth, and that is the signs of abundant life on a lively farm.

Sewer Men Will Arrive Soon

Mayor Gruetzmacher has received word from the contractors who have the job of installing the sewers here stating that they have their machines loaded on cars and ready to start. A slight delay in materials is holding them up at the present time. They have their men ready to go to work here. The company will use four large machines in the work and will put in from five hundred feet to a thousand feet of sewer each day when they get started. Two machines will be used for digging the trenches and two will be used for filling in after the sewer pipe are laid. If they have good luck they plan to get the job finished in a month or five weeks.

LAND SEEKERS PARTY TO CANADA

Charles Busch, local land man, and a party of ten men left here Sunday morning for Mason City where a special train was scheduled to take a large party of Iowa land seekers to Snipe Lake, Western Saskachewan, Canada, on a land excursion. Those who accompanied Busch from this vicinity were August Lau, Fred Ridder, Wm. Neuhring, Harry Sandry, Julius Priebe, Ray Christie, Fred Etchen, Frank Roths, Martin Jensen and Ceo. Albers. They expect to be gone about ten days on the trip.

Herman and John Hippen came last week from Centralia, Mo., for a visit with their brothers, Ulrich and Albert.

Emil Neuhring met with a rather sudden accident one day last week when he attempted to crank a tractor on the Julius Priebe farm. The thing back fired and the heavy crank walloped him across the face, breaking his nose, bruising his face and cutting a gash. "Spike's" natural beauty is marred for a few weeks until the marks left by the tractor crank have healed up.

Clint Mann and family and Howard Wiles drove to Boone last Friday for a few days' visit.

THE QUARTER CENTURY MARK

With this issue the Klemme Times launches forth on it's twenty-fifth year of newspaperdom.

We have been at the helm for over three years now and we might add that they have been successful years as well as years of joy in running the paper. The past two years have marked the fall of many old established newspapers in this state and other states, but the Times has weathered the storm and is stronger than ever. We have enlarged the plant in a great many ways, installed new machinery, type and labor saving devices to make the Times a better paper for Klemme. Our efforts have evidently been appreciated for we have added several hundred names to our subscription list since coming here in 1917. Our advertising has more than doubled since we took over the plant and our job prnting department has also made substantial increases, and it is with pleasure that we look over the records of the Times on its twenty-fifth anniversary.

We do not claim the success alone but give due credit to all our patrons for their liberal support and friendship toward the paper in the past. With the same good wishes we solicit their good friendship and patronage in the future that the Klemme Times shall be one of the strongest weeklies in the state.

R. A. Jorgenson,
Editor and Publisher

FIRST METHODIST EPISCOPAL CHURCH

A. H. Meyer, Pastor

Preaching service Sunday morning at 10 o'clock.

Sunday School at the close of the preaching service at 11 o'clock.

Union service in the country church Sunday night.

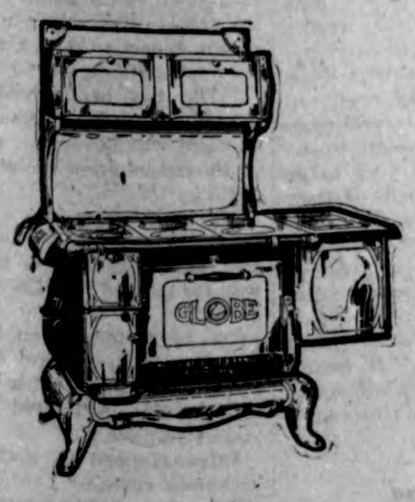
Midweek prayer meeting on each Thursday evening at 7:30.

All are invited to our services.

Fred Henschen has been hobbling around the last few days, being troubled with a very troublesome boil on his right knee. He is just about over it now and no doubt if you are in Minneapolis this week you will run onto him at the Minnesota State Fair.

To all lovers of well-cooked food

YOU who love food cooked thoroughly---like mother used to cook it--meats roasted to a delicious brown--wholesome, generous biscuits, crisp from the air after the heat of the oven--cookies, big toothsome cookies, baked through and through--and most of all, pies, juicy, flaky cherry pies that melt in your mouth and carry you back to the days of mother's tempting pantry--



¶ Everyone of you who love the better things from the kitchen--you will want a Supreme Globe, you must have one to prepare the meal you've been wishing for.

¶ The Supreme Globe will cook food in less time and with less fuel than any other range on the market. And it will cook it thoroughly--the oven is absolutely air-tight and heat is evenly distributed. Food is cook-every bit as thoroughly on the bottom and sides as it is on the top.

We carry a number of styles and sizes of ranges.

NOTE--We are selling these ranges at the old price as we bought early and before the raise and also the raise in freight--you get the benefit of this saving.

SIGNS SUFFRAGE PROCLAMATION

Women of United States Given Vote by Government Decree.

NO CEREMONY OR SETTING

Document Was Signed at Eight O'Clock in the Morning at Mr. Colby's Home—Secretary Sought to Avoid Friction.

Washington, Aug. 28.—The proclamation announcing officially that the suffrage amendment to the Constitution had been ratified was signed by Secretary Colby of the state department on Thursday.

The document was signed at 8 a. m. at Mr. Colby's home, when the certificate from Governor Roberts that the Tennessee legislature had ratified the amendment was received. Secretary Colby announced his action on his arrival at his office later.

The announcement disappointed a group of suffrage workers from headquarters of the National Woman's party who had gathered at the state department, hoping to be present when Mr. Colby attached his signature to the proclamation. Miss Alice Paul, chairman, was among the number.

Secretary Colby later sent word to the Woman's party headquarters that he would see the suffrage leaders at his office if they desired. Word was sent back that Miss Paul was preparing to leave for New York; that the other leaders already had returned to their homes and the invitation could not be accepted.

Secretary Colby had prepared a statement regarding ratification of the suffrage amendment, which he planned to read to the officials of the National Woman's party had they accepted the invitation.

When the secretary's invitation to return to his office was declined, another party of suffrage leaders appeared at the department. They were officals and members of the National American Woman Suffrage association.

The invitation to hear Mr. Colby's statement was promptly accepted by this group, and they filed into his office for the purpose.

Secretary Colby's statement follows:

"The certified record of the action of the legislature of the state of Tennessee on the suffrage amendment was received by mail this morning. Immediately on its receipt the record was brought to my house. This was in compliance with my directions and in accordance with numerous requests for prompt action.

"I thereupon signed the certificate required of the secretary of state this morning at eight o'clock in the presence of Mr. F. K. Nielsen, the solicitor of the state department, and Mr. Charles L. Cook, also of the state department. The seal of the United States has been duly affixed to the certificate and the suffrage amendment is now the nineteenth amendment of the Constitution.

"It was decided not to accompany the simple ministerial action on my part with any ceremony or setting. This secondary aspect of the subject has, regretfully, been the source of considerable contention as to who shall participate in it and who shall not.

"Inasmuch as I am not interested in the aftermath of any of the frictions or collisions which may have been developed in the long struggle for the ratification of the amendment, I contented myself with the performance in the simplest manner of the duties devolved upon me under the law.

"I congratulate the women of the country upon the successful culmination of their efforts, which have been sustained in the face of many discouragements, and which have now conducted them to the achievement of that great object. The day marks the opening of a great and new era in the political life of the nation.

"To the leaders of this great movement I tender my sincere congratulations. To everyone, from the president, who uttered the call to duty, whenever the cause seemed to falter, to the humblest worker in this great reform, the praise not only of this generation but of posterity will be freely given."

The proclamation recounts the process by which the new article 19 of the Constitution was presented and ratified, naming the ratifying states, and continues:

"Now, therefore, be it known that I, Bainbridge Colby, secretary of state of the United States, by virtue and in pursuance of section 205 of the revised statutes of the United States, do hereby certify that the amendment aforesaid has become valid to all intents and purposes as a part of the Constitution of the United States."

Russ Evacuate Vilna.

Paris, Aug. 28.—The Russian soviet forces have evacuated Vilna, Lithuania, and the railway station and public buildings there were occupied by Lithuanians, according to news reaching the French foreign office.

Illinois Miners Get Raise.

Chicago, Aug. 28.—Formal acceptance of a new increase of $1.50 a day to more than 40,000 Illinois coal miners was made by 16 men representing Illinois coal operators and officials of the workers' unions.

NEWS REVIEW OF CURRENT EVENTS

Defeat of Russian Armies in Poland One of the Greatest In History.

HUNDRED THOUSAND CAPTURED

America and Allies Warn Poles to Stop at Frontier—Britain to Recognize Egypt's Independence—Cox Accuses Republicans of Trying to "Buy" Presidency.

By EDWARD W. PICKARD.

The week closed with four of the five soviet Russian armies that attacked Poland practically destroyed or dispersed. The Reds, it was estimated, had lost nearly 100,000 prisoners and about 40,000 others had been killed. Many thousands had been forced across the German border, where they were disarmed and interned—or were supposed to be, if the Germans did their duty as neutrals. The Russian cavalry and infantry that escaped from the Polish pincers retired on Grodno and Ossowiec and such reserves as they had were brought up to the latter place. It was expected that the Reds would put up a desperate fight in the marsh country there to preserve contact with the East Prussia border and to keep the Poles from forming a junction with the Lithuanians.

The last real effort of the Red army of the north resulted in three days of fierce fighting in the Narew valley between Lomza and Ostrolenka, the Russians trying to force their way across the road to Bialystok. The Poles captured the river crossings, and next day another of their forces advanced along the Prussian frontier to Myszynies. The Reds were caught between these forces and had to surrender.

Of all the invaders of Poland, only General Budenny's forces, mostly cavalry, appear to have escaped. They were operating in Galicia toward Lemburg, and when the fate of the soviet adventure was certain they made a rush forward with the intention of destroying the great oil wells in that region. They reached the outskirts of Lemburg but were driven away by volunteers and a few regulars. As they retired they destroyed villages and crops and carried off all implements, furniture, clothing and animals.

Unbiased observers describe the defeat of the Reds as one of the greatest of military disasters and say the campaign that brought it about was of surpassing interest. They agree substantially concerning the utter rout of the soviet armies, but in this they are contradicted by such bolshevik leaders as have been heard from and by some Germans. These assert that the retreat of the Reds has been conducted in an orderly manner, that they saved most of their supply trains and that the number of casualties has been greatly exaggerated by the Poles.

If now the Poles can restrain their enthusiasm and ambition all may be well with them. They have been warned by the United States, France and probably Great Britain that they must not again attempt an invasion of Russian territory but must stop their advance at the ethnic border of Poland. If they disobey, the allies will withdraw their support. The French foreign office, while agreeing that the Poles must not try to seize any Russian territory, admits the exigencies of the campaign might make it necessary for them to cross the frontier temporarily.

The entente allies came into full accord concerning the Polish question last week, much to the surprise of Germany, and probably to its dismay. They really adopted the policy of France and it is supposed Lloyd George was brought to this view by the persistent attempts of the Reds against British rule in various regions and by some of the terms they tried to force on Poland. These latter were at variance with the terms which Kameneff said would be proposed and included the demand that a proletariat army be formed in Poland. Naturally the victorious Poles have rejected the terms of the Reds, and it was stated by Tchitcherin, soviet foreign minister, that this would result in the immediate rupture of the negotiations at Minsk.

General Wrangel, who had been rather quiet of late in the Crimean peninsula, started a vigorous campaign Thursday with his reorganized forces. One of his armies moved eastward onto the mainland, speedily taking the important Black sea port of Novorossiysk and other cities and almost reaching Ekaterinodar, capital of the Kuban Cossacks. At the same time another army occupied the Donetz coal basin 350 miles to the north. The loss of those mines will be an especially severe blow to the bolsheviki.

On the borders of the republic of Georgia, an alarming concentration of bolshevik forces is reported, supposedly in pursuit of a plan to march through Georgia and Armenia and establish communication with the Turkish Nationalists in Asia Minor.

The nationalist movement in Egypt, which has been more serious than censored dispatches made it appear, and which has been increasing ever since the establishment of the British protectorate during the war, seems about to meet with success. The British government, it is reliably though not officially reported, has agreed to recognize the independence of Egypt and a final treaty and alliance will soon be negotiated. Fundamental points in the agreement, it is said, are: Egypt will recognize Great Britain's privileged position in the valley of the Nile, and agrees in case of war to afford every facility for access to Egyptian territory; Great Britain will maintain a garrison in Egypt in the canal zone; Egypt regains control of foreign relations, subject to her not making treaties contrary to British policy, and will have the right to maintain diplomatic representatives abroad.

The Albanians and Serbs, who are fighting a little war of their own, have been having some bloody battles and the Albanians claim to have driven their foes back into their own country. The victors halted, at least temporarily, at the demarcation line fixed in 1913.

Two deposed rulers of Europe are figuring on climbing back onto thrones. Constantine, former king of Greece, believes that the Greeks will call him back if they have full freedom of expression at the coming elections, but he fears Venizelos will prevent this. He was deeply grieved the other day because Lloyd George, on vacation in Lucerne, refused to see him. The premier gave as a reason "the dastardly attempt on the life of Venizelos," for which Constantine asserts he was in no way to blame.

The other hopeful ex-ruler is Charles, former emperor of Austria. According to a report circulated in European capitals, the Hungarian people want him to be their king, and Great Britain and France have agreed to permit it. Italy and Serbia object, but it is thought the Vatican can persuade the former. Charles has said he would accept the throne of Hungary.

Lloyd George departed for his Swiss holiday in the expectation that the Irish question would await his return. But Irish leaders would not stand for the delay. On Wednesday the standing committee of the Irish peace conference called on the lords justices, representatives of the lord-lieutenant, to present resolutions demanding dominion home rule, stoppage of coercion and the calling of an Irish convention. They also telegraphed the premier asking that he receive a deputation immediately, in view of the urgency of the situation.

This peace conference was an assemblage of some 700 representatives of moderate opinion in all parts of Ireland, and in all parties. Most of them were unionists, and among the conferees were members of the house of lords, Protestant bishops, Catholic priests, prominent business men, and great land owners. The earl of Shaftesbury, who owns the land on which Belfast was built, was unexpectedly present, and told the gathering: "I am an Ulsterman, and I'll stand by Ulster, but I am with you in toto. Have patience with Ulster and we'll bring her to the point of self-government as a part of united Ireland." Other Belfast leaders said much the same. It was believed this conference was a long step toward Irish unity and the settlement of the island's troubles.

Meantime Terrence MacSweney, lord mayor of Cork, was dying of self-imposed hunger in a British prison, and Irishmen appealed to King George to save him, and to President Wilson and the heads of all European states, comparing his case to that of the burgomaster of Brussels whom the Germans imprisoned. Mr. Lloyd George said that, whatever the consequences, the government could not take the responsibility of freeing MacSweney. The Sinn Fein leaders feared his death would lead to an outbreak that would play into the hands of the British.

Efforts of the anti-suffragists to prevent or delay the promulgation of the ratification of the suffrage amendment were foiled, and on Thursday Secretary of State Colby, receiving official notification of the action of the Tennessee legislature, signed and issued the proclamation. The District of Columbia refused to issue a restraining order to Secretary Colby, so now the only hope remaining of the foes of suffrage is that the United States Supreme court will declare the Tennessee ratification illegal.

It is interesting to read the opinion of the venerable Cardinal Gibbons, who has been a consistent opponent of woman suffrage. He says:

"I regret very much that the women have taken the plunge into the deep. I would much prefer that things had remained as they were. I am, however, of the opinion that after the first election or so only a small percentage of the women of the country will avail themselves of the privilege of voting."

Governor Cox roused the Republicans by asserting that they are raising a minimum fund of $15,000,000 for the campaign. National Chairman Will Hays and his associates at once denied the truth of the statement and both they and the Democratic leaders demanded that the senate committee on campaign expenditures investigate the charge. The committee, which is in session in Chicago subpoenaed National Chairmen Hays and White and Congressional Chairmen Fess and Doremus, and "invited" Governor Cox also to appear before it and present such evidence as he might have to substantiate his statements. The Democratic candidate said he would furnish what information he had in due time, and meanwhile he went ahead with his speaking tour, repeating his accusations. When he reached Pittsburgh, Thursday night, he opened up and made public the alleged facts upon which he based his charge that the Republicans are trying to "buy the presidency."

The "expose" really was not so sensational as might have been expected. Cox read a list of 51 cities and the amount which the Republican national committee proposed to raise in each, the total being $8,145,000. This figure, he asserted, had nothing to do with "the large amounts being collected in hundreds of smaller cities, towns and rural communities." He gave no names of contributors, saying the Republicans could produce those. The governor also read documents which he said proved that Senator Harding had detailed knowledge of the financing of his campaign.

Republican Treasurer Upham, who had previously told something of the quota list, says the quotas are vastly larger than the actual amount called for by the budget, and asserted that the national committee had collected, to date, only $696,977.82.

A rather weak come-back was the charge made by Congressman Fred Britten, that the British parliament had appropriated $87,500 in favor of the British ambassador at Washington for "entertainment purposes," and that this fund had already found its way to the Democratic national committee. This was, of course, denounced as absurd by both Ambassador Geddes and Democratic Chairman White. Governor Cox said the charge was "too silly for words."

Home Town Helps

DIVIDENDS FROM THE GARDEN

Showing Made This Year Should Make All Resolve to Have Their Own, If Possible.

Home gardens are declaring dividends, regular, extra and midsummer specials all being included in the distribution. These profits have been coming to the home gardener from the time the first lettuce, the first radish, the first green onion was ready for the table. The variety of dividends is limited only by the wisdom of the man who planted the garden. The earlier dividends are accompanied now by others more seasonable, the entire distribution increasing the pleasures of those who taste and enjoy.

The man who prepared the garden plot, who made the soil ready, who laid it out, planted the seed, put out the plants and gave care and thought and attention each day, has already had his investment back in greater health, to say nothing of the pleasures that have been his in helping and studying the productive forces of nature. Now he gets the special dividends in delicious table offerings, everything tasting better because of the toil and thought he gave it. And he can laugh and grow merry over some high prices quoted, because the little back-yard garden spot, to which he gave time and toil, has helped him solve the high cost of living in part. What is there that pays so much for the work as the back-yard garden?—Ohio State Journal.

BEAUTIFY THE WASTE SPOTS

Unsightly Places May Be Given an Attractive Appearance If Paid a Little Attention.

Borders in the garden and yard are like frames that lend beauty to the picture. In many gardens and lawns there seems to be no space that can be spared for flowers, yet there are walks of cement, brick or cinders, waste spaces along the alley, or around small buildings which if bordered with some flowers would change the entire appearance of the place.

China astors, old fashioned pinks, English daisies, forget-me-nots, sweet alyssum, candy tuft, and verbenas are good varieties for almost any soil or climate. In places where a taller border would bring out the picture, use sweet William. Oriental poppies, or the stately hollyhock. Then find a high place for a bird house, or plant some shrubs for nest places.

The true home picture is lacking without the birds and flowers. —The Thrift Magazine.

Town and Country.

I wonder when ambitious cities will learn that it is a dangerous business to be everlastingly campaigning for a greater population. Nearly every town and city in the United States had one slogan, "More population in 1920." This has been going on for the last fifty years until we see our farm population decreased to the danger point. The 1920 census will show five million less people living on the farms in this country now than there were in 1910. It will show an increase of population for the nation of twenty millions. This means twenty-five million more people in the towns and cities and five million less people to feed them. Unless these city folks can find a substitute for bread, meat and potatoes, something serious is going to happen.—John A. Simpson, Farmer.

The Small Towns.

It has been figured up that there are about 12,000 small towns in the United States, half of them with populations of 500 or less. It is these small towns that the rural people are intimately associated with. They sell their produce there, buy the things they need; in fact, these are a part of the rural community. Some of these small towns will become cities, but a very large per cent of them will remain as they are. It is no disgrace to live in a small town, but the rule is that these people are waiting until next year, or some future year to improve their schools, put in sidewalks, a water system, or a sewer system to safeguard the health of the people, or before taking any steps to improve the social and living conditions of the children.—The Thrift Magazine.

Billboards Indicted.

Not alone because they are a blot on the landscape, boardings are considered an evil in more tangible ways. When they are not strongly supported there is always danger of their falling over in storms. Unless they are of fireproof material they are easily inflammable and often serve to carry fire from one building to another. If the boards are not raised several feet from the ground the space back of them almost invariably becomes a dump for refuse and a convenient place for criminals to hide.

Signboards nearly always shut out sunlight and air. To prevent this as much as possible, some cities limit the height and width of the board. The importance of breathing space around a building is recognized by a number of millionaires.

BYRON

By LOUISE M. ADDELSON.

(©, 1920, by McClure Newspaper Syndicate.)

Elinor Worth, rushing downstairs in answer to the furiously ringing door bell, found her chum and next-door neighbor, Alice Gloring, in a wild state of excitement.

"He's coming!" panted Alice, thrusting a slip of yellow paper into Elinor's hands.

"Byron?" breathed Elinor, quite awed.

"Byron! Isn't it wonderful? Elinor, you'll just adore him. If I were not engaged myself I'd—he's such a dear."

Elinor did not doubt it. For two years she had heard praises of Alice's wonderful cousin. For two years she had listened to the recital of his manly perfections, the tales of his heroic deeds; of his kindness, his generosity, his good looks, until in her youthful imagination he had become a god. Even his name appealed to her romantic fancy. A man named Byron, she felt, could never be commonplace.

"We'll introduce you tomorrow after church," promised Alice.

And, as her friend had predicted, the following day being Sunday, Elinor was introduced after church. Mrs. Gloring performed the ceremony with a little flutter of pleasure. She was fond of Elinor, and matchmaking was her hobby.

"My nephew, Byron, dear Elinor, just returned from service. Byron, darling, Alice's best friend, Miss Worth."

Elinor lifted her eyes. She tried to say something pleasing and polite, but her tongue refused to obey her. Something was wrong with the world. The sunshine became hateful, the songs of the birds a mocking chorus. For Byron, the Byron of her imagination, the poetic creature of her maiden fancies, had taken unto himself wings and fled; and in his place stood an odious long-limbed, quite un-Byronic creature with sandy hair, light blue eyes, a wide mouth and a nondescript nose.

"Isn't he just too sweet?" murmured Alice in Elinor's ear.

Elinor flushed, not so much at Alice's words as at the sudden twinkle in Byron's eyes.

The days wore on. Elinor survived the shock she had received. She met Byron frequently and even learned to like him. That gay twinkle in his eye seemed to relieve his plainness. But she felt that Fate had played a cruel joke on her, nevertheless, and that she would not be the same again. The real Byron could never attain a truly Byronic place in her imagination. But he had been in service and it was his duty to be kind to him, so she helped Alice entertain him. She walked with him, talked with him, drove with him and felt herself very magnanimous in doing it.

A few weeks after his arrival a French army officer came to see Byron. The girls were curious as to the object of his visit, for Byron foretold nothing, merely smiling with that exasperating twinkle in his eyes. And the surprise of the ladies was great when the young Frenchman pinned a medal on Byron's chest as a mark of favor from the French government for unparalleled bravery and fortitude on the field of battle and for chivalry and kindness to French widows and orphans.

That night, when Byron invited Elinor out for a walk, she was strangely shy. It had come over her suddenly that Byron was a personage.

"Elinor," said he, after they had walked a few minutes in silence, "do you think you could like me a little though I am not all that you had hoped for?"

"All I—hoped for?" stammered Elinor.

"Yes. You see, I know my aunt and Alice have a way of raving over people, and I could tell they'd given you a wrong impression of me. Also, my name has been a stumbling block all my life. I don't know what my parents had against me when they named me Byron. It isn't so bad with men, but girls have had a habit of judging you by name. Confess, now, didn't you rather expect to meet a shaggy-haired poet, instead of a plain John Jones?"

"Who has been decorated by the French government," said Elinor, softly, "and who never said a word about it, though he knew the decoration was coming!"

"Oh, as for that—"

"As for that," said Elinor, "I realize that poets could never have won the war for us, and that I'm a very foolish person."

"If you'll forgive my being un-Byronic," said Byron, with his humorous twinkle, "I'll forgive your being foolish. In fact, I'm pretty well pleased with you as you are."

Elinor stopped and made him an old-fashioned curtsy.

"The sentiment's mutual," she said.

Which pleased the un-Byronic Byron very much.

Land Clearing Shown in Pictures.

Movies of the first land clearing school ever held in the United States, that conducted by the Marinette county (Wis.) Land Clearing association, and the University of Wisconsin last spring at Cedarville, in Marinette county, are now being shown by Secretary Livingstone of the association. These pictures were taken to supplement the education in land-clearing movies lent to the association by the university. They show actual farmers actually performing the operations directed by the best practice of land clearing.

The Man Nobody Knew

(Copyright by Dodd, Mead & Co., Inc.)

By HOLWORTHY HALL

"HAVE I A CHANCE?"

Synopsis.—Dick Morgan of Syracuse, N. Y., a failure in life, enlists in the Foreign Legion of the French army under the name of Henry Hilliard, is disfigured by shrapnel. The French surgeons ask for a photograph to guide them in restoring his face. In his rage against life he offers in derision a picture postcard bearing the radiant face of Christ. The surgeons do a good job. On his way back to America he meets Martin Harmon, a New York broker. The result is that Morgan, under the name of Hilliard, goes back to Syracuse to sell a mining stock. He is determined to make good. He tells people of the death of Morgan. He finds in Angela Cullen a loyal defender of Dick Morgan. He meets Carol Durant, who had refused to marry him. She does not hesitate to tell him that she had loved Morgan. Hilliard finds he still loves her and is tempted to confess. Hilliard tempts Cullen, his former employer, with his mining scheme. He discovers a rival for Carol's love in a nice young fellow named Armstrong.

CHAPTER VIII.

—9—

For thirty days Hilliard had listened to eulogies of his secret self. He had heard from a hundred sources the fond belief repeated, that Dicky Morgan given time and counsel, would have made the city as proud of him for his intrinsic worth as it now was proud of him for his military valor. The praise of Dicky Morgan had at first stunned Hilliard; after that, it had exalted him; still later, it had tortured his soul. He had longed, restlessly, during that third period of his introspection, to take the city into his heart, to reveal himself, to answer for Dicky Morgan's failures and pledge himself anew to the achievement which Dicky Morgan's friends had prophesied; and then he had been overwhelmed by the recollection that he had made this course impossible. If he had only known that all his decisions were needless! If he had only known that Dicky Morgan could come home, and been forgiven! What anguish he could have saved—what repentance! And the problem was still the same—should he continue, safe in his masquerade, to the goal he had set for himself, or should he risk the worst, and salve his conscience by renunciation?

By far the most distressing factor in the puzzle was his relationship to Carol Durant. He had seen her only half a dozen times during the month, and never alone—the fates or Armstrong had circumvented him—but he was head over heels in love with her again, he sensed, from fugitive glances and a stray word or two on her part, that she wasn't entirely averse to him. And what would Carol think if she knew that this grave and tender stranger was hiding behind the wraith of Dicky Morgan—it was a thousand times the worse! If she were ever to be in love with Henry Hilliard, it was impossible!

And then there was little Angela Cullen—

And in addition, there was the serious business of making good; he was no longer impelled to it by resentment, but rather by unadulterated ambition; and too, he would see destroyed by one admission of his deceit. To confess in the game was to lose his prob- ... to relinquish it was to lose all ... and even now, his joy and pride ... contained in precisely those things ... he must give up, if he decided ... tear off the mask of hypocrisy; and ... self-respect was rising out of the ... of what he never should have ... at all.

When he thought of his worldly ambitions, he was profoundly regretful that he had talked professionally with Cullen. To be sure, the matter had come up casually and naturally, and the opening had seemed too good to be missed; at the same time, Hilliard couldn't help reflecting that it had been premature. It might prove, actually, to have been just the proper course to produce results; it might mean that Cullen would become so impatient that he couldn't be restrained, and would leap without looking, and further than he intended, and yet, ... since that preliminary interview, Hilliard had known that he had made ... reach in his own fortresses; that ... had rendered it possible for an in... (and logical enough) investi... on to begin, or for mild suspicion ... arise and gain momentum before ... had devised the means of combating ... And although Hilliard believed ... implicitly in the goods he had to sell, ... knew the difficulty of the market; ... knew how timorous is the average ... investor; and he knew that there ... might very easily come a time at which ... harangue would be remembered, ... remembered adversely.

... this connection he was irritat... by the tone of Harmon's letters to ... from New York. Harmon was en... sanguine, and confident; he was re... sturdily on Hilliard to break ... through the acumen of the up-state ... capitalists; but he thought that Hilliard was making haste too slowly; he ... that all Hilliard needed to do ... to devote himself to a hard on-slaught against Mr. Cullen, and, after that, to gather subscribers where he chose. He said that Hilliard was wasting time, and ought to begin to collect signatures. Hilliard had mentioned, in a moment of indiscretion, the assistance which Angela had unconsciously given him, and Harmon had appraised it highly; but it angered him, when he saw this reference written down in Harmon's letter, to have her name brought into the instructions, even by implication. Still . . . had he not invited this upon himself?

It was in a dizzying quandary, then, that Hilliard kept his next appointment at the Durants'. The problem had grown so many branches, sent forth so many tentacles of bewildering confusion, that he hardly knew what to say, where to turn. His one consolation was that the miracle which had been performed upon him had given him a mask of impenetrable calm. At least, he didn't have to wear his forebodings on his countenance.

And yet, almost the first words Carol said to him were: "Something's troubling you, Mr. Hilliard."

He was momentarily demoralized, and came near showing it—tried to pass it off with a laugh.

"Did I make it as plain as all that?"

"No," she said, "it wasn't plain at all."

His laugh was remarkably hollow, but he persisted in it.

"Why, how did you think of it, then?"

"Just from your eyes," she told him. "What's the matter? Anything I could help straighten out for you? Or couldn't I listen? That helps a lot, sometimes—" She dropped her eyes, and the color deepened in her cheeks.

"Isn't there anything I can do?" she said. "Or.... that father could? You frighten me. . . ."

"I'm sorry. . . . No, please don't think of it. I ought to be shot if I've made you unhappy."

The bitterness in his voice was acute; and by paradox, it was caused mainly by her sweet concern for him, and his realization of how little he deserved it.

"You always seem to be pushing the world away from you," she said, after a pause. "Why do you, Mr. Hilliard?"

"I didn't know that I do," he said dispiritedly. "And it would be a queer thing for me to do deliberately, when I want your friendship more than anything else I can possibly imagine—wouldn't it?"

"But a woman," said Carol slowly, "almost always has to be a confidante before she becomes a friend. . . ."

They sat without stirring while the clock ticked off a dozen seconds. Hilliard, scarcely knowing what he did—and, if he knew, indifferent—had put both hands to his forehead, as though to calm the vicious throbbing within.

Presently, and so quietly that he never heard her, Carol was gone—she had slipped across the room, to the piano. . . .

A breath of music, light, dreamy, caressing. . . .

And there, on the sofa where Dicky Morgan had sat, and smoked, and taken his happiness with the utmost nonchalance, sat Hilliard, in tensest

"Something's Troubling You."

desperation of soul, strained to the tenuous melody which floated across to him, an echo of youth and gladness which mocked him, derided him, indicted him . . . a translation of the unutterable sadness which welled up in his throat and choked him. . . . She was playing the "Liebestraum."

His shoulders went up convulsively, and he was chilled to the heart. Liebestraum! It was a taunt, a savage cynicism, a challenge to his inward self. The waves of it battered his unresisting conscience; the piercing tenderness of it damned him, while it awoke his dormant passion, and set his will to vibrating. Liebestraum—and the dream of his love was a phantasm which his brain reeled to contemplate! The lump in his throat came near to strangling him.

It seemed to Hilliard that hours must have elapsed before he had the strength to rise, and cross the room. His brain was buffeted by wildly giddy passions; he was only partly aware that Carol, trying to rise from the bench, was wide-eyed and intuitive apprehension. Volition had gone from him; he was acting without reserve, without premeditation.

"Tell me!" he said thickly. "Have I got a chance? One in a hundred? One in a thousand? But a chance?"

"Oh! . . . Mr. Hilliard!" Her plea was to his chivalry, and had to be.

"Tell me . . . would I have . . . if I should share everything you—"

One hand was pressed close to her breast; the other was outstretched, defensive.

"Don't! Don't! Don't spoil what was—"

"You'll have to answer me. . . . I can't wait any longer. I'm not worth your little finger and I know it. . . . but I want a chance . . . just a fighting chance . . . . you've got to answer me, Carol . . ."

She was trembling within reach of him, but it never occurred to him to touch her, and if it had, he would have refrained, out of sheer consciousness of his lack of right. His face, working tragically, awed her.

"Yes," she said, hardly above a whisper. "There's . . . one chance in a thousand. There's . . . that much, anyway."

His arms went out to her—stayed—dropped. He stepped backward, out of the danger zone.

"Then I'll take it," he said.

* * * * * * *

She had given him a chance, on an implied condition which he could never meet. She had given him a chance—and what in the name of heaven could he do with it?

CHAPTER IX.

From the marbled dignity of the Trust and Deposit company, where he had bought a New York draft for fifteen thousand dollars, and smaller ones for ten and seven, Hilliard emerged presently to South Warren street, and stood there on the sidewalk for a moment, numbed by the first galvanizing consciousness of success.

He had come back resolved to win, in his second trial, the position he had failed to approximate in his first; he had set himself a commercial standard, and, gauged by it, he was advancing rapidly, for today's trio of subscriptions, added to Mr. Cullen's check of yesterday (and Mr. Cullen had acted as though he had gained a personal victory in persuading Hilliard to accept it), made up a glittering total, a stupendous total; and already Hilliard's earned commissions formed a sum to gloat about. Despised as a salesman, he had sold to four impartial business men the commodity hardest in all the world to sell. Scorned for his behavior, he had made his sales on the basis of a character which hadn't been questioned since the day of his arrival. His mind and his muscles demanded action; to relieve the pressure of his spirits, he set off vigorously, swinging exultant.

On impulse, he crossed the street for the purpose of patronizing a florist's, where, ignoring the conventional measure of the even dozen, he ordered a prodigal armful of American Beauties for Carol Durant. This done, and feeling very rich and independent, he rounded the righthand corner, and got himself greeted by two citizens of standing and importance who, in hailing him, displayed a deference not ordinarily granted to the average resident of Hilliard's age. Would Hilliard condescend to speak at the next meeting and dinner of the Chamber of Commerce on France in wartime? Hilliard would. And this indication of his new-won status fired him afresh.

Logically enough, his swirling thoughts followed a well-worn trail which led him straight to Carol; and for the thousandth time he tried to set a future date, depending on the outcome of his mission here, at which he could confess, and ask forgiveness for his mummery, and simultaneously ask credit for his regeneration.

At this juncture, he was aware that some one had arrested him. It was Angela's youthful suitor.

"Oh—hello, Waring!" said Hilliard cheerfully. "How's crime?"

The student of law flushed at the lively salutation, which appealed to him as a reflection upon the majesty of the bar. Also, his sense of humor was temporarily atrophied.

"We don't handle criminal cases," he responded shortly. "Say, when can you and I have a conference together, Mr. Hilliard?"

"Why, the sooner the quicker," laughed Hilliard. "What's it about?"

Waring coughed. "Business."

"The time to talk about business is all the time—isn't it?"

Waring hesitated and finally stepped into the shelter of a doorway, drawing Hilliard with him.

"I don't suppose it'll seem like a very important thing to you," he said, rather awkwardly, "but it's important enough to me, Mr. Hilliard, to be worth taking time over—to be perfectly frank with you, I've got five hundred dollars I want to put in some high-class, gilt-edged speculation. Mr. Cullen gave me some pointers, and now I'm interested in your copper mine. Only—and this is where the hitch comes in—I've sort of got into the swing of the law, you know, and that makes men—well, what you might call judgmatical. You get so you want to look at everything from all four sides. And I thought maybe because of the—the attending circumstances—you'd be kind enough to explain the whole thing to me. Would you?"

Hilliard, who didn't know whether to be touched or amused, compromised by nodding gravely.

"There's one thing I'll have to tell you, though," he said; "I don't advise any one to gamble in copper mines, or anything else, Waring, unless that person could actually afford to lose his whole investment, and not be hurt.

"You Don't Mean to Say It Isn't a Sure Thing!"

And in this particular case, since I happen to control the situation, I won't permit it. Does that hit you, or doesn't it?"

The young man's mouth opened in amazement. He had been priming himself to be a clever investigator, and to pick yawning flaws in Hilliard's underwriting, and here his thunder was stolen before he had had a chance to stake the aegis of his cleverness.

"Why—it isn't a gamble, is it? I understood—Mr. Cullen said—"

"It's safer to figure it as a gamble, Waring. It's safe to figure all these things that way. Of course, we think it's a wonderful prospect, and a practically positive success, but I don't mind telling you that so far I haven't allowed a man who couldn't afford to lose his whole subscription—and didn't understand very clearly that he might—to come in for so much as a plugged nickel. And that would apply to you, too."

The law student gasped, incredulous.

"You don't mean to say it isn't a sure thing?"

"Is any speculation? You see I'm not working very hard to take your five hundred away from you, Waring."

The boy scowled.

"I suppose it's really too small for you to bother with. Is that what you're driving at?"

Hilliard smiled cordially.

"It is, and it isn't. From any one I didn't know, I'd rather not touch it. It isn't a good plan, ordinarily, to have a lot of small stockholders. But from you—and if it isn't more than you ought to risk—"

Waring snatched at the straw.

"Well, seeing you're who you are, and I'm who I am, would you be willing to give me just as much information as you would if I had twenty times as much to put in?"

"Come up to the room," said Hilliard impulsively; and he was actuated solely by the obligation he felt toward all of Mr. Cullen's friends. "You come along up to the room, and I'll show you everything I've got. Will that do?"

At the last words the amateur detective had brightened.

"I can't come now very well. But maybe I could run up this evening, if that's all right for you."

"That'll be just as good. Eight o'clock? Fine." He held out his hand. Waring took it limply.

"I'm afraid I'm causing you a lot of bother," he said, "but it's a pretty big thing for me. . . . I hope you don't think it's anything personal . . . I mean my not just taking it for granted—"

"Not at all. Business is business. I'll expect you at eight, then." Hilliard nodded good-humoredly and went on north. A quaint intuition overcame him, and he glanced back over his shoulder. Fifty yards away the law-student was also glancing over his shoulder, and Waring, having less of self-possession than the adventurer, blushed and jerked his head to the front; Hilliard chuckled and continued his stroll.

He entered the Hotel Onondaga from the east and headed across toward the news-stand. Out of a red and gold chair in the spacious lobby a gentleman rose to meet him—a gentleman who in appearance was a very fair replica of the well-known Get-Rich-Quick Wallingford, except that he was somewhat more refined and less obese. His animation was obvious, but he delayed to remove both his gray suede gloves before he offered to shake hands with Hilliard.

"Well!" said Martin Harmon, effusively, "you're looking great! Must agree with you up here, what? Didn't expect me, did you?"

"No!" Hilliard's expression was a study; he had dealt so long with Harmon at a distance that he had almost forgotten what the broker looked like. "Why didn't you wire me you were coming?"

"Didn't know it myself until pretty near train-time—spur of the moment. Well, got any business yet?"

Involuntarily, Hilliard smiled, and the smile spread wonderfully, until Harmon caught the contagion of it and beamed more royally than ever. "The man you called the 'decoy duck'—remember when you wrote that to me?—well, he quacked yesterday."

Harmon put his hand on Hilliard's shoulder; it was an accolade.

"Really? How much?"

"Thirty." For the life of him Hilliard couldn't resist a slight forward thrust of his chest.

Mr. Harmon's eyes glazed for an instant.

"Good—good! That's clever work, son! Clever and quick. But I knew you'd do it. Thirty! That's fine! Anybody else?"

Hilliard laughed exultantly.

"Yes, three more—a total of sixty-two. I mailed you a draft yesterday morning; the others are in my pocket now. I've just come from the bank."

"Great work, son!" Mr. Harmon breathed rapturously. "That puts us pretty nearly where we belong. Sixty-two thousand! It's a running start for the big race! You certainly didn't get left at the post, Hilliard! Deducted your commissions yet?"

"No; I thought you'd rather do the bookkeeping in your own office and send me a check."

Harmon's approval was manifest.

"You show me the drafts and I'll write you a check this minute. Let's go sit down in the grill, and have something. This is fine work, now I want to tell you!"

"I rather thought so myself." Hilliard had led the way to the grill and commandeered a side-table. "In fact—" He lowered his voice. "In fact, as things have worked out, Mr. Harmon, I almost wish I hadn't tried to play it just this way. I mean—"

But Harmon had already grasped the point.

"Oho! Is that so? You must have made a hit. And all your old friends you were so het up about—weren't they as peevish at you as you thought?"

"No." Hilliard grew warm. "I'd give a good deal," he said soberly, "if I hadn't tangled myself up in all that imitation history. Well, I'm in for it now. I've published so much that I didn't need to—I'm wondering how in thunder I can ever get out of it when the time comes. That was the idea, you remember—coals of fire. What's bothering me is that there's nobody to tend the furnace."

"But I thought you were so anxious to keep in the shade?"

"Yes, but I didn't need to crawl in a hole, and pull it in after me! Well, we'll wait and see. After I've gone a little further—and of course, you know I've hardly scratched the surface yet—"

"I know you haven't." The big man tucked his gloves into his breast pocket and brought out a silver cigarette case. "Have one?"

"A piece of d——d worthless property."

(TO BE CONTINUED.)

Post Office Nerves.

According to the testimony of some hospital authorities, "post office nerves" are due partly to the frequent changes from day to night duty, with consequent irregularities of meals and sleep, partly to the changes of work whereby the same clerk may be standing all day for another, with diverse occupations, each needing special knowledge. Hence, in the opinion of some medical men, mechanical routine is less wearing than frequent change. Is it so?

Educate Hotel Employees.

Arithmetic, bookkeeping, geography, hotel legislation, commercial correspondence, stenography, typewriting, ironing, cooking, linen mending, sewing and washing are some of the subjects taken at the school for women hotel employees in Besancon, France, which is releasing each week 10 women ready to fill positions in hotels ranging from cashier to chambermaid.

All Tired Out?

Are you burdened with a dull, nagging backache? Does any little exertion wear you out? Does it seem sometimes as if you just can't keep going? Modern life with its hurry and worry, and lack of rest, throws a heavy strain on the kidneys. The kidneys slow up and that tired feeling and constant backache are but natural results. Use *Doan's Kidney Pills*. *Doan's* have helped thousands. They should help you. Ask your neighbor!

An Iowa Case

Mrs. A. D. Pruitt, Walnut Ave., Ames, Ia., says: "My kidneys were out of order. My back ached with a slow, dull aching pain and it was hard to do my housework. My kidneys acted frequently and mornings I felt tired and dull. I used Doan's Kidney Pills and they benefited me so I haven't been bothered of late years."

GOLD MEDAL HAARLEM OIL CAPSULES

The world's standard remedy for kidney, liver, bladder and uric acid troubles. Holland's national remedy since 1696. All druggists, three sizes. Guaranteed. Look for the name Gold Medal on every box and accept no imitation

A Man and His Company.

"Several people have told me they had made election bets which would not allow them to shave until I have been elected sheriff," remarked the confident candidate.

"Well," commented Senator Sorghum, "if you want to know my candid opinion, a man with that kind of a constituency doesn't deserve to be elected."

SAY "DIAMOND DYES"

Don't streak or ruin your material in a poor dye. Insist on "Diamond Dyes." Easy directions in package.

"CORNS"

Lift Right Off Without Pain

Doesn't hurt a bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers. Truly!

Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the calluses, without soreness or irritation.

An Opinion.

"I think this trial marriage idea is just horrid."

"Oh, they have been working out so-so for a long while."

"Nothing of the sort! It is a new idea."

"Old as the hills. Do you mean to say that every marrige isn't a trial—to one of 'em, anyway?"

Cuticura Soap for the Complexion.

Nothing better than Cuticura Soap daily and Ointment now and then as needed to make the complexion clear, scalp clean and hands soft and white. Add to this the fascinating, fragrant Cuticura Talcum and you have the Cuticura Toilet Trio.—Adv.

Painful Operation.

"Did you hear our old friend Bill has been superseded?" "Poor old Bill! Did they give him an anesthetic?"

The Reckoning.

It is hard to convince the defeated candidate that it is better to have run and lost than never to have run at all after he has balanced his bankbook.—Yonkers Statesman.

Sure Relief

PARADISE FOR THE INDOLENT

Stress of Modern Life Unknown Among the Inhabitants of the Marquesas Islands.

Persons possessing $1,000 who like the indolent life of the tropics where winter is unknown can spend the remainder of their lives in the Marquesas islands in the Pacific ocean, where they need only work two hours a day to catch fish and pick bananas and spend the remainder of the day watching the skyblue sea wash lazily over the golden sands.

The money would be required to pay a second-class passage from one of the Pacific coast ports, with outfit, and the balance to purchase fertile land at $2 an acre.

The Marquesas are situated in 8 to 11 south latitude and 140 west longitude and are of volcanic origin and mountainous. They are under the French republic and the commissioner lives at Vaiohai, the chief town, which is on the island of Nukawa. There were 5,000 inhabitants in the islands when the census was taken in 1900, but the natives, who are Christians, have dwindled away since then. There are 1,500 square miles in the thirteen islands, which compose the Marquesas group. The chief products are tropical fruit, copra and mother of pearl. The landing is difficult, as the shore goes up like a wall from the sea.

Passengers arriving from the Pacific say that the climate of the Marquesas is ideal and that life there is one long lazy dream, with no disturbing element beyond the silver-tongued notes of the bulbul at sunset from its lofty perch on the ancient baobabs by the seashore.—New York Times.

RELIC OF MEDIEVAL TIMES

Sacred City of Mongolia Has But a Thin Veneer of the Civilization of Today.

Urga, sacred city of the Living Buddha, lying far to the north of Mongolia, is a relic of medieval times overlaid with a veneer of twentieth century civilization, and is a city of violent contrasts and glaring anachronisms. It was used as a base of supplies by Roy Chapman Andrews, leader of the second Asiatic zoological expedition of the American Museum of Natural History.

Motor cars pass camel caravans fresh from the Gobi desert; holy lamas in bright robes walk side by side with black-gowned priests and swarthy Mongol women in the fantastic headdress of their race stare wonderingly at the latest fashions of their Russian sisters, relates a correspondent of the Detroit News. Three great races have met in Urga, and each carries on its own customs and way of life. The Mongol's felt-covered home has remained unchanged; the Chinese shop with its wooden counter and blue-gowned inmates is still pure Chinese, and the ornate cottages proclaim themselves to be Russian.

Men from all races and corners of the earth gamble together. All Mongolia lives on horseback, and a Mongol will never walk even a hundred yards if he can help it. Summer in Mongolia is short at best, and in the winter the temperature drops to 50 and 60 degrees below zero, and the great plateau is swept by biting winds from the Siberian steppes.

Boiling Cracked Eggs.

Cracked eggs can be boiled safely by placing a little vinegar in their water.

Local News!

ED. G. ELL

FARM WOODLAND YIELDS PROFIT

Firewood, Fence Posts and Material for Repair and Building Always at Hand.

ALSO AFFORDS PROTECTION

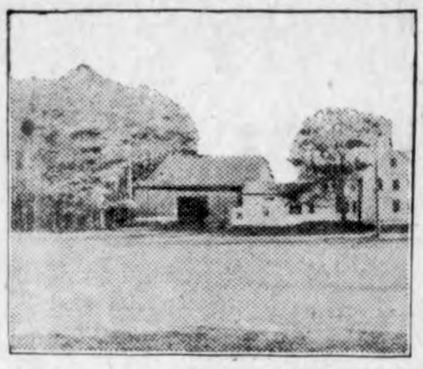
Trees Should Be Located on Ground Too Poor for Cultivation—Valuable Timber May Be Produced With Little Care.

A well-cared-for "home" forest will make the farm more prosperous, add to the comfort of the farm home, and enhance the value of the farm as an investment, says a new publication, "Forestry and the Farm Income," issued by the Forest Service, United States department of agriculture. Farm forestry, properly practiced supplies timber for farm needs, enables the owner to market surplus timber profitably, furnishes employment for men and team in winter, makes waste land yield a profit, and increases the sale value of the farm. Even if a farmer sells no timber, the woodland pays, says the bulletin. The time and money saved by having firewood, fence posts, and material for repair and construction conveniently at hand, and the protection afforded the crops, farm buildings, and stock are worth considerably more than the slight trouble and expense of raising and caring for the trees.

Need Not Occupy Productive Land.

Farm woodland need not occupy land that will grow other crops, it is pointed out. On the contrary, the trees should be located on ground too poor to cultivate. A little care given in the winter or at other times when the farm work is slack will make such land produce valuable timber. If fully stocked with trees and well cared for, an acre of hardwoods should grow from one-half to one cord of wood yearly, while pine should produce from one to two cords.

The prime essential for success in farm forestry, the bulletin states, is adequate protection against fires. Forest fires kill the little trees outright and weaken full-grown ones, so that they may become diseased or infested with insects. It also destroys the humus cover and causes depletion of the soil. Burning over the ground for the purpose of improving grazing is characterized as an expensive mistake. Although it is possible to secure green grass for the stock a week or two earlier in the spring by such a practice, many of the rich leguminous plants and annual grasses are killed, leaving only the hardy bunch, wiry and other coarse perennial grasses.



Not Only Is a Well-Managed Farm Timber Stand a Source of Fuel, but It Shelters Farmstead From Prevailing Winds.

Discretion in Cutting Necessary.

Grazing almost inevitably causes damage to the trees. Experiments have shown that if the best results are to be secured stock should be excluded from the woodland. When timber is needed, the cutting should be done so as to cause the least possible waste of valuable wood and should not damage other living trees. The first trees to be cut should be the dead or dying and deformed and diseased specimens, which shade out healthy trees. Less valuable kinds, such as gray birch, aspen, blackjack oak, dogwood, sow wood, blue birch, ironwood, and others, should be removed in preference to the more valuable kind. By following this practice the woodland is constantly improved and its value is increased.

Preservative treatment will considerably increase the life of timber which is used for fence posts and other similar uses, and is distinctly worth while. Treatment with coal-tar creosote has been found to be by far the most satisfactory process.

ATTENTION TO HOG RAISING

More Than 150 Pig Club Members in South Carolina Enroll in Better-Sires Movement.

Developments in live stock improvement in South Carolina show the diversified character of animals kept on farms. Records kept by the United States department of agriculture in connection with the "better-sires, better-stock" campaign indicate that swine raising is receiving unusual attention in that state. In one day recently the department enrolled in the campaign more than 150 pig-club members in South Carolina who will breed their stock to purebred sires only. Other live stock owners in that state report the breeding of the usual kind of farm live stock and also other kinds ranging from pit game birds to Mexican burros.

AVOID ANNUAL LOSS TO DIFFERENT CROPS

Vigilance and Vigorous Action Necessary by Growers.

Insect Outbreaks Within Limited Areas Should Be Stamped Out at Once—Fall Plowing Is Universally Beneficial.

A great portion of the annual loss to the grain crop due to insect injuries can be avoided by vigilance and vigorous action on the part of the grain growers. Insect outbreaks frequently originate within limited areas, and when this is the case it often is possible to stamp them out before any great damage has occurred. In other instances the outbreaks are of general origin, and then community action is essential in order that the inroads of the pest may be overcome. The most serious insect enemies of cereal crops, such as the Hessian fly, the chinch bug, and white grubs, belong to the latter class. In the case of these and other widely distributed foes of the grains no means of stopping their ravages will be fully successful until community action can be secured in adopting the methods of combat at present advocated by entomologists.

Fall plowing doubtless is the most universally beneficial practice for the control of the insect pests of cereal crops, and this measure should be adopted except where it is rendered impossible by local agricultural conditions, says the United States department of agriculture. Corn never should be planted on freshly broken sod land, because this practice is almost certain to expose the crop to the ravages of cutworms, wireworms, and white grubs. Crops belonging to the bean family, such as cowpeas, soy beans, clover, alfalfa, etc., may be interposed safely between sod and grain, and especially between sod and corn, in order that injury to the grain crops by these pests may be avoided.

POOLING WOOL CLIP IN COLLECTIVE SALE

Buyers in Large Number Are Thereby Attracted.

Makes It Possible for Growers to Receive Payment for Full Value of Product—Cost of Handling Is Reduced.

The advantage of wool pooling and co-operative selling may well be outlined as permitting the growers to sell their wool collectively in a large volume, thus attracting a large number of buyers and making possible the payment of the full value of the wool. The larger buyers are not attracted by individual clips unless they are of considerable magnitude such as some of those produced by the larger ranchers in the West. Nor is the local buyer able to pay the full price for wools which must be purchased a few fleeces at a time and carried at his personal expense and risk until sufficient volume has been accumulated to permit its shipment to some central wool market.

Volume handling such as is possible where the entire clip of the community is sold collectively reduces the cost per pound of buying and handling and will permit the purchaser, whether a local wool merchant or some outside buyer, to pay a higher price per pound than is possible where it is necessary to purchase the wool in small lots.

The bureau of markets, United States department of agriculture, is constantly giving assistance to co-operative organizations in the way of organization practices and selling methods and will be glad to extend similar service in the co-operative marketing of wool.

RIDS FARM OF SCRUB SIRES

Washington Farmer Lets Go of Inferior Boar and Bull in Order to Get Purebreds.

"I got rid of a scrub Poland China sire and also of a bull in order to get purebreds." With this explanation a breeder of cattle, swine, and poultry in Lewis county, Washington, enrolled in the "Better Sires, Better Stock" movement. Hereafter 42 scrub cows, 6 grade sows, and 40 mongrel hens which he owns, in addition to a small quantity of better females, will be bred only to sires of pure breeding.

GENERAL FARM NOTES

The number of pit silos is increasing.

* * *

The feeding value of Sudan grass is equal to timothy hay.

* * *

When we lose the leaves of our alfalfa we have lost our alfalfa.

* * *

Good preparation is required with alfalfa seedbeds; the soil must be firm at seeding time.

* * *

Do not let too many melon vines grow in one hill. Thin, cultivate and fertilize for best results.

PACKAGES MUST SHOW QUANTITY

Various Fruits and Vegetables Must Be Marked Plainly to Comply With Law.

SHIPPERS DISREGARD RULES

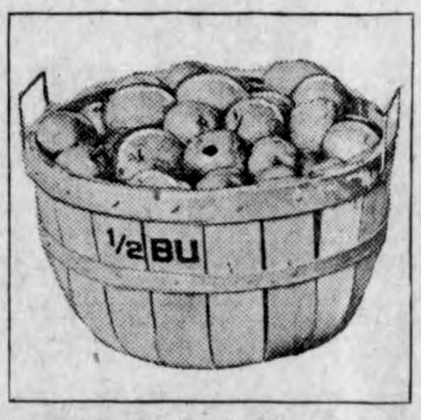
Every Opportunity Has Been Given to Trade to Get in Line With Provisions of Amendment—Some Shipments Are Exempt.

Fruits and vegetables in package form, when shipped into interstate commerce, should bear a plain and conspicuous statement of the quantity of the contents in each package, according to a statement made by officials of the bureau of chemistry, United States department of agriculture, who are charged with the enforcement of the federal food and drugs act. Instructions have been issued showing how various fruits and vegetables in different styles of packages may be marked in order to comply fully with the net weight amendment to the law, and also showing what shipments of vegetables as ordinarily marketed are exempt from the net weight provisions. These instructions have been distributed widely among fruit and vegetable growers and shippers.

The bulk of the fruits and vegetables now shipped into interstate commerce are marked in accordance with the law, say officials, but some shippers have overlooked or are disregarding this provision of the law. Since this amendment has been in effect for six years and every opportunity has been given to the trade to get in line with its provisions it is the opinion of the officials that there is now no excuse for any shipper failing to mark the quantity of the contents on packages of fruits and vegetables shipped within the jurisdiction of the law.

How to Mark Packages.

Fruits and vegetables in baskets, hampers, drums, cartons, boxes, crates and barrels may in general be marked by either weight or dry measure, or when packed in barrels may be marked in terms of the United States standard barrel and its subdivisions of third, half or three-quarters. Statements of dry measure should be in terms of the United States standard bushel and its customary subdivisions of half-bushel, pecks, quarts, pints or half-pints. If the quantity of the contents be stated by weight or measure, it should be marked in terms of the largest unit contained in the package, except that in the case of an article with respect to which there exists a definite trade



One Method of Showing Contents of a Basket.

custom for marking the quantity of the article in terms of fractional parts of larger units, it may be so marked in accordance with the custom. For example, if the package contains a pound, or pounds, and a fraction of a pound, the contents should be expressed in terms of pounds and fractions thereof, or of pounds and ounces, and not merely in ounces.

Small Open Containers.

Crates of "flats," containing small open containers of apricots, berries, currants, cherries, grapes, peaches, plums, prunes, peppers, tomatoes and the like, should be marked on the outside of the crate or "flat," with the number of small containers and the quantity of the contents of each. When the crates are so marked it is not necessary to mark the quantity of contents on the small open containers within the crates.

Exempt for the Present.

It is not necessary for the present and until further notice to mark the quantity of contents on the following fruits and vegetables when marketed in the manner indicated; asparagus in boxes and cases; beets with tops, bunched, in drums and hampers; cabbages in crates; cantaloupes and casabas in crates and baskets; carrots with tops, bunched, in drums and hampers; cauliflower in crates and hampers; celery in boxes and crates; eggplant commonly wrapped in paper and packed in crates; kale in barrels, baskets, and hampers; lettuce in barrels, drums, baskets, and hampers; onions, with tops, bunched, in drums and hampers; pineapple in crates; radishes, bunched, in drums and hampers; romaine in hampers; spinach in barrels, baskets, and hampers; turnips with tops in drums and hampers.

Federal inspectors have been instructed to examine interstate shipments of fruits and vegetables to see that the quantity of contents is marked in accordance with the law. Copies of Item 253 on the "Labeling of Various Packages of Fruits and Vegetables with the Quantity of the Contents" will be sent free upon application to the bureau of chemistry, United States department of agriculture, Washington, D. C.

BIG ACCOMPLISHMENT BY JUNIOR CLUB BOY

Poland China Gilt Is Winner of Two First Prizes.

William Stuart of Weiser, Idaho, Awarded Free Trip to International Stock Show—Swine Breeders Are Defeated.

Does junior club work pay? Four or five years ago it was not looked upon seriously, but now the whole agricultural extension system as carried on by the federal government through the colleges and county agents, etc., is enthusiastic about this work, and the breeders themselves are beginning to believe that there is something in it. There is a reason for this, and that is that some of the boys are showing their fathers that careful selection and feeding will win out over slipshod or poorly planned methods.

A notable example of this is the case of William Stuart, the fourteen-year-old son of Dan H. Stuart of Weiser, Idaho. This boy has been in pig-club work for two years. He selected for himself early last season a

William Stuart and His Poland China Gilt.

Poland China pig for which he paid $17.50. This pig was fed and shown at the Idaho state fair at Boise this year. There it won first prize for the champion pig over all club contestants in the state, which entitled him to the $175 free trip to the International Live Stock Show. It next won the award of first place in the open class for Poland China sows under six months of age, in which competition he defeated the swine breeders of the whole state of Idaho.

William Stuart's father is not a breeder of purebred hogs, but simply raises a good grade of Poland China pigs for the market. Therefore this accomplishment by William in the feeding and developing of this prize pig represents what club work is doing all over the country.

The fact that banks throughout the country are taking an interest in this work speaks well for the good which it is accomplishing.

William is one of thirty boys from all sections of the country who will visit the International this year.

CONTROL OF GARDEN INSECTS

Spraying With Solution of Arsenate of Lead Is Effective for Potato Bugs or Beetles.

Spraying with arsenate of lead will control potato bugs or beetles. This poison solution is made of one pound of arsenate of lead to ten gallons of water, with a little laundry soap added to make the solution stick to the leaves. Cucumber, muskmelon and squash beetles may be controlled by dusting the plants with air-slacked lime mixed with lead arsenate powder. When plants of any kind are attacked by lice Black Leaf 40 is generally used. Arsenate of lead and Black Leaf 40 can be purchased at any drug store and they are usually accompanied by directions for their use. Control of vegetable insects and diseases depends much on prompt action as soon as their presence is noticed. Spraying and other methods are necessary some time or other every year, for every plant in the garden is infected at some time with either a disease or an insect.

PROTECT WOODS FROM FIRE.

A tree will make a million matches—a match may destroy a million trees.

Take no chances with lighted matches, tobacco, brush or camp fires.

Forest destruction is quick—forest growth slow.

Burned timber pays no wages.

When fire is discovered, put it out if you can. Get help if you need it.

Are you practicing fire prevention and forest protection?

OATS NEED MORE ATTENTION

Crop Ranks Next to Corn and Wheat in Acreage and Value, but Yields Are Unsatisfactory.

Oats rank next to corn and wheat in crop acreage and value in the United States. But, notwithstanding this, less attention has been given to the production of oats than to any other important grain, so that yields often have been unsatisfactory and the crop sometimes unprofitable, say specialists of the United States department of agriculture.

"RESULTS MORE THAN CLAIMED"

So testifies Mr. J. F. ARENDT, Box 44, Remlig, Texas

PE-RU-NA

THE REMEDY FOR EVERYDAY ILLS

"I have used Pe-ru-na for years in cases of colds and catarrh. The results have been good, in fact, more than you claimed. Have also taken Lacupia and can easily say it is one of the best blood purifiers I have ever used."

Mr. J. F. Arendt

For Catarrh and Catarrhal Conditions

The evidence of one man like Mr. Arendt is more convincing proof to you of the merits of Pe-ru-na than any written words of ours. For fifty years Pe-ru-na has been the standby of the American family for diseases due to catarrhal inflammation of the mucous membranes lining the organs of the body. Thousands, like Mr. Arendt, have proved the effectiveness of Pe-ru-na for coughs, colds, nasal catarrh, stomach, bowel and liver disorders or any disease characterized by a catarrhal condition.

If your suffering is the result of a catarrhal disorder try Pe-ru-na. It is a true, tried medicine.

Sold Everywhere — Tablets or Liquid

Ninety-Seven per cent. of the people have catarrh in some form.

SHE KNEW WHAT WAS IN IT

Little Eve Fairly Well Acquainted With the Varied Contents of the Family Bible.

Bishop Hoss said at a Nashville picnic:

"The religious knowledge of too many adults resembles, I am afraid, the religious knowledge of little Eve.

"'So you attend Sunday school regularly?' the minister said to little Eve.

"'Oh, yes, sir,' said she.

"'And you know your Bible?'

"'Oh, yes, sir.'

"'Could you, perhaps, tell me something that is in it?'

"'I could tell you everything that's in it.'

"'Indeed!' And the minister smiled. 'Do tell me, then.'

"'Sister's beau's photo is in it,' said little Eve promptly, 'and ma's recipe for vanishin' cream is in it, and a lock of my hair cut off when I was a baby is in it, and the ticket for pa's watch is in it.'"

Forgiven.

"Can you help me out, sir?" said the seedy looking stranger. "I've had some hard luck."

"I suppose you've seen better days?" replied Mr. Twobble.

"Oh, yes, sir. I once got $75 a week for playing in a jazz orchestra."

"Well," said Mr. Twobble, as he thoughtfully thrust his hand into his pocket, "I'm a humane man and I won't hold that against you. Here's a quarter."—Birmingham Age-Herald.

Don't delude yourself with the idea that there is a good looking woman in the world who doesn't know it.

What is bleaker than a club full of leather furniture and nobody there?

WAS NOT MATTER OF LOVE

Other and More Cogent Reasons Induced the Old Gentleman to Hold His Wife's Hands.

As the Londoner sat in the village inn, drinking a modest pint and chatting with the local residents, he got on the subject of married life. He advanced the opinion that true happiness was more often to be found in the peaceful country than amid the turmoil of a town.

"Well, I ain't so sure about that," said one old chap. "But I do know as I sat here last night and held my old woman's hands for two hours by the clock."

"There!" said the visitor in triumph. "That upholds my argument and shows how much you love her!"

"Love her!" gasped the old chap. "Why, if I'd 'a' let go she'd 'ave scratched my bloomin' eyes out!"—London Answers.

Stepping Out.

The late long staple cotton crop has made quite a lot of money for South Carolina negroes. A short time ago one of them purchased a high-priced car. A few days later he went back to the salesman.

"Cap, is you got any of dese here cowketchers?" he inquired.

"Do you mean bumpers, Charlie?"

"Yassir."

"Well, Charlie, do you want one for both ends of your car?"

"Nawsir, cap, ain't nobody gwine ter ketch up wid me. Ah jes want one fo de front."

No Such Animal.

"What is your opinion of a man who constantly deceives his wife?" "That he is a myth," replied J. Fuller Gloom.—Judge.

POULTRY

CARING FOR BREEDING DUCKS

If Not Kept for Production of Market Eggs Fowls Should Be Given Grass Range.

Breeding ducks, if not kept for the production of market eggs, should have a grass range, if possible, after the hatching season is over and be fed sparingly on a mash of 1 part, by weight, corn meal, 2 parts bran, 1 part low-grade wheat flour, 1 part green feed, 8 per cent beef scrap and 3 per cent grit, given once or twice daily, with one feed of mixed grains; or the mash may be made of 3 parts, by measure, corn meal, 4 parts bran, 2 parts low-grade wheat flour, three-fourths part beef scrap, and 2 parts of green feed, with a small amount of grit and shell or mineral matter.

Feed Pekin ducks for eggs, beginning about December 1, on 1 pound of corn meal, 1 pound of low-grade flour

Pekin Ducks About Seven Weeks Old in Fattening Pen.

or middlings, 1 pound of bran, 15 per cent of beef scrap, 15 per cent of vegetables or green feed, and some grit, feeding this mash twice daily, in the morning and at night; also giving 1 quart of mixed corn and wheat to every 30 ducks at noon when they are laying heavily. These laying rations should be fed throughout the year to Indian Runners or to any breed of ducks kept principally for the production of market eggs, poultry specialists of the United States department of agriculture say. If the Indian Runner ducks are not laying, they should be fed sparingly. All rations are by weight unless otherwise stated. Thirty laying ducks (Pekins) will eat about 10 quarts of moist mash at each meal.

FEEDING FOWLS FOR PROFIT

Early Hatched Chick Will Reach Laying Maturity Before Commencement of Cold Season.

The first rule for getting a good profit from poultry is to get the chicks hatched early, and the next is to keep them growing so that they will reach laying maturity before the commencement of cold weather. There is no profit in keeping a chicken just alive, whether it is intended for laying stock or for the market. One reason why more care should be exercised in feeding fowls is that the chicks know less about what is good for them than do the fowls. The healthy chick is a hungry thing and will eat what is given it; the digestive organs being weak are less able to dispose of objectionable feed than are those of older fowls.

Young chicks should be fed a little at a time and often, poultry specialists in United States department of agriculture say. They should be fed early in the morning and just before going to bed at night, and not less than three times in the intervening period. For the first two weeks they may be fed three meals of soft feed and two of hard, and after that age two of soft and three of hard, less soft feed being fed as they grow older. No more moistened soft feed should be given at one time than they will eat up clean.

OBJECTS IN CULLING FLOCK

Insures Feed for Best Layers and Saves Fowls Best Suited for Breeding Purposes.

Culling of the flock serves two purposes: First, it insures that the feed will be consumed by the better-producing hens, thereby increasing the profit. Second, it makes it possible to save those best suited for breeders, both on account of their better production and on account of their superior strength and vitality—qualities so essential to layers if they are to stand up under the severe strain of heavy laying. Weeding out the poor hens gives those left more room and a better chance.

ESSENTIAL FOR YARDED HENS

Charcoal, Grit and Oyster Shells Should Be Kept Before Fowls All the Time.

Where the chickens are kept in small bare yards, fine charcoal, grit and oyster shells should be kept before them all of the time, and cracked or ground bone may be fed. The bone is not necessary for chickens that have a good range.

DAIRY FACTS

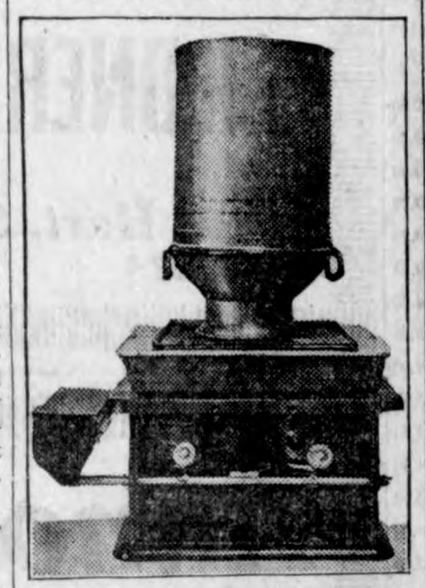
CAREFUL HANDLING OF MILK

All Vessels Should Be Freshly Scalded to Remove Bacteria—Cover Will Exclude Odors.

No matter how well milk has been handled up to the time it is delivered to the consumer, it cannot be expected to keep well if it is carelessly treated thereafter. It should be poured into pitcher, pan, or other vessel—freshly scalded to remove any bacteria or mold spores—and kept in a cool, clean place free from dirt, flies, etc. New milk should never be mixed with old, unless it is used at once, as the bacteria in the old milk will, of course, be added also, and the mixed milk will not keep as well as the fresh milk alone.

Bacteria are thickest where there is dirt and decay, and milk should therefore be stored only in clean, sweet places. It is safer to keep it covered, to exclude not only dirt and bacteria, but also the flavors and odors which it so easily absorbs. If kept at a temperature of 50 degrees Fahrenheit or less, good milk should remain sweet for 12 hours at least, after it reaches the consumer, and ordinarily for 24 hours or more, dairy specialists of the United States department of agriculture say. Sometimes in very hot weather housekeepers complain that in spite of all precautions it sours quickly, even in the ice box. This is often due to the fact that the air of the ice box, although it seems cold in contrast with the heat outside, is really not cold enough to check the growth of the bacteria; if a thermometer placed inside registers more than 50 degrees Fahrenheit, the fault is almost surely in the temperature of the ice box, and not in the milk.

In large cities, where most of the milk comes by morning trains from a considerable distance, it is often im-



Sterilization Is the Efficient Method of Preparing Milk Cans for the Reception of Sanitary Milk.

possible to deliver fresh morning's milk in time for breakfast, and that milked the morning before must be given to patrons who insist on an early delivery. They would get their milk from 12 to 18 hours fresher if they would take it in the afternoon instead.

AIR-TIGHT WALL IS NEEDED

In Building a Silo Protection Must Be Provided for Silage to Prevent Molding.

It makes little difference what material is used in building a silo as long as the silo is practically air tight all around the walls and bottom. Wood, cement, tile, iron, and plaster silos have been used with success. Protection against mold is largely dependent upon the exclusion of air, and for this purpose an air-tight wall is required and the ensiled material should be properly packed in the silo. Silage will keep equally well in any one of the silos mentioned provided the walls are properly made, are air and moisture tight, and the material is correctly ensiled.

REINFORCING INSIDE OF SILO

Where High Winds Prevail It Is Good Insurance to Place Wood Hoops at Top and Bottom.

Where high winds prevail it is good insurance to reinforce the inside of a stave silo with wood hoops at the top and bottom. Pieces of thin, narrow lumber, usually weather boarding, are nailed to the staves so as to form a hoop of 4 to 5 thicknesses of the weather-boarding, care being exercised to break joints. The strips are 8x10 feet long and they may be soaked in water so as to bend easier.

CAPACITY OF COW'S STOMACH

Not Enough Nutrition in Pasture Grass to Make Maximum Production of Milk.

The bulky nature of pasture grass places a positive limit upon the capacity of the cow to take feed. In other words, the cow's stomach cannot contain grass enough to supply the required nutrients for maximum milk production; therefore a part of the ration should be of a more concentrated nature. Good pasture contains an abundant supply of succulent palatable and nutritious grasses.

Guard Your Heritage

The Third of a Series of Advertisements on Practical Skin Hygiene

Were you born with a normal skin? Most women were. And aided by the proper cleansers and preservatives, your skin today should be as clear, smooth and fine-grained as a child's. Yet how few among your friends have retained the fresh, fair bloom of girlhood? How few have preserved the heritage of youth?

Is Yours a Normal Skin?

The normal skin is free from blemishes; it's contour smooth and full. Exquisitely clear, youthfully firm and well-nourished, the normal skin always is a source of rare personal charm. Neglect or improper care, however, inevitably means the sacrifice of its attraction.

Given the distinction of a normal skin, would you preserve its beauty? Then accept no toilette preparation not specifically devised for its use. You will find not one but six different preparations in "The Combination Treatment Box For Normal Skins", illustrated above—scientifically adapted to the normal skin and the normal skin alone. Address The Franco-American Hygienic Company direct or write us, requesting that our Personal Service Retailer in your vicinity call at your home.

Would you engage in a dignified, profitable profession among your personal friends? If not already represented in your community, The Franco-American Hygienic Company offers women of energy and refinement an attractive position as our Accredited Retailer. An inquiry will bring complete details concerning our thorough training and liberal profit sharing arrangement.

What some men are pleased to call a clean profit is often the proceeds of a dirty transaction.

"Eatonic—Worth Its Weight in Gold"

Writes Mrs. E. L. Griffin from her home in Franklin, N. H. "I feel like a new person. Stomach feels fine after eating—all from taking your wonderful eatonic. It's worth its weight in gold."

Millions of sufferers from sour, acid, gassy stomachs, heartburn, indigestion, bloating, full feeling after eating, should try eatonic. Just try it—that's all, and get relief, new life, strength and pep. It produces quick, sure and safe results, because eatonic takes up the harmful acids and poisons and carries them right out of the body. Of course, when the cause is removed, the sufferer gets well—quick!

The cost is a trifle. Your druggist will supply eatonic, so, if you want better health, all you need do is—try it TODAY. You will surely feel big benefits at once. Adv.

FRECKLES POSITIVELY REMOVED by Dr. Berry's Freckle Ointment—Your druggist or by mail, 50c. Free book. Dr. C. N. Berry Co., 2975 Michigan Avenue, Chicago.

KILLS PESKY BED BUGS P. D. Q.

A 35c box of P. D. Q. makes a full quart of the strongest bug killer on earth.

The new chemical, P. D. Q.—Pesky Devil's Quietus—puts the everlasting to bed-bugs, roaches, ants and fleas. Pesky bed-bugs can't exist where P. D. Q. is used, as it leaves a coating on their eggs and prevents hatching.

A box of P. D. Q. goes farther than a barrel of old-fashioned bug killer. P. D. Q. will not rot or stain clothing, kills fleas on dogs. Your druggist has it or he can get it for you, or sent prepaid on receipt of price by the Owl Chemical Works, Terre Haute, Indiana.

PARKER'S HAIR BALSAM

Removes Dandruff—Stops Hair Falling

Restores Color and Beauty to Gray and Faded Hair

50c. and $1.00 at druggists.

Hiscox Chem. Wks., Patchogue, N.Y.

HINDERCORNS Removes Corns, Callouses, etc., stops all pain, ensures comfort to the feet, makes walking easy. 15c. by mail or at Druggists. Hiscox Chemical Works, Patchogue, N. Y.

Rheumatism Back on the Job With Its Old-time Fury

No Let-Up In Its Torture.

If you are afflicted with Rheumatism, why waste time with liniments, lotions and other local applications that never did cure Rheumatism, and never will?

Do not try to rub the pain away, for you will never succeed. Try the sensible plan of finding the cause of the pain. Remove the cause, and there can be no pain.

You will never be rid of Rheumatism until you cleanse your blood of the germs that cause the disease. S. S. S. has no equal as a blood purifier, scores of sufferers say that it has cleansed their blood of Rheumatism, and removed all trace of the disease from their system.

Get a bottle of S. S. S. at your drug store and get on the right treatment to-day. If you want special medical advice, address Medical Director, 102 Swift Laboratory, Atlanta, Ga.

Found at Last.

"Where is the woolly West, anyhow?"

"Well, Wyoming has a large sheep industry."

People seldom attempt to set on the man who stands up for himself.

Your rank among men depends on how you help them to rise.

BEWARE!

Unless you see the safety "Bayer Cross" on tablets, you are not getting genuine Aspirin prescribed by physicians for over 20 years, and proved safe by millions.

Safety first! Insist upon an unbroken "Bayer Package" containing proper directions for Headache, Neuralgia, Colds, Earache, Toothache, Neuritis, Rheumatism, Lumbago and Pain generally. Made and owned strictly by Americans.

Bayer-Tablets of Aspirin

Handy tin boxes of 12 tablets cost but a few cents—Larger packages

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

Saving by Spending

THOSE common-sense people who have acquired the habit of saving by rational spending are pretty likely to be owners of Ingersolls. Often an Ingersoll is their only watch; sometimes they own an Ingersoll to save wear and tear and upkeep expense on a high priced watch; but in any case, they have bought it because it has meant a definite saving of money.

We have Ingersoll Watches in all styles from $2.50 up to $12.50 in plain and luminous dials.

H. V. Reed,
John H. Darrah,
Eugene Hills, Commissoners.
H. D. Kurl, Engineer.

Owners of the above described lands, comprising Hancock, Cerro Gordo and Franklin Joint Drainage District 1-86-31 of Cerro Gordo, Hancock and Franklin Counties, Iowa, and to all actual occupants, and to all persons having or claiming any right, title, or interest in and to the above described lands.

You and each of you are hereby notified that the Commissioners appointed by the Board of Supervisors of Hancock, Cer-ro Gordo and Franklin Counties, Iowa, to inspect and classify the lands benefitted by the location of Hancock, Cerro Gordo and Franklin Joint Drainage District No. 86-1-31 of Hancock, Cerro Gordo and Franklin Counties, Iowa, in tracts of forty acres or less, in a graduated scale of benefits, to be numbered according to the benefits to be received by the proposed improvement, and to make an equitable apportionment of the costs, cost of construction, expenses, fees, and damages as-sessed for the construction of said improvement, did on the 28th day of August, 1920, make their report to the Board of Supervisors of Hancock, Cerro Gordo and Franklin Counties, Iowa.

That the real estate owned or occupied by you and each of you, and situated within Joint Drainage District Nos. 86-1-31 of Hancock, Cerro Gordo and Franklin Counties, Iowa, a description of which is set opposite the name of the owner thereof in the foregoing schedule, has been classified by said commissioners, that the amount of special assessment apportioned to you and each of you by said commissioners is hereby set opposite the description of each tract of land on which assessment is made.

That said report will come up for hearing before the Boards of Supervisors of Hancock, Cerro Gordo and Franklin Counties, Iowa, on the 1st day of October A. D. 1920, at the Court House at Mason City, that all objections to said report must be made in writing and filed with the County Auditors of Hancock, Cerro Gordo and Franklin Counties, Iowa, prior to the day of hearing, all objections not filed prior to the day of hearing should be filed with the Boards of Supervisors at the place where the hearing is to be held.

Dated this 30th day of August, A. D., 1920.

(SEAL)

Chris Jacobs, County Auditor,
Hancock County, Iowa.
E. D. Haecker, County Auditor,
Franklin County, Iowa.
Paul Weigand, County Auditor,
Cerro Gordo County, Iowa.

Mr. and Mrs. P. M. Greisemer and Mr. and Mrs. John Gruetzmacher autoed to Minneapolis Tuesday morning bright and early to take in the Minnesota State Fair and also for a visit with the Chas. Gruetzmacher family, a brother of our townsmen, John, George and Frank.

Klemme school teachers were conspicuous by their absence over Sunday. Miss Belken spent Sunday at her home at Iowa Falls; Miss Ebert spent Sunday with Charles City folks; Prof. Collins visited with his family at Eldora; and Miss Sullivan likewise went to Osage. They all left Friday evening and returned Monday morning.

The Koerner, Bredbenner and Elmer Arnold famiies returned last Thursday from Des Moines where they went to take in the State Fair. While at the capital city they stayed out at the Fair Grounds all the time as they were camping. They thoroughly enjoyed the stay and all say that camping out at the Fair was just the best ever.

A new principle is now used in connection with spinal adjustments for the cure of chronic ailments. Many conditions that were formerly very difficult and unsatisfactory to handle are now, with this combned method, cared for to the complete satisfaction of the patient. The difficult conditions for which the new principle is especially recommended are high blood pressure, kidney trouble (Bright's disease), diabetes, bowel trouble, constipation, auto-intoxication, indigestion, billiousness, severe nervous symptoms, rheumatism, neuritis, and some other troubles not necessary to mention here.—adv. tf.

A guaranteed cure for hemorrhoids (piles) in all forms, one that does not lay the patient up or cause loss of time. Other rectal troubles treated. Special calls to Klemme will be attended to. Dr. R. W. Schultz, Masonic Bldg., Garner, Iowa. adv. tf.

Who Can Save the Most for You?

THATS what you're going to think about when you buy your fall clothes. If you are'nt careful you'll make a mistake.

Klemme Wins From Clear Lake

THE BALL GAME SUNDAY WAS A FAST ONE

Sport Calendar

The Klemme Sox went to Clear Lake Sunday to play the Lakeside team again with the result that Klemme piled up nineteen scores to Clear Lakes three. Lightsinger was on the mound for Klemme and did some real pitching. In the seventh inning the Klemme boys nearly run themselves to death beating it around the diamond and hiking across home plate. The Sox had them outclassed at every turn of the game and the team work was perfect. This afternoon (Thursday) the Likeside boys are coming back to try to give Klemme a trimming and no doubt they will be loaded with hired players to try the trick.

BELMOND VS. THORNTON

Belmond beat Thornton at Belmond Sunday by the tune of nine to three. A number from Klemme were over and saw the game which they say was very good.

FOREST CITY BEATS WEBSTER CITY

Another fast game which was staged Sunday was at Forest City when the supposedly fast team from Webster City played the fast team at Forest City. The Forest City team are abut the fastest bunch in this neck of the woods and when the smoke of battle had cleared away the score card read eleven to five in favor of Forest City.

THE GARNER TOURNAMENT

Quite a number from here attended the games at the Garner Tournament. The first game Tuesday morning was between Forest City and Kanawha with the result that the latter lost by 7 to 1. In the afternoon the fast Sheffield-Rockwell team beat Clarion 4 to 2. Wednesday morning the losers of the first day played. Kanawha beat Clarion 4 to 1. In the afternon the winners of the first day were to play, Sheffield-Rockwell vs. Forest City but on account of the rain it was not played until Friday afternoon. Forest City beat their apponents 8 to 7. It was then between Forest City and Kanawha as to who would take the tournament championship but as it started to rain again the game was not finished but the Forest City team had 3 scores in the second inning and Kanawha carried a goose egg. But Forest City had Kanawha outclassed and would undoubtedly have taken the honors.

MYRE-SCHOBER MATCH

Thursday evening of the tournament a big crowd gathered at the Ball Grounds to see the wrestling match between Helmer Myre holder of the World's Light Heavy-Weight Championship and Billy Schobr, of Chicago, contender for the crown. The Forest City man threw Schober after one hour and thirty two minutes of hard mat battling with a toe hold. The match was a good one and the men were well matched, Myre having the advantage by a few pounds only.

KLEMME VS. THORNTON

At the Klemme Ball Park Sunday afternoon. See add in this issue.

NO SCHOOL TODAY AND FRIDAY

As all the teachers will be at Garner today and tomorrow attending the Teachers' Institute, the kids of the Klemme schools will enjoy a two day vacation, which they are generally willing to take. Some very good talent will be at the institute this year and it is expected that it will be well attended by all of the teachers of the county whse duty it is to go.

The Times "Devil" Says

THANKS, FOLKS

Last week we mailed out a nice little letter to all our subscribers who were somewhat in arrears on their subscription to the Klemme Times. They have been very prompt in paying up, but there are some yet who have not paid for their paper in advance and we ask those who are not paid up and who received a statement to please remit. We thank all those who paid up so promptly. Editor.

SOME THINGS NOT TO BE PUBLISHED

Once in a while someone has a grievance against someone else and they come to the Times Office and want us to "give him a write-up in the paper." Now such matters of personal troubles should not be published in the paper as the general public are not interested in the matter and if such things are published it puts the editor in a bad position and it is our intention hereafter to pay no attention to personal differences of parties who are on "the outs with each other." And there is also another thing to remember and that is that there are always two sides to an argument; maybe the other fellow has a reason to think or act as he does and it is not fair to him to "write him up" without getting his view of the matter. Should it be absolutely necessary to publish such items then they must be signed by the person who submits them as we will not take the responsibility of running an item which might cause hard feeling or personal injury to anybody.

If we were to publish even one half of all the bad things we heard it would stir up an awful mess, but why publish such things? Is it not better to try to uplift the community and say only the good things about people than to be everlastingly knocking every little thing that comes along or personal differences which no one cares to read about? We think and shall always think that if you cannot say the good things about a man or woman, then keep still, for the chances are no matter how bad they are or they do some things you do not approve of, still they have something to say and some good can be found, and so

"There's so much good in the worst of us,
There's so much bad in the best of us,
That it hardly behooves any of us
To talk about the rest of us."

MISS ARVELLA EMERSON MARRIED

Klemme friends of Miss Arvella Emerson received announcements from her last week stating that on Thursday, September 9th she was united in mariage to Mr. John Knight at Spencer, Iowa. This news comes as a surprise as Miss Emerson was visiting Klemme friends a couple of weeks ago but did not make her engagement public. Miss Emerson is a fine young lady and has a host of Klemme friends who extend congratulations. The groom is not known in Klemme but we take it that he is a gentleman of high esteem who will make a good husband for the young lady he has taken for a wife. They will make their home at Spencer.

True.

"I understand that once he served a short term in prison. Yet he has redeemed himself and lived it down absolutely." "Well he would have lived it down, if it wasn't for the fools like you and me who continually keep digging it up for conversation purposes."

MUSICAL SUNDAY EVENING

The choir of the Methodist Episcopal church, augmented by a number of other voices, will give a musical program next Sunday evening, September 19, at the hour of the usual evening service.

The program follows:

Prelude, Vesperale------Cyril Scott
Anthem, Hark, Hark My Soul, Shelley
Choir
Duet, Spirit of the Living God,--Berwald
Mrs. Trafford, Mr. Trafford
Chorus, One Fleeting Hour------Lee
Men's Chorus
Anthem, God So Loved the World, (from "Crucifixion")-----Stainer
Choir
Offertory, Abendsang----Isidor Seiss
Trio, The Lord Is My Shepherd--Lutkin
Women's Chorus
Solo, Hark, All Ye That Bear A Yoke, Bach-Deis
Miss Buriff
Anthem, The Heavens Are Telling, (from "Creation")--------Haydn
Choir
Postlude, Bouree in G Major---Bach

Personnel of augmented choir—Sopranos, Mrs. S. A. Anderson, Mrs. Clarence Johnson, Miss Lula Newberger, Miss Edna Smith, Mrs. W. H. Trafford; Altos, Mrs. George Gruetzmacher, Miss Anna Grieve, Miss Mildred Johnson, Miss Mabel Smith, Mrs. C. G. Waterman; Tenors, Dr. Missman, W. H. Trafford, C. G. Waterman; Basses, J. N. Day, E. G. Ell, Elmer Ludeke, Bert Matthews. Pianist and director, Miss Doris Buriff.

INFANT CHILD OF MR. AND MRS. HERMAN PRIEBE DEAD

The community was saddened when the news of the death of the infant child of Mr. and Mrs. Priebe was heard.

Alvin Julius Priebe, son of Mr. and Mrs. Herman Priebe, was born February 7th, 1920. On the second day of May he received the Sacrament of Holy Baptism. The little child had not been well since the latter part of June, and was frequently subject to sudden attacks of convulsions which caused his death Saturday, September 11th, at 7:00 o'clock A. M.

Funeral services were conducted from the Reform Church by Rev. Depping Monday afternoon and the little baby was Laid At Rest in the Klemme Cemetery.

The entire community extends sympathy to the bereaved parents in their hour of sorrow for their little son.

CURES TWO LEPERS

Dr. F. H. Parker, in charge of the leper colony on Penikese island, Mass., is credited by Doctor Carey of the Massachusetts board of health with having effected the cure of two young men who have been confined to the leper colony for three years. Doctor Parker's treatment of the men consisted in plenty of fresh air and sunshine, good food, etc., and use of chemulga oil, imported from India, and sodium morrhuae and sodium gyrocardanate. The patients will be examined by a commission of experts before being discharged. Doctor Parker and his wife live practically isolated on the island.

RED CROSS PROVIDES NURSE FOR SCHOOLS OF HANCOCK COUNTY

The Red Cross of Hancock County has arranged for a nurse whose business it will be to look after the health and general welfare of the school children of the county.

This does not mean that in case of sickness she will go into the home and nurse the child but that she will visit all the schools of the county, examine the children for defective hearing, sight or teeth and other ailments to which a child is subject which may prevent their proper advancement in their studies.

The appointment has been made by the Central Division Headquarters at Chicago and the nurse is Miss Mae Ferleman of Garner, who spent several weeks during the summer in a Red Cross training school fitting herself for the position.

Hancock County is fortunate in securing so competent a worker within the county, and we predict success for Miss Ferleman in her work.

The expense will be born by the Red Cross Chapters in the county.

Miss Ferleman expects to visit every school in Hancock County during the next few weeks and will call on the rural schools first in an effort to complete the tour of the county before bad roads and cold weather set in.

To assist Miss Ferleman in her work will be a county committee composed of one person from each township except in Concord and Britt in which two members of the committee will be provided.

The committee is composed of the following:

Crystal—Mrs. F. A. Gabrielson, Crystal Lake
Britt, including twn of Britt—E. D. Calkins, Britt; Mrs. E. P. Healy, Britt
Bingham—Mrs. A. W. Lewis, Woden.
Orthel—Mrs. Walter Fox, Britt, Route 4.
Boone—Mrs. Wm. Noll, Britt, Rt. 2
Magor—Mrs. Fred Oxley, Corwith
Amsterdam—Mrs. F. L. Bush, Kanawha.
Erin—Mrs. C. H. Wood, Britt, Rt. 1
Twin Lake, Mrs. Elmer Snyder, Goodell
Liberty—Mrs. John Stille, Klemme
Garfield—Mrs. Geo. Hajlik, Garner
Madison—Mrs. J. J. Lowe, Hayfield
Ellington, Mrs. F. A. Miller, Miller
Concord, including Garner—Mrs. F. E. Blackstone, Garner; Mrs. W. S. Pritchard, Garner
Ell—Mr. Frank Gruetzmacher, Klemme
Avery—Mrs. L. W. Wesenberg, Goodell

Anyone wishing to get in touch with the nurse may do so by notifying the representative on the committee from their township.

This committee at a meeting in Garner on August 27th, elected the followng to compose an executive committee: County Supt. of Schools A. E. Boggs, Chairman; Mrs. Fred Oxley, Crwith; Mrs. F. E. Blackstone and E. D. Calkins, Britt.

Miss Ferleman began work September 1st.

From E. D. Calkins, Britt

PETIT JURROS FOR THE OCTOBER TERM, 1920

Alex Nelson, Bert Abbey, A. W. White, J. H. Lyman, S. B. Engstler, Oscar Erickson, Ed Oxley, Alvin Valley, Alfred Johnson, B. Riscards, A. C. Trulson, E. Josten, W. H. Larson, V. Waldeck, O. E. Lester, Dick Swalve, J. M. Berkley, Jim Teahl, Wm. Greiman, Arthur Hunsley, O. L. Schlavene, A. L. Rofinot, Tom N. Nelson, W. F. Biers, Homer Young, Frank Whistler, Otto Woiwood, Harvy Quintus, W. H. Ingram, Gunder Asby.

A. E. Baumgartner, Clerk

THIEVES ENTER KLEMME DEPOT

Sometime between Saturday night and Monday morning thieves entered the Klemme depot and broke open the gum machine, taking out about four dollars worth of pennies and emptying the machine of all the gum, overlooking two pennies in the bottom of the machine.

The thief or thieves gained entrance through the waiting room door which is usually left open all the time and is only connected to the office by the ticket window.

Agent Barr did not discver the brken gum machine until some time after he had gone to work Monday morning. Nothing else in the depot had been disturbed.

Sporting Goods

Everything for the Hunter

We carry an exceptionally fine line of sporting goods for fall and you will fine the gun and rifle you want here.

Winchester and Remington Guns

We carry a full line of Winchester and Remington Repeating Shot Guns and Rifles at prices that are right. We also carry a big assortment of shells and catridges; Hunting Coats and caps, Flashlights; Pocket Knives; in fact everything the hunter needs.

JACOBS & SON
HARDWARE KLEMME, IOWA

CZAR'S JEWELS IN U. S. HANDS

Sent to Ludwig C. A. K. Martens, Bolshevist Envoy, by Soviet Government.

FOUND ON A SWEDISH SAILOR

Precious Stones, Supposed to Have Formed Part of Famous Jewels of Russian Royal Family, Unearthed by Federal Officers.

Washington.—Traffic by bolshevist agents in precious stones, supposed to have formed part of the famous jewels of the Russian royal family, has been unearthed by federal authorities.

The 131 diamonds found on Nells Jacobson, a Swedish sailor, by customs officials in New York July 23, it became known, were inclosed in a package addressed to "Comrade Martens." Using this as a lead, federal officials began an investigation which they declare has definitely connected Ludwig C. A. K. Martens, self-styled soviet ambassador to the United States, with the traffic.

Disclosure of the fact that the package was intended for soviet agents in this country was withheld by customs authorities when Jacobsen was arrested, although the details as to the seizure of the jewels themselves were then made public.

Identifies Martens' Aid.

Jacobsen, officials say, identified during the course of the investigation a photograph of Santeri Nuorteva, former secretary of Martens, as a person to whom previous packages had been delivered.

Introduction of the alleged incriminatory evidence of the traffic in precious stones between soviet representatives in this country and abroad at the last hearing in the last deportation proceedings against Martens resulted in postponement of further hearings to enable the self-styled ambassador to obtain evidence, if possible, in refutation of the charges.

Counsel for Martens already has asked that the government commission be sent to Stockholm to investigate the system in which he is accused of being implicated.

Perfect Courier System.

Begun six months ago, the smuggling is described by government officials as the most perfectly organized courier service between bolshevist agents abroad and in the United States that has been discovered.

Inclosed about the diamonds taken from the possession of the Swedish sailor Jocobsen, whom officials exonerated from any complicity in the illegal proceedings, was a quantity of communist literature, including an "appeal of the executive committee of the third internationale at Moscow to the I. W. W." This manifesto declared:

"Unless the workers of other countries rise against their own capitalists the Russian revolution cannot last."

GIRL SAVES PREACHER'S LIFE

University Student Sucks Blood From His Leg After Attack of Rattlesnake.

Chicago.—Mis Frances B. Holstein, a student at the University of Illinois, earned her scholarship and a Carnegie medal by methods quite out of the ordinary. She saved the life of Rev. Benjamin W. Soper, pastor of a small church in Florida, by quick thought and action after he had been bitten in the ankle by a large rattlesnake, one of the lazy, highly venomous type so frequently met with in Florida.

Miss Holstein was one of a party which included Rev. Mr. Soper, Bishop Cameron Mann of the Episcopal diocese of Florida, and others who were enjoying a picnic near Cocoanut Grove. Rev. Mr. Soper was bringing a pail of water from an adjacent spring when he was struck by the rattlesnake. Bishop Mann immediately killed the snake, but Miss Holstein gave her attention to the wounded man, whose ankle was swelling enormously.

Motorists Startled by Cigarette-Smoking Snake

Motoring near Bellefonte, Pa., a party of motorists were confronted by a huge blacksnake coiled in the middle of the road, smoking a cigarette. They rubbed their eyes to make sure they were not seeing things when they heard laughing nearby and several young men stepped from the bushes. They were members of Prof. J. A. Ferguson's class of foresters from the Pennsylvania State college, who were camping nearby and had killed the snake and put the cigarette in its mouth to see what would happen when the first man who came along would discover it.

Girls Help at Threshing.

Petersburg, Ind.—Owing to the scarity of labor in the vicinity of Otwell, Olive Rhoades, winner of the plowing contest at Oakland City, called five of her girl friends to help Peter Himsel, owner of the largest farming interests in Pike county, to thresh his wheat crop. Besides Miss Rhoades, Louis Clark, Verda Dempsey, Maude and Helen Harris and Edna Gray assisted Mr. Himsel. The girls helped load and unload the wheat wagons and also drove the wagons from the field to the threshing machine.

SUPER-CANNON WAS CLUMSY

Giant Gun Used for Long-Distance Shelling of Paris No New Invention.

MADE FROM WORNOUT GUNS

Was 122 Feet Long, Weighed 318,000 Pounds and Threw Projectile Weighing 264 Pounds a Distance of 75 Miles.

Paris. — The super-cannon with which the Germans began shelling Paris, March 23, 1918, was just pieces of old, wornout guns put together, instead of a startling new invention, according to American army officers, who were permitted recently by the Germans to visit some of their huge armories.

It was actually just a neat bit of patchwork that startled the world when the terrific explosions began detonating in the streets of the city of Paris, although the verdict at that time was unanimous that the Germans had invented a marvelous new cannon.

Naval Gun Was Foundation.

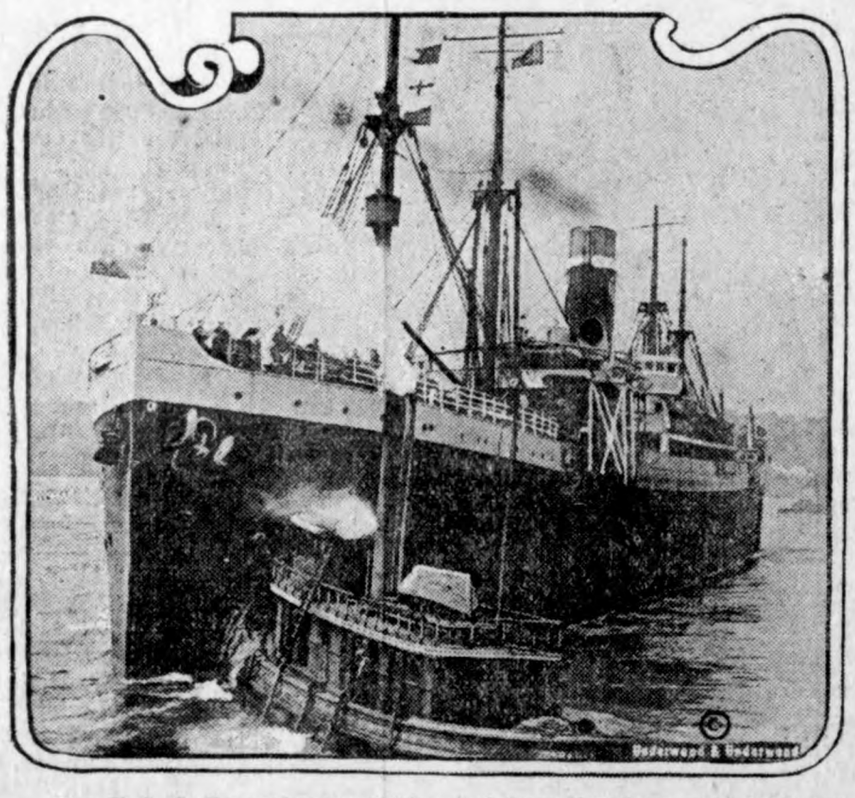
To begin on the super-cannon, the Germans took a wornout 15-inch naval gun, 56 feet in length. It was bored out and a very heavy tube with an inside diameter of 8.3 inches was inserted, with about 40 feet of it projecting beyond the end of the original gun. Over that another hoop was shrunk and locked to the forward hoop. There also was a patch of 19.7 feet, which was attached at the muzzle of the gun.

The bore of the gun was treated to a uniform rifling, the lanes and grooves which impart a rotary motion to the projectile. The six-meter section of the gun at the muzzle, however, was unrifled, probably designed to steady the projectile and defeat its slight tendency to "tumble" or yaw and fail to travel directly to its mark. Such "tumbling" is caused by the conflict of two forces, one spinning the projectile to the right, the other sending it forward. Such a force had to be obviated as the shell had to travel upward 24 miles on its arc in order to cover the horizontal distance of 75 miles.

Clever Expedient to Prolong Life.

The life of the giant gun, which was 318,000 pounds in weight and 122 feet long, under the heavy pressure of its high velocity projectile was very limited. But when the Germans found the span of the gun amounted to only 50 pounds they hit upon a clever expedient. They bored out the 21-centimeter tube, which was very thick, to 24 centimeters, and later to 26 centimeters, giving it just so much more life at each caliber, with only a change to larger ammunition required. The shell hurled by the cannon weighed 264 pounds and was 19 inches in length.

First American Ship to Bremen



The U. S. S. Susquehanna, which sailed from New York with 1,800 passengers for Bremen and Danzig, the first passenger liner to sail under the American flag to these ports, and the first ship of the United States Mail Steamship company to be placed in commission.

Catch Blue Lobster Off Shore of Massachusetts

Nantucket, Mass.—Capt. Sylvia of the steamboat Sankaty was presented with a rarity—a blue lobster. A fisherman brought him ashore, much elated over his rare find, and handed him over with some pomp and ceremony. The freak was a deep, rich navy-blue in color, instead of the customary green, but, boiled, he turned red, just the same as his ordinary brother.

YANKEES IN DANGER

Many Have Close Calls in the Turkish War Zone.

Bullets of Bandits, British and Greeks Keep Americans on the Jump.

Constantinople. — Many Americans have had narrow escapes in the fighting which British and Greek troops have kept up for several weeks with the bandits which are harassing the eastern shore of the Bosporus. Beikos, a summer place ten miles north of this city reached by hourly ferry service, has been the chief center of the fights between bands of adherents of Mustapha Kemal Pasha, nationalist leader, and the British-Greek soldiers operating under the artillery protection of British warships.

An American oil company is erecting two great steel tanks at Beikos, which came well within the line of fire between the rival forces. The steel riveters were compelled to flee for their lives and for several days bullets played a tattoo on the tanks, which was nearly as constant as the tune of the riveting machines. Many Americans were in summer camps and cottages in the vicinity of Beikos the night the fighting began, but they speedily moved to the western shore of the Bosporus, where it was possible for several nights to watch the fighting on the Anatolian hills by the light of the naval rockets and searchlights used in directing the gunnery.

Robert college and Constantinople College for Women, the two American institutions of higher learning on the Bosporus, both commanded an excellent view of the struggle and were safely out of range of the nationalist bullets.

Prof. F. W. Kelsey of the University of Michigan was prevented by the fighting in Anatolia from making a survey of the famous battle fields of Caesar, south of Samsoun. Professor Kelsey has been in Turkey for many weeks investigating old manuscripts and studying ruins of the Roman civilization.

He hoped to make the trip from Samsoun to Zile, about which one of Caesar's best-known campaigns was waged, and had made all arrangements for motor transportation. But the unsettled political conditions and the activities of the various bands forced him to abandon the expedition.

Choked Girl by "God's Orders."

Moss Point, Miss.—Louis Smith, shipyard worker, killed his four-year-old daughter, Lula, by strangling her to death. Passers-by, witnessing the tragedy from a distance, held him until he was placed under arrest.

Smith told the officers that he had been ordered by God to kill his daughter, and now that he had carried out God's wish, he was ready to die himself. The man is believed to be mentally deranged.

MOVIE ACTRESS DIES OF POISON

Olive Thomas, Famous Film Star, Succumbs in Hospital in France.

TOOK FATAL DOSE BY MISTAKE

She was Known Throughout Entire United States By Picture Show Patrons. Death Attributed to Orgy of Dissipation.

Paris—Olive Thomas, formerly widely known on the American musical comedy stage and for several years past a motion picture star, died in the American hospital at Neuilly, after having swallowed a poisonous solution.

Recently Miss Thomas, who came to Europe with her husband, Jack Pickford, had suffered from nervous depression, it was said.

The fatal illness resulted from an overdose of "medicaments" prescribed for her for a breakdown occurring after a "too strenuous seeing of Paris," according to friends.

Several nights prior to her death an American millionaire gave a big party and all-night dance for Miss Thomas. He refused to say anything following the party, but it is understood that the strain of repeated gaities brought about the breakdown for which the "medicaments," the exact nature of which is undisclosed, were prescribed.

Olive Thomas was once heralded by the late Raphael Kirchner as the most beautiful girl in America. Her real name was Olive Elain Duffy. She was 22 years old, having been born October 20, 1898, at Charleroi, Pa. She began her career as a motion picture actress in Los Angeles nearly four years ago.

French police are investigating her death. Investigation also is being made by the police of sinister rumors of cocaine orgies, intermingled with champagne dinners, which lasted into the early hours of the morning, that have been afloat in the American colony and among the habitues of the French cinema world during the past few weeks.

Found Guilty of Lucken Shooting.

Fremont, Neb.—John Olson was declared guilty of attempting to murder Harm B. Lueken, May 12, by a district court jury, two and one-half hours after it retired to deliberate.

As the district court jury retired to consider the case, Mrs. Florence Olson, wife of the defendant, filed a suit for $25,000 damages against Mrs. Sophie Lueken, alleging alienation of her husband's affections. She accuses Mrs. Lueken, whose testimony, when she turned state's evidence, admitted an intimacy with Olson over several years, of writing letters, causing Olson to visit her, sustaining illicit relations with him and deliberately seeking to win his love from his wife.

State Fair Best Ever.

Lincoln, Neb.—The 1920 Nebraska state fair officially closed its gates last Friday after the most successful exposition in the history of the state. The total attendance this year was 270,664, compared with 262,458 last year, which was the high water mark up to that time. The total number of automobiles admitted to the grounds this year was 31,458 and grand stand admissions 69,514. The receipts this year will show a handsome return for the state fair board as compared with former years due to the increase in the admission price to 75 cents against 50 cents admission of former years.

MacSwiney to Be Fed.

London.—The moment Lord Mayor Terence MacSwiney lapses into complete unconsciousness from his hunger strike, he will be forcibly fed, Brixton jail physicians have announced.

"We would feed him by force now, if it weren't that it would kill him if he struggled against it," one physician said.

Officials Shot Down in Ireland.

Tullow, County Carlow, Ireland.—Armed and masked men attacked four police officers here. Two of the constables were shot dead and another seriously wounded.

Miners' Vacation to Continue.

Scranton, Pa.—That there will be no change in the miners' "vacation" situation, throughout the anthracite field until President Wilson or Secretary of Labor Wilson makes definite answer to the request of the general scale committee of the miners' union for an immediate reopening of the case, was stated by leaders of the organization in three districts comprising the anthracite field. The situation in the Scranton district is not changed, it was stated by union leaders.

Farm Tenantry Increasing.

Topeka, Kan.—Farm tenantry is increasing rapidly in Kansas first reports of a survey by the state board of agriculture indicate. Scott county, the first to report, showed 57.4 per cent of its farms being worked by tenants, an increase of 38.1 per cent since 1910. The trend in the state for a number of years has been away from farm ownership, census bureau statistics reveal. In 1880 tenantry was 16.3 per cent and in 1910 it had increased to 36.8 per cent. The estimated percentage in 1918 was 48.

CONSPIRE TO BOOST PRICES

Federal Trade Commission Recommends Suit Be Instituted Against Implement Firms.

Washington, D. C.—Judicial proceedings should be instituted against associations which have been restraining trade in farm implements, and the International Harvester case should be reopened to effect a plan of dissolution more drastic than the one already agreed to, the federal trade commission states in a report in response to a senate resolution adopted last spring.

The commission says farm implement manufacturers and dealers advanced prices in 1917 and 1918 by amounts larger than their increased cost and expenses warranted, and that they made unusually large profits.

On the other hand, it states farmers were not prevented from making as much profit as formerly, because prices of farm product increased in even greater proportion.

The commission says the partial dissolution of the International Harvester company in 1918 "did not change the dominating position of that company in the harvesting machine line, and will not do so while the McCormick and Deering plants and the steel business remain united under its control, either directly or by common ownership of stock."

MEANT TO KILL ALL ABOARD.

Confessions Made by Foreign Communists of Murderous Plot.

Springfield, Ill.—Confessions from the eight conspirators said to be directly connected with the plot to wreck the "diamond special" of the Illinois Central railroad near here, were obtained by Chief of Police Morris and federal agents. Officials declared their belief that had the plan been carried out not one passenger on the train would have escaped alive. Nineteen foreigners are under arrest and all are declared by officials to be communists. The track, according to the confessions, was to have been torn up about 300 feet from a bridge near the village of Bissell, so that the train would be plunged into the ravine, about fifty feet in depth.

Whatever passengers remained alive, Chief Morris declared the confessions said, the plotters intended to kill and then "to kick in the teeth of the rich." The diamond special was selected "because only the rich ride on it, poor people don't ride in sleepers."

OBREGON ELECTED.

Liberal Candidate Chosen President of Mexico By Big Majority.

Mexico City.—General Alvaro Obregon, candidate of the liberal constitutionalist party, won a decisive victory in the presidential elections held throughout the republic September 5.

His opponent was Alfredo Roblez Dominguez, who was nominated by the national republican party. The vote was extremely light and no reports of disorders have been received.

There have been reports that changes in the cabinet were imminent but Miguel Alessio Roblez, private secretary to Provisional President De la Huerta, said members had resigned and that the provisional president was not thinking of making any changes

Nearly 10,000 Bodies Returned.

Washington, D. C.—The war department has announced that the bodies of 8,288 American soldiers and sailors who died overseas have been returned to the United States and that 2,050 more are aboard transports en route to this country.

Removal of bodies from the "zone of the armies" will begin at once, on formal request from the legal next of kin.

Esch Defeat Pleases Railroaders.

Washington, D. C.—Officials of the railroad labor organizations' political campaign committee were jubilant over news of the defeat of Representative John J. Esch of Wisconsin for renomination to congress in the republican primary.

Bureau Partly Self-Supporting.

Washington, D. C.—Records of the committee on public information, wartime branch of government service, headed by George Creel, show it spent $8,245,249, but cost the government only $4,954,200, because it was partly self-supporting.

Flu Still Is Mystery.

Washington, D. C.—A recurrence of influenza would find medical science with but little more information on the scourge than when it first appeared, according to the public health service. The disease remains a mystery. Scientists believe influenza will appear next winter, but perhaps not in epidemic form. No "cure" has been found, the germ has not been identified, and means for combating the disease are little better than before the war.

Sugar Drops to 15 Cents.

New York.—Sugar has taken another tumble of 1 cent to 15 cents a pound retail. A short time ago sugar was hard to get at 25 cents a pound.

One-Tenth In Three Cities.

Washington, D. C.—About one-tenth of the people of the United States live in the cities of New York, Chicago and Philadelphia, while more than one-quarter live in sixty-eight cities having a population of 100,000 or more, final statistics of the fourteenth census are expected to show.

FOSTER-MILBURN CO., BUFFALO, N.

The MAN NOBODY KNEW

by HOLWORTHY HALL

"OH, MY GOD!"

Synopsis.—Dick Morgan of Syracuse, N. Y., a failure in life, enlisted in the Foreign Legion of the French army under the name of Henry Hilliard, is disfigured by shrapnel. The French surgeons ask for a photograph to guide them in restoring his face. In his rage against life he offers in derision a picture postcard bearing the radiant face of Christ. The surgeons do a good job. On his way back to America he meets Martin Harmon, a New York broker. The result is that Morgan, under the name of Hilliard, goes back to Syracuse to sell a mining stock. He is determined to make good. He tells people of the death of Morgan. He finds in Angela Cullen a loyal defender of Dick Morgan. He meets Carol Durant, who had refused to marry him. She does not hesitate to tell him that she had loved Morgan. Hilliard finds he still loves her and is tempted to confess. Hilliard tempts Cullen, his former employer, with his mining scheme. He discovers a rival for Carol's love in a nice young fellow named Armstrong. Hilliard betrays his love to Carol and is told he has "one chance in a thousand." He sells large blocks of mining stock to Cullen and others. Harmon unexpectedly arrives in Syracuse.

CHAPTER IX—Continued.

—10—

Thank you. And you might take those drafts now; three of 'em. Right? Good. Well—any developments?"

"What?" Harmon tapped his cigarette case in the palm of his left hand. "Oh, you mean the mine?"

Hilliard nodded. "Yes. Have you been any further with the shaft yet? Two or three of the more cautious men are holding back until something happens with that."

"Shaft?" Harmon was puzzled. "What shaft?" He placidly stowed away the drafts. "I'm not sinking any new shafts at this stage of the game."

It was Hilliard's turn to be puzzled. "Why, I mean the old shaft on Silverbow No. 1. Have you gone any further with it? I've told these people you were just starting. That's right, isn't it?"

Harmon laughed noisily. "Oh, that shaft! Don't you think it a little early to begin on that? Yes, about ninety thousand dollars too early?"

As Hilliard sat gazing at him in profound bewilderment a waiter slid up alongside him and coughed for his attention. "Gentleman wants to speak to you outside, Mr. Hilliard. In the lobby. Says it's important."

"Oh!" Hilliard drew the back of his hand across his forehead. "Tell him I'll come right out. Will you excuse me a moment, Mr. Harmon?"

"Sure! Go ahead." The promoter sank back comfortably and gave him a wave of dismissal. Hilliard, his pupils narrowing, went out to the doorway. Some pace or two distant one of the vice presidents of the Trust and Deposit company—a friend of Cullen's and a very good man to know—was loitering attentively.

"Hello, Hilliard," he said, wrinkling his forehead. "How are you? Look here, it's none of my business, of course, but I couldn't help wondering how much you know about that chap you're sitting with. Don't be offended; it's a friendly question. Simply interest in you as one of our clients."

"Why, I know a good deal about him."

The banker continued solemnly: "You probably know a lot more about him than I do, then, but just the same, I wanted to make sure. That's all." He turned, but Hilliard stopped him.

"Well, what do you know about him?"

"Before I answer that—is he a friend of yours?" The question was a bit blunt to be diplomatic, and too suggestive to be disregarded.

"Not exactly that; he's a rather good acquaintance, though. In a business way only—what he is socially I don't know, and I don't think I much care."

"So you don't need any advice about your business connections?"

"Why, I think not." He was nettled by the banker's manner.

"The only thing about it," said the vice president, nettled in his turn by Hilliard's brevity, "is that if you'd said you didn't know him very well, I'd have offered you some suggestions. I'd have expected you to thank me—I really would. Under the circumstances I can't very well go any further than this. Sorry I interrupted you."

"No, but wait a minute! I—"

The vice president's refusal was firm and definite. "I can't say another word. Not another one. If you know him, that's sufficient." And he strode away across the lobby, leaving Hilliard dumfounded.

Mr. Harmon, smiling broadly, half arose from his chair as the masquerader came slowly back to the table and sat down hard.

"Well," he said. "More business?"

Hilliard shook his head.

"On the contrary." His voice had in it a curious dullness which the broker was quick to catch.

"No bad news, I hope?"

"I'm not sure. Let's go on discussing the mine."

"Not much else to discuss, is there? It's the same old mine." He looked intently at Hilliard. "What's got into you, anyway, in the last couple of minutes? You've lost all your pep. You look as though you've seen a ghost."

"Maybe I have," said Hilliard, with a short laugh.

"Well?"

Hilliard regarded him with an odd intermingling of respect and alarm. The respect was a holdover from the past—from the early impression he had formed from Harmon's resplendent offices in New York, and Harmon's contempt for money. He had considered his employer, at worst, a weak-principled vendor of legitimate securities.

"Mr. Harmon," Hilliard said reluctantly, "I'm in a mighty awkward position. . . . We can't afford to let anything spoil this campaign, can we?"

"Not if we can very well help it. What's bothering you?"

"For over ten weeks now, I've been building up a reputation—you know what I've been doing; you know how much depends on it. Your name hasn't been mentioned once; I've been selling this thing on my own personality—holding myself out as the principal. Well, the man who called me outside just now—and he's one of the solid banking crowd up here—he spoke of you as though he knew you. In fact—to be perfectly frank—he called me out there to ask me about you. Now, I don't know what dealings you've ever had with him, or with anyone else up here, but it struck me that if there is anything between you and Syracuse, or any of its fairly big men, perhaps it would be better if I knew it. You see, this thing I'm selling is so darned personal—"

"Who was he?" Harmon's voice rasped.

"Embree—of the Trust and Deposit company."

"Oh, yes." Harmon smoked reflectively. "Yes, we know each other. What did he have to say?"

"It wasn't so much what he said as the way he said it. I suppose you've had some disagreement with these people?"

"Some disagreement," admitted Harman, grinning. "These up-state farmers and I love each other like a couple of strange bulldogs. Still—"

"If it isn't objectionable to you," said Hilliard, hesitating, "I'd rather like to know a bit about it, Mr. Harmon. The subject might come up later. It's almost sure to, now that Embree's seen you and spoken to me about you. And if you've had any quarrel with this crowd, even if it wasn't your fault, and if it came out that I'm working for you, and there was any talk about it, you can see how I'd have to be on the defensive. . . . So if you could just give me a faint idea—"

"But Wait a Minute!"

"Plain English is a lot better than a faint idea," said Harmon carelessly. "I floated some steel bonds up here once. Prettiest bonds you ever saw in your life, too."

"Oh! And they didn't turn out well?"

"Not exactly. The company was too much like Silverbow, I guess—all float and no lode."

For a moment, Hilliard thought that he hadn't heard aright.

"What was that you said?" he managed.

Harmon reiterated it.

"Too much Silverbow. Only they pumped the water out of it sooner than we will. That was five years ago."

At first, Hilliard was untouched by the shock; the force of it seemed to pass over him entirely; then all at once, as he was caught by the drift of it, his hands began to tremble violently; and his palms were clammy with sweat. His stomach seemed to drop out of him, and he was nauseated by the tremendous purport of his employer's cynicism.

"Mr. Harmon!" he panted, under his breath, "Mr. Harmon!"

The New Yorker looked at him in genuine surprise.

"What's the matter, Hilliard? You look sick! Or . . . d——n it, man, if that's another one of your bluffs, you're wasting your time. You haven't worked up such a holy disposition you believe in this mine, have you?" He moved uneasily. "I wish you'd wipe that pious expression off your face—or is it glued on?"

"Hilliard's voice shook uncontrollably.

"This . . . this mine!" he stammered. "You told me—"

"I'll stand by everything I've ever told you, Hilliard. I'll prove it. It's an area of mineralized schist with disseminated copper values. And we've got over a hundred acres of it. And part of the shaft, too!" He laughed noiselessly. "Of course, altogether there's about five hundred square miles of that same sort of land in the same state, but what's the odds as long's you're happy? Tell me you aren't wise? Rot! Why, you knew all about it when we were on the boat!"

Hilliard's muscles were working in hysterical jumps, and his face was distorted.

"Y-you . . . y-you're saying . . . y-you're saying I've been selling . . . s-selling to my friends a piece of d——n worthless property? Are you?"

"Shut up!" The big man was dominant, ugly. "Understand me? You keep your mouth shut if you know what's good for you! Didn't you come up here to get square with your 'friends?' Your friends!" His accent was superlatively contemptuous. "You knew it wasn't a producing mine, didn't you?"

"You told me it was a wonderful prospect! I knew it was a long shot, but I thought there was some value there . . . a lot of it . . . and you said the shaft . . . you always said the shaft was—"

Harmon reached for another cigarette; there was undisguised perplexity on his face.

"Son, if you aren't a mighty good actor, you're . . . are you going to claim you didn't know what this mine is? After all that whining and squealing of yours about your getting even? Then what in thunder did you want to come back here for?"

"To make some money—to get some fun out of it. I wanted to make fools of people; I didn't want to swindle anybody! I thought I was giving 'em something for their money! I—"

Harmon lighted his cigarette, none too complacently.

"The funny part about it," he said slowly, "is that I don't honestly believe you're bluffing. . . . But you knew it was only a prospect."

"But I thought it was a good prospect! Never mind—" He made as though to rise. "You've said enough. I'm through with you!"

The big man's jaw thrust out belligerently, and he caught Hilliard by the arm.

"Now, stop right there! Sit down! Sit down! Maybe you thought it was a good prospect and maybe you didn't, but you're not through with me yet—not until I say so. Don't you make any mistakes like that, my boy. Don't you go off half-shot—not yet! Remember our contract? Ever heard of promoter's liability? I'd certainly hate to see you get into trouble, but if you've made any wild statements about material facts—"

Hilliard was straining half across the table.

"You told me the ore was there! And I thought the worst that could happen would be to tie up this money for a few years—that's why a prospect's so hard to sell! I knew darned well it wasn't any whirlwind right now, but I did think they'd . . . they'd at least make something good out of it . . . eventually . . . even if it . . ."

"Ah!" said Harmon, sneering, "but you had every opportunity to learn the facts—ev-e-ry opportunity. It's not my fault if you went off half-cocked. I don't know what you've represented to your gang up here. I'm not responsible. All I know is that you've collected sixty-two thousand dollars, and turned it over to me, and I'm to give you stock for it, and pay you a rebate in cash. Maybe you call it a commission . . . it's a rebate! Read the contract. Read it carefully, while you're about it. Take it to a lawyer; I don't care. Any lawyer you like. If you've gone beyond the facts I'm mighty sorry for you, but I don't see how it affects me any. Do you?"

Hilliard had slumped wretchedly into his chair; his thoughts were running aimlessly about the grim axis of his chicanery.

"And . . . and after all I've done!" he said thickly. "After all I've said! Oh, my God!" His chin sank low, and his grip on the table relaxed.

Harmon was less at ease than he pretended. "Well, if you aren't bluffing," he said presently, "you sure are the biggest baby for a man's-sized man I ever saw. Brace up, there! You—"

Hilliard pulled himself erect with a final effort, and his fist gestured his accusation.

"You know what I'm going to do about it, don't you?"

"Yes." Harmon nodded, as he drew the smoke deep into his lungs.

"I'm going straight back to those four men, and—"

"No." Harmon wagged his head. "No, you can't very well do that, either—even if you're as shocked as you look. Look at it just a minute . . . look at our contract. There's some loopholes for me you could drive a motortruck through; but you haven't got one as big as a knitting needle. No, son, the best thing for you to do is to take a brace, and go get another sixty thousand while the getting is good."

"Not necessarily!" Hilliard's high-pitched laugh was brittle.

Harmon allowed the smoke to eddy gently from his nostrils. "Yes—necessarily."

"You think I'll raise my finger after this, except to . . . what do you take me for?"

"I take you," said Harmon deliberately, "for a short-sighted young man in a mighty bad spot. You don't want these folks up here to know the whole truth, do you? It wouldn't hurt me any—but after the record you made

And His Fist Gestured His Accusation.

here before you got yourself kicked out two years ago. . . . Oh! don't jump! You don't think I've been asleep, do you? . . . I don't believe you'd get much sympathy. Not much! And I've invested a lot of money in you. . . . I want some big returns. Look me in the eye, son. I want you to calm down. Now, there's only three parties to this deal—you and me and the world. You and me—and the world. Get that? And you and I have got to play straight with each other. You help me get the money, and I'll help you get whatever you want. But when you throw me down, I throw you down, and we'll see who comes out ahead. I'll bet I do. What do you bet?"

Hilliard shook his head helplessly.

"You've got to remember," said Harmon in sardonic consolation, "that you're an awful easy man to describe. You can slip out of Syracuse just as easy as you please, and try your durnedest to make a getaway, and you'd have pretty hard work to keep away from the Pinkertons for twenty-four hours. And I've got the evidence that would put 'em after you. So don't you plan to run away, son—don't do it."

Hilliard's judgment was tottering. Where did he stand in relation to Armstrong now?

"Well?"

Harmon snatched at the sign of weakness, and was instantly persuasive.

"Stay on another six weeks; make the rest of your killing. After this is over, do what you please. You'll have money enough to suit yourself. I'm playing straight with you . . . am I not?"

"Yes," said Hilliard, with withering sarcasm, "you are!"

Harmon glowered at him.

"Don't you accuse me of double-crossing you, son! It's the other way round."

"You aren't fool enough to expect me," said Hilliard shakily, "to keep on trying to sell more of this rotten stuff! You aren't enough of a fool for that—"

"I can, and I do. You're in for it now, Hilliard, and you can't very well go back. You've collected money; you can't get your hands on it again; you can't make any restitution. You've lied your head off already; you can't do any better now than to stick to your first story, because the truth's a good deal worse. You'd better make your killing and make it quick. And if you open your head for just one little peep . . . flooey, flooey, and the fat's in the fire. Well . . .?"

Hilliard's head was splitting with the horror of it. He saw, in a whirling vision of dread, the people of the city rising to denounce him; not merely for his inexcusable masquerade, so grotesquely built upon the dream of regeneration, not only for his vast abuse of personal confidence, not only for the base hypocrisies he had practiced upon his quondam sweetheart, but also for this grossly profitable fraud. Dimly, he argued just as Harmon claimed, he couldn't be in harder straits. A spasm of reckless fatalism shook him.

Harmon, who had been inspecting him critically, took out his fountain pen.

"I'll write you your check for commissions—shall I?" He held the pen poised insinuatingly. "And then we'll forget this little misunderstand, and start fresh. Shall I? Let's see," with great attentiveness to the figures. "Your twenty per cent is twelve thousand four hundred, and that, less half expense . . . call 'em five thousand even . . . that's seventy-four hundred." He tore a sheet from his pocket check book, dried the ink by waving it in the air, and flirted it over to Hilliard. "Put it away and let's have some lunch. If you're afraid to have your friends see me down here, let's have it upstairs. I'm not sensitive, son; it don't pay."

"No," said Hilliard, dully, "and I guess it never will."

"That's the idea! Now you're talking sense! Come on, son, buck up and let's have some lunch. . . ."

* * * * * * *

At eight o'clock in the evening, when Rufus Waring knocked at Hilliard's door, it was opened by a man with a face to remember afterward. There were deep-cut lines—almost furrows—by the mouth and eyes; and the eyes themselves were startlingly luminous, and drawn. The man's complexion was chalk-white.

"Why, Mr. Hilliard!" exclaimed Waring. "What on earth's the matter with you?"

"Come on in," said Hilliard, and his smile was ghastly. "I've been waiting for you."

CHAPTER X.

Hilliard was waiting, hoping, praying for a blow from fate, but fate, which at other times had been ready enough for fisticuffs, and often premature with them, refrained from striking. The interview with Waring had passed without friction (and Hilliard had so contrived to present his data that Waring had finally declined the risk) and the night passed and the morning came, with its accompanying horde of old regrets and a new and sweeping inrush of fresh hallucinations.

To his tortured imagination, he was a greater paradox than even Jekyll and Hyde; for he was Hilliard and Dicky Morgan, the living and the dead, without the boon of the supernatural to separate them. And yet he felt that the wickedness of what he had done was the wickedness of Dicky Morgan, and that he, Hilliard, the soul, was sitting in impartial judgment on Dicky Morgan, the flesh. He conceded the wrong; he conceded the penalty; nevertheless, his youth cried out to him for mercy.

* * * * * * *

At the maid's announcement, Doctor Durant, who had been occupied with nothing more momentous than filling a pot-bellied calabash, rose hastily and went out into the hallway.

"Come in, Hilliard!" he said cordially. "Carol's off looking at somebody's trousseau . . . somebody's always getting married in Syracuse . . . she'll be in directly. Come smoke a pipe with me, and be sociable."

Hilliard, lingering nervously by the outer door, started at the kind voice.

"You're not busy?"

"Busily composing my mind," said the doctor. He ushered Hilliard into the comfortable old study and motioned towards a squat little smoking stand. "All kinds of poison there," he said. "Cigar—cigarettes—pipe tobacco. Suit yourself."

Hilliard laughed affectedly.

"You call it poison? And you a doctor—and smoking?"

"Ah, but it's the pleasantest poison there is. . . . I'm always having to explain that to Carol. . . . Matches? Well, what have you been doing to yourself?"

"I?" Hilliard didn't look at him. "Nothing important, doctor."

"But that's not quite true, is it?" The tone was gentle, but it filled Hilliard with portentious qualms. "You've been enjoying a little attack of insomnia, haven't you?"

Hilliard winced.

"Why—yes. As a matter of fact—"

The doctor attempted a smoke ring, and smiled at the dismal failure.

Harmon is revealed in his true light.

(TO BE CONTINUED.)

Chameleons' Food.

The proper diet of chameleons and lizards consists of flies and other insects; also meal worms, and the common idea that sugar and water will serve in winter is incorrect. A good many of these animals refuse food in the winter months and all of them need warmth and sunshine, as well as water. They are difficult to keep in health, and if not given their natural food will starve to death in time, though their ability to fast for long periods is well known.

Many Still Read Dickens.

Charles Dickens has been ruled out by a class of the younger literary critics as a decided back number, but the statement by his British publishers that during the past three years the sale of his books has been almost doubled seems to refute that idea. Some of Dickens' novels sell more than 50,000 every year, and he has been dead forty-eight years. His sales during the last ten years have been larger, it is asserted, than those of any three novelists put together.

A simple appliance, easily attached, has been invented for preventing telephone cords twisting.

TOO LATE

Death only a matter of short time. Don't wait until pains and aches become incurable diseases. Avoid painful consequences by taking

GOLD MEDAL HAARLEM OIL CAPSULES

The world's standard remedy for kidney, liver, bladder and uric acid troubles—the National Remedy of Holland since 1696. Guaranteed. Three sizes, all druggists. Look for the name Gold Medal on every box and accept no imitation

TO EVERY READER

There is no pure herb family medicine in the world today that can equal the power and give such grand results in regulating the bowels, stimulating the liver, flushing and cleansing the kidneys, sweetening the stomach or purifying and enriching the blood—than

BULGARIAN BLOOD TEA

Those who suffer with stomach, liver, kidney, rheumatism or blood troubles will find Bulgarian Blood Tea the best medicine to relieve and correct these ailments. It is wonderful how quick you will begin to pick up and be your old-time self again.

During the 1918-19-20 influenza epidemic Bulgarian Blood Tea was used by countless thousands of sufferers with marvelous success and millions of people took it steaming hot to prevent and ward off the disease.

As a general first aid family medicine it has no equal and every person should have a box constantly on hand for any emergency—to kill colds, allay fevers and guard against influenza, pneumonia or other serious sickness. And all mothers and fathers of families should apply at once to their druggist or grocer for a trial box of Bulgarian Blood Tea.

Not to Be Outdone.

Frances, Janet and Eleanor were discussing the respective merits of the babies in their households, and Frances had led off with:

"My baby brother is only four months old and he has two teeth already."

"My little sister," announced Janet, "is only five months old and she has three."

"That's nothing," said Eleanor. "My little brother hasn't any teeth yet, but when he does have some they are going to be gold ones!"

Every man has his worthless days, but if he does not fight them every day will become his worthless day.

The notion that money is the main thing seems to have originated in practical politics.

At a round table the herald is useless.

"Where a Dollar Does It's Duty."

Mason City, Ia. **Manly, Ia.**

Local Mention

Miss Mae Ferleman, the county Red Cross Nurse, of Garner, was here the fore part of the week examning the children at the Klemme schools. Miss Ferleman is hired by the county to look after the health of the school children.

Dr. Thomas has his new house completed in Morningside Addition and s ready to move n. The Doctoro and Mrs. Thomas have a very fine home of the bungalow type which is very attractive as well as comfortable for all the modern conveniences are installed. When Morningside Addition is built up a little more it will be the attractive spot of Klemme..

The following people went to Sioux City, Iowa, last week to take treatment of a lady who claimed to give relief as a Christian Healer or some such method: Rev. Meyer, Rev. and Mrs. Koerner, Rev. and Mrs. Haefner, Mr. and Mrs. George Platt and Ben Swlve. Some of the party are feeling much better and some the treatment did nt help. The lady did not claim she could cure everybody but those who saw her said she was wonderful.

Miss Mildred McCullough has resigned her position as bookkeeper and stenographer at the Wellemeyer store to take up another position elsewhere. Miss McCullough has made a lot of friends while here who will greatly miss her. Her position will be filled by Mr. LuVerne Smith of this place, who has recently completed a very thorough course in business at Des Moines. Mr. Smith is a son of Mrs. Millie Smith and is well known. He will make a very good bookkeeper for the Wellemeyer Store, we are sure.

Mr. and Mrs. Chas. Keraus drove over from the Lake Saturday for an over Sunday visit at the C. G. Waterman and Wm. Keraus homes. Mr. and Mrs. Chas. Keraus expect to leave about the 26th of this month for a nine months' trip to California to spend the winter and visit in the west. Charlie has heard what they are paying men in California to shoot ducks in the rice fields and he is raring to go but says if ducks are that thick out in the west he will be perfectly satisfied to shoot them without bothering about the pay. We also have a hunch he will pack his fishing outfit along with him.

FORDSON

TRADE MARK

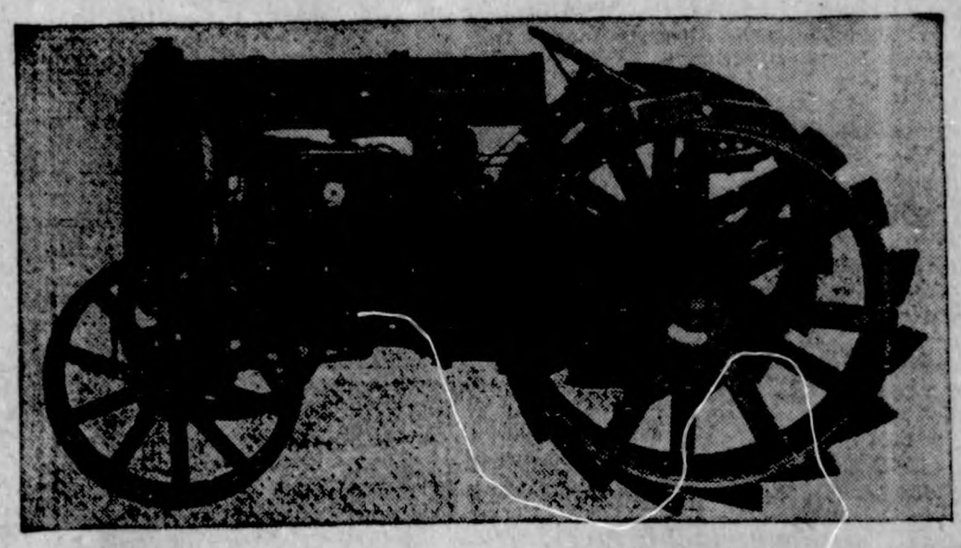
There are many Tractors clamoring for the patronage of the farmer. The very air is charged with the noise of claims. One would think that all the farmer had to do was to buy a Tractor and he would enter into the Millennium.

Well, consider this fact—there are a great many different makes of Tractors. Tractors have been on the American market for twenty years. In that time some 300,000 tractors have been sold to the farmers of the United States. The Fordson Tractor has only been on the market two years, and in that time more than one hundred thousand Fordson Tractors have been sold to the farmers of the United States.

Two and two make four. Two and two always will make four. If the Fordson Tractor had not delivered more good work, more satisfactory work, more economical work, than any other farm tractor, it would not have sold in the ratio of anywhere from five and more to one. "The proof of the pudding is in the eating." The proof of the superior meri s of the Fordson Tractor is in its larger sale and use.

The Fordson Tractor the asks you to buy it because of what it has done for your neighbor. It asks you to buy it on its merits. It asks you to buy it, Mr. Farmer, because you have use for it every day in the year. All the uses fos the Fordson Tractor have not yet been uncovered because new places where machine power can take the place of human power, where machine power can supplant horse and mule power, are being found every week, and wherever such discovery occurs, the Fordson Tractor will fill the bill more satisfactorly than any other form of power.

The Fordson is simple in design, and it is very strongly made of the highest quality of iron and steel. It is the product of the greatest mechanical genius the world hus ever known, and it is most economical in first cost and after expense. The Fordson Tractor on your farm will put more dollars and cents into every hour you put into the farm,



Now why not have a Fordson right away? Take up the subject with us. Come in and get the details, and all the particulars. It is only a matter of time until you buy a farm Tractor—that is sure. So don't put it off when it means money to you to act promptly.

ED. G. ELL

THE DAIRY

CLEANLINESS IS BIG ASSET

Duty of Every Dairy Farmer to See That Output Is Wholesome—It Lessens Complaints.

Farmers who produce clean milk possess a business asset the value of which many do not fully appreciate. The public is better informed, by far, than it was a few years ago regarding the value of pure milk as a food. It knows more of the dangers of unclean milk. Therefore, as a business proposition as well as from a sense of duty, every farmer owning milk cows should see to it that the output is wholesome.

Clean milk benefits not only the consumer but the milk producer as well. Most producers of market milk have experienced the chagrin of having a shipment of milk refused or returned because it reached the market sour, tainted, or otherwise in poor condition. Although such milk may be used for feeding pigs, it usually is a complete loss to the producer, since the cost of transportation back to the farm usually exceeds its value.

Frequently, also, the producer depends on a certain market as an outlet for his milk and has no means for utilizing small quantities at uncertain intervals, even if he had it at the farm. Another important consideration is that unpleasant effect which the receipt of sour, tainted, or otherwise unsalable milk has upon the purchaser. Delivering milk of that kind usually results in the loss of the confidence of the dealer, or, if it is delivered directly to the consumer, the loss of customers.

Clean milk means fewer complaints, a better class of patrons, and a steady market for the product. Carelessly produced and improperly handled milk may be the means of spreading dis-

Milkers Should Exercise Greatest Care in Keeping Milk Clean.

ease. Every owner of a dairy herd should consider it his duty to himself and to the community to keep only healthy cows, supply them with wholesome feed, and keep them in clean, comfortable quarters. The milkers and all who handle milk should realize that they have in their charge a food which is easily contaminated and should take every reasonable precaution to keep it clean.

PREPARATIONS REPEL FLIES

Fish Oil Is Principal Ingredient in Several Mixtures Recommended for Stock.

While there are various preparations on the market designed to keep flies from cows or other live stock, the farmer can make a good fly repellent by using any of the following mixtures: Fish oil, 3 parts; kerosene, 1 part. Fish oil, 100 parts; oil of tar, 50 parts; crude carbolic acid, 1 part. Fish oil, 1½ pints; kerosene, 1½ pints; resin, 1½ pounds; laundry soap, 2 cakes. Mix thoroughly and add enough water to make 3 gallons. Fish oil, linseed oil, or kerosene, 1 pint; coal tar dip, 1 pint; laundry soap, 1¼ bar; hot water, 15 pints. Mix thoroughly so as to form an emulsion. The fish oil is the principal ingredient that repels the flies.

Either a brush or a hand-sprayer can be used to apply any of these mixtures. The sprayer will be more convenient. Applications will have to be made at frequent intervals to be effective.

GIVE BULL GOOD ATTENTION

Best Results Obtained by Firm Handling, but Never by Abuse—Must Have Exercise.

The bull must not be underfed when young nor kept overfat when matured. Better results are obtained by gentle but firm handling, but never by abuse. Never allow him to get the upper hand at any time; he must not realize his enormous strength. Give him plenty of exercise it is a mistake to keep him confined. Do not trust a bull at any time. It is the "gentle" bull that does the damage.

TRAVEL OF FOODSTUFFS BETWEEN RAILWAY AND ULTIMATE CONSUMER

A Glimpse of the Long and Costly Route Which Most of Our Foodstuffs Travel Between the Railway and the Consumer.

A line from a popular song—"There's a Long, Long Trail A-winding"—applies to at least one of the many and devious paths which old man H. C. L. treads in his effort to make living complex and expensive for the average person.

The particular byway referred to is that which wholesale shipments of food follow in their costly travel from the railway car to the retailer. A carload of fruit or vegetables can be sped half way across the continent in a day or two, but on arriving in the city where the food is to be retailed, the shipment starts on a winding trail which too often adds little but unnecessary costs and delay.

Eliminating Expensive Carting.

This expensive shunting and hauling of foodstuffs from point to point in the cities and the spoilage which the unnecessary handling causes are the big items centralized wholesale terminals eliminate. The bureau of markets, United States department of agriculture, has been on this trail, literally, following shipments step by step to determine how much expense is added to the cost of food by unnecessary handling between the shipper and the retailer. The route followed by a carload of peaches entering a middle Western city over a railroad not provided with team tracks well illustrates this phase of the distribution problem.

This car had to be switched from the railroad on which it entered the city, through the crowded switch yard, to another track which is accessible to teams. Here it stood until the receiving wholesalers' teamsters could finish another job. After this delay two wagons were drawn up beside the car, in turn, and were loaded with the peaches. Thereupon, they started for the wholesale house which was two miles away.

The teamsters' route lay through the most congested part of the city, the wholesale district being close to the busy retail section. The wagons were a full hour and a quarter making the trip. Meanwhile, the sun beat down on the peaches and the city's dust and dirt filtered in through the crates so that the fruit was far from being as fresh and attractive as when taken from the car. Moreover, the journey so jostled and bruised the fruit that some of it had to be sold at a discount.

Though the wholesalers were particularly anxious to get the peaches delivered to their sales room on the day of arrival, because of the favorable market, only about one-third of the shipment came in by closing time, and it was noon the next day before the remainder was delivered.

The long, winding trail did not end at the wholesalers'. Once unloaded, the peaches were put on display for the benefit of various jobbers, some of whom purchased a few dozen crates and some larger amounts. Some of these men were situated within two or three squares of the wholesaler and their purchases were delivered on hand trucks. In the case of other jobbers another wagon transfer was necessary.

Next in this process which economists call distribution, came the retailers to look over the lots, in the end buying small quantities such as they could sell in a day or two. This, of course, necessitated another handling and carting over the city's rough pavements.

Last, but not least, came the consumers, each buying only a small fraction of a crate and paying a big share of the expense all the handling had entailed.

Cartage Is Costly.

This instance is no exaggeration. A very large part of the foodstuffs brought to American cities goes over some such devious trail. One Washington (D. C.) wholesale merchant has stated that he spends $20,000 a year for cartage which could be saved if the city had a wholesale terminal where cars could be unloaded directly into premises occupied by the wholesalers. Following an investigation in New York city it was estimated by a local organization that the saving in handling costs which would result if adequate terminal facilities were established would be $2,000,000 annually by the borough of Richmond; $8,000,000 by Queens; $16,000,000 by the Bronx; $21,000,000 by Brooklyn, and an even vaster sum by Manhattan.

Marketing experts admit that there are many baffling aspects to the high-cost-of-living problem, but contend that the remedy for the phase of our costly distribution system just described is plain. Cities which will provide modern wholesale terminals, where shipments can be delivered from the railroad cars direct to wholesalers a few feet away, will make possible the saving of immense sums of money now charged up to the consumer.

TO USE FINE MORGAN SIRE IN EXPERIMENT

To Further Study of Breed for Saddle Purposes.

Two-Year-Old Stallion Lucky Sent From Vermont Farm to Famous Ranch in Texas—Breeders Are Much Interested.

To further the study of the Morgan as a saddle breed, the United States department of agriculture has sent the two-year-old Morgan stallion Lucky from the Morgan horse farm at Middlebury, Vt., to the Santa Gertrudis ranch at Kingsville, Tex. This is the "home ranch" of the famous King ranch, one of the largest and best-known cattle and horse breeding establishments in the United States. The bureau of animal industry is paying close attention to the saddle possibilities of the Morgan horse. The King ranch will breed Lucky to some of its high-class mares.

Lucky is a brown stallion 14¾ hands high and weighs 925 pounds. He was sired by Hugo. Hugo was sired by Meteor Morgan and is out of Calve by General Gates. The dam of Lucky is Eunice by General Gates and out of Caroline by Daniel Lambert. Lucky, his sire and dam, and one of his grand dams were bred at the government farm at Middlebury.

FAVOR UNIFORM CONTAINERS

First Essential to the Most Profitable Marketing Is Standardized Products.

One of the first essentials to satisfactory marketing arrangements is standardized products. Cans, jars and other containers should be uniform in pack, appearance, quality and condition. Every container which is fully up to the standard represented by the label or brand will then be an advertisement in itself and often a guaranty to further purchases.

BOYS SURPASS THEIR ELDERS

Total Purebred Stock in Idaho Community Increased to 25 Per Cent by Young People.

It is estimated that only 3 per cent of the cattle in the United States are registered, and experts say that an increase of 2 per cent accomplished in from five to ten years is a mark well worth aiming at.

Out in Ustick, near Boise City, the boys have shattered this record, according to a report brought in by a United States department of agriculture field worker who recently visited the community. These boys, acting upon their own initiative, and aided by agents of the department and the State College of Agriculture, bought 19 head of purebred stock, thus increasing the total for their community 25 per cent.

MITES AND LICE INJURIOUS

Little Pests Sap Vitality of Fowls and Prevent Growth or Lessen Egg Production.

Mites and lice frequently sap the vitality of the fowl and prevent growth or lessen the egg production. A thorough cleaning of the house, regular applications of disinfectants to the roosts and nests, and a frequent dusting of the fowls will control these pests.

GENERAL FARM NOTES

Store your grain.

* * *

Keep weeds from seeding.

* * *

If your soil is sour add ground limestone.

* * *

A big increase is coming in the number of silos in the middle West.

* * *

Millet is customarily seeded at the rate of three or four pecks per acre.

FARM STOCK

MARKETING SHEEP AND HOGS

Federal Trade Commission Furnish Figures Showing Cost of Loading and Shipping.

Of 54 carloads of sheep including 11 single-deck and 43 double-deck cars, the cost of loading and bedding cars averaged $0.019 per 100 pounds live weight, according to figures furnished the federal trade commission by the United States department of agriculture. Other marketing expenses, including freight, varied from $0.239 to $1.97 per hundredweight. The shrinkage in weight varied from 3.53 to 8.57 per cent, the majority of the shipments averaged approximately eight per cent.

Similar records on 253 carloads of hogs showed the cost of loading and bedding to average 1.5 cents per 100 pounds live weight; feed at market approximately 8 to 9 cents; commission charges 4 to 10 cents; miscellaneous expense, 2 to 10 cents, averaging approximately 5 cents; and the total cost of marketing, including freight from varying districts, approximately from 33 to 50 cents. The shrinkage in weight on 873 carloads of hogs varied from 9.88 to minus 4.59 per cent.

AVOID USING "MIXED" BULLS

Esteem With Which Purebred Sires Are Regarded Is Indicated by Texas Cattleman.

"I have nothing but purebred Hereford bulls, have been breeding registered Hereford bulls for 35 years, and have never used any mixed breed or grade."

This statement addressed to the United States department of agriculture by a Texas stockman, who recently joined the "Better Sires—Better Stock" campaign, indicates the esteem with which purebred sires are

Registered Hereford Bull, Used in Grading Up a Herd.

regarded in Brown county, Tex., where he lives. In addition to his herd of 245 cattle, this stock owner listed 700 goats, 600 sheep, and 30 swine, kept for breeding purposes.

MOST VALUABLE SHEEP FEED

Rye Stands at Head of Cereals in Protein Content, but Lacking in Carbohydrates.

Whether fed as a grain ration, pastured, or cut and fed for hay, rye holds a high place for feeding pregnant ewes at weaning time. In its chemical analysis, rye stands at the head of the cereals in protein content, but is somewhat lower in carbohydrates than wheat or corn.

This suggests two things in regard to its feeding value: First, to feed in combination with other things lacking in protein but rich in fat-forming elements, like corn and wheat. Second, as a feed for young animals in which a high development of bone and muscle is required. For either purpose it is highly satisfactory. When sheep are wintered largely on fodder, timothy hay, or other roughage, the rye partly makes up for the lack of protein.

CHEAP PRODUCTION OF PORK

One of the Best Ways Is Use of Stubble Fields After Grain Has Been Cut in Autumn.

One of the cheapest ways of producing pork is the use of the stubble fields after the grain has been cut in the fall. In spite of all that can be done there is more or less grain scattered on the ground during the process of cutting and stacking. Hogs will pick this up and produce excellent gains without any additional grain.

DIVIDED PASTURES FOR HOGS

Animals Thrive Much Better on Young Tender Shoots Than on Old Hardened Stalks.

It has been found repeatedly that hogs will do better on the young tender shoots than on the old hardened stalks. For that reason it is advisable to divide the pastures so that the hogs can be shifted from one to the other at intervals of a week or ten days.

ACCEPTING NO MORE FAVORS

Negro's Somewhat Peculiar Reason for Refusing to Act as Pallbearer Any More.

In Alabama a negro team-driver came home one night and found his wife highly agitated.

"Jeff," she said, "you know dat Asa Roger's wife Sallie is dead. Ain't you goin' to be a pallbearer at the fun'r'l?"

"No, I ain't," answered Jeff, with unusual positiveness.

"You ain't? Well, wasn't you a pallbearer at de fun'r'l of his second wife Melissa?"

"Sho I wuz. But dat ain't—"

"En wuzn't you a pallbearer at de fun'r'l of his first wife, Mandy? Whut you mean, you ain't goin' act dis time?"

"Liza," he said, "suttinly I wuz a pallbearer at dem fun'r'ls, en I done de best I could, but I'm tellin' you now I ain't acceptin' no mo' favors from nobody whut I can't return."—London Tit-Bits.

Unvarying Disapproval.

"You say you have always objected to the use of money in politics?"

"Always," answered Senator Sorghum; "especially when a fellow has more of it to use than I have."

The difference between Solomon and the modern poet is that he was able to support a large family.

LITTLE ADVICE FOR GROCE

Would Be Wag Had Picked Out t Wrong Woman on Whom to Exercise His Wit.

There was an expression of melancholy ringed with resentment on M Brown's face as she entered the grocer's shop.

"I want," she began impressive "to talk to you about them eggs I h last week. They weren't anythi like as fresh as they might have bee

"That's strange," replied the groc who fancied himself something of wag. "We always have an almana hanging up in the fowl run to keep t hens up to date."

"Oh!" came the retort with crushi emphasis. "Then all I have to say that somebody with brains about addled as them eggs has been misle in' the hens with last year's calend Just you hang up a 1920 card, my go fellow, and maybe them chickens start working overtime to catch up it!"

Evolution.

Victor—What's that mob o there? Supers?

Director—No: the supers' pre agents.—Film Fun.

Some women can sing a baby sleep in two minutes and talk a hu band awake all night.

The Increasing Demand for POSTUM CEREAL

shows the favor this table drink is constantly gaining because of its rich taste and economy.

Boil Postum Cereal fully twenty minutes and you have a flavor similar to the highest grade coffee, but there's no coffee hurt in Postum.

It is pure and wholesome!

Made by Postum Cereal Co., Inc., Battle Creek, Mich.

ANADA'S HARVEST IS OVER

reshing Shows Increase Over Expected Yields.

he Winnipeg Free Press of a few s ago contained a cartoon of which following is a copy:

This probably as much as anything se will give some idea of the state mind of the Western Canada farm- as he watches the tally from the rashing machine while his wheat is ing carried to the elevator.

From all sections of the country, most optimistic reports are re- ed, the local and city papers are lled with reports from twenty to thir- bushels of wheat to the acre, while some places oats are showing a rec- rd of as high as 120 bushels to the re.

Referring to Saskatchewan, it is con- dently expected that the wheat yield ill be nearly 125 million bushels. eavy rains which fell in districts that id not promise so well in July, had reatly improved the prospects there, nd there is no question that paying ields will be produced. The yields n the eastern part of the province ay not show to the advantage that ill those of the western part, but oo much cannot be said of this, for it s the results as they come from the achine, and often these prove happily eceptive.

There is now every reason to believe hat the wheat crop of the three prai- ie provinces will approach 250 mil- ion bushels.

Alberta will exceed the 70 million ushels that had been looked for. The verage yield will be considerably igher than it has been in the province n any of the last four years. The Department of Agriculture in a ecent report gave the opinion that it annot fall below twenty-two bushels to the acre, and that it might easily pass the twenty-five bushel mark. Most of the wheat in the province when the report was written, stood well up to three feet high, and on some fields was still higher. The re- port goes on that in parts of South- ern Alberta forty and fifty bushels to the acre yields will not be uncommon, while there will be a good many yields of from thirty to thirty-five bushels to the acre.

In the northwest part of the prov- ince, in the country surrounding Bat- tleford and adjacent to the Canadian National Railway line to Lloydminster, and south the crops are excellent and the yield will be heavy.

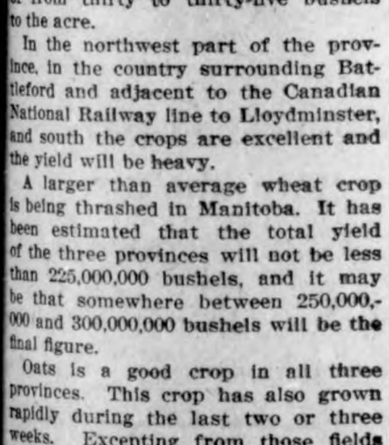
A larger than average wheat crop is being thrashed in Manitoba. It has been estimated that the total yield of the three provinces will not be less than 225,000,000 bushels, and it may be that somewhere between 250,000,- 000 and 300,000,000 bushels will be the final figure.

Oats is a good crop in all three provinces. This crop has also grown rapidly during the last two or three weeks. Excepting from those fields which were sown late for green feed, the yield will be heavy and the grain excellent. Barley and rye are above the average. There was sufficient help to harvest the crop.—Advertisement.

There is always a chance that an op- portunity may be connected with a galvanic battery.

"FREEZONE"

Lift Off Corns! No Pain!



Doesn't hurt a bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers. Truly! Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the calluses, without soreness or irritation.

It's a poor Bostonian that doesn't know beans.

HOME TOWN HELPS

LIFE IN SMALL TOWN BEST

Has Many Advantages Compared to the Hurry and Bustle Inflicted on City Dweller.

I do not think that where a man lives has anything to do with his pro- gression, as progression is hereditary and it is not caused by environment, writes a correspondent of the Pitts- burgh Dispatch. The idea that a boy must go to the city to acquire fame is becoming a thing of the past, for people of this world are beginning to realize that progression may mean many things—among them progression in tilling the soil as well as progres- sion in politics.

The most progressive men in the world are the men who go to make up the little towns, for they are gen- erally the steady, reliable, sensible fel- lows, who do not pine for the excite- ment and the glare of a life in a big city. Small town men are the rock upon which this great country is most securely built. They are the whole- some, true-blue scouts, who are big enough to live the simple, little town life, and their quiet nerves hold our country balanced. The city man is a bunch of nerves compared with the man from the village. His days are spent in dodging automobiles in the streets, hurrying from place to place, trying to beat the other fellow at mak- ing money, and after a day of being "on the jump" he goes to the theater and does not get home until morning. Then he sleeps five hours and is ready to go through the same performance again. Little Town Man goes to bed at 10 after an evening at the movie and at 6 is ready to get up and begin his day. The "country Jake" is no longer a person to be laughed at, but a person to be envied, and many of our greatest so-called progressives are going back to the "simple-life."

REASONS FOR OWNING HOME

Advantages Are Many, Quite Apart From the Economic One Declares an Eastern Writer.

There are many upsetting circum- stances in the world, against which house ownership is a sort of insurance. If I had not owned my home last fall, and had by any chance been thrown out by the old landlord, it would have been a very serious job to find what I wanted in the present market. I have known men and women to put in weeks in the search. Houses are often sold over one's head. Estates have to be settled. All kinds of things happen. Perhaps your small boy disturbs the landlord, who in turn makes it dis- agreeable for you. Such possibilities are put to rest by actual ownership. If one has a serious illness in the family, what an assurance it is to know that you cannot be disturbed; that this is your castle.

For such reasons as these, quite apart from the economic ones, I believe every man of settled habits should own his own house, and that this is as a good a time as any to proceed to that happy realization.—Robert Lin- coln O'Brien in Boston Herald.

Many City Managers.

United States now has about 180 city managers. The number is grow- ing steadily, and city managership has now established itself as a profession.

One of these managers has ad- vanced step by step from the job of directing a small city in Michigan to taking charge of city matters in Dubuque, Ia., at a salary of $8,000 a year. This is the only instance of three promotions thus far recorded, but three city managers have been ad- vanced at least once.

The highest salary the profession as yet commands is $12,000, paid by Nor- folk, Va. Dayton and Akron, O., Grand Rapids, Mich., and Wheeling, W. Va., are among the larger cities now operating under city manager charters.

Earthworms in Lawns.

Earthworms in lawns and gardens can be poisoned with bichloride of mercury poison. Make a stock solu- tion by dissolving one ounce in two gallons of water. To use, dilute two quarts of the stock solution in 50 gal- lons of water and in the evening sprinkle this over about a thousand square feet of lawn. The ground should be moist when this is done. The worms will come out during the night and will never go back. Bichloride of mercury (corrosive sublimate) is a deadly poison and therefore must be used carefully.

Have Reserve of Grass Seed.

It is a good plan always to have a reserve supply of grass seed on hand to sow when needed, for bare spots may appear throughout the year. If the soil is light and subject to injury from drought, white clover should be sown. It mats together in a short time, providing a closer woven blanket to prevent the evaporation of water from the soil and is considered a bet- ter resister of drought than many of the grasses. It is easily started.

City Manager for Colorado Springs.

Colorado Springs at a special elec- tion adopted the city manager form of government, to become effective next April, it is announced.

PAT

By AGNES G. BROGAN.

(©, 1920, Western Newspaper Union.)

There were just two subjects of dis- cord between DeLancy Vane and his sister Sue. In all else they were in perfect unity. Sue despised dogs—with an experience born of long suf- fering from DeLancy's many boyhood pets, and DeLancy himself disliked girls as much as his sister loved them.

Long ago he had adopted, in de- fense, a manner of dignified aloofness, which, with his precise courtesy, was supposed to impress the frivolous minded with awe. And the adopted manner in time became habit. Sue, herself, in all her happy plump com- placence, was unable to break down the wall of frigidity between when her brother chose to erect it. Yet the clever man had many admirers, and Professor Vane's presence as lecturer or guest was eagerly sought. He felt the loneliness of his bachelorhood for the first time when Miss Sue insisted upon leaving him to the care of the housekeeper while she enjoyed a long desired visit in the nearby city.

DeLancy was so lonely that his mind reverted to past canine pets and their comforting companionship, and when Saunders at the club mentioned some Irish setter pups which he had located and intended buying, DeLancy daring- ly made an offer for one of the dogs, hoping to have it installed and trained to the avoidance of certain cushions and chairs before Sue returned. Her kind heart, he knew, would not de- mand the animal's dismissal. Saun- ders promised his friend that the dog would be forwarded. So, upon a humid summer morning, the professor exchanged his strictly correct attire for old outing togs and proceeded to cut the grass. DeLancy was handed a telegram as he mowed the back lawn. Its wording was brief:

"Meet Pat at trolley station 11:15 a. m. this (Tuesday) morning. See you later. S."

It was now ten o'clock. The dog would soon arrive. DeLancy consid- ered the best means of conveying the animal from the distant suburban sta- tion to his home. The only practical solution seemed the light cart which Tom, the gardener, kept for home trucking. He had not long to wait for the incoming train and immediately sought the baggage room. No dog was there; that was evident. At the last moment Saunders must have met with some difficulty in sending on his charge. Perhaps he would wire again. The professor decided to go home and see. As he hurried along, hands thrust into the pockets of his soiled khaki trousers, a pretty woman standing be- fore him, obstructed his way.

"Wait a minute," she ordered. "Were you sent her to meet me? I am Miss Powers."

DeLancy confusedly declared that he had not been sent. Confusion was foreign to the professor. His assured manner appeared to have departed with the assurance of proper attire. The young woman ruminated, and the ruminating brought certain deep and charming glints to her already charm- ing eyes.

"Well," she remarked casually. "It really doesn't matter; you may drive me out to Park Heights. When we are near the residence section I will get down and walk the rest of the way."

She was searching, as she spoke, in a silk-lined purse and, holding out to DeLancy Vane a dollar bill, climbed to a place on the seat of the cart. As he hesitated the glinting blue eyes grew troubled.

"Oh! Perhaps," said Miss Powers, "you do not happen to be going my way. I just thought if you were—"

"You would not care to ride in a wagon," DeLancy suggested tentative- ly. Strangely enough he was hoping that she would.

"Bother about the wagon," laughed the girl. "I wanted to find something different in the country."

So the professor took his seat beside her.

"I came, you see," she explained, "for a visit. Miss Vane is the dearest soul, and invited me to come back with her. But at the last moment she was persuaded to remain over for an en- tertainment, and sent me on ahead. She wired her brother, the professor, to meet me, but—"

Miss Powers smiled. "From what I have heard, meeting young women is not his forte," she said.

DeLancy drew up the horse in the middle of the road and bent to stare into the girl's face.

"What," he asked, "is your full name, if I may know?"

The blue eyes regarded him wonder- ingly.

"Patricia Powers," the girl replied.

Professor Vane smiled. His friends would have been surprised at the boy- ishness of that smile.

"Sue's letters have been full of a cer- tain Patricia. I recollect," he mused. "'Pat,' I think she called her. It must have been her telegram that I received this morning, after all."

He actually chuckled.

"And I came down to meet 'Pat' with the trucking wagon!"

"But I don't understand," said the girl.

"Of course you don't," this new joy- ous DeLancy told her. "You will, though, before we reach home. I'm going to drive you way round the park."

Professor Vane no longer dislikes young women. In fact, where Miss Powers is concerned, he has gone quite to the other extreme.

HAD HIGH AMBITION FOR SON

Father Wouldn't Be Satisfied Until He Saw Him in a Really Proud Position.

An instructor in the military acad- emy at West Point was once assigned to conduct about the place the visiting parents of a certain cadet.

After a tour of the post, the proud and happy parents joined the crowd assembled to witness evening parade, a most imposing spectacle. The march past aroused the father of the cadet to a high pitch of enthusiasm.

"There!" he exclaimed to his spouse, "isn't that fine? But," he added, re- flectively, "I shall not be happy till my boy attains the proud position that leads 'em all." And he pointed in rapt admiration to the drum-major.

Very Likely.

"I heard of a new comet that lost its tail." "Probably it got into a fight with the dog star."

The Right One.

"What condiment would you sug- gest for a cold lunch?"

"Why not try chili sauce?"

THREE YEARS WITHOUT HOPE

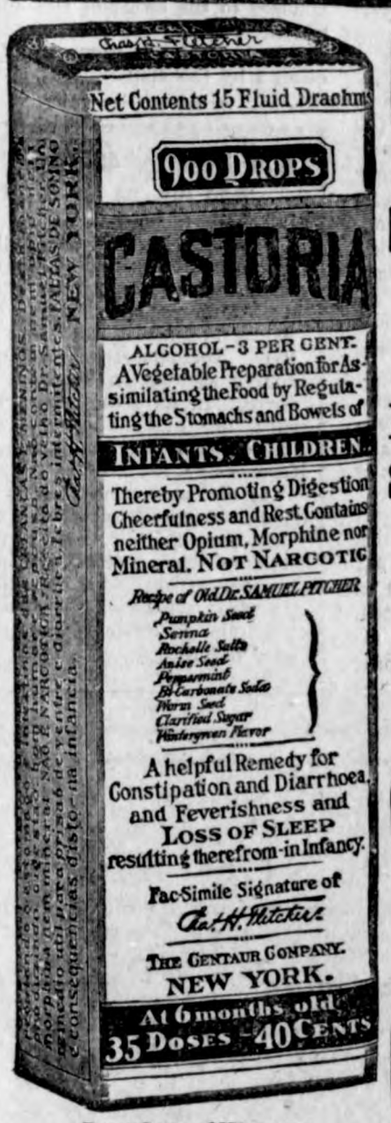
A Story of Sickness and Suffering with Final Return to Health. It will do you good to read it

No matter how long nor how much you have suffered, do not give up hope. Do not decide there is no help for you. There is. Make up your mind to get well. You can. There is a remedy in which you may place full reliance as did Mrs. Rozalia Kania of 39 Silver Street, New Britain, Conn. This is what she says: "I had cramps for three years and thought I would never be any better. I could not eat without distress. Slept with my mouth open and could hardly breathe. No medicine helped me. I had catarrh of the stomach. Now I have no cramps and am feeling well and healthy. I wish every suffering person would take PE-RU-NA."

Catarrh effects the mucous membranes in any organ or part. PE-RU-NA, by regulating the digestion and aiding elimination, sends a rich, pure supply of blood and nourishment to the sick and inflamed membranes and health returns.

For coughs, colds, catarrh and catarrhal conditions generally, PE-RU-NA is recommended. If you are sick, do not wait and suffer. The sooner you begin using Dr. Hartman's well-known PE-RU-NA, the sooner you may expect to be well and strong and in full possession of your health. A bottle of PE-RU-NA is the finest emergency, ready- to-take remedy to have in the house. It is fourteen ounces of pre- vention and protection.

Sold everywhere in tablet or liquid form.



Exact Copy of Wrapper.

Accept only an unbroken "Bayer package" which contains proper directions to relieve Headache, Tooth- ache, Earache, Neuralgia, Rheumatism, Colds and Pain. Handy tin boxes of 12 tablets cost few cents. Druggists also sell larger "Bayer packages." Aspirin is trade mark Bayer Manufacture Mon- oaceticacidester of Salicylicacid.—Adv.

As Told in Greenfield.

Back in the dim distant years when the high cost of living was not an ever present problem and some things were cheap, James Whitcomb Riley walked into a barber shop at Greenfield for a 5-cent shave. The proprietor of the shop was an old negro.

"Well, Sam, how are you getting along?" Mr. Riley asked.

"Mr. Jim, I had a very good day," Sam replied. "If I could make 75 cents between now and quittin' time I'd have $1."

Such is the story as told in Green- field.—Indianapolis News.

"Cold in the Head"

is an acute attack of Nasal Catarrh. Those subject to frequent "colds in the head" will find that the use of HALL'S CATARRH MEDICINE will build up the System, cleanse the Blood and render them less liable to colds. Repeated at- tacks of Acute Catarrh may lead to Chronic Catarrh.

HALL'S CATARRH MEDICINE is taken internally and acts through the Blood on the Mucous Surfaces of the Sys- tem, thus reducing the inflammation and restoring normal conditions.

The Verdict.

Spoiled Star—The critics say I am just killing in this part.

The Manager—Yes, they do say you murder it.

A flatterer, a hypocrite.—German proverb.

Just So.

"Can you give me an outside room?"

"I can give you a hammock in the alley or a cot in the yard," said the hotel proprietor.

"I see. All outside rooms."

USE "DIAMOND DYES"

Dye right! Don't risk your material in a poor dye. Each package of "Diamond Dyes" contains directions so simple that any woman can diamond-dye a new, rich, fadeless color into old garments, draperies, cover- ings, everything, whether wool, silk, linen, cotton or mixed goods.

Buy "Diamond Dyes" — no other kind—then perfect results are guaranteed. Druggist has "Diamond Dyes Color Card"—16 rich colors. Adv.

Sure Relief

BELL-ANS FOR INDIGESTION

How About Your Catarrh? Do You Want Real Relief?

Then Throw Away Your Sprays and Other Makeshift Treat- ment.

Why? Simply because you have overlooked the cause of catarrh, and all of your treatment has been misdirected. Remove the cause of the clogged-up accumulations that choke up your air passages, and they will naturally disappear for good. But no matter how many local applications you use to tem- porarily clear them away, they will promptly re-appear until their cause is removed.

S. S. S. is an antidote to the mil- lions of tiny Catarrh germs with which your blood is infested. A thorough course of this remedy will cleanse and purify your blood, and remove the disease germs which cause Catarrh.

'HORSE MACKEREL' NETS $200

Turns Out to Be Tuna Fish and Reimburses Its Captors With Handsome Profit.

Freeport, L. I.—That "things are not always what they seem" was proven here when a fish story spread through the village to the effect that a 700-pound horse mackerel had been caught.

Tuna fish is counted a delicacy. Horse mackerel is something else again. But if a dyed-in-the-wool fisherman calls a tuna fish a horse mackerel, how is the inexperienced to know the difference?

A 700-pound tuna-fish-horse-mackerel was so shy of horse sense as to become entangled in a pond net. A windlass and pulley contraption was attached to the prize of the sea and it was landed and is now on its way to the Fulton market. It will bring its captors $200.

The Inner Meaning.

Remember that as you live your life each day with an uplifted purpose and unselfish desire, each and every event will bear for you a deep significance—an inner meaning—and as you learn their import, so do you fit yourself for higher work.—William Q. Judge.

A new principle is now used in connection with spinal adjustments for the cure of chronic ailments. Many conditions that were formerly very difficult and unsatisfactory to handle are now, with this combned method, cared for to the complete satisfaction of the patient. The difficult conditions for which the new principle is especially recommended are high blood pressure, kidney trouble (Bright's disease), diabetes, bowel trouble, constipation, auto-intoxication, indigestion, billiousness, severe nervous symptoms, rheumatism, neuritis, and some other troubles not necessary to mention here.—adv. tf.

A guaranteed cure for hemorrhoids (piles) in all forms, one that does not lay the patient up or cause loss of time. Other rectal troubles treated. Special calls to Klemme will be attended to. Dr. R. W. Schultz, Masonic Bldg., Garner, Iowa. adv. tf.

FINDS HULL OF MAYFLOWER?

Englishman Says Ship's Timbers Are Built Into Barn of Inn In Buckinghamshire.

London, England—Discovery of the hull of the Mayflower, the ship in which the pilgrim fathers sailed to America, is claimed by Dr. Rendel Harris, chairman of the English Speaking union, according to the Daily Mail. Dr. Harris will reveal details of the secret at a conference to be held at Plymouth.

Meantime, however, the newspaper learns that old timbers, including oaken beams supporting the roof, found in a barn adjoining an inn called Old Jordan's hostel, at Chalfont, St. Giles, Buckinghamshire, are considered by Dr. Harris to have originally formed part of the hull and deck of the Mayflower. Some of the beams, which are worn and wormeaten, bear marks indicating they might formerly have held ship's rivets and tackle.

There is a local theory, says the paper, that a Quaker formerly lived in the neighborhood who was a professional shipbreaker, selling ship timbers to farmers of the surrounding country. It has been suggested that he broke up the Mayflower and sold the timbers to the owner of Old Jordan's hostel.

No proof of this vague tradition is offered by the Mail.

Wife Deserted 40 Years Ago Applies for Divorce

Sunbury, Pa. — Claiming that her husband deserted her a year after their marriage forty years ago, Mrs. William S. Fenstermacher, sixty, brought suit in the Northumberland county courts seeking an absolute divorce. In all those years, she says, her husband never made any effort to make up their differences.

At the same time Charles H. Smith, sixty-eight years old, and Mrs. Sara S. Herb, sixty-six, of Ashland, were granted a license to wed. His bride-to-be has been married twice, while Smith, a building contractor, was wed once before.

Some business men have "just discovered" ready made clothes

THERE are some men who formerly went to high-priced tailors; they wanted to economize and they came to us. Many of these men thought they couldn't be fitted in ready made clothes; or else they couldn't get quality--

They khow different now

They get the same fine all-wool fabrics in Hart Schaffner & Marx clothes that they used to get at those tailors; the same fine tailoring; better style in most cases--at one-third, or one-half less than they used to pay

IF THEY AREN'T SATISFIED THEY GET THEIR MONEY BACK

GET TO KNOW

Wedding Bells Ring

PIGGMAN-HEGINGER MARRIAGE

Tusday morning at ten o'clock at the First Methodist Church Parsonage occurred the marriage of Wm. Piggman, of St. Louis, to Miss Martha Heginger of this place and at which only the immediate relatives were present to witness the ceremony which was officiated by Rev. A. H. Meyer.

Both of the young people are well known in Klemme. The bride is a daughter of Mr. and Mrs. John Heginger residing near Klemme. The groom has worked in this vicinity for some time as a farmer and is also well and favorably known. Both are excellent young people. They will go to farming in the spring and have rented the Zinn farm southeast of Klemme, and now occupied by Chas. Smith.

The Times joins their many friends extending congratulations.

COLWELL WOMEN WILL GET FIRST VOTE ON INCORPORATION ISSUE

COLWELL—This town has filed notice of a special election for the purpose of incorporation to be held Oct. 11th. And this will give the women of this thirving and enterpriisng little town the chance to get ahead of the women of much larger cities in their newly acquired suffrage rights and incidently also be the first women in Floyd county to cast their vote under the new suffrage amendment. Colwell is fortunate in its location in a very excellent farming region and on the Charles City Western railroad line. It is planned to have electric light service from Charles City for which arrangements are now being carried on.

THAT BASEBALL GAME, THURSDAY

Last week Thursday a good game of ball was played at the local diamond between Klemme and a team supposed to be Clear Lake and who Klemme ahd previously given a good trimming. The visiting team besides hiring the fast Lehigh battery and first bagger from Mason City, also had an umpire whose vision was very keen for Clear Lake and very bad for Klemme. It was too much for Klemme, and they lost the game to Clear Lake 7 to 0. Nels Ure, the fast Lehigh Cement team's pitcher, hurled for the Lakers, with Fred Hanson, his battery mate from the same Lehigh team and Hysmith also of Mason City on the first bag. Klemme's battery was Gruetzmacher on the slab with Waterman behind the plate. Klemme was short of some of their best men that day and were weak on hitting. A rotten decision in the ninth on the par of Clear Lake's umpire cheated the Klemme boys out of a score and ended the game just as they started in on a hitting and base running exhibition that might have tied the score and possibly won the game.

The game which was to have been played between Klemme and Thornton Sunday was postponed on account of the rain.

GOODELL

Jay Griggs, accompanied by F. R. Chase, returned from North Dakota Saturday.

Mrs. Mary Griggs of Iowa Falls, is visiting relatives near Goodell.

Mrs. F. R. Chase and son Clifford autoed to McGregor Saturday.

Miss Jennie Minterz was a Goodell visitor Tuesday.

E. A. Strasburg and family of Meservey, were callers at the Jay Griggs home Wednesday.

Harold Griggs had his tonsils removed at the Hampton hospital last week.

PLEASE PAY UP

About two weeks ago we sent out notices to all subscribers who are in arrears. There are quite a number who have failed to respond to our appeal for cash. We want all who owe the Times for the paper to please mail check or call at the office and pay up. The Editor is like all other human beings—they need money once in a while to pay the other fellow. Pay up your subscription now while you think of it and it will make us smile, you bet!

Fault-Finder's Folly.

He who seeks only for faults sees nothing else, and will be so fully conscious of the faults of others that he will be at fault himself.

ADRIANOPLE IS BEAUTIFUL CITY

Airman Describes Romantic Charm of Mosques and Gardened Homes.

DECADENCE OF CITY GOES ON

Strangers Treated Kindly in an Atmosphere of Friendship—City Endures Its Shabby Gentility With Pride and Calm.

Adrianople, Thrace.—The decadence of two centuries, present political and economic disintegration, wars without end, and an uncertain future, have been unable to destroy the ineffable charm the Turks originally gave to this city of eighty-odd thousand souls. Adrianople is still a holy city in faith and in appearance. Romance still abides here.

"The Orient is the only place left to Europe where cities seen at close range are beautiful," remarked Jules Sebotin, a French aviator, while visiting the most beautiful of all mosques, Sinan's masterpiece here, the mosque of a thousand windows but one, erected at the order of Sultan Selim II., in the sixteenth century.

The first impression of the city has been one of infinite beauty. Arriving from across the lofty Balkans in an airplane, the city had been seen with a rush, a place of spires, and slate domes and red roofs, planted at the intersection of three rivers. It had been a welcome sight. It had come at the end of a four-hours' ride, and it was the journey's end to a tired aviator.

Charming Aloft or Afoot.

Seen from aloft, the city, surrounded by poplars at its outer rim, its house gardens within the city showing green vines and flowers, its outlying fields bare, aroused memories of Mardin on mountains, Diarbekr by the Tigris and hosts of other Turkish cities, always sleeping in beauty whether visited by sunshine or moonlight.

The longer the stay in Adrianople the more the charm of its beauty grows, a charm that is as great afoot as aloft.

Adrianople is a city that has the tone of country friendship about it, not unlike a county seat of the South. The center of the agricultural exchange business of Eastern and Western Thrace, it is frequented by peasants and traders of Turkish, Greek, Bulgarian, Jewish and Armenian nationalities. There is record of but one American ever having done business in the city, and he came here from Paris and bought up all the brooms.

While no day knows what the next day may bring forth in the way of political strife and crime, today the city preserves this tone of friendship and order. Strangers as they go along the streets or visit the shops are treated with kindly concern. The Turkish officers salute courteously and there is no glint of hostility in the eyes of the Turkish soldiers carrying their new rifles, recently distributed to them by Col. Djefer Tayar Bey.

The decadence of Adrianople goes at a dignified pace. There is little or none of the seething squalor and dirt and noise and poverty of Constantinople. There is none of the clamor of Constantinople's street cars and automobiles.

Pride in Shabby Gentility.

There are a few ragged beggar children who besiege the stranger, but for the most part Adrianople endures its shabby gentility with pride and calm. Here there are none of the fallen houses and dusty streets which characterize the majority of the cities of Asia Minor.

Prayers are called from the minarets as of old; also the old and new bazaars do a slender business in selling American and European calicoes and homespun cloths and Turkish silver mounted pipes and cigarette holders, rugs, junk, to passing peasant customers; or else when these are lacking they swap with each other, after the happy manner of all the Orient.

Decadence seems to have heightened the beauty of the majestic old mosque of Sultan Bayzid. The windows are broken in, the locks are rusted in the doors, the grass is growing up between the flagstones, the fountain in the court no longer splashes its water in the sunshine, and the interior of the mosque itself is slowly deteriorating.

Few worshipers come here, but on the drowsy Friday afternoons, the Mussulman's day of worship, come a devoted band of musicians and singers. The avitor stumbled upon this group and one of the red-fezed band saluted with the simplicity of the Turk and said, "Allah esmarladik."—"May God abide with you."

Musical Draws Crowd

MUSICAL WAS GREAT SUCCESS

Church Was Crowded Sunday Evening For The Big Event

Something new and something different was the Musical given at the Methodist Episcopal Church Sunday evening and a which th program was carried out as per program published in last week's Times. The church was crowded to capacity.

The program was thoroughly enjoyed by all who attended and was extraordinary and undoubtedly the best musical program of its character ever given in Klemme. Those who took part must be given credit for the tim and effort they spent in making he Musical a success, but more than the rest Miss Doris Buriff should be given the most credit for it was through her untiring work and direction that such a program was possible. She spent several weeks in working out the program and training the singers in their parts.

The program was perfett in every detail and each singer did his or her best to make the program the best ever given in Klemme.

CORN COMING FINE

The corn in this vicinity looks fine and most of it is out of danger of frost, according to the farmers. A bumper corn crop can be looked for and the couple of weeks of good warm weather we have been having is helping out the corn in good shape.

DUCK SEASON OPENED LAST THURSDAY

Early last Thursday morning the season opened on shooting ducks and there were plenty hunters out bright and early to bag the feathered quackers, we also believe the greatest share of ducks which the Klemme hunters tell about were "mud-hens." Of course Art Kuck got a few ducks, too, we mean besides the "mud-hens."

REV. MEYER WILL REMAIN IN KLEMME

The many friends of Rev. and Mrs. A. H. Meyer will be pleased to hear that the outcome of the conference held at Gladbrook was that Rev. Meyer was assigned to the Klemme charge for another year. Rev. Meyer is a valuable church worker and was wnted in other places for he is progressive and always working for a bigger and better church. He has done a lot for the churches of this community and it was mainly through his effort that the fine new church in Liberty township was made a reality. We are indeed glad to state he will remain for another year in Klemme.

FIRST METHODIST CHURCH

Preaching Service Sunday morning at 10:00 o'clock.

Sunday School at 11:00 o'clock.

Epworth League at 7:30 P. M.

Preaching Service at 8:00 o'clock.

Rev. W. P. Schlein, of Tolstoi, South Dakota, will occupy the pulpit at both morning and evening services. All are invited to come and hear him.

A. H. MEYER, Pastor

GRANGE AND UBEN FAMILIES TO WEBSTER CITY

The E. S. Uben and Paul Grange families have packed up their household goods and bade their friends farewell today as they are moving to Webster City where the men are in business, having bought a creamery a few weeks ago. The families have a host of friends here who regret their leaving but who wish them the best of good luck and happiness in their new homes.

Protection Against Catarrh.

Any constitutional exercise which improves the circulation and makes the body resistant helps to protect one from catarrh. This is particularly true of all breathing exercises because the effects are beneficial locally as well as constitutionally, says one of the best-known physical culture teachers in New York. So let us teach our children the value of correct and deep breathing, and in doing so we improve our own health and thereby impart cheerfulness and happiness to our home.

Depends on Circumstances.

"One should always serve from the left side. That's right, I believe." "All depends. In serving subpenas you sneak up from the rear."

BRAVE AMERICAN IN POLISH ARMY

Brigadier General Sweeny, Millionaire, Battles for Cause of Freedom.

TRAINED AT WEST POINT

Served in Mexico, South America and Gave Valiant Service in the World War—Unusual Type of Soldier of Fortune.

New York.—War dispatches making more than casual mention of Brig. Gen. Charles Sweeny have lent to the Polish struggle more than an impersonal interest to American army officers at Governor's Island, who are well acquainted with Sweeny, an American soldier of fortune with both principle and purse.

Men of no fortune at all who fight for excitement and pay are common enough. But Sweeny, U. S. A., is a multimillionaire's son, his father having amassed great wealth in the famous Coeur D'Alene mines of Washington and Idaho, and the soldier is more than a millionaire in his own right. He put in three years at West Point and then sought the life of an active soldier in Mexico, South and Central America and Europe.

Offers Self to Poland.

Sweeny, a former lieutenant colonel in the United States army, attached to the general staff, was in Paris during the spring of 1919, recovering from wounds suffered in the Argonne offensive with the A. E. F., when he learned that Poland was in need of officers for her new armies. He consulted with the then Premier Paderewski and offered to recruit volunteers when he returned to America. In three weeks he had selected 200 former American army officers, all of whom had seen service in France. Colonel Sweeny sailed for Poland in September of last year with the first of his officer contingent. He was not long in getting into the fight and in recognition of his splendid services Poland commissioned him a brigadier general.

This Irish-American-Polish general for whom a soft life held no appeal, began his career on the battlefield on leaving West Point after he tried mining for a while.

Soldier of Fortune.

He went to Mexico and got a wound in the Madero affair. Upon recovery, Sweeny packed up for South America, where he took a hand in several of the revolutions. He got into the world war as a private in the Foreign Legion. In the first Champagne battle in September, 1915, he was commissioned a lieutenant on the field for gallantry. He was severely wounded and gassed in this battle, and on a hospital cot in Paris he was awarded the cross of the Legion of Honor.

Two other important decorations were bestowed on him in rapid succession and he had a great reputation for bravery. Soon after being made a captain of the French forces, he was sent to the United States upon advice of Ambassador Sharp as an instructor in 1917.

Sweeny was commissioned a major in the United States army and helped to train the Eighth division at Camp Lee, Va. He went overseas with this division, got shot up in the Argonne and was promoted lieutenant colonel for gallantry before the enemy, and assigned to the staff of the A. E. F.

Photograph of the R-80, latest British dirigible, in her maiden flight at Harrow. She is of the same type as the R-34 which crossed the Atlantic, but larger.

Thrift Urged By Uncle Sam

Treasury Department Is Spending Million Dollars to Encourage Saving.

WANTS PEOPLE TO INVEST

Carrying on Campaign for the Sale of Thrift Stamps, War Saving Stamps and Saving Certificates — School Rooms Organized.

Washington.—Uncle Sam is spending $1,000,000 this year, through the savings division of the treasury department, in an effort to encourage thrift.

The expenditure of $1,000,000 compares with an expenditure last year of approximately $4,000,000, and the staff of employees which comprises a force in Washington and an organization in every federal reserve district compares with the great force inherited from the war.

Advocates Opening of Bank Accounts.

The savings division carries on the campaign for the sale of Thrift stamps, War Savings stamps and saving certificates, but these sales are merely a side line to the general effort, for just as much stress is being put upon the opening of savings accounts in the banks as upon the sale of stamps. Through the subsidiary organizations just as much effort is being made to have the housewife keep a budget as there is effort to propagandize the homes in the interest of government securities.

In the period from December 1, 1917, to January 1, 1919, the sale of government securities, exclusive of Liberty and Victory bonds, reached more than $1,000,000,000. In 1919 the sales dropped to $134,230,687.84. In the first six months of this year the sales dropped to $26,985,842. But the report of the six months of the year is no indication of what the final report will be, according to O. C. Lester of the savings division, who says the people do not save as much during the summer months as at other times.

School Rooms Are Organized.

When the government first initiated its drive for thrift and asked the assistance of the people, the savings division was organized and the request made for other organizations to co-operate with it. A drive was made to interest the school organizations, the organizations of women, the clubs and industrial concerns and others. But the effort was not entirely successful and the policy has been reversed. The government is now saying to all these organizations that it is ready to cooperate with them and success is being had.

Thousands of school rooms are now organized and in many cities and states courses in thrift are being made a regular part of the curriculum. Industrial concerns have also organized their clubs. Women are teaching the necessity of the budget in the home. Fraternal organizations have joined in and the entire groundwork for the savings campaign has been laid.

URGES FRENCH LEARN GERMAN

Former President Poincare Points to Value of Language to His People.

Paris, France.—"Learn German," is the advice former President Poincare has given the French through the Association of Language Professors. He said:

"To dominate German science, we must understand it. To maintain the independence or the superiority of our literature, we must not close our eyes to foreign literature, not even that of Germany."

M. Poincare added that German must be known by those who undertake the administration of the occupied regions, and also to restore French to its proper place in Alsace-Lorraine.

Army officers recently were urged to learn German. The government has reinstated that language in the officers' training schools.

NEW JUMP IN IMMIGRATION

Increase of 20,000 in Week Laid to Typhus and War in Europe.

Washington, D. C.—Immigration officials here profess to be mystified at the sudden increase in immigration which approximated 20,000 persons last week; and, it continued, would add 1,000,000 to the population of the country in a year. Louis F. Post, assistant secretary of the department of labor, said today no information has yet reached the department which will explain the situation.

"But I have a theory about it," said Mr. Post. "I am inclined to think that many of these people are coming here to get away from conditions at home and that the condition is only temporary. Only last week a ship was held up at quarantine with typhus aboard, and the war is not yet over in Europe. Either one of these conditions would naturally make a lot of people anxious to get away."

Eggs Proved Too Frail As Carriers of Whisky

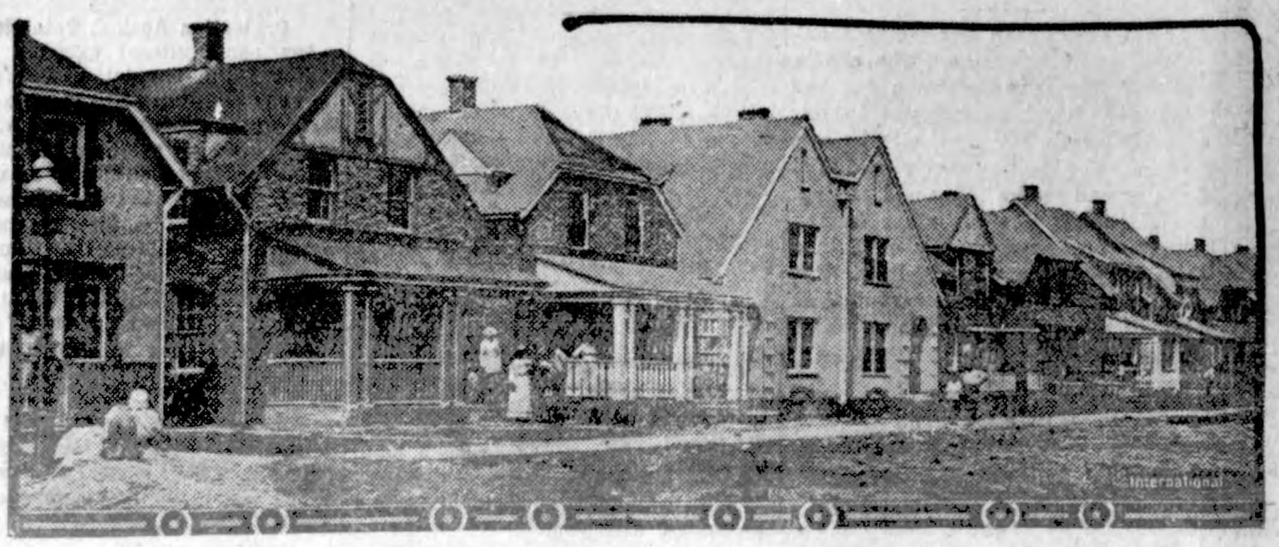
Eggs may be all right to ship whisky in, but the baggage smashers must handle such cases with care. At a station in West Virginia some of the eggs broke and a prohibition inspector found three cases of "doctored" eggs.

Each egg had been carefully "blown" from the shell. After whisky had been poured in, the aperture had been sealed with cement.

"David and Goliath" Re-enacted.

Indianapolis, Ind.—Just as a mad bull was charging Robert Williams, intent on goring him to death, a small boy hurled a brick. It struck the bull squarely between the eyes and killed the animal. The boy, scared, ran away after the feat.

Building Homes for the Chicago Homeless



The Chicago Housing association has undertaken a great social experiment in the erection of many homes for families which had nowhere to live owing to the house shortage in that city. The homes are of brick, two stories, and the tenant pays rental of about $35 a month which is applied on the purchase price. The house is sold at exact cost.

MANY KILLED BY TERRIFIC BLAST

Death and Destruction Wrought in Heart of New York's Financial District.

POLICE SUSPECT BOMB PLOT

Hundreds Injured By Flying Debris—Morgan Building Badly Damaged—Street Thronged With Crowd When Disaster Came.

New York.—A mysterious explosion in Wall street, near Broad, believed by trained department of justice and police investigators to have been caused by an infernal machine, killed 35 or more people, injured probably 200, partly wrecked the J. P. Morgan & Co. banking house, the subtreasury and the assay office, and caused property damage estimated at $2,000,000.

Police investigators are of the opinion that the infernal machine was in a closed truck drawn by one horse, which was abandoned at the curb in front of the assay office, and that a timing apparatus set off a quantity of high explosives. The horse was blown to pieces, but no trace has been found of the body of the driver.

The noon hour had struck, and an endless stream of office workers had just started pouring into the streets from buildings in the neighborhood. Suddenly a cloud of yellowish, black smoke and a piercing jet of flame leaped from the street outside the Morgan office.

Then came a deafening blast. A moment later scores of men, women and children were lying prostrate on the ground, and the streets were covered with debris from thousands of broken windows and the torn facades of adjacent buildings.

Thousands of clerks and stenographers fled in terror from adjoining structures, and many of these office workers are among the injured. Scores fainted, fell and were trampled on in the rush. Meanwhile the noise of the explosion, which was heard throughout lower Manhattan and across the river in Brooklyn, brought thousands of the curious to the scene.

Pieces of bodies were found on window sills and in crevices of buildings hundreds of feet from the scene of the explosion. Many of the victims suffered the loss of limbs.

The explosion created more confusion in New York than even the great Black Tom explosion. Business of the financial district was paralyzed for the rest of the day. The sessions of the Stock Exchange and the curb market were suspended. Hundreds of brokerage offices closed.

Witnesses have been found who claim to have seen a truck marked "explosives" near the scene just before the explosion. There are also witnesses who claim to have seen a flash in an automobile standing at the curb near the Morgan bank, which flash was immediately followed by the explosion.

Some adhere to the theory that a truck loaded with explosives blew up as it was passing through Wall street, and was midway between the Morgan banking house and the assay office.

Warnings that radicals planned a renewal of bombing outrages were sent less than a month ago to all eastern clients of the William J. Burns detective agency, according to a statement by Mr. Burns, who said he was convinced that the explosion was a premeditated attack, and was not accidental.

It is also known that a letter giving warning of the explosion was dropped through the mail slot of a door in one of the offices of the French high commission at 65 Broadway the day before the disaster.

Reds Warn Centralia Legionaries.

Centralia, Wash.—Department of Justice operatives are investigating the receipt by a local newspaper of a threatening letter purporting to be from "Milwaukee radicals," in which warning is given that American Legionaries and business men of this city who escaped the Armistice day murders would be killed "about October 15th."

No Barnstorming for Harding.

New York.—There will be no "barnstorming" in connection with projected speaking trips of Senator Harding, Will Hays, national chairman, said here in commenting on a report from Marion that the republican presidential candidate would travel from coast to coast. "There has been absolutely no change in our plans as announced a month ago," Mr. Hays said. He expressed doubt that Senator Harding would go farther west than Omaha.

Communists In Power.

Turin, Italy.—Workers are tightening their grip on the economic situation here. The communists took control of the electric power plant when its directors attempted shutting off power from communized factories. Hundreds of workers, carrying red flags, followed the funeral of two red guards killed near the factory of Francisco Benegetti, who is on trial for murder. The communists at present work for food cards only, receiving no money. These cards provide meat, bread, potatoes and other vegetables.

RED LITERATURE IS SEIZED

Evidence in Hands of Federal Agents Shows New York Outrage Work of Radical Element.

New York.—Receipt by department of justice agents of five radical circulars, signed "American Anarchistic Fighters," which were found in a mail box at Cedar street and Broadway, furnished the first tangible clew, they said, to the identity of the persons who were responsible for the explosion in Wall street.

In making public the circulars, which were printed on cheap paper, seven by eleven inches, Chief William J. Flynn of the bureau of investigation of the department of justice called attention to the fact the bombs sent in the nation-wide plot on June 1, 1919, were wrapped in circulars announcing the coming of the revolution and signed "American Anarchist Fighters."

The text of the circulars read:

"Remember. We will not tolerate any longer. Free the political prisoners or it will be sure death for all of you."

The circulars were not enclosed in envelopes, nor did they bear addresses. Some contained misspelled words.

"In my opinion this was not an attack on J. P. Morgan & Co.," Chief Flynn declared. "I believe that those responsible, picked out the financial center to create a demonstration."

Examination of shrapnel found imbedded in the bodies of some of the dead and of fragments removed in surgical operations on the injured has added weight to the belief that the explosion came from an infernal machine and was not accidental.

The brokerage firm of Daniels & Co. sent to Mayor Hylan a check for $250, requesting him to use it as a nucleus for a fund to be raised for the relief of sufferers in the disaster. The letter points out most of those injured were clerks and stenographers in moderate circumstances.

Total losses in securities resulting from the explosion were approximately $212,000, most of which has been recovered, according to information collected by The National Security Co. It is estimated the ultimate loss would not exceed $21,000.

TO ARM ULSTERITES.

British Have Plan Worked Out to Subdue Sinn Feiners.

London.—The British cabinet has fixed upon a definite policy for Ireland that will be forced through. Parliament, in October, will rush the Irish home rule bill through third reading, and start its operation by creating a separate parliament for Ulster, which will begin functioning at once.

It will renew its offer for a separate parliament for the south of Ireland. This undoubtedly will be rejected.

With Ulster managing her own affairs, if the south rejects the home rule bill, the British will strengthen military rule in that section, using soldiers drawn from the north of Ireland to crush the Sinn Fein terrorists. Irish moderates, it is hoped, then will express willingness to accept home rule.

Man Who Sent Warning Insane.

Hamilton, Ont.—Edward P. Fischer, detained here in connection with investigation into the Wall street explosion, was apprehended on information given the police by his brother-in-law, Robert Pope of New York, it was stated. The police say Mr. Pope informed them that three weeks ago the prisoner predicted the New York catastrophe and sent warnings to Wall street friends. Pope says his relative has been in a peculiar mental condition for some time, and that he believes the information as to the approaching disaster was "received by telepathy."

A lunacy commission adjudged Fischer a "fit subject for the asylum."

Mine Operator and Deputies Killed.

Jasper, Ala.—L. M. Adler, general manager of the Corona Coal Co., was shot and killed and Deputy Sheriffs Edgel and Browne, traveling with him in an automobile, were wounded so seriously that both died later. The shooting is considered the outgrowth of the coal mine strike which has been in progress in Alabama ten days and after the killings Sheriff Clark Guthrie of Walker county called upon Governor Kilby for troops. Adler and his party were shot from ambush, authorities say.

Harding Comments on Maine Vote.

Marion, O.—Senator Harding issued the following statement in reference to the sweeping victory won by republicans in the Maine election:

"The result in Maine is reassurance that the American people mean to return to representative government under the constitution through the agency of the republican party, and that Maine takes the lead in declaring for America unmortgaged to the old world, but still ready to serve humanity as American conscience impels."

Kirk, Furloughed Prisoner, Caught.

Lincoln, Neb.—Word reached here last Saturday that Beryl Kirk, who was "furloughed" by Senator Bushee, who was acting governor in the absence of Governor McKelvie and Lieutenant-Governor Barrows, after he had served only eighteen months of a twenty-year sentence in connection with the murder of Police Detective Rooney at Omaha, was arrested in Des Moines after a freedom of about seven months. Following the release of Kirk by Bushee, Governor McKelvie ordered that he be re-arrested.

REPUBLICANS IN MAINE WINNERS

Roll Up Greatest Plurality in Recent Election Ever Recorded in State.

WOMEN TOOK LEADING PART

Contest Waged Along Lines Laid Down for National Campaign, Results Reflect Attitude of People, G. O. P. Leaders Say.

Portland, Me.—Republicans swept the state in the election September 1 and elected Frederick H. Parkhurst governor by the largest plurality ever given a governor in Maine. Parkhurst's plurality over Bertrand G. McIntire, democrat, was more than 60,000. The largest previous plurality was about 48,000, given the republican nominee in 1896.

Aided by the women's vote, which went largely to the republicans, the party rolled up a vote more than 30,000 larger than that of 1916, while the democratic total was increased by only about 2,300. Republicans elected congressmen from all four districts and obtained a large majority in the legislature, besides electing their candidate for state auditor.

The state senate is solidly republican, and the republicans elected every county attorney and county sheriff. Twelve democrats were elected to the state house of representatives.

The vote for Parkhurst shows an increase of more than 50,000 over the vote cast for Milliken, republican, four years ago, while McIntire's vote was less than 2,000 more than that of Curtis, democrat, in the last presidential year.

Considerable significance in the outcome in its bearing on the voting for president in November was asserted by republican leaders to be apparent from the fact that the campaign was fought out almost wholly on national lines, with the league of nations as the chief issue.

NEW WORLD COURT.

Constitution of International Tribunal Completed By Council.

London.—Elihu Root is en route back to the United States with copies of the new international court constitution, provided for in the covenant of the league of nations. The court and the league are independent.

The league council, in announcing completion of the project, expresses no opinion regarding its merits, but says it would regard irreconcilable difference of opinion on the merits of the scheme as an international misfortune of the gravest kind. The failure would be great, and probably irreparable.

The court constitution provides for eleven judges and forty-six deputies of different nationalities, each serving nine years and re-electable. The court would meet annually at The Hague on June 15.

The court would have jurisdiction over: Interpretation of treaties; international law; determination of what constituted a breach of international obligations; prescription of the nature and extent of reparations; interpretation of its own sentences.

Coast Air Mail Launched.

Chicago, Ill.—An extensive daily coast to coast air mail service was launched Sept. 14, when planes left five cities. One plane will leave each morning from New York with mail for San Francisco, one from San Francisco for New York, one from Cheyenne to San Francisco, one from Salt Lake City to San Francisco, one from Chicago to San Francisco every day except Sunday and one from Chicago to New York every day except Sunday.

Ousted Socialists Re-elected.

New York.—The five socialist assemblymen who were expelled from the state legislature last spring on charge of disloyalty, were re-elected in special elections held here.

At another special election in the Nineteenth district of Kings county, Nat Rubin, socialist ran third in a three cornered contest.

The vote in the five districts was the ousted assemblymen ran were light.

Fruit Crop Swamps Market.

Benton Harbor, Mich.—Berrien county's $10,000,000 fruit crop, the largest of many famous yields, is moving at full height into the markets of the United States. This community is literally swamped with peaches, apples, pears and grapes. Three railroad lines, two electric interurbans and two lake steamship lines are working day and night to transport the harvest, and so far all these agencies have been able to cope with the demands made upon them.

Fear Plague in the U. S.

San Francisco, Calif.—The United States is in grave danger of a bubonic plague outbreak because foreign countries are attempting to conceal the fact that they have plague-infested areas, Surgeon General H. S. Cumming of the United States public health service told the convention of the American Public Health association here. Dr. W. H. Kellogg, Berkeley, Cal., told the convention that bubonic plague is being fought in five seaports in five states in the United States, which he did not name.

h!" she cried to Hilliard. "I
know you were coming up to-
! Suppose I'd missed you!"
merely smiled, and made no an-
nor did he speak to her until
the doctor, protesting a sudden
e for solitude, had waved them
itably out of the study into the
room. Carol was in the old fa-
r corner of the sofa; Hilliard was
ding by the fireplace, peering
into the empty grate. He coughed
hily, and an expression of utter
lessness crept into his eyes. He
d abruptly.
Well," he said, "just how much
d you have cared if you had?"

* * * * * *

ere was a stately old lamp stand-
at height behind the sofa; its
ows were gracious and its light,
crept through a shade of painted
m, touched Carol softly, in a
acy of radiance which was infin-
caressing. Her hands were lying
in her lap; she bent her head, and
ed them studiously.
Why, I should have cared a great

of a sudden?"
illiard reddened, and his eyes grew
ter.
Friendship!" he said tardily.
at an accordionlike sort of thing
is!"
Why, Mr. Hilliard!" Her tone was
he same time interrogatory and re-
chful.
Oh, I'm not speaking of you," he
. "Only of the thing itself. . . .
big or little, close or distant . . .
it hasn't anything to say about it
. . You'll have to excuse me—I
thinking out loud . . ."
Please do!" she said. "You were
the way to be interesting. Think
loud some more."
illiard glanced sharply at her.
Don't laugh at me!" he said, almost
hly. "For heaven's sake, don't
know that the one time you
uldn't laugh at a man is when he
erves it?"
arol's attitude was vaguely less
estive of ease.
wasn't laughing at you," she said,
ly. But what you said was so
. so queer."
Oh, yes." Hilliard's accent was
flat. "I suppose it was. It must
e been. . . . I always seem to be
e or less up in the air when I come
ee you, don't I? The last time we
ed about friendship—"
But that was at least a month ago,"
said hastily, "and in the mean-
e you've been just as nice and
erful as anybody. I thought you
e all over your troubles."
Cheerfulness wasn't what you
ed for." Hilliard swallowed hard.
. . . I came up here, Miss Du-
, to have a really serious talk with
. . . really serious. It's been
ged too long already. It took me
solid days to get my courage up
. And . . . and now I'm here,
n't even know how to begin."
e scowled heavily into the vacant
place, and held out his palms with
echanic gesture as though to warm
m at an imaginary blaze. "You
w," he said absently, "your father
very extraordinary man—very."
he compliment to the doctor had
invariable effect upon her; she
ved under it.
've always known that . . . I'm
d you realize it, too."
e stood erect, and faced her. "I
. . . it came to me, when I was
ing to him, what a great privilege
ust be for you to have his advice—
his sympathy . . . when you need it. And there are so few—so incredibly few—people who make you feel like that. One in a thousand. Or, one in ten thousand. People who lift you clear of your trivial little self—and make you think in terms of principles, and not of your own selfish ideas—and still don't preach. . . . It must be a privilege."

"It isn't only for me," she said. "He has enough sympathy for anyone who asks for it. He isn't very worldly—you've noticed that? He can't believe that anybody, or anything, is really bad . . . and perhaps that's why people come to him so. Of course, it may be that just because he's my father, I—"

"No." Hilliard shook his head. "I've seen a good many fathers, and next to mine. . . . My own was a wonderful man, too, but I never appreciated him. And seeing the doctor has made me wish . . . oh, it's too childish to talk about!"

"If you were really as old as you try to be," she said gently, "you'd know that it isn't ever childish to be serious about such things as that. On the contrary! And yet there was a time when you wanted me to think you were well over thirty. Why, Mr. Hilliard, you're a boy!" Nevertheless, she regarded him . . . not as one would regard a mere youth, but with appreciably more uncertainty.

Hilliard had flushed warmly.

"That was when I wanted you to think a good many things that weren't true."

"About you?" Her inflection was an invitation to further confidences, and it drew Hilliard incontinently along the path he had planned—and feared—to take.

"Some of them," he admitted. "And some were about you. The fact is, I . . . I've come on a peculiar errand." He cleared his throat violently; his eyes suddenly adored her. "I've come to straighten all that out. Please don't imagine I've suddenly gone crazy or . . . or anything . . . and please don't take anything I say tonight to mean weakness . . . because, honestly, I've thought about this so much that it's rather disintegrated me . . . but I've got to tell you some things I don't want to." His shoulders squared in resolution; and at the look of pain in his eyes, of pain and despair, her whole womanliness went out to him—and had to be crushed, because she was, after all, a woman.

Her look to him was first of astonishment at his surrender, and, after that, of swift, ineffable pity for the unnamed forces which were influencing him. Womanliness hung in the balance; and then, in a flash of perfect comprehension of his plight, she knew that she could speak to him without reserve. He had passed beyond the bounds of conventionality; she put herself, mentally, at his side.

"If it hurts you to say it," she said, "I've known you've been . . . fond of me. How could I help it? And why shouldn't you have the right to think of it? Why shouldn't you have the right to be yourself? Why shouldn't you have the right to talk to me, and to expect me to hear you, and try to understand? You haven't thought that my father is the only one of us to do that, have you?" The reproof was exquisite.

"Ever since that day . . . the time you played to me," he said, "I've

"Think Out Loud Some More."

fought against it—fought like the very devil, and—"

"I've known that, too—and you've come to see me so seldom. I'd hoped at least that you'd give yourself the chance you said you wanted."

He stiffened heroically "You forget there was a condition . . . an imperative condition . . . and it's only fair to you to tell you that it's a condition I can't ever meet—ever. That's why I'm here. I had to tell you."

There was a profound stillness.

"Can't you explain?" she said at last. "I wish you would. You're making me feel very bad, Mr. Hilliard. You owe it to me—"

He had to exert his utmost will to make the beginning. "All I can explain is that I've made another mistake . . ." After the first great effort the words came tumbling, passionately, unchecked. "It would have been so infinitely better for both of us if I'd never met you at all. . . . My life has been a whole series of mistakes; this is the worst. . . . The worst. . . . Of course, it would be absurdly simple if I were going away from Syracuse, if I were going to leave you here, and go—but I'm not. I'm going to stay here. And I can't think it's decent not to tell you now that if you . . . knew all I know . . . what I've been, what I've done . . . you wouldn't marry me if I were the last man left to ask you! . . ." He gestured impatiently. "We're childishly hopeful sometimes . . . all of us . . . hoping for what we know is impossible . . . what we know always will be impossible. . . . I've been like that—and what I hoped was that you could take me on the basis of what I've been for the last few months . . . since July . . . because that's the way I take myself. Just a man—a man—like Jack Armstrong. I hoped we could simply eliminate the past, and . . . I can't get away from it. It's on my heels every minute. It's what I am, now . . . but if I went much further back than that, you and the doctor would both think just what I do about myself . . . and I'd have to say good-by to you anyway . . . just as I'm doing tonight. I hope you can see that I'm not telling all this to you from any other motive except to be quite honest with you. Quite honest—for once. I care too much about you to let you live another day without knowing that I can't go on—it's over. . . . I'm not fit to be even your friend. That's all."

She sat motionless. Hilliard had turned back to the fireplace.

"Were you as bad . . . as that?" she whispered.

"Once," he said bitterly, over his shoulder, "I used to be a gentleman. But that was a long time ago."

She raised her head. "Nothing could ever make me believe," she said, "that you haven't always been just as I've known you—since July. Nothing can, and nothing will. What you may think about yourself makes no difference to me. I—"

"Don't!" he said, and his tone was agonized. "Don't you see—"

"I don't believe you," she said steadily.

Hilliard's voice was unstable with his great bitterness of failure. "You flatter me," he said harshly. "And besides—you're wrong."

She was up, and beside him, smiling bravely into his eyes, and he was flogging his will to keep his hungry arms from snatching her, from sweeping her close to him, and . . .

"What do you think women are?" she demanded, with sweet imperiousness. "Nothing but marble statues—or putty ones? Just made to stand around and let the world go past, without having anything to say about it?"

He retreated to the wall in self-defense. "Don't! Don't! I'm the one who's driven myself into this corner—not you!"

"But you don't have to stay in it always, do you?"

He stared at her in mystification.

"Don't be silly," she said, "and don't be unreasonable; I'm not!" She touched his sleeve; his expression was unchanged. "Don't make me think you are unreasonable!" she said compassionately. "If you're not satisfied, why can't you make yourself what you want to be? Instead of brooding over the past, that you can't help, why don't you think about things you can help? Living is about all there is to live for, isn't it?"

He drew in his breath perilously. "But I'm letting you go," he said, dazed.

She stamped her foot in tremulous severity. "No, you're not; I won't allow it! Can't you see why? Do I have to tell you that? Well . . . because I want you for a friend even if you don't want me."

"Want you!" he cried, and remembered himself, and froze to immobility. "Oh—as a friend!"

"Surely, as a friend—what else did you think I meant?"

The young man shook his head.

"I don't know. Only I came up here to tell you I haven't any right to your friendship. I can't tell you why . . . I haven't as much callousness as all that . . . but if I did tell you, your last atom of faith in me would be gone. And you can't afford to have me even for a friend—now that I've said that, can you?"

"Yes," she said steadfastly, "I can afford it."

"When . . . when I've told you . . ." His lips were parted in amazedness, his eyes roved dully. "I can't under— . . . I'm telling you I'm not worth the powder to blow me to hades." He laughed oddly. "That's proved already, over and over again. . . . Don't you understand? . . . Carol . . ." His voice broke. "Why, Carol . . . I'm not fit to talk to you. That's proved, too. . . . I'm proving it now! I'm saying it—don't you hear me? I'm saying it now. And you—" He put his hand to his forehead, and brushed back his hair, which was strangely wet. "I can't make it any plainer," he said, with helpless finality.

"No matter what's happened," she said earnestly, "I can't believe it isn't coming out all right. So if you'll just keep on living, and working, and trying . . . and . . ." Here her eyes were so appealing that his own dimmed to behold them. "And you haven't been so very dreadful after all, have you?"

Hilliard retreated once again, not trusting those hungry, lawless arms of his.

"I'm just wondering," he said, with a terrible smile, which was entirely devoid of mirth, "if a man happens to

"Don't! Don't!"

be in a . . . a sort of transition period, you know—half-way between . . . I wonder what's coming to him. I wonder what is coming to him. . . . I wonder if the whirlwind doesn't get him both ways."

* * * * * * —•— •—

After the street door had closed behind him, Carol went slowly along the corridor to the doctor's study and knocked, out of sheer habit. His pleasant baritone came to her reassuringly.

"Yes?"

"Are you busy, dear?" Few men, on hearing her voice, with that suggestive catch in it, would have confessed to a previous engagement.

"Not when you're around," said the doctor, appearing on the threshold. His tone altered suddenly. "What's wrong?" he said.

"Daddy," said Carol, "he's gone. . . . You saw him, too . . . what is it? What is it?" She was trembling violently; the big doctor gathered her up in his arms without ceremony and carried her over to his favorite leather chair.

"Fires burning," said Doctor Durant, quietly. "Burning and burning and burning . . . like the ones you've seen down in the blast furnaces . . . white hot, and crucible steel comes out of them . . . strong enough to make permanent things out of . . ." He smoothed her hair, and she sighed quiveringly, and lay still. "And the steel lasts ten thousand times as long as the fires that made it. I don't know what's blowing the flames, dear, but he'll do—he'll do."

CHAPTER XI.

Half-way down James street, Hilliard, driving his runabout in utter disregard of the traffic rules, was reliving, moment by moment, and word by word, the conversations of the earlier evening. He had gone to Carol with the sturdy intention of betraying himself manfully and in detail; but in the doctor's study he had perceived another, and what seemed to him a more unselfish method of achieving the same end. He had fancied that if he could preserve intact the memory of Dicky Morgan, if he could prevent the world—and especially that part of it personal to the Cullens and Durants—from knowing what a despicable thing it was that Dick Morgan had done, he could save a modicum of pain for those who would otherwise be most affected. This conception had interfered to make his talk with Carol somewhat aimless . . . he had been under the dual necessity of damning Hilliard, without implicating Morgan. And how bunglingly he had accomplished it! How inefficiently—how unsuccessfully!

On impulse, he checked the speed of the car, and swerved to the left; he was actuated by a sudden desire to run over to the University club and see Armstrong. He had no definite plan as to what he should say or do; he merely craved to meet his rival face to face, and have it out with him. Man to man—and this time there should be no bungling.

Mr. Armstrong, it seemed, was in the library . . . and would come down directly. Indeed, he followed almost on the heels of the messenger.

"Why, hello, Hilliard," he said, rather stiltedly. "Did you want to see me? That's too bad—I've got to leave here in just a couple of seconds to catch my train. I'm going West tonight."

"I'll take you over," said Hilliard, shortly. "That'll save you a minute or two—and give us time to chat. My car's outside."

"Why—under the circumstances . . ." Armstrong's glance was diverted. "I don't think I can let you do that—take me over, I mean. I'm going West on a business trip and I don't think it would be very appropriate for you to—"

"Oh—you are!" Hilliard felt streaks of ice coursing along his spine. "How far West?"

Armstrong consulted his watch nervously.

"Hilliard," he said, "I like to do things out in the open. There are just two reasons why I don't think you really want to invite me to ride down to the station with you. If I'm wrong, it's up to you to say so. One of 'em is that Rufus Waring has asked me to stop off at Butte—I'm going a good deal further than that—and look up some matters for him. I guess you know as well as I do what they are. . . ."

Hilliard fumbled his hat. "I see. And—the other reason?"

Armstrong suddenly straightened; and his voice had a curious ring to it—a ring which electrified Hilliard and awoke the most petrifying alarms within him.

"But does one ordinarily mention—certain kinds of people—in a men's club? I don't know how it is where you come from—but here, we don't."

Hilliard smiled vapidly; it was the utmost perversity of emotion, for he knew now why Carol had been so explicit in her sympathy . . . why she had been so meticulous to let him realize that she wanted him as a friend; only as a friend . . . and here was Armstrong, concealing with difficulty the triumph he was hinting at. . . .

"No," he said harshly. "One doesn't, but there isn't anything to keep us from mentioning anybody we like outside the club, is there?"

"Why—not that I—"

"Then I'll take you down anyway," said Hilliard. "And let's see if we can't try to understand each other."

It took a brave man to accept the offer, for Hilliard's eyes held little to recommend their owner as a prudent driver, or as a very pleasant companion. Armstrong, however, was already putting on his hat.

* * * * * * *

They had driven over to the station in silence. Hilliard, parking the runabout carefully, turned to his passenger.

"We've got ten good minutes," he said. "Your train isn't even in yet—go ahead and talk."

Armstrong, after a momentary delay, put out a conciliating hand. "Old man," he said, "let's play the rest of this out like two sensible people. We won't get anywhere by bickering, and I suppose it won't do any harm for us to put all the cards on the table, and know exactly where we stand. Of course, you haven't known me very long, and I haven't known you . . . but suppose, just to help along the understanding, we take each other at face value."

Hilliard winced.

"Well—suppose we do. Then what?"

"Then you can't hold it up against me for stopping off at Butte on my way out. I haven't any motive in it—I promised to do it as a favor to Rufe Waring. It isn't a personal issue at all. I know exactly how it must appear to you, but . . . I'm not that sort of man, Hilliard. I wouldn't have dreamed of it myself. That's straight!"

The masquerader regarded him earnestly—and yielded to his evident sincerity.

"Way down deep," he said, at length, "I know you're not, but . . . what's that for?" He referred to Armstrong's outstretched hand. "Oh! . . . all right." They shook hands solemnly. "At the same time it would have been so perfectly natural for you to feel like getting whatever leverage you could—"

"There's no need of that—now," said Armstrong. His smile was proud and brilliant, and Hilliard withered under it.

"Well, I wasn't sure."

(TO BE CONTINUED.)

Evidence Stork Had Traveled.

Julia had been over to see the neighbor's new baby and upon her return was asked how she liked it, to which she replied: "Well, mother, it is all right, only the stork must have been a long time on the way with it, for it certainly is awfully tanned."

Kept Busy on Social Calls.

The wife of a member of congress can discharge her social duty in the cabinet in nine calls, but a cabinet woman must pay more than 500 if she makes only one call during the season on each senatorial and congressional household.

I SUFFERED THREE YEARS

Finally was Restored to Health by Lydia E. Pinkham's Vegetable Compound.

Lowell, Mass.—"I was all run down and had an awful pain in my right side, was persistently constipated and had very dizzy spells. I suffered for three years and was perfectly miserable until a friend was telling me to try Lydia E. Pinkham's Vegetable Compound and I found it a wonderful medicine. I can now do twice as much work and I recommend the Vegetable Compound to other women. You can use these facts as a testimonial."—Mrs. M. THEALL BESSEY, 186 Appleton Street, Lowell, Mass.

Why women will continue to suffer so long is more than we can understand, when they can find health in Lydia E. Pinkham's Vegetable Compound!

For forty years it has been the standard remedy for female ills, and has restored the health of thousands of women who have been troubled with such ailments as displacements, inflammation, ulceration, irregularities, etc.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

BETTER DEAD

Life is a burden when the body is racked with pain. Everything worries and the victim becomes despondent and downhearted. To bring back the sunshine take

GOLD MEDAL HAARLEM OIL CAPSULES

The national remedy of Holland for over 200 years; it is an enemy of all pains resulting from kidney, liver and uric acid troubles. All druggists, three sizes.

Look for the name Gold Medal on every box and accept no imitation

ALWAYS REMEMBER

When considering your health, purity and freshness should be your supreme aim. We do not know of any medicinal preparation that can equal the power and effectiveness in regulating the bowels, stimulating the liver, flushing the kidneys, sweetening the stomach, or cleansing and enriching the blood, than

BULGARIAN BLOOD TEA

This pure all-herb preparation taken steaming hot at bedtime kills a cold overnight and guards against influenza, grippe, and pneumonia. It is the Favorite Family Medicine in millions of happy homes; physicians and druggists heartily recommend it. Sold by all druggists and grocers everywhere.

OUR CERTIFICATES OF DEPOSIT ARE A Safe Investment

A Strong Bank

The strength of a bank lies not alone upon financial resources as read in figures indicating dollars and cents.

A bank must depend as well upon the integrity of its officers and upon their ability to meet the financial problems which are presented to them with each new day.

While this bank's resources are ample and steadily increasing, your confidence may be placed as well in the officers who are responsible for its management.

We are here to serve you efficiently and faithfully.

First National Bank
KLEMME, IOWA

Local Mention

Emma Sampson was absent from Day's Store Monday but it was later learned tht she was assisting Mrs. Leonard Sampson to cook a big dinner for the silo filling crew.

We hd a letter from Walt Berggren, of Traer, Iowa, the other day and "Butch" says to tell all his old friends hello. He formerly was proprietor of the Crystal Cafe, but is now running a cafe at Traer.

Mr. and Mrs. Chas. Bier and little girl of Swea City, and Mr. and Mrs. Conrad Bier, of Meservey, stopped off at Klemme Monday on their way to Swea City. Both of the families are well known in Klemme and have a lot of friends here.

Mr. and Mrs. Oscar Musfelt, of Clarion, were visiting at the Fred Musfelt home a couple of days last week. They also spent a couple of days visiting at Garner. Oscar is the proprietor of a cigar store at Clarion and is enjoying a good business.

We learn from one of our exchanges that Mrs. A. B. Schaeffer, of Forest City, has again fractured her hip. It will be remembered that Mrs. Schaeffer fractured the other hip last winter at LuVerne, Iowa. She is quite an elderly lady and it will be hard for her to have to suffer again.

Miss Mabel Waterman left last Friday noon for Iowa City where she will begin her freshman year of work at the State University. Miss Waterman graduated with honors at the Garner High School last year and so we look for her to make excellent marks at the University.

Harold Gruetzmacher left last Friday evening for Ames, Iowa, to be in readiness to take up his work in the Electrical Engineering department of the Iowa State College. Harold also takes a great interest in athletics and we hope to see him pitching for the Colege next spring as his chances are very good to make the team and he whirls a fine game.

National Anthem Turned Policemen Into Statues

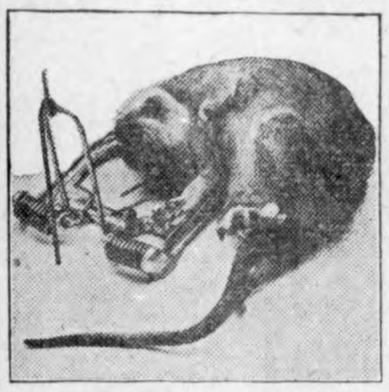
Boston, Mass.—By playing "The Star Spangled Banner" over and over an Italian band kept two policemen, who ordered them to stop, standing at salute in the Fells reservation, near here, until their arms dropped numb and helpless. A few Italian women and children, who were along for an outing cheered and applauded in great glee. Then the bandsmen fled.

Soon after the tumultuous strains had begun resounding through the woods Policemen Jordan Frost and Roberts appeared and informed them they must stop, as they were in the state reservation. The leader at once ordered "The Star Spangled Banner" played.

CINCINNATI WARS ON RATS

United States Department of Agriculture Assists in Extermination of Rodents.

Washington.—The health authorities of the city of Cincinnati secured the aid of the biological survey of the United States department of agriculture in planning the details of a city-wide drive to exterminate rats. The methods of poisoning and trapping the animals recommended by the department's men who have specialized in work of this kind will be followed very largely. The city has been divided into districts, in each of which a door-to-door canvass will be made to bring home to all occupants of houses, factories, stores, etc., the importance of co-operating in this important movement. A large amount of literature prepared by the department, dealing with rat extermination, will be distributed during the campaign. Special emphasis will be laid on the fact that rats are carriers of disease and are particularly apt to contaminate human food wherever it is accessible.



A Good Type of Rat Trap.

GLUT OF RICE IN HONGKONG

$10,000,000 Worth of Cereal Hoarded by Profiteers Finds No Market.

Hongkong. — Hongkong is overstocked with rice bought for export and held for a rise in prices even during the rice shortage, which has become serious in some cities of southern China and other parts of the Orient. The manager of a big commercial firm here estimates that more than $10,000,000 worth of Saigon "long" rice is stored in Hongkong.

Recently the price fell rapidly and dealers and exporters found themselves loaded up with rice, while the banks were pressing for payment of bills. Japan was not able to buy, owing to the tightness of her money market, and it was stated that America, ordinarily one of the largest buyers of rice in this market, had ceased to purchase because she has enough.

The Daily Press states that about 75 per cent of the rice exported from Hongkong goes to Cuba, but that Cuba's supply had been purchased direct from the producers instead of the Hongkong middlemen.

"Cut Pay, I'm Not Earning It," Says City Employee

Cleveland, Ohio.—"I am not earning the money I am getting and I want my salary reduced."

This is the request sent to City officials by Gottlieb Pfahl. He is sixty-seven.

He worked for the city for fifteen years. When he made the request he was foreman of a bridge repair gang.

Last March his right arm was affected by paralysis. He cannot use it now.

That's why he asked for a salary cut. His request was granted.

FILMS HELP TO FOREIGN TRADE

Motion Pictures a Silent Partner of Uncle Sam in His Export Trade.

CREATES DEMAND FOR GOODS

Latin People Disposed to Pattern After What They See on Screen That Pleases Them—Aids Live Stock Introduction.

Washington.—Uncle Sam has as a silent partner in his export trade the motion pictures.

How the "movies" are developing trade and spreading confidence in American goods and American methods, and creating an Americanized atmosphere which should prove the strongest possible asset toward permanency of trade in South America, is told by Dr. Julius Klein, commercial attache at the American embassy, Buenos Aires, who was formerly chief of the Latin American division, bureau of foreign and domestic commerce.

The Latin people, he points out, are disposed to pattern after what they see in the motion pictures that appeals to them. Thus the films have made them familiar with the appearance of American automobiles and of what they can do. The movies have created a demand for American-made office furniture by showing the fittings of a business magnate's office, which the South American merchants in their prosperity are eager to copy.

As regards ready-made clothing—the South Americans, particularly in Cuba, have gotten into the habit of ordering a suit of clothes like their favorite hero wore in a certain film. Thus the merchants have come to stock up with good lines of ready-made clothing, which are very popular. The movies have had a like effect on industrial development.

All this, Doctor Klein emphasizes, has happened naturally and has not been forced as trade propaganda.

Boom to U. S. Trade.

The more use that can be made of educational films introducing industries comparable with their own industries—such as agriculture, cattle-raising, mining—the more benefits to American commerce will result. Such films can and should carry a romantic scenario, such as appeals most strongly to the Latin temperament, with cutins on our methods in industries similar to theirs. As we show them a new and better method their confidence in us and the output of our industries grows cumulatively.

Germans and Italians particularly have been thus endeavoring to ingratiate themselves in South American countries, Doctor Klein says, and the influence of the Italians in the South American markets from an economic and commercial viewpoint must be reckoned with.

American manufacturers of farm machinery are now co-operating with the Philippine department of agriculture and natural resources, in an endeavor to arouse in the farmers of those islands a true appreciation of the possibilities by using such machinery. Motion pictures are being prepared to show the most approved methods of cultivation, preparation of seed, use of farm machinery, harvesting and storing crops, and methods of packing and handling where these processes are involved.

Aids Live Stock Introduction.

Introduction of American breeds of live stock and poultry into South America, particularly Argentina, is to be aided by the use of motion picture films, prepared for this purpose by the United States department of agriculture. These films also will show American methods of breeding live stock and handling it in its many phases from the farm to the home table. The Argentine government has shown special interest in the introduction of American methods of handling live stock, as it has indeed in the agricultural practices of the northern half of the continent generally.

As evidence of this, the Argentine embassy in Washington has already purchased ten films on these subjects for educational use in Argentina and has frequently had United States department bulletins translated into Spanish for home consumption.

The Buenos Aires & Pacific railway has also been a heavy purchaser of such films for use along its system. Its representative in this country was recently negotiating with the United States department of agriculture for films showing the swine industry in the United States, and in making arrangements for the introduction of American swine in Argentina.

It is planned to show important swine-breeding farms, the work in the big Chicago packing houses and the preparation of the product for the table. Pictures will be made of the various types of American hogs, and an effort will be made to give some idea of the vastness of the industry in this country.

Isolate Ripe Olive Bacillus.

San Francisco.—Isolation of the bacillus held responsible for the death of a number of persons who had eaten ripe olives and its identification as a product of the soil was announced at a meeting here both of olive growers, packers and distributors and a committee of medical experts.

PREFERS INDEPENDENCE TO HIGH POSITION

The Democratic party of the Philippines will join the Nacionalista party, which is now in power, in the demand for immediate independence of the Philippines, Senator Teodoro Sandiko, only member of the Democratic party in the Philippine senate, said in an address at a luncheon at Manila. This means that all political parties in the Philippines are united for independence.

Hon. Sergio Osmena, noted Filipino leader, who stated he would prefer to be humblest citizen under independence than leader under another country.

The luncheon was given for members of both houses of the Philippine legislature by former Senator Gabaldon, recently chosen resident commissioner at Washington.

Sergio Osmena, speaker of the Philippine house of representatives and head of the dominant Nacionalista party, who was recently termed "the greatest Filipino since Rizal," addressing Senor Gabaldon, said:

"We urge upon you in your capacity of resident commissioner to the United States to tell Congress and the people of that noble country that we who are gathered here today would prefer to be the lowest and humblest citizens of the Philippines with independence in our hands than the leaders that we now are in our country under the tutelage of another country."

URGE EXAMPLE OF SELF-DETERMINATION

That friends of Irish independence in the American Congress could make a more effective impression on Great Britain by granting Philippine independence than by merely expressing sympathy with Irish aspirations is the suggestion contained in a statement issued by the Philippine Press Bureau of Washington, D. C.

"Twice in a period of nine months," reads the statement, "the United States Senate went on record as being in sympathy 'with the aspirations of the Irish people for a government of their own choice.'

"Still another way for the friends of Irish independence in the American Congress to make an impressive argument would be to grant the independence that the 10,500,000 inhabitants of the Philippines have repeatedly demanded. America's own representatives in the islands have officially reported they are ready for independence and have recommended that such independence be granted.

"We submit that the granting of Philippine independence would be likely to be accepted by Great Britain as even stronger proof of America's belief in self-determination than the passage of the Irish resolutions, because Great Britain's councilors of state could not then successfully make the point that the American Congress is asking Great Britain to do something the United States itself has been asked to do and has not done.

"The Filipino people have confidence in the word of America and hope that now that the Senate has reiterated its sympathy with the principle of self-determination it will give Great Britain and the other powers of the world a concrete example of consistency and good faith by granting Philippine independence."

YOUNG FILIPINO WON FRENCH WAR CROSS.

Gregorio Cailles, a Filipino, recently returned to his Philippine home wearing a French uniform and a Croix de Guerre with palm. Cailles in December, 1916, arrived in France and enlisted as a private. He made an excellent record as a soldier. At one time when all the officers of his company had been killed, he took command and led the men in a charge. He was decorated for this act of bravery by the French Government.

Leaders Must Pay Price.

There's satisfaction in being able to do hard things. Weaklings have to be exceptionally insignificant if they can't do something. Then there is a large class that can do many things indifferently. Those who can carry big loads and carry them well are few. To be in this select class appeals to most folks, but only the few really deserve place in it. And they do not land there without effort. Such honors are matters of growth. Time and toil are the price paid for the advance. Beginning with what comes easy the worthy ones become experts and then add to their sphere of achieving such things as naturally fall in line with their endeavors. Then they grow without being really conscious of added strength. That comes as a glad surprise when some one calls attention to it

Asparagus Has a Pedigree.

Asparagus was cultivated in Rome 200 years B. C., and Pliny, in his "History Naturalis," mentions that near Ravenna there grew a kind of which three heads weighed a pound. Asparagus flourished also in Greece. It is a native of several places near the sea in Britain. At Kynance cove, in Cornwall, a rocky island is called "Asparagus island," because at one time the plant was cultivated there. In ancient days all sprouts of young vegetables were called asparagus; and in comparatively modern times the artichoke, cardoon, seakale and alisander were included. Nowadays only the one is so called. Most probably all are wild sea-coast plants, and cultivated asparagus of an unpalatable order may still be found on British shores.

Korean Women Nameless.

The Korean woman has not even a name. In childhood she receives a nickname, by which she is known in the family and by her friends, but, when she arrives at maturity, it is employed only by "the sister of" or "the daughter of" such a person.

After her marriage her name is buried; she is absolutely nameless. If it happens that a woman has to appear in a law court the judge gives her a special name for use while the case lasts, in order to save time and to simplify matters.

Whales Annoy Crew.

Newport, Ore.—Jonah now has the heartfelt sympathy of Capt. Rich Chatterton of the fishing schooner Fremont. The Fremont lay in a school of whales off Sileta river, and none of the crew could get a wink of sleep. Every time they closed their eyes a whale would slap the water with its tail and produce such a loud crash that they would jump to see if the boat had been damaged. The sound made by blowing easily drowned the whistling buoy's friendly call.

CO-OPERATION IS CURE FOR EVILS

Marketing Organization Successful Only When Formed on a Sound Basis of Service.

SUCCEED BY TEAMWORK ONLY

Characteristics and Makeup of Local Population Should Be Considered in Formation of Association—Other Essentials.

There is no magic about co-operative marketing, although in hundreds of cases it has produced remarkable results. Nor does it serve as a cure-all for our present distribution problems, though it has proved a successful remedy for many present evils. There are 14,000 or more farmers' co-operative buying and selling associations in this country bearing testimony to the practicability of the co-operative principle, which is, in substance, an economic adaptation of the old political slogan "In union there is strength."

It is the desire of the United States department of agriculture that persons interested in co-operative marketing thoroughly understand the basis of such organized effort and follow the right methods. The bureau of markets of the department of agriculture, having made an extensive study of this subject, is prepared to advise with any group of farmers who want to undertake buying—or selling—co-operatively. A number of requirements must be met before prospective co-operators can succeed.

In the first place the characteristics and make-up of the local population should be considered in the formation of a co-operative marketing association. A community which produces a considerable quantity of one product or a few products offers better opportunities for an undertaking of this

Members of a Co-operative Organization Bring Their Wool to Be Pooled.

sort than one which produces a little of several different products. One advantage of joint effort arises from the handling of relatively large quantities. Unfortunately some groups of farmers have tried to form marketing associations without having a sufficient volume of business and they have failed.

Loyalty to Co-operative Idea.

If the existing marketing agencies in the community—whether for grain, wool, fruit, garden produce, or whatever the line contemplated for co-operative selling—are efficient and reasonably adequate, and if the farmers in the community feel that they are being served satisfactorily by these private concerns it is doubtful if a co-operative organization will succeed. But if the existing private agencies are inadequate and if the farmers can be made to see the saving that will result to all concerned if they unite heartily in an association, then there is a good chance of winning. But the co-operative principle must be adhered to. Members of an organization supposed to be co-operative cannot be expected to have a vital interest in a project which is really operated for the profit of and controlled by a few individuals.

Many persons do not have a clearly defined idea of what a co-operative organization is. The term "co-operative" is often used rather loosely. Where a concern is operated for the profit of the persons investing capital in it and seeking dividends on its capital, the undertaking is nonco-operative. On the other hand, in a co-operative marketing or selling organization each member usually has one vote (in a nonco-operative concern the votes are in accord with the money invested) so that one or a few members will not control its operations. It is conducted to render service and effect savings for the members and not to earn profits for distribution as dividends on the money invested. To be sure, a fair rate of interest is granted to capital invested by the members and the balance of any surplus to be distributed is divided in accordance with patronage; that is, the amount of business transacted with the organization.

Essentials to Success.

Contracts between the members and the organization whereby they agree to market certain products through it are vitally important in many instances, especially in the case of associations handling perishable products. The Michigan Potato Growers' exchange, the California Fruit Growers' exchange and many other successful organizations follow this plan.

The pooling of products sold through the organization is also an important feature. By pooling is meant averaging the returns received for products sold during a certain period, or for certain shipments, so that each shipper having products of the same grade will receive the same price. Failure to adopt the pooling principle may result in injustice to some of the members, as experience has proved more than once. Conditions and practices in grain marketing make the outright purchase of members' products feasible, but this does not usually apply to organizations handling other commodities.

Form of Organization.

Farmers' co-operative marketing associations are formed with capital stock or formed on the nonstock plan. Both forms have favorable features which the bureau of markets will be glad to explain to any interested person. Another matter to which careful attention should be given is the proper financing of a co-operative project. The by-laws of the association should be painstakingly drawn and should be thoroughly discussed by the membership so that there will be no misunderstanding later. The question of incorporation will also have to be decided. While incorporation is not necessary, in most cases it is considered advisable. Unfortunately the state laws for bodies of the character here discussed are far from uniform, some of them making no provision for co-erative associations.

The above paragraphs serve only to suggest some of the principal problems that have to be considered in forming a co-operative enterprise. Persons wishing to investigate this matter further will find it profitable to communicate with the United States department of agriculture, which will supply them with literature containing a full discussion of these and related questions.

WELCOME SOURCE OF PIN MONEY IN SUMAC

Many Tons of It Allowed to Go to Waste Each Year.

Plant Can Be Gathered and Cured Any Time During Summer and Marketed Whenever Convenient—Bonus Given for Leaves.

The demand by manufacturers for American sumac this season totals 500 to 700 carloads, or from 5,000 to 7,000 tons, according to information received by the United States department of agriculture. The price ranges around $2 a hundred pounds for sumac delivered at the shipping point or at the extract factory.

Country people should find a ready market this year for all the sumac they can gather. Being a wild plant, sumac costs nothing to raise, and the many tons of it allowed to remain ungathered each year can be readily turned into profit. The sumac season lasts about three months. Unlike berry and other crops, sumac does not have to be harvested all at once. It can be gathered and cured from time to time throughout the summer and marketed when large enough quantities have been collected.

In addition to offering higher prices this year, several manufacturers are willing to pay bonuses for sufficient quantities of clean, bright, well-cured sumac leaves, containing not more than 10 per cent of stalk. By properly gathering and curing the sumac, the gatherer can make more money and will help to establish more firmly the domestic sumac industry, which through development and expansion should provide a welcome source of income and employment in normal times.

Gather only the black or dwarf sumac, which can be easily distinguished from the other varieties by the peculiar wing growth along the leaf stems and by the brittle, black-specked stalk. In some sections the white sumac is also gathered, but it generally brings a lower price, as all manufacturers prefer the black variety. Harvest during July, August and September. Break the sumac stalk off close up to the leaves just under the lowest leaf stem, or, better yet, gather only the leaves and leaf stems. Do not collect long bare stalks, as this produces low-grade, low-priced sumac. Cured sumac ready for market should contain very little stalk, never over 25 per cent. If a good bit of stalk has been gathered with the sumac it can be easily removed by flailing and forking out after the sumac has been cured and is ready for bagging. Do not gather red or yellow leaves, or berries and bloom. The bloom will ruin good sumac. As soon as the sumac has been gathered, place it in the shade or under cover. Exposure to the sun for an hour or two may do no harm, but the pulled sumac should never be left all day in the sun, as it will quickly scald and be ruined in color. Never let the gathered or cured sumac become wet from either dew or rain. At the end of the day's gathering, haul or carry the sumac to a barn or cover. Spread it on a clean floor or on sacks in layers not over 1½ feet deep and turn it once or twice a day until thoroughly dry and crisp.

GENERAL FARM NOTES

Plow early for winter wheat.

* * *

Sweet clover makes the soil rich.

* * *

Take care of the mowing machine.

* * *

Alfalfa is an exceedingly profitable crop.

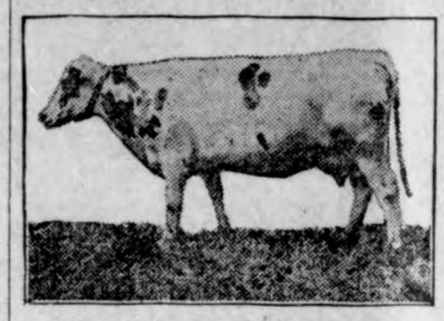
DAIRY POINTS

HOME SUPPLIES FROM FARM

Measured in Money Value Dairy Products Constitute Most Important Group of Foods.

Dairy products constitute the most important group of foods measured in money value, consumed by the average farm family. Milk cows are kept on practically all farms. The average farm family uses annually about 2,600 quarts of milk in the form of milk, butter, cheese or cream.

In dairy regions where milk is shipped or sold to creameries or cheese



It Pays to Treat the Cow and Her Offspring Well.

factories, practically all the butter and cheese used is bought instead of made on the farm, says the United States department of agriculture. Very few farmers buy whole milk. About four-fifths of the dairy products consumed by farmers are produced on the home farm.

In the South dairy products are used very freely. The common practice is to churn the whole milk for butter, producing a large quantity of buttermilk. The average annual consumption of butter per family is about 230 pounds in the South while for families in the North and West it is less than 150 pounds. It is not unusual for the average-sized family in the South to consume 2,000 quarts of buttermilk a year. Buttermilk is a cooling and healthful drink for that climate.

DRUGS INJURE DAIRY CATTLE

Iowa State College Experiments Show Decrease Rather Than Increase in Fat Production.

The use of drugs with the idea of increasing the fat production of test cows has been tried out by Iowa State College dairy section. In most cases it was found that drugs decreased rather than increased the fat production.

Such drugs as alcohol, castor oil, pituitrin, aloes, magnesium sulphate, nux vomica and sodium chloride were tried and in all cases they were detrimental to the cows. All cows used were in good normal condition at the start of the tests and various sizes of doses were used.

In some cases it was found that the flow of milk and butterfat was increased slightly but this soon fell off and in the end a decrease was noticed.

Up to date no drug has been found that will increase and it is strongly advised by the dairy men not to resort to this method as it injures the cows and is not a fair way to gain a record.

WHEN MILK TEST IS HIGHEST

Faculty of Milking Off Fat Is Used in Pushing Cows for Short-Time Records.

In pushing cows for short-time records, this faculty of milking off the fat is used; that is, the cow is allowed to freshen in very fat condition and will test very high when her record is being made two or four weeks after freshening. There have been cases where cows have tested from two to three per cent higher during this period than the normal test for her discloses and this test would be much higher than during the last part of her lactation.

MILK-CREAM WEIGHTS

Skim milk weighs 8.63 pounds a gallon.

The foregoing figures were based on milk with a fat content of 2½ per cent at 68 degrees temperature. Similar milk testing 3 per cent weighs 8.6 pounds.

Mixed milk and cream of 10 per cent butterfat content weighs 8.53 pounds.

The general rule is to estimate milk testing from 3 to 5 per cent as weighing 8.6 pounds a gallon.

RAISE PRODUCTION OF HERD

Permanent Advancement Can Only Be Made by Use of Purebred Bull of Good Ancestors.

The only way for everyone to have cows capable of producing a large flow of milk is by better breeding. By better breeding is meant the using of a purebred dairy bull which is a good individual from good producing ancestor. It is only through the use of a good bull that any permanent advancement can be made in the production of the future herd.

FARM POULTRY

SUCCESS IN RAISING SQUABS

Healthy, Vigorous, Properly Mated Birds Are Essential—Keep Rats and Mice Away.

Begin with healthy, vigorous, properly mated breeders. Good quality foundation stock is very essential to success.

Select and keep only prolific breeders which are also good feeders.

Feed a variety of good-quality hard grains, including peas or peanuts. Use small whole corn rather than cracked corn.

Provide for the pigeons a pen which is dry, well ventilated, and can be kept free from rats and mice. Two nests should be allowed for each pair of breeders.

Keep clean, fresh, protected drinking water before the pigeons and provide a separate unprotected pan of water for bathing.

Market the squabs just as soon as they are feathered under the wings and about the time they are able to get out of their nests, say poultry specialists in the United States department of agriculture.

GEESE UTILIZE WASTE GRAIN

Grazing Stock Take Up Most of Their Feed From Ordinary Grasses of the Pastures

Geese touch flanks with chickens in utilizing waste grain about the stables and feeding pens. In a larger measure than chickens or any other kind of poultry, they are grazing stock, taking their living in large part from the ordinary grasses of the pastures. When the facts are taken into consideration that the demand for geese is strong, steady, and extended over practically the whole year, not confined to certain holiday seasons, as the demand for turkeys largely is, and that their value as egg producers is considerable, the importance of a few geese on a general farm becomes apparent.

Geese, in common with ducks, are utilizers of forms of food confined to

Toulouse Goose.

ponds and streams, but they are in that particular excelled by ducks. On farms where ponds or streams are available ducks will convert into meat and eggs great quantities of water insects and various aquatic forms that would not be utilized by any other kind of poultry. Ducks, while they consume much grass and other green stuff, are more partial to animal feeds and are very energetic in patroling the branches, creeks and ponds as sources of food supply, say poultry specialists in the United States department of agriculture. Where conditions are favorable they will provide for their own food needs in a measure that will make them highly profitable.

LAYING HENS LATE MOLTERS

General Purpose Breeds Lay and Molt at Same Time, Slowing Down on Egg Production.

The hen with a natural tendency to lay usually postpones the molt until her production is finished regardless of the time she started. This applies more particularly to the egg breeds, as the general purpose or meat breeds sometimes lay and molt at the same time. In such cases the feathers are dropped and replaced slowly and the egg production also slows down but may not entirely suspend.

MAKEUP OF POULTRY MASH

Among Ingredients Are Corn, Alfalfa, Barley and Gluten—Charcoal Aids Digestion.

Hens love mash. Usually, ground feeds, such as cornmeal, corn chop, corn and cob meal, gluten meal, ground barley, cottonseed meal, linseed meal gluten meal and alfalfa meal are used in the mash. Sometimes charcoal is added to guard against digestive troubles.

FEED FOR GROWING CHICKENS

When About Eight Weeks Old Give Supply of Cracked Corn and Other Small Grains.

As soon as the chickens will eat the whole wheat, cracked corn, and other grains—usually in about eight weeks—the small-sized chick feed can be eliminated. In addition to the above feeds sour milk, skim milk or buttermilk will hasten the chickens' growth.

"ASPIRIN"

WARNING! Unless you see the name "Bayer" on tablets you are not getting genuine Aspirin prescribed by physicians for 20 years and proved safe by millions. Name "Bayer" has same meaning as 14 Karat on gold.

SAFETY FIRST! Accept only an "unbroken package" of genuine "Bayer Tablets of Aspirin," which contains proper directions for Headache, Earache, Toothache, Neuralgia, Colds, Rheumatism, Neuritis, Lumbago, and for pain generally. Strictly American.

Handy tin boxes of 12 tablets cost but a few cents—Larger packages.

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid.

Many a Sunday church-going man shoots the chutes of forgetfulness the following Monday.

WHY DRUGGISTS RECOMMEND SWAMP-ROOT

For many years druggists have watched with much interest the remarkable record maintained by Dr. Kilmer's Swamp-Root, the great kidney, liver and bladder medicine.

It is a physician's prescription.

Swamp-Root is a strengthening medicine. It helps the kidneys, liver and bladder do the work nature intended they should do.

Swamp-Root has stood the test of years. It is sold by all druggists on its merit and it should help you. No other kidney medicine has so many friends.

Be sure to get Swamp-Root and start treatment at once.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

SOMETHING JOB NEVER DID

Possibly an Experience Like Mr. Brown's Would Have Shattered His Reputation for Patience.

Filled with pride, Mr. and Mrs. Brown started out for a drive in their new motorcar. Mrs. Brown was hoping the neighbors were watching, but her husband was too busy steering to hope about anything.

Alack! Before they reached the end of the road the car stopped, and stayed that way with a mule-like persistency. Mr. Brown tried every lever and handle in turn. Then he got down from his seat and began to investigate.

Presently he lay down and crawled underneath the car until only his number nines were left visible. In a few moments the car gave a sudden jolt and then stopped, and a terrible flow of language, more forcible than polite, became audible.

"Oh, John," exclaimed the wife, in horrified tones, "don't swear so! Have patience, like Job did."

"Job," shrieked Mr. Brown, in a stifled voice. "Job would have sworn, too, if he'd been underneath this beastly car with his mustache caught in a cogwheel."

Save Time.

"A man ought not to kiss and tell."

"Still, some summer girls don't mind if you tell a few other nice fellows who are coming down."

The Telephone.

A ruffled telephone screen, which really very ornamental, is made of silk and lace. Every telephone pretty room nowadays is conceal some attractive conceit.

USE "DIAMOND DYES"

Dye right! Don't your material in a poor Each package of "Diam Dyes" contains direct so simple that any wo can diamond-dye a r rich, fadeless color into garments, draperies, co ings, everything, whe wool, silk, linen, cotton mixed goods.

HOW SCIENTISTS EXAMINE SOILS

Survey of Important Work of One of Branches of Department of Agriculture.

STUDIED VARIED ACTIVITIES

Bureau Took Active Part With Geological Survey in Nation-Wide Search for Deposits of Nitrates and Potash.

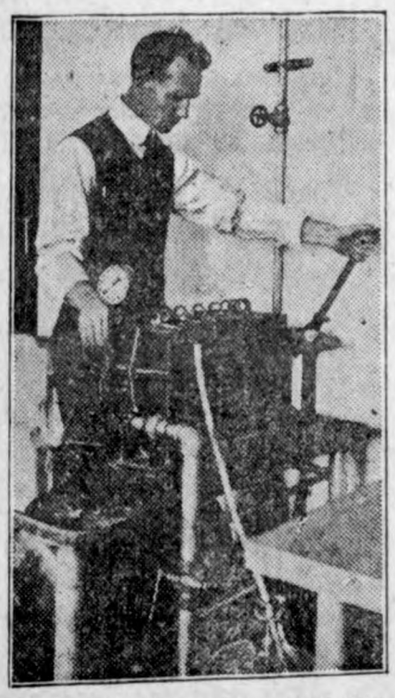
During the twenty years of its existence, the bureau of soils, United States department of agriculture, has studied the chemical constituents of the soils of all parts of the country. It has investigated these constituents qualitatively and quantitatively, showing their relation to one another and to plants, their solubility and permanency, and the manner of their functioning. It has studied the problem of alkali—that condition arising where soils contain an excess of soluble salts—and devised methods for measuring the content of alkali in the field and for eliminating it under field conditions. It has studied hardpans, explained the manner of their formation, and suggested the means of improving lands affected with the different sorts. These various activities have involved the making of thousands of analyses and the devising of much apparatus.

Public Given Advice and Counsel.

Advice and counsel is given by the bureau to the public on all matters connected with soil chemistry. The bureau has also investigated the physical properties of soils. It has devised apparatus for measuring the temperature of soils, the movement of water and of air and other gases in soils. The absorption of water, the extent and rate of capillary action, the effect of pressure on the concentration of the nutrient solution, and on the retention of that solution in the soil, the relation of soils to erosion, and many kindred problems have been worked upon.

The bureau has also worked upon the problem of the fixation of nitrogen found in the air in its experimental factory at Arlington, much advance having been made. Carried to its logical conclusion this move will result in supplying easily all the nitrogen the country needs in agriculture and industry.

Soil surveys have been made in all the states of the union. The surveys are of two kinds; detailed surveys on the scale of one inch to the mile usually covering county units, and reconnoissance surveys much more general in character, made on scales of four to six inches to the mile and covering large areas. At the close of the last fiscal year an area of 331,487,-



Filter Press, Used in Soil Investigations.

360 acres had been surveyed in detail and 322,760,960 acres on a reconnoissance basis. These surveys involve the identification and classification of the many types of soils found in various parts of the country, a study of their agricultural value, and a determination of their relation to the various crops and systems of agriculture.

Advancement of Agriculture.

The results of the soil survey work form a basis for the logical advancement of agriculture through experimentation of scientific workers in all its varied lines.

The land classification work of the bureau is done in co-operation with the forest service and other departments of the government, and has for its purpose the exclusion, from the national reserves, of lands that are suited for agriculture.

An interesting special investigation in connection with the potash supply has to do with the extraction of this salt from the giant kelp of the Pacific coast. A fully equipped factory has been operated at Summerland, California, for the last two years, and thousands of dollars worth of potash has been sold to the fertilizer trade or direct to farmers.

The plant will be operated during the coming fiscal year, a careful study being made of the practicability of recovering various by-products, so that the industry may be able to compete with imported potash and the kelp beds may become a permanently valuable asset of the nation.

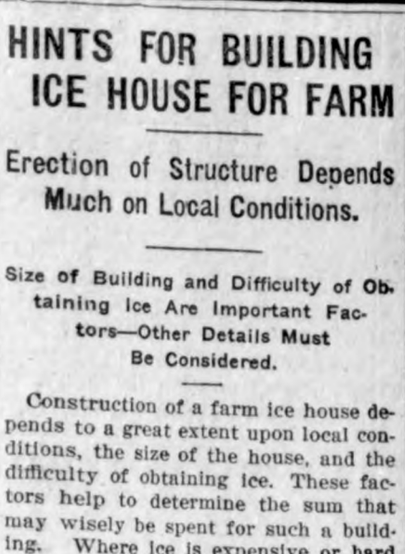
HINTS FOR BUILDING ICE HOUSE FOR FARM

Erection of Structure Depends Much on Local Conditions.

Size of Building and Difficulty of Obtaining Ice Are Important Factors—Other Details Must Be Considered.

Construction of a farm ice house depends to a great extent upon local conditions, the size of the house, and the difficulty of obtaining ice. These factors help to determine the sum that may wisely be spent for such a building. Where ice is expensive or hard to obtain, a better constructed and insulated and therefore more expensive ice house is advisable. Where natural ice can be harvested and stored cheaply a cheap structure is usually satisfactory and the loss from melting ice is a small consideration.

The cost of harvesting and storing, the interest on the money invested, and repairs and depreciation on the building are to be considered in rela-



A Good Ice House, Well Filled, Is a Real Asset to the Modern Farmer.

tion to the ice loss from melting; and the type of house to be built depends upon these factors. It never pays to build permanently in other than a substantial manner, and careful thought should be given the matter before erecting a cheap makeshift that will not give adequate service.

Various types of ice houses, how to build them, and other phases of the subject are discussed in Farmers' Bulletin 1078, "Harvesting and Storing Ice on the Farm," which can be obtained free of charge from the United States department of agriculture.

OATS ARE ECONOMICAL CROP

Not Generally as Profitable as Some Other Grains, but Needed In Good Rotation.

It is sound farm business to sell some crops for cash. Farm management surveys have shown that the safest and soundest practice is to have about one-fifth of the total receipts on the farm come from sale of crops. The other four-fifths will come from the sale of live stock or live stock products.

The crop that can usually be sold for cash most economically is oats. Oats are not generally as profitable a crop to grow as some others, but a good rotation needs this small grain in it. It makes a very satisfactory connecting link between the corn crop and the hay crop. Corn, if sold as a cash crop, makes a larger return to the acre, but corn can usually be fed more profitably than it can be sold for cash. It is ordinarily a cheaper feed than oats. Hence, if any crop is to be sold, it should be the oats.

WEIGHTS PER BUSHEL

A bushel is regarded as a definite weight rather than a cubic measure in the estimates of production and prices made by the bureau of crop estimates. The weights which are regarded as a bushel for various products are as follows:

Wheat, 60 lbs.; corn, 56 lbs. if shelled, 70 lbs if in ear; oats, 32 lbs.; barley, 48 lbs; rye, 56 lbs.; buckwheat, 48 lbs.; white (Irish) potatoes, 60 lbs.; sweet potatoes, 55 lbs.; apples, 48 lbs.; pears, 48 lbs.; peaches, 48 lbs.; walnuts and hickory nuts, 50 lbs.; beans (dry), 60 lbs.; onions, 57 lbs.; turnips, 55 lbs.; clover seed, 60 lbs.; alfalfa seed, 60 lbs.; timothy seed, 45 lbs.; Kafir corn, 56 lbs. Estimates of yields and prices in tons are always on the basis of 2,000 pounds.

TESTING SOIL FOR ACIDITY

Experiment Station Will Tell How Much Limestone to Apply for Crop of Alfalfa.

It is a waste of time and money to sow alfalfa on sour soil and if you are not sure whether your soil is acid or not test it for acidity or send a sample to your experiment station and have it tested. The experiment station will not only tell you whether the soil is acid or not, but will also advise how much ground limestone to apply per acre in order to put it in good condition for alfalfa or other legumes. The lime may be applied next winter if time does not permit of applying it this fall.

Home Town Helps

PROPOSE TO BAR BILLBOARDS

Better Community Conference Condemns Them as a Destroyer of Beautiful Scenic Spots.

Steps toward the elimination of all unsightly billboards and the encouragement of the artistic in poster advertising and the continuance of the art committee of the Better Community Conference as a permanent organization, with frequent meetings in various Illinois cities, were the main topics of discussion at the closing session of the committee in Chicago.

"We want to take some definite action toward eliminating unsightly billboards," said Prof. R. E. Hieronymus of the University of Illinois, who put the motion.

"This is one of the biggest factors of the art and beauty campaign we have begun. Many beautiful scenic spots in Illinois have been ruined by a large painted sign advising you to chew so-and-so's gum, to use somebody's pills or soap. Such things are a disgrace to civilization. Our movement is not purely negative, however. We want to encourage the development of artistic advertising."

Lorado Taft, Chicago sculptor, chairman of the conference, also emphasized the elimination of ugliness and addition of beauty in advertising. The motion pledging the committee to definite action along this line was passed unanimously.

APPLIES TO ALL CITIZENS

Advice Given by Washington Periodical Might Be Taken to Heart in Every Community.

This is your city. Keep it clean. Be as careful and considerate of the streets and the parks as you are of your own house. You do not litter up your own premises or permit it to be strewn with trash, because you take pride in its appearance. Be as considerate of your city.

When you go into the parks regard the turf as you would your own front lawn, the flower beds as you would your own garden. They are there for your pleasure and the pleasure of all others. They are yours and you should have a proprietary feeling toward them and a pride in them.

In the streets do not throw away trash to disfigure the sidewalks and the pavements. There are places for waste paper and other refuse. There are sewer openings into which this material can be put. A littered street, like a littered park, means bad housekeeping and you, the citizen, are the housekeeper.

It is not enough to leave the matter of cleaning up to the paid forces of the town. Until they come around the streets are dirty and the parks are littered if you, the citizen, are not particular.

Remember always, this is your city. Keep it clean—Washington Star.

Ridding Vacant Lots of Weeds.

There is a way, in Pensacola, at least, to get the rank weeds cut from vacant lots which are the property of non-residents. Under the code, the city, cutting the weeds at its own expense when it fails to reach the owner of the lot, may assess against the property the cost of the mowing. At tax-collecting time, the city will be reimbursed. The law, a new one of the municipality, is excellent, since it touches that troublesome person, the non-resident owner. Other cities, which have health problems not dissimilar to those in Pensacola, might copy it to good advantage.—Mobile (Ala.) Register.

Grandmother Still Ahead.

Little four-year-old Mary Ellen's front teeth have begun to decay. The other evening her uncle asked her what had happened to her teeth, and she innocently answered, "I wored them off."

"Oh," uncle laughed, provokingly, "you wore them off by talking so much."

The little maid looked at him a minute and then retorted earnestly. "Well, I don't care. My grandma wored hers clear out a-talking, too, and had to get her some new store ones."

And grandmother good naturedly agreed that it was so.

Beautifying the Roadside.

Along the dusty pike, a few miles north of Chillicothe, a farmer and his wife for years have beautified the roadway near their home by planting flowers outside the fence. Instead of permitting the weeds and rank grass to fringe the roadway, they have set apart about a hundred feet of space for the flowers, have given them rich soil in which to grow, cared for them so they are fresh and vigorous during the season, and have watched them flourish and grow until the picket fence is nearly hidden by them.—Ohio State Journal.

Get a Garden!

Instances of extreme old age are more common among those who exercise themselves with gardening than any other employment.

Tends to Better Citizienship.

Every man is a better citizen when he becomes a home ruler.

Kill That Cold With

HILL'S CASCARA BROMIDE QUININE

FOR Colds, Coughs AND La Grippe

Neglected Colds are Dangerous

Take no chances. Keep this standard remedy handy for the first sneeze.

Breaks up a cold in 24 hours — Relieves Grippe in 3 days—Excellent for Headache

Quinine in this form does not affect the head—Cascara is best Tonic Laxative—No Opiate in Hill's.

ALL DRUGGISTS SELL IT

Do Not Get Careless With Your Blood Supply

Impurities Invite Disease.

You should pay particular heed to any indication that your blood supply is becoming sluggish, or that there is a lessening in its strong and vital force.

By keeping your blood purified, your system more easily wards off disease that is ever present, waiting to attack wherever there is an opening. A few bottles of S. S. S., the great vegetable blood medicine, will revitalize your blood and give you new strength and a healthy, vigorous vitality. Everyone needs it just now to keep the system in perfect condition. Go to your drug store and get a bottle to-day, and if you need any medical advice, you can obtain it without cost by writing to Medical Director, Swift Specific Co., 109 Swift Laboratory, Atlanta, Ga.

Teamster's Life Saved

"Peterson Ointment Co., Inc. I had a very severe sore on my leg for years. I am a teamster. I tried all medicines and salves, but without success. I tried doctors, but they failed to cure me. I couldn't sleep for many nights from pain. Doctors said I could not live for more than two years. Finally Peterson's Ointment was recommended to me and by its use the sore was entirely healed. Thankfully yours, William Haase, West Park, Ohio, care P. G. Reitz, Box 199."

Peterson says: "I am proud of the above letter and have hundreds of others that tell of wonderful cures of Eczema, Piles and Skin Diseases."

Peterson's Ointment is 60 cents a box. Mail orders filled by Peterson Ointment Co., Buffalo.

PILES ORIENTAL PILE SALVE is sold on a positive guarantee to give relief. Use it for itching piles, blind, bleeding or protruding piles. If you are not satisfied you get your money back. You are the judge. We don't argue; square dealing is our motto. Try us. Price $1.00. Sent by mail on receipt of price.

East India Medicine Co.
126 South Jefferson Ave. St. Louis, Mo.

For sale—Small Block Ky. Oil Stock paying div. Large daily production. On pipe line. Bright future. Management the best. Price $1.00 per share, cash with order. W. A. Pollard, Leases-Stocks, Bowling Green, Ky.

FRECKLES POSITIVELY REMOVED by Dr. Berry's Freckle Ointment—Your druggist or by mail, 65c. Free book. Dr. C. H. Berry Co. 2975 Michigan Avenue, Chicago.

Origin of Slang.

Slang originated from the gypsy tongue. It used to be a secret language of that race. It is by no means of modern date, being well known in the classic ages of Greece and Rome.

Cuticura for Pimply Faces.

To remove pimples and blackheads smear them with Cuticura Ointment. Wash off in five minutes with Cuticura Soap and hot water. Once clear keep your skin clear by using them for daily toilet purposes. Don't fail to include Cuticura Talcum.—Adv.

Untipped.

Waiter—Beg pardon, sir, your check does not include the waiter!

Patron—I don't suppose it does. I didn't eat one.—Baltimore News.

Domestic Tragedy.

"Henrietta," said Mr. Meekton, "you never ask me to water the rubber tree or put the cat out any more."

"It has been attended to, Leonidas."

"And you don't mind how many cigarettes I smoke nor how late I stay out at night."

"I consider you able to take care of yourself."

"Henrietta, many a home has been wrecked because of ambition and business preoccupation. You have grown to be so interested in woman suffrage I don't believe you care what becomes of me!"

A Wild, Open-Air Life.

Postmaster General Burleson said at a San Francisco luncheon, apropos of a political dispute:

"Our opponents put up a very warm but very unsatisfactory defense. They remind me of the chorus girl.

"A young divine met in Broadway a chorus girl from his home town. In the course of their conversation the divine said:

"'You like the city best, Lalage, but I love a wild, free, open-air life.'

"'And don't I too?' the chorus girl protested hotly. 'Every evening after the show I get my supper on a roof garden.'"

Bad Stomach

Sends Her to Bed for 10 Months

Eatonic Gets Her Up!

"Over a year ago," says Mrs. Dora Williams, "I took to bed and for 10 months did not think I would live. Eatonic helped me so much I am now up and able to work. I recommend it highly for stomach trouble."

Eatonic helps people to get well by taking up and carrying out the excess acidity and gases that put the stomach out of order. If you have indigestion, sourness, heartburn, belching, food repeating, or other stomach distress, take an Eatonic after each meal. Big box costs only a trifle with your druggist's guarantee.

HOLY CITY AS IT IS TODAY

Redeemed but Waiting to Be Clothed in Raiment That Is but Her Just Due.

It is well, as we leave the gentle allurement of flowers in the Garden of Gethsemane and turn toward the city, that our hearts have first been filled with serene joy, writes William D. McCracken in Asia magazine. We regard the fearfully tried city with something of the compassion that the Master felt for it. Seventeen times destroyed—bitterly hated—anxiously sought—how desperate a history since Nebuchadnezzar captured it more than twenty-five centuries ago. And only the other day, it seems, at Christmas time in 1917, Jerusalem was captured again, this time by its friends, the British after an agreement with the Turks that the city itself should not be bombarded. There was some fighting on the Mount of Olives, and reconnoitering airplanes dropped a bomb or two in and about the Garden of Gethsemane. But Jerusalem had been captured for the last time, and the last offensive was devoid of evil.

Redeemed today, but in her nakedness, Jerusalem waits to be clothed. She has as yet no grace, no covering for her ugly wounds. Some day her sides will glisten with the brightness of a heavenly radiance; she will be washed and anointed like a bride waiting for the bridegroom.

Naturally.

"How does the poker scene go in your new Western play?"

"We always get a hand on it."

What They Miss.

"Good little boys never fight."

"They don't? Then they miss a lot o' fun, ma."

Better be convinced by words than blows.—Danish Proverb.

THE KLEMME TIMES

Twenty-fifth Year Number 5 Klemme, Iowa, Thurssday, October 7 1920 $2.00 In Advance. $2.50 Outside of County

n Interesting Letter From West

Rupert, Idaho
9-29, 1920

tor Jorgenson and Klemme Friends:-

Will now make a try at writing you I promised last December. We're e in Sunny Idaho, among the sage sh and the coyotes, and find we it better than ever. One thing I'm e from rheumatism here, so far e never had any trouble with it, so urally I boost the climate. Tho we s Iowa's corn-lands some times we 't hanker after the rain and mud. at little rainfall we do have in ing and fall, is usually quite wel- ne. Of course everything is irri- ed here. Seems mighty nice to e it RAIN just when the garden ds it.

We are in town and I'm working h the Rupert Highway District, ilding state and county roads. We not behind the times as it might m to you, for this town is only 14 mmers old. Most of the gravel haul- is done with Nash Quad army cks, and drving one is my job. We o drag roads with the trucks, cov- ing 90 to 100 miles in 10 hours. No, s not the mud we're fighting, it's nd! "We've got the sand" here, u may be sure.

The soil is a sandy loam and is of e most productive. Also some heavy m and volcanic ash. It's the easiest soil to work. There is a new pro- ct to open in the near future, east, rth and west of here. They are new rveying for the dam sight which ll be at American Falls, 30 miles st. Is to be the argest reservoir for rigation in the world, I'm told.

Farm crops are mainly alfalfa, ets, spuds and small grain. A small ount of corn far feed, mostly flint rieties. Crops are good this year. ey claim there are no crop failures re. Spuds are not as good as usual but run about 300 to 600 sacks to the acre—everything goes by the pound, or hundred weight here. Beets make from 16 to 22 ton to the acre, alfalfa about 5, 3 cuttings, the third crop haying is in full swing now. Have had a couple light frosts. Many farmers contracted their spud crop at $1.25 cwt., but the present price is .90. Hay was out of sight last spring selling as high as $40, $45 a ton and scarce at that, owing to poor crop and cold weather in Utah, Wyoming and Nevada. As yet there's no great demand for it this season.

A good bit of fruit is raised—apples, pears, plums, prunes, peaches and abundant berry crops. Fruit is better tho, 30 miles from here where the season is longer. Thirty to fifty miles make quite a difference in climate and season.

Speakin' of duck hunting is rather tame her, tho plenty of them are bagged, also grouse and sage hens, but most of the guys with cars take a trip up to the Sawtooth range 50 miles north for deer and mountain goat. The business men like to take their vacation for that reason this time of the year. Trout fishing is good. The Snake river runs about 3 miles east and south of town. Trout fishing is really better up in the hills though. We had a mess of sturgeon steak this summer from a 250 pounder which was on exhibit at one of the meat markets here. Was caught in the Snake below the Shoshone Falls, 45 miles west of here. The sturgeon are not found above the falls. This was caught by two Rupertites. They tell me if you bait with a dressed chicken or rabbit you're apt to have a tussel with one. Don't get excited, Brother Jorgenson, you're a long ways from here!

We attended the Cassea county fair at Burley 8 miles southwest last week and sure did enjoy the wild western stunts given to entertain the crowds. Am enclosing a list of stunts and prizes which will give you an idea of the affair. Ray Durant is making the rounds of the Fairs with his Duroc Jerseys and taking well. Is at Boise, the state fair, this week. The Durants live only one mile from town and we get together often.

Must quit now with regards to all the old friends.

F. W. Tanner and Family,

Box 393, Rupert, Idaho

The Times "Devil" Says

OLDEST RESIDENT WAS FAIR EXHIBITOR

Mrs. Anson Avery, of Goodell, the first white woman to live in Hancock county, and who is now over ninety years old, won first premium on an apron which she exhibited at the Hancock County Fair. The apron was all hand made and trimmed with hand made lace.

NOTICE OF APPOINTMENT OF EXECUTOR

All persons indebted to the estate are requested to make immediate payment; and those having claims against the same will present them, duly authenticated, to the undersigned, for allowance.

Dated Sept. 27th, A. D., 1920.

August Lau,
W. F. Greimann,
Executors

3w 4 5 6

A FINE COUNTRY HOME

Louis Griffen, one of the prosperous farmers of our vicinity, has recently completed a very fine modern house on his farm about six miles west of Klemme. This new home cost in the neighborhood of $10,000 and is one of the finest country homes in this part of the county. He has his wn electric lighting plant which furnished electricity for the house and barns and everything is modernly equipped.

NOTICE OF CREAMERY MEETING

Klemme, Iowa, Sept. 28.—Notice is given that a meeting of the share holders of the Klemme CoOp. Creamery Company will be held at the Idle Hour Theatre on Saturday, October 9, 1920, at one o'clock P. M., for the election of Directors, President, Treasurer, Secretary, and for the transaction of other business as may come before it. Come!

All who are interested in a Farmers Elevator are requested to be on hand as that question will be brought up.

V. JOSTEN, Secy.

EDITORS HOLD POW-WOW AT

The Third District Conference, consisting of Winnebago, Worth, Mitchell, Hancock, Cerro Gordo, Floyd, Wright, Franklin and Butler counties, was held at Hampton, Iowa, last Friday. Newspapermen who attended from near here were, Pruit of Forest City, Roberts of Britt, Tierney and Clark of Garner, Africa of Kanawha, Ramsay of Belmond and the Editor of the Times. There were about thirty newspapermen from the district present at the meeting which was held by Secretary G. L. Caswell of the Iowa Press Association. These meetings are being held all over the state each year and here the newspapermen discuss their problems and get in touch with new situations in the newspaper game. The Iowa Press Association, of the United States and is one of the very few who employ a salaried secretary to look after their business.

The editors of the two Hampton papers were hosts to a dinner served at the New American Hotel in Hampton and needless to say the visiting editors all did justice to the splendid spread. By the way the new hotel at Hampton is as fine as any you will find at Des Moines, Cedar Rapids or any of the larger cities. The state meeting will be held in Des Moines sometime in February.

A BIG GAIN IN BUSINESS

The Klemme Creamery Company showed a most substantial gain in their September business this year over that of a year ago. 87 tubs more butter were shipped out this year than last in the one month or a gain of about thirty three and one-third per cent over September of last year. If this record keeps up, and we believe it will, then the Klemme Creamery will be one of the top-notchers in this section of North Iowa. The creamery company is fortunate in having a good man to look after the business and he should be given credit for the work he is doing for the company.

Buriff Will Remain In Klemme

The Northwest Iowa Conference of the Methodist Church was in session at Humboldt, Iowa, the past week at which a number of prominent ministers were on the program among whom was F. E. Mossman of Sioux City, and others. Klemme folks will be glad to learn that Dr. A. E. Buriff pastor of the Methodist Episcopal Church here, has been assigned to the Klemme charge fr another year at leat. Mr. and Mrs. Buriff have made a host of friends during their stay the past year who welcome them to remain for another year. The church has progressed under the able supervision of the Buriffs and with their continuance here no doubt it will be further enlarged in attendance and membership.

KLEMME BUTTER AT DAIRY CONGRESS TAKES THIRD

Butermaker A. D| Gimer had a tub of butter exhibited at the Dairy Cattle Congress which was held at Waterloo last week and which scored 94 points, being the third highest exhibited. The two tubs were only a very small percentage higher than Gimer's butter so this speaks well for the buttermaker of the Klemme Creamery. The butter was churned from selected cream and further goes to show what can be done with quality cream.

VISIT "LITTLE BROWN CHURCH"

The Albert Koerner family, Elmer Arnold family and the Clark Bredbenner family all drove to Nashua, Iowa, last Sunday to visit the "Little Brown Church in the Vale" which is only a short visit with relatives and friends. The day was ideal and the party thoroughly enjoyed their trip.

LADY EDITOR AT MESERVEY

Since Lou Sherman, of Goldfield, had purchased the Meservey Register a couple of months ago, he has had considerable trouble in finding someone to take charge of it. He got out the paper a couple of times himself, and for a while had a man to run the paper, but he stayed only a short time. Now Mr. Sherman has secured the services of Miss Dollie Wilson, formerly with the Dows Advocate. The young lady is an all around printer and will no doubt get out a good paper for the people of Meservey.

SCHOOL NOTES

The ball game with Ventura last Friday resulted ni the defeat of the visiting high school team.

The Camp Fire Girls hiked to Garner Tuesday evening.

Mildred Johnson was absent Tuesday on account of sickness.

The eleventh grade are studying Chauncers Canterberry Tales.

Miss Belken spent the week end in Iowa Falls.

Miss Sullivan spent Sunday at Osage.

The blackboards are being given a new coat of paint.

"Join The Farm Bureau" Day
Every member get a member

Join Your County Farm Bureau anu Lend the Strength of Your Support to the Iowa Farm Bureau Federation.

It has secured sites, shipping facilities, improved stock yard conditions and thousands of cars for Iowa cooperative associations.

It submitted the Nolan bill to a referendum vote---the dangerous feature of this bill would cost Iowa farmers $60,000,000 annually.

It has investigated California and Canadian plans of cooperative marketing in the interest of the livestock and grain producers of the mid-west.

It has provided for examination of proposed revision of the Code of Iowa including 253 new bills.

It secured equalization of water and rail rates, from Chicago to Buffalo and eastern exportation points.

It secured release of coal for threshing purposes. It is securing records on cost of production of farm products.

ONE HUNDRED TWENTY THOUSAND MEMBERS NOW ARE YOU ONE OF THEM?

A FARM BUREAU MEMBER WILL CALL ON YOU TUESDAY, OCTOBER 12.

Join Now!

Hear Nuelsen Speak

Bishop J. L. Nuelsen, one of the Bishops of the Methodist Episcopal church will speak at the First Methodist Church Sunday morning at 9:45 o'clock and in Liberty Township church at 11:30. The Bishop will speak on war conditions as they existed in Europe during the war and now. Bishop Nuelsen was in charge of Methodis church work during the entire period of the war and traveled in all the countries engaged in the war and will have many things of interest to relate.

Sunday school Sunday morning at 11 o'clock, Epworth League Sunday night at 7:30. Preaching service at 8 o'clock. Midweek prayer service each Thursday evening at 7:30. All are cordially invited to all our services

First Methodist Episcopal Church

A. H. Meyer Pastor

AT 108, WOMAN TO CAST BALLOT

Mrs. Sophia Orr of Syracuse Looks Forward Eagerly to Next Election Day.

OLDEST VOTER OF HER SEX

Native of Vermont and Has Lived in Wisconsin and Mississippi—She Recently Prosecuted Her Grandson for Theft.

Syracuse, N. Y.—Mrs. Sophia Orr, 108 years old, is eagerly looking forward to casting her first vote for president in November. She probably will be the oldest woman in the country to cast her ballot. She voted for the first time in the mayorality election last year.

"I voted the Republican ticket," she stated proudly, "and that's why they won."

The aged woman was the daughter of a lawyer, and was born in St. Albans, Vt., 108 years ago, according to her story. From there she moved to Muscoda, Wis., and later to Highgate, Miss., where she was married to Robert W. Orr. She remembers clearly the events of the war, in which her husband served, and has a vivid memory of her entire life down to the present.

Husband in Civil War.

The little old lady likes to talk about her dead husband, who fought for his country back in the sixties.

"He did his duty," she said resignedly, "and now he's up in Oakwood cemetery. He gave two arms, two legs and his eyes for his country."

Although in her long lifetime Mrs. Orr never before had to resort to the law for protection, she recently appeared against her grandson, Harvey D. Mullett, whom she charged with stealing $145 from under her pillow.

Mrs. Orr is the oldest woman to figure in court proceedings in the state, probably in the United States.

As sprightly as if only half her age, the aged woman mounted the stand and gave her evidence against her grandson, when Mullett, who has appeared in police court before and is included in the rogues' gallery, demanded an examination.

"Grandma, you know I've always been true to you," said the accused grandson.

"Harvey, you took my money, I saw you," insisted the little old lady, "and what's more you took my copper wash boiler a long time ago.

"I've never forgotten that about Harvey," she stated gravely to the judge. "He took that and $5, and a ring which belonged to my dead husband. I know it was Harvey," she insisted.

Mrs. Orr owns the house in which she occupies one apartment alone.

"I was standing on my back porch telling my daughter-in-law how to hang up a blanket to get it dry," she declared to the judge.

"I heard a noise and saw Harvey coming out of my bedroom. When I went in the money was gone."

"He took my copper washboiler, too," she reiterated, showing that the loss of the utensil was a hard thing to forgive.

The grandson was arraigned after "grandma" had already told her story once, and demanded that she be put on the stand.

"Grandma" had been waiting. She told her story in a clear voice and showed excellent hearing. The only difficulty with her as a witness was her desire to plead with her grandson to return the money.

"Why don't you give it to me, Harvey?" the little old lady pleaded again and again.

American Princess Fled Russia

The Princess and Prince D. N. Golitzine, who have landed at Boston from a tour of Russia, Japan and China. The princess was Miss Frances Simpson Stevens of New York, a graduate of Wellesley college. She married Prince Golitzine in Boston in 1919. The prince then went to Japan and China with his bride and they were in Omsk when Kolchak was in power. They then went to Vladivostok, but were compelled to flee by the approaching bolshevist army. They managed to reach a Russian vessel and escaped to Japan.

Baptista Ends Lisbon Gaming

Goddess of Chance Is Put to Rout by the New Premier of Portugal.

CLEAN-UP WAS SADLY NEEDED

Not a Street in the Capital Was Without Its Gambling House, Many Being Conducted as "Clubs" in Palaces.

Lisbon, Portugal.—Gambling, which flourished here to an extraordinary degree after the armistice, has suffered a severe check at the hands of the new government headed by Premier Baptista. Up to two months ago the gambling houses remained undisturbed, but since Baptista's government took office the law has been rigorously enforced and today there are few visible signs of the prosperity the gamblers have enjoyed for a year.

The gambling mania began to manifest itself as soon as the war ended. Magnificent clubs on which big fortunes must have been spent suddenly sprang up like mushrooms; gilded, glittering clubs, splendidly furnished, such as Lisbon never dreamed of possessing.

Palaces as Gambling Dens.

Palaces belonging to the old aristocracy were rented at incredible prices and transformed into "The Majestic," "The Palace Club," "Maxim's," "Palais Royal" and dozens of others on the same scale, with restaurants, ballrooms and gambling rooms; everything being perfectly planned and carried out on the most modern and expensive lines.

Hundreds of smaller imitations followed, until it may with truth be said that not a street in Lisbon was without two or three gambling houses.

Thus a great change came over the humdrum social life of Lisbon, where nothing in the way of amusement ever happens beyond theaters and moving picture shows.

The club restaurants' excellent cuisine attracted fashionable crowds, constant relays of Americans and English tourists spent their money lavishly and smartly dressed women coming nobody knows from where were a doubtful source of attraction in the streets by day and at the clubs by night.

This condition existed for well over a year. Then well-known firms were robbed by trusted employees.

An officer, who wore the cross of war, shot himself after losing large sums of money which were not his. Young men belonging to the best families fell into disgrace.

Press Starts Campaign.

A campaign was then begun by part of the Portuguese press, headed by the Seculo and the Situacao. Columns of letters from parents and well-known Lisbonites were printed daily, disclosing demoralizing facts and exhorting the government to close the clubs.

The governments, however, rapidly succeeding each other, had other things to attend to. And the gambling continued; but when the Baptista government came into office strenuous measures were taken.

The magnificent clubs, the glittering restaurants, the smart foreign women all disappeared as suddenly as they had burst upon the scene a year ago.

For a week carts and camions conveying roulette tables and other gambling paraphernalia to the police stations formed the chief attraction of the Lisbon streets.

Frequent attempts have since been made to reopen resorts. Recently the Palais Royal club was re-established, ostensibly as a restaurant. Three days later it was closed by the police, after a raid.

Lost $100,000 Trying to Get Job Which Paid $3,000

The Democratic nomination for county attorney of Muskogee county, Okla., indirectly cost F. E. Gumm, a former soldier, $100,000, and he isn't in office yet. In the heat of the campaign Mr. Gumm forgot all about renewing his oil leases on 1,000 acres of promising land in Oklahoma, near the Kansas line. The day after his lease expired a 400-barrel well was brought in on an adjoining acreage. Now the leases which Mr. Gumm once held are worth dollars instead of cents, and he estimates his loss at $100,000. The county attorney's office pays a salary of $3,000 a year.

UNDERSEA WIRELESS FOUND

Maltese Fishermen Discover Apparatus Used by Germans During the War.

Malta.—A complete wireless apparatus which was anchored in 20 fathoms of water off Melleha bay, with the mast and working parts below the surface to a depth of about eight fathoms, has been discovered by a party of Maltese fishermen.

The apparatus, which was subsequently removed by the dock-yard authorities for an examination, is of German construction and is complete in every detail.

Undoubtedly signaling went on regularly during the war with submarines lying in wait for British vessels.

First Spanish Warship Here Since 1898

Deck view of the Spanish warship Alfonso XIII, the first Spanish warship to arrive on these shores since 1898, when the war with Spain began. The vessel is lying in the North river at New York.

CICOTTE ADMITS $100,000 BRIBE

White Sox Pitcher Took $10,000 and Joe Jackson Got $5,000.

EIGHT PLAYERS ARE INDICTED

Confession of Star Twirler Results in Drastic Action by Owner Comiskey, Who Suspends Seven Great Players.

Chicago, Sept. 30.—After Eddie Cicotte, star hurler of the White Sox, had confessed to the grand jury that he had accepted a bribe of $10,000 as his share of a gamblers' fund, the jury indicted eight White Sox players for "throwing" the 1919 world's series to Cincinnati. Joe Jackson, another White Sox star, confessed that he had received $5,000 and that he was in on the conspiracy to throw the games.

Cicotte and Jackson said that Chick Gandil, former member of the White Sox team, had distributed the money among eight players. A fund of more than $100,000 is said to have been paid to crooked players by gamblers.

Those indicted are:

Arnold (Chick) Gandil, first baseman.
Fred McMullin, utility infielder.
Oscar (Happy) Felsch, center fielder.
Edward Cicotte, pitcher.
Claude (Lefty) Williams, pitcher.
Joe Jackson, outfielder.
George (Buck) Weaver, third baseman.
Charles (Swede) Risberg, shortstop.

If the players are found guilty in the criminal court, each may be sent to the penitentiary for five years or fined $2,000, or both.

The exact amount of money received by each of the eight players is known to the state's attorney's office and the grand jury. The jury also has the names of gamblers who aided Abe Attell, former prize fighter, in carrying the money from the gambling trust to the players.

The confessions of Cicotte and Jackson reveal the most amazing story of crooked sportsmanship ever told in America. The White Sox players were "fixed" before the world series with Cincinnati started.

Cicotte was paid his money before he pitched his first game. The money was placed under his pillow in the hotel, according to a prearranged plan with the gamblers. Cicotte carried out his part of the agreement and lost the first two games that he pitched in the series.

On these games the gamblers cleaned up several hundred thousand dollars.

Jackson told the jurors that he had demanded $20,000 from the gamblers. They refused that amount, however, and he compromised on $5,000. Like Cicotte, he found the money under his pillow on his bed the night before the first game was played with Cincinnati.

Seven members of the White Sox team were suspended by Charles A. Comiskey, owner of the team, when Eddie Cicotte's confession implicated them in the alleged fixing of the 1919 world's series.

The players suspended are Risberg, McMullin, Jackson, Felsch, Weaver, Williams and Cicotte.

Gandil, the eighth man indicted, was dropped by the White Sox in the spring, when he was reported as having held out because of disagreement over salary with Comiskey.

The dropping of the players will mean that a team made up mostly of substitutes will be depended upon to complete the season in the White Sox fight to win the American league pennant from Cleveland.

Following is the text of Comiskey's letter suspending the players:

"Chicago, Sept. 26.—To Charles Risberg, Fred McMullin, Joe Jackson, Oscar Felsch, George Weaver, C. P. Williams and E. V. Cicotte:

"You and each of you are hereby notified of your indefinite suspension as a member of the Chicago American league baseball club (the White Sox).

"Your suspension is brought about by information which has just come to me directly involving you and each of you in the basebal scandal (now being investigated by the present grand jury of Cook county) resulting from the world's series of 1919.

"If you are innocent of any wrongdoing you and each of you will be reinstated, if you are guilty you will be retired from organized baseball for the rest of your lives if I can accomplish it.

"Until there is a finality to this investigation it is due to the public that I take this action, even though it costs Chicago the pennant.

"Chicago American League Baseball Club.

"By CHARLES A. COMISKEY."

Chicago Woman Prize Angler.

Los Angeles, Cal., Oct. 4.—At Catalina Thursday the world's angling record for a woman was won by Mrs. Keith Spalding of Chicago, when, after a three-hour battle, she took on rod and reel a tuna weighing 165½ pounds.

World Mormons to Meet.

Salt Lake City, Oct. 4.—Believers in the Mormon faith from all parts of the world are expected to be in Salt Lake City to attend the ninety-first semi-annual general conference of the church, October 8, 9 and 10.

WORLD BACK TO NORMAL SOON

Speakers at Brussels Meet Predict Return to Competition in Few Years.

TARIFF QUESTION DISCUSSED

Manager of Lloyds' Bank Says "Let Us Not Only Dwell Together in Peace but Let Us Also Deal Freely and in Harmony."

Brussels, Oct. 4.—Distinct and multiplying signs of economic improvement are seen in countries most shaken by the great war, and optimism over their future is felt, according to speakers at the international conference in session here.

Some of those who spoke before the conference declared that in a few years the world will return to active competition between sellers, and that the present contest between buyers will pass.

Charles Wauters, Belgian minister of commerce, asserted the temporary advantages enjoyed by countries allowed to export freely will turn to their disadvantage as a result of prohibitive rates of exchange.

"Let us not only dwell together in peace and unity," said Henry Bell, manager of Lloyds' bank, London, "but let us also deal together freely and in harmony."

Mr. Bell disclaimed any intention of raising a controversy, but said the question of free trade arose immediately in connection with a discussion of the situation.

He referred delegates to the conference to the declaration of the supreme economic council against the artificial barriers to international commerce, and expressed the hope the conference would make it clear that behind all questions of international trade was the question of durable peace.

"It is a great error," he declared, "to consider the success of one nation in trade a detriment to others. Commerce is not a form of conflict, but, on the contrary, it is that which should bind nations together."

The expression "free trade" was mentioned only rarely, and the trend of the greater part of the discussion was toward the beating down of barriers of international trade.

"Japan is for commercial liberty and fair play; we must have freedom of exchange," was the way M. Mori, a Japanese delegate, put it.

Don Jose Figueras, speaking for Spain, said the greatest freedom of trade should prevail, but that nothing should be done without a unanimous resolution of the conference.

Fazlibhoy Currimbhoy of India differed from the British delegates on the tariff question. He contended that countries should be left to decide the question in the light of their own interest. He declared that there was a strong current of opinion in India in favor of a system of protection.

Ferdinando Quatriere for Italy went further than the previous speakers. He was in favor not only of "the greatest freedom for international commerce" but also for "the pooling of raw materials, coal and foodstuffs."

The necessity of simplifying transport regulations was mentioned by several of the speakers at intervals during the discussion of international trade.

Armenian, Hungarian, Argentine and Uruguayan official reports were presented, but the conference seemingly has got beyond the period where it is interested in statistics, and apparently is impatient to see results from the work of committees.

The full session apparently will be adjourned from Saturday to Wednesday in order to give the delegates full time for work in committee.

MINERS QUIT SPAIN FOR U. S.

900 Strikers in the Rio Tinto District Decide to Make Move—400 Others Leave.

Huelva, Spain, Oct. 4.—More than 900 miners who have been on strike in the Rio Tinto district have decided to emigrate to the United States and will leave Spain about the middle of October. Another party of 400 is leaving for another Spanish province.

RECOGNIZE D'ANNUNZIO RULE

Italy Is Reported to Have Given Quarnero Regency Standing as Proclaimed.

Rome, Oct. 4.—Recognition of the municipal council of Fiume as the provisional government of the Quarnero regency, which was recently proclaimed by Gabriele d'Annunzio, is reported here.

Morocco Tribesmen Routed.

Madrid, Oct. 4.—Morocco tribesmen have been driven from positions in the Spanish zone in that country by a column of native and European troops on a forced night march from Ceuta and Tetuan.

Puts Ban on Reprisals.

Dublin, Oct. 4.—Warning against reprisals, no matter what the provocation, was given the royal Irish constabulary by Sir Hamar Greenwood, the chief secretary for Ireland, in a speech.

"DANDERINE"

Girls! Save Your Hair! Make It Abundant!

Immediately after a "Danderine" massage, your hair takes on new lustre and wondrous beauty, appearing twice as heavy and plentiful because each hair seems to fluff and thicken. Don't let your hair stay thin, lifeless, colorless, plain or scraggly. You, too, want lots of long, strong, beautiful hair.

A 35-cent bottle of delightful "Danderine" freshens your scalp, checks dandruff and falling hair. This stimulating "beauty-tonic" gives to thin, dull, fading hair that youthful brightness and abundant thickness. All druggists!—Adv.

Innocent Accomplices.

"Don't you know it's wrong to fish on Sunday?" asked the pious old gentleman.

"Yes, sir," replied the freckled youth.

"Then why are you doing it?"

"Because," replied the urchin, with a grin, as he held up a catch that any angler might have envied, "the blame fish don't know it."—Birmingham Age-Herald.

If You Need a Medicine You Should Have the Best

Have you ever stopped to reason why it is that so many products that are extensively advertised, all at once drop out of sight and are soon forgotten? The reason is plain—the article did not fulfill the promises of the manufacturer. This applies more particularly to a medicine. A medicinal preparation that has real curative value almost sells itself, as it is an endless chain system the remedy recommended by those who have been benefited, to those who are in need of it.

A prominent druggist says "Take for example Dr. Kilmer's Swamp-Root, a preparation I have sold for many years and never hesitate to recommend, for in almost every case it shows excellent results, as many of my customers testify. No other kidney remedy has so large a sale."

According to sworn statements and verified testimony of thousands who have used the preparation, the success of Dr. Kilmer's Swamp-Root is due to the fact that so many people claim, that it fulfills almost every wish in overcoming kidney, liver and bladder ailments; corrects urinary troubles and neutralizes the uric acid which causes rheumatism.

You may receive a sample bottle of Swamp-Root by Parcels Post. Address Dr. Kilmer & Co., Binghamton, N. Y., and enclose ten cents; also mention this paper. Large and medium size bottles for sale at all drug stores.—Adv.

Not Qualified.

"A reporter wishes to see you, sir."

"What does he want?" asked Mr. Grabcoin, testily.

"He says he wants to get your views on the European situation."

"Tell him I'm not competent to discuss the question. I don't even know what's become of that poet, musician or something or other who captured Flume."—Birmingham Age-Herald.

GREEN'S AUGUST FLOWER

A Marvelous Remedy for Indigestion

Those who suffer from nervous dyspepsia, constipation, indigestion, torpid liver, dizziness, headaches, coming up of food, wind on stomach, palpitation and other indications of disorder in the digestive tract will find Green's August Flower a most effective and efficient assistant in the restoration of nature's functions and return to health and happiness. There could be no better testimony of the value of this remedy for these troubles than the fact that its use for the last fifty-four years has extended into many thousands of households all over the civilized world and no indication of any failure has been obtained in all that time. Very desirable as a general laxative. Sold everywhere.—Adv.

From Bad to Worse.

"I don't find so many people borrowing umbrellas and forgetting to return them," remarked the observant citizen.

"I believe the umbrella borrower was a less expensive friend," rejoined the man who is always longing for the old days. "What you've got to look now is a taxicab fare all the way to the suburbs."

Dont Forget Cuticura Talcum

When adding to your toilet requisites. An exquisitely scented face, skin, baby and dusting powder and perfume, rendering other perfumes superfluous. You may rely on it because one of the Cuticura Trio (Soap, Ointment and Talcum). 25c each everywhere.—Adv.

A Gentle Hint.

Wife—"Dearest, do you love me still?" Hubby—"How I could if you would only get that way!"

Don't growl at what you can't help or what you can help.

The Man Nobody Knew

CHAPTER XII—Continued.

—13—

he's going to take a look at it way West," said Hilliard, diffi-, and added, with more generos- than Waring had anticipated. and I both asked him to. Let —and Jack—handle it together. een them, they'll make rather an stive study, don't you think? And might turn up something that all would want to know."

at's right! It's a thought. Well Cullen looked at his watch. "I waste any more time on this tom- business. I ought to have been office an hour ago. Anybody go- downtown?"

am—but I'll walk," said Waring ly.

n I stay?" asked Hilliard of An- in an undertone.

want you to," she said. Her eyes wed Waring to the doorway.

ter they had been alone for a full te, and neither of them had ut- a syllable, it came to Hilliard the chief difficulty in being evil make an end of it, but that the difficulty in being virtuous is to . His brain was active and his ions were placid; but to his mild lexity he had no compelling de- to make a start. There was no raining impediment working st him, as on the occasion of his view with Carol; his impulses merely lazy. Indeed, he was r highly gratified at the course things this morning; he argued Waring's zeal and Armstrong's rary had relieved him from any ssity of an out-and-out avowal of innocent fraud; it was much more factory, since all the issues were confused, to turn his affairs over Cullen, and to await the inevitable ct on an impersonal basis. In the ntime, he was deeply touched by en's confidence in him; Cullen and Durant alike had refused to be the obvious truth; he wondered dly what it would have meant to to have had such a reputation his youth onward; the gratifica- now would have been superlative ovided only that he had been en- to his pride.

He's jealous of you," said Angela ptly. "That's all—he's jealous. ply wild with it. You know that— 't you?"

illiard started; for it wasn't an oldening beginning. Not the least it implied exactly the sort of rival- which he had feared, and which he come to relinquish.

Who is? Oh! Rufus Waring?" Terribly jealous. Perfectly crazy it. That's what all this whole is about." She tossed her head fully. "I don't care; do you?"

he unreserved bluntness of it near- ook him off his feet; renewing the astating suspicion that Angela had n to care too much for him—too h for her own good.

Why, Angela!" he said lamely. "Of rse I do. It hurts me."

he hammered a gold-embroidered -cushion with one tiny fist.

Oh, he's jealous of everything and ybody. That doesn't count any e. Only it made me perfectly ous. . . . I wanted to scratch him the very idea of his daring to say thing like that about you! Even ou do like me a lot!" She sighed rily. "And yet if you stop to think ut it, it was sort of brave, too— ding up to all of us when it was e to one, and he was wrong—poor !"

illiard looked down at her with affection and troubled relief.

As long as I've a defender like you ouldn't worry," he said, "but I'm id it won't be for so very long. ela, that you'll feel like defending "

Why not?" she asked.

Just a notion of mine. It strikes that you're fonder of Rufus than let yourself think. And he needs hampion worse than I do; I'm more d to taking care of myself."

he corners of her mouth were pe- arly sensitive.

Such a queer notion!" she said. here'd you ever get it?"

Oh, it came of its own accord. "

It's been such a funny day," she , musing. "Rufus was funny, and was funny, and you're so funny, Carol was funny this morning. I'm funny now, and—"

Carol!" he echoed involuntarily.

She laughed at him, enjoying his dis- ofiture with the sweet insolence of haughty juvenile; and it was note- rthy that her arraignment of War- stopped short at this point.

I know something about you!" she nted wickedly.

What do you know, bright child?" demanded, red to the temples.

I know!" Her tone was singing. do you! Look at the man blush! y, you guilty thing! Why, you red anium!"

He sat down beside her, staring at vivid, flower-like face.

Angela, you little demon, stop hing at me!"

was fresh incentive; she only bub- d the more.

I told you I'd laugh at you some time," she reminded him triumphantly, "and this is the time!"

"Think so?"

"I know so!" All at once she became demurely sober. "I'm awfully glad, honestly . . . it isn't out yet, of course, but everybody knows about you and Carol, especially since Jack Armstrong lost out, and went West, just the way they do in novels. I'm just as glad as I can be. Only you might have given me a wee little hint—just to me, you know, mightn't you?"

"Angela!" He caught at her hand.

"Oh! That wakes you up, doesn't it?" Her manner changed to the maternal; if Hilliard had been in a diffent frame of mind it would have convulsed him. "Now, just be calm and tell me all about it," she instructed him indulgently. "Tell me everything—I won't repeat it to a single soul! I'm awfully excited about it. Please tell me."

"Angela! Where did you—"

She pouted instantly.

"Not just plain 'Angela'—put some trimming on it."

"Well—Angela, dear . . . what's that about Jack Armstrong? Say that again—and tell me everything you know about it. Be serious for once. That's a good girl!"

Her eyes were mischievously tender; somehow she reminded Hilliard of that moment in the hallway of the Durants' house—the most precious of all his recent memories.

"Will you tell me if I tell you?"

"Yes. I guess so."

Her finger was upraised in warning.

"Say 'Yes, dear.'"

"Yes, dear," said Hilliard, writhing.

She settled herself with a little flounce of excitemnt.

"Well . . . Jack asked her, and she refused him. . . . Flat as a pancake. That's gospel truth! She told me she'd refused him, and he told me the pancake part. And everybody's glad of it—he's a nice boy; awfully nice—but nowhere near as nice as you are. And he's just naturally gone away to get over it. And you're the only one left. So—that's finished."

He stared at her unblinkingly. Had he really been at such cross-purposes with Armstrong at the station, then? The conception was illuminating.

"Everybody?" he repeated, red and white by turns, and mightily hushed. "What does that mean?"

"Just that. Everybody. That is—" Her accent was deliciously superior. "That is, all the people one knows."

"They think . . . they think I'm the . . . the one?"

"Silly!" She patted his head. "I didn't believe you'd try to camouflage me. No—honestly—isn't it true?"

He studied her a moment. "What would you say if it were?" he asked soberly.

She returned his gaze with engaging frankness.

"Oh, I want it to be—I want it to be!" she said. "Carol's the sweetest thing in town, and as for you . . . well, sometimes I almost wish I could marry you myself!"

His heart leaped dangerously. One complication the less! Oh, the respite of it! Angela removed from the problem and—he sank back wearily—Carol coming into it again, and irrevocably.

That Wakes You Up, Doesn't It?"

"'Almost?'" he queried mechanically.

She looked at the floor; when she raised her eyes he saw the well remembered depths in them. She was half-child, half-woman—and the woman was speaking with the child's tongue. Her hand covered his; the warm, timid pressure was very assuaging.

"Yes, 'almost' . . . I suppose I can really talk to you, can't I? I always thought I could . . . well, when you first came here I was perfectly crazy about you . . . I am yet, in a way, only sort of boiled down . . . you know. Not like a sister at all, but . . . not the other sort, either. I thought it was going to be—once—but . . . I . . . I like you better than anybody else in the world—all but two. . . . I liked to be kissed by people I like . . . and . . . you know it's sort of like sunlight; I need lots of it. People have always fussed over me. . . ." Here she gave a poignant sigh for her lost youth. "Only . . . it's funny, too . . . but one of the two people I do like better than I do you . . . in a different way . . . is . . . is Rufe Waring. He's jealous as a . . . a tom cat . . . but somehow I don't mind it from him; I always like it. . . . He was so frightfully jealous about you, and I . . . I teased him about that. It was just because he thought you weren't quite good enough for me, I guess. And you've got to give him credit for that, now, haven't you? . . . And . . . I hope you and Carol 'll be awfully happy together."

"Dear girl!" said Hilliard gently.

"Do you understand?" Her eyes were very pleading, very misty.

"Understand?—yes. Can I wish you happiness, too?"

"Not yet," she said, adorably prim. "He hasn't . . . oh, we both know about it, but he's got to graduate from law school first, and—after that . . . maybe I can . . . travel a little." She blushed shamefully. "You needn't grin like a Cheshire cat—I guess I'll see Niagara Falls, anyway!"

"I wasn't grinning," he said. "I was smiling at you right out of my heart. . . . But I do wish happiness to you—always and always. And I'm happier myself than I've been for ages . . . dear . . . ." He stopped, swamped by the recollection that it was Waring who was to share in the demonstration of his perfidy. To wish happiness to an executioner—and not be a hypocrite? Incredible—yet true. Hilliard wished him happiness.

"What is it?" she demanded, alert to his altered expression.

"Nothing, . . . I'm just sorry I'm not a Mormon!"

"You're fibbing! Still . . ."

Hilliard rose hastily.

"Wait!" she said. "You can't go until you've told me one more thing . . . you don't honestly think Rufe's underhanded, now, do you?"

"No—oh, no, Angela. A man can be so upset that he can—"

"You know we were just shocked and surprised—and Dad's awfully quick tempered. And it was so sudden! We didn't stop to talk it over, we sailed right into him, and all of us got excited, and then you came in. We didn't know how frightfully jealous Rufe could be—he's been bad enough before, but this time was the limit—and it's only because he's a boy. It's . . . sort of primeval. You know."

"Yes, dear—yes!"

"And . . . he did know us long before he ever knew you. He thought he was protecting us. It was just an obsession—"

"It's all right—quite all right. Please!" He touched her hair lightly. "I wish I were as sure you'd always defend me as I am that you'll stick to him, Angela."

"That's twice you've said that . . . and you know what I think! I've told you. And . . . are you going off without telling me anything at all?" Her voice betrayed the irreparable injury in it.

Hilliard moistened his lips.

"Angela, dear, next to one other person I love you better than any one else on earth."

"That's nice," she said, with a sigh of perfect content.

He bent to her, but she eluded him.

"Oh, no!" she gasped in fluttering protest. "Even if you . . . but I've told you about Rufe now—you haven't told me about Carol, but it's plain as day—it wouldn't be right!"

"Angela!"

She relented swiftly; his voice was something to rely on.

"Well—just my cheek, then. Honestly, I . . ."

"No, dear," said Hilliard. He compelled her chin upward, and smiled down into her lovely, startled eyes, and stooped and kissed her forehead . . . then her lips.

"That's for good-by," he said, "to the dearest little girl I ever knew. . . . We're both growing up, aren't we?"

CHAPTER XIII.

In the colorless days that followed, Hilliard listlessly set about the ordering of his final plans. Fortunately, there were few of them; his mind would never have been equal to intricate detail.

It was a slight consolation to him to realize that the city had a habit of judging men by personal rather than by financial standards; for all its pride and wealth, it would censure him more for his wrecked personality than for whatever money losses he had caused. He was prepared to endure that censure; and because he understood the provocation behind it, he was all the more eager to aid in the salvage. There would be more saved from the underwriting project, he thought, than from his character.

He had deposited with Cullen all he owned, except for his privats belongings, his runabout, and a trivial sum for current expenses. The runabout he would offer for sale; it meant a few hundred dollars more to be divided among his contributors. Beyond that, there was nothing else he could restore to them.

He didn't believe that Harmon would ever carry out his promised betrayal; not that he had faith in Harmon's code of ethics, but because he trusted Harmon's horse sense. If Hilliard were alone to be accused, Harmon would gain nothing and might, if he offered any adverse testimony, even implicate himself. Indeed, if Harmon should say enough to establish the proof in the dangerous status of an accessory before the fact. No . . . this was the same procedure; to let

"That's for Good-by."

the memory of Dicky Morgan rest in peace, and to let the brunt of anger fall on Henry Hilliard, who was a nobody from nowhere, with a lying face, a lying tongue, and no claque to mourn at his exit.

But then there was Angela's startling allegation . . . She had declared that "everybody" in town knew all about Hilliard and Carol. "Everybody" would have a different opinion. He had tried to explain himself to Carol, and he had failed; and in the light of Angela's revelation, it was difficult to decide whether Carol herself, in protesting that she wanted to retain him as a friend, had meant that and nothing more, or that and a great deal more. But no matter what she had intended to convey, he dared not go to her again, he dared not see her and speak to her, for if he lied to her . . . but he couldn't lie to her now, and every word of truth would prove a boomerang. He was trapped; and although his heart was breaking for the love he had almost won a second time, he remained steadfast to the ideals he had created. If Carol were to lose him as a suitor, she should never know that her first and foremost suitor had gone to the devil.

He told himself fiercely there was one definite and permanent way out of it. . . . Nobody would then have cause to gossip about Dicky Morgan; no one—after the first natural flood of excitement and denunciation—would remember very much about Henry Hilliard. It would save such a deal of needless trouble; it would save such a wearisome amount of shame.

But against the pitiless background of the war, self-destruction as a means of avoiding personal difficulties, self-caused, seemed curiously repellent—curiously cheap.

No . . . it was a part of his own grievance that Carol and the others must grieve, too; he had a dual responsibility to society. He had no right to leave these matters clouded by any uncertainty of motive. Syracuse had a right to know the facts; and if the facts brought pain to those he loved, why, that was something he should have thought about in June, and not in November.

As he clung comfortless to the last slipping hours of the reputation he had so carefully builded, he knew that it wasn't the punishment of the law that he dreaded, it was the ostracism which would accompany it. It wasn't his own shame which gripped him, it was the consciousness of the shame which would attach to his friends. And so, for a day or two, all his faculties were strung upon the attitude of the public toward him; he was watching frantically for the first signs of adverse demeanor, and bracing himself for the shock which was unavoidably to come. For secrets will out, and although he had no reason to expect Waring to break his pledge, he knew that when rumor smolders among as many as four people, there comes—there always comes—a moment in which it bursts forth in spontaneous combustion

Presently he sensed a subtle supercharging of the atmosphere whenever he met a male acquaintance; he couldn't deny that the greeting of his bankers was suddenly less informal, more impersonal; he perceived, with a sinking spasm of foreboding, that fewer people stopped to chat with him on the street and that those who still were willing to halt and pass the time of day were uncommonly restive about it. Syracuse hadn't yet arrayed itself officially against him, and a part of Syracuse was outwardly as pleasant as ever, but there wasn't the slightest question that the story had leaked out, and that it had got itself adherents. The end was plainly in sight; Armstrong's report was due. Only the Cullens and the Durants and one or two other of the James street families were quite as cordially attentive as formerly; and to Hilliard's vast chagrin, they rather overdid it . . . he seemed to feel in the steady warmth of their friendship a sort of blindly unseasonable resolution to support him, whether or no. This, infinitely more than the cooling manner of the majority, galled him incessantly. It was as though they rallied to his defense before the need of it . . . it was as though they conceded in advance the necessity of such a defense.

So Hilliard waited, waited . . . smiling upon the world his hollow smile, carrying through the city the body of a knave and the face of a martyr and the soul of a gentleman . . . and in the watches of the night, he was perplexed to find that his eyes were sometimes wet, but never when he was thinking of himself—always when he was thinking of Angela, or Carol, or—unexplainably—of a common-enough representative of the French bourgeoisie named Pierre Dutout.

. . . . . .

On the eighth day, he chanced to meet Dr. Durant by accident in front of the Physicians' building at nigh noon.

"Hello, there! You're just in time," said the Doctor, cheerfully. "I'm going over to the University club for lunch. Won't you join me? I want your advice. I'm the worst business man in the world—you probably know that by this time. And I trust my friends for friendship; but when I want advice, I go to an expert. So you qualify on both counts. Come along over."

Hilliard was flattered, but not deceived.

"I'm not sure that my advice is worth anything half as expensive as a luncheon, Doctor."

The older man took him by the arm, and impelled him across the street.

"That depends on your appetite," he laughed. "Come along, and help me out on a decision I've got to make. About an investment."

Hilliard hung back for a moment, while suspicion dawned on him.

"What sort of investment, Doctor?" he queried.

"You come and sit down," urged the Doctor, seductively. "And we'll talk it over later. But first of all—" He patted his waistcoat. "Let's eat."

Hilliard was almost too grateful to speak; the Doctor's strategem was patent, but in all chivalry the invitation couldn't be declined. Once inside the doors of the club, however, he became panicky; for his first sweeping reconnoissance included half a dozen men whose late behavior had indicated that they knew.

The Doctor drew Hilliard under the mantle of his own unassailable position, and plowed ahead with the utmost serenity. He nodded here and there, he spoke to members right and left; he bowed across the room; always his personality, rather than his person, seemed to be escorting and guarding Hilliard; and Syracuse couldn't decline to acknowledge a man who was under the Doctor's adequate protection. Those who spoke to the Doctor also spoke to Hilliard; there was no way out of it, and they spoke as casually as they could. They also nodded to him, and bowed, but when his back was turned, they became low-voiced and communicative, and he knew it.

(TO BE CONTINUED.)

Divers in Ancient History.

The earliest mention of diving is made by Homer, about 850 B. C., in the "Iliad," when Patroclus compares the fall of Hector's charioteer to a diver diving for oysters; and Thucydides tells of divers being used to remove submarine barriers placed with the object of impeding or injuring the Grecian fleet at the siege of Syracuse. These divers had no apparatus save a stone to carry them quickly to the bottom and to cling to for the brief period, about two minutes, they could stay below. This is called natural diving and is still in use for collecting sponges and pearls at Ceylon and in the Mediterranean.

REAL ROOSEVELT ABHORRED WILSON AND HIS WORKS

Yet Democratic Candidate for Vice Presidency Slanders Great Leader's Memory.

MAKING FUTILE ATTEMPT TO WIN ON OLD ISSUES

Fifth Cousin Removed Roosevelt Not Able to Convince Followers of T. R. by Specious Arguments.

By SCOTT C. BONE.

Touring the country as a candidate for Vice President, Franklin D. Roosevelt is vainly endeavoring to invoke the progressive spirit of 1912 in support of Wilsonism and the election of the Democratic ticket in November.

What would the real Roosevelt—Theodore Roosevelt—the immortal T. R.—say to his followers were he alive today?

Gone, he left burning words which tell all too plainly what his attitude would be at this time.

He abhorred Wilsonism, just as he abhorred Danielism, with both of which Franklin D. Roosevelt has been identified as an under Secretary.

Condemned Wilsonism.

Theodore Roosevelt condemned Wilsonism and the whole Wilson administration in unsparing terms.

Read anew what he said at Cooper Union on November 3, 1916:

"I have been assailed because I have criticised Mr. Wilson. I have not said one thing of him that was not absolutely accurate and truthful.

"I have not said one thing of him which I did not deem it necessary to say because of the vital interests of this republic.

"I have criticised him because I believe he has dragged in the dust what was most sacred in our past and has jeopardized the most vital hopes of our future. . . .

"I criticise him now because he has adroitly and cleverly and with sinister ability appealed to all that is weakest and most unworthy in the American character; and also because he has adroitly and cleverly and with sinister ability sought to mislead many men and women who are neither weak nor unworthy, but who have been misled by a shadow dance of words.

"He has made our statesmanship a thing of empty elocution.

"He has covered his fear of standing for the right behind a veil of rhetorical phrases.

"He has wrapped the true heart of the nation in a spangled shroud of rhetoric.

"He has kept the eyes of the people dazzled so that they know not what is real apd what is false. So that they turn, bewildered, unable to discern the difference between the glitter that veneers evil and the stark realities of courage and honesty, of truth and strength.

"In the face of the world he has covered this nation's face with shame as with a garment."

So much for Theodore Roosevelt's opinion of Wilson and Wilsonism in support of which Franklin D. Roosevelt, life-long Democrat, would now invoke the progressive spirit of 1912!

Abhorred Danielism.

And what did Theodore Roosevelt think of Daniels' administration of the Navy Department of which the Democrat, Franklin D. Roosevelt, has been a more or less conspicuous factor and part?

In a speech on "Americanism and National Defense" at Chicago, October 26, 1916, Theodore Roosevelt said:

"More harm has been done to the navy by the politicians in power during the last three years than in the preceding thirty. Whatever good has been accomplished in the navy during the last three years has been done by naval officers, who, in most cases, have been snubbed and punished for their proposals as long as it was safe to do so; whereas Mr. Daniels now turns and claims credit for what was thus forced upon him. . . .

"In short, throughout President Wilson's term there has been neglect or positive maladministration in connection with departmental organization in navy yards, aeronautics, mines and torpedoes, and in all other matters affecting the efficiency of the fleet and the enthusiasm of its officers and men. . . . The activity and energy of the Navy Department under President Wilson has been primarily concentrated upon schemes aimed at vote-getting or advertising."

This, then, is what Theodore Roosevelt thought of the administration of the Department from which Franklin D. Roosevelt, Democrat and exponent of Wilsonism, fain would reach the Vice Presidency and have progressives of 1912, followers of the real Roosevelt, help to keep the Democratic party in power and make Wilsonism endure!

It is inconceivable that any true follower of Theodore Roosevelt will hearken to such a preposterous appeal.

HERE'S A RECORD BREAKER

Is it any wonder that Ben Katter has been going about with the biggest kind of a smile on his face and strutting about like he owned the world? The cause of Ben's big smile is a fine thirteen pound baby boy who arrived at him his home last Thursday. Ben says the young husky will soon be able to help him on the farm and we will say he certainly has a good start. Cecil Benjamin Katter is the young man's name who has come to join the home of Mr. and Mrs. Ben Katter, residing a short distance from Klemme. And by the way Ben was handing out ten centers and we smoked one on the new boy.

G. P. McCullough has accepted the agency for the Johnson Laundry at Alebrt Lea, Minn., the best and most modern laundry in that country. Prices very reasonable. Basket leaves Wednesdy noon, back Saturday evening. 5-tf

Frank Gruetzmacher and family and Mr. and Mrs. P. M. Griesemer autoed to Ames last Sunday afternoon where they spent the day visiting with Harold Gruetzmacher who is taking an electrical engineering course at the state college.

There was an auto accident between Klemme and Garner Monday evening. Wm. Lau and family of Garner were returning from their trip west when they were run into by a Ford car driven by a party from Belmond. Both cars were smashed up to quite and extent but no one was injured.

Crawford, the new manager of the Klemme Hotel came Friday from Richland, Iowa. Mrs. Crawford has been here for several weeks. They are experienced hotel people and will give Klemme the best hotel we have had for several years. We are indeed glad to welcome them to Klemme for if there is any thing this little city needs right now it is a first class hotel and we believe now that the Crawfords will give Klemme a real hotel.

Mr. and Mrs. C. F. Keraus were in town last Saturday to say goodbye to their friends before leaving for California. They went back to Clear Lake Saturday evening and left there Sunday for Pasadena, California, where they expect to remain for the next eigth or nine months. We wish the Keraus a fine trip while out there. Charlie promises that he will not shoot all the ducks or catch all the fish while there but will leave a few for any stray Klemme sports who may in the future wander out that way.

STATEMENT

of the ownership, management, circulation, etc., required by the Act of Congress of August 24, 1912, of Klemme Times, published weekly at Klemme, Iowa, for Oct. 1, 1920, State of Iowa, county of Hancock. Before me, a notary public in and for the State and county aforesaid, personally appeared R. A Jorgenson. who, having been duly sworn according to law, deposes and says that he is the publisher and owner of the Klemme Times, and that the folowing is, to the best of his knowledge and belief, a true statement of the ownership, management, etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in Section 443, Postal Laws and regulations.

1. That the names and addresses of the publisher, editor, managing editor and business manager are:

Publisher, R. A. Jorgenson, Klemme, Iowa.

Editor, R. A. Jorgenson, Klemme, Iowa.

Managing editor, R. A. Jorgenson, Klemme, Iowa.

Business manager, R. A. Jorgenson, Klemme, Iowa.

2. That the owner is R. A. Jorgenson, Klemme, Iowa.

First National Bank
KLEMME IOWA

Local Mention

Wm. Straatman was a visitor at Garner Thursday last between trains.

Harry Irving and family of Mason City, were visiting with the Ralph Irving family in Klemme Sunday.

Supervisor Burhow of Kanawha, was a business visitor in Klemme on Tuesday.

Wallace Pavey and family drove to Clarion Sunday for a visit with relatives and friends.

Mrs. Clara Kirkwood came last Thursday morning for a few days' visit at the A. Kirkwood home.

Mrs. Aug. Lau, Jr., left Monday with her son for Minneapolis, where the latter expects to take treatment of a specialist.

The populion of Klemme and Ell township is 970 as given out in the census report, which is a gain of 162 over the 1910 census.

John Miller left Saturday noon for Dyersville, Iowa, for a short visit from which place he will go to Illinois for a visit also.

Don't fail to look over the special advertisement of the First Methodist Church this week. Something out of the ordinary for Sunday.

Mr. and Mrs. Fred Eichmeyer, of Sheffield, came Friday morning last fo a short visit at the home of Mr. and Mrs. Geo. Platt.

J. B. Spitler has so far recovered from his recent operation that he was ble to be up town for the first time Saturday. He is getting along fine and is feeling much better.

Ole Peterson, of Britt, was in Klemme a couple of days the fore part of the week. Ole is out working in the interests of the Fair Association and soliciting the farmers to take shares.

Mr. Thomas F. Carrol, of Seneca, Illinois, was a business visitor in Klemme a few days the fore part of the week. Mr. Carol owns the farm just east of the Joe Johnson farm, east of Klemme.

The paved road between Ventura and Clear Lake is now open to traffic. The paved road has been completed as far as Ventura but Cerro Gordo county expect to pave west to the Hancock county line this coming year.

Mr. and Mrs. Chris Juhl, Mr. and Mrs. Andrew Nissen and Mrs. Allen Hallet, all of Forest City, autoed to Klemme Sunday and spent the day at the home of Mr. and Mrs. Raymond White. The first party mentioned are parents of Mrs. White.

Mr. and Mrs. E. S. D. Kahrs left Sunday morning for Minneapolis, via. Belmond, where they will attend the wedding of their neice, Miss Lucile Ballard. During their absence the store was tended by G. H. Ludwig, of Nevada, a brother of Mrs. Kahrs.

The J. N. Day family and Mr. and Mrs. Wm. Smith and Mabel Smith, Mrs. A. E. Buriff, Mr. and Mrs. Trafford and Mr. and Mrs. E. G. Ell all left in cars for Humboldt, Iowa, early last Sunday morning to take in the Northwest Iowa Conference which was in session there. They returned the same evening.

Garner is now paving her main street. The paving from the old bakery corner to the Milwaukee tracks will be 68 feet wide. From the bakery south to a block south of the court house the paving will be divided in the center by a parking. The paving gang expect to finish the paving as far as they will go this fall in a short time now.

According to the Belmond Herald-Press, W. A. Thmpson is back in the restaurant business in that city, having purchased the place known as Ye Sweete Shoppe. "Bill" was formerly in business here a few years ago and was the proprietor of the Crystal Cafe. He had another place in Belmond which he sold last spring but "Bill" likes the restaurant business and just had to get back again.

The stork got busy last Thursday afternoon and left a fine ten and a half pound baby girl at the home of Mr. and Mrs. Sam Harvey. Mother and the little girl are fine. Sam was around bright and early the next day with a box of cigars under one arm and a big grin on his face and would stop everyone he met, explain what a fine girl he had and give them a cigar to smoke while he was telling all about Enid Velma Harvey, his new daughter. Sam makes a first class papa but is still acting strange and we doubt if he will recover for some time.

Then Father Spurted.

While mamma was out one evening, father undertook to cut little Freddie's hair. Barbers are so expensive in these days.

Though he was making quite a good job of it, he was rather slow, and Freddie, who is only six and a bit, found the operation wearisome.

"Are you nearly done, daddie?" he asked at length.

"Very nearly, sonny," replied his father. "I've only got the front to do now."

"I'm afraid," sighed the small boy sadly, "that the back will grow again while you're finishing the front."

Fully Occupied.

Mrs. Peevish says she feels confident that Mr. Peevish will never acquire another bad habit, as it takes all his waking hours to practice those he already has, and when he is asleep he snores.—Dallas News.

GUARD AGAINST PLANT ENEMIES

New and Important Safeguards Now in Effect at All Ports of United States.

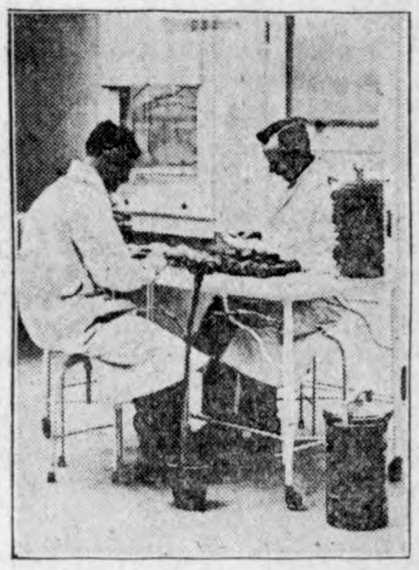
BAN ON DISEASES AND BUGS

Regulations Just Issued Supplement Provisions Which Have Been in Force for Years—Escape of Insects Less Likely.

Several important new safeguards went into effect August 1 in all parts of the United States regarding plants and plant products whose introduction into this country is restricted or prohibited by quarantine or other orders of the United States department of agriculture. The new regulations have just been issued by the secretary of agriculture and pertain to the arrival of prohibited and restricted plants carried on vessels arriving at ports where entry or landing is not intended. The provisions supplement regulations which have been in force for several years relating to entry for immediate export and entry for immediate transportation and exportation in bond of prohibited plants and plant products. The enforcement of the quarantines of the department of agriculture at ports of entry has shown the necessity for more adequate safeguards with respect to restricted and prohibited plants or plant products where entry or landing at a port is not intended. These safeguards have now been provided, making less likely the escape of insects or plant diseases from vessels temporarily stopping in United States harbors.

Captain Must Report.

The new regulations provide that a report shall be made to the secretary of agriculture by the captain or other person in charge of a vessel arriving at a United States port and containing on board plants or plant products the entry of which is prohibited or restricted. This report must state the nature and quantity of such plants or plant products, the country or locality



Federal Horticultural Board's Representatives Examining Plants Sent in to See if They Harbor Insects or Disease Which Should Be Excluded.

of origin, the date of arrival, the date of sailing from the United States port, together with a statement indicating the steps taken to prevent the escape of insects or plant diseases which they may carry.

Must Permit Inspection.

It is further provided that the person in charge of such vessel must allow inspection of his craft and must take such measures as are prescribed by the inspector representing the department of agriculture, to prevent the landing of any such plants or plant products or the escape of insects or plant diseases which they may carry. The collector of customs, in co-operation with the inspector of the department of agriculture, may require such person to destroy the objectionable plants and plant products or to remove them forthwith from the port and the territorial waters of the United States. If necessary, the inspector of the department may require the disinfection of the vessel in accordance with methods prescribed by the department of agriculture.

STRAW USEFUL AS ROUGHAGE

Also Advisable for Farmer to Use It Liberally for Beddding for Farm Animals.

Straw is too valuable to be allowed to remain unused. Fresh oat straw, as well as wheat straw, can be used as a roughage in wintering stock, says the United States department of agriculture. It is also advisable to use it liberally as bedding for farm animals, as it adds to their comfort and absorbs the liquid part of the manure, which is the most valuable portion.

PREPARE CULLS FOR MARKET

All Fowls, Young or Old, Which Appear Weak, Slow or Dull, Should Be Fattened and Sold.

Cull out and prepare for market all fowls, old or young, which appear weak, slow, or dull; fowls with drooping tails, rough plumage or crow-shaped heads; all scrubs except those which have laying points; all hens which moult early; and all males except those strong, vigorous, and of a pure type desired for breeding.

DESTROY POISON IVY IN FALL AND SPRING

Exercise Proper Care While Working on Plants.

For Killing Vines on Fence Posts and Trees Cut Plant Below Surface and Then Saturate Soil With Strong Salt Brine.

The work of eradicating poison ivy or poison sumac may be undertaken in the late fall or early spring with the least danger of poisoning. It is usually possible to find persons who are not easily poisoned by ivy or sumac who can be employed to remove the plants, but with the exercise of proper care almost anyone may undertake the work without incurring injury.

Overalls and heavy gauntleted gloves should be worn for protection while engaged in the work. Care should be taken in handling shoes and all articles of clothing that have come in contact with the plants, as the poison adheres to them and may make them a possible source of harm for an indefinite period.

The parts of the plants above ground are readily killed by spraying with strong brine (3 pounds of salt to a gallon of water), but additional sprayings are necessary to kill the new shoots that arise from the root-stocks. A better method, especially for killing vines on fence posts and on trees, is to cut the poison ivy below the ground and then saturate the soil around the cut bases of the plants with salt brine.

Valuable eradication hints," as well as much information concerning the plants and the treatment for their poison, are contained in Farmers' Bulletin 1166, copies of which may be had upon request of the United States department of agriculture, Washington, D. C.

MARKET REPORTER IS BIG SAVING MEDIUM

New Jersey Farmers' Exchange Is $2,000 Ahead.

Manager of Association Says Information in Article Discussing Cottonseed Meal Situation Was Responsible.

A saving of $2,000 in the purchase of ten cars of cottonseed meal was realized recently by a New Jersey farmers' exchange as a result of an article in the Market Reporter, published by the bureau of markets of the United States department of agriculture. The manager wrote that the information in the article which discussed the cottonseed-meal situation, caused him to delay placing an order for his association, with the result noted. The letter is typical of many received by the bureau.

The Market Reporter, issued weekly, and sent free on application, reports market conditions with regard to live stock and meats, poultry and dairy products, fruits, vegetables, peanuts, cotton, wool, grain, seeds, hay and feeds; the prices paid at representative markets and the volume of stocks being moved. The information on these various products is obtained from authoritative sources by means of direct representatives at large market centers, and through the co-operation of some 474 railroads whose superintendents make daily reports to the bureau as to carload lots of certain kinds of produce loading and in transit.

MEASURING PRICES OF HOGS

Form of Applied Mathematics Used by Department of Agriculture in Keeping Records.

Measuring the prices of a hog in bushels of corn, instead of in dollars, is a form of applied mathematics used by the United States department of agriculture in keeping tab on prices of farm products. Theoretically 100 pounds of live hogs should be worth about 13 bushels of corn. The rate varies. It is generally highest in the corn belt and lowest in New England, the far South, and the far West. At the present time the ratio is unusually narrow—that is, 100 pounds of hogs is not worth as many bushels of corn as usual. The department draws the inference that during the next 12 months hogs will advance more than corn or corn will decline more than hogs.

GENERAL FARM NOTES

Why not grow more alfalfa?

* * *

Tile drainage is needed on many fields.

* * *

Careful preparation of the seedbed for sorghum pays.

* * *

Save the best for seed—not the tag ends of the season.

* * *

Grass should be allowed to cure partly before it is shocked.

There are less than 90,000 motor-trucks on America's 6,000,000 farms.

DAIRY FACTS

AMPLE COLD STORAGE SPACE

Survey Shows That 160 Warehouses Have Room for 190,000,000 Pounds of Butter.

The bureau of markets, United States department of agriculture, has just completed a survey of the space available for the storage of butter in the cold storages throughout the United States for the present season.

Reports have been received from approximately 160 warehouses. They show that during the month of June they had space available for the carrying of 141,700,000 pounds, and that during July they expected to have additional space sufficient to store 49,700,000 pounds. Of this amount, space

Butter in Cold Storage—There Is Evidently a Surplus Space in Warehouses This Year.

sufficient for the storage of 15,800,000 pounds had been contracted for before June 15.

During the month of June, in 1919, these same warehouses increased their holdings by 45,500,000 pounds and during July by 27,000,000 pounds, and their total holdings on August 1 were 95,200,000 pounds. The total holdings reported from all warehouses on September 1, 1919, amounted to a little more than 131,000,000 and the holdings of that date were the largest on record.

As 160 warehouses have sufficient space this year for the storage of more than 190,000,000 pounds, there will evidently be quite a surplus of space.

SELECTION OF DAIRY BULLS

Look for Heavy Production in Ancestors—Conformation of Hind Quarters Good Index.

As a large number of cows will be bred during the winter months, many farmers will be interested at this time in the purchase of a herd sire. Unfortunately, there seems to be a sort of prejudice against the mature bull. No sooner has he attained an age sufficient to demonstrate his value as a sire, than he is handed over to the butcher and his place is taken by a young animal of unknown quality.

There are several good reasons why this practice should not be followed. In the first place the progeny is apt to lack vigor. Further a frequent changing of sires is likely to produce a lack of uniformity in type and distinctive peculiarities that should characterize the good dairy herd. Against this, it is sometimes urged that old bulls become vicious and hard to handle. Doubtless, there are occasional grounds for this objection. In most cases, however, this might be overcome by allowing the animal plenty of exercise.

AVERAGE VALUE OF HEIFERS

Those Sired by Purebred Bull Worth Considerably More Than Those by Inferior Sires.

The heifers sired by a purebred dairy bull are worth considerably more than those sired by a grade or scrub bull. Some definite figures on this subject have been obtained by the University of Illinois in a dairy survey made on 577 farms in 1912. It was found that the average cash value of all the heifers sired by a purebred bull was $41, while those sired by a grade bull was $32, and those sired by a scrub bull only $30. On the other hand, the average value of the purebred bulls used was $82 and the average value of the scrub and grade bulls was $43.

The increased value of only four heifers sired by a purebred bull paid the difference in value of a scrub bull and a purebred bull.—E. M. Clark, Illinois College of Agriculture.

COWS REQUIRE FRESH WATER

Low Milk Flow Will Result if Animals Are Compelled to Drink From Polluted Ponds.

Good water should be provided at all times. Cows should not be forced to drink stale and polluted water from ponds and marshes. When this is the case their demands are not supplied and a low milk flow will be the result, according to R. W. Clark of the Colorado Agriculture college.

Eighty-seven per cent of milk is water and a cow giving five gallons of milk a day would require about thirty-five pounds of water for it alone, besides a larger amount for the other requirements of the body.

Water should be accessible at all times.

AIMS TO REACH 10

A Pittsburgher, Who Caused a Sensation, Tells of Rea

ANCIENT TONIC HIS SECRET

Hundreds of Thousands of Families Found Health and Happines Following His Instructions.

Six years ago H. H. Von Schlick could be seen any day visiting prominent Pittsburgh business men in their downtown offices. He carried a satchel, and his arrival was always greeted by a smile indicating welcome. These men were his customers. They drank at his "fountain of youth." They accredit him with a new lease of life and the healthy condition of their families.

Von Schlick has bright eyes and his cheeks indicate that pure red blood flows through his veins. He says he was younger at fifty than he was at thirty-five. He has never had a sick spell or any of the symptoms of the ailments which afflicted him before he began using a tea, the ingredients of which were conveyed to him by an old Bulgarian 20 years ago. Von Schlick makes this statement:

"I was recovering from the grippe, was run down, and a dizzy feeling in the head, and felt like the victim of the hook-worm. This old Bulgarian knew of my sickness and while in the office suggested, 'I give you something to make you feel better.' He returned next day with a package and told me to use one teaspoonful in a cup of hot water, and to repeat the dose once each night for a little while. He promised I would never be troubled from sickness again. I followed the prescription, skeptical, of course, and one day later I was seeking that old man to secure from him the ingredients of that tonic.

ONE HUNDRED YEARS YOUNG.

"He explained to me that in Bulgaria the older families regarded this tonic as the great disease preventative and health restorer; that it was handed down from generation to generation. At the first symptom of any sickness the mother or women of the family made the tea for all members. It is a well-known fact that Bulgarians are the oldest and healthiest people in the world.

"In Bulgaria and the Balkan countries of Eastern Europe, in spite of poor sanitary conditions, among 1,000,000 inhabitants there are 1,600 over 100 years old. In France there is only one person in 1,000,000 over 100 years old, and in Germany only one person 1,150,000. It is a rare news item in the United States when a man dies after reaching the century mark.

"My Bulgarian friend informed me that his progenitors reached this time of life and that they all had a healthy and happy old age. Asked for a reason he pointed to his tonic. A using this tonic for 15 years I ready to guarantee to the world it is the best prescription for he existing.

"Every member of my family ta one dose each week, my relatives use it, my friends and neighbors h been keeping health by reason o and hundreds of thousands of pe in this city, all sensible and w known, consider I have done them everlasting favor by convincing th of its merits.

"During all the terrible influe epidemic Bulgarian Blood Tea w used by countless thousands of s ferers with marvelous success and s lions of people took it steaming to prevent and ward off the disease

A 15-YEAR TEST.

"After 15 years of experience I positive that it will prevent sickne It will restore your health by eli nating the poisons. It will regul disorders of the digestive organs will increase poor circulation. It restore vitality, energy or streng It will make your brain respo splendidly to the strain of mod business. It will give you a health youthful complexion. It will prolo your life and, with proper diet, y should live to a ripe old age."

Bulgarian Blood Tea today is us by millions of people in every sta in the Union fighting off disease a old age weaknesses. They inclu happy girls budding into womanho or women crossing precarious three olds of life. All praise and recom mend it. Men regain strength an vitality, the blood becomes rich an pure and the fire and vim of robu health returns to those who were despair.

Bulgarian Blood Tea is guarantee to contain just pure herbs of marve ous medicinal and curative pow gathered from fields, mountains an valleys of Europe, Asia and Afric All drug stores now keep Bulgaria Blood Tea in stock, but, owing to th enormous demand immediate applic tion to your druggist is urgent on ac count of the limited source of supply Distributors of Bulgarian Blood Te are authorized to return the full pur chase price if it does not materiall improve your health in three weeks time. This evidence of faith in th power of Bulgarian Blood Tea is th guarantee of the Marvel Product Company, Marvel Building, Pitts burgh, who authorize this public an nouncement.—Adv.

Many a Pretty Face Spoiled by Pimples

Not only are these pimples and splotches disfiguring, but they lead to serious skin diseases that spread and cause the most discomforting irritation and pain. Sometimes they foretell Eczema, boils, blisters, scaly eruptions and other annoyances that burn like flames of fire, and make you feel that your skin is ablaze.

If you are afflicted with this form of skin disease do not expect to be cured by lotions, ointments, salves and other local remedies, as they can not possibly reach the source of the trouble, which is in the blood. Begin taking S.S.S. today, and write a complete history of your case to our chief medical adviser who will give you special instructions, without charge. Write at once to Medical Director, 152 Swift Laboratory, Atlanta, Ga.

MILK AND MEAT AS RIVALS

Rising Prices May Yet Force People to Turn to the Fluid to Sustain Life.

As the price of meat soars upward, many people are forced to be part-time vegetarians. Thus the old question, "Is meat essential to human well-being?" arises again. The committee on food and nutrition of the National Reserach council has issued an interesting report on the relative value of meat and milk.

Eighteen per cent of the protein and energy of grain used in feeding a cow goes into the milk, and is therefore recovered for human consumption; whereas only 3½ per cent is recovered in beef. As for the mineral elements in hay and grain, not much is stored in the tissues, but a great amount goes into milk.

Beef profiteers, beware! The hard-pressed public may decide to let milk take the place of beefsteak.—Popular Science Monthly.

Few angels boast of the attention shown them when they are entertained unawares.

OLD SORES, PILES AND ECZEMA VANISH

Good, Old, Reliable Peterson's Ointment a Favorite Remedy.

"Had 51 ulcers on my legs. Doctors wanted to cut off leg. Peterson's Ointment cured me."—Wm. J. Nichos, 40 Wilder Street, Rochester, N. Y.

Get a large box for 60 cents at any druggist, says Peterson, of Buffalo, N. Y., and money back if it isn't the best you ever used. Always keep Peterson's Ointment in the house. Fine for burns, scalds, bruises, sunburn, and the surest remedy for itching eczema and piles the world has ever known.

MODIFY CATTLE RULES ON "T. B."

That Shippers May Understand Restrictions Regulation Has Been Clarified.

TEST EMIGRANT SHIPMENTS

Registration of Temperatures Discontinued at Eighteenth Hour After Injection of Tuberculin—Heifers on Same Basis.

Modifications in the restrictions on interstate shipment of cattle imposed for the prevention of the spread of cattle tuberculosis are announced by the bureau of animal industry of the United States department of agriculture. In order that live stock shippers may more readily understand the restrictions, the entire regulation has been redrafted and the language clarified.

One of the modifications is for the aid of emigrants who live in sparsely settled sections of the country where it would be very expensive to have their cattle tested before moving them to another state. Such shipments usually do not pass through public stockyards, and veterinarians are not always available in such sections. The new regulation, therefore, permits emigrant shipments to be tested en route or at the destination. Permission to do so, however, must first be received from the bureau inspector in charge of tuberculosis eradication work in the state of destination, or from the proper state official.

Data gathered from the various state and bureau field workers, it is said, clearly indicate that the tuberculosis test can be shortened two hours without interfering with its efficiency. A modification, therefore, was made permitting the registering of temperatures to be discontinued at the eighteenth hour after the injection of tuberculin instead of the twentieth hour.

Time Limit Removed.

It was found advisable, too, to remove the time limit in which purebred

Jersey Cow With All Markings of a Good Milk Producer.

tuberculous cattle may be returned to their original owners. The present regulations require them to be reshipped within four months. The redrafted regulation places heifers on the same basis as all other female cattle subject to the test.

WEEVILS AND OTHER INSECTS

Little Pests May Be Kept Out of Seeds by Use of Carbon Bisulfide —How to Treat Them.

Weevils and other insects may be kept out of seeds by the use of carbon bisulfide. Seeds should be treated once as soon as the planting season is over, which will protect them from weevil during the summer. The second treatment should be given in the fall before cold weather comes on. To treat seeds with carbon bisulfide, put them in a jar, tub or other vessel which can be covered tightly. Put in about one tablespoonful of carbon bisulfide for every 10 gallons of space in the enclosure. Allow the seeds to remain in the fumes of the carbon bisulfide over night, then take them out and place again in dry storage quarters.

PUTTING ALFALFA INTO SILO

Good Results Have Been Obtained Where Rain Interferes With Making Hay.

In sections where rain interferes with alfalfa hay making, good results have been obtained by putting the alfalfa in the silo. The most favorable reports state that the alfalfa should be in full bloom or fairly well matured before cutting for silage. It should be cut when the dew is on or wet from rain and hurried to the silo. Cut in short lengths, the finer the better, as it packs more firmly and keeps with less waste. When put into the silo before it becomes sufficiently mature, alfalfa makes a very sour silage and has a disagreeable odor. First crop alfalfa is preferred by most of the men who have tried alfalfa silage.

CULLING IS CONTINUOUS JOB

Breeder Who Waits Until Fall to Dispose of Poor Specimens Will Lose Money.

The hen in good health and laying condition is a veritable high-speed, heavy-duty dynamo, and requires special facilities and special conditions in which to live and do her best. She needs an abundance of fresh air and exercise to aid digestion, purify the blood and keep her healthy and productive. She must have a comfortable home.

BEST TIME TO BEGIN WITH POULTRY FLOCK

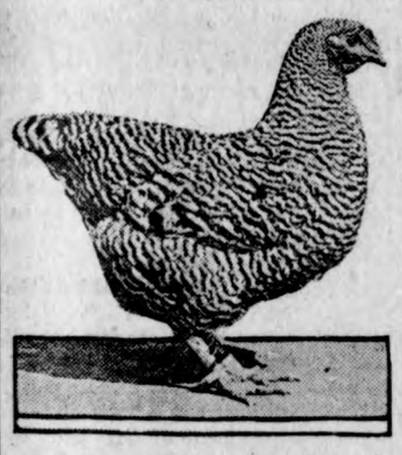
Pullets Are to Be Preferred When Obtainable.

Fowls Selected Should Be Well Matured So They Will Begin Producing Eggs Before Severe Winter Weather Sets In.

Beginnings in poultry raising may be made at any time of the year, but the fall is perhaps the best time for small poultry keepers to make their start. Obtain pullets whenever possible rather than older hens, say experts of the United States department of agriculture. The pullets selected should be well matured so they will lay before cold weather sets in.

Here are the signs of maturity in pullets: Red color of the comb, and size and growth which are creditable for the breed or variety raised. Mature hens lay few eggs, if any, during the fall and early winter, while they are molting. Well-matured pullets, on the other hand, should lay fairly well and give an immediate return on the investment.

When pullets are to be purchased it is desirable to go to some farmer



Well-Matured Barred Plymouth Rock Pullet.

or poultryman of known dependability. Even if delivery of the birds is not desired for several weeks or months, it may pay to make arrangements for obtaining the desired number of pullets later at an agreed price.

GOOD SUBSTITUTES FOR HAY

Corn Fodder Can Be Made Most Satisfactory Roughage Feed for Farm Animals.

The short hay crop this year in certain localities will make the hay sell at a high price in those places. This situation has brought many men to the question of what is to be done for feed. The answer to this problem can be found without going off the farm, in many cases. A great deal of good feed blows to the wind every year in our cornfields. Corn fodder can be made one of the very satisfactory feeds for use with cattle and roughage for other animals. Corn fodder, if it is to be made into a good feed, should be handled as carefully as other feeds. It should be cut when the kernels are glazed and before a killing frost. Shocks should be of a medium size and well tied, so that the feed will be properly preserved. Oat straw, where it is not rusted, makes a very good feed for the wintering of horses. Straw or corn stover will not take the place of clover or alfalfa hay for feeding dairy cattle or in the fattening of other animals, but with stock which is being roughed through, it can be used very satisfactorily.

TO PREVENT GARLIC FLAVOR

Where Found in Small Patches Fence Off and Pasture Grass to Sheep or Other Animals.

Garlic flavor in milk may be prevented by keeping the cows away from the garlic or wild onions. If they are found only in small spots of the pasture they may frequently be fenced off and the grass pastured by young stock, sheep or horses. But if the garlic is pretty well distributed the objectionable flavor can be reduced to a minimum by taking the cows from the pasture at least four hours before milking. At noon put them in the barn or in a pasture free from garlic.

LATE CHICKS REQUIRE CARE

Plentiful Supply of Sour Milk Helps to Produce Rapid Growth—Furnish Dry Mash.

The late hatched chicks can seldom be made as profitable as early hatched stock, but the handicap of age can be partially made up by good care. Chicks that are hatched during hot weather must have shade provided for them. Plenty of sour milk helps to produce a rapid, vigorous growth. It pays to keep a dry mash before them at all times and have the hopper wide enough so that the most vigorous chicks will not crowd the chicks away.

SUCCESS IN TURKEY RAISING

One of Most Important Factors Is Proper Selection of Fowls for Breeding Purpose.

One of the most important steps toward success in turkey raising is the proper selection of breeding stock. Birds for breeding should be selected for vigor, size, shape, strong bone, early maturity, and color of plumage.

Thousands of Women

Owe Their Health To

Lydia E. Pinkham's Vegetable Compound — overshadowing indeed is the success of this great medicine. Compared with it, all other medicines for women's ills seem to be experiments.

Why is it so successful? Simply because of its sterling worth. For over forty years it has had no equal. Women for two generations have depended upon it with confidence.

Thousands of Their Letters are on our files, which prove these statements to be facts, not mere boasting.

Here Are Two Sample Letters:

Mother and Daughter Helped.

Middleburg, Pa. — "I am glad to state that Lydia E. Pinkham's Vegetable Compound did me much good when I was 35 years old. I was run down with female trouble and was not able to do anything, could not walk for a year and could not work. I had treatment from a physician but did not gain. I read in the papers and books about Lydia E. Pinkham's Vegetable Compound and decided to try it. The first few bottles gave me relief and I kept on using it until I got better and was able to do my work. The Vegetable Compound also regulated my daughter when she was 15 years old. I can recommend Vegetable Compound as the best medicine I have ever used." — Mrs. W. YERGER, R. 3, Box 21, Middleburg, Pa.

Fall River, Mass. — "Three years ago I gave birth to a little girl and after she was born I did not pick up well. I doctored for two months and my condition remained the same. One day one of your little books was left at my door and my husband suggested that I try a bottle of Lydia E. Pinkham's Vegetable Compound. I started it immediately and I felt better and could eat better after the first bottle, and I continued taking it for some time. Last year I gave birth to a baby boy and had a much easier time as I took the Vegetable Compound for four months before baby came. On getting up I had no pains like I had before, and no dizziness, and in two weeks felt about as well as ever." — Mrs. THOMAS WILKINSON, 363 Columbia Street, Fall River, Mass.

Wise Is the Woman Who Insists Upon Having

Bocker—Put all your eggs in one basket and watch the hen.

"Pape's Diapepsin" for Indigestion

"Pape's Diapepsin" is the quickest, surest relief for Indigestion, Gases, Flatulence, Heartburn, Sourness, Fermentation or Stomach Distress caused by acidity. A few tablets give almost immediate stomach relief and shortly the stomach is corrected so you can eat favorite foods without fear. Large case costs only 60 cents at drug store. Absolutely harmless and pleasant. Millions helped annually. Best stomach corrective known.—Adv.

PROVED TRUE TO HER WORD

Hair Autoist ad Said She Would Be Back Promptly, and It Was Even More So.

On one of my first excursions in our new car, writes a correspondent. I stopped at the grocery with my car parked with the back toward the store door. I gave my order and told the clerk that I would be back to get my things in a very few minutes.

As I stepped into the car, my best "beau" came down the street, and anxious to show him how well I could drive, I hurriedly threw into gear. Raced the engine and let the clutch out to get a quick pickup.

It proved to be a wonderful one, as I had thrown into reverse and found myself in the doorway of the grocery store. I had gone over the curbing and all, breaking the window as I bumped into the store.

The grocer hurried out, and when he saw who it was, "Well," he said, "you have proved yourself a woman of your word, but it will cost you the price of a new show window."

Willing to Oblige.

"So you were in the service?" ejaculated the prospective father-in-law of the bashful aspirant to his daughter's hand. "Carry any scars?"

"No, sir," replied the would-be bridegroom, "but I've got a pack of cigarettes if you'd care to try one."—American Legion Weekly.

COULDN'T TAKE HER IN CUP

"Honey" Was What the Youngster Was After, but Not in Quite Such a Generous Quantity.

Tommy Brown had not studied penmanism and his brain was like a sieve. When his mother told him to take a cup to the grocer's and get it filled with honey he heard what she said; but when he got to the grocer's he forgot what he had come for.

The grocer named one article after another in the good-natured attempt to refresh his memory, but all to no avail. Then he turned to his plump wife and said:

"Honey, can you think what it might be?"

"That's it; that's it!" cried the boy, excitedly. "Honey! But, look here," he added, eyeing the buxom lady, "you'd better put her on my back and let me take her that way, for the cup wouldn't hold her."

To Be Relied On.

"Hiram," said Mrs. Corntossel, "do you think that political speaker will make an effort to reduce the high cost of living?"

"You mean the one who stopped here for dinner?"

"Yes."

"You can depend on him to give the subject earnest consideration. A man with an appetite like his can't help takin' a personal interest."

Unbiased.

She hadn't been particularly interested in the fight for woman suffrage through the years of her useful life, but had devoted herself loyally to domestic pursuits in the service of her employer. However, when informed that women were to have full rights to vote, she announced:

"Well! I'm going to read up on all the men who are trying to be elected and find out all about 'em and who's the best man before I vote for him—but it ain't goin' to be no Republican."—Indianapolis News.

Pitfalls of Slang.

Those well-intentioned leagues and clubs which are always talking about the unity of the English-speaking races, the bond of a common language and the rest are a delusion and a snare. There is no common language between the peoples; it is the very specious resemblance which makes the gap. Kipling well described the American in London who "heard men talking a tongue superficially like his own, which on inquiry turned out to be something quite different." An American says: "I've got you," meaning "I understand." The Englishman thinks he has been discovered in some heinous deception. The language resemblance is in fact a bar rather than a bond.—London Express.

ASPIRIN

Name "Bayer" on Genuine

"Bayer Tablets of Aspirin" is genuine Aspirin proved safe by millions and prescribed by physicians for over twenty years. Accept only an unbroken "Bayer package" which contains proper directions to relieve Headache, Toothache, Earache, Neuralgia, Rheumatism, Colds and Pain. Handy tin boxes of 12 tablets cost few cents. Druggists also sell larger "Bayer packages." Aspirin is trade mark Bayer Manufacture Monaceticacidester of Salicylicacid.—Adv.

Tip They Deserve Sometimes.

Headline — "Man in Restaurant Knocked Down Head Waiter." This, the waiter himself will probably admit, is carrying the tipping system a little too far.—Boston Transcript.

Catarrh Can Be Cured

Catarrh is a local disease greatly influenced by constitutional conditions. It therefore, requires constitutional treatment. HALL'S CATARRH MEDICINE is taken internally and acts through the Blood on the Mucous Surfaces of the System. HALL'S CATARRH MEDICINE destroys the foundation of the disease, gives the patient strength by improving the general health and assists nature in doing its work.

All Druggists. Circulars free.

Installment Stuff.

"Been visiting the Newcombes, eh?" Is their furniture antique?"

"No; on tick, I fancy."

After locking your family skeleton in your chest hide the key where your neighbors can't find it.

Freed From Torture

Eatonic Cleared His Up-Set Stomach

"The people who have seen me suffer tortures from neuralgia brought on by an up-set stomach now see me perfectly sound and well—absolutely due to Eatonic," writes R. Long.

Profit by Mr. Long's experience, keep your stomach in healthy condition, fresh and cool, and avoid the ailments that come from an acid condition. Eatonic brings relief by taking up and carrying out the excess acidity and gases—does it quickly. Take an Eatonic after eating and see how wonderfully it helps you. Big box costs only a trifle with your druggist's guarantee.

HELP WANTED

We require the services of an ambitious person to do some special advertising work right in your own locality. The work is pleasant and dignified. Pay is exceptionally large. No previous experience is required, as all that is necessary is a willingness on your part to carry out our instructions.

If you are at present employed, we can use your spare time in a way that will not interfere with your present employment—yet pay you well for your time.

If you are making less than $150 a month, the offer I am going to make will appeal to you. Your spare time will pay you well—your full time will bring you in a handsome income.

It costs nothing to investigate. Write me today and I will send you full particulars by return mail and place before you the facts so that you can decide for yourself.

Local News!

John Griewe, of Garner, was a Klemme visitor last Saturday.

Mrs. Helen Hansen, of Wesley, was a visitor in Klemme Saturday.

Frank Carperter was fixing up the hotel the fore part of the week.

Mrs. Walters spent Sunday at the Wiles home. She now lives at Des Moines.

R. A. Jorgenson was a business visitor at the county seat town last Thursday.

Mrs. Luick and daughter, Marion, were Klemme visitors a couple of days the fore part of the week.

Miss Edna Katter of Garner, was calling on Klemme friends last Thursday.

Mrs. Lou Wesenberg and Mrs. Tom Burgess, of Goodell were Klemme visitors last Saturday.

Mr. and Mrs. J. N. Sprole of Garner were in Klemme last Friday on business and calling on friends.

Miss Ebert went to Charles City Friday and returned Saturday evening.

Rev. A. H. Meyer returned Friday morning from his trip to Prairie Du Chien, Wis., where he went to take treatments.

The Klemme High School ball team defeated the Ventura High School team last Friday afternoon at the Klemme ball diamond.

It is reportedt hat a baby girl has arrived at the home of Mr. and Mrs. Emil Bloomer, residing in Liberty township.

Mr. and Mrs. Hod Lawhorn were down from Garner Saturday evening.

Bert Mathews spent Sunday at Garner with friends.

Mr. and Mrs. George Musfelt, of Clarion, were visitors at the Fred Musfelt home Sunday. Oscar and Geoge are running a cigar store at Clarion and are doing well.

Wert Loger returned last Thursday from his two months trip in Wisconsin. Wert went there seeking relief from his hay fever trouble, the climate there being beneficial to sufferers of hay fever.

A big party and dance was given at the Pete Merkel place east of town Saturday night at which a big crowd was in attendance. The event was in honor of the "newlyweds" who came home after a honeymoon trip. Everybody reports a fine time.

A number of Klemme people took advantage of the beautiful day Sunday by going nuting. There are a number of walnut and butternut groves near Goodell and over toward Kanawha.

Laundry leaves Wednesday noon, back Saturday evening. G. P. McCullough, agent for Johnson at Albert Lea. 5-tf

IS SHORT ON FINGERS NOW

If you should ask Will Stille to unt his fingers now he would count to nine, pause a moment and then "nine and a half." The reason for e half of the missing finger is be- use "Bill" had been helping out in e meat market and perhaps got a tle reckless with his hands and got e finger caught in one of the ma- ines. This happened Saturday but is getting along quite well now.

FIRST SALE HERE THIS YEAR

Clark Bredbenner held a successful le in Klemme Saturday which was ell attended and the bidding was ely. The main attraction of his le was the oeriniff of about one undred and twenty-five shoats. lark had his sale well advertised and n two good sized ads in the Times or two weeks. It was the first sale ld in or near Klemme thi year. uctioneers Young & Reemstma cried e sale.

ANNUAL ELECTION

The Woman's Foreign Missionary Socieyt of the Methodist Episcopal church held their September meeting with Mrs. H. J. Bailey. Reports of the year's work were heard, showing gratifying gains in membership and progress in the work of the society. Nearly $100 were raised by this auxiliary during the year, $91 of which was forwarded to the general society for the world wide work. Light refrsehments served by the hostess added to the pleasure of the meeting and the society faces the work of the new year with courage and enthusiasm.

The fololwing officers and committees were chosen for the current year:

President, Mrs. A. D. Gimer.

Vice-president, Mrs. W. F. Missman

Recording secretary, Mrs. H. J. Bailey.

Corresponding secretary, Mrs. R. W. Elder.

Treasurer, Mrs. J. E. Baumgartner.

Press reporter, Ms. A. E. Buriff.

Mite box secretary, Mrs. E. G. Ell.

Literature secretary, Mrs. C. N. Gram.

Tithing secretary, Mrs. T. C. Nelson.

Program Committee; Mrs. Gimer, Mrs. Buriff, Mrs. Missman.

Mr. and Mrs. E. S. D. Kahrs returned from their Minneapolis trip last week Wednesday. Mr. Ludwig, who took charge of their store during their absence, returned to his home at Nevada the same evening.

Interesting Items About The Klemme School

Miss Sulivan, primary teacher, spent the week end with friends in Mason City.

Miss Ebert spent Sunday with Charles City relatives and friends.

The Sophomore Class organized and appointed their officers Monday. They are Howard Wiles, President; Pearl Johnson, Vive-president; Dolores Koerner, Sec. and Treas.

Klemme Defeats Meservey. Last Friday afternon our boys drove to Meservey to play a base ball game. It was a very exciting game and one which was very hard to play. The Meservey players were all so short that it was impossible to pitch them a strike. However we beat them, 24-19. Meservey will play here Friday, Oct. 22, and we hope to beat them again.

Friday, Oct. 15, the baseball team goes to Ventura. We hope to win.

The High School has organized a "Pep Club" and have been "raising the roof" with their new yells. They find that it helps our boys to win, as they haven't been defeated yet this year.

Miss Belken has organized a Glee Club with a membership of fifty. She hopes to be able to furnish some good music through this organization.

The six weeks, or term tests, were given last week. The reports are out today (Monday) and the school seems to be doing very good work.

Last Tuesday evening was an event of great interest to the seventh and eighth grades and High school. The students met at the High School and went in cars to the beautiful woods near Goodell for a picnic. A huge fire was built and a jolly good time was enjoyed by all.

Fred Arnold was ill Monday.

The Soph Class is laboring with oral themes this week.

Mrs. Gibb's school children enjoyed a picnic supper Thursday evening.

Supt. Collins, Misses Ebert, Sullivan and Belken went to Mason City Wednesday evening to see Fisk O'-Hara in "Springtime in Mayo".

Miss Belken attended the wedding of a college chum in Iowa Falls Thursday.

The Juniors are studying Bacons Essays this week.

"To be or not to be" efficient in Algebra is a question which is bothering many of our high school students.

Otto Jass played second base with the High School team Friday.

The play ground equipment has arrived and will soon be set up. The children are delighted.

DESERVES PLACE IN HISTORY

Cecrops, Illustrious Egyptian, Made Country an Asylum for the Innocent and Persecuted.

With the dawn of Attic civilization in ancient Greece, Cecrops, an Egyptian, built a town on the site where later the citadel of Athens rose in magnificence. He introduced morals and judicial regulations, and the country under his rule became an asylum for the innocent and persecuted. From that time on festivals, compacts and laws extended their beneficial influence. About 130 years after him the Phoenician Cadmus brought the use of letters into Boeotia; and at Thebes, in the same country, he erected a citadel. The greatest lyric poet and the greatest general of the Greeks were Boeotians, but nevertheless this people was accused of stupidity. While their value was not appreciated, their discoveries were brought to perfection by others and more usefully applied.

It is remarkable that Cadmus, the father of learning, who taught us to hand down our thoughts to futurity, came into Greece just at a time when Joshua, the leader of the Jews, drove the Phoenecian tribes toward the sea and compelled them to seek refuge in distant colonies. This act of a despised people, scarcely known to Greek historians, was the occasional cause of all the intellectual and moral excellence which has arisen through the influence of literature.

ON THE WINGS OF THE WIND

Nothing So Small That the Zephyrs Shall Not Find It and Spread It Beneficially.

Acres of perfume come on the wind from the black and white of the beanfield; the firs fill the air by the copse with perfume. I know nothing to which the wind has not some happy use. Is there a grain of dust so small the wind shall not find it out? Ground in the mill-wheel of the centuries, the iron of the distant mountain floats like gossamer, and is drunk up as dew. * * * A thousand miles of cloud go by from morn till night, passing overhead without a sound; the immense packs, a mile square, succeed to each other, side by side, laid parallel, book shape, coming up from the horizon and widening as they approach. From morn till night the silent footfalls of the ponderous vapors travel overhead, no sound, no creaking of the wheels and rattling of the chains; it is calm at the earth, but the wind labors without an effort above, with such ease, with such power. Gray smoke hangs on the hillside where the couch-heaps are piled, a cumulus of smoke; the wind comes, and it draws its length along like the genii from the earthen pot; there leaps up a red flame shaking its head; it shines in the bright sunlight; you can see it across the valley.—Richard Jefferies.

MAN'S FIRST DWELLING PLACE

Scientists Claim That the Desert of Gobi Must for Natural Reasons Be the Spot.

The desert of Gobi, which is the summit of the central steppe in Asia, is the most elevated region on the globe, and it is here, scientists claim, man first lived, arguing that this point of earth must have been the first to emerge from the universal sea, and that as the subsiding waters gradually gave up lower regions of earth to man he was able to descend and spread himself progressively over new acquisitions.

It is from this region that the great rivers of Asia also take their rise and flow toward the four cardinal points. On the declivities of these highlands are the plains of Tibet, lower than the frozen regions of Gobi. Here are found not only the vine, the olive, rice, the legumina, and other plants on which man has depended for sustenance, but also those animals which he has tamed and led with him over the earth, as the ox, the horse, the ass, the sheep, the goat, the camel, the hog, the dog, and even the reindeer, run wild upon these mountains. On the mountains of Cashmire, in Tibet, and in the north of China, grain has been found to be growing wild for years without ever being sown or tilled, and here also wild animals that have lived there while man has tamed others of the same species, are numerous.—Exchange.

Nature's Unchanging Way.

Outstanding ability is the reward of using the power one has. The best athlete in the world will lose power by hanging around. Resistance is the response of nature to testings. Difficulties are never made easy by giving up. Nature demands that men gain strength by using strength. Turn what you have to account and nature will add to your store with interest. The more you love the larger capacity you have to love. The more you think the keener your thinking ability becomes. The harder and more sanely you work the more you are able to. There's no secret about it. It's just nature's way of saying "to him that hath shall be given." And more than that, if you want anything from nature you must bestir yourself and get it. Nature is not a grudging giver, but she makes men earn all they get.

DISTRICT AND QUARTERLY CONFERENCE HELD AT GARNER

Rev. A. H. Meyer, accompanied by Emil Bier and John Gruetzmacher, attended the District and Quarterly Conference of the Methodist Church held at Garner Monday. The morning was devoted to the District Conference and in the afternoon the Quartrly Conference was held. Rev. Brenner of Sioux City presided at both meetings.

IT WAS A FINE SHOW

Those who did not go to the Hawaiian Entertainment at the Idle Hour Theatre last Friday evening lost out on the best musical entertainment which ever played in Klemme. Every member of the company was an expert on the Hawaiian stringed instrument as well as being a very good singer. They certainly gave people their money's worth and were full of snap and pep all the way thru the entertainment and there was not an idle or dull moment. Manager Pavey had the house filled, a large number stood up in the rear of the hall and a great many were turned away and so did not see the entertainment. It was certainly a packed house and all enjoyd them usic given by the Hawaiians.

KLEMME FARMERS BUILD

Peter Josten is building a fine new house on his farm east of Klemme which will make living more comfortable on that already fine farm.

Wm. Becker is putting up a fine barn on his place east of Klemme which will greatly add to the attractiveness of his place.

THAT BALL GAME SUNDAY

Woden came over to Klemme Sunday and beat our ball team something awful. But we pity those poor Woden boys for they must have run themselves almost to death piling up the scores as they did and we haven't the heart to publish the result of that game. Evn at that both teams played punk ball for some reason or other, the Klemme boys just couldn' get started and those Woden boys simply couldn't get stopped either.

Big Fire Damages Property At Ventura

Thousands Of Dollars Worth Of Property Goes Up In Flames Large Oil Tanks Explode

A big fire started at Ventura on Monday atfernoon about three o'clock which caused a loss of thousands of dollars worth of property.

There are several reports out as to the cause of the fire. The most logical seems to be that a barn caught fire near the Mason City Oil & Grease Company's big oil tanks near the Farmers' Elevator Co. The flames from the barn ignited the one tank containing gasoline which exploded and caught the elevator near by. The Clear Lake fire department were called into service and it was with their help that the fire was checked. They pumped water from the lake and threw a steady stream of water on the nearby buildings and so held the fire from consuming the entire town.

Several car loads of people went over from here and they report that the two tanks of oil, the property of the Mason City Oil & Grease Co., both blew up and were destroyed, the Farmers' Elevator full of grain was burned to the ground, a blacksmith shop and a few smaller buildings were also burned. The second oil tank containing kerosine did not explode until about seven o'clock in the evening but when it did explode the flash shot up in the air for several hundred feet and the flash was plainly visible in Klemme.

It is quite a loss for the little town of eVntura and especially was the loss felt by the Farmers' Elevator Co., as they lost their entire holdings—buildings, equipment and all the grain.

FARMERS HAVE CREAMERY MEETING

The Stock Holders of the Klemme Creamery Co. held their annual meeting at the Idle Hour Theatre Saturday afternoon. The various officers gave their reports and the Secretary's report will be found elsewhere in this issue. The members re-elected all of the old officers and said it was not necessary to elect new ones as the old officers had done excellent work the past year. On account of the late hour in the afternoon at which the meeting closed, the farmers elevator question was not brought before the house.

Sight Seeing Beautiful Land of Sunshine

AUGUST BARZ TELLS OF HIS WESTERN TRIP

Mr. August Barz is back from his western trip and was in our office Saturday and told us some of his experiences. We will give a short description each week for a time of what he saw of the sights of the west, especially California, and about the agricultural conditions there.

Mr. Barz and Mr. Fred Haupt left Klemme on July 19 and headed for Denver, Colorado. Here they stopped a day or two and took in the sights. They then started for Sacramento, California, and reached there on the 23rd. The vicinity of Sacramento was their headquarters while in the west as you will later learn. From this city they went on a side trip to Marysville and Sutell, hte object of this trip being to visit with a brother-in-law of Mr. C. H. Wiegmann, of Garner and president of the First National Bank here. However they also wanted to see the farming conditions in this very fertile valley and which we will give a short description of as Mr. Barz gave it to us. This land is all irrigated and produces vast quantities of rice and fruits. Whole sections of land are laid out in rice fields here, also barley. They do their harvesting and threshing all at the same time with a machine called a header. The machine is on the order of a large binder and thresher conbined and drawn by thirty two horses or tractors, and operated by six men who all work on the machine. It cuts a swath twenty to thirty feet wide, elevates the gain to the thresher and then the grain is sacked bytwo men on a platform and the sacked grain dumped in rows. The straw shoots out the back in rows or is gathered and dumped in piles. Barley goes from 80 to 100 bushels to the acre. All these large fields evidently belong to a company who work the whole field. In the same vicinity are large peach orchards and you can drive for miles and miles and see peach trees all the way on either side of the road. The trees were so heavily laden that they were propped up with timbers to keep the fruit from breaking the trees. They spent a few days here and then went back to Lodi, near Sacramento and at which place Rev. Thiel and family, former residents of Klemme, live. It is at this place where they headquartered in the west. While here the gentlement planned a trip to the famous Yosemite Valley which is perhaps 150 miles from the city and they accordingly left by rail but part of the distance had to be made by auto. A few of the important points of interest in the valley are the Bridal Veil Falls, Cathedral Spires, Sentinel Rock Glacier Point, Yosemite Falls, Cascade Cliffs, Nevada Falls, Vernal Falls, Mirror Lake, and many other places of beauty and wonder. Camp Curry is the main stoping place in the valley and here they have all the accomodations which a traveler and tourist wants—a fine hotel, outdoor camps, bungalows, garages, amusement places, bath house, etc. While at the valley Messrs. Barz, Haupt and Theil took a trip in a motor stage to the famous Wawona Forest of Big Trees. Here they drove thru several large trees in which a drive way had been cut to allow autos to pass thru the tree, you can therefore imagine the size of some of the trees in this forest. This trip took them 160 miles in a circle from the camp and when they had been around they were at the same spot near the camp where they started but were some 3250 feet above the camp and the only way to get back was to go bacy sixty miles again the same way they came. Mr. Barz said tht was the frthest distance he ever went to get back to a point only a short distance from where he stood.

We will have other interesting articles on his trip in the next issue of the paper.

POTATO COUNTRY?

There will not be any potatoes shipped into Klemme this year for Klemme farmers have potatoes to spare. This has proved to be a real potato country this year and the potatoes harvested and brought to Klemme for shipment are graded as A No. 1 potatoes. Every farmer who planted has a fine yield and there are a number of cars of potatoes being shipped out this year.

TURN OUT 13,000 SHIP OFFICERS

Merchant Vessels Gain Many Recruits From Newly Established United States Schools.

PLAN TO EXTEND SYSTEM

Shipping Board Suggests That Shore Stations Be Established Where Men From All Parts of Country May Be Taught

Washington.—More than 1,300 merchant marine officers have been graduated from the shipping board's training schools since their establishment three years ago, and 72 per cent of the graduates have been licensed for service at sea, records of the board's recruiting service show.

Officers for the government-owned merchant marine are trained at Camp Stuart, Va., San Francisco, and Seattle. Four wooden ships operate on the Atlantic coast as combination training ships and cargo carriers. Each has a capacity of 200 apprentices and 1,200 tons of cargo.

On the Pacific coast one wooden ship carrying 1,800 tons of cargo and 115 apprentices and a new 1,800-ton steel vessel with space for 146 apprentices operate on the triangular run between Seattle, the Hawaiian islands and San Francisco.

Plan Extended System.

Extension and development of its system of training Americans to command the craft of the merchant marine is planned by the shipping board. It is suggested that shore stations be maintained where men from all sections of the country can be assembled and given instruction in seamanship, boat drill and other preliminary work.

The men would then be sent to sea in modern steel freight ships, which would be utilized as combination cargo carriers and training vessels, carrying about 125 apprentices. It is planned to place these ships in a trade which would insure a voyage out and return in about 60 days, four vessels on the Atlantic and two on the Pacific.

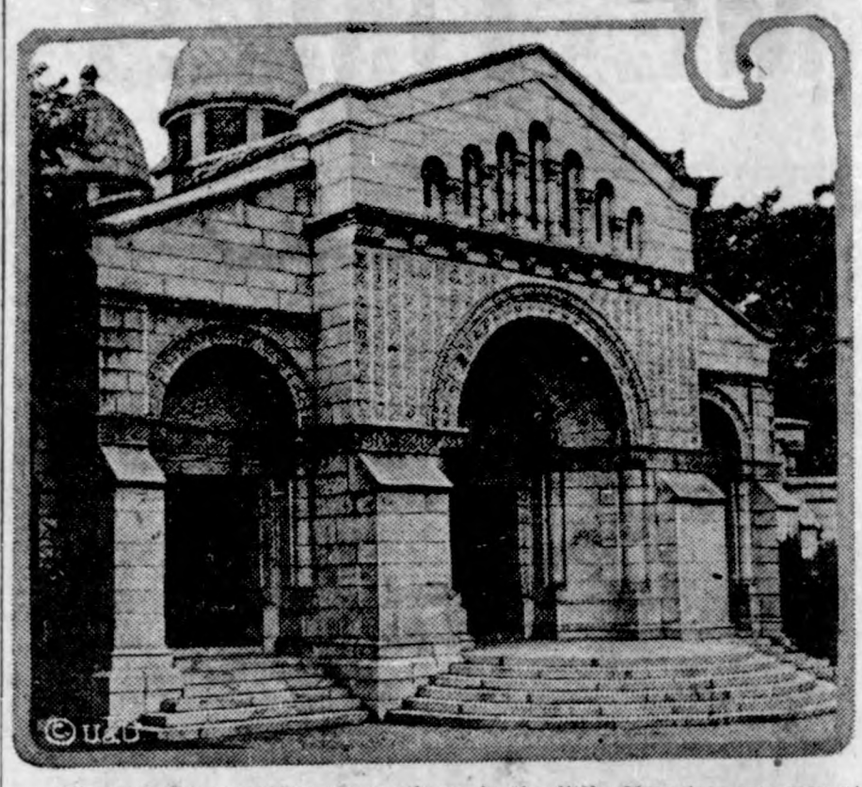
Concurrently with the sea training the recruiting service plans the establishment at colleges and universities near the principal American ports of a maritime commerce course which would include accounting, business correspondence, business principles, economics, elements of statistics, markets, transportation, principles of foreign trade, exports and imports, languages, railroad and maritime rates, business administration, business law, admiralty law, advertising, ship operation and other basic subjects.

Paid While Studying.

The year would be divided into four three-month periods, the first one or two quarters to be spent in college work, and the subsequent quarters in practice under competent supervision in the offices of steamship companies and on board ships. The men would be paid for their services while employed in offices and on vessels and thus would be able to obtain their education without financial cost to them.

It would be sought to so arrange the course as to extend over a period of four years with a degree upon completion. Shipping board officials believe this would build up and leave many other well-trained men in all branches of maritime commerce.

Where Vanderbilt's Remains Rest



View of the magnificent mausoleum in the little Moravian cemetery at New Dorp, S. I., where the body of William K. Vanderbilt was laid to rest beside those of William H. Vanderbilt, his father, and Commodore Cornelius, his grandfather.

John D. Lives Like a Hermit

Richest Man in the World No Longer Interested in Making Money.

CHIEF JOY IN PLAYING GOLF

Responsibility for the Future Care of the Rockefeller Fortune Is in the Hands of John D., Jr., and Selected Trustees.

New York.—The richest man in the world is no longer interested in making money.

More than that, he is not overly concerned with what becomes of the greatest single fortune ever accumulated, although he hopes it may be used for good purposes.

John D. Rockefeller, now traveling toward his eighty-second milestone of life, is a hermit. Surrounded by a few faithful servants, the man who has piled up millions upon millions until today he is worth a billion of dollars—a thousand millions—finds no happiness in money or the retention of it.

His chief joy in life is playing golf—and he indulges that pleasure from an hour and a half to two hours every day the weather permits.

Secluded in his Pocantico Hills (New York) estate, with only a few intimate cronies to chat with at infrequent intervals, and never seeing a casual caller, the man who was oil king—for he no longer wears the title—has turned contemplative, philosophical and disinterested in worldly affairs.

No Longer Interested.

He no longer devotes himself to the worries incidental to possessing such a vast fortune—the responsibility today for the future care of the Rockefeller fortune is upon the shoulders of John D., Jr., and selected trustees.

But this change in direction and control of the Rockefeller wealth is due in no sense to the age, mental or physical incapacity one might link with so aged a man as John D., Sr.

"Mr. Rockefeller, Sr., is not senile," stated Ivy Lee, publicity director for the Rockefeller interests. "His health is excellent. But he simply has withdrawn from the world.

"He does not care to see visitors.

"Mr. Rockefeller reads quite a bit and spends much of his time in reflection. He has become philosophical, but his interest in things of the world has waned.

Watches Bequests.

"Naturally he is interested in his bequests to various projects he has fostered, such as the Rockefeller Foundation and other broad constructive work. He is far more interested in that than in acquiring further money.

"But he is not so wrapped up in the details of his benefactions as you might imagine.

"For instance, members of the Rockefeller Education board, comprising fifteen of the most eminent educators in America, held a meeting at Lakewood, N. J., where Mr. Rockefeller has a summer home. The educators thought their benefactor might attend a meeting, so extended him an invitation. He ignored it. All he wished to know was whether the work was going ahead as intended and, realizing it was in capable hands, declared he was not interested in details. But he did invite a couple of the board members whom he had known personally for many years to a round of golf with him.

"Mr. Rockefeller shrinks from further publicity. 'I just want to be left alone to my own thoughts,' he explains. 'Why should the world bother about an old man like me?'

"Mr. Rockefeller realizes he has only a few more years to live, and he wants no futher trouble with anybody."

Old "John D." has had a quiet though enjoyable summer at Pocantico Hills, occasionally taking auto rides with attendants. He attends church regularly every Sunday.

KILLS GIRL WHO MOCKED HIM

Soldier of Distinguished Record in the World War, Ends Child's Life and His Own.

Scranton, Pa.—It was recess at the school at Old Forge. Little Anna Pittruta, aged 14, hair streaming, chased a playmate in an effort to "tag."

Michael Jaronowicz, 24, swung his leg slowly over the fence, seized Anna by the wrist as she fled by. And as she panted he drew a heavy .45-caliber army revolver and shot her dead.

She had hardly touched the ground. The screams of the recessing children had not yet pealed. He poked the muzzle into his ribs, fired and fell dead beside her.

The story that lies behind the tragedy is old. Though Jaronowicz was a war hero, a man who had earned the decorations of two nations for his bravery, he lacked the "open sesame" to the heart of the young Pittruta girl. She mocked him and spurned him until he lost control of himself.

Baby Consumes Two Jugs of Moonshine in Ten Days

Mike Bragoll of Hammond, Ind., has a little store, and recently the police dropped in for the third or fourth time this year because it had been reported that he was selling liquor there. A jug with about two drinks of moonshine in it was found under the counter and a kummel bottle, belonging to Mike's wife, was also found.

In police court Mike said that he kept the liquor on hand for the baby, and that the infant had consumed about two jugs of moonshine during the last two days. Judge Klotz was plainly skeptical and decided that Mike should pay $50 and costs.

Women Learn How to Cast Their Ballots

At Republican state headquarters in New York city a school for women voters was opened and the fair pupils went through all the motions of casting their ballots just as they will in the polling places.

105,683,108 IS U. S. POPULATION

Nebraska Has 1,295,502, an Increase of 103,288 Above Census of Ten Years Ago

SENATOR HARDING AT OMAHA

Republican Candidate for President Addresses Immense Throng at the Auditorium in Omaha.

Washington, D. C.—The 1920 population of the continental United States is announced by the census bureau as 105,683,108. This is an increase of 13,710,842, or 14.9 per cent since 1910.

The total does not include the population of outlying possessions, which will be announced as soon as the figures for Alaska and the military and naval service abroad are tabulated. It is estimated, however, that these possessions have 12,250,000 inhabitants, so the total number of people living under the American flag in round numbers is 118,000,000. The figures compare with 91,972,266 ten years ago and 75,994,575 twenty years ago.

Nebraska's Record of Growth.

Nebraska's population as announced by the bureau is 1,295,502. The increase during the last ten years is 103,288, or 8.7 per cent.

In 1910 the population of Nebraska was 1,192,214, ranking it as twenty-ninth most populous state in the union. It showed an increase of 125,914, or 11.8 per cent over 1900. In area Nebraska ranked as fifteenth state in 1910 with a land area of 76,808, making its population 15.5 per square mile.

Nebraska's record of growth is as follows:

Year.	Population.	Inc.	Per Ct.
1920	1,295,502	103,288	8.7
1910	1,192,214	125,914	11.8
1900	1,066,300	3,644	0.3
1890	1,062,656	610,254	134.9
1880	452,402	329,409	267.8
1870	122,993	94,152	326.5
1860	28,841	.....	.....

Farms Increase in U. S.

Washington, D. C.—There are in the United States 6,459,988 farms, an increase of 98,496, or 1.5 per cent over the total number recorded in 1910, the census bureau announces.

SENATOR HARDING VISITS STATE.

Republican Presidential Nominee Addresses Immense Throng at Omaha Auditorium.

Omaha, Neb.—Senator Warren G. Harding, republican candidate for president, spoke to an immense crowd, estimated at 10,000 to 12,000, at the Auditorium here Thursday evening, at the close of a speaking tour through Iowa, where he made eleven addresses during the day. He was accompanied by his wife, who was introduced by Congressman A. W. Jefferis, and who bowed her greetings to the throng.

The audience took kindly to the senator's address, and applauded enthusiastically as he presented his views on the political issues of the campaign. Although considerably fatigued by the strenuous work during the day's trip, he was in good voice, and spoke for over an hour, after having previously addressed an overflow gathering on the outside of the Auditorium, which was crowded to capacity. On his drive from the station to his hotel, he was greeted by thousands who had gathered to pay respect to the presidential nominee.

His reception was a demonstration of appreciation for a typical American.

Diaz Will Be Deported.

Mexico City.—Felix Diaz, who surrendered to General Guadalupe Sanchez at Tlapacoyan, state of Vera Cruz, and has been taken to the city of Vera Cruz, will be deported. He will be placed on the first steamer leaving port, together with fifty of his followers, who have chosen to accompany him in exile.

Because of its decree affecting those who participated in the coup d'etat resulting in the death of President Madero in 1913, the government refused to allow Diaz to remain in Mexico.

Mexican Negotiations Fail Through.

Washington, D. C.—Informal negotiations undertaken by the Huerta government in Mexico to secure recognition by the United States, have apparently failed.

Although the State department has made no announcement concerning these negotiations, the resignation by Don Fernando Iglesias Calderon, head of Huerta's special mission to the United States, indicates that present efforts to restore diplomatic relations between the two countries have not progressed satisfactorily.

Wheat Futures Touch Low Level.

Chicago, Ill.—Wheat futures have declined 10 to 12 cents a bushel in the principal grain markets of the west, in some cases touching low levels not before reached since the government fixed the wartime wheat price.

First Woman Sheriff Elected.

Pittsboro, N. C.—Miss Myrtle Siler, of Pittsboro, is the first woman in North America to hold the office of sheriff, having been elected to that office by the Chatham county commissioners.

GOLD SHIPMENT IS ALL RIGHT

Federal Reserve Board Endorses Recent Shipment of Gold As O. K.—To Thresh Out Rate Question.

Washington, D. C.—The recent shipment of Russian gold, receipt of which was reported by the federal reserve board last week, was imported for "an entirely proper commercial purpose" the department of justice has announced. The shipment was sent from Reval, Esthonia, and consigned to a commercial agent of the Esthonian government, it was stated.

Officials said the gold had come into the United States with the knowledge and consent of the proper American officials. The shipment aggregated $339,636, and was the first from Russia, in Europe, since 1916.

To Thresh Out Rate Question.

Washington, D. C.—The conflict between the Nebraska state railway commission and the interstate commerce commission over the proposed increase in railroad rates promulgated by the interstate commerce commission earlier in the summer is to be threshed out in Lincoln October 25; before Examiner Disque, in the United States court room, it is announced by the commission here. The order of the commission specified that all railroads "subject to our jurisdiction operating within said state of Nebraska are hereby made respondents to this proceeding.

Facing Prison and $10,000 Fine.

Chicago, Ill.—Assistant State's Attorney Hartley Repligle, in charge of the "crooked baseball" case, says that indictments to be drawn up on true bills may contain several counts. The true bills themselves specified but one alleged offense, "conspiracy to commit an illegal act." The penalty provided upon conviction on this count would be one to five years in the penitentiary and a fine of not more than $10,000. "And this is just the beginning," Mr. Repligle said.

To Develop Co-operative Marketing.

Chicago.—A permanent organization has been effected here by the committee of 17, representing principal farmers' organizations of grain-growing states and appointed to develop a co-operative marketing plan to handle the grain crop of the United States. C. H. Gustafson, president of the Nebraska Farmers union, was elected chairman and A. L. Middleton of the Farmers National Grain Dealers' association was named vice chairman.

Red Cross Aids in 7,000,000 Cases.

Washington, D. C.—The American Red Cross gave aid to the country's fighting men or their families at home in 7,000,000 cases from the entrance of the United States into the war until last June. The cost was about $10,000,000. These facts are shown in a statement just issued by that organization. The Red Cross also describes how it is continuing in peacetime to aid the world war veterans.

New York.—New low record prices for the year have been established in both the raw and refined sugar markets. Prices are half a cent lower than at the close of last week, with raw sugar selling on the basis of 8.51c, duty paid, while refined was quoted at 12½c a pound by the Federal Sugar Refining company.

Many Soldiers Re-enlist.

Chicago, Ill.—About one out of every five soldiers whose enlistments expired during September have re-enlisted, the army recruiting service reports. A total of 16,461 men were accepted for service in September. The army strength now is 190,432.

German Prisoners Paroled.

Leavenworth, Kas.—Eckhard von Schack and Franz von Bopp, at one time consul and vice consul for the German imperial government at San Francisco, have been paroled.

Austin, Texas.—Governor W. P. Hobby has signed the bill passed by the special session of the legislature creating an act to investigate causes and all facts pertaining to labor disputes in Texas.

Cleveland Wins First of Series.

New York.—The Cleveland American League club decisively defeated the Brooklyn Nationals by the score of 3 to 1 in the initial game of the 1920 world series here Tuesday afternoon.

Washington, D. C.—Sad havoc has been created in some of the most important legislative committees in the house of representatives as the result of primary elections in the various states, most of which are now concluded. In three instances, at least, members of the house who by reason of long service have attained chairmanships, have been refused renomination by their party constituents, and the next congress will see them no more. And of course new chairmen will be named to the committees over which they preside.

Former U. S. Senator Dead.

Dalton, Mass.—W. Murray Crane former United States senator and for years a power in the political world, is dead at "Sugar Hill," the family home.

The end came quietly, after four days of heavy sleep, almost of unconsciousness. The sleeping sickness had set in after an illness of several months, and it was this which immediately preceded death, the actual cause of which was said by his physicians to be encephalitis, or inflammation of the brain.

Nasty Colds

Get instant relief with "Pape's Cold Compound"

Don't stay stuffed-up! Quit blowing and snuffling! A dose of "Pape's Cold Compound" taken every two hours until three doses are taken usually breaks up a cold and ends all grippe misery. The very first dose opens your clogged-up nostrils and the air passages of your head; stops nose running, relieves the headache, dullness, feverishness, sneezing, soreness, stiffness. "Pape's Cold Compound" is the quickest, surest relief known and costs only a few cents at drug stores. It acts without assistance. Tastes nice. Contains no quinine. Insist on Pape's!

The Wild, Wild Women.

Swiggs—The pictures I liked were those wild animal ones of a few years back—the pictures that had a story interwoven around lions, tigers, wild cats, and so forth. Quite unique and interesting! I wonder why they dropped off so suddenly. Did the animals perish or devour the actors? Do you know what happened?

Swaggs—Competition was the Nemesis. The "vampire" came into vogue about that time, and nature's they were too tame in comparison to terrify the public any longer.—Judge Fun.

"DANDERINE"

Stops Hair Coming Out Doubles Its Beauty.

A few cents buys "Danderine," and after an application of "Danderine" you can not find a fallen hair or any dandruff, besides every hair shows new life, vigor, brightness, more color and thickness.—Adv.

Couldn't Keep Up.

"So your wife has gone back to the old style church and old style doctors?"

"Yes."

"Thought she was an enthusiast on all the new movements?"

"She was, but just as soon as she learned how to spell her new form of healing some other religious and curing methods would become fashionable, and she found her health breaking under the strain of her mental efforts."—New York Evening Post.

Thin.

PISO'S

The Man Nobody Knew

By HOLWORTHY HALL

(Copyright by Dodd, Mead & Co., Inc.)

CHAPTER XIII—Continued.
—14—

And Hilliard had all a metropoli-n's sensitiveness to the spirit and the ethics of a men's club. He fal-red on the very threshold; and if y other man than Dr. Durant had en his sponsor, he would have fled continently, so as not to disturb that re, indescribable atmosphere which ly clubmen understand and respect. The Doctor was scrutinizing the enu; Hilliard, who faced the window, rew a glance over his shoulder. As had fancied, the eyes of the room re upon him. They reminded him, dly enough, of machine-gun batteries. When at length the pair had gained e table nearest the window, Hil-rd felt that he had undergone a renuous ordeal; he was consumed gratitude to his implacable host, t he had no inclination to repeat it. "The table d'hote's good enough for e," said the Doctor presently. "And u?"

"And for me, too," said Hilliard. "Anything to drink?"

"No, thanks."

The Doctor dropped the card and sat straighter.

"Well, I won't keep you in suspense I want some advice. As I said, I'm e worst business man in the world, illiard. I'm a mere child in your nds—so please treat me tenderly." e regarded his companion with min-ed humor and seriousness. "James llen has been telling me about a onderful plan of yours to make a ce shiny gold eagle grow where only silver quarter grew before. In fact, talked so enthusiastically that he's t me thinking about it, too. . . . rather resent your not telling me out it yourself."

Hilliard recoiled.

"You shouldn't do that!" he said. . . . I wouldn't have tried to inter-t you in it, Doctor, because—"

"Oh, I can see your reasons," depre-ted the Doctor, smilingly. "You dn't want to trespass on a purely so-al relationship. I appreciate that. t the point is, I've got a few thou-nd dollars I don't exactly know what do with. It's a rather extraordinary uation for a professional man, isn't I'll have to admit I'm puzzled about myself. And the novelty might lead into temptation. So I thought I'd your advice."

"You can have the best I've got," d Hilliard, averted. "But I'm not aranteeing that it has much value, ctor."

The Doctor nodded; drummed on the ble.

"Do you ever let friendship inter-e with business?"

"Often, sir."

"Will you let it interfere now—if u think you're justified?"

"Yes, Doctor. . . . I can promise t much, anyway."

The Doctor showed his approval.

"Well, tell me perfectly frankly—is urs the sort of proposition you'd let man invest in, if you knew he had cious little money to lose? But if u also knew that he were quite will-to take the same chance as the t?"

Hilliard shook his head slowly, and ntinued to shake it as he replied.

"I can't say that it is, Doctor. On e contrary—I don't think it's that rt of proposition at all." Dr. Dur-t's brows were contracted.

"But in the ordinary run of com-erce, Hilliard—suppose the question friendship didn't enter into this, d I hadn't brought up that subject would you, in choosing your list of bscribers, and selecting the people d like to have share the plan with , put a man like myself on any ferent footing than James Cullen? wouldn't you?"

"Doctor Durant," Hilliard's voice slow, "is it possible you haven't rd me . . . the criticism that's been ng around town about this syndi-e of mine? Haven't you heard that re's some question whether it's te sound?"

"I've heard it—yes." The Doctor amazingly indifferent.

"Well—do you still think this is any e to discuss the possibility of your ing in with us?"

The Doctor's voice was strong, en-raging.

"I think it's the best time, and the y time—for me, that is. I've lived long to be affected by chance ru-rs. And besides, I've got the money ."

"But are you sure you know what all about? The criticism, I mean." I don't know anything about it at That's exactly why I'm coming to for advice. You certainly ought know more about it than any one does. And, therefore, I'd take r word for it before I'd take the or. I want to know if you'll accept as one of the members of your dicate."

Hilliard gasped and pushed himself k from the table.

"Doctor!"

"In a way," said Dr. Durant genially, putting you at a great disadvan-—I know that. But, as I said, I'm a business man. I have to be ded more or less by instinct. Your eam is to know all about these things. So I'm coming to you for your honest opinion, and I know you'll give it to me . . . do you think I'm quite eligible?"

Hilliard's heart was in his mouth.

"Why," he stammered, "at this particular time—I can't advise you—"

"Now, don't be too cautious," warned the Doctor. "I'm not asking you if this is the best investment the world has ever seen—I'm asking if it's reasonably safe, as such things go, with a chance of something really good if your best expectations work out as you hope."

Hilliard's throat was dusty, and his reply came with some difficulty.

"In spite of . . . everything, you'd . . . you'd take my word for it, Doctor?"

"Yes, I would, and I've got Cullen and my own daughter to agree with

"You're Retiring Under Fire—Are You?"

me. Certainly I'll take your word for it. Would you let me invest say . . . seventy-five hundred dollars?"

Hilliard gulped.

"Not now—no, sir."

"Suppose I'd asked you a week ago—before this miserable story began to go the rounds?"

"I'd have taken it then—perhaps."

The Doctor's eyes snapped.

"You're retiring under fire—are you?"

"No, sir—digging in."

"Simply because of a fatherless report?"

"No, its parents are pretty lively. And the . . . the recent developments haven't been what we . . . expected. It isn't on account of the rumors that I can't let you in, Doctor—it's on account of the facts."

The Doctor remained silent until the waiter had served them, and departed. Then he looked keenly across the table.

"Cullen isn't going to lose his money, is he?"

"Not all of it, anyway."

"Some of it?"

"You never can tell."

"And are you obligated in any way to make good his loss? You, personally, I mean? Either legally or morally?"

Hilliard sighed dispiritedly.

"Why, seeing that not one of these men ever saw the property, or knows anything about it, or about copper mining in general, except what I told them, I feel morally responsible for every cent that's lost, whether I've any legal responsibility or not. That is, I'd make it good—if I could. Of course, I'm hoping that nothing will be lost, but—"

The Doctor's eyes brightened.

"Do Cullen and his friends understand that you hold yourself responsible?"

"I think not. I haven't said so to them yet."

"It isn't a part of your bargain?"

"No, sir."

"They're paying you a brilliant compliment, then."

"I realize that fully," said Hilliard, writhing. The Doctor toyed with his fork.

"You'd do the same for me, I suppose, if I were one of your group?"

"Why, of course—if you had been."

"You wouldn't advise me to go into it, you say, under present conditions?"

"No, sir, I wouldn't. I wouldn't permit it."

"I thought you wouldn't." The Doctor sipped a glass of water thoughtfully. "And that leaves me with seventy-five hundred dollars I still don't know what to do with. Well, if you can think of any reasonable use for it within the next few weeks, let me know, will you? I'll keep it intact until I hear from you."

Something in his tone snatched at Hilliard's heart; he went white as paper.

"Doctor Durant!"

The Doctor smiled slightly. "Any reasonable use, I said. Any form of investment that—"

Hilliard was practically tongue-tied. "Doctor Durant . . . if I . . . if I see what you mean . . . I . . . if you're willing to take my advice, why—"

"I'm sixty-three years old," said the Doctor calmly, "and I've made a fool of myself in every conceivable way but one. . . . That's in my own field; I'm a diagnostician. I've watched you very carefully, young man. . . . I think perhaps you need as much advice as I do, of a different variety. So here it is—when you—want encouragement, or a medical prescription, or a good cigar and a chat, or a quiet evening with an old man and a girl who plays the piano rather pleasantly, or seventy-five hundred dollars which you've already shown you won't let me invest unwisely, come and see me. Now, let's drop business. Not another word: I'm tired of it. You're through as an expert; let's get back to old-fashioned friendship. Speaking of coming to see me—Carol's wondering if you're trying to slight her. We've seen very little of you lately? It's a week now, isn't it?"

* * * * * * *

When, sustained and soothed by that peaceful hour, by the Doctor's trust in his integrity, and by the sedative of a long and untroubled stroll out over the hills to eastward, Hilliard returned to the hotel, the room clerk greeted him with faint superciliousness.

"Somebody's been keeping after you on the telephone all morning," he said loftily. "New York call. Couldn't locate you. And here's some telegrams for you. . . ."

There were three of them; at sight of the signature of the first, Hilliard's eyes narrowed.

"Arriving Syracuse 4:15. Please meet me at train and stop all work in the meantime. Imperative.

"HARMON."

Hilliard's eyelids fluttered; this was evidently the initial result of Rufus Waring's efforts, and of those many letters he had written Harmon. He tore open the second envelope; the message was again from the broker, sent obviously from the Grand Central terminal just before train-time.

"Most important news received. Am just leaving, having wired you meet me at station 4:15. Find out who Bob Waring is and what he wants. Do all you can to stave off further inquiry. Absolutely imperative not talk to anyone until I see you. Have contract and all other data with you. Shall have to leave on short notice..

"HARMON."

And the third was from Albany:

"Locate Bob Waring if possible and arrange meeting seven tonight. Urgently imperative. "HARMON."

Hilliard folded the three sheets methodically and put them in his pocket. He glanced at his watch; it showed a quarter to four. He had no dependence on Harmon, and no fear of him; he felt no obligation to Harmon, no sense of duty. To be sure, he had a cynic's curiosity to see what was in the middle of the whirlwind, but that of itself wasn't strong enough to send him to a rendezvous with a man he despised and loathed.

"If I go," he said to himself, "I'll be sorry; and if I don't go . . . why, if I don't go, I'll always wonder if it would have done any good!"

For himself, there was nothing promising in the situation. But on the millionth chance that something of benefit to his subscribers might come out of it—on the millionth chance that Harmon might be frightened or persuaded into compromise—

So he went.

* * * * * * * *

The very first passenger to reach the platform was Harmon; indeed, he had been fretting in the vestibule for half an hour, intent on saving a useless fraction of a second when the train stopped. At sight of Hilliard, he beamed beneficently—all his earlier belligerence forgotten.

"Hello!" he said. "Glad to see you, son. Got all my messages, did you?"

He shook hands with great urbanity; Hilliard's grasp was hardly responsive.

"I got three," said Hilliard, dignified and noncommittal; and he continued to inspect his employer with ill-concealed disfavor and distrust.

"Well, that's all I sent. Now, where can we go sit down and talk, for a couple of hours? There's a lot to go over, but I want to take the 9:40 West. Not to the Onondaga—I'd rather go somewhere quieter. How about the Kirk?"

"Suits me all right if it does you."

"Any luggage?" They were crossing the tracks to the waiting-room; and Hilliard, in spite of himself, couldn't refrain from the solicitude which any right-minded resident of a city feels for the transient just arrived.

"Only this Gladstone. I can check that here, I guess. Well, I'm certainly glad to see you. Say, were you able to make a date with this Waring person? It was pretty short notice, but you're such a live wire—"

Hilliard, fully comprehending the nature of the compliment, smiled faintly. The person of the broker was physically repulsive to him; unconsciously he edged further away.

"Not yet. But I've left word at his house for him to call me at the hotel and I'll telephone to the information clerk from the Kirk where he can reach me. He's sure to be in around five or half past."

"I hope so." Harmon swung his heavy bag to the brass-lined counter, and tossed out a dime with a philanthropic gesture which made the attendant glare at him. "Who in thunder is he, anyhow?"

Hilliard had reason to be reticent with his facts, and he preferred not to be too specific at the outset.

"He's a law student—an old friend of the Cullens. He's looking after some of their interests, in one way and another."

"Oh! Working up a practice! Well! the way he's bombarding me with fresh letters, you'd think he was on a congressional investigating committee! Say! There's one thing I'd like to find out—how'd he know I'm in the thing? You didn't tell anybody, did you? Our agreement—"

Hilliard was guiding him to the street.

"Why, he probably got hold of your name when he wrote to some law correspondents of his in Butte about the property; and they looked it up for him. I'd judge they must have gone into it rather thoroughly."

"They did! Humph!" The broker's tone held less of rancor and more disappointment than Hilliard would have expected. "And they made an unfavorable report on it, did they?"

"Unfortunately, for you, they did . . . as you very well know."

Harmon turned on him sharply.

"What do you mean 'unfortunately for me'?"

Hilliard turned into a wide doorway.

"We go in here . . . Why, it puts the quietus on any last hope of yours that there's still some business to be done in Syracuse, doesn't it? I should think that's about as plain as daylight."

Harmon's brows went up.

"Wh-a-t?" he said, and then, promptly, "Oh, yes—of course. But you've been such a live wire from start to finish, I thought the harder the proposition, the better you'd—"

"Oh, don't make me wish I hadn't taken the trouble to meet you!" snapped Hilliard. He slipped into the first unoccupied booth; Harmon followed him stupidly. "The thing's done for, and you know it. Don't act so innocent, Mr. Harmon—it isn't becoming to you, and it isn't helpful to me. We are in a position to talk English, I should imagine."

Harmon's eyes were very small and bright.

"What's he been saying around here?"

"Saying it's a fake promotion. What else would he say? He's quite intelligent. That's why it's unfortunate for you, and that's why we don't need to fool ourselves any further—isn't it?"

As Harmon removed his hat, he appeared to be somewhat warmer than the temperature warranted. His round face was now preternaturally blank; but his urbanity had increased until he was on the verge of fawning.

"So he's been giving out a pretty bad story, has he?"

"Only the bare facts. And if you don't know it already, I'll tell you that

"So He's Been Giving Out a Pretty Bad Story, Has He?"

he's got a representative out there on the ground, so that—"

Harmon bit his lip. "A representative? When did that happen?"

"Nearly a week ago. It's about time to hear from him, and then the goose will be cooked."

The broker reflected diligently.

"Haven't seen him today, have you?"

"No; not for nearly a week."

Harmon sat back, and massaged his forehead absent-mindedly.

"Well—has this made much difference to you?"

"How could it help it?" Hilliard grimaced. "This isn't New York city, or a deaf and dumb asylum. News doesn't have to travel fast to make the rounds. Everybody who's ever heard my name knows it by this time."

Harmon leaned forward on his elbows, and drew a quick, nervous breath. His eyes, now slightly dilated, sought for Hilliard's, found them, darted away again.

"That's tough . . . mighty tough . . . I . . . I came up here thinking I might do something about it. Save the situation, you know. Too late, is it?"

"A good deal too late."

Harmon exhaled lengthily, and fumbled for his invariable cigarette; Hilliard observed, without particular deduction, that his hands lacked certainty.

"That does sort of burst the bubble, doesn't it? Well . . . I suppose the next step you want to take is to get out of town."

"No," said Hilliard, "I'll stay till it's over with."

Harmon gasped.

"Stay? Stay here after the news is out? What for?"

"I hardly think you'd understand what I'm staying for, Mr. Harmon."

The fat broker shook his head in vigorous protest.

"Now, look here!" His voice was paternally kind. "You've been a fine sport through this whole business, except once, and we won't let that bother us now. As a salesman you've been a holy wonder. You've done all I expected you'd do, or could do, and then some. And your flare-up last time I was here don't hurt you with me one little bit. But here we are at the finish. My suggestion to you is to pack your duds and get out. Call it a day and quit. There's better business somewhere else. And if you'd like to plant yourself in some other good town, say, Detroit, and—"

"No, thanks." Hilliard's smile was out of genuine humor.

"Well, aren't you open to conviction?"

"No, I don't think I am. Please don't argue—that's final.

"Well, you're sure you can't do any more here, aren't you?"

"Not a nickel's worth—even if I wanted to. And would you mind getting down to brass tacks? Otherwise I can't see any benefit to either of us from prolonging this interview; can you?"

Harmon inspected him carefully and seemed to be struck with an inspiration.

"I'm not sure of it, at that. Look here now! I've got an idea! Let's try to get some benefit out of it. Suppose you got clear of this mess. Suppose we straighten it out from top to bottom. Everybody satisfied. Suppose you got out of it absolutely clean; do you think you could take your experience and your front and your energy and cash in on some better business?"

Hilliard exclaimed aloud; he could hardly credit his ears.

"What's that?" he managed. "I don't understand!"

The broker's eyes brightened. "It's easy enough if you put your mind to it. I've told you before," he said impressively, "I'm out for results. That's my middle name—R-E-sults. And not results from minute to minute, but results in the long run. Now it does seem to me like an awful shame to have you come up here and spend all this time and money flub-dubbing around, and then have it all over with, and nothing to show for it but a lot of bellyaching customers. Of course we've made a little money, but when we let this scheme wind up in a big howl from everybody we've got into it we're losing the cumulative value of you. And it's you that was the backbone of the whole idea. Now—this is only a passing thought, but let's consider it—which way would be the best for us in the long run, to close up this deal and get out from under, and take a little profit and be in dutch here forever, or to be a couple of philanthropists and play strong for the future?"

"How do you mean?" Hilliard was afire with hope.

The broker's smile was every moment more broadly ingratiating.

"Why, suppose I should hand you back every cent you've collected and paid in. This is just a suggestion—I want your opinion on it. You go 'round to your subscribers; tell 'em the mine isn't as promising as you thought it was; you're going to make good; give 'em their money back. Now—if you did that and left a first-class impression everywhere, could you start from scratch all over again and sell enough honest-to-goodness conservative stuff—municipals, or like that—to those same people to make up the difference?" He was studying his companion keenly.

(TO BE CONTINUED.)

Eyes of Plants.

Of course we know that trees have circulation, not of blood but of sap, that goes upward in the spring and downward in the autumn. It has been demonstrated also that plants have eyes, certain epidermal cells being really convex lenses filled with clear sap that brings the light rays to a focus somewhere within the cells. These little lenses are able to form images just as the eyes of insects do.

Simple Journalism.

The editor of the Bano (Africa) Daily News does not have trouble over such matters as circulation or the high cost of paper. When he gets a piece of news he smooths off some slabs of wood, writes up the story in his best editorial style, and then gives the slabs to his office boy, who runs off with them and hangs them in conspicuous places so that he who runs may read.

Ready to Oblige.

Visitor—Have you any exhalations of a deleterious nature in your house?

Host—No, but if you wait awhile I will send out and get you some.

Water Power in China.

China's great commercial water highway, the Yang-tse Kiang, is to be put to work. To keep the river always at flood level, and, incidentally, to get rid of rapids which interfere with navigation, seven dams will be constructed. The project contemplates the development of 31,000,000 electric horsepower, and will cost $4,000,000.

This is the first important water power development undertaken in China, whose industrial future has a wonderful outlook in that direction. For, thanks to its lofty mountain ranges, the Flowery land has far greater water power available than any other country in the world.

CASCARETS

"They Work while you Sleep"

Do you feel all "unstrung?"—bilious, constipated, headachy, full of cold? Cascarets tonight for your liver and bowels will have you tuned up by tomorrow. You will wake up with your head clear, stomach right, breath sweet, and skin rosy. No griping—no inconvenience. Children love Cascarets too. 10, 25, 50 cents.—Adv.

Derivation of "Magnet."

The word "magnet" is derived from the name of the city of Magnesia, in Asia Minor, where the properties of the loadstone are said to have been discovered.

Local News of Interest About Your Friends

Mr. Emil Neuhrin, of Thompson, Iowa, was a Klemme visitor Saturday.

Mrs. Ralph Brouwer of Garner was a Klemme caller Tuesday afternoon.

Mr. and Mrs. Voiles of Belmond were Klemme visitors Tuesday.

Mrs. Gee of Goodell, was a Klemme visitor Tuesday afternoon.

A baby boy is reported at the home of Mr. and Mrs. D. Webner.

Miss Anna Griewe went to Rudd Saturday for an over Sunday visit.

Mrs. R. A. Jorgenson was a Garner visitor Saturday between trains.

Mr. Aug. Barz returned from his California trip last Friday.

Mr. and Mrs. Frank Ward, of Burt, Iowa, were visitors at the Aug. Ridder home last week.

Mrs. Wright from Belmond, came Saturday for a visit with her mother, Mrs. Will Lenz.

Henry Church from Garner, was a Klemme visitor Saturday between trains.

Miss Laura Brooks, of Belmond, was visiting at the home of Mrs. Mille Smith last week Wednesday.

Mrs. Charlie Conklin and Mrs. Henry Christensen of Goodell, were Klemme callers last Friday.

Mr. and Mrs. Valentine Josten drove to Mason City Monday on business.

Miss Mildred Babcock from Kanawha, was a Klemme visitor last Wednesday.

Miss Ethel Jacobs, of Garner, was a Klemme visitor last Wednesday evening.

Chas. Papousek was in Klemme last Wednesday and Thursday doing some electric wiring near Klemme.

Mrs. Dick Bamman and baby, of Garner, were here last Wednesday evening visiting her mother.

Mr. Julius Ridder left for his home at Ringstead, Iowa, Friday, after a few days' visit at the Fred Ridder home.

Mr. and Mrs. Chris Blumer, Emil Kraus and Albrt Kraus left last week fr Bule, Wisconsin, for a visit with Karl Kraus and family.

Let the Klemme Times print your sale bills and arrange your advertising. Prics are always right at the Times Shop.

Rev. and Mrs. A. H. Meyer, Mr. and Mrs. John Gruetzmacher and Mrs. P. M. Griesemer drove to Burt, Iowa, Tuesday, for a visit at the Rev. Wessel home.

Dave Schwichtenberg and family, and Misses Vera and Berdis Schwichtenberg, drove to Appleton, Iowa, Sunday, for a visit with Mrs. Schwichtenberg's people.

Emil Lau and Chas. Papousek, of Belmond, had an auto collision south of town Monday. Both cars were shook up some and somewhat damaged but not beyond repair.

Hugh Gordon, of Corwith, was here Friday and purchased a fine Duroc Jersey boar of C. A. Arnold. Mr. Gordon was very well pleased with Arnold's herd of hogs.

Mr. and Mrs. M. Croner, Mrs. Schroeder, Mrs. Croner and Miss Minnie Blank all autoed to Waterloo on Sunday to spend the day. The trip was about 230 miles.

The gang who are putting in the water mains began work last Friday morning. They are doing some rapid work as they are using a Greiman Ditching machine for the digging.

Adolph Lauritzen is now doing "devil" duty at the Times Office. "Abe" is learning all about type, paper and ink with the hopes of some day becoming a printer. He says he likes the job fine so far.

The King's Heralds of the First Methodist Church had a very good time last Saturday at the home of Mrs. C. A. Arnold, who is their teacher. They especially enjoyed the fine home made ice cream, cake and sandwiches served by Mrs. Arnold. A good social time was had by the children.

The Klemme merchants were kept on the jump last week as they were buying potatoes from the farmers and shipping them out in car load lots. Quite a number of potatoes were shipped.

The W. F. M. S. of the First Methodist Church had a very interesting program and study center at the home of Mrs. A. H. Meyer last Thursday afternoon. Lovely refreshments were served to the ladies.

C. W. Wiles and Tom Roths returned last week from Minnesota, where they went to thresh Mr. Wiles' grain. He had a pretty good crop but they were delayed getting the threshing done on account of the rainy weather.

About twenty ladies gathered last Wednesday afternoon for a surprise party on Mrs. G. W. Kluckhhon, the event being her sixtieth birthday anniversary. Refreshments were served and the ladies had a general good time visiting.

Rev. Meyer, pastor of the First Methodist Church here, experienced something a little out of the ordinary Monday when he baptized a baby from New York City. Ivadall Evelyn Raymond is the little one's name and she is here with her mother who is visiting Klemme relatives and friends, so that accounts for the reason why he baptized a baby from the great city.

A party from Claion accidentally backed into Otto Lemke's fine new car Sunday morning which was parked near the First Methodist Church. Mr. Lemke has had his car but a very short time and it looks just like new, or rather it did, but now he thinks it will need a new body to make up for the badly dented side. We understand the stranger will make good the damage done. His car was not damaged but slightly.

Avis Hocum had a rather painful accident last week Wednesday as she was coming from school. The children were running from school and Avis fell on the walk near the Gruetzmacher store and in the mix-up another little girl fell on top of her. Avis came out of the scrimmage with a cut over one eye, a badly sprained wrist, a few scratches, and some bruises. However, she was a patient little girl and after the doctor had patched her up again she was ready for school the next day.

OIL IN IOWA?

Quite a sensation was created at Graettinger last week when it was learned that a vein of natural gas was struck on the P. L. Johnson farm near there by J. R. Skow while drilling a well for the owner of the place. The Times says that visions of scores of gushing oil wells have loomed up before those who have read of the fortunes made in the west and southwest and in conclusion hopes that all expectations will come true.—Fenton Reporter.

MARVIN WEIGMAN WAS WITH LYCEUM

Marvin Weigman, the young man who worked at the First National Bank last summer, we learn has been doing Lyceum and Chautauqua work this summer. Marvin was with the Lyric Chautauqua Company, of Hutchinson, Kansas, acting in the capacity of assistant platform manager and later going on the road booking dates for the coming season. He took in quite a bit of the west while with the company. He went back to school last week at Des Moines to continue his law course.

MORE GRAPES!

A few weeks ago we had an article in the Times telling of the fine grapes Drs. Reuber & Zinn had received from Mr. Barz in California. Now comes a letter from Dick Mossel who lives on the Thonton Route telling us that the doctors have nothing on him for he has just received three large boxes of grapes from his son John who lives on a fruit farm near Detroit, Mich. Dick says those grapes suer did make his mouth water—but we are from Missouri—show us Dick, bring in some, how do we know?

Oldest of Brazilian Cities.

Bahia, once the capital of Brazil, is still in many ways the center of art and religion in that largest of South American republics. She is the oldest of Brazilian cities and those of her present inhabitants who are descended from a long line of natives of the place—as many of them are—look down on Rio and Sao Paulo as upstarts and parvenus among municipalities.

LIFE WAS A MISERY TO HER

Says this Woman Until Relieved by Lydia E. Pinkham's Vegetable Compound.

Carrollton, Ky.—"I suffered almost two years with female weakness. I could not walk any distance, ride or take any exercise at all without resting. If I swept the floor or did any kind of work it would bring my sickness on. I was weak and languid, had no energy, and life was a misery to me. I was under the care of a good physician for several months and tried other remedies. I had read of Lydia E. Pinkham's Vegetable Compound and decided to try it. After taking twelve bottles I found myself much improved and I took six more. I have never had any more trouble in that respect since. I have done all kinds of work and at present am an attendant at a State Hospital and am feeling fine. I have recommended your Vegetable Compound to dozens of my friends and shall always recommend it."—LILLIAN THARP, 824 S. 6th St., Carrollton, Ky.

If you have any symptom about which you would like to know write to the Lydia E. Pinkham Medicine Co., Lynn, Mass., for helpful advice given free of charge.

Hubby Came, Too.

During a blowing snow storm one night a knock sounded at the door, followed by a familiar "Hello!" Recognizing the voice of one of my friends, I hastened to the door, opening it only the required distance for her admittance. Then, in order to keep the snow from blowing in, I forced the door shut with a bang.

When I turned to my visitor to take her wraps, I discovered that she was laughing heartily. "Will you please let my husband in?" she said. "He's on the ouside."

Only the real amusement of both of them broke the spell of my most embarrassing moment.—Exchange.

BOCHEE'S SYRUP

A Harmless Soothing, Healing Remedy for Coughs and Colds.

Here is a remedy for coughs, colds, bronchitis, throat irritation, and especially for lung troubles, that has been sold all over the civilized world in many thousands of households for the last fifty-four years. Its merits have stood this test of time and use, and surely no test could be more potent or convincing. It gives the patient with weak and inflamed lungs a good night's rest, free from coughing, with easy expectoration in the morning. Try one bottle, accept no substitute. For sale by all druggists and dealers in medicine everywhere—Adv.

An Objection.

"Are you in favor of a front porch campaign?"

"Not me," replied Farmer Corntossel. "Miranda would never stand for having the grass all trampled out in the front yard."

Cuticura Comforts Baby's Skin

When red, rough and itching with hot baths of Cuticura Soap and touches of Cuticura Ointment. Also make use now and then of that exquisitely scented dusting powder, Cuticura Talcum, one of the indispensable Cuticura Toilet Trio.—Adv.

No More Snuggling.

"The honeymoon must be over."

"Why do you say that?"

"They now carry individual umbrellas."

Over fifty years ago a young physician practiced widely in a rural district and became famous for his uniform success in the curing of disease. This was Dr. Pierce, who afterwards established himself in Buffalo, N. Y., and placed one of his prescriptions, which he called "Golden Medical Discovery," in the drug stores of the United States so that the public could easily obtain this very remarkable tonic, corrective and blood-maker. Dr. Pierce manufactured this "Discovery" from roots and barks—a corrective remedy, the ingredients of which nature had put in the fields and forests, for keeping us healthy. Few folks or families now living have not at sometime or other used this "Golden Medical Discovery" for the stomach, liver and heart. Over twenty-four million bottles of this tonic and blood remedy have been sold in this country.

W. N. U., DES MOINES, NO. 42-1920.

FARM ANIMALS

CLEAN PENS ARE IMPORTANT

Development and Perpetuation of Roundworms Is Fostered by Manure-Covered Lots.

Investigations reported in a recent technical publication of the bureau of animal industry, United States department of agriculture, disclosed additional evidence of the importance of keeping young pigs in clean pens that have not been contaminated by other swine.

A roundworm of pigs, known as Ascaris suum, is held responsible not only for many deaths among swine, but for a large proportion of the runts among these animals. Development and perpetuation of the roundworms is fostered by badly drained and manure-covered hog lots, which are on this account dangerous to young pigs and not good for pigs of any age.

Eggs of the parasite may remain alive in soil for five years and even longer. Places occupied by pigs harboring the adult worms in their intestines will become badly infested with the eggs. Pigs farrowed and kept in such places are certain to pick up many of these eggs, and even suckling pigs are liable to swallow eggs present in dirt adhering to the teats of the sow.

Investigations by the bureau have proved that after the eggs have been swallowed and have hatched in the intestine the young worms do not immediately settle down, but penetrate the wall of the intestine and travel to the liver and the lungs. From the lungs they crawl up the windpipe and then down the esophagus and return to the intestine. Only after they have passed through the lungs do they establish themselves in the intestine and grow to maturity.

In passing through the lungs the young worms cause more or less damage to these organs. Pneumonia may result and the animal may die about a week or ten days after infection. Symptoms of this pneumonia among pigs are commonly known as "thumps." Not all cases of "thumps" come from this source, but the worms are frequently the cause. Young pigs are more susceptible than older pigs to infection, and are also more likely to suffer severely from migration of the young worms through the lungs.

There is no treatment for the lung stage of the parasite. If the pig survives he may later be treated with

Hogs Kept Under Conditions Shown Here Are More Susceptible to Disease Than Animals Under Sanitary Conditions.

worm remedies to remove the worms from the intestine. In such cases, however, it commonly happens that the animal has been so seriously injured through the lungs that even after their expulsion from the intestine the pig is unable to make up for the setback he has received, although he does better than if allowed to go untreated.

PROVED SIRE OF HIGH VALUE

Breeders Could Make Much Improvement by Paying More Attention to Male Animals.

The breeder who is making real progress is the man who owns a proved sire. Breeders could improve their business by paying more attention to this part of their business. Steps should be taken to prove out the sire before he is widely used or before he is discarded.

WHY HOGS LIKE TO WALLOW

Animal So Constructed That He Does Not Perspire and Must Cool His Body in Water.

The hog is so constructed that he does not sweat, or perspire, but must cool his body either in the shade in moderate weather or in water during high temperatures; so, just as it is natural for the duck to swim, the hen to scratch, or the mule to kick, so it is for the hog to wallow.

HEAVY SILAGE RATION BEST

Enables Baby Beef Feeder to Get Young Animals Up to Full Feed in Short Period.

The heavy silage ration for baby beef the first part of the feeding period enables the feeder, when grain is added, to get the calves up to a full feed in a shorter period of time than when grain is fed from the beginning.

TWO METHODS GIVEN FOR MAKING LIME FOR IMPROVEMENT OF SOIL

This Outfit—Small Crusher Operated by Farm Tractor—Produced 300 Tons of Lime in 30 Days.

With the building up of soil by proper crop rotation becoming more general the use of lime for improving agricultural soils is increasing. Limestone soils are universally recognized as rich soils and especially suitable for stock farming, where proper mixed hay and pasture are vital. By the use of ground limestone many farmers, frequently at a moderate expense, can make their soils better, say specialists of the bureau of soils, United States department of agriculture.

Where lime can be bought from large plants producing it cheaply, it is doubtful whether the farmer in a limestone region would do well to make his own lime. In other cases, however, the existence of local material and the advisability of using power or labor which would otherwise go to waste make it the best policy to produce lime on the farm. In some rural communities are sources of power, such as sawmills, which are only used for a part of the year. In cases of this kind it may be possible to utilize this power for limestone grinding, and thus lower the price of the product. In other cases, as at prisons, reformatories, institutions for the insane, etc., there is available a large amount of unpaid or cheap labor which may be used to produce lime for the institution farm or even for sale to neighboring farmers.

Burning or Grinding.

Given a source of limestone or shell, the farmer has a choice of either grinding the material finely and using it in the form of carbonate or burning it and using it in the form of oxide or quicklime. In the early days of this country the burning process was the only one employed, but at present ground limestone is popular in many sections where long freight hauls are not involved. Good results agriculturally are obtained from lime in either of these forms.

Burning has certain advantages for small operations, chiefly because it takes no expensive equipment or power plant. Where only a small amount is needed all that is necessary is to use the so-called heap method. In this system a layer of two rows of dry cordwood mixed with a lighter kindling is first laid down, next a layer of coal, next a layer of limestone, and above this several layers of limestone and coal. One part of coal should burn several parts of limestone. The outside of this heap is covered with soil and the kindling lighted. The burning of the wood and coal turns the whole amount of broken limestone into burned lime, the carbon dioxide escaping as a gas through an opening left in the top of the heap for this purpose. The process is not completely satisfactory unless the gas is allowed to escape.

This method produces lime which is mixed with ashes, but as the coal ashes are harmless and the wood ashes beneficial to the soil no ill effects result from this mixture. Oyster or clam shells may be burned in a similar manner or in a special rack made of cordwood. In all cases the heat must be controlled and spaces must be left between the stone or shells for the flames to penetrate.

Where larger quantities of lime are to be made it may be advisable in some cases to construct a small cylindrical kiln, which may be lined with fire brick or sandstone. This is rarely advisable for the farmer at present, however, as under these conditions it would probably pay him better to purchase a grinding outfit.

Community Production.

The use of small crushers and pulverizers to produce ground limestone has proved satisfactory in many localities. They are naturally not as economical as a large plant but may save high freight rates to inaccessible localities. They are often employed also at off seasons of the year where labor would otherwise not be used to the best advantage. The most convenient outfit is a combination crusher and pulverizer, but good results are secured from small pulverizers, although in this case a good deal more hand sledging has to be done. Portable outfits may be moved from place to place and thus utilize outcrops and save hauling.

Where associations of farmers are buying machinery a stationary plant may be installed which should produce limestone at a low cost per ton. As each case is a business proposition which will have to be considered by itself, it is difficult to advise as to which type of outfit is the best purchase.

Application of Limestone.

Limestone ground to pass through a ten-mesh screen, all finer particles included, is recommended by the department of agriculture for the common application of two tons to the acre. Either very finely pulverized limestone or burnt lime is recommended where an application of only a few hundred pounds to the acre is to be made. For general use in the more humid portions of the country it advises an application of one to two tons of ground limestone to the acre, or one-half that amount of burnt lime, once in a rotation of not more than five years unless actual test proves this unnecessary. For alfalfa and permanent pastures, an initial application of double these amounts should be made. Lime may safely be used at any point in the ordinary farm rotation without serious loss of the material. If applied in connection with tilled crops, its mixture with the soil will be insured. The effects of lime are likely to be in proportion to the thoroughness with which it is mixed with the soil in which the crop roots develop.

SUPERIOR QUALITIES FOUND IN NEW WHEAT

Acreage in Kansas Estimated at About 500,000 Acres.

Kanred Is Variety Developed by Kansas Agricultural Experiment Station—Widely Grown in Many Western States.

Deep interest in the success of Kanred wheat reported from Kansas is being shown by specialists of the bureau of plant industry of the United States department of agriculture. According to reports this year's acreage of Kanred is estimated by Kansas authorities to have been about 500,000 acres. Of this total area 15,000 to 20,000 acres, grown by selected farmers, have been carefully inspected in the field by representatives of the Kansas agricultural college and certified as furnishing sources of seed of high quality and purity.

Kanred is a variety of hard red winter wheat developed by the Kansas agricultural experiment station. It was obtained by selection from the Crimean variety of hard red winter wheat introduced from Russia by the bureau of plant industry of the federal department of agriculture and widely grown in Kansas and adjacent states.

It was developed by the Kansas scientists with special reference to conditions there and has proved to be a better yielder by three to five bushels to the acre compared with other hard red winter wheats. Its better yield is due in part to greater resistance to winterkilling and to rust and in part to its slightly earlier ripening, say specialists of the department.

MAKE WAR ON TUBERCULOSIS

Campaign Now Being Conducted in Forty-Five States in Co-operation With Owners and Officials.

The campaign to eradicate tuberculosis from live stock is now being conducted in 45 states in co-operation with the live-stock owners and the respective state live-stock sanitary officials. Arrangements are being made to have other states engage in the work. However, state and federal officials cannot prevent losses from the disease without the assistance and hearty co-operation of the owners.

Locations.

"A great many campaigns have been successfully conducted from front porches."

"Perhaps," rejoined Senator Sorghum. "But many poems have been written in attics. I don't regard a front porch as any more essential to a politician than an attic is to a poet."

Making It Easy.

To facilitate the scheme for taking the finger-prints of infants in America, it is proposed to make the impressions in jam.—The Passing Show (London).

A taste for minding one's own business is often hard to acquire.

Keep Your Blood Pure Nature Will Do the Rest

Did you know that ninety per cent of all human ailments depend upon the condition of your blood?

Nature gives her warnings in various unmistakable ways, so that when the appetite fails, and you become weak and listless and a general run-down condition seems to take possession of the whole body, it is an unfailing sign that impurities will steadily accumulate until your general health will be seriously affected. You should recognize the importance, therefore, of very promptly cleansing out the system, and keeping the blood supply pure and robust.

Get a bottle of S. S. S. at your drugstore to day, and note how promptly it builds up the appetite and gives new strength and vitality. Write for free literature and medical advice to Chief Medical Adviser, 153 Swift Laboratory, Atlanta, Ga.

COMMON ERROR IN GRAMMAR

Words "Begun" and "Began" Are Wrongly Used by Those Careless in Their Speech.

It is quite common to hear some one say, "I begun to do that work yesterday," "the battle begun between the two armies," etc. This use of "begun" to express the past tense (sometimes called the preterit) of "begin" is not incorrect, according to some authorities on the uses of words, but there is a fairly general agreement that the better word to use is "began." If you wish to safeguard yourself against possible criticism, say "I began to do that work yesterday," "The battle began between the two armies," etc., not "begun."

Richard Grant White, in "Words and Their Uses," a high authority, criticizes and condemns the use of "begun" instead of "began" to express the past.

Of course, it is incorrect beyond any doubt to say, "I have began" to express the perfect tense of "begin." Say, "I have begun," never "I have began."—Columbus Dispatch.

Catty.

"What a high color Grace has."

"Of course it's high. She won't use any of the cheap kinds."

If some fools were to remain quiet they might acquire a reputation for wisdom.

WHERE TOMMY MADE A POINT

Remarkable That School Teacher Had Never Noticed That Quite Simple Truth Before.

Arithmetic, according to the average small boy, was simply invented in order to give teachers a good excuse for punishing their unhappy pupils. And certainly little Tommy Smith found it the unpleasant feature of his young life.

"Now, Tommy Smith," said the school teacher one morning, during the usual hour of torture, "what is the half of eight?"

"Which way, teacher?" asked the youngster cautiously.

"Which way!" replied the astonished lady. "What do you mean?"

"Well, on top or sideways, teacher?" said Tommy.

"What difference does that make?"

"Why," Tommy explained, with a pitying air, "half of the top of eight is nought, but half of it sideways is three."—London Answers.

The Color of It.

"The sentry you see is a green recruit." "I suppose that is why he looks so blue."

A widow never tells her age; she's always old enough to know better.

COUNTRY'S FIRST CORN MILL

Recent Discoveries Establish Its Site at a Point on the St. Croix River, Eastport, Me.

The site of what undoubtedly was the first tidewater mill on the American continent has been discovered at Red Beach, Me., where Low's brook empties into the St. Croix river at a point nearly opposite the southern end of Dochet's island, where De Monts and his men settled in the year 1604, three years before the settlement of Jamestown. In excavating for a fish pond near his summer home, R. S. Mc-Carter of Cambridge, Mass., unearthed the unmistakable remains of an ancient dam of stone and timbers. Comparing the site with the original map of the island, authorities agreed that it must have been the site of the water mill mentioned in the old records as employed by Sieur De Monts and his men to grind their corn, being the largest stream within an area of several miles on either side of the river.

Trouble.

ERADICATE CROP OF QUACK GRASS

Courage, Determination and Attention to Detail Make the Outcome Certain.

ROTATION FOR LARGE AREAS

Land Should Be Plowed in Fall and Double-Disked at Once, Lengthwise of Furrows—Some Hand Work May Be Necessary.

Quack grass can be killed out completely without losing a crop, says A. C. Arny, assistant agriculturist at the Minnesota College of Agriculture. To secure such a result, however, the crops grown must be such as to admit of a thorough clean-up of the fields every two or three years. Courage to do the work, a determination to win, and attention to detail make the outcome certain.

For the Small Spot.

For spots not more than three or four rods square, three plans may be followed:

1. Cut the quack grass as close to the ground as practicable, cover the spots and the ground two or three feet beyond them in all directions, with tar paper, lapping the paper about four inches and weighting it down with stones or soil. Leave the paper on eight or ten weeks. This method is most effective when started from May 1 to August 1.

2. Keep the spots thoroughly cultivated or hoed up to the latter part of May, and then plant corn or late cabbage. Keep these plats clean of quack grass.

3. Apply sodium arsenate, eight pounds dissolved in 20 gallons of water, to each square rod of infested soil. This will kill the quack grass and all other plants. This treatment leaves the soil sterile for some time afterward. Sodium arsenate is a deadly poison and the greatest care should be observed in its use.

For the Larger Area.

For larger areas a rotation must be used that gives chance for an exceedingly thorough clean-up often enough to keep the quack grass from recovering.

A four-year rotation of grain, clover, corn and corn meets this demand. In following such a rotation, the area should be plowed as early as possible in the fall, five or six inches deep, and should be double-disked at once,

Disking Corn Stubble to Kill Out Quack Grass.

lengthwise the furrows. If the quack grass shows growth afterward the diskings should be continued through the fall. In the spring, diskings or cultivation should be continued often enough to keep the quack grass from showing green above the ground until corn-planting time. Usually the replowing of the field just before the planting of the corn should be resorted to. Corn should be checked and cultivated often enough to keep it clean. Hand work may be necessary to get all the quack grass out of the hills. As soon as the corn crop is off in the fall, the land should be plowed and manured. In the spring again disking should be resorted to and should be kept up as during the previous year. In the third year grain and clover should be sown. In the fourth year the clover crop should be cut in the latter part of June, then the ground should be plowed immediately, three or four inches deep, and double-disked at once and often enough to keep the quack grass out until August 15. The ground should then be replowed five or six inches deep and the disking continued through the fall. Corn should be planted the next year again.

A 40-acre field divided into four equal parts, two of which are in corn, one in grain and the other in clover, can be handled in this way by one man with one team.

Quack grass cannot stand up against this kind of treatment.

CUTTING ALFALFA CROP ONCE

Aftermath Furnishes Pasture for Live Stock at Time When It Is Usually Needed.

When the alfalfa crop is cut but once, that cutting is best made when most of the seed is in the hard dough stage. Hay cut at this stage of maturity has practically the same feeding value as that cut earlier, according to analyses made at the Iowa experiment station. After the one cutting is secured, the aftermath furnishes pasture at a time when it is usually most needed.

GOOD PLAN TO PICK SEED CORN IN FALL

Select Ears From Plants Which Have Done Well.

Some Characteristics for Farmer to Keep in Mind When Making Selection of Best Seed for Next Year's Crop.

The best way to select seed corn is from the standing stalks. Why? Because we can choose ears from plants which have produced well in competition with neighboring plants. After the corn is cut we cannot tell how it grew.

This is the reason why some of the best seed corn growers go through their fields as soon as the ears are ripe and hard and before heavy frosts or autumn rains injure the corn to pick out their seed for next year.

Selecting Seed Corn Under Field Conditions.

Some men mark the selected stalks, but do not cut them until after the field is cut. Others husk the selected ears before cutting and hang them up at once in a place where they will dry quickly.

The characteristics to keep in mind in selecting corn in the field are: A sturdy, upright stalk of medium height and thickness, with short joints, and broad leaves carried well down, which stands in an average hill on average soil; an ear well matured and low set, of fair size, with straight rows and fairly well-covered tip, with deep uniform grains, having a medium sized cob, a rather small butt, and a husk protecting the tip; the ear hanging over so as to shed the rain. Although some strains of corn have been developed that tend to produce two ears to the stalk, one good ear is all we should expect where the stand is thick enough. It is much better to obtain one good ear than two nubbins.

Anyone who takes an interest and pride in his corn will find profit and satisfaction in field selection, especially if it is followed up for several years.

ACID PHOSPHATE BIG FACTOR

Large Increase in Corn, Wheat and Clover Hay Obtained at Ohio Experiment Station.

The Ohio station in testing manure and fertilizers has secured an average yield of corn of 67 bushels per acre for 21 years, or an increase of 35 bushels over the yield where no manure or fertilizer has been used. The corn crop was grown in a rotation of corn, wheat and clover. The manure applied in this case had been re-enforced in the stables at the rate of 40 pounds of acid phosphate per ton of manure. Eight tons were applied to the clover sod in the winter before it was plowed down for corn.

The experiments show that manure loses much of its fertilizing properties when allowed to be leached by rains, and also that manure needs re-enforcement with phosphorus to be most effective. From this application of manure and acid phosphate there has also been an average increase of 15 bushels of wheat and 2,500 pounds of clover hay over the untreated plots in the rotation, the wheat and clover following the corn without any further manuring or fertilizing.

TO HANDLE STUBBLE FIELDS

If Cultivated Crops Are to Follow Good Plan Is to List Land Soon as Possible.

One of the best ways to handle stubble fields on dry lands is to disk the stubble as soon as possible after the crop is removed, according to Professor Kezer, Colorado agricultural college. If the land is to be put back into fall wheat, plowing should be done immediately. The earlier the plowing is done, the better the chances of getting a crop. This is due to the fact that nature requires some time to properly settle and compact the seedbed.

If the stubble land is to be put into cultivated crops the following year, a good method to follow and a cheap one is to use the lister just as soon as the grain is off if possible. This is one of the cheapest methods of controlling weeds and putting the land in shape to catch moisture. It also is a very good way to control blowing.

Kill That Cold With

Sheriff Jas. A. Ross took another offender of prohibition law into tow the other day. The fellow was wanted by the Sheriff of Wright county where an illicit still had been located Some time ago, the Wright county sheriff gathered in this fellow but in some manne he made a getaway He was finally located near Hayfield and Sheriff James arested him. Jim held him until the Wright county sheriff arrived It is our understanding that the fellow is out on $100 bonds awaiting the action of the Wright county grand jury. —Democrat.

PLACING CROWN ON PAGODA

Solemn Ceremony at Mandalay That Attracted Crowds of the Devout Followers of Buddha.

A curious festival was held not long ago in Mandalay, the chief town of Burma. A new pagoda dedicated to the Buddhist religion was to be completed by the placing of a huge crown or thi upon its summit, more than 300 feet above the ground.

To witness the ceremony came Buddhists from Indo-China, from the Himalayas, from Laos and Chan and Siam. Warriors from Katschin, Sorcerers from Mot and people from other places made a medley of languages like that at Babel.

On a street corner would be seen a barber pulling a customer's tooth. On another corner a Mohammedan bird dealer sold caged paroquets to Buddhists who piously set them free. At very modern booths one could buy ice cream, soda or tea. Mandalay was a gorgeous spectacle and the new pagoda was the center of it.

Every pagoda has at its summit a thi, or cap, the placing of which is often a herculean task. The one now to be raised weighed several hundred pounds and consisted of a glided ball and crown and a great spindle above it.

To get it to the top an inclined plane of bamboo scaffolding like a huge toboggan slide had been built, and was decorated with silk flags and umbrellas. Up the inclined plane the heavy cap was slowly pulled. Six days were required for the ascent and a seventh to fasten it in place.

Surprise on Rev. and Mrs. A. E. Buriff

Tuesday evening the membets of the Methodist Church gathered at the Idle Hour Theatre, and we must not forget to mention that the ladies brought well filled baskets of good things to eat. The object of all this commotion was a surprise party on Rev. and Mrs. A. E. Buriff to celebrate their Silver Wedding Anniversary. When everything was all set the Reverend gentleman and his wife were invited "to attend the show" and to their surprise found quite a gathering of merry makers. General visiting, games of all kinds, music and singing made up the entertainment. The "eats" were very fine and held a prominent place on the program. Needless to state that all had a most enjoyable time at the party and all extended their best wishes to the Bride and Groom of Twenty-five summers, and hoped that they enjoy many more years of happy wedded life.

CATTLE RUSTLERS USE AUTOS

Cattle Are Now Taken Across the International Boundary by New Method.

Regina, Sask.—The motorcar, it seems, has achieved another success by winning its advent into the cattle rustling business. The old and well-known practice of cattle rustlers, when they used to drive their stolen herds before them, is now a thing of the past. A few days ago three calves were stolen from herds near Bengough and spirited across the international border by two motorcars. Three of the rustlers were arrested on this side of the line and two others in Montana and are now awaiting trial.

Miss Minnie Lenz was absent from her duties at the post office several days last week as she was recovering from the effects of having her tonsils removed.

A Psychologist's Morning After.

I had two days spoiled by a psychological experiment with mescal, an intoxicant used by some of our southwestern Indians in their religious ceremonies—a sort of cactus bud of which the United States government had distributed a supply to certain medical men, including Weir Mitchell, who sent me some to try. He had himself been "in fairyland." It gives the most glorious visions of color—every object thought of appears in a jeweled splendor unknown to the natural world. It disturbs the stomach somewhat, but that, according to W. M., was a cheap price. I took one bud three days ago, was violently sick for twenty-four hours, and had no other symptom whatever except that and the katzenjammer the following day.—From Letter of William James, Atlantic Monthly.

Aluminum Brass.

Experiments aimed at developing the resistance of brass to the action of sea water, with a view to its employment for constructing submarines in France, have, it is reported, shown some remarkable results from the addition of aluminum. The internal structure of the alloy is strikingly changed by a very small percentage of aluminum and the color changes are surprising.

From half of 1 per cent up to 5 per cent of aluminum gives the brass a deep golden color. If the quantity of aluminum is increased beyond 5 per cent a superb rose color results, which reaches its maximum when the aluminum amounts to 7 per cent. With 10 per cent of aluminum the color turns to a silvery white.

The Faith Cure.

"Mamma," said little Betty, "my kitty is sick and I have been trying to give her some of my medicine, but she won't take it." "Of course not," replied her mother. "Cats never take medicine when they are ill." "Well, I declare!" exclaimed Betty. "Who'd think a little kitten like that would use the faith cure?"

The Klemme Times $2.00 Per Year

Fall Suggestions for Wearing Apparel

You'll need for regular work on the fa m and in town

We herewith submit a list for your approval:

Mens husking mitts, double faced, dozen	$1.80
Extra heavier ones, dozen	2.10
Also the stitched all around, extra sizes and heavy, dozen	4.00
Men's husking gloves, flannel outside, dozen	2.10
Men's plain outside gloves, dozen	1.80
Men's extra heavy cotton gloves, dozen	3.00
Men's extra good Rockford hose	20c
Men's Leather vests	$9.85 to 16.00
Men's Work shoes in any weight you desire	$2.60 to 6.50
Oshkosh overalls, the best eastern demin	$3.25
Gross Bros. 220 count eastern denim	2.75
Men's flannel shirts, all colors	3.50 to 6.00
Underwear---Union suits, also two-piece garments, all weights and prices.	
Buy a pair of good rubber boots---you'll need them during the Fall rainy period, Prices	5.00 to 6.50

Hart Schaffner & Marx Suits and Overcoats

See the new Fall and Winter models in Suits and Overcoats that are being shown in a wider range of fabrics and colorings than ever before. These garments are popularly priced at

$40.00 $45.00 $50.00 to $65.00

Mothers

Do not wait until the best selections are sold up. Your boys may need suits and overcoats for the coming winter. Call in and see haw moderately we have them priced.

Our stock in every department is larger than at any previous season.--- We've anticipated a big business---it's on the way---IN FACT ITS HERE.

ARZ TELLS OF CALIFORNIA

Continuing our article from last ek it takes us up to August 16th, which date Fred Haupt left Lodi r home.

A few days later Barz and Theil ok a trip to Murphy's Cave which about 125 miles east of San Fran- co near Carson Hill Gold Mine. e cave was found in 1885 by a n named Murphy when he was ploring about the country and he cidentally looked down in a hole ere he saw three skeleton lying. e hole was further examined and e cave discovered. The cave is a k formation and the inside greatly sembled large pieces of ice hang- g from the ceiling and just as ar. The cave is 160 feet deep, electric lighted and has 27 flights stairs and as many rooms. They so visited the gold mine at Carson ll which was very interesting. It a large mine and produces from 25,000 to $130,000 worth of gold onthly.

Their next trip took them to San rancisco where they took in the any beautiful sights of the "Golden ate" City where they spent two ys looking over the interesting aces. In the meantime they had ken a trip to the Bakersfield Oil elds and also visited a little town the name of Schaffner at which ace Theil preaches once every five eeks. Thet own was started by a mbr of members of his congrega- on who went to settle in the new untry.

Mr. Barz later went to Los Angeles r a visit with Walt Bloom. He says e Blooms are all well and prosper- g. They live in one of the nicest uses and in the best part of the ty. Walt drives a big fine car and ok Mr. Barz around quite a bit ring his stay of some ten days. ey drove over to Long Beach and re Mr. Barz saw Geo. Pabst. George the present time was taking life sy but was anxious to get back in e drug business and so was spend- g his time looking up a location in e city. While at Los Angeles Barz ok a boat trip around the harbor d saw one of Uncle Sam's Fleets nchored there. It is supposed to be e of the best harbors in the United ates now as the government has eepened it and built a breakwater better protect the ships in the har- or during a storm.

Mr. Barz then started on his home- ard trip but stopped at El Centro here he saw Geo. Knapp, a former lemme man. Mr. Knapp built a eneral store on the corner where e Wellemeyer store now stands. r. Knapp and Mr. Barz drove to the order line one day to a town by the me of Calexico which is the bound- ry between the U. S. and Mexico. e left Mr. Knapp on the fourth of ctober and his route home took m thru El Paso, Santa Rosa to ansas City and then home. He will ll something of the farming condi- ons in a later issue.

TWINS—A BOY AND A GIRL

A fine pair of twins came to make eir home with Mr. and Mrs. John ewberger last Thursday morning. ll concerned are doing nicely but ohn is more than strutting about ese days for he has reasons to be roud of the fine youngsters. The oy weighed nine pounds and the rl eight pounds so you can see they e sure fine specimens. Congratula- ons are extended.

ERMAN COOBS BUYS BLACK-SMITH AND WAGON SHOP

Herman Coobs purchased a black- mith shop at McGregor, Iowa, last eek and left Saturday afternoon for at city. He took possession of the usiness Monday. The shop is one f the leading shops of the city and equipped to do iron and wood ork. Herman is an expert mechanic nd will no doubt make a success in e business. He has been connected ith the Pavey shop here for some me and also while in the army over eas he was engaged in the blacksmith ade for Uncle Sam. Herman is a ne young man a hustler and thoroly nderstands the work. We join his any friends here in wishing him uccess at McGregor.

HENRY COOBS MARRIED

Relatives and friends of Henry Coobs received announcements the fore part of the week saying that Miss Lucinda A. Kinsley, of Mc-Gregor, was united in marriage to Mr. Henry H. Coobs, also of the same place, on Wednesday, October 13th. The announcement further states that they will "be at home after the first of November on Elmhurst Farm, McGregor, Iowa."

This is news which Klemme friends of the happy couple are glad to learn. Both of the young people are fine young people and come from the best families of McGregor. The groom is especially well known to Klemme people as he is a brother of Mrs. W. F. Pavey of this place and has pent a great deal of time here. The Times joins the friends of Mr. and Mrs. Henry Coobs in wishing them the world's best and may they enjoy a long and happy wedded life.

A New Version

Mary had a little lamb, its fleece was white as snow; it strayed away one day where lambs should never go. And Mary sat her quickly down and tears streamed from her eyes; she never found her little lamb for she did not advertise. And Mary had a brother John who kept a village store; he sat him down and smoked his pipe, and watched the open door. And as the people passed along and did not stop to buy, John still sat and smoked his pipe and blinked his sleepy eyes. And so the sheriff turned him out and still he lingered near, and Mary came to drop with him, a sympathetic tear. "How is it, sister, can you tell, why other merchants here, sell all their goods so readily and thrive from year to year?" Remembering her oun bad luck the little maid replies: "These fellows get there, John because they advertlse."
—Headlight, Haskings, Nebraska.

Bad Water at Kanawha

Last week the local board of health sent away four samples of our city water to have it tested and flnd out if possible what was causing the disagreeable taste and odor that it has had the past few weeks. The 4 samples, one taken direct from the well and the other three from different parts of toun sent to the state laboratory at Iowa Ctiy and they reported water not up to standard but it did not contain typhoid germs.

The local board of health has asked the state board to send a chemist here to make a thorough examination of the water and he is expected in the near future.

The epidemic of sickness that has been here lately is not caused by the city water as has been reported and in proportion to population Kanawha has no more sickness than the surrounding country. —Kanawha Reporter.

Only "Load Up" Right.

The tasks you add to your already full program must be related to your life work. The magnet won't hold soap, and froth and wood. Its affinity is with things of steel. So your efforts must be related to your talents and experience if they are to be a help in your growth. One added task above your specialty would be enough to swamp a man who doesn't know your line. To you it's just another added opportunity. To be sure it will require some effort, but nothing in comparison to what it would require in others. You take the load on unconsciously. It's merely another turn or two of the kind you do right along. But in time those few extra daily turns make you a tower of strength. There is no limit to your development when you load up right—Grit.

Too Tame for Him.

"Gabson likes to hear the sound of his own voice."

"That explains his penchant for monologues. But if he loves the sound of his own voice so much why doesn't he talk into a phonograph and have his remarks 'canned' for future use?"

"He wouldn't have the satisfaction of seeing the phonograph writhe and fidget."

BAKE SALE Saturday afternoon at the J. N. Day store by the ladies of the Methodist Episcopal church. 7-1c

Mrs. G. W. Kluckhohn and Mrs. Frank Kluckhohn and the baby left for Des Moines last Thursday for a few days visit.

The "Front Porch" Campaign.

—Gale in Los Angeles Times.

Is Your Family Missed?

We presume there never was a newspaper in any locality that gave all the local happenings. It is very often the case that someone comes or goes that the reporter does not see. So it sometimes happens that the family is missed several times. They get the impression that the editor does not care to mention them. That is a mistake. In most small towns the work of getting the local items is the hardest part of the newspaper business. Editorial matter and general news is obtained by reading, by study and the use of the scissors. Personal and local happenings cannot be obtained from any paper or by study—not by a jugful. It requires real physical and mental labor to gather a few columns of personal items and local news and it keeps us on the jump. You can help us make this a better paper if you will give us any bit of news you happen to know and don't be afraid to tell the editor if you have friends or relatives visiting you, for there are lots of your friends interested in other friends visiting you. If you are taking a trip, or have returned from a trip, either business or pleasure, tell the edito. We want to have all of the news all of the time so please help us to get a better paper by telling us the news in person or call us on the phone.

ROBBERS GET $500 AT FORSET CITY

Saturday night robbers were operating in Forest City. They broke into Sam Latchman's clothing store and took away about $500 worth of clothing. They also attempted to blow the safe at the post office but this was not successful as they failed to make the explosive tear off the safe door. It is evident that the yeggs were frightened away after this attempt for no other place in town was molested. No clew to the robbery was obtaintd although it is thought they are the gang who have been operating in Iowa all summer.

We Have.

R. J. S. wants to know if we have ever met the people who never go to bed, but retire; who never sleep, but slumber; who never get up, but rise; who never eat, but dine; who never drink, but indulge; who never talk, but converse; who never read, but peruse; who never buy, but purchase, and who never get sick, but become ill?—Cincinnati Enquirer.

Washington Honored While Alive.

Washington was the only American whose birthday was publicly celebrated while he still lived. February 22 was quite widely observed while he was president.

Is This a Great Thing?

There has been lots of "hot air" distributed in the days gone by and many have been hot air artists, but it remained for a Webster City man to set the world agog over a claim to having invented an apparatus for burning air. Whatever the merlt of the Webster City man's invention, as The Herald Press remarked before it constituted an unparalleled marvel or magnificent fraud. That it may be the later is suspicioned by some who have noted the elaborate arrangements for secrecy. Any way A. W. Hill, a well known Belmond man has invented a device which "burns air" and he has not surrounded his device with secrecy at all. The Herald-Press will not now publish the ingredients which Mr. Hill uses but as said above he does not maintain any rigid secrecy. Some of the Belmond men who had planned for a big demonstration here of the Webster City device have, after looking over Mr. Hill's apparatus, concinded that such demonstration by the Webster City man is hardly worth while. Its quite interesting to see Mr. Hill run compresed air through water and then set it, the air, on fire. It is hot too. And it wonld run a gas engine or heat a house or cook a meal. The cost is another and quite a different matter.
—Herald Press.

GENERAL ELECTION IS NEAR

Ladies, Get In Line And Vote

Do you voters realize that the general election is only a few days away now? The date this year is November 2nd, which falls on the first Tuesday of the month. The law says that the November election shall be held on the first Tuesday after the first Monday and so it happened to come this year on the second day of the month. Ladies (and gentlemen,) pick your candidate and vote accordingly—just a tip to the ladies who have to vote for the first time—cast your votes on the good old Republican ticket.

WELLEMEYER INSTALLS FIRE HOSE

Art Wellemeyer installed two sets of factory fire hose in his store last week. One hose is on the main floor and one on the second floor. Each hose is fifty feet long and is fastened to a reel and all connected ready for business. With this outfit and fire breaking out in the building can easily be extinguished. It is a move in the right direction and such an outfit should be installed in every business place, it may mean less property destroyed by fire.

FIRST IRISH HUNGER STRIKER DEAD

Michael Fitzgerald, first of the eleven hunger strikers in the Cork jail to succumb to the results of their fast of more than two months, died at the jail Sunday night. His death may have some effect on the other strikers and they may take food it is said. Terrence McSwiney, lord may or of Cork is on his 70th day of the hunger strike but is very low. His doctor claims he will feed him when he becomes unconscious.

SONGS THAT ARE IMMORTAL

Greatest Minds of All the Ages Bestowed Their Labors on the Poems of Homer.

The Illiad and Odyssey were probably sung by Homer about a century and a half after the destruction of the town of Troy following the ten years of war that was waged in the cause of Menelaus, king of Lacedemon, whose consort had been carried away by the son of the Trojan monarch. The two poems are as old as David's psalms. Originally the Illiad would appear not to have been a single connected poem, but to have attained at a later period its present complete state.

About one hundred years after Homer, Lycurgus, the lawgiver of Lacedemon, brought these poems into Greece, and two centuries and a half later Pisistratus is supposed to have given them their perfect form. His son Hipparcus introduced the custom of reciting rhapsodies at the Panathenaia, or festival of the tutelar goddess. A more complete edition of the Homeric poems, from which the modern ones are taken, was prepared for Alexander the Great by Aristotle, which the former used to keep under his pillow in a golden case. Also Aratus, the astronomer, Aristarchus of Samos, and Aristophanes, librarian at Alexendria, bestowed their labor on these immortal songs. Because of the fine moral sentiment, Homer became the pattern of Thucydides, the favorite author of the greatest and noblest men, and one of the best teachers of the wisdom of human life.—Detroit News.

MAKE THE MOST OF TODAY

All That Has Gone Before Is Past and the Future Is Clouded With Uncertainty.

Today is what you have. It is also what you are. And again, Today is what you do. And if you haven't anything, and aren't anybody, and do nothing—why, then, for you there is no Today.

For Today is music. Today is art Today is literature. Today is joy. Today is work. Today is play. Today is life.

Yesterday is no problem—for it is past. Tomorrow is no problem—for it isn't here. Today is supremacy. Today is the world. Today is—Opportunity!

Crowd in upon it then. Today—take hold upon its faintest chance. Spread your smiles—Today. Be game—Today. Be glad and great—Today.

Today is the day—your day.

Today is Time and Change doing its job. Are you a vital part of the play? Today you may start out all anew. Today you may put to use what you learned a day ago. The center of your entire life may revolve about—Today.

But, above all things, do not fear—Today. And let all worry slide. All things that do not count—let them go, too. Work and help and love—Today.

For this Today will never dawn again!—George Matthew Adams in Good Housekeeping.

Snake's Menace Mere Bluff.

A really accomplished reptile recently arrived in London in the shape of the American "hog-nosed snake." When approached by man, it acts in a most disturbing way, flattening part of its body and inflating an awesome hood like a cobra. If ever anything said: "I am death," it is the hog-nosed snake receiving a caller. As you get nearer, its rage and menace increase, but, one more step, and there is an anti-climax. The hood collapses, the snake "flops" to the ground, turns on its back and appears perfectly lifeless. Stir it with a stick, and it remains as limp as a piece of garden hose, but turn your back and it will crawl away. The two specimens now in the Zoological gardens, Regent's park, have gone through their "act" so often that they are too bored to repeat it for the present. The point of the joke is that the hog-nosed snake is perfectly harmless.

Ed. G. Ell, accompanied by Elmer Fuller and Dr. Thomas drove to Des Moines Tuesday to bring back a Ford car and a truck.

Mother of John B... gartner Dead

OBITUARY MRS. JOHN BAUM-GARTNER, SR.

Mrs. John Baumgartner was born in Germany and iame to this country with her husband in 1871, when they settled at Strawberry Point, Iowa. In 1873 they came to Hancock County wheret hey have lived ever since. Mrs. Baumgartner was seventy-two yars old at the time of her death on Saturday, October 16th, 1920. Mr. Baumgartner is now seventy-four years of age. Mrs. Baumgartner leaves to mourn her loss her husband and eleven children, besides her grandchildren and her sister, Mrs. Louis Schlick, of Mason City, and other relatives. The boys are Herman of Waterloo; Otto of Mason City; Fred of Bonesteel, South Dakota; John of Klemme; Charlie of Fort Dodge; Will of Whitelake, South Dakota; Ed of Glenwood, Minnesota; August of Garner and Bennie of Mason City. The two daughters are Mrs. Bertie Smith of Newton and Mrs. Minnie Peterson of Mason City. All were present at the funeral with the exception of Will who was kept home on account of sickness in his family. All of the children are married and settled dow... The funeral services were held at ... Monday afternoon at 2:00 o'clock, from the house and at 3:0... o'clock at the Grace Methodist Church. Rev. Gauger, assisted by Rev. ..., preached the funeral. Rev. ... gave his sermon in English ... Rev. Hartke gave a short sermon in the German language. Evangelist Frank E. Linden and wife, who are conducting meetings at Garner, offered their services as singers.

Mr. and Mrs. Baumgartner are pioneers of Hancock county and went thru man yhardships in the early days and worked hard but have made a success in life. They have made a large host of friends and the funeral service on Monday was one of the largest ever held in Garner. Nearly all of the relatives from far and near were in attendance at the services, to pay tribute and to mourn the loss of a most beloved woman. The community extends sympathy to the bereaved members of the family.

CARD OF THANKS

We wish to thank our many friends and the Royal Neighbors for their kind assistance, and for the floral offerings presented in memory of our wife, mother and grandmother.

The Baumgartner Family

Cleaning Watches With Bread.

Perhaps the most novel use to which bread is put may be seen in some of the great watch factories, where more than forty loaves of fresh bread are sometimes used each day.

From earliest times in the history of watchmaking it has been the custom to reduce fresh bread to the form of dough. This dough is used for removing oil and chips that naturally adhere in course of manufacture to pieces as small as the parts of a watch. There are many parts of a watch that are so small as to be barely visible to the naked eye. The oil is absorbed by this dough, and the chips stick to it, and there is no other known substance which can be used as a wiper without leaving some of its particles attached to the thing wiped.

Enormous Sharks.

Sharks grow to a tremendous size. Rondeleti's shark, for instance, which is an inhabitant of tropical seas, attains a length of 40 feet. The great basking shark is even longer. A young fish of this species, brought to England and set up, is 17 feet in length. Full grown, this shark may measure 50 feet and rival the whales in girth and weight.

Saw-fish have been killed 30 feet in length, and it is not for a moment to be supposed that we have secured the largest. The fact is that the natural history of the seas is still very largely a sealed book, and that surprises are still in store for future generations.

Master of Circumstance.

We are forced to accept circumstances, to take them into account in our planning. No one is big enough to disregard them, but everyone should be big enough to refuse to be mastered by them. A creature of circumstance is always a poor creature. We have no right to allow the chance of today, the accident of tomorrow, to decide our future.—Exchange.

When Run-Down

COUNCIL BLUFFS, IOWA—"Some years ago I was restored to health by taking Dr. Pierce's Favorite Prescription. I went all down in health due to my having woman's weakness. I was nervous, suffered continually with backaches, pains in my side and bearing pains, and could not eat nor sleep. When 'Favorite Prescription' was recommended to me I began to take it, and it proved to be all that it is recommended to be for it completely cured me of all my woman's trouble and built me up in health and strength. It is the most wonderful medicine for women I have known."—MRS. E. SHANKS, 1219 Fifth Avenue.

Good looks in woman do not depend upon age, but upon health.

You never see a good-looking woman who is weak, run-down.

Dr. Pierce's Favorite Prescription is the best women's tonic there is. It is 50 years old, and its age testifies to its goodness.

SLOW DEATH

Aches, pains, nervousness, difficulty in urinating, often mean serious disorders. The world's standard remedy for kidney, liver, bladder and uric acid troubles—

may be checked and more serious conditions of the throat often will be avoided by promptly giving the child a dose of safe

PISO'S

BIG FACTORS IN TRAINING COLTS

Future Value and Usefulness Depend Greatly on Management While Young.

FIRST GET HIS ATTENTION

Education of Horse Is Based on Reward and Punishment—Many Animals Made Vicious and Unreliable by Carelessness.

The breaking and training of colts is of prime importance, because their future value and usefulness depend to a great extent on whether or not they are well broken. By a broken colt is meant one that is safe to handle in the stable or on the road and that will promptly obey the orders of the driver or rider.

Memory and habit are the two main factors with which we have to deal in training horses. A horse acts through instinct and habit, and one of its greatest characteristics is uniformity of conduct. What a horse is once trained to do he will nearly always do under like conditions.

Education of Horse.

The first thing in training a horse is to get his attention. The second is to make him understand what is wanted. The education of the horse is based on reward and punishment. The reward, a pat on the neck, etc., should immediately follow the act of obedience. The punishment, to be effective, must immediately follow the act of disobedience.

Few horses are inherently vicious. Many horses are made vicious and unreliable by the carelessness or unnecessary brutality of their trainers. If a horse kicks because the harness hurts him, or shies at something of which he is afraid, punishment is not justifiable. If, however, after being stopped, a horse starts before receiving the command to do so, he should be punished. Horses are naturally obedient, and when thoroughly trained their conduct is uniformly good.

Best Training of Horse.

A horse should be trained so that he thinks there is no limit to his power to do the things required of him, and believes that he has no power to do that which is against the wishes of his driver. Above all, never ask of a

Work Horses Should Be Given Liberal Amount of Grain and Hay—Water Is Also Important.

horse something he is unable to perform and then punish him because it cannot be done. If during the first year of his work a colt is hitched only to loads that he can pull, he will develop into a good work horse, while if he is overloaded a few times he may become balky and worthless.

All horses cannot be treated alike. A high-strung, sensitive horse must be treated gently, the dullard sharply. The same force applied to the sensitive horse that is necessary to make the dullard act would be likely to cause the high-strung horse to rebel, while gentleness would obtain obedience.

To train horses successfully a man needs to exercise great patience, gentleness and firmness. If you are training a horse and lose your temper, you had better put the horse into the stable until the next day, for further work at this time will be worse than useless and may undo the work already done.

KEEPING UP SOIL FERTILITY

Provision Must Be Made for Maintaining Production by Fertilizing and Liming.

A noted agricultural scientist once said that it is the business of every farmer to reduce the fertility of his soil by removing the largest crops of which the soil is capable of producing, but ultimate failure results unless provision is made for restoring and maintaining production by fertilizing and liming the soil until it becomes better rather than worse.

DAMAGE BY POOR SIRE

"A few poor cows may do a little permanent harm to a dairy herd, but a poor sire will do untold damage. One thousand pounds of milk per year is a conservative estimate of the improvement of the daughter's production to credit of a good sire."—Prof. W. J. Frazor, University of Illinois.

MOST EFFECTIVE WAY TO CONTROL INSECTS

Fall Plowing Is Easiest and Cheapest Method.

Better to Prevent Outbreak of Pests Than to Stamp Out Infestation Once It Is Established—Bugs Exposed to Sun.

Fall plowing is the most universally effective way of controlling the insect pests that annually cause great losses to the grain farmer. It is much easier and cheaper, says the bureau of entomology, United States department of

Fall Plowing Breaks Up Soil and Exposes Many Insects to Sun and Air.

agriculture, to prevent an insect outbreak in this manner than it is to stamp out the infestation once it is fully developed. The Hessian fly, so destructive to wheat, is one of the insects that can hardly be eradicated once it is established in the crop. Fall plowing is recommended because it breaks up the soil and destroys the grubs and pupae of many insects by exposing them to the sun and air.

Farmers' Bulletin 835, prepared by the bureau of entomology, tells how to control the most common and dangerous of the grain farmer's insect enemies. It gives briefly the life histories of the Hessian fly, army worm, cutworms, grasshoppers, white grubs, billbugs, corn-root aphis and wireworms, with authoritative data describing the characteristics of each pest and the best practical remedies for control. The bureau advises the grain farmer to plow in the fall, if possible; to keep a supply of insecticides and a spraying outfit on hand; to watch the crops carefully for an outbreak, and to report all outbreaks to the county farm adviser, or direct to the bureau of entomology, United States department of agriculture.

BALING MACHINE IS USEFUL

Farmer or Rancher Is Advised to Invest in Implement to Take Care of Hay Crop.

Hay as a cash crop has been exceptionally profitable for the past two years. As it is likely to remain so for several years to come, the farmer or rancher with a surplus of hay should find a baling machine a good investment.

A baler, used at odd times when other work is not pressing, makes an ideal implement for neighborly cooperation.

MOTHER NATURE RULES

"Mother nature is not interested in money and she holds the senior partnership in the cattle breeding business—great herds of beef cattle have been builded on slender means and under obvious handicaps."—Breeders' Gazette.

FORMATION OF GAS IN SILO

Good Way to Determine Its Presence Is by Lowering Lighted Lantern Into the Pit.

Gas may form in a silo at the time of filling and for a week or so afterwards. This gas is heavier than air and so will settle in the silo. A good way to determine if there is gas in a silo is to lower a lighted lantern. If it goes out, it will not be safe to go into the silo.

MUCH SOIL FERTILITY LOST

Considerable Amount of Injury Done Farm Lands During Winter Months by Erosion.

Much soil fertility is lost every winter by soil washing or erosion. Put a stop to it by keeping the hilly lands in sod, planting a cover crop, providing underdrainage, filling the gullies with brush, etc.

TIMOTHY HAY IN ROTATIONS

Farmers Find Crop Good Stand-by Where Alfalfa and Clover Fail to Make Good Stands.

Farmers who have begun to find difficulty in getting stands of clover and alfalfa find timothy hay a stand-by with which to round out their rotations and which assures a crop without demanding much labor.

PENNSYLVANIA COMMUNITY EFFORT BRINGS DAIRYMEN BETTER PRICES

Farmers Unloading Milk at Grove City Creamery.

More than half a million dollars of new wealth created in one year by a single community—that is the record of Grove City, Pa., a whole community largely given over to dairying. There are many cities and towns throughout the county engaged in the production of some one principal commodity. Miners increase the value of coal by taking it from the ground. Manufacturers add to the value of raw materials by shaping them into marketable products. These increase wealth. But Grove City actually creates new wealth. It takes the air, sunshine and water—elements free to all—and converts them into gold—dairy products.

What the Grove City community is doing can be done by any community that is satisfactorily situated, and that has a well-equipped, well-managed creamery. The fact that the management is supervised by the United States department of agriculture probably gives it no appreciable financial advantage, because the relationship is investigational and has not reduced the cost of manufacture below that possible in many other creameries. The products are always sold on their merits, and the name of the department is not used to advertise them.

Community Spirit Built Up.

The success of the Grove City creamery is due largely to the admirable community spirit that has been built up there and in the surrounding district. That this spirit exists to-day is due largely to the efforts put forth by the business men of Grove City, especially the members of the Commercial club, an organization that is open to the farmers of the neighborhood who are interested in the advancement of dairying. From the very outset of the undertaking, in 1914, the business men took an active interest in the creamery and in the movement toward general agricultural development through dairying, and by their enthusiasm they aroused the interest of the farmers.

The business men of Grove City took the first step, the farmers met them half-way, and all are now working for a common cause, which is the building up of a successful dairy community. Though the business men began the work for the public good and with little thought of personal gain, they have found that it is paying them well, because better farming has brought them better business.

The records of the creamery show a remarkable increase in income derived from the sale of its products. For the first year, from July 1, 1915, to June 30, 1916, the gross income was $82,432; the second year it increased to $212,904; the third year, to $375,596; and last year the gross income totaled $505,810. As only a small part of the money was used to pay the cost of operation, nearly all of it was distributed among the farmers around Grove City. Since much of the income was due to increased and improved farm business, a large part of it may fairly be considered as newly created wealth.

Improved Dairy Cows.

The most direct cause of the greatly increased prosperity of the Grove City community is the more profitable dairy cow. Dairying in the Grove City district has been much improved by the purebred cattle that have been shipped in, but it has been improved more by the scrub cattle that have been shipped out. The cow-testing association, which has taken the guesswork out of dairying in this district, is an organization of the dairy farmers who employ a tester to test their cows for production and to keep feed and production records.

Tuberculin tests from April, 1918, to May, 1920, were made on 387 herds, consisting of 4,988 animals, under the accredited-herd plan. Of these, 148 herds are already accredited. According to latest figures, 250 farmers in the vicinity of Grove City own one or more purebred dairy animals. The importance of pure-breds is going forward rapidly.

The creamery has gained a reputation for high quality of products. This has brought a ready market at satisfactory prices, which have encouraged larger production. Increased production and satisfactory prices have made the farmers more prosperous. Increased financial prosperity, however, is only a small part of the gain that has come to the community. Better schools, better churches, better homes, and better social conditions are coming as a result of this, because the people have learned to work together without friction.

To achieve such success as that at Grove City, it is not necessary for a community to engage in the manufacture of dairy products. The Grove City plan can be adapted as well to any other type of agriculture. To make the work a success, however, the community must cast aside all selfishness, pull together, and organize, and should select for its field agent a man of personality, education, ability and diplomacy. He should be thoroughly trained in scientific and practical agriculture and must have had wide experience. With such a man in charge and with a modern creamery there is every reason to believe that any community, with the spirit of cooperation and even fair agricultural resources, can do what the Grove City community has done.

UNITED STATES NOW RAISES BEST STOCK

Foreign Buyers Find Desirable Animals in This Country.

Live Stock Industry Not Surpassed by Any Other Region in the World—Has Greatest Number of Purebred Herds.

Buyers of purebred live stock throughout the world are coming in increasing numbers to the United States, according to the bureau of markets of the United States department of agriculture. Foreign breeders now find in this country the greatest number of purebred herds, all breeds being well represented, and are assured of every facility for obtaining exactly the animals desired.

For many years breeders in the United States have been importing the finest animals from other countries, and by the most rigid selection in keen competition with other breeders have developed purebred live stock until now the live stock industry in this country is not surpassed by any other country in the world. In recent years animals bred in the United States have repeatedly won in open competition against imported animals at the leading live stock shows and expositions.

ANIMALS FOR MILK AND BEEF

Impossible to Produce Breed Combining These Functions and of Superior Merit.

As the type of animal necessary for the production of large yields of milk is entirely different from that of the beef animals, it has been impossible to produce a breed which would combine these functions and be of superior merit for both purposes.

GENERAL FARM NOTES

Paint your buildings.

* * *

Grow clovers and build up your soil.

* * *

Silage is without a peer as winter feed.

* * *

Plant a small kind of a tree in a small kind of a place.

* * *

Organized growers get more for their product—no matter what it is.

* * *

Don't leave your machinery out in the open to rust. Build a shed for it.

* * *

Seed corn selection is important this year. Good ears that mature will have a real value.

* * *

As timber grows scarcer year by year, that wood lot on the farm grows more and more valuable.

* * *

If the instruction book which accompanied your binder is lost, better get another. It may save a lot of time later.

* * *

Farmers who complain of the methods of business men ought to read a business man's magazine and vice versa. Less friction and more harmony would be the result.

Thousands of Happy Housewives in Western Canada

are helping their husbands to prosper—are glad they encouraged them to go where they could make a home of their own—save paying rent and reduce the cost of living—where they could reach prosperity and independence by buying on easy terms

Fertile Land at $15 to $30 an Acre

—land similar to that which through many years has yielded from 20 to 45 bushels of wheat to the acre. Hundreds of farmers in Western Canada have raised crops in a single season worth more than the whole cost of their land. With such crops come prosperity, independence, good homes, and all the comforts and conveniences which make for happy living.

Farm Gardens—Poultry—Dairying

are sources of income second only to grain growing and stock raising. Good climate, good neighbors, churches, schools, rural telephone, etc., give you the opportunities of a new land with the conveniences of old settled districts. Mr. August Trampell is enjoying a visit from his parents who came last Thursday.

Mrs. Schroeder had some remodeling done in her house the past week. A new floor was laid in the kitchen and when this job was finished the room was also repapered. She also intends to put a new cement side walk on the west side of the house.

Mrs Fred Chase, of Goodell, was a Klemme caller Monday.

Mrs Bert Sorensen who has been visiting with Mrs. Curtis Luick, returned to her home at Buffalo Center Saturday.

Mr. and Mrs. Ed Weisbrod and Mr. and Mrs. Ed Schlei of Fenton have been visiting Klemme relatives the past week. Sunday a reunion was held at the Elmer Shliei home at which a number of relatives were present.

A baby boy is reported at the home of Mr. and Mrs. Emel Lau since last Friday.

Red Cross Ladies Notice

The Garner Chapter of the Amerscan Red Cross, including Madison, Ellington. Concord, Liberty, Ell, Twin Lakes and Avery Townships, will hold an annual meeting and election of officers on Wednesday, Oct. 27, at 3:00 P.M. at the Garner Rest Room. All Red Cross members are urged to attend this meeting. Mrs. F. E. Blackstone.

Mr. and Mrs. P. M. Griesmer drove to Garner Sunday afternoon for a visit with his parents.

Mrs. Curtis Luisk and son of Twin Lakes were Klemme callers Monday.

Mrs. A. Wellemeyer was a Garner visitor Monday. She was having some dental work done.

John Greiwe and family left Monday for their new home in Minnesota. Miss Anna Greiwe accompanied them to Forest City Sunday.

M. O. Hocum and family spent Sunday with Mr. and Mrs. Matson of Goodell.

From some of our exchanges we learn that a fierce forest fire is raging near Spencer, Wisconsin.

Interesting Items About The Klemme School

The ball team was unable to go to Ventura Friday, because of the heavy rain.

The Glee Club pratices every Monday evening.

The new merry-go-round is proving a great source of enjoyment for the youngsters.

Friday, Oct. 22, will be a big day for the ball team. Meservey plays our boys and we surely hope to win. Come out and see the game and help our boys win.

John Baumgartner is out of school on account of sickness.

The eight grade boys were very disapointed to learn tiat the Goodell boys will be unable to meet them on the home diamond.

The attendance in the High School is exceptionally good. Much better than last year.

Earl Josteu was ill Wednesday.

King David's Militia.

King David organized a national militia, divided into 12 regiments, under their respective officers, each of which was called out for one month in the year. At the head of the army when in active service he appointed a commander in chief.

Fireweed's Good Work.

Fireweed, otherwise known as the "great willow-herb," seems to have been created as an antidote for one of the ugliest sights a landscape may offer—burnt-over ground. The fireweed is a genuine cosmopolite, for it sends its consoling shaft above the ashes of burnt forests not only throughout America but in Europe and Asia.

ARCTIC RESCUE IS THRILLING

Desperate Battle Fought by Icebreaker With Great Floes in Kara Sea.

SHIP DRIFTS FOR MONTHS

Captain Gives a Plain but Graphic Account of Perilous Voyage—Exciting Race in Ice-Laden Sea —Joy Hard to Describe.

London.—Capt. Otto Sverdrup's narrative of the rescue of crew and passengers from the Russian steamship Solovei Boudimirovitch, which drifted helplessly for months in the Kara sea, is a thrilling tale of Arctic adventure. Captain Sverdrup's story, as printed in the London Times, follows:

It was in April last that I was entrusted with the task of planning, equipping and leading a relief expedition to the Kara sea in order to search for and if possible to rescue the crew and passengers on board the steamship Solovei Boudimirovitch, which at the end of January had become jammed in the ice outside the White sea and afterward was carried in the ice through the Kara straits into the Kara sea. There the vessel drifted dangerously about. She had left Archangel provisioned for only two months, and food, coal and fuel were falling short.

The big, powerful icebreaker Sviatogor was placed at the disposal of the expedition by the British government and sent over to Bergen. Here she was quickly manned, equipped and provisioned for six months. We left Bergen on May 13 and arrived at Tromso on the 17th. There we lay until June 7—a very painful period of waiting for us and doubly painful for the Russians hungry and cold on board the Solovei, who had been informed by wireless that we had started.

At Vardo we shipped 50 tons of supplies more, and having left on the evening of June 9 anchored on the morning of June 12 in Bielushya bay, Novava Zemlya, where we took on board 500 tons of coal from the steamship Harde, which had been dispatched direct from Tromso.

Up Against Strong Ice Barrier.

We passed through Kara straits practically untroubled by ice until the morning of the 16th, when we encountered a large mass of old close-packed polar ice. It was clearly no use trying to force a passage through this; we had to try to find the newer and more penetrable ice which had drifted from the west into the Kara sea through the strait. We steamed, therefore, in a northwesterly direction, but as there appeared no improvement in the conditions we turned about and went in a southeasterly direction until the polar ice was passed.

Then, fortunately, a breeze sprang up from the northeast and made a considerable improvement in the ice conditions. Then we steered north in the direction of the Solovei, and about 8:30 in the evening, according to the last position received from her by wireless, we reckoned that we were within about eight or ten minutes distance.

On the 18th the weather cleared, and having taken the necessary observations in the morning and at noon we continued our voyage at 1 p. m. At the same time we received a wireless giving the position of the Solovei, which was considerably further north than before.

A little later we suddenly caught sight of the Russian icebreaker Kanada, steaming after us. She had had the advantage of the strong northeast wind, which had parted the ice, and our long wait for the purpose of taking observations had also helped her to overtake us. On June 17 our wireless had picked up a call from the Kanada to the Solovei, which confirmed the rumor we had heard at Vardo that the soviet government was equipping a new expedition.

Soon afterward we received a direct inquiry from the Kanada as to our position, which we immediately telegraphed both to the Kanada and the Solovei, at the same time asking them to give us theirs. The Kanada replied asking us to stop for a conversation, and in the conversation which followed with Commissar of Marine Mikhailoff and Captain Mokaloff of the Kanada it was explained that the vessel had been dispatched by the soviet government in order to give assistance if it should be necessary or in case there should be difficulties of any sort in consequence of the political changes which had occurred since the Solovei had left Archangel. It appeared also that they had orders to bring the ship back to Archangel direct.

Exciting Race in Ice-Laden Sea.

After the conference was over, therefore, there began an exciting race between the two ships. The ice through which we had to force a passage was very different from that we had had to tackle before. This was the ordinary polar ice of the Kara sea, closely packed, with only a few small gaps of open water. I had very little hope of getting through, and that we did succeed was due only to the remarkable qualities of the Sviatogor as an icebreaker.

With full steam up from all of her ten boilers she burst her way splendidly through the strong pack ice. Now and then she was beaten and had to back and make a fresh attack at full speed. It was not often that more than two attempts had to be made, but it happened sometimes that the maneuvers had to be repeated nine or ten times where the ice was 20 feet thick or more.

At first the Kanada had a little start, but the roles were soon changed. The Sviatogor went ahead and continued to increase her lead, and when at last, at 7:30 in the evening, we sighted the Solovei far away northward on the horizon, the Kanada had fallen far behind.

At about the same time we received the following message from the Solovei: "We see your smoke in the south, 20 degrees east." We were delighted by this message, which made us realize that our hard-tried and anxious friends on board the Solovei were in high hopes of relief.

Thrilling Night on Icebreaker.

In the Sviatogor all were keenly alive to the anxiety and seriousness of the situation, and followed with eager interest the display of prowess given by the icebreaker during these hours of the night. Of the crew all who were not actually keeping watch were on deck hour after hour discussing and marvelling at the carrying features of this extraordinary drama. Some stood leaning over the rails so as better to enjoy the sight of the great blocks of ice, now crushed into fragments before our bows, now hurled in a whirling mass along the ship's sides—and all to a wild accompaniment of deafening crashes in the ice, and of groans and wails and shrieks from the hard-pressed vessel's hull and rig and engines.

Suddenly an ice floe would rise and threaten to fall over the ship's rail, and then the sailors were not slow in beating a retreat to safer quarters. Others, who stood in groups right forward in bows, fared no better. When, as frequently happened, the ship crashed at full speed against a really high solid block of ice, and at the same time rose several feet in the air a shower of spray and ice splinters flew over the deck and forced the imprudent spectators to a headlong retreat.

In the meantime we were approaching the Solovei, but it was a slow business. The ice became worse and worse in the last stage, and it was midnight when we reached her. An hour more was required before we could moor the Sviatogor by her side, so big and thick were the surrounding ice floes.

The whole crew of the Solovei and all her passengers, 87 altogether, had gathered on deck and were greeted by us with a resounding hurrah, to which they responded in the same way. Their joy is not easy to describe. To drift without aim, almost without hope, in the darkness and cold of the Polar night, with bad and insufficient food, in cold and unclean quarters, and in constant dread of getting so far north that rescue would be impossible—that is an ordeal so hard that it is not every one who would come through it entirely unscathed.

Immediately after we arrived the captain of the Solovei and his wife and all the passengers, seven in number, came on board. They were invited into the saloon and treated to refreshments, which they evidently appreciated. One of them said it was like coming into paradise after their anxieties. The passengers asked leave to transfer to the Sviatogor as they were greatly exhausted and needed medical attention and better diet, and I was glad to be able to grant their request. Then we set to work to put provisions and coal on board the Solovei, so that the crew could at once prepare a proper meal with something better to eat and drink than they had had in the last few months.

Second Relief Ship Arrives.

About four o'clock in the morning we were awakened by loud hurrahs from the crew of the Solovei, who were hailing the arrival of the Kanada, which had at last also got through. Had the Kanada not been so fortunate as to get into the lane made in the ice by the Sviatogor, it would have been hardly possible for her arrive so soon. Next day we shipped more coal and provisions on board the Solovei, and were helped with hearty good will by the crews of the two Russians

This done we started in the afternoon of June 20 on our homeward voyage, the Sviatogor leading and the Solovei and Kanada following. At first the ice was loose and fairly easy to get through, but afterwards it became closer and more difficult to force. There was fog, too, which made it impossible to keep proper observation of the ice conditions. Consequently we often had to stop a fairly long time, especially as the fog prevented the other two ships from keeping with us. It was evening on the 21st when we reached the Kara sea entrance, and there we were again obliged to stop for thick fog.

We resumed our voyage at 2 o'clock next morning steering for the middle of the Kara strait, but at 2:30 p. m. were unlucky enough to ground on an unknown sandbank. We at once began to tranship coal to the Solovei and Kanada in order to get the Sviatogor afloat again, and after unloading 650 tons of coal we at last got her off. A diver from the Kanada examined the ship's bottom and pronounced the damage not serious. So we continued our voyage to Bielushya bay, where we handed over more provisions and supplies to the Russians and took on coal from the Harde for our voyage back to England.

After a cordial leave-taking from our friends on the Solovei and Kanada these vessels left us on June 22, shaping their course for Archangel. On July 1 we had completed our coaling and next day at 2 p. m. we began our homeward voyage.

Seed Sprouts in Boy's Ear.

Klondike, Tex.—Ever hear of a hackberry seed sprouting in a boy's ear and trying to grow a real tree? Well, such things happen. Two years ago the nine-year-old son of J. R. Moore, a farmer near here, while eating hackberries in a tree on the Moore farm got one of the big berries in his ear. In a short time the seed sprouted and the lad began to have trouble with his ear. A specialist called found that the sprout and the seed, while decayed, had ruined the hearing in that ear. The rotted part of the seed and the sprout were removed.

Magnet Has Many Uses.

A highly important use of a magnet is that in which it is sometimes employed to withdraw small pieces of iron from such out of the way places as the human eye. Another use of the tractive force of magnetism on a much larger scale was that to which it was put by Edison in his magnetic ore separator, in which the ore, previously crushed to a fine powder, is dropped down a chute past the poles of powerful electro-magnets, in passing which the iron particles of the ore are deflected to one side, while the non-magnetic stone dust continues undeflected down the chute. Still another instance of the employment of magnetism in a small way is that in which a magnetized tack hammer is used in the manufacture of strawberry baskets on a large scale in conjunction with a mechanical device which presents the tacks, one at a time and head up, to the operative, thereby greatly facilitating his work.

Japanese Claim Credit for Fan.

Japan takes credit for the folding fan. The original kind was of the palm-leaf variety—an oval or round shape which could not be folded. But Japan conceived the idea, just when or how nobody knows, of fastening half a circle of paper on a frame made of sticks fastened together at one end—and the collapsible fan resulted.

Most Sacred Thing.

Everything that is mine even to my life, I may give to one I love. The secret of my friend is not mine to give.—Philip Sidney.

You get favorable returns on the clothes we sell---

More wear than you expected; more style, bigger values; you begin to get the returns the moment you buy them, and continue to get them for a long time.

You want lower prices; we're giving them to you this fall

Clothing does'nt cost any less, but we're making it cost you less.

We're cutting our margins of profit to the lowest point; that helps you.

We're selling nothing but clothes that wear a long time; Hart Schaffner & Marx clothes. You don't have to buy so often; that saves.

We guarantee you'll be satisfied with the values, style, fit, wear; if you are'nt---money back.

Mrs. Louis Strieby and children of Garner were here a few days and the latter part of last week visiting at the Henry Lewis home.

Mr. and Mrs. Joe Ptacek, of Thief River Falls, Minnesota, came Monday for a week's visit at the home of Mr. and Mrs. Will Wenz. Mrs. Ptacek and Mrs. Wenz are sesters.

Howard Doyle took care of the barber shop for Mr. Baumgartner Saturday as Mr. Baumgartner was called to Garner Saturday morning by the death of his mother.

Carl Scott, of California is here visiting with friends. He expects to remain in the vicinity of Kemme for about a month. Carl was in Tncle Sams service for about two years.

Mr. and Mrs. Chris Blumer, Emil Kraus and Albert Kraus returned Saturday from their visit at Brule, Wis,, where they went a week ago to visit with the Carl Kraus family.

Miss Leoda Smith came home from Cerro Gordo County for an over Sunday visit with her mother, Mrs. Mille Smith, and her sisters. Miss Smith is one of the successful rural teachers in the County east of us.

The teachers of the Klemme schools left Friday for their various homes to spend Sunday. Supt. Collins went to Eldora, Miss Belken to Iowa Falls, Miss Ebert to Charles City and Miss Sullivan to Osage.

Emil Lau drove to Wesley Monday and attended the Mattern, Ward and Goetz sale af Duroc Jerseys and Shorthorn cattle. Emil bought a couple of choice hogs to add to his fine heard of Duroc Jerseys.

Our fine run of Indian Summer was spoiled last week when the weather man ordered rain for this vicinity on Thursday and Friday. The sky is clear again and we are enjoying real California weather.

Marlin Croner and his mother left Sunday morning In Marlin's car for Garnet, Kansas, the home of his mother. She has been visiting here about five weeks. Mr. Croner will also look after business matters at Kansas city before returning to Klemme.

The Klemme Co-Operative Grain Co. have filed articles of incorporation with the County Recorder.

When this vicinity were having rain last Thursday and Friday Colorado were enjoying their first snow storm of the season.

Ray Whiie and family are moving to Forest City where "Pat" has bought a restaurant and will take charge at once. Forest City was their home before com to Klemme to live.

A little late perhabs but still of interest. Edwin Josten had a birthday last week Sunday and to celebrate the event his wife cooked up a swell dinner and then invited his father rnd mother and Mr. and Mrs. Fred Becker. All had a fine time.

Court is in session with Judge Edwards on the bench. The grand jury has not yet reported, and no cases has been tried to the petit jury. A number of cases have been settled outside of court. — Garnar Signal.

Fred Ridder and Clarence Kluckhohn spent most of the week at Garner acting as Jurors. Fred was excused last week but the judge called him back on the jury Tuesday. "Fat" had a steady job nearly all of last week with the jury.

G. P. McCullough drove to Garner Monday afternoon to be present at the celebration of the Twenty-Fifth Wedding anniversaro of his father and mother. All of the children were present to help make the happy event a big success. A big dinner at siz o'clock was evidently enjoyed by "Zip" for when he got back to Klemme his belt buckle was in the last notch.

Rev. H. H. Grieman and family came from Shaler, Iowa, the first of the week for a visit with the Grieman families in this neighborhood. Tuesday evening Rev. Grieman, Rev. W. B. Wet erling who had been here visiting his relatives, the Katters, Will Schlawin and Gottlieb Goll of Klemme, went to Sheboyegan, Wis., to attend the synod meeting.—Signal.

A resolution of necessity for the paveing of fifty- eight blocks of the streets of Lake Mills has been passed by the town council. It was the intention to pave the main streets that carry the heaviest traffic, and those streets over which visitors to the town must come. It is conceded by everyone that something must be done and done soon to remedy the unsatisfactory condition of the streets that obtains through so many months of the year. The project is meeting with the opposition which is encountered everywhere where a step toward city improvements is contemplated. It is charged that opponents are misrepresenting the costs to the property holders.—Forest City Republican.

A Record For Babes

A Mexican woman, whose name is not known, four days ago, gave birth to seven children at her home in this city. She lives in a box car at the Mexican settlement, in the Santa Fe yards. Six of the children lived and a woman of this city who visited the prolific Mexican woman to satisfy her curiosity as to the truth of the report, says the six serviving babes are perfectly formed and are about as long as a case knife. The arrival of triplets is generally announced as something that should cause the proud American father to swell up with unusual pride, just how a father feels who is presented with seven in a bunch, six of whom are alive and are kicking, is hard to imagine. Such an event has never been recorded before in the birth announcements in this section and it is doubtful if it has ever been equaled in the United States. —Algona Advance.

About Parcel Post

Advices from the parcel post department at Washington say that tires, suit cases, handbags, machinery and other such bulky articles sent through the mail must have the adresses of both the sender and receiver in at least three places.

Address must be on the tag, on the body of the package and w thin on a slip or pasted to the article. All such articles not properly addressed may be withheld from the mail by postal officials. Tags often come off and wrappers are worn through, therfore the precaution of having a third address should be taken.

COX'S STATEMENT TO LABOR PROVED TO BE GROSSLY INACCURATE

Claim He Had "Never Pressed a Soldier Into an Industrial Controversy" Not True.

USED OHIO MILITIA TWICE

Question Not About Merits of Strike or Need for Military, but as to Truthfulness.

By WILLIAM HOSTER.

Columbus, O.—Governor James M. Cox's boasted labor record has been shattered by his own official act. Claiming that he had "never pressed a soldier into an industrial controversy," the record of his action as governor of Ohio in mobilizing the National Guard of this state for service in the steel strike of 1919 has been produced in flat contradiction of his assertion.

Not once, but on two occasions was the Ohio guard, at an expense of $23,000 to the people of Ohio, called into service and sent to Akron and held in readiness for action in nearby Canton.

The question is not as to the merits of the strike or as to the necessity for the presence of the guard within striking distance of Canton, but concerns wholly the truthfulness of Governor Cox's statement, obviously made to win favor among the workingmen. The facts as brought out in the speech of Republican State Chairman George H. Clark, formally opening the campaign at Columbus, are as follows:

Ordered Guard Out Twice.

After the steel strike had progressed for some days, with more or less disorder, Governor Cox on September 28, 1919, suddenly ordered the mobilization of the guard at Akron. A period of quiet followed, and the troops were withdrawn. And then again suddenly on October 25 the guard was once more mobilized and sent to Akron, and while it lay there at that strategic point awaiting a summons into action staff officers representing Governor Cox kept close watch on the situation in Canton.

In his speech at Wheeling, W. Va., on the night of August 14 Governor Cox said:

"For six years I have been in executive authority in the great industrial state of Ohio. **During all this time I have never pressed a soldier into an industrial controversy."**

The question is, did Governor Cox tell the truth? Answering this question, Chairman Clark in his Columbus speech displayed to his audience a photographic copy of Special Order No. 52 issued from the Adjutant General's department of the State of Ohio, dated Columbus, October 25, 1919, which designated certain officers for immediate active service and paragraph 4 of which reads:

Facts Presented.

"In anticipation of the development of a rioting condition at Canton, O., the Governor of Ohio has deemed it necessary to assemble a sufficient number of state troops at Akron, O., to be held in readiness to render aid to the civil authorities at Canton, O., and has so directed the Adjutant General of Ohio, who, pursuant to such order, directs Colonel Benson W. Hough to proceed without delay to Akron, O., to take command of all state troops upon arrival at Akron, O., and to hold them in readiness for duty, awaiting further orders."

The order is signed by the Adjutant General and counter-signed in these words, **"By command of Governor Cox."**

Did Governor Cox tell the truth to the workingmen?

Supplementing this documentary proof, Mr. Clark produced photographic copies of headlines from Canton, O., newspapers of concurrent date, which read: "State troops mobilizing for duty here. All available companies are ordered out." And, "Governor orders troops for duty here, Ohio soldiers reporting to armories following trouble."

Truth Should Be Known.

The surprising thing about it all is that Governor Cox in his Wheeling speech should have made so flat an assertion when all of the facts with regard to his mobilization of the guard were still fresh in the public mind, at least in Ohio. Of course it is not to be expected that workingmen elsewhere in the United States would be familiar with the circumstances, and it was for that reason that State Chairman Clark in his speech stressed the necessity for the people all over the country to be informed that Governor Cox's assertion that he "never pressed a soldier into an industrial controversy" was absolutely at varience with the truth.

Publication of these official facts has utterly confounded the advocates of Governor Cox's election, who have been making a special plea to the workingmen on the basis of his West Virginia speech. The revelations as to Mr. Cox's mobilization of the troops are being compared with the sworn statements of liquor league contributions to his gubernatorial campaign fund in refutation of his statement that "the wets have never contributed one dollar to any of my campaigns." In both cases the point is made that the issue is not as to the merit of his mobilization of the troops, on the one hand, or as to the status of the wet and dry question, on the other hand, but that the real issue is as to the degree of truth and accuracy absolutely necessary in one who seeks to be president of the United States.

AMERICAN WOMEN DOING FULL SHARE FOR THE COUNTRY

Mrs. Calvin Coolidge, Wife of Republican Nominee, Praises Her Sex.

DISCUSSES HIGH LIVING COSTS

Declares in an Interview That Present High Prices Can Be Reduced by Votes.

By Estelline Bennett.

Mrs. Coolidge sat in a day coach on a slow local train between Boston and Northampton and talked about her husband, her children, the high cost of living and the domestic problem. The conductor and the brakeman stopped as they went through the car to talk to her. She had made friends with them in her frequent journeys back and forth to keep in touch with her children in school in Northampton and her husband at his duties in the state capitol. She knitted diligently as she talked. During those trips she knits all the winter stockings and sweaters for her two boys—John, aged fourteen, and Calvin, twelve.

"Too many people are afraid of work," she thinks is the fundamental reason for the high cost of living and the much discussed domestic problem.

"I think the only thing the women of the country can do now," she said, with the quiet conviction of one who has thought it all out, "is to vote for the men whom they think will make the right laws and see that they are enforced. They have done all they can in the home. I think the reason there is so much sugar on hand now is because people are doing without it in their homes.

Women Have Done Their Share.

"American women have done, and still are doing, their full share. They have sacrificed and saved and substituted and made over. But that isn't enough. They'll have to vote the high cost of living down.

"Here in New England, where it is a little hard for us to give up pie," she laughed at the tradition that has become a joke, "we have learned to use all kinds of cheaper substitutes for butter and lard, and in my own household we have experimented with different fruit combinations to find something we like and that will take the least sugar. Apples must be tart to make good pies, but we have found that blueberries take less sugar and the combination of apples and blueberries, half and half, is delicious, requires less sweetening than apples and has more character than the blueberries alone."

Knows No Domestic Problems.

The domestic problem, which is closing homes all over the country and increasing the hotel population, is something of which Mrs. Coolidge thinks she has no personal, practical knowledge. She never keeps but one maid, and she never has been without one. In the fifteen years of her married life she has had only two. The first one she inherited with the furnished house into which she and Mr. Coolidge moved when they were married and took with her when she moved. The second came when the first left to go and live with her sister.

There must be a reason for their staying, it was suggested to Mrs. Coolidge, and she thought possibly there were several. She thought the type of maid had something to do with it. Her's both have been American women old enough to have a sense of responsibility to their work and intelligent enough to respond to reasonable courteous treatment.

"A good many women who keep only one maid have trouble in their households because both mistress and maid, but chiefly the mistress, are afraid of work. A woman expects one maid to do the cooking and scrubbing and everything else and still be dressed up in black dress with white cap and apron, ready to answer the doorbell any minute. It isn't humanly possible. I always answer my doorbell myself. I do it for two reasons. In the first place, there is no one else, and, in the second, I like to greet my friends at the door myself."

Have Home Orchestra.

Mrs. Coolidge is of medium height, with brown hair, hazel eyes that hold a good deal of merriment and a very quick sense of humor. At home she and her children have a little orchestra. Mrs. Coolidge plays the piano, John the violin, and Calvin, after considerable discussion, in which he favored a bass drum, compromised on a banjo-mandolin. They play hymns and war songs usually—the hymns they learn in the Congregational church and Sunday School of Northampton. They avoid difficult and unfamiliar music because the object of the orchestra is entirely recreational and not educational. That is a part of Mrs. Coolidge's educational policy—that children should work when they work and play when they play and keep the two separate. That was why she sent her boys to the public schools of Northampton when they were five years old.

Every morning when she is in Northampton, Mrs. Coolidge takes her Boston bag and goes to market. If the neighbor next door is going Mrs. Coolidge goes with her in the car. Otherwise she walks. She has no domestic policy. She buys, she says, "what the family need and can afford."

HARDING GLAD AMERICANS ARE A FREE PEOPLE

In Speech to Indiana Delegation Republican Nominee Declares for Security at Home.

EUROPE HAS EVEN NOW QUIT WILSON'S LEAGUE

Yet Democratic Party Leaders Would Have Us Bound by Original Pact With No American Safeguards.

"STEADY AMERICA!"

"Mindful of our splendid example and renewing every obligation of association in war, I want America to be the rock of security at home, resolute in righteousness and unalterable in security and supremacy of the law.

"Let us be done with wiggling and wobbling.

"Steady America! Let us assure good fortune to all."

—Senator Warren G. Harding in address before the Indiana delegation at Marion.

Marion, O. (Special.)—Senator Warren G. Harding, Republican nominee for President, in a speech delivered to a delegation from Indiana which called on him here to pledge the support of Indiana Republicans, declared that twice President Wilson had an opportunity to obtain ratification of the League of Nations covenant and that he put ratification aside because he would not accept reservations designed solely to safeguard American rights. Senator Harding said:

"I greet you in a spirit of rejoicing; not a rejoicing in the narrow personal or partisan sense, not in the gratifying prospects of party triumph; not in the contemplation of abundance in the harvest fields and ripening corn fields and maturing orchards; not in the reassuring approach of stability after a period of wiggling and wobbling which magnified our uncertainty—though all of these are ample for our wide rejoicing—but I rejoice that America is still free and independent and in a position of self-reliance and holds to the right of self-determination, which are priceless possessions in the present turbulence of the world.

"Let us suppose the senate had ratified the peace treaty containing the league covenant as submitted to it by the president in July of last year, what would be the situation confronting our common country today? To my mind there is but one answer. Before this day we would have been called upon to fulfil the obligations which we had assumed under Article 10 of the league covenant, to preserve the territorial integrity of Poland 'as against external aggression.'

Sympathy for Poland.

"I shall not now attempt to measure the boundless sympathy for the just aspirations and restored independence of Poland. Our present concern is the international situation which Poland has brought to our attention.

"The council of the League of Nations would have reasoned, and reasoned correctly, that the United States could furnish the munitions and, if necessary, the men to withstand the hordes advancing from Russia far more easily than could the exhausted nations of Europe. Moreover, inasmuch as this would be the first test of the scheme of world government which was formulated and demanded by the President, speaking for the United States, the fact of a special responsibility, resting upon our shoulders, manifestly would have been undeniable. Undoubtedly the league council, in 'advising upon the means' by which the obligations to Poland should be fulfilled, as provided in the covenant, would have so held, and probably the conscience of America, certainly the opinion of the world, would have sustained that judgment.

"The conclusion that our country might now be confronted by such a situation, if the senate had ratified the league covenant, requires no stretch of the imagination. None can deny that it is possible. To many candid minds, as to my own, such a distressing situation will seem highly probable. Let us assume that the ratification had taken place. Let us assume, further, that the performance of the alloted task required the waging of war upon the Russian people, as, of course, it would, what would result; what would of necessity have to result? Nothing necessarily, we are glibly informed, since only the Congress can declare war, and the Congress might reject the appeal of the executive. But would the Congress do that? Could the Congress do that without staining indelibly the honor of the nation?

Answer Is "No."

"I answer 'No,' and I say it not on my own authority alone. Back of my judgment stands the President of the United States. Upon that point there is first-hand information. In the course of the discussion which took place at the meeting of the President and the Senate Committee on Foreign Relations I raised the question by stating a hypothetical case precisely analogous to that which I have depicted, and then inquired whether we might not rightfully be regarded as a perfidious people if we should fail to contribute an armed force, if called upon to do so. The President first replied, as I thought somewhat evasively, that we 'would be our own judges as to whether we were obliged in those circumstances to act in that way or not. Pressed further, however, in response to a query incorporating the assumption that 'the case provided for and prescribed had arisen' and that 'the extraneous attack did exist precisely as it does exist today in Poland,' the President admitted specifically that 'we would be untrue if we did not keep our word.'

"Replying further to a question which perhaps I ought not to have considered necessary, the President pronounced a moral obligation 'of course, superior to a legal obligation' and of 'a greater binding force.'

"What, then, becomes of the argument that Congress, not the President, in this instance at any rate, might 'keep us out of war?' Technically, of course, it could do so. Morally, with equal certainty, it could not do so nor would it ever do so. The American people would never permit a repudiation of a debt of honor.

"Am I not right, my countrymen, in saying that we needed only the outbreak of war between Poland and Russia to make us realize at least one of the things which, in the words of Secretary Lansing, we would have been 'let in for,' but for the restraining hand of the senate, and to fetch home to us the danger of committing our country in advance to causes that we know not of?

Not Our Purpose.

"One can have no quarrel with those who have convinced themselves that our underlying purpose in entering the great conflict was to create a league of nations. The fact remains, however, that no such intent was officially acclaimed, no allusion, nor even a suggestion to that effect appeared in the joint resolution of Congress which declared the existence of a state of war between this country and Germany. For myself I left no room for doubt of the motives which led me to cast my vote in favor of that resolution. It so happened that I made the concluding speech upon the war resolution, from my place in the senate, on the night of April 4, 1917. These were my own words at that time:

"'I want it known to the people of my state and to the nation that I am voting for war tonight for the maintenance of just American rights, which is the first essential to the preservation of the soul of this republic.

"'I vote for this joint resolution to make war, not a war thrust upon us, if I could choose the language of the resolution, but a war declared in response to affronts; a war that will at least put a soul into our American life; a war not for the cause of the allies of Europe; a war not for France, beautiful as the sentiment may be in reviving at least our gratitude to the French people; not precisely a war for civilization, worthy and inspiring as that would be; but a war that speaks for the majesty of a people properly governed, who finally are brought to the crucial test where they are resolved to get together and wage a conflict for the maintenance of their rights and the preservation of the covenant inherited from their fathers.

"We have given to the world the spectacle of a great nation that could make war without selfish intent. We unsheathed the sword some eighteen years ago for the first time in the history of the world, in the name of humanity, and we gave proof to the world at that time of an unselfish nation. Now, whether it is the fate, or fortune, or travail of destiny, it has come to us to unsheathe the sword again, not alone for humanity's sake—through that splendid inspiration will be involved—but to unsheathe the sword against a great power in the maintenance of the rights of the republic, in the maintenance which will give to us a new guaranty of nationality. That's the great thing, and I want it known, Mr. President and senators, that 'his is the impelling thought with me for one, when I cast my vote.'

For Same Guaranty Today.

"It is for that same 'guaranty of nationality' that I stand today, and shall continue to stand inflexibly, so long as I shall be permitted to live. The independence of our great republic is to me a priceless and sacred inheritance. Time was when an American did not hesitate to proclaim himself a patriot. To do so now, I am well aware, is sometimes to invite the sneers of cynicism. But why should any true American not be free to say: 'I am a patriot, wholly evoted to my country, which I hold to be God's best inspiration to man for higher attainment and the promotion of the world's best civilization?'

"But I have a special reason for making this reference today. I challenge the statement that the patriotism which holds America first comprehends either narrownes or selfishness, or as implying tacit suspicion and jealousy of other peoples.

"To assert, as some have asserted heedlessly, that those of us who honestly believe that America can best serve all mankind as America, free and untrammeled, rather than as one in a pitiable minority among many states in merged world government, lack consciousness of the rightful demands of humanity, is to utter a gross and unpardonable libel. To attribute meanness to those of us who, in the performance of our public duty, refused to participate in what we sincerely regarded as a betrayal of our own country in the interest of others, is to discredit the intelligence and discrimination of the great mass of American people who directly, by their votes, put us in our positions of trust. For myself, I yield to no man in willingness, aye, in eagerness, to render the greatest conceivable assistance to the stricken peoples of Europe. I include all of them and speak with a genuinely sympathetic heart, whether it is to mention devastated France, or sorely-tried Italy, or nobly-struggling Poland, or distracted and misguided Russia, or gallant little Belgium, or pitiably deceived Austria, or the ruthless invader, Germany, which came to the supreme tragedy through a leadership which brought disaster to her misguided people.

"It was with that feeling of sympathy and desire to serve, that most reluctantly and with grave misgivings, as I announced at the time, I with reservations designed to preserve our essential liberty of action. The record is made, and under the same conditions, confronted by the same alternative, I should vote now as I voted then.

Conditions Have Changed.

"But the conditions have changed. Experience has brought enlightenment. We know now that the league constituted at Versailles is utterly impotent as a preventive of wars. It is so obviously impotent that it has not even been tried. The original league, mistakenly conceived and unreasonably insisted upon, has undoubtedly passed beyond the possibility of restoration. The maturer judgment of the world will be that it deserved to pass for the very simple reason that, contrary to all of the tendencies developed by the civilizing processes of the world. it rested upon the power of might, not of right.

"The assertion is made frequently that through the surrender of our nationality we might have saved the life of the covenant—that is to say, that, although twenty-eight nations could not make it function, one added to the twenty-eight would have achieved a glowing success, provided, always, that the one were America.

"This pays to America the tribute of exceptional influence. but I suggest that if the world is dependent upon our action to bring about the supreme realization, then we ought to have the say about our own freedom in participating therein. But let us consider what is meant by this reliance upon America. What can it signify if not that it is to the United States, and to the United States alone, that the other twenty-eight nations look for the bone and sinew, the money, the munitions and the men to sustain the entire organization, not as an agency of peace, but as an armed force?

A Telling Admission.

"A few days ago a delegation of an organization which calls itself a Society for the Prevention of War appealed to the premier of Great Britain to unite and use the powers of the world in defense of Poland, Armenia and the Dardanelles. The British premier replied, according to his remarks quoted by the newspapers, to the effect that, while the formation of 'an international army' would be 'an ideal solution,' it could not be accomplished because the European nations could not furnish the troops and the United States had 'withdrawn from co-operation'—a polite and diplomatic phrase and more exactly meaning, of course, that the senate of the United States had not completed the partial obligation assumed by the President to do that very thing—that is, to 'furnish the troops.' Could a clearer indication of what would have been expected of this country as a member of the league be desired? Hardly. Some, too, think, or say they think, that this extraordinary service should be rendered. I do not agree with them, but, assuming that they are right, I venture to note that nothing stands in the way of performance. The President has only to call upon Congress to declare war, and to confer upon him specific authority to raise armies for the protection of the powers which, though recently associated with, are still foreign to our own republic.

"It is reasonably safe to assume, however, that the President will not pursue this course. Fortunately, he is under no 'compelling moral obligation' under the league to do so. His recent unhappy experience, moreover, in asking Congress to send American boys to police Armenia would hardly encourage repetition of a request already courteously but quite firmly declined by the Congress. What then, in like circumstances, would be the answer of the British premier himself? In his own words, addressing a meeting of the Coalition Liberals on August 12 last, according to the press reports, he said:

"'When the terrible question of peace or war has to be decided, our first duty as a government is to the people, who trust us not to commit their treasure to any unjustifiable adventure. Nothing but the most imperative call of national honor, national safety and national freedom can justify war. Before this country is committed to it, even in the most limited form, we must be satisfied that these are in peril.'

"I quote these telling words, my countrymen, with the utmost satisfaction, because with one amendment they express to a nicety my own position. I take for granted that the prime minister meant to include in 'treasure' the greatest treasure of all, but, for myself, I should leave nothing to be inferred. Foremost and above all else to be safeguarded by those of us who hold the trust of the people, it goes without saying, but cannot be too often repeated, is the manhood of the nation.

Will Not Misuse Power.

"Now, it may appear to you that I have been speaking chiefly in the negative. I make the admission. What is more, I might continue to do so almost indefinitely without disadvantage to our cause. So many things have been done by the present expiring administration that no power on earth could induce me to do, that I cannot even attempt to recount them. I may remark casually, however, that if I should be, as I fully expect to be, elected President of this just and honorable republic, I will not empower an assistant secretary of the navy to draft a constitution for helpless neighbors in the West Indies and jam it down their throats at the point of bayonets borne by United States marines. We have a higher service for our gallant marines than that. Nor will I misuse the power of the executive to cover with a veil of secrecy repeated acts of unwarranted interference in domestic affairs of the little republics of the western hemisphere, such as in the past few years have not only made enemies of those who should be our friends, but have rightfully discredited our country as their trusted neighbor.

Will Submit to No Wrong.

"On the other hand, I will not or shall not, as you prefer, submit to any wrong against any American citizen, with respect to either his life or his property, by any government. This statement is made in all solemnity, with enmity for none and friendship for all. If it particularly applies to Mexico, the application has been directed by the robbery and murder of hundreds of our own people in that unhappy country who were lawfully there and were entitled to protection. One must admit that these outrages upon Americans are largely the consequences of the wiggling and wobbling, the supine waiting of our own government though the admission neither helps the hurt, nor gives the hope of security for the future while the present administration remains in power, or when one in 'complete accord' succeeds it.

"This admonition is not directed exclusively toward our next door neighbor to whom we would gladly hold forth a helping hand, and whom primarily, certainly in preference to far off peoples in Europe, Asia and Africa, it is our manifest duty to serve with a whole heart and generous tolerance. It is intended for a plain notice to every government on the face of the earth that the entire resources of this nation are pledged to maintain the sacredness of American lives and the just protection of American properties.

Line of Demarcation Plain.

"The line of demarcation between our attitude and that of our political opponents is perfectly plain. The president has made his position clear by his acts no less than by his words. Twice there came to him an opportunity to obtain ratification at the hands of the senate and twice he put the opportunity aside, because he would not accept reservations designed solely to safeguard American rights. He still holds Article 10 to be the heart of the covenant. So does the Democratic platform. So does the Democratic nominee. To assume that the nominee would accept the reservations rejected by the President and denounced by the party platform is to impugn his integrity. To insinuate, as those who in proclaiming themselves for the Democratic candidate and 'the league with reservations' do insinuate that he would pursue such a course in seeking ratification is not to pay him a compliment, but rather to challenge his sincerity.

"For myself I do not question for a moment the truth of what the Democratic nominee says on this subject. He has flatly said he is 'in favor of going in' on the basis announced by the President. I am not. That is the whole difference between us, but it is a most vital one, because it involves the disparity between a world court of justice supplemented by a world association for conference, on the one hand, and the council of the league, on the other.

The Difference.

"The difference between a court of international justice and the council created by the league covenant is simple but profound.

"The one is a judicial tribunal to be governed by fixed and definite principles of law administered without passion or prejudice. The other is an association of diplomats and politicians whose determinations are sure to be influenced by considerations of expediency and national selfishness.

"I do not mean to say nor do I mean to permit any such construction, that I would decline to co-operate with other nations in an honest endeavor to prevent wars. Nobody living would take that position The only question is one of method or of practicability within the bounds prescribed by fundamental principles

"There are distinctly two types of international relationship One is an offensive and defensive alliance of great powers, like that created at Versailles, to impose their will upon the helpless peoples of the world. Frankly, I am opposed to such a scheme as that, and I speak knowingly when I say that the associated powers, with whom we fought the war, were reluctant to accept such a proposition.

"I am opposed to the very thought of our republic becoming a party to so great an outrage upon other peoples, who have as good a right to seek their political freedom as we had in 1776 and have the same right to developing eminence under the inspiration of nationality as we held for ourselves.

The Other Type.

"The other type is a society of free nations, or an association of free nations, or a league of free nations, animated by considerations of right and justice, instead of might and self interest, and not merely proclaimed an agency in pursuit of peace, but so organized and so participated in as to make the actual attainment of peace a reasonable possibility." Such an association I favor with all my heart, and I would make no fine distinction as to whom credit is due.

"This is proposing no new thing. This country is already a member of such a society—The Hague tribunal, which, unlike the league of Versailles, is still functioning, and within a few weeks will resume its committee sessions under the chairmanship of an American representative.

"In that body we have the framework of a really effective instrumentality of enduring peace. The fact that the tribunal did not prevent the great war is, of course, manifest, but the cause of the failure is no less apparent. Germany, already secretly determined upon a ruthless invasion, was able to prevent the adoption of measures which might have proved effectual. The condition now is wholly different. Not only Germany, but the entire world has profited to the extent of an awful object lession, the impression of which cannot be erased from the human mind for generations to come. The horrors of war and the eagerness for peace have become universal. What once seemed at The Hague to be a mere academic discussion has become a positive, outstanding need of facing terrifying actualities. This makes vastly easier the task of so strengthening The Hague tribunal as to render its just decrees either acceptable or enforceable. It is not uncommon for the advocates of the league of Versailles to contrast unfavorably The Hague tribunal upon the ground that the tribunal 'lacks teeth.'

Let's Install the Teeth.

"Very well, then, let's put teeth into it. If, in the failed league of Versailles, there can be found machinery which the tribunal can use properly and advantageously, by all means let it be appropriated. I would even go further. I would take and combine all that is good and excise all that is bad from both organizations. This statement is broad enough to include the suggestion that if the league, which has heretofore riveted our considerations and apprehensions, has been so entwined and interwoven into the peace of Europe, that its good must be preserved in order to stabilize the peace of that continent, then it can be amended or revised so that we may still have a remnant of world aspirations in 1918 builded into the world's highest conception of helpful co-operation in the ultimate realization.

"I believe humanity would welcome the creation of an international association for conference and a world court whose verdicts upon justiciable questions, this country in common with all nations would be both willing and able to uphold. The decision of such a court or the recommendations of such a conference could be accepted without sacrificing on our part or asking any other power to sacrifice one iota of its nationality.

"The Democratic nominee has spoken about America abandoning her associates in war and deserting the allied nations in establishing the league of Versailles. I do not think it longer necessary to challenge that statement or pass further opinion upon the unfortunate league. It has already been abandoned by Europe, which had gone so far as to accept it by formal agreement in treaty. On this subject, we are fully informed at first hand. Only the other day the British premier said unresentfully that the essential co-operation of America might involve 'some change, at any rate, in the form of the covenant,' and he added, with characteristic outspokenness, 'it is quite possible it might be a change for the better.'

"Listen, further, to the wise and farseeing, former British ambassador, who was not permitted to present his credentials to our executive.

On Our Own Terms.

"'As long,' said Viscount Grey, hardly a month ago, 'as long as the richest, most powerful, the greatest, both for population and territory, of the civilized countries of the world stands outside the league, the league will be unable to fulfill its destiny. To put it in quite plain terms, the Americans must be told that if they will only join the league they can practically name their own terms.' Undoubtedly that is the fact. I ask: Is there any good reason why we should not avail ourselves of this privilege? I do not mean in any arrogant or selfish way, but simply as a matter of fairness and right to our own people. Surely it is becoming, and a duty as well, to safeguard our own people, since it is we who are the main contributors, while asking nothing for ourselves except to participate in a contribution to the promotion of world peace.'

A Valued Suggestion.

"Viscount Grey continues: 'The Americans should be intrusted with the task of drafting a reconstruction scheme.' Then he suggests further that 'a committee of the senate—we must never forget the senate's rights and duties in regard to foreign affairs being re-enforced by the members of the house of representatives, and also by nominees of the President, and Supreme Court—could draw up suggestions for the reconstruction of the league, which would be consonant with the feeling not of one, but of all parties in America.'

"Frankly, I value that suggestion very highly, because it is proffered obviously in a helpful and friendly spirit and reveals an important Old World opinion on the necessity of amendment, revision or reconstruction. It comprehends substantially what I would propose to do if elected president. I do not mean precisely that. It would be clearly unwise to undertake specific suggestions or to attempt to pass upon suggestions now. What is in my mind is the wisdom of calling into real conference the ablest and most experienced minds of this country, from whatever walks of life they may be derived and without party affiliation, to formulate a definite, practical plan along the lines already indicated for the consideration of the controlling foreign powers.

"The objection, strongly urged in some quarters, that this course would involve the reconvening of the peace convention may be regarded as a very slight one. The acceptance of the proposals by the few principal powers would undoubtedly be followed promptly by the acceptance on the part of the minor members of the alliance.

"There would be no material delay. One can not disregard the league or have any doubt about the readiness of the principal allied and associated powers. Insofar as I could do so without disregarding the proprieties I should give very earnest and prayerful undivided attention to this great and vital subject from the day of my election and I should ask others to do likewise as a matter of public and patriotic duty. Indeed, I should like to have behind me, after the election on the national referendum which I hope soon to have, a country wholly united in earnest endeavor to achieve a speedy solution of this problem upon which the future civilization so largely depends.

Already Announced.

"I have already announced that I shall urge prompt passage of the Knox resolution, vetoed by the president, declaring at an end the preposterous condition of technical war when peace actually at peace. Simultaneously I shall naturally advise the return by the Congress of its executive powers, which have been vested in me for legislation in the executive. I have no expectation whatever of finding necessary or advisable to negotiate a separate peace with Germany.

"In view of the simple fact that the allied powers with whom we were associated in the war have already formally concluded their peace, the message of the peace resolution by Congress would merely give formal recognition to an obvious fact.

Our Unselfishness Emphasized.

"Let us take stock for a moment. America in the world, aye, and America at home. The end of the war found our unselfishness emphasized in all mankind, and the garland of world leadership were bestowed upon us in every direction. We had only to follow the path of America, rejoicing in the inheritance which led to our eminence, to rivet the gaze of all peoples upon our standards of national righteousness and our conception of international justice. Moreover, the world was waiting to give us its confidence. It was beckoning opportunity of the century, not for the glorification of the United States world republic, but for America to lead every outpost of advancing civilization and invite all nations to join them in further advance to heights dreamed of but never approached before. Not force of example was flung aside for force of armed alliance. We negotiated our readjustments and restorations at home, and the cruel sacrifice of millions of lives and billions of treasure left us and the world groping in uncertainty and anxiety instead of revealing us in the sunlight of a new day, with lines formed, ready for the onward march of peace and all its triumphs.

Let's Resume Our Place.

"Mindful of our splendid example and renewing every obligation of association in war, I want America to be the rock of security at home, resolute in righteousness and unalterable in security and supremacy of the law. Let us be done with wiggling and wobbling. Steady, America! Let us assure good fortune to all. We must maintain our eminence as a great people at home and resume our high place in the estimate of the world. The moral leadership was lost when 'ambition' sought to superimpose a revolutionary theory of discredited autocracy upon the progressive principle of a growing, glowing democracy. My chief aspiration, my countrymen, if elected with power, will be to regain that moral leadership not for myself, not even for my party, though honoring and trusting it as I do, but for my country, the country that I love from the bottom of my heart and with every fiber of my being above all else in the world.

STRIKING PHRASES FROM HARDING'S PEACE LEAGUE ADDRESS.

"I rejoice that America is free and independent and in a position of self reliance and holds to the right of self determination."

"Time was when an American did not hesitate to proclaim himself a patriot. To do so now, I am well aware, is sometimes to invite the sneers of cynicism."

"We needed only the outbreak of the war between Poland and Russia to make us realize at least one of the things which, in the words of Secretary Lansing, we would have been 'let in for,' but for the restraining hand of the senate."

"We know now that the league constituted at Versailles is utterly impotent as a preventive of wars. It is so obviously impotent that it has not even been tried. It could not survive a single test. The original league, mistakenly conceived and unreasonably insisted upon, has undoubtedly passed beyond the possibility of restoration. The maturer judgment of the world will be that it deserved to

ment. . . ." Hilliard receiver. "Yes? . . . him . . . no; hold the beckoned hilariously to ring's downstairs now! You're ready to see him, aren't you?"

The broker was suddenly plunged into uncertainty.

"Yes—no! No!"

"What's wrong?" Hilliard was visited by an unwelcome chill; he tried to analyze it and couldn't.

The big man was breathing with difficulty. "I . . . you go down and . . . no, that wouldn't do either. . . . I want to see him alone. I want to get him to call off his investigator, so when we begin a new campaign we won't have any verified report against us on the old—"

"No, sir!" Hilliard shook his head smilingly. "I'm the man who's had to stand the gaff so far; I'm going to be in on any conferences. That's my play!"

Harmon licked his lips again and swallowed repeatedly.

"Well . . . it's . . . if you let me do the talking then . . . or . . ."

Hilliard turned back to the transmitter.

"Ask him to come right up," he said. He replaced the instrument and looked alarmedly at the broker. "You're not well!"

"Yes, I am. . . . Now let's get at that contract! There's no sense talking business until that's canceled, is there?"

As Hilliard stared at him an icy wave of suspicion swept him from head to foot.

"What's your hurry? It's my funeral, isn't it?"

"You are anxious, though! Harmon, I—"

"No . . . no hurry at all. Only as long as I'm here . . . and the game's played out . . . as a favor to me . . . let's cancel it. Where is it? I . . . Good God, son, don't you want that thing out of the way? It's no good with an alias on it! I'll put up the money—I—"

A sharp rap on the door stopped him short. Hilliard turned the knob; Waring and Mr. Cullen burst in.

"Why, Mr. Cullen!" he said in astonishment. "They didn't tell me you were here! Hello, Rufus."

"Hilliard!" Cullen's face was red and excited. "Oh, I beg your pardon!" He had seen Harmon.

Hilliard, taken utterly by surprise, began to phrase the introductions; he had only just begun when Harmon interrupted—Harmon with a set jaw and blazing cheeks. He was standing by the writing table, and one hand was resting heavily upon it. His manner was curiously apprehensive, curiously desperate.

"Ah! . . . Mr. Cullen . . . most happy, I'm sure . . . and Mr. Waring . . . delighted!" His voice was silken in its throatiness. "Gentlemen, I have the honor to be president . . . of the Silverbow Mining corporation . . ." He paused; his hands weaved aimlessly. "Of Montana. . . . Gentlemen. . . . I hear there's been some adverse criticism of our property . . . you're stockholders, I understand . . . not used to criticism . . ." He flung his head erect. "I offer you personally . . . to relieve you . . . of any and all obligations . . . and pay back penny for penny." Here his knees shook and he swayed appreciably. He was holding himself upright only by tremendous, visible effort.

"The man's sick!" Cullen stepped toward him. Waring and Hilliard were standing fascinated. The broker warded off Cullen with both hands.

"No, I'm not sick! . . . Contract calls for delivery of ninety-nine per cent of capital stock . . . on payment of a hundred and twenty thousand dollars . . . before December

"Waring's Downstairs Now."

first. . . . You've paid sixty-two . . . I'm here . . . case of dissatisfaction . . . to write checks for the full amount paid down to date . . . I release you . . ."

"Release us?" Cullen all but yelled it, and with a note of exultation which was electrical to Hilliard.

"Release you . . . get a notary . . ." He sat down limply. "My check-book, Hilliard—for God's sake, get me my . . . check-book!" All at once he seemed to collapse; his head hung low, and his breathing became stertorous. His cheeks puffed queerly.

Hilliard sprang to him. "Rufus! Call the office! Get the house doctor!"

Cullen had raced to the bathroom for a glass of water; he raced back again, spilling half of it. Hilliard was chafing the broker's wrists. The three men strained at the unwieldy, unresisting bulk, while leaden fear clutched at their hearts.

The house physician bustled in to find the broker lying on the bed in a profound coma; his reflexes had gone from him; he couldn't be roused. There was no need of a stethoscope.

"Order an ice bag," said the man of medicine sharply. He himself was rattling among his vials for the calomel. Rufus was at the telephone.

"Anything I can do?" asked Hilliard earnestly. His suspicions had crystalized; and he was bitterly aware that the broker had planned not justice, but some new brand of perfidy; nevertheless, the man was unquestionably in danger—and revenge could wait.

"Nothing—just give me plenty of room."

As the three stood watching painfully, Cullen put out his hand to Hilliard, and spoke under his breath.

"Henry—when did he come?"

"Only just now. An hour ago."

"Hadn't he told you? Or hadn't you heard?"

"Heard what?"

Cullen motioned to Waring.

"Give it to him, Rufus . . . Oh, I see; I see—"

The law student, without a word, produced a yellow blank and thrust it at Hilliard. He flashed a glance of indescribable contempt at the supine broker; his eyes had lost some of their anxiety.

"Oh, the big crook!" he said boyishly. "The big crook!"

"Sh-h-h! Rufus!" Still, Hilliard, at heart, agreed with him to the letter.

The boy stood close to the masquerader.

"I'm sorry, Hilliard . . . it came at four this afternoon . . . we'd been hunting for you ever since . . ."

Hilliard wasn't interested.

"I'll wait until—"

Cullen signed to him peremptorily. "Read it, I tell you! . . . It'll give you a slant on him!"

Hilliard peered over the foot of the bed; Harmon was still lying inert. The physician nodded sidewise.

"Nothing for you to do," he said grimly; and Hilliard, only partly aware of what he was doing, gave heed to the yellow blank.

The fourth telegram of the day was from Butte, Mont., addressed to Waring.

"Arrived here last night after delay in Chicago. This morning's papers contain information as follows: 'The faulted vein on XLNC property adjoining Silverbow claim number one has been located about twenty feet from Silverbow boundary. Indications are ore body running at least eighty per cent average and some places high as twenty. Also some zinc and silver and traces of manganese. This evidently extends well into Silverbow, where the greatest values are undoubtedly lying, and judging from records of old XLNC vein it's a tremendously big strike.' Understand XLNC owners offering large sum, said to be well over half-million, for a controlling interest. I strongly advise all of you to get aboard for as much as Hilliard will let go. Am sending this from office of Cooley, Benjamin & Russell, who will not send separate report unless you want it. This is wonderful news and mine is sure winner, even if only a fraction as large as reported. Please show this message to Hilliard. Sig. J. J. ARMSTRONG."

Hilliard sat down in the nearest chair. The lump in his throat was choking him; the moment was so big that his feelings were primitive; his expression of them were very simple. He only smiled; the meaningless, vacuous smile of an infant. That smile embraced the entire universe; it was indicative of a happiness so limitless, so perfect, that it was almost foolish. So Harmon, knowing from his own sources of the sudden strike, had rushed to Syracuse to pose as a man of honor! So Harmon had wanted to meet Waring—and find if Waring had yet heard the news, and, if he hadn't, stop the investigation by apparent frankness and ready restitution. So Harmon had been eager to destroy the contract, to promise Hilliard anything and everything, to repay the money that was subscribed already—and then, as sole owner, to take an enormous profit for himself.

No one in the whole world—and least of all, Waring and Cullen—could have remotely fathomed the thoughts that were eddying in Hilliard's brain. They were not for his own aggrandizement; they were for the Cullens and Durants and for the others who need never know the acid of disillusionment. They were for the ideals he had struggled toward; they were for the friends who had stood by him. And there was one very especial and very manly thought for Jack Armstrong, who had been so courageous in his defeat, and so neutral in his behavior afterward, and who now had sent the generous news winging eastward, with the request that Hilliard should learn at once of his vindication.

And as Hilliard sat there, smiling out into the silent room, and struggling to visualize the extent of fortune which had so abruptly smitten him, there was a dry murmur from the bed where Harmon lay, and a resulting silence so pregnant with meaning that the smile faded, and Hilliard was on his feet, open-eyed with the present horror brought back to him.

The physician was rising slowly from cramped knees.

"It's all over," he said; paused, and added: "Apoplexy."

The only man in all America who could have testified to Hilliard's simulation had ceased to breathe.

CHAPTER XIV.

As Dr. Durant, having already given counsel this morning to seven patients, appeared at the door of the ante-room to signal to the eight, he was palpably astonished at the presence of the young man who sat next to the door. The Doctor was very human; the Doctor was very adaptable; but for thirty years he had managed to keep the social and professional phases of his life entirely apart, and at the very first glance he was aware that Hilliard hadn't come to consult with him professionally. Nevertheless, he raised his finger in the usual sign; Hilliard followed him to the inner room.

It was Hilliard's introduction to the Doctor's morning manner; and even in his own exalted spirit, he yielded slightly to the restraint in the at-

There Was a Dry Murmur From the Bed.

mosphere. The Doctor was bland, smiling, approachable, and yet not at all the same man as he appeared at the house on James street. He seemed detached from the hampering littleness of a household; there was no air of intentional repose about him. Hilliard, in spite of the importance of his mission, felt apologetic; he felt as though he were unwittingly robbing science of its most valuable asset, which is time.

"I know this isn't exactly the proper thing to do," he said, "but I'm leaving town in an hour or so . . . I thought you might spare me five minutes, Doctor, even if it is a little irregular. Can you?"

"What seems to be the trouble?" The Doctor's tone was a mild invitation to squander nothing on preliminaries.

"Mr. Cullen and I are running down to New York today . . . You've seen the morning papers, haven't you?"

"Yes." The Doctor nodded. "And Cullen telephoned me last night. Was Mr. . . . what was his name: Harmon? . . . was he a close friend of yours, Hilliard?"

"No; just a business associate . . . I didn't know him very well personally—socially, I should say. But it changes some of my plans . . . Mr. Cullen and I have to go to New York for a few days and after that we're going out to Montana together."

The Doctor tapped his desk thoughtfully.

"On account of this?"

"Partly, and partly not. The whole perspective's changed; we've got to get to work. Now, the last time I saw you . . . why, that was only yesterday!" He broke off, laughing at himself. "It seems so much longer than that! Why, you said then that if I ever needed any one of several different things, including seventy-five hundred dollars, to come to you. And you spoke as though you really meant it, Doctor . . . So I've come!"

The Doctor regarded him steadily for a moment, and resumed tapping the glass pad on his desk with a meditative forefinger.

"You've reconsidered, have you?"

"Not that so much—but we've had fresh information. Jack Armstrong's out there, indirectly representing Mr. Cullen, and we've heard from our own lawyers besides. So on the whole, I'm willing to let you in if you're willing to come, in spite of what I said at lunch yesterday.

The Doctor hesitated.

"Not that I doubt you at all," he said, "but when Cullen telephoned me last night, he said that you and he had raised all the money you needed in half an hour after you went out to look for it. You see, I have some channels of information myself! So I can't help wondering why you need this now." Nevertheless, he was hunting for his check-book.

"We don't need it—I simply insisted on keeping a place open for you, on the chance that you hadn't changed your mind."

"You're fully satisfied it's the right thing for me to do?"

"Yes, Doctor, I am."

The Doctor held his pen poised in the air. "I'm not sure I'm really entitled to it. Doesn't it really belong to some one who was on the spot last night?"

Hilliard's eyes twinkled.

"You're fond of talking about motives, Doctor. . . . You'd have let me have that money yesterday, wouldn't you?"

"Didn't I offer it to you?"

"Yes, sir; you did. But was it because you thought you'd make a big profit, or was it just to help me?"

"Why—"

"You see," said Hilliard cheerily, "if you're going to have these mercenary motives, you've got to let me have some, too. I've let friendship interfere with business twice in two days. And you're not the only one I held a place open for—Rufus and Jack are in it, too. It was my privilege to make that condition—and I did."

The Doctor scribbled rapidly.

"Then I'll keep my promise . . . But would you mind telling me what it is I'm buying?"

"Here's your receipt, Doctor." Hilliard laid a slip of paper on the desk; took up the check, and scrutinized it carefully. "What you've bought," he said, "is a twentieth interest in a new syndicate formed last night. We'll assume the stock control in New York, when we get there, by paying some more cash (and we've got more than we need already) and after that, we may possibly sell out, or we may go ahead and develop the mine ourselves. I don't know yet which; that's what Mr. Cullen and I are going West to decide. But you'll be protected anyhow; I'll see to that. And if you're in any hurry to get your money back—"

"How soon do you think it'll be?"

Hilliard laughed outright; a laugh of utter happiness. "Right now, if you say so."

The Doctor puzzled.

"You don't make it clear," he said.

"Then I will. Mr. Embree, down at the Trust and Deposit company, was one of the men who wanted to get in with us, and couldn't. He was just too late. But when I told him what I was saving out for you, he authorized me to make you an offer. I'm acting as his agent, that is, and I've got a check here, and if you want to endorse that receipt over to him, you can have this." He presented the banker's check; the Doctor stared; it was payable to himself, signed by Embree and written for fifteen thousand dollars.

"Why, Hilliard!" he said, blankly. "Is that good business? For Embree? What's behind this?"

Hilliard fairly beamed his delight. "Well, if you want my advice, don't take it! I told him I'd have to explain it to you, and he agreed." He sat straighter, pridefully. "Jack Armstrong sent another wire this morning—and the XLNC crowd, who own the property next to ours, know that I've had this contract for all the Silverbow stock, and they've made us a flat proposition of"—he caught his breath—"four—hundred—thousand dollars for the contract! And your twentieth share would be worth twenty thousand dollars if we took it! But we're not going to—because it's worth still more, and we know it. Lots more—twice as much—so—"

The Doctor's expression altered slightly; his chin sank a little, and he sighed, almost in regret.

"That hardly seems fair," he said slowly. "That hardly seems fair." He smiled fitfully, and sighed again. "For years and years," he said, "ever since I first began to practice, I've been working and waiting and hoping to reach the point where I could give up office work and do some research. . . . And here, in a few minutes, you dangle a two years' income in front of me—for no services of mine at all . . . for no labor on my part . . . not, as I'd hoped, the result of service, but—"

"I own a quarter of the mine myself," said Hilliard, with equal gravity. "And I'm not thinking how I got it, Doctor; I'm thinking how much good I can do with it . . . can't you look at it that way, too?"

The Doctor nodded presently.

(TO BE CONTINUED.)

Picts and Scots.

In his Dictionary of Phrase and Fable, the learned Rev. Dr. E. Cobham Brewer, writes upon Picts and Scots: "Pict is not the Latin picti (painted people). As Picts and Scots are always mentioned together, there is no reason why one name should be Latin and the other Gaelic. Scot is the Gaelic 'sgod (a dweller in woods and forests), and Pict is the Gaelic pict-ist (freebooters), the two being equivalent to foresters and freebooters."

Proof That Quality Counts.

Bischoff, the great Russian scientist and naturalist, once said "women are inferior to men because their brains are smaller and lighter." But when that man died his brain was weighed and found to be lighter than the average woman's. So it is not weight or size or sex, but quality, that makes superiority, as the presumptuous Bischoff proves.—Exchange.

First Missionaries to Islands.

One hundred years ago two men were sent from Torrington, Conn., to be the first missionaries to the Hawaiian islands, then known as the Sandwich islands. The event was commemorated at Torrington.

"DANDERINE"

Girls! Save Your Hair! Make It Abundant!

Immediately after a "Danderine" massage, your hair takes on new life, lustre and wondrous beauty, appearing twice as heavy and plentiful because each hair seems to fluff and thicken. Don't let your hair stay lifeless, colorless, plain or scraggly. You, too, want lots of long, strong, beautiful hair.

A 35-cent bottle of delightful "Danderine" freshens your scalp, checks dandruff and falling hair. This stimulating "beauty-tonic" gives to thin, dull, fading hair that youthful brightness and abundant thickness—All druggists!—Adv.

Doing His Bit.

"You are charged with bigamy."

"I guess I'm guilty, your honor."

"Well, sir?"

"I'm a victim of war statistics, your honor."

"What do you mean?"

"I read some figures to show that because of the number of men killed in the war there are now six women to every man, and I tried to get my six."

ASPIRIN

Name "Bayer" on Genuine

"Bayer Tablets of Aspirin" is genuine Aspirin proved safe by millions and prescribed by physicians for over twenty years. Accept only an unbroken "Bayer package" which contains proper directions to relieve Headache, Toothache, Earache, Neuralgia, Rheumatism, Colds and Pain. Handy tin boxes of 12 tablets cost few cents. Druggists also sell larger "Bayer packages." Aspirin is trade mark Bayer Manufacture Monoaceticacidester of Salicylicacid.—Adv.

Keeping Floors Warm.

Mrs. Swanke—We need some new rugs, dear.

Her Husband—Don't we need blankets more?

Mrs. Swanke—Yes, but who sees blankets?"—Answers.

SWAMP-ROOT FOR KIDNEY AILMENTS

There is only one medicine that really stands out pre-eminent as a medicine for curable ailments of the kidneys, liver and bladder.

Dr. Kilmer's Swamp-Root stands the highest for the reason that it has proven to be just the remedy needed in thousands upon thousands of distressing cases. Swamp-Root makes friends quickly because its mild and immediate effect is soon realized in most cases. It is a gentle, healing vegetable compound.

Start treatment at once. Sold at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

Up Against It.

"I have to stay in the dining room now. Can't sit in my private office."

"Why not?"

"With this jazz orchestra going I can't tell when a waiter drops a tray of dishes."—Louisville Courier-Journal.

Catarrh Can Be Cured

Catarrh is a local disease greatly influenced by constitutional conditions. It therefore requires constitutional treatment. HALL'S CATARRH MEDICINE is taken internally and acts through the Blood on the Mucous Surfaces of the System. HALL'S CATARRH MEDICINE destroys the foundation of the disease, gives the patient strength by improving the general health and assists nature in doing its work.

All Druggists. Circulars free.
F. J. Cheney & Co., Toledo, Ohio.

No Cause for Kick.

"Oh, my tooth aches dreadfully. I don't see why we can't be born without teeth." "I think, my dear, that if you look up some authority on that point you will find that most of us are!"

"Pape's Diapepsin" for Indigestion

"Pape's Diapepsin" is the quickest, surest relief for Indigestion, Gases, Flatulence, Heartburn, Sourness, Fermentation or Stomach Distress caused by acidity. A few tablets give almost immediate stomach relief and shortly the stomach is corrected so you can eat favorite foods without fear. Large case costs only 60 cents at drug store. Absolutely harmless and pleasant. Millions helped annually. Best stomach corrective known—Adv.

			Total	376.00

You are further notified that the 10th day of November 1920 at 1:30 o'clock p. m. has been fixed the date for final hearing on said assessment and all objections thereto must be made in writing and filed with the County Auditor on or before noon of said date.

Witness my hand and official seal this 16th day of Oct. 1920.

(Seal) Chris Jacobs,
7-2c Auditor of Hancock, Co. Ia.

UNABLE TO EXPLAIN GENIUS

Scientists of All Ages Have Admitted the Impossibility of Determining Whence It Comes.

Science itself admits that it cannot explain genius, for genius simply is without explanation.

Handel was only seven when he insisted on following his father to the court of Saxe-Weisenfels, whose prince, hearing him play on the organ in church after the service was over, persuaded his father to give the boy a chance. By the time he was nine he began to compose church services for voices and instruments and did so every week for three years.

But Handel was a tremendous gormandizer. He ordered dinner for three at a hotel, and when asked if he would wait for the others, replied: "I am the others, serve the dinner," and he ate all of it.

A story is told of Handel that while seated at dinner with some other musicians he exclaimed, "Oh, I have de taught!" Those about him begged that he go into another room and write down "de taught," lest they lose some wonderful composition. Handel did this several times, when one of the friends looked through the keyhole and saw him pouring down some Burgundy which an admirer had sent him and he did not wish to share with the others.

When a singer complained to Handel that the style of his accompaniments distracted the attention of the hearers from the singer to the musician and that if he did not accompany him better he would jump up on the harpsichord (the piano of that time) and smash it. Handel replied: "Fine! Tell me when you are going to do that and I shall advertise it, for more people will come to see you jump than to hear you sing."

e Far West As Seen By Aug. Barz

RICULTURE IN CALIFORNIA

Mr. Barz was in our office the other y and told us some quite interest- facts concerning the agricultural nditions as they exist in California. e main product in the agricultural e is fruit and it is interesting to ow how much labor is really con- cted to raising fruit.

In Southern California the main oducts are lemons, oranges and tton and these are grown with the d of irrigation. The central section ows mostly grapes, peaches and me alfalfa. It is in this section that Mr. Barz spent most of his time at Lodi, which we will tell about. The northern part of California can grow small grain without irrigation as they depend on the winter moisture to grow the crop. Fruits here, how- ever, require irrigation for the reason their growing period is in the summer.

We will now tell of the central section, and especially near Lodi. The great crop here is grapes and there are some vineyads fifty years old and still bearing fruit. The vine- yards range in size from a few acres to a hundred acres. The stalks are checkered off in ten foot squares, about 435 vines to the acre. They are cultivated both ways and when these furrows are made the flood gates are opened and the whole field is irrigated. Then the fields are smoothed over with a drag to hold the moisture and in a few weeks the pro- cess is repeated and so on until the grapes mature. However there is a lot of other wok connected to it. The stalks must be pruned, the refuse burned. The stalks are self support- ing and are trimmed to four or five feet high and in the form of a small tree or bush. It is commonly believed that the grapes are supported with a fence but this is not true. By pruning the stalk grows short and thick and can hold the fruit. After the grapes are ripe they are picked by Japanese, Chinese or Hindu laborers. They are packed in field boxes and each box contains about thirty pounds. If they are to be shipped to other markets in refrigerator cars they are repacked like the way we get them here. A lot of grapes are manufactured into grape juice and these are simply dumped from the field boxes onto flat cars and hauled to the manufacturer.

Other crops of interest are some of the following: Alfalfa runs a ton to a ton and a half to the acre with five or six cuttings. Three fourths of the nuts raised come from California. Olive orchards are found here. Apri- cots and Peaches are shipped from here both fresh and dried. Plums, prunes and berries grow in abundance

M. Barz was in the vicinity of Lodi for about seven weeks and spent a great deal of his time out among the farmers to see how they farmed their land. But even with all the fine fruit they raise he says the Iowa farmers have it all over the California farmers when it comes to making money. The fuit brings a fine price, it is true, but it costs a lot of money to pay help for picking, packing and tending the field so when the net profits are figured up they do not get so much. Iowa has California beat and as Mr. Barz says, "If it were not for the people from the eastern states going to California to spend the money they have made in the east, then California would not amount to very much. Take away the tourists and retired men, California and her business would soon go broke."

SEWER MEN ARRIVE IN KLEMME

Contractor McElligott and his men are here and are now at work on the sewerage system. Mr. McElligott has a machine for digging and also one for filling the sewer trench. He will endeavor to complete the sewer this year if weather conditions are favor- abl.

A number of people have already installed their sewer connections and as soon as the sewer is completed they will have the service which they have long hoped for.

Klemme will be listed as one of the best little modern towns in the state of Iowa. We are a wide-awake town.

WATERMAIN IS NOW FINISHED

J. P. Jennings, the man who had the contract for laying the watermain has the job completed now and the mains have been tested out and found to be working good. Mr. Jennings and his crew of men with a Greiman Ditcher made good time on the job. The city councilmen extended thanks to the contractor for the careful and efficient manner in which he handled the work. Mr. Jennings also was very well pleased with the fine treatment which he and his men have received from the Klemme people.

Klemme has now a very good fire protection. There were four thousand and eighty feet of new water mains laid. There are two thousand and three hundred and ten feet of old main besides numerous small water pipes by private parties. Water hydrants have been installed at all convenient parts of the town so that there are only a very few houses in Klemme now that are two blocks away from a water connection. This means that in case of fire that plenty of water can be thrown from one to several hose connected at a near by hydrant.

Nearly all the residents along the new mains have connected to the city water supply and now have city water in their houses.

ATTENTION, VOTERS!

Since changes have been made in the election laws the following simple meth- ods of marking the ballot are suggested:

If you wish to vote a straight on November 2nd place a cross in the circle at the head of the ticket.

If you wish to vote a mixed ticket place a cross in the circle at the head of your ticket ahd also place a cross in the square before the names of the candi- dates on the other ticket for whom you wish to vote.

Natural Gas In Iowa

The people of Graettinger are enthu- siastic over the prospects of gas.

A driller, P. L. Johnson, struck a vein of natural gas at a depth of 285 on the farm of J.R. Skow. A flame was continuoslly burning at the mouth of the well since.

The plan is to develop the well and use the gas for heating, lighting and cooking purposes. Several years ago on a farm in the near vicinity a similar vein of gas was struck and it has since been used on the farm for lighting and cooking.

People are becoming excited over these discoveries of gas, because it is thought that where there is gas there is also oil. There are however no gushing oil wells in evidence yet. And people re- call the history of Herndon.

MacSWINEY, STRIKING IRISH- MAN, DEAD

Terrence MacSwiney, lord mayor of Cork, who has been on a hunger strike for seventy-three days, died at the Brixton Prison, England, Mon- day morning at 5:40. He refused to take food and it was not until last Thursday that prison physicians were able to give him food. They gave him brandy and beef tea during moments when he was unconscious.

MacSwiney's hunger strike began on August 12th when he was arrested and tried in a military court on the charges of preparing and having in his possession seditious literature. Eleven other Irish republicans were arrested about the same time and went on hunger strike two days earlier in the Cork jail. MacSwiney was taken to England and lodged in Brixton Prison. The English govern- ment issued orders that they would release no prisoner who went on a hunger strike but MacSwiney was determined to make them give in or he himself would "give up his life for the Irish cause."

FARM HOUSE BURNS TO GROUND

Some time ago the barn on the farm three miles east of Garner, owned by Peck Hanson was destroyed by fire. Sunday evening Mr. Hanson suffered another loss when the house on the same farm went up in smoke and flames. The tenants think per- haps mice got into a box of matches. At the time when the people left the house to go to town there was no fire in any of the stoves or no lamps were lit. The fire had gained such headway before neighbors discovered it that nothing could be done to save the building.

LADIES, COME OUT AND VOTE

Every woman who is twenty-one years old or more should not fail to come out and vote on Tuesday, No- vember 2nd. It is nw your privilege and it is also your duty to vote the ticket you think should head our government. If you are a Republican, that is fine and you have the right idea, or if you are by chance a Dem- ocrat, there is a chance you might be converted. Just simply put a cross (X) in the circle at the top of the column marked "Republican" and you will have done your duty. Per- haps you don't think all the Repub- licans are good looking gentlemen and you want to vote for a good looking Democrat and you have already made a cross in the circle of the Republican ticket. Very simple; just mark a cross in the square on the other ticket for whom you wish to vote. Then your ballot will read "straight Republican, with the exception of one vote for ----------Democrat."

Ladies get out and vote Tuesday of next week. It is just as much your duty to say who shall be the next President as is your husband, father or brother.

Has Bad Accident

Clarence Johnson experienced a very painful accident last week. He was out in the field plowing with a tractor when the machine stopped. He got out to crank the engine again and as he did so the engine back fired and the crank flew around striking him on the bridge of the nose. The crank hit him with such a force that his nose was broken high up between the eyes. The accident was very painful and laid him up for a few days. He is getting along fine now and is able to be about.

Notice

On account of the political lecture given by H. R. Reasoner at 7:30 Sat- urday evening Oct. 30th at the Idle Hour Theatre. The picture show will nor begin until 9::00 oclock.

Where Water Is Precious.

In Cape Town, where water—especially in the hot summer months—is a very precious fluid, it is the custom to shut off the supply at night, in or- der to eliminate waste as far as pos- sible. The authorities complain that persons frequently go to a tap to draw water after the supply has been shut off for the day, and finding no water, thoughtlessly leave the tap open. Con- sequently the next morning when the supply is turned on a large quantity of water runs to waste unnoticed.

ALGIERS RICH IN SUNDAYS

Holy Day Observed Three Times a Week by Followers of Different Religions.

Although no fewer than three Sun- days are observed each week in Al- giers, writes a correspondent, only one could in any sense be called a "day of rest." For while the prophet enjoined his followers to attend wor- ship on Sunday, he warned them against allowing it to become a day of idleness. An Arab or Moor, there- fore, will frequently leave his wares unattended in his shop while he goes off to the mosque to pray, and he sel- dom has occasion to regret this course, cases of robbery being extremely rare. The French Sunday is typically French. The Jew alone makes his Sunday a day of rest, his religion for- bidding anything save talking on that day. A walk through the Jewish quarter on the Sabbath will carry one's thoughts back many years. The picturesque groups at the street corn- ers, in their rich, flowing robes, will recall many an Old Testament story learned in childhood, for the Jew in his oriental garb has a very different appearance from the Jew as we know him in the West.

HE HAD MISSED SOMETHING

Mr. Gap Johnson Brought to a Realiza- tion of His Ignorance of His Surroundings.

"It must be wonderful to live all your life long in the midst of the 'Land of a Million Smiles,' where the silvery waters purl and plash and the nymphs frolic all the day!" prattled one member of a party of city motor- ists who had invaded the Ozarks.

"To live in the—p'tu!—which?" sur- prisingly returned Gap Johnson of Rumpus Ridge.

"Here among the hills and dells of 'The Playground of America.' Look at the advertisement in the newspaper and—"

"Well, I'll be—p'tu—dogged! I never would 'a' b'lieved it in the livin' world if I hadn't seed it in the paper. I've lived yur since Heck was a pup, and I never knowed nuthin' like that yur ladies—nimps, I b'lieve you call 'em—to be setting on rocks this time and skylarking around with nuthin' on perticker on but undershirts and smiles. Say, how long has this yur— p'tu!—business been going on, any- how?"—Kansas City Star.

The Contemporaries of Jesus.

In the New Testament there is no one like Jesus. This is all the more remarkable because to his disciples Jesus became at once an object of pas- sionate love and admiration. Stephen imitates the Lord's prayer upon the cross: "Father, forgive them; for they know not what they do," in the noble words: "Lord, lay not this sin to their charge;" and yet no one would think of likening the character of Stephen to the character of Jesus.

Among the apostles there is no one to whom in vision, composure, dignity, disengagedness from the nonessential in religion, Jesus is not a decided con- trast. When we come to the most ardent of the early disciples of Jesus, and his greatest apostle, Paul, we meet more of contrast than of resemblance. John Stuart Mill is completely right when he says that Paul's "character and idiosyncrasies were of a totally different sort."—George A. Gordon in Atlantic Monthly.

Ingenious Motion Pictures.

Motion pictures of construction work in which a large public building appears to rise from the ground like magic, being completed in the ten minutes' duration of the film, are be- ing shown before various engineering societies by government representa- tives, according to Popular Mechanics Magazine. The structure is the In- dustrial building of the United States bureau of standards, and the pictures were made by exposing a short length of film every day during the ten months of work on the building.

A few Klemmeites enjoyed an airplane ride Saturday and Sunday. A flyer and his mechanic flew here from Webster City Saturday afternoon and John Etchen took a ride with them. They then flew to Meservey where they carried a couple of passengers into the sky. Sunday they came back to Klemme with another plane and took up a few passengers. Harve Stille had a real ride for he "took the whole progrm" consisting of two or three loop-the-loops, some swell dips and a tail-spin, dropping about two thousand feet. Paul Stille was the next candidate and he also took the thrilling ride that his brother took. Both of the boys said it was "great dope" and would like more. The flyer was real handy with the machine and is an experienced man. He was an instructor of aviation at Kelly Field during the war. The prices are cheaper this year—$10 for straight flying and $5 extra for the stunts.

REMARKABLE RECOVERY

Extraordinary Curative Power of Lydia E. Pinkham's Vegetable Compound.

Philadelphia, Pa.—"I want to let you know what good Lydia E. Pinkham's Vegetable Compound has done me. I had organic troubles and am going through the Change of Life. I was taken with a pain in my side and a bad headache. I could not lie down, could not eat or sleep. I suffered something terrible and the doctor's medicine did me no good at all—my pains got worse instead of better. I began taking the Vegetable Compound and felt a change from the first. Now I feel fine and advise any one going through the Change of Life to try it, for it cured me after I had given up all hopes of getting better. You can publish this and I will tell any one who writes to me the good it has done me."—Mrs. MARGARET DANZ, 743 N. 25th Street, Phila., Pa.

It hardly seems possible that there is a woman in this country who will continue to suffer without giving Lydia E. Pinkham's Vegetable Compound a trial after all the evidence that is continually being published, proving beyond contradiction that this grand old medicine has relieved more suffering among women than any other medicine in the world.

Correct.

A few days ago the public library gave an examination to the young women who wished to enter a library class. Among the questions concerning current events was, "who is Babe Ruth?" One of the girls exclaimed, "Well, at least I know the answer to that one," and wrote, "Babe Ruth is a race horse."—Indianapolis News.

Not Bad.

Amelia was four and full of initiative. The other day she removed three gold fish from their bowl and laid them out carefully on the library table. A little later, when her mother found them there dead, she exclaimed: "My, Amelia, but you are bad!" "No," Amelia said calmly. "I am not bad. I am cute."

Nothing.

"They say a man becomes what he eats." "Then Cholly must be on a hunger strike."

MURINE FOR YOUR EYES

Night and Morning. *Have Strong, Healthy Eyes.* If they Tire, Itch, Smart or Burn, if Sore, Irritated, Inflamed or Granulated, use Murine often. Soothes, Refreshes. Safe for Infant or Adult. At all Druggists. Write for Free Eye Book. Murine Eye Remedy Co., Chicago

POULTRY

PLAN FOR FATTENING FOWLS

Profit Just as Sure With Poultry as It Is With Cattle and Hogs, Says Specialist.

If it pays to fatten hogs and cattle before they are marketed, why won't it pay to fatten poultry before marketing it? The same conditions apply in each case, says F. E. Fox of the poultry department, Kansas State Agricultural college.

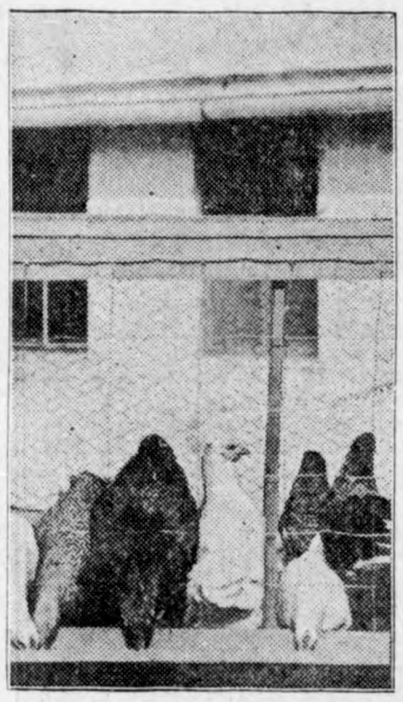
Mr. Fox, who has had packing house experience, says that the largest per cent of poultry that comes to the packing house has to be fattened before it is killed. It is the custom on the ordinary farm to cull out the flock the night or morning before marketing regardless of the condition of the birds. The poultry have been running on the range around the barnyard picking up most of their living and are just in a good growthy condition ready to take on fat at very little cost.

The farmer should cull out his flock and either crate feed or put them in a small pen under sanitary conditions for a period of two weeks and give them all the corn, kafir, or other grains they will eat, Mr. Fox says. This is long enough to feed under ordinary conditions.

If a farmer has the time the most profitable way to dispose of his surplus poultry is to milk feed them for fancy trade such as hotels and wealthy customers in a nearby town or city. There is usually great demand for high class poultry for Sunday and holiday trade in the city.

Milk feeding is practiced extensively in packing houses. The chickens are crate fed on a ration of corn meal or other mash feed mixed with two parts of buttermilk and poured in the troughs on the side of the crate. They are fed for about three weeks all they will clean up twice or three times a day.

The main objection to milk feeding on the farm is that the birds have to



Homemade Coop for Fattening Poultry.

be dressed at home. If sold alive they shrink a great deal in taking them to market and they may get bruised or get their bones broken, as the milk makes their flesh soft and tender and their bones weak and brittle.

LITTLE TROUBLE WITH GEESE

Lameness, Caused by Confinement and Improper Food, Is Chief Ailment of Fowls.

Geese should be easier to raise than any other kind of poultry, as under correct conditions there should be no disease among the young. A leading breeder of geese says that the only ailment he has to contend with is lameness, which is generally caused by too close confinement, unwholesome food, too warm housing or too close quarters. Geese require dry and windproof quarters with litter on the floor and will stand the hardest winter weather.

To treat lameness give a tablespoonful of castor oil, by holding the beak open and working it down the throat. Renew the dose next day, if necessary. Keep the ailing bird in a dry place and feed stale bread and water.

STANDARD-BRED FOWLS BEST

Some Farmers Can Make Money With Mongrels, but High-Class Birds Will Do Better.

Sometimes a man succeeds with barnyard mongrels better than his neighbor with prize-winning fowls because he gives them better care. But let the successful farmer, who has not already done so, turn his attention to pure-bred birds and he will derive a still larger profit in dollars and satisfaction.

HIGH MORTALITY IN POULTS

Some of Most Common Causes Are Exposure to Cold and Dampness and Overfeeding.

The high mortality common in young poults usually is due to some of the following causes: Exposure to dampness and cold; improper feeding; close confinement; lice; predatory animals; weakness in the parent stock.

FALL IS BEST TIME TO SELECT SEED CORN FOR USE NEXT YEAR

Stringing the Ears on Twine for Storing.

Early selection of seed corn is of special importance this year, according to specialists of the department of agriculture. Much of the corn crop is at least two weeks late, and early fall frost would cause a repetition of the conditions in 1917, when a large part of the corn crop was frozen and was unfit for seed. The following spring, seed corn was very scarce and high.

Good seed corn is the secret of a good corn crop, and autumn is the time for the selection of corn to be planted the following season. Many farmers put off seed selection until the spring when there is a scarcity of good seed corn. There is danger in this delay every year, but when the corn crop is late, as it is this year, the danger is especially great. Each spring the department of agriculture receives reports from many sections telling of the willingness of farmers to pay good prices for seed corn and their inability to obtain it.

This scarcity could be prevented by selecting the seed when it is most abundant and when the very best can be obtained—at ripening time when it has been in no way reduced in vitality. Many let this opportunity pass, the farmers expecting to purchase their seed corn, only to find that they cannot buy at any price in the winter or spring as good seed as they could have selected in the autumn.

Requirements for Seed.

Until a community has its experienced and honest corn breeder, the best place for the farmer to obtain seed corn is from fields on his own farm or in his neighborhood that were planted with a variety that has generally proved most successful in that locality. By far too many farmers consider seed good simply because it will grow. To be first-class, seed corn must be—

Well adapted to the seasonal and soil conditions where it is to be planted.

From well-grown productive plants of a productive variety.

Well matured and preserved from ripening time to planting time in a manner that will retain its full productivity.

The importance of these three requirements has been demonstrated through experiments by the office of corn investigations, bureau of plant industry, United States department of agriculture, and the results given in Farmers' Bulletin No. 1175, recently published by that department.

At corn-ripening time, specialists of the department advise, drop all other business and select an abundance of seed corn. The process is too important to be conducted incidentally while husking. Seed corn should be selected from stalks standing where they grew. In this way the seed corn can be obtained from—

Stalks that have an inherent tendency to yield well, as shown by their superiority over surrounding stalks that grew under similar conditions. Such seed inherits high-producing power.

Stalks without suckers. Such seed produces fewer suckers than seed from sucker-bearing stalks.

Storm-proof stalks with ears at a desirable height.

Stalks that are free from disease. Among the best methods for the control of several important corn diseases, including the ear and stalk rot, is the selection of seed corn from disease-free stalks. The selection of disease-free seed corn is discussed in Farmers' Bulletin No. 1176, entitled "The Control of Corn Root, Stalk, and Ear Rot Diseases."

Husk Ears From Stalks.

As soon as the corn matures, the farmer should go through his field with a seed-picking bag and husk the ears from the stalks that have produced the most corn without having any special advantages, such as space, moisture or fertility. Avoid the large ears on stalks standing singly with an unusual amount of space around them. Preference should be given the plants that have produced most heavily in competition with a full stand of less-productive plants. In all localities the inherent tendency of the plant to produce heavily of sound, dry, shelled corn is of most importance.

Late-maturing plants with ears that are heavy because of the excessive amount of sap should be ignored. Sappiness greatly increases the harvest size and weight, and is apt to destroy the quality. In central and southern states, all other things being equal, short, thick stalks are preferable. Short stalks are not so easily blown down and permit thicker planting. Thick stalks are not so easily broken down, and in general are more productive than slender ones.

Safe Way for Storing.

The same day seed corn is gathered the husked ears should be put in a dry place where there is free circulation of air, and placed in such a manner that the ears do not touch each other. This is the only safe procedure. If left in the husk long after ripening, it may sprout or mildew during warm, dry weather, or become infested with weevils or grain moths, or their eggs.

There are various ways in which seed corn can be prepared for drying. The ears may be hung on strings of binder twine or cord. Wire racks may also be used. The farmer, however, may exercise his own ingenuity as to what method he will use, but should be certain that the corn is stored in a place where it will not be exposed to damp atmosphere or rats or other destructive pests.

Detailed information as to selecting the seed corn and storing it are contained in Farmers' Bulletin 1175, which may be had upon request of the United States Department of Agriculture, Washington, D. C.

FARMERS MUST MAKE USE OF BY-PRODUCTS

Increased Costs Compel Elimination of All Waste.

Corn Stover, Disregarded in Many Cases, Is Valuable Feed for Young Stock, Idle Horses and Cattle During Winter.

With the increasing price of land, feed, and the higher cost of labor, it is becoming necessary that the farmer eliminate, as far as possible, any waste. He must make use of all the by-products of his business much the same as the manufacturer does. Corn is produced in practically every section of the country, primarily for the grain, and frequently the stover is disregarded.

Properly cured stover is relished by live stock, but that which is left in the open during disagreeable weather is far from being palatable or nourishing. Stover protected from the time it is cut in the field is a valuable feed for young stock, idle horses, and cattle that are being carried over the winter on a cheap ration.

The best way to handle corn stover is by means of the shredder. This method makes it possible to get it in the barn before the feeding qualities have been injured by the weather. Enough room should always be reserved in the barn to accommodate a good supply of stover. Hay may be safely stacked out, but it is unsafe to try to stack shredded stover. Care must be taken to give the corn ample time to cure before it is shredded, for it may heat in the mow and become worthless through subsequent molding.

GENERAL FARM NOTES

Keep your machinery in good order.

* * *

The sorghums are the dry-weather crops.

* * *

You feed your live stock—why not feed your soil, too?

* * *

Seeds are to be scarce this year. Better get yours early.

* * *

Soy beans planted with the corn increase the yield per acre.

* * *

Keep a few extra parts on hand—it saves going to town after them.

* * *

Corn-cutting machinery saves time when time is of great importance.

WRIGLEYS

The children love Wrigley's—and it's good for them.

Made under conditions of absolute cleanliness and brought to them in Wrigley's sealed sanitary package.

Satisfies the craving for sweets, aids digestion, sweetens breath, allays thirst and helps keep teeth clean.

Costs little, benefits much.

AT LEAST ONE GIRL SORRY

Veteran Had to Confess He Left Behind Him in France One Sorrowful Maiden.

The moon was full, the summer night was balmy, the hammock was built for two, and it seemed a shame to break it all up.

"Jack," she asked, "was there a girl in France who was sorry to see you go?"

"I'd rather you didn't ask me that question, dear," he said.

"But I must know. We're engaged and you should tell me everything," she insisted.

"Dear, I don't like to talk about it—"

"Oh, Jack, how could you when all the time you were engaged to me!"

"Listen a minute and I'll give you the whole story," he said in desperation. "She was—"

"Well?"

"She was my laundress. I owed her 12 francs."—Boston Globe.

Billy's Natural History.

Billy—I saw a garter snake a yard and a half long today.

Paul—Never; garter snakes don't grow that long.

Billy—Well, I thought it must have been a garter snake, it was wrapped around the limb of a tree.

LEAD WORLD IN TELEPHONES

Americans, With Their Business Instinct, Have Naturally Taken Kindly to the Instrument.

The telephone is an American invention, and we Americans have learned to use it better than any other people. Four-fifths of the world's telephones are in the United States. No other country has the exchange system developed to give such convenient service. In some of the most progressive European countries the exchange system is so cumbersome that it usually requires ten or fifteen minutes to get a connection.

The telephone in this country has expedited the transaction of business. Without our efficient telephone service, the work of most of our great industries would be slowed up and made more expensive. No other country has a rural system that compares with ours. The telephone has definitely affected and molded our business methods and our social and domestic life.—Alfred Westfall, Colorado Agricultural College.

The Worst Kind.

First Red—It can't be so bad in the American prisons. They tell me they have no tortures there.

Second Red—Don't you believe it. They give you a bath and make you work.

When Coffee Disagrees—Use

POSTUM CEREAL

Coffee drinkers, who switch from their accustomed table drink, almost always turn to Postum because of its delicious coffee-like flavor.

There's no harm to health in Postum. Much as it tastes like coffee, there is no coffee in it. Boil Postum a full fifteen minutes, and you develop that rich flavor you so much like.

"There's a Reason" for POSTUM

Made by Postum Cereal Company, Inc., Battle Creek, Mich.

FREEDOM FOR ARAB WOMEN

May Go Forth to Shop in the Business District Like the European Women.

While the Arabs of Algeria, in turbans and gracefully draped burnouses come out from their silently swinging doors, and with their staffs stroll into the European quarter of the city to buy food at some French shop, the Arab women who leave the Kasbah, the native quarter, are now enjoying a newer freedom.

The war has done it. The women are now allowed to go to other places than the baths and the cemeteries, the two traditional rendezvous where their husbands heretofore permitted them to gather. Many sally forth to shop in the downtown district like the European women. Some go to take tea at a fashionable French pastry shop, where they take off their veils, safe from the sight of Mohammedan men, and eat sweet cakes the Christians make. Then they put on their veils again, and, "shrouded in white mystery," go home to their hidden doors. Veiled to the eyelashes in "haicks" as white as snow, they undulate slowly in the billowy, baggy trousers of 1,000 folds, and pass into the heavy wooden doors, brass studded, that swing noiselessly shut.—Century Magazine.

The Literary Meeting.

Literary Lady—Are you fond of Lamb, sir?

Literal Gentleman—Essays or stew?

Taking things as they come and selling them at a profit begets success.

BREAKS A COLD IN JUST A FEW HOURS

"Pape's Cold Compound" instantly relieves stuffiness and distress

Don't stay stuffed-up! Quit blowing and snuffling! A dose of "Pape's Cold Compound" taken every two hours until three doses are taken usually breaks up a severe cold and ends all grippe misery.

The very first dose opens your clogged-up nostrils and the air passages of the head; stops nose running; relieves the headache, dullness, feverishness, sneezing, soreness and stiffness.

"Pape's Cold Compound" is the quickest, surest relief known and costs only a few cents at drug stores. It acts without assistance, tastes nice, contains no quinine—Insist upon Pape's!—Adv.

One to the Sex.

A lady, having left her umbrella in a car, applied for it at the office. "Oh, you ladies, you ladies," said the official in charge, as he brought about thirty umbrellas for her inspection, "you are so terribly forgetful!" The lady smiled as she kindly pointed out to him that, with the exception of three, they were all gentlemen's umbrellas!

CASCARETS

"They Work while you Sleep"

Make it your "hobby" to keep liver and bowels regular. If bilious, constipated, headachy, unstrung, or if you have a cold, an upset stomach, or bad breath, take Cascarets tonight and wake up feeling clear, rosy and fit. No griping—no inconvenience. Children love Cascarets too. 10, 25, 50 cents.—Adv.

Wrong Party.

Harry Carey, the picture star is about as affable a chap as one would care to meet, but once in awhile he does get peeved and this is most likely to occur when the company is on location and is in a hurry to get the work done and return to the studio.

Not so long ago the Carey company was on location in the north country, but instead of finding sunny weather, it was cold and cloudy.

This was bad enough, but the explosion came in the tiny restaurant when the chatty waiter remarked:

"The rain will be here in a minute or two, sir."

"Who'n'ell wants rain?" thundered Carey. "I didn't order any. I'm waiting for eggs—sunny side up!"

The Best Thing He Did.

A melancholy looking man tetered into the establishment of a photographer.

"I should like to have a picture of myself weeping beside my wife's grave," he explained.

"I fear I have not the necessary accessories here," said the photographer. Then he added, facetiously: "Couldn't we arrange to have the portrait made at the grave itself?"

"No," said the man; "that's in New York state. It would be too expensive to go there. Just you fix up some kind of a grave here in the shop. I could weep on that. It's no trouble for me to weep anywhere."—Everybody's Magazine.

DAIRY HINTS

SCRUB COW AT DAIRY SHOW

Object Is to Show in Practical Way How Low-Grade Herd Can Be Greatly Improved.

Mrs. Scrub Dairy Cow is about to break into the upper class of dairy society. Madam Scrub will parade with the blue-blooded aristocracy of the cattle world.

The United States department of agriculture expects to exhibit the grade family consisting of a purebred sire, a scrub cow and the grade offspring of this mating at the national dairy show to be held at Chicago in October, 1920. Some of the cattle clubs will also have similar exhibits.

The purpose of this feature is to interest the owners of scrub and low-grade herds and to show in a practical way the manner in which such a herd may be improved by the use of a purebred sire. This will do much to combat the prevailing idea that the national dairy show is of interest only to the owners of purebred herds. It will help also to advertise the fact that the United States department of agriculture through its "better sires" campaign is offering co-operation and aid to the owner of poorest herd as well as to the owner of improved stock.

A Scrub Cow Which Lacked $1,954 of Producing Enough Milk to Pay for Her Feed and Care in One Year.

After all Mrs. Scrub doesn't get into society on the strength of her own qualifications; she is accepted purely on account of the merits of her mate and her progeny.

CHAMPION DAIRY COWS

Several of our folks have asked for the names and records of leading cows of each dairy breed at the present time. Here they are, fresh from the secretaries of the breeders' associations:

Jersey—Plain Mary, 1,040 pounds butterfat and 15,255 pounds milk.

Holstein-Friesian — Aagie Acme, 1,065.4 pounds butterfat and 24,600 pounds milk.

Guernsey—Murne Cowan, 1,098.18 pounds butterfat and 24,008 pounds milk.

Brown Swiss—College Bravura II, 798.16 pounds butterfat and 19,460 pounds milk.

Ayrshire—Garclaugh May Mischief, 894.91 pounds butterfat and 25,329 pounds milk.

Milking-Shorthorn — Doris Clay, 653 pounds butterfat and 17,241.5 pounds milk.

These are all yearly records, and for cows living at the present time.

CLASSIFICATION OF RECORDS

Department of Agriculture Bulletin Emphasizes Importance of Correct Accounts.

"A Classification of Ledger Accounts for Creameries" is the title of United States department of agriculture Bulletin 865, recently issued. This bulletin emphasizes the importance of the use of a definite and logical classification of accounts for keeping the cost and financial records of any business and describes in detail a classification that can be used advantageously by creameries. The classification of accounts presented in this bulletin, if adopted will insure an adequate basis for correct operating and financial information which will be uniform from year to year, thus enabling comparisons of operating efficiency.

The bulletin has been prepared by experts in accountancy in the bureau of markets after a careful study of the methods pursued at a number of creameries in recording their costs and the financial activities of their business comprehensively and simply.

The bulletin can be had upon application to the United States department of agriculture, Washington.

GET SILO PROPERLY FILLED

One of Most Serious Jobs of Dairy Farm and Requires Careful Study and Work.

To get the silos properly filled is one of the serious jobs of the dairy farm. Careful planning will facilitate the work. The silo should be put in order, the hoops tightened and the doors repaired. The roof should be patched if it has become leaky. The binder must be put in order if delays are to be avoided. Likewise the cutter must be put in first-class working condition. The wagons are not to be overlooked when preparations for an efficient season's work are being made. No silo-filling season passes without accident to one or more wagons. For a wagon to be taken off the work for a day or

USE "DIAMOND DYES"

Dye right! Don't risk your material in a poor dye. Each package of "Diamond Dyes" contains directions so simple that any woman can diamond-dye a new, rich, fadeless color into old garments, draperies, coverings, everything, whether wool, silk, linen, cotton or mixed goods.

Buy "Diamond Dyes" — no other kind—then perfect results are guaranteed. Druggist has "Diamond Dyes Color Card"—16 rich colors. Adv.

Call for Introspection.

One little seed doubles—triples—multiplies an hundredfold in a surprisingly short time. Think of all these things, reader, and then ask yourself, "Am I the rotten apple of Guam; shall I be the seed of discontent?"—Guam News Letter.

GREEN'S AUGUST FLOWER

A Marvelous Remedy for Indigestion.

Those who suffer from nervous dyspepsia, constipation, indigestion, torpid liver, dizziness, headaches, coming up of food, wind on stomach, palpitation and other indications of disorder in the digestive tract will find Green's August Flower a most effective and efficient assistant in the restoration of nature's functions and a return to health and happiness. There could be no better testimony of the value of this remedy for these troubles than the fact that its use for the last fifty-four years has extended into many thousands of households all over the civilized world and no indication of any failure has been obtained in all that time. Very desirable as a gentle laxative. Sold everywhere.—Adv.

No, I Can't.

"I can read my wife like a book," bragged Mr. Naybor.

"I'll bet you can't shut her up like one," growled Mr. Gab.—Cincinnati Enquirer.

Cuticura Soothes Itching Scalp

On retiring gently rub spots of dandruff and itching with Cuticura Ointment. Next morning shampoo with Cuticura Soap and hot water. Make them your every-day toilet preparations and have a clear skin and soft, white hands.—Adv.

HEALS RUNNING SORES

"I feel it my duty to write you a letter of thanks for your wonderful Peterson's Ointment. I had a running sore on my left leg for one year. I began to use Peterson's Ointment three weeks ago and now it is healed."—A. C. Gilbrath, 703 Reed St., Erie, Pa.

For years I have been selling through druggists a large box of PETERSON'S OINTMENT for 60 cents. The healing power in this ointment is marvelous. Eczema goes in a few days. Old sores heal up like magic; piles that other remedies do not seem to even relieve are speedily conquered. Pimples and nasty blackheads disappear in a week and the distress of chafing goes in a few minutes. Mail orders filled. Peterson Ointment Co., Inc., Buffalo, N. Y.

Rheumatism Comes From Tiny Pain Germs

First of all, get it firmly fixed in your mind that all the liniments in the world have no effect whatever on Rheumatism.

A very common form of Rheumatism is caused by millions of tiny disease germs which infest the blood. The one and only sensible treatment, therefore, is one which cleanses the blood of these germs, and routs them entirely out of the circulation.

This is why S.S.S., the greatest known blood purifier is so successful in the treatment of Rheumatism. It is a powerful cleanser of the blood, and will remove the disease germs that cause your Rheumatism, affording relief that is genuine.

S.S.S. is sold by all druggists. Free literature and medical advice can be had by writing to Chief Medical Adviser, 154 Swift Laboratory, Atlanta, Ga.

The Housewifes Burden

When a woman is almost distracted from overwork, her home is in disorder, crying children, and on top of all is suffering from backache, bearing down pains, or some other form of feminine ills, then she should remember that hundreds of women in just her condition have been restored to health and regained their youthful strength by taking Lydia E. Pinkham's Vegetable Compound and not rest until she has given it a fair trial.

Proof that it Restored the Health of These Two Women

Cairo, Ill.—"Some time ago I got so bad with female trouble that I thought I would have to be operated on. I had a bad displacement. My right side would pain me and I was so nervous I could not hold a glass of water. Many times I would have to stop my work and sit down or I would fall on the floor in a faint. I consulted several doctors and every one told me the same but I kept fighting to keep from having the operation. I had read so many times of Lydia E. Pinkham's Vegetable Compound and it helped my sister so I began taking it. I have never felt better than I have since then and I keep house and am able to do all my work. The Vegetable Compound is certainly one grand medicine."—Mrs. J. R. Matthews, 3311 Sycamore Street, Cairo, Ill.

Chattanooga, Tenn.—"I used Lydia E. Pinkham's Vegetable Compound before my baby came when I could no longer keep up. It strengthened my back and relieved me of the ill effect which so often develops at such times. That was my first experience with the Vegetable Compound. Years afterwards I took it during the Change of Life and got along so well I scarcely ever had to lie down during the day and seldom had dizzy, fainting spells. I am now well and strong, can do all my housework with perfect ease and it is a comfort to me to be able to say to other suffering women 'take Lydia E. Pinkham's medicine and be strong.' I will be glad to have you use my name if it will be the means of helping any one."—Mrs. R. A. Fairburn, 606 Orchard Knob Ave., Chattanooga, Tenn.

Local News of Interest About Your Friends

Mr. and Mrs. Henry Lewis were visiting friends at Mason City last Friday.

Mr. Gus Church, of Fort Dodge, was here on business Saturday.

James Busick and son Clifton of Goodell ,were here Friday on business.

Albert Kraus went to Dows Friday on a business trip.

Mrs. A. C. Carpenter of Goodell was a Klemme visitor Saturday.

Miss Minnie Lenz was a Garner caller one day last week.

Mr. and Mrs. E. P. Hubbard of Good ell were Klemme callers last Wednesday

Mrs. Henry Griffen and son of Goodell were Klemme callers last wednesday.

Mr. Mrs. Frank quigley, Jr., of Good ell were Klemme visitors one day last week.

Mr. Will Jurgemeyer is enjoying a visit from his father who came last week.

Mr. and Mrs. Charlie Peterson, of Goodell were Klemme callers last Wednesday evening.

Mr. and Mrs. Charlie Pals, of Meservey were shopping with Klemme merchants last Thursday.

Ray. White moved his household goods to Forest City Monday where the family will live in the near Tuture.

Mrs. A. D. White and daughter, Mamie, of Goodell, were Klemme visitors Saturday.

Ben Coobs came from McGregor, Iowa, Saturday for a visit at the W. F. Pavey home.

Rev. A. H. Meyer left Tuesday for Storm Lake to attend the District Instituth. He expects to return tomorrow.

The first number of the lecture course for this winter will come on November 11. Get your season ticket reserved as soon as possible.

Mrs. A. H. Meyer went to Dows Tuesday evening of this wehk for a visit of about a week with her sister, Mrs. F. W. Heuer.

Mrs. McGee left last week for Iowa Clty for a visit with her husband, Wilbur MsGee, who is confined to the hospital there and who is reported to be quite ill.

The Editor received a letter from Mr. Uben the other day. He says they like Wedster city fine and that he and Paul Grange are enjoying a good business in the creamery in which they bought.

John Griewe has rented a farm at Osakis, Minn; and last week shipped his goods to that point. Monday the family left in their car for their new home. The best wishes of many friends go with them. —Garner Signal.

Clarence Bachman went to Forest City Monday afternoon to begin work in Raymond White's cafe. Mr. White purchased this cafe last week, it is the best eating house in Forest City and no doubt he will enjoy a fine business.

Quite a number of people from here went to Garner Sunday evening to attend the evangelistic services. Rev. Meyer declared no service at his church so quite a number from that church went in cars.

Miss Annetta Shuldt left Saturday for her home at Gladbrook, Iowa, to spend her fall vacation. Miss Shuldt is one of our popular rural teachers, and is the case with most rural schools, her school has been closed for a few weeks during orn picking time.

Mr. A. Wellemeyer and Anna Griewe were at Ventura last Thursday and Friday conducting a sale at the Washburn store. Mr. Wellemeyer took over a lot of ladies coats, sweaters and ready to wear goods for the sale. They report a very successful sale.

The ladies of the Methodist Episcopal Church gave a "Bake Sale" at the J. N. Day store last Saturday, which ws a fine success. The cakes, pies, doughnuts, etc., were mighty fine examples of the fine cooks the church can boast of, and needless to say everything went "like hot cakes" and they were soon out of goods to sell.

Mrs. Anson Avery of Goodell, is visiting at the home of Mr. and Mrs. Frank Roths for a time. And as a bit of information to some of our subscribers who are not well acquainted with this lady, we will say that she is one of the oldest pioneers of Hancock County, in fact she was the first white woman to settle in this County. Many are the interesting tales she can tell of the old days when Indians were not any too friendly toward the white settlers.

And by the way, we sneaked in on Doctor Reuber last Thursday and caught him in the act of chasing a scrubbing brush up and doun the floor he looked kinda sheepish and said he was cleaning house, we took his word for it and also noticed he had the office adorned with new window curtains. Now girls don't all rush at once but we'll agree with you he would make a fine husband, if caution were used he might be captured.

R. J. White of Klemme bought the resturant business formerly ouned by Clarence Fishea and took possession Monday. Mr. Fisher has built up the patronage of this popular cafe by giving the best service to the hungry public and Mr. White steps in as proprietor of a business that is second to none. He will continue to give the public the same careful and efficent services as has characterized the place during Mr. Fishers proprietorship. Mr. White is not a stranger here, having formerly worked in Forest City. He will move his family to this city the first of next month.—Forest City Republican.

LEGAL NOTICES

NOTICE OF PROBATE OF WILL

State of Iowa, Hancock County, ss.
In District Court, December Term, 1920.
To All Whom It May Concern:

YOU ARE HEREBY NOTIFIED, That an instrument of writing purporting to be the last Will and Testament of Edward Charles Collins deceased, dated Dec. 24 1919, haveing been this day filed, opened and read, and Monday the 6th day of December, 1920 is fixed for hearing proof of same at the Court House in Garner, Iowa, before the District Court of said County or Clerk of said Court; and at 3:30 o'clock p. m. of the day above mentioned, all persons interested are hereby notified and required to appear, and show cause, if any they have, why said instrument should not be probated and allowed as and for the last Will and Testament of said deceased.

Dated at Garner. Iowa, October 11th, 1920.

RAILWAY SPANS GREAT DESERT

Road in Australia Crosses Inhospitable and Waterless Stretch of Country.

TOOK FIVE YEARS TO BUILD

Daring and Skill of Engineers Conquers Most Desolate Waste in World—Heat and Insects Make Life Unbearable.

Melbourne.—When the Prince of Wales decided to make his recent journey from Perth to Adelaide by means of Australia's first transcontinental railway, it was a compliment to the daring and skill of the Australian engineers who conquered one of the world's most formidable deserts.

It was the late Lord Kitchener who suggested the line, pointing out that for strategical and other reasons western Australia should be linked with the other states of the commonwealth by an iron road.

But the great Victorian desert lay between, a barren, inhospitable and waterless stretch of country. Not a rivulet is to be found in the whole of this vast region. It is one dreary expanse of sand and limestone rock, relieved here and there by salt-bush, which even cattle refuse to eat. Worse still are the intense heat and the blood-sucking insects which abound.

Five Years Required.

The fact meant a five-year battle against terrible odds. It was only completed just before the armistice.

The survey work alone occupied two years, and cost £20,000, the total expenses of the undertaking amounting to over £7,000,000. Camels had to be requisitioned to carry the surveyors and their stores. The chief engineer records how it was impossible to use ink, as it instantly dried on the pen and the leads dropped out of the shriveled pencils. To secure relief from the rays of the midday sun they had to bury themselves in holes in the sand, where they were attacked by fierce insects.

The route having been decided on, the steel rails were laid simultaneously from each end across the desert. As the country was for the most part flat, and not a river or a noticeable hill intervened, little grading work was necessary. It was simply a case of making an even bed on which the sleepers were quickly laid. Then came the placing of the steel rails across them by means of a track layer, and spiking and bolting them.

Very trying, however, was the heat, particularly during the summer months. It was often impossible at midday to touch the steel rails or handle a shovel without fear of blistering the fingers. The men had to be provided with rubber gloves to enable them to handle their tools, and also to save their finger nails from splitting, and wear masks as a protection against the insects. Life was only made possible by a liberal daily supply of ice, obtained from the refrigerating cars attached to the construction trains which followed them.

Discover Water.

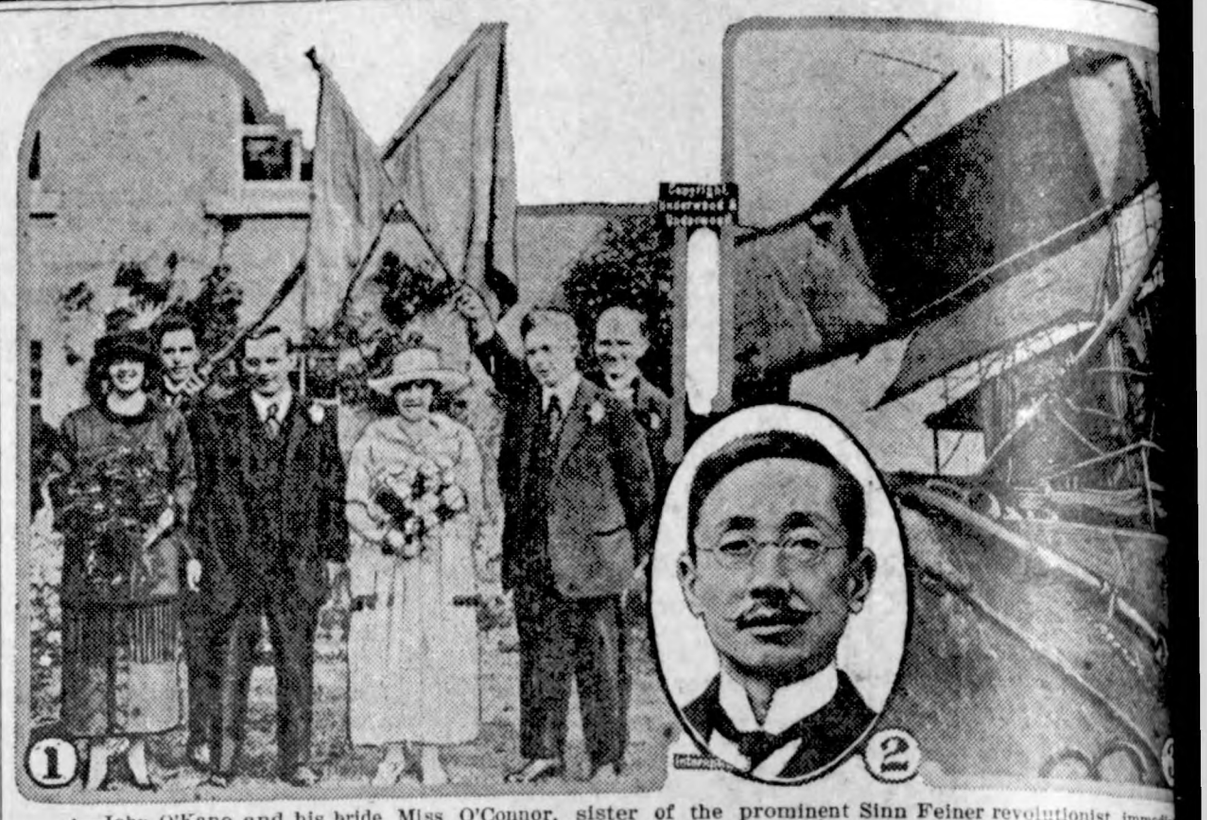
At intervals of 50 miles or so, water tanks were built, the intention being to use these in connection with the working of the trains. They were to be supplied with water pumped from the reservoirs at Kalgoorlie. But after two and a half years' work, during which the track had progressed at the rate of about a mile a day, the engineers realized that if a really efficient service was to be maintained the proposed method of obtaining water would have to be modified.

So they sent for a boring plant, and at a point 350 miles from Kalgoorlie began boring for water. Everyone shook their heads, declaring there was no water in the whole of that barren land. But at a depth of 1,300 feet water was found.

This discovery of water not only relieved the engineers of considerable anxiety and greatly lessened their work, but it has changed the whole aspect of the country. Sheep now graze along the track, which a few years ago was a barren waste. Experts declare that the once formidable desert will become a great grazing country, carrying at least 3,000,000 sheep.

Great Air Mail Hangar at Omaha

The transcontinental air mail hangar at Omaha, one of the stops in the New York to San Francisco air service.



1—John O'Kane and his bride, Miss O'Connor, sister of the prominent Sinn Feiner revolutionist, immediately after their wedding under the "Irish republic" colors at Collridge, Ireland. 2—Dr. Alfred Sze, newly appointed Chinese minister to the United States. 3—View of the oil tanker C. W. Rowe after an explosion in a South Brooklyn shipyard, which killed and injured many persons.

Used Stolen Money to Pay Attorney Who Freed Him

John Hartman of New York city, accused of stealing a pocketbook containing $10 from the home of Hose Avey, near Bryant, Ind., was acquitted when tried before Justice of the Peace Whiteman of Bryant.

As soon as the decision was reached Hartman produced a pocketbook and took $2 from it to pay his attorney, Urban Bonifas, a young man recently admitted to the bar.

"Why, that is my pocketbook," Mr. Avey said, when he saw Hartman produce it and the money. He was right, but Hartman could not be placed in jeopardy twice for the same offense, and he left town $8 to the good.

1,300-FT. SERPENT AS MOUND

Left by Ancient Peoples in Ohio as a Symbol of Religion—Built of Earth and Stone.

West Union, Ohio.—A great serpent 1,300 feet long, built of earth and stone, a symbol of the religion of ancient peoples, stands a few miles from here as the most interesting and important earthwork, left by the mound builders of Ohio.

Situated in a rather secluded spot, supposedly selected by the mound builders for privacy in performing their ancient rites, the massive reptile winds gracefully back from a glen to higher land. The serpent's head rests on a rock platform which presents a precipitous face to the descending sun and is about 100 feet high. The jaws of the mouth are widely extended in the act of swallowing an egg, represented by an oval ridge of earth.

Tribute to Former Foemen.

Knoxville, Tenn.—Hector W. Church, Union veteran, resident of Oxford, N. Y., has left his estate to the United Daughters of the Confederacy, providing that the income be used to perpetuate the fame of Jefferson Davis, Gen. Robert E. Lee, Gen. John B. Gordon and Gen. Jubal Early.

Dives of West Being Closed

Resorts That Have Bulked Large in Traditions Will Soon Be Only a Memory.

"OWL" IS THE LATEST TO GO

New Government of Mexico Frowns on Gambling and Other Evil Conditions Along the International Boundary—Orders Clean-Up.

Mexicali, Lower California.—One by one the resorts whose names have bulked large in the traditions of the West are meeting an end. Latest to go is the "Owl" at Mexicali, which its operators and officials of the Cantu regime in Lower California freely admitted had paid large sums for permission to operate.

In the Owl were to be found all the attractions that went to make up the typical dance hall of frontier days. The building itself was new, the "old Owl" having been destroyed by fire last February, but the traditions of the place were much the same and those familiar with the older establishment were at home in the new.

A Busy Place.

The old Owl was a huge, barn-like structure. Gaming tables and some pool and billiard tables, surrounded by high seats for spectators, occupied its front spaces. Along one side ranged a lengthy bar, where in busy time ten or a dozen bartenders were no unusual sight. Further back was a stage with flimsy scenery, curtained "boxes," that were strongly reminiscent of half a century ago, and a number of plain seats and benches for those not inclined to the expensive semi-privacy of the "boxes."

From near the theater section a passage led to a space surrounded by several hundred small rooms, colloquially known as "the yard," where outcast women lived.

Much of the costly gambling paraphernalia that was used in this old establishment was saved when the building burned and was used later in the new "Owl."

Ordered to Close.

September 4, when orders came from Mexico City, where the new government had frowned upon the gambling and other conditions along the international border, to close the place, a dramatic scene was enacted. Manager Coburn read the order, looked for a moment over the crowd of hundreds, representative of nearly every nationality, and summoned the house police. He gave them hasty instructions and they, starting at the rear of the main room and shouting the word as they went, cleared the place within a minute or two of all except the dealers, lookouts and other employees. Many Chinese, not understanding the order, stampeded through the doors to the street.

The dealers quickly gathered up the big piles of silver coins and the gambling paraphernalia. Soon the arch of lights above the entrance, that spelled out the name of the place, flickered out. The "Owl" was closed.

According to the order from Provisional President de la Huerta, it never is to re-open.

OLD CHANCERY INN FOR SALE

Famous London Building, Six Centuries Old, Will Be Offered at Auction.

London.—After six centuries the historic Clifford's inn, oldest of the nine inns of Chancery, is to be offered for sale by auction.

The first authentic record of Clifford's dates back to 1310, when it was granted to Baron Clifford by Edward II. It was first let to students of law in the reign of Edward III.

In the quaint old hall, Sir Mathew Hale and seventeen others sat after the great fire of London in 1666 to adjudicate upon claims of landlords and tenants of burned houses. There are preserved in the British museum forty thick volumes recording their decisions.

Belongs to the "Old School."

Connersville, Ind.—A woman called for jury service in a magistrate's court here refused to serve. She said she had dishes to wash and housework to do and if forced to serve she would not return a just verdict.

SEVERE ON TOURISTS

Many Travelers Take Ships to Marseilles or Venice to Escape Arguments at the Frontiers.

Constantinople.—Nine vises are required to carry a traveler from Constantinople to Paris on the Oriental express, and the task is so great most travelers take steamers to Marseilles or Venice in preference to the jumbled rail trip across the Balkans, which necessitates endless controversies with officials at various frontiers.

An American going to Paris by rail must start with the vise of the United States consulate on his passport, then go to the Swedish legation to get the Bulgarian vise. The Serbian stamp is next in order. It must be followed by three Greek stamps.

Then vises must be had of the Italian and the French military controls.

Many passports are not large enough to carry all the stamps. An Englishman who recently attempted to get the collection on an old passport exhausted all the blank space in four calls. His embassy would not permit him to attach a blank sheet to his passport. Consequently he had to have a new one issued and started over again on the round.

Since the Polish disaster, bolshevik agitation has become so acute in Turkey that travelers are watched more carefully than ever before by the allied officials.

On a recent passenger ship from Batum, a so-called Russian colonel, whose conversation with British officials showed a decided ignorance of military affairs, was arrested. He had five passports in his trunks, with great quantities of soviet literature in many languages. The bogus colonel was sent to General Wrangel in the Crimea.

The rear sight of a new sporting rifle can be adjusted in the dark, as every turn of the thumb screw makes a clicking sound.

NEWS REVIEW OF CURRENT EVENTS

Campaign of Assassination Is Making the Irish Problem More Difficult.

ASQUITH ASSAILS PREMIER

Large Part of the Island Faces Blockade — Poles and Russians Sign "Peace Without Victory"—American Agricultural Producers Object to Lower Prices.

By EDWARD W. PICKARD.

The Irish problem, instead of approaching a solution, seems to have taken a new lease of troublous life, and the woes of the Emerald Isle are increasing instead of diminishing. This deplorable fact is due directly to the campaign of murder, arson and intimidation that is being carried on by what Sir Hamar Greenwood, chief secretary for Ireland, calls the inner circle of assassins. The daily and nightly assaults on the police and other officials of the British government provoke the latter to bloody reprisals which are to a considerable extent condoned and excused by the government. Premier Lloyd George made a speech at Carnarvon which was interpreted by his opponents as a justification of the reprisals. He said that 238 policemen had been shot, of whom 109 had been shot dead, and the patience of the police had given way, with the result that they hit back. Lloyd George declared that if, as was contended, there was war in Ireland, then the war must be waged on both sides. But when policemen were shot in the back by Sinn Feiners the premier said, it was not war but murder. He asked whether, under the system of terrorism which made it impossible to obtain evidence, it was any wonder the police shot the murderers.

Herbert H. Asquith, former premier, who sees a chance to return to power, declared Lloyd George's speech was a "condonation of the hellish policy of reprisals," and another part of it he construed as "repudiation, root and branch, of dominion home rule." He is rallying all anti-government forces for a fight, as soon as parliament opens, over British government in Ireland. Before that time the delegation from the Irish peace conference is to be received by the premier, and it is believed he will then make a new offer to Ireland. Meanwhile the government, says Sir Hamar Greenwood, is determined to crush the campaign of assassination, and if necessary will increase the police force in the island to many thousands.

One threatened result of the campaign of assassination is the virtual blockade of a large part of Ireland through a withdrawal of the mail and telegraph service and the entire closing down of Irish railways. This would mean widespread distress and heavy loss to farmers and traders. Whenever parties of troops present themselves for conveyance the rail workers refuse to operate the trains, and the railway directors now have agreed on the instant dismissal of these men. The carrying out of this policy probably will result in the cessation of railway traffic within a month.

The British secret service believes it has proof that the Irish "republic" is being aided, financially and by the distribution of arms and the organization of an espionage system, by the Red organization headed by Victor Kopp, soviet envoy in Berlin. Kopp handles funds from Russia and organizes propaganda through newspapers and agents, and the secret service says it has established the connection of this intrigue with revolutionary movements in Ireland and other parts of the British empire. A dispatch from Paris says Sinn Fein agents have been trying to purchase submarines from Italy and France, but were told that Great Britain would consider the selling of submersibles to them an act of war.

The signing of a peace treaty and armistice by the Polish and soviet Russian delegates at Riga, reported a little prematurely last week, took place on October 12. The armistice was to become effective at midnight October 18. Joffe, head of the soviet delegation, described the peace as "a peace without victory and without vanquished," and disinterested observers at Riga agreed that that described it. Hence it was predicted that the pact would not be very pleasing to either the Poles or the Russians.

A peculiar complication in the affairs of that part of Europe arose through the seizure of Vilna, the capital of Lithuania, by troops under the command of General Zeligouski, who resigned from the Polish army before the occupation. His force is made up of both Poles and Lithuanians. He established a council of six in the city, and that body is planning a provisional government for central Lithuania pending the question of the self-determination of the inhabitants of that district. The Polish government disavowed the occupation of Vilna by Zeligouski, the Lithuanians were said to be mobilizing for the recapture of the city, and it was reported that representatives of the League of Nations might be asked to straighten out the situation.

As has been said before, the Russian soviet government is now free to devote all its strength to the crushing of Baron Wrangel in south Russia. But the baron is wasting no time, and late dispatches from Constantinople say his Dneiper river campaign is making excellent progress. He had just captured two Bolshevik battalions, occupied two important towns and destroyed a large munitions plant. The report that Makno, the guerrilla leader, had deserted Wrangel is confirmed, but several of his bands have been routed. Semenoff, the Siberian anti-Bolshevik leader, has given his adherence to Wrangel and asked orders from him.

Every day brings its batch of reports of mutinies and revolts against the soviet rule, and in London it was believed the downfall of the Lenine and Trotzky regime was near. Serious fighting was said to be taking place in Moscow, the troops storming barricades in the streets. Bolshevik efforts elsewhere were collapsing. The Armenian and Georgian armies were preparing to unite to defend the two republics against the Bolshevik Turks, Tartars and Azerbeidjanians. France and Turkey have made an agreement by which the French will police Adana, Tarsus and Mersone for the protection of Armenia.

Earl Curzon, British foreign secretary has told the Russian Bolshevik foreign minister that the British naval forces have been ordered to attack on sight any Russian submarines encountered on the high seas—this because leading members of the soviet have declared that government considers itself in a state of war with Great Britain.

The various factions of the Italian Socialist party, assembled in convention, have been having a struggle for control. The moderates appear to have the whip hand and have refused to let the party commit itself in favor of soviet rule for Italy. The conference voted solidarity with Russia but the majority stood fast against the Communists and made it plain they wanted no repetition in Italy of what has happened to Russia. Their leaders declared the Russian difficulties came from the rottenness of the present regime and that the Bolshevik government would be unable to transport products to other countries even after the blockade is lifted. Later in the week Socialist leaders and those of the General Confederation of Labor published a joint manifesto ordering demonstrations in every town in Italy to force the government to recognize soviet Russia. They said a general strike of rail workers had been arranged.

England's labor anxieties were centered on the action of the coal miners whose delegates, after rejecting the wage proposals of the mine owners, decided that notice of a strike, given some time ago, should expire on Saturday. This was taken to mean the strike would go into effect on day. The operators offered a crease of one shilling a day to with and later two shillings, the ers to guarantee a certain min of production. The men had a cion that they were to be tricked doing more work, and rejected t fer by a vote of about five to on

The miners' strike, it was ad would throw hundreds of thous workers in other industries out ployment and bring about a s crisis in the country's economic The iron and steel manufactu the Yorkshire districts at on gan preparations to shut down plants. The government for week been getting ready to handle the ation. There was a chance that other members of the triple allia the railway men and transport ers—would be able to set up m ery for mediation and at least the strike.

King Alexander of Greece, who bitten by a monkey some two w ago, has been near death from poisoning, and at this writing is out of danger. A noted French cialist was hurried to Athens and pressed the opinion that the case was of the most critical sor not hopeless.

That the price reduction move which appeared to be really st recently would not please ever was a certainty. The trend "back ward normal" made a hit with the sumer, but not with the produ Now the latter is protesting vigor ly, the lead being taken by the f ers of wheat, cotton and tobacco the live stock men. The wheat want $3 a bushel and the cotton 40 cents a pound. Leading agricul al producers met in Washington, their griefs, talked of a farmers' st and adopted resolutions severely cizing government financial auth ties and calling on them for ac bringing about higher prices. Sen E. D. Smith of South Carolina that the farmers curtail produc and withhold their crops from the ket until prices were satisfactory. this he was criticized by Benjamin Marsh, secretary of the Farmers' tional council., who said:

"We must guard against some of wild statements made here. There no panic. Let's get away from shevik statements.

"I was astounded when Sen Smith suggested that the farm strike, for that's what it amounts If I am not mistaken, he voted for bill to make strikes by labor a ony. When senators get up and they don't understand the federal serve act, I think it is time we sh get a few farmers in the senate. farmers are not going to stop pro ing, but the farmers can call the of the federal reserve board."

Dr. W. J. Spillman, former chief the board of farm management of Department of Agriculture, said: is quite clear that the federal res board and the secretary of the tr ury are using the authority placed their hands for the purpose of nipulating the market."

Next day W. P. G. Harding, gov nor of the federal reserve board, ferred with the producers and ma took to pacify them. He urged th to keep cool, and expressed the be there will be a reaction from pres low prices. He told them he favo putting their crops on the market gr ually. He warned against any effo to withhold commodities, and poi ed to the recent financial panic Japan and the present Cuban sug situation as examples of what mig follow efforts to boost prices to a ficial heights.

Through Senator Pat Harris chairman of the Democratic speak bureau, Governor Cox has challe Senator Harding to a joint debate the issue of the League of Nations any time and place convenient to Harding and the Republican campa management. The Democratic m agers pointed out that both candid would be in Ohio during the clo weeks of the campaign, and that the debate might be easily arrang

of riches turned his mind to the individuals who would share in them; Dr. Durant, who, unless he chose, need never keep office hours again—he could devote himself to the research he loved; Cullen, whose blind, bulldog faith had made him forever independent, even Rufus Waring, whose modest contribution, accepted out of spleenless commiseration, had swelled to the dignity of four figures, and given him the means to show the world to Angela. And Hilliard himself had made far more than all the other venturers combined—not in money, perhaps, but in dividends payable in the medium of his self-respect.

And yet, as the realities stood, now, he was sensitive to the nothingness of his triumph, until such time as he had some one to divide it with him. For there is little pleasure in a monopoly of happiness; not even a joke is fully established until some one appears to share it; a secret is delectable only when it's repeated, a conquest is empty without the popular acclaim, or the arrival of the historian. He felt this keenly; he reflected that of all the syndicate, he alone was without a beneficiary. And today, when he had steeled himself to speak to Carol . . . Like countless generations of men before him, he began vaguely to wonder what he should do if she refused him.

What would be left? Only the shell of achievement. Would he go back to France? or would he remain in America, and struggle for success by endowing war charities out of his glorious income-to-be? Also . . . and this was enervating . . . what should he say to her? It is given to few men to propose twice, in different characters, to the same girl.

The train plowed and panted through the thickening drifts; Hilliard's watch was coming out of his pocket at five-minute intervals; here was Rochester at last . . . three hours late . . . and there, shining dimly through banked clouds, was the sun! The train seemed warmed to greater effort by its mere appearance; Hilliard, who had measured time by weeks, then by days, and more recently by reluctant hours, began to mark the minutes from his mental calendar.

And then, after an interminable century of impatience, the outlying villages, gray and smoky; the flat wastes of Solvay; the road slowly becoming streets; the buildings adding height . . . Syracuse!

His feet were on the platform; he was hurrying forward. Ahead of him . . . and in his excitement he stumbled heavily . . . there, coming toward him . . . Carol and the Doctor, befurred and rosy . . . no question of the welcome they were bringing him!

His own initial remarks were grossly incoherent. There were no words to fit the situation; perhaps he did it greater justice by the disconnected sounds he made. And then he was entering the Doctor's closed car; they were bouncing over the cobbles of the lower city; they were attacking the grade of James street, and he was peering out in an ecstasy of memory at the houses where he had played in boyhood.

Two o'clock . . . on time for dinner to the second! A house hanging with evergreen; a Christmas spirit permeating every nook and cranny; Christmas odors—not all of evergreen—drifted in tantalizing whiffs to meet him.

A joyous interlude; a gay procession; a hush; a gravely spoken blessing—Oh, that Christmas!

* * * * * * *

There came a time early in the evening when Hilliard found himself alone with Carol. He had a vague recollection that they had been sent to look for something . . . a corn popper, or some other equally futile article . . . and for an instant he marveled at their expecting to find it in the sun-parlor, where they had wandered. But the sun-parlor was happily unoccupied; and there were comfortable chairs in it; and something very green and red and seasonable in all the windows; so that they both delayed prodigiously, and exchanged a number of highly inconsequential remarks about the decorations. Presently, without so much as a transient thought for the corn-popper, they sat down with one accord. From a distance the murmur of cheerful voices in the living room was an adequate accompaniment to their thoughts.

Hilliard's head was dropped low; his reverie was so profound that not even Carol's voice could rouse him—not until she spoke a second time.

"I said—a penny for them," she repeated, amused.

"Oh!" Hilliard's awakening was explosive. "Why, that's queer . . . I was just thinking about that myself! I mean the first Sunday I ever came up here to dinner. You said the same thing then. Remember it?"

"Yes, indeed . . . and they were a wonderful bargain at the price!" He didn't seem to recall that she had ever looked so mischievous.

"They are now, then," he said. "Because it's just as it was before—I was thinking about you." Regarding her, he was transported anew by her loveliness. And it wasn't only her external loveliness that he adored, it was what she had of sympathy, and kindness, and sweetness of disposition. A very womanly girl she was . . . not a flaming character to blaze and die, but a steady and enduring soul . . . such as he craved . . .

She turned her head away.

"I was very angry at you this morning," she said; "I thought you'd forgotten about me entirely."

Hilliard affected alarm. "How could that happen?"

"Not even so much as a little card with 'Merry Christmas' on it," she said. "Father and mother had one from you, but as for me—" She opened her hands in emptiness. "I looked over every one of them twice."

Hilliard felt his pulses quicken.

"Doesn't my coming to you make up a little for it?"

"No, I'm afraid it doesn't—not in that way. I'm still very childish about Christmas. I have to see it—even if it's only in the tiniest little remembrances. I'm very much hurt. I've been telling myself it must be the postman's fault."

He denied it bravely. "It wasn't the postman's—it was mine. Because I didn't intend to send you a remembrance at all—I intended to bring it. I planned to give it to you before dinner, but when I was so late, and everybody was waiting—"

She turned with gratifying quickness.

"Did you bring it?"

"Yes," he said, "I brought it. I'm not quite sure whether you'll like it or not—"

"I'll like anything you brought!" The pronoun had an infinitesimal emphasis all to itself.

Hilliard cleared his throat.

"When I was young—"

"I beg your pardon?"

He laughed at high pressure and began over again.

"When I was young, Mother Grundy had a very small collection to choose from—books and candy and flowers. If I'd send you anything by mail, I think I'd have had to obey the rules. My early training was pretty severe. But I thought if I brought it myself, perhaps I could be more original."

"How original?" she asked, with pretty animation.

His heart was pounding relentlessly; he had lost the elaborate recital which he carefully prepared; and it was gone without a trace. He had to depend on presence of mind.

"Since I couldn't keep to my schedule, I've been saving it up to give you when everything was propitious." He tendered her a package, tied with holly ribbon; it was smaller than a book, and smaller than any orthodox carrier of confection. "Don't open it just yet, please."

She looked at it, pinched it, dropped it in her lap, and laughed softly.

"Is there such a mystery about it?"

"Yes, there is." Hilliard felt himself begin to go with the current of his mood. He sat up awkwardly. "All that you could ever think of asking

"It's My Gift to You. But Before You Open It."

about me . . . where I've been and what I've done . . . is in that box. It's everything . . . a biography, and a history . . . and it's my gift to you, too. But before you open it—" He had to pause to collect himself. "I'll have to make an explanation." He fought with it and found his lips strangely sealed.

"Is it so very hard to make?" she asked at length.

"Almost impossible . . ." He was seeing black and red. Even if "everybody" had expected him to do this thing (as Angela had long since assured him) what reason did he have to hope for pardon? "What would you think," he asked, perilously, "of a man who cared enough about you to risk everything he had in the world . . . not his valuables in the sense of money . . . but all his ambitions for everything; all his dreams; all his ideals; all his hopes . . . on a Christmas gift? What would you?"

She frowned adorably.

"And . . . he's not just a little bit quixotic?"

"Not at all . . . suppose he did it deliberately, and after a great deal of thought. Just on the chance that it might please you? When it would either do that—or end their friendship?"

She fingered the small package over and over.

"Why, I should think that if this . . . mythical person were so very anxious to please me he wouldn't take quite so much risk."

"But when I'm the mythical person myself—that's different, isn't it?"

"Why should it be?" She gave him no opportunity to see her face.

"You've forgotten a great deal. I told you once that if you knew all that I've been . . . all that I've done . . . you might not be so willing to have my friendship, anyway."

"No," she said, subdued. "I've not forgotten, but you have! I said that I didn't believe you."

"You're holding it all in your hands," said Hilliard. His expression, as he gazed at her, was infinitely yearning; but his voice was even and low. "I spent a good many hours over this . . . wondering whether it was right for me to take such a risk on this day, above all others . . . and finally, I thought it out this way; if it pleases you, it ought to make the day better yet . . . if it doesn't, it would have been just as unwelcome to you at any other time. Understand, I'll never attempt to excuse anything . . . we're beyond that. All I can do is to wait. I'm giving you . . . will you open it now, please?"

Her fingers bungled with the knot, and he made as though to help her.

"No," she said, holding the package away from him. "I want to open it all myself!"

Hilliard, rigid, watched her. A phrase was beating heavily against his consciousness . . . one of the Proverbs . . . something about the bread of deceit, and ashes . . .

The knot gave way; and the tissue wrapping, falling aside, disclosed an oblong pasteboard box. Carol lifted the lid and Hilliard caught his breath. There were two cabinet photographs; uppermost was a very excellent likeness of Hilliard himself. She looked at him perplexedly; he was getting out his fountain pen. His hand was cold, unsteady.

"It lacks something, doesn't it?" he said, in an undertone. "Let me have it a moment." While she followed his every movement, he wrote, with his left hand and somewhat painstakingly, an inscription and gave back the picture.

"Christmas, 1916," she read, "with love from Henry Hilliard." She flushed hotly.

"Now look!" he said, ignoring her reaction. "The . . . next one." Mechanically she took out the second photograph; it was a duplicate of the picture of Dicky Morgan on the Doctor's desk. Her cheeks were suddenly devoid of color, she stared fearfully at him without speaking.

"That lacks something, too," he said; and his voice was yielding to the tremendous strain upon him. With conspicuous care he shifted the pen to his right hand; held it poised for a moment, gave her a smile of ineffable pathos, closed his teeth hard. "I have a very useful little trait," he said; "I'm ambidextrous." And wrote his message.

She had the evidence before her—the inimitable, unmistakable, ornamental script of another personality. "Christmas, 1916—and love from Dick to Carol."

"The real gift is underneath," he said, and his diction now was foreign even to himself. "But . . . no, no; go on . . ."

Her uncertain, exploring fingers had touched a smaller box; it sprang open in her palm; within, was a gorgeously flashing, scintillating, living gem, set in platinum. Her hands, unsteady now as were his own, closed over it as though to guard and shelter it. Her eyes sought his, and held them—fright was meeting fright.

"And in my thought," he said, "are all the sweet memories I have of you . . . and all the fragrance of you . . . and in the stone there . . . there's a story for you to read . . . bigger than any book could hold . . ." She still made no answer; she was holding her three gifts tightly, and staring at him, staring . . . not in the revulsion he had imagined, not in the measureless contempt he had feared, but with the wraith of a smile trembling on her pale lips. "Only one of the photographs is to keep," he said thickly. "One of the two . . . I'm giving you the chance to say which it is . . . which one of the two you want to live . . . if you want either of those men to go on loving you . . . or if you want them both to go away—for always!"

In her eyes, there was another miracle; her eyes were soft, and indicative of a great relief, rather than of a great shock; and as he watched, spellbound, he saw that tears were creeping into them, and not of sorrow but of great joy. In that moment his most stupefying discovery was made, and the magnitude of it, the portent of it, set his brain at naught, and left him destitute of reason.

"Carol!" he said, petrified. "Carol!"

Mute, she shook her head. Looking him full in the eyes, she flinched suddenly, and a great sob burst in her throat. The photograph of Dicky Morgan was in her hand; she held it a moment, trembling, and then, while her breath came faster and her shoulders quivered, she tore it across and across, finer and finer, until only fragmentary scraps remained—and these she let fall in her lap, unheeded. The likeness of Hilliard, the lying, radiant face of the man nobody knew—this she had seized, and this she had clutched to her breast, spasmodically, as though in fear to have it snatched away from her.

Hilliard was very close to her; and his whole being was concentrated in his eyes.

"Carol!" he said to her again in that stranger's voice. "Carol . . . You . . . you knew!" To him the fact was unbelievable.

Tardily, unwillingly, she raised her head.

"From the very first day," she said brokenly. "Both dad and I . . . and no one else; not even mother . . . your eyes told us both, and we've trusted you so . . . and waited so surely . . . we knew it would come out all right in the end, somehow . . . and . . . and . . . I do like my gift! It does make the day better." And then, in a soft whisper, "Henry!"

She had called him "Henry" and even in the spell of his confusion, he throbbed to the significance of it.

The lover was eager, but the prodigal was startled back from the very threshold of love.

"From the first day!" he breathed, electrified. "And you trusted me like that . . . when you knew what I was doing—"

She was laughing and crying at the same time; his hungry arms went out to her and found her; words were coming tumultuously to him and he said them as they came. Somehow the ring was on her finger; and she had kissed it there. Between them, partnered, a sacred understanding as imperishable as bronze had arisen; they both knew, without the necessity of prolonged speech, what his future was to be. They both knew in what capacity he was to face the world; they knew the brimming fullness of her pardon and the brimming fullness of his regret. These truths were mutually confirmed; the shabby past was indistinguishably merged with the fresh and vivid present; their pledges to this end were upon their lips. The world was lying helpless at their feet . . . the wonderful, sensitive, receptive world which had respected and honored and admired him in the days of his regeneration, and would continue, paying the reward of his request.

In an irresistible passion of humility and shame and courage, he tried to tell her the sums of his deceits; her lips prevented him.

"You mustn't!" she murmured. "Never! You let me choose—I want it this way."

Dazed, triumphant, he was re-living by-gone incidents, seeing faint clues develop into mighty revelations, comprehending at last the supreme love and supreme faith of the two who had waited for his victory, and kept his secret shut within their hearts, that he might stand the ordeal, and prove triumphant. And now, the reputation that was already his . . . the loftier reputation which he should consecrate himself to build . . . not only for the pleasure of the building, but also because there were those to whom he owed it . . .

Behind them, a firm footfall. Hilliard was on his feet, his arm instinctively protecting Carol. Doctor Durant was smiling on them from the doorway . . . grave, benevolent, paternal. He, too, became a common partner to the understanding; an interchange of glances was sufficient. He came in swiftly; his hands outstretched, his head lifted high in the pride of a father who has looked upon his children, and found them true to each other, and to him.

"What!" he said. "Have you proved it already—my son?"

THE END.

Tunis Agricultural State.

The regency of Tunis, having its northern or Mediterranean limit in the same latitudinal position as the state of North Carolina and, like North Carolina, supporting an estimated population of 2,000,000 on an area of about 50,000 square miles, is essentially an agricultural country, deriving its wealth from farm and mine.

The Sunflower in Russia.

Sunflower cultivation has become an industry in southern Russia, where the people have found the seeds a substitute for olives in making oil. The Russian eats the kernel. An acre of sunflowers yields about 60 bushels of seeds, and these in turn yield more than 50 gallons of oil.

STOMACH CATARRH

Causes untold misery and suffering, all of which is needless. Pe-ru-na acts as quickly and surely on catarrh of the stomach and bowels as in cases of that common form, nasal catarrh.

PE-RU-NA

IN USE FIFTY YEARS

Exercises a soothing, healing effect upon all mucous linings. Belching gas, sour stomach, nausea, vomiting, cramps, pains in the abdomen, diarrhoea, constipation are all symptoms of a catarrhal condition in the organs of digestion.

Don't suffer another day. It is needless and dangerous. Two generations have found Pe-ru-na just the medicine needed for such disturbances.

Sold Everywhere Tablets or Liquid

Stomach on Strike 20 Years
Eatonic Settled It!

"Eatonic is wonderful," says C. W. Burton. "I had been a sufferer from stomach trouble for 20 years and now I am well."

Eatonic gets right after the cause of stomach troubles by taking up and carrying out the acidity and gases and of course, when the cause is removed, the sufferer gets well. If you have sourness, belching, indigestion, food repeating or any other stomach trouble, take Eatonic tablets after each meal and find relief. Big box costs only a trifle with your druggist's guarantee.

Where He Might Be.

She looked in the pantry. She looked in the larder. She looked in the kitchen, she looked in the cupboard.

Where was that mischievous boy?

She looked in the hall. She looked in the bedroom. She looked in the nursery. She looked in the garden. She even looked in the hencoop and the rabbit hutch. All in vain.

At last she climbed to the top of the house till she came to the little trapdoor leading to the loft.

"Willie! Willie!" she called. "Are you up there?"

"No, mother," replied a shrill voice. "Have you tried the cellar?"

PISO'S

ocal News!

. J. Stille left Friday for a couple iays business trip to Des Moines.

Ir. and Mrs. Lewis of Meservey, Klemme callers Friday last.

Hen Mitchell of Garner drove over on business Tuesday morning.

Mrs. H. H. Meinderts of Meservey a Klemme caller one day last ek.

"Scotty" Erwing and family moved o the house vacated by E. S. Uben fore part of the week.

Mrs. Fred Francis and daughter of lmond, were Klemme visitors on iday.

M. and Mrs. Herb Bailey and ghter, went to Iowa Falls Satur- and returned Monday.

George Ruka and daughter, of odell, were Klemme callers Satur-

Miss Minnie Blank visited her sister at Garner last Friday and Saturday.

Mr. and Mrs. G. C. Seeburger, of Garner, were here Monday afternoon on business.

Miss Edna Katter, of Garner, was visiting Klemme relatives and friends Tuesday.

Mrs. Davis, of Spirit Lake, came last week for a visit with her daughter, Mrs. M. O. Barr.

Rev. Ortmeier and wife and son, of Forest City, and Rev. Ludgate who is conducting evangelistic services there, were Klemme visitors Saturday

Mr. and Mrs. Andrew Hanson, of Kanawha, were calling on Klemme friends and transacting business here Friday.

Mrs. R. A. Jorgenson left Monday for a few weeks visit with her sister, Mrs. Chapman, and other relatives and fiends at Kansas City, Mo.

Miss Merten, who teaches in one of our rural schools, left Saturday for her home at Gladbrook, Iowa, to spend her vacation.

Mr. and Mrs. M. O. Barr and Mrs. Davis, who is here visiting, drove to Kellerton, Iowa, Saturday afternoon for a visit with relatives. This town is near the Missouri line so you see they made quite a long trip. They returned to Klemme Sunday night.

Ed. Jacobs and his friend, Geo. Gisel, who has been visiting him for a couple of weeks, drove to Perry, Iowa, Sunday morning for a visit with old army pals. They made a round trip of about three hundred miles and got back to Klemme the same evening. Mr. Gisel left Monday morning for his home at Maquoketa, Iowa.

Such It Was.

Twelve baldheaded men were jurors in a Massachusetts hair-restorer case. "Is this justice?" asked the Brooklyn Eagle. "It may be retributive justice," suggests the Albany Argus. Let's call it destiny.—Buffalo Times.

Importance of Vitamines.

Protein, fat and carbohydrates are the three elements, chemically speaking, that every human being needs. In addition to these there are minute constituents which are not usually considered, but which have a tremendous importance in making diet palatable and beneficial. These constituents are present in most kinds of fresh fruit and green vegetables. They are referred to as vitamines or accessory factors.

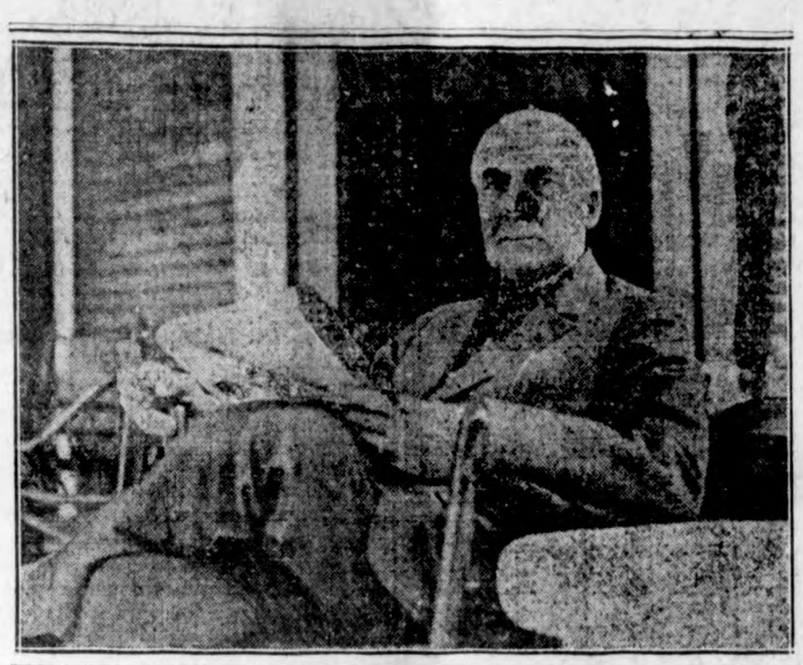
N. N. E. KENDALL, OF ALBIA

Elected Governor Of Iowa

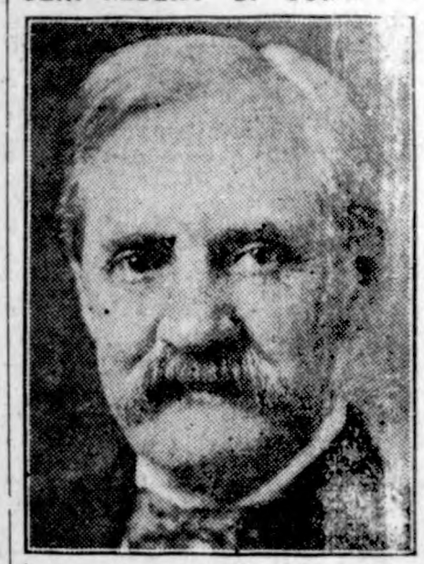
The Next President of the United States



Warren G. Harding, of Ohio, President-Elect

Calvin Coolidge, Vice Pres.-Elect

SEN. ALBERT B. CUN[illegible]



Re-Elected U.S. Senat r From Iowa

ELL TOWNSHIP WOMEN DO THEIR DUTY AT THE POLLS TUESDAY

We, as well as numerous other lemme and Ell township voters, re indeed surprised Tuesday when e saw the number of women who ere casting t heirballot for the first me. They stepped into the voting ooths like veterans and it was plain see that they fully understood w to vote and they did not hesi- te one bit. Voters here thought e women would not turn out very rong but that theory will be shot l to pieces when they see the re- rns in tabulated form.

As a futher bit of interesting news e find that Mrs. Anna Fuller was e first woman in Ell township to to the polls and cast her ballot. r. Zinn was the first man to cast s vote Tuesday morning. We are ad to see that women have a say in ho shall fill our public offices. We re glad to see woman share equal ghts with the men. They have been eeping the woman in the United tates from casting their ballots and o until this time we could not say hat the United States was a free ountry and that "all men were born ree and equal". The word "men" lainly placed woman on a lower lane but she has come into her own t last and as it should be in all ivilized lands of the world. Take off our hats to the ladies!

DR. ZINN RETURNS FROM CANADA TRIP

Dr. Geo. Zinn returned last Thursday afternoon from his month's visit in Canada and other points. He was called to Hanover, Canada, by the illness of his aged father who fell and injured himself quite seriously but who was getting along well when Doctor Zinn left him. Mr. Fred Zinn the doctor's father celebrated his ninetieth birthday and all his children were present to help him celebrate the great event. A. K. Zinn of Battle Creek, Mich., who is known to a number of Klemme people was there, as well as four daughters and one son all living in Canada. The senior Zinn is a hearty old gentleman and as Dr. Zinn says "he is ninety years young." On his way back to the United States Dr. Zinn made stops at Ann Arbor where he visited relatives and took in a university foot ball game. He also visited with his brother, A. K. at Battle Creek, with relatives at Huntington, Indiana, and came home by way of Ames, Iowa. He stopped a day and visited his nephew, Dr. Edgar Zinn at Goldfield. Dr. Zinn enjoyed the trip, which was only marred by his father's accident, but he says everything is fine in Canada and that they have a good crop there.

FIRST NUMBER OF LYCEUM COURSE

The first number of the Lyceum Course to be held in Klemme this winter will come on next Thursday evening:, Novmber 11, at the Idle Hour Theatre. Mason's Jubilee Singers, a company consisting of five colored singers will entertain with southland songs and stories. They are melodious singers and "they charm the ear, tickle the rib and satisfy the soul." Don't forget the date. This will be one of the best numbers so come out. See display adv.

SCHOOL STUDENTS ENJOY HALLOWE'EN PARTIES

The students of the Klemme schools took advantage of the opportunity for having a Hallowe'en party and last week there were two such gatherings held. The High School boys and girls held their Hallowe'en party in the basement of the First National Bank last Thursday evening. Of course the place was decorated with leaves, corn stalks, pumpkins, jack-o-lanterns and what not—everything had a spooky look and to make the party a further success all had to appear in costume and masked. Games of all kinds in keeping with the evening were played. Fortune telling was one of the events, bobbing apples another and then the Hallowe'en lunch with pumpkin pie, coffee, sandwiches, etc was well enjoyed.

Very similar to the above party was the Hallowe'en party enjoyed by the Grammer Grade and which was held in the Ridder Garage. All day long some of the young folks worked in preparing a spooky place in the garage and when it was all finished and the decorations all in place it indeed looked very much like the hunting place of witches, black cats and ghosts. Thy played all sorts of Hallowe'en games and jokes and then wound up the affair with a feed. All enjoyed the party very much even though they were scared out of their wits part of the time with the stunts which they participated in.

HALLOWE'EN PRANKS

We thought perhaps the Hallowe'en jokers would forget all about the event this year but in that we were mistaken. They seemed to have a little argument on what night to celebrate as Hallowe'en came on Sunday this year. They evidently decided not to postpone their work so they started in Saturday night and must have spent the greater part of the night and part of the morning to complete the job. And we can say that they sure must have worked over time from the appearance of the Main street Sunday morning. There were corn pickers, corn shellers, plows, wagons, tractors, barrels, engines and in fact everything in the street. Besides that they helped out the sewer gang by stringing out the pipes along the street and also removed some small buildings about town which they evidently thought would be useless after the sewer was established. The boys had a good time but were reasonable enough in their sport to not damage any property.

Make Haste Slowly.

Remember that some training is necessary before a man can become a farmer. Even potato raisers have to know how to drill.

IRWING SELLS CAFE TO J. B. MORRISON

R. B. Irwing closed a deal with J. B. Morrison, of Winnebago, Ill., Monday whereby the latter became the owner and proprietor of the cafe November 1st.

Mr. Irwing has been in the business here for about a year or more and has enjoyed a good business. Mr. Morrison and family have been here the past month getting lined up on the business and as they say "getting the hang of the ropes." Mr. Morrison is a fine young man and looks like a hustler and a good business man. He intends to make some changes in the cafe to enable him to give the public the very best of service.

Mr. Irwing is undecided what course he will pursue but he and the family will remain in Klemme for the winter at least or until he finds a business and a location which will suit him. We wish him success in whatever he undertakes in the future and at the same time we extend a public welcome to Mr. Morrison and his family and wish them success in their new business in Klemme.

CHRISTIAN ATHLETICS

From the Olympic games to the vacant lot baseball contest the subject of athletics bulks large in the thought of the world. America is preeminently the nation of organized athletics. Now that we know who has kicked goal in the political game, interest will center more in the smaller gridiron fields. It may be a surprise to some to learn that the bible has something to say of athletics. On next Sunday evening at the Methodist Episcopal church Dr. Buriff will speak on Christian Athletics. The Klemme Sox and the high school base ball team have been invited to attend this service and the pastor believes that the subject may be of interest to the people generally, whose interest may be greater than their technical information concerning athletics.

FIRST SNOW OF THE SEASON

Ths week we chronicle the first snow fall. Sunday was a very rainy day, turning colder Monday. The rain was more of a drizzle during Monday and in the evening a few flakes of snow fell. During the night the snow came down faster and Tuesday morning there was perhaps an inch of snow on the level, not very much but at any rate it was our first snow.

Ed. Jacobs, our popular hardware dealer, spent Sunday with his folks at Garner. We believe Ed was attracted there by a sudden desire to stick his feet under mother's table for a Sunday dinner.

BIRTHDAY PARTY

Little Blanche Gimer had a birthday party Saturday afternoon at which she invited all her little friends to come and have a good time. The little tots had a real good time, playing games of various kinds and then Mrs. Gimer fixed up a dandy lunch for them. They are all looking forward to Blanche's next birthday.

Albert Rasmussen, of near Gruver, lost a fine field of corn and a meadow yesturday when freight train is thought to have started the blaze by sparcs frem

The field canstitution fifty-two acres of fine corn and thirteen acres of meadow land. The fields were completely devasted and the loss is eitimated at $3,000.

Many of the neighbors turned out to fight the fire and keep it from spreading, but a strong wind was blowing and it was not until the entire field was burned that st pas gotten under control by working.

Waukon. Iowa,—James Briar of this city claims he has 35 vots in all his family for Harding, Cummins, and Kendall.

Sure some vote for one family, but Mr. Briar has ten sons, eight danghters in-law, nine granddaughters and four grandsons and two daughters, all of whom are voters, and wiil vote the straight republican ticket, accoording to a "poll" taken of the family by a political committee, last week.

W. C. Tyrrell, Jr., Vice President of the Iowa Valley Sugar Co., tells The Herald Press that the estimate of farmers as to their beet yields vary from 9 to 17 tons with the majority around twelve or fourteen tons. The quality of the beets now being cut is very good averging well up to 15 per cent.—Belmond Herald Press.

A surveyer gang is taking levels and staking out the streets for sewers. If the dltching machine is as slow in getting on the ground as the surveyers have been getting here there will be nothing doing before the limit has expired for putting in the sewers.—Corwith Hustler.

The Stars and Stripes.

When the American flag is draped on a flat surface the stars should appear in the upper left hand corner if the stripes are horizontal; in the upper right hand corner if the stripes are vertical.

Playing a Deep Game.

Ethel had been shopping with her mother. When they returned home she was tired and hungry, and, prompted by a desire for a good meal, she said: "Mamma, let's play I'm your guest and am going to stay for dinner."

COUNCIL PROCEEDINGS

Klemme Corporation

DELAYED

Mayor's Office, July 12, 1290, regular meeting called to order by Mayor. Following bills allowed; Klemme Times, proceedings and statement, $15.25; L. A. Ridder, pumping June, $15.00; H. S. Schwarts, street work $47.55. Meeting adjourned.

Mayor's office, July 13, 1920. Special Meeting to hear objections to the proposed Sewer system and disposal plant. All members present.

There were two petitions remonsterating against sewer system and disposal plant, one containing 15 names and the other 31 names.

After a general discussion it was moved by Wiles and seconded by Blank to approve of the official publication and for the clerk to have published the call for bids for same, the result of the vote showed all members voted aye. Council adjourned to 8, p. m. July 15.

Mayor's office, July 15, adjourned meeting called to order by Mayor. All members present. After a general discussion about a section of Barz add. being cut out of the sewer system, council adjourned without action.

Mayor's office, July 26. All members present. Upon motion the following bills were allowed; H. S. Schwartz, $5.00 for hauling gravel on streets. Council decided to cut out sewers in Barz addition.

July 27th meeting, Special, to consider bids as per published notices for the construction of the sewer and disposal plant. The following bids were filed:

Main and Lateral Sewers

Michall McElligot Co.,	$39930.25
O. N. Gjillefald	42267.25
Sieg Construction Co.	43004.75
Bemis and Schlick	49320.00
C. E. Pain	44353.00

Disposal Plant

Ward and Weighton	$14997.00
H. A. Teget	16235.00
R. C. Digel	16500.00
Sieg Construction Co.	17200.00

Moved and carried to allow bill of W. E. Buel, $1,098.55 as first payment on engineer contract.

The Sewer contract was awarded to M. McElligot and the sewer disposal to Ward and Weighton.

Council adjourned.

N. L. Palmer, Clerk — F. Gruetzmacher, Mayor

JAMES PIERCE IS DEAD

James Pierce, 72 years old, and for 35 years publisher of the Iowa Homestead at Des Moines, died suddenly at his home Monday noon. He had been ill but a few hours, heart trouble being the cause of his death. Jim Pierce was never in public office but he took an active part in politics in Iowa for a number of years.

ELECTION RETURNS

As we are going to press to early and do not wish to hold our forms open for another day, we are unable at this time to give a complete and accurate election return. However, we are planning to run the returns in tabulated form next week showing the ballots cast in each township of the county as well as the state and national count. It is harder to get an exact count this year on account of the larger number of ballots cast and the large ballot.

KLEMME FARMER BUYS FINE DUROC JERSEY

When it comes to having fine pure bred cattle or hogs we have got to give the Klemme farmer a top position for it is surprising what a number of Klemme famers have in the line of pure breds. Geo. Schoe - wetter is truly numbered among the "live wire" pure bred hog producers in this neck of the woods. The other day he added another fine animal to his large herd of Duroc Jerseys. He purchased a Duroc Jersey Boar of Hanks & Bishops of New London, Iowa. The hog is sired by Royal Pathfinder who was the 1st prize age boar at the National Swine Show at Des Moines in 1919 and 1920. Geo. has all thorobred Duroc Jerseys in his herd and is proud of his fine collection.

A. D. GIMER JUDGES BUTTER AT WATERLOO

A. D. Gimer went to Waterloo, Iowa, Monday morning, being called there to act as one of the judges in scoring the butter at the Eleventh Annual Meeting of the Iowa Butter Makers Association, which was held yesterday and today.

It further goes to show that the Klemme Creamery is closely watched by the state and is numbered among one of the best in the state. It is also quite a compliment to Mr. Gimer to be chosen as one of the judges as only the best butter makers in the state are given that honor. It is a compliment to the Creamery and the patrons who help make it a success and they should feel pretty good by having such a representation at the Annual Meeting.

Mrs. Gimer also accompanied Art to the big meeting as she is quite interested and—well there will be a big banquet and she didn't want to miss out on that.

LIBERTY TOWNSHIP PEOPLE ENJOY HALLOWE'EN PARTY AT CHURCH

A delightful Hallowe'en party was held at the Liberty Township church last Friday evening which both old and young enjoyed. The large basement of the church was decorated in genuine Hallowe'en style with leaves, corn stalks, grinning jack-o-lanterns from every nook and corner, and in fact the whole had a rather spooky aspect. The evening was given over to Hallowe'en sports of all kinds. A mysterious fortune teller told spooky frtunes and fates for those who had the nerve to listen. Bobbing for apples was another of the numerous sports enjoyed. Even the "feed" was in keeping with the evening when the ghosts abound and pumpkin pie held a prominent position on the menu. All together everybody enjoyed the evening.

FARMERS UNION FAVORS HOLDING

Nation Wide Movement to Wait for Better Grain Prices.

WOMEN REFUSE TO REGISTER

Opponents of Suffrage in Georgia Oppose the Amendment—Body of Mayor MacSwiney Reaches Cork.

Washington, D. C.—E. M. Pollard of Nehawka, Neb., representing the Farmers' union, strongly indorsed recommendations adopted by the joint agricultural conference at the close of its session here, looking toward a nation-wide movement of withholding farm products from the market until at least the cost of production can be realized from its sale.

"Thousands of Nebraska farmers, particularly live stock producers, are in severe financial straits," said Mr. Pollard, "and face ruin because they are unable to obtain credit.

"The same situation obtains in practically every farming section of the country. And something must be done if the nation's food supply is to be conserved and its production in the future insured."

All farmers were urged by the conference to join existing co-operative marketing organizations or organize new ones and congress was asked to give the federal farm loan board authority to issue and sell in the open market short term securities based on warehouse receipts issued under the federal warehouse act.

MacSwiney's Body at Cork.

Cork.—The body of Terrence MacSwiney, late lord mayor of this city, arrived here on board an admiralty tug. The tug, whose flag was flown at half-mast, docked at the customs house quay. Enormous crowds lined the opposite quays and the nearby bridges.

The government authorities immediately notified Deputy Lord Mayor O'Callahan and the bishop of Cork that no military display would be permitted.

No one was at the dock to receive the body when the tug arrived. A large military force had been sent from the barracks in lorries and armored cars, but the troops withdrew, leaving only the usual customs house guards on duty at the dock.

Relatives were warned that unless the body was removed at once it once it would be taken to Cork barracks and buried there.

WOMEN REFUSE TO REGISTER.

Opponents of Suffrage in Georgia Take That Stand.

Macon, Ga.—Women members of the Georgia association opposed to equal suffrage have voted not to register as a step in their battle against the national suffrage amendment. They adopted a resolution calling on teachers and preachers to explain to the public "why we so bitterly oppose woman suffrage," and adding:

"We quote the official manifesto of the communist party, knowing that Georgia men and women, black and white, can see the dangers ahead of the United States. Suffrage or anti-suffrage, they will help us defeat these iniquitous schemes of Alice Paul (women's national party) and her crowd who intend to destroy the home life and moral uplift for which Christianity has been struggling for two thousand years."

Faked U. S. Revenue Stamps.

Washington, D. C.—Widespread counterfeiting of internal revenue stamps in connection with violation of the prohibition laws, was disclosed when the bureau of internal revenue issued a warning against "bootleg in bond" whisky. The country was being flooded, Commissioner Williams said, with beverages, labeled "bootleg in bond" which bore spurious stamps.

Call Paul to Throne.

London.—Prince Paul has been called to the Greek throne to succeed his brother Alexander. Because of Paul's absence from the country a regency will be established, a council of cabinet ministers ruling the country until this is accomplished, it was said.

Flags at Half-Mast Nov. 14.

Washington, D. C.—An order has been issued requesting that on Sunday, November 14, all flags on government buildings and ships, and at all government posts whatsoever, shall be at half-mast in honor of Americans who gave their lives in the great war.

Big Oil Stock Dividend.

Chicago, Ill.—The Standard Oil Co. of Indiana recently voted a stock dividend of 150 per cent, payable December 17.

Want Japanese to Retuurn.

Seoul, Korea.—Japanese settlers in California should all leave the United States, where they are apparently not wanted, to come to Korea and Manchuria, where they are very much needed, says the Seoul press, semi-official organ of the Japanese administration here.

Silk Exchange Closed.

Tokio.—The Yokohama silk exchange has been closed because prices have dropped below the minimum fixed by the buying syndicate.

THE UNITED STATES OF RUSSIA

Will Co-operate With Attorney General to Eliminate Fuel Rates.

Movement to Form New Central Government Which is Patterned After That of American Plan.

Cleveland, O.—At an open meeting of approximately 1,000 coal operators, representing 7,000 soft coal operators in the country, and three-fourths of the total production, a resolution was unanimously adopted pledging support to Attorney General Palmer to eliminate high prices and unwise practices where such exist.

This action was taken, following the receipt of a message from the attorney general requesting the bituminous coal operators of the country to co-operate with the Department of Justice in bringing about elimination of "unreasonable high prices" for coal.

UNITED STATES OF RUSSIA.

Likely Possibility Following the Dissolution of Present Soviet Government.

Washington, D. C.—A United States of Russia is now looked for by officials here as the most likely possibility among forms of government to follow dissolution of the soviet regime.

Official advices said the bolsheviki breakdown was rapidly continuing in Russia. The movement of decentralization, which began in the breaking away of the Baltic, Caucasian and Siberian states, has begun afresh within the territory ruled by the soviets, it was said.

In Russian Turkestan, provinces latest to declare their independence are Khiva and Bokhara, the report said.

A new central government, roughly after the form of the United States of America, it is believed here, might include kingdoms such as have been recently established in Turkestan together with the socialist forms represented by the republics carved out of Siberia.

Kansas Wheat Growers on Strike.

Wichita, Kan.—The wheat growers' strike is on. It began three weeks ago when the officials of the National Wheat Growers' association, with headquarters in this city, issued a proclamation to 70,000 members not to sell any wheat after 8 o'clock, October 25, until the prices at their nearest terminal market reached $3 a bushel. Many farmers stopped selling wheat at once and the decline in receipts has been gradual since that time.

Prohibition Causes Insubordination.

London.—By the testimony of many masters of American ships, prohibition in the United States has had the effect of increasing drunkenness 50 per cent among American sailors in wet ports. Reports of the insubordination of crews because of drink have recently been made here by the captains of several ships.

First Volunteer of War Dead.

New York.—Brig. Gen. Rush C. Hawkins, who won fame during the civil war as commander of "Hawkins' zouaves," is dead here from a fractured skull, sustained when he was struck by an automobile. He was 89 years old and is said to have been the first volunteer soldier of the civil war.

Heavy Losses in Colorado Blizzard.

Denver, Colo.—Reports from the San Juan valley and the western slope indicate that one of the worst blizzards in this state since the early '90s has killed hundreds of cattle and sheep and caused heavy losses to fruit growers.

Exports Increase During September.

Washington, D. C.—Figures just made public by the department of commerce show that exports for the month exceeded those of August by $28,000,000 and that imports were $150,000,000 below those of the month before.

Indicted for Profiteering.

New York.—A federal indictment containing 127 counts has been returned here against Armour & Co., Chicago packers, and various officers of the concern, charging profiteering in violation of the Lever act.

Would Secede From Great Britain.

Capetown, Union of South Africa.—The free state nationalist congress has adopted resolutions proclaiming the sovereign will of the people of the Union of South Africa, their right to self-determination, their right to secede from Great Britain or to break existing relations between them and Great Britain.

Polish Diet Welcomes Peace.

Warsaw.—The diet has unanimously ratified the Polish-Russian preliminary peace treaty signed recently at Riga.

Oppose Territorial Government.

Manila, P. I.—Replying to a communication from the American Chamber of Commerce asking support of a territorial government for the Philippines, a large membership of the house of representatives answered individually that they opposed the proposal.

Indianalopis, Ind.—All coal companies in Indiana have been ordered by the state's coal and food commission to offer for sale each week within Indiana sufficient coal to meet domestic consumption.

CHINA TAKES UP WALNUT GROWING

Its Cultivation and Sale the Main Support of Hundreds of Villages.

$1,887,491 WORTH SENT HERE

George E. Young of Shanghai Says the Chinese Will Soon Be Competitors in Textiles—Take Interest in Their Lands.

New York.—Following the importation of walnuts to China by the early missionaries the Chinese developed this industry so carefully that it has now reached tremendous proportions, according to George E. Young of Shanghai, China, who has been in the Orient ten years. Mr. Young said that the Chinese are growing more and more interested in their lands and considerable development will be seen during the next few years.

"The cultivation and sale of the walnut, which was first brought to China by the American missionaries, now supports hundreds of Chinese villages," said Mr. Young. "The methods of preparing the nuts for market are most primitive, but as labor is cheap they are able to send them to this country and compete favorably with the domestic market. For the American market they use only the highest grade nuts. They select the bright colored and shiny nuts and they are bleached, sorted and packed according to grade. Those of specked and inferior shells are cracked and the meat is packed for confectionery purposes. This cracking is now done by hand because the only walnut cracking machine is owned and operated with greatest secrecy by walnut growers in this country.

Chinese Waste Nothing.

"The economical bent of the Chinese is given full play in the walnut growing industry. They utilize every particle of the product. When the crop is gathered the husks are beaten off the nuts and are buried in wet earth to rot for fertilizer. The nuts are delivered to the ports through various agencies, the original grower getting an insignificant part of the price realized for them.

"The Manchurian walnut has a harder shell than the product of this country. The shells of the inferior appearing walnuts, which are cracked before shipment, are used for fuel, and on account of the large proportion of oil they contain they make an excellent fuel. The Manchurian walnut commands a special advantage in the confectionery making trade because of superior flavor and texture of the meat.

"This spring the price quoted to American importers for delivery at San Francisco was as high as 29 to 32 cents, including cost, insurance and freight, with the transpacific shipping rate at $17.50 per ton. The quotations are now around 25 cents. The whole nuts are shipped in 100-pound bags of burlap which are made in India. The walnut meat is very carefully wrapped in paper and packed in wooden boxes to keep out moisture, which is likely to produce mold. In the United States the walnuts are placed in cold storage, which preserves their freshness, preventing drying, and the crop which we ship the last of June does not get on the market here until some months later."

Handicapped by Superstition.

Mr. Young pointed out that according to the last issued bulletin of the Department of Commerce for May, 1920, 10,121,881 pounds of walnuts came to the United States from China in the 11 months ended with May, and their value was $1,887,491. He says that the Chinese are still greatly handicapped by their old superstitions. After the age-old practice of having all streets and passages irregular so that the evil spirits cannot find their way, they are laying out their farms in patchwork order, making the roads rather difficult for anyone not familiar with the locality.

"There is a large and growing market in China for every kind of machinery," said Mr. Young. "This is particularly true of machinery used in the textile industry. The Chinese are going to be competitors of the whole world in textiles. When a Chinaman figures out anything and decides to adopt it in his business he is not content to stop there. He is buying machinery now for every process in which he has learned its advantages.

"The Chinese have no feeling against the Americans, but, of course, their hatred for the Japanese grows worse. Americans in business in China are disappointed with the class of men from this country who have rushed into the oriental field in the belief that great post-war profits lie there. They are the cheapest sort of traders and they are not even intelligent in business."

MILLION ALIENS COMING IN 1921

Federal Officials Base Their Estimates on Figures for Fiscal Year Ended Last June.

INFLUX GREATLY INCREASING

Statistics Disclose a Notable Shifting of the Sources Whence Come the New Arrivals—Mexico and Canada Furnish Labor.

Washington.—An immigration of 1,000,000 or more in 1921 is the estimate of federal officials, based on figures for the fiscal year ended June 30 last, which have just been issued. Although three months behind the tide of aliens, which has been mounting at a prodigious rate since late in the spring, the statistics disclose many significant tendencies. There has been a notable shifting of the sources whence come the new arrivals.

So far as net increase in population and the replenishment of the labor market are concerned, the year ending in June witnessed a greater movement from America to Europe than from Europe to America, just as careful observers had estimated. The total immigration from all foreign lands was 430,001, and the emigration was 288,315. The bulk of this increase in population, however, came from Mexico and Canada, labor which crossed the border.

America Lost 10,000.

Aliens coming from Europe numbered 246,295; those going back to Europe 256,433, or a loss of 10,000. Before the war about 85 per cent of our immigration came from Europe, but in 1920 it was only 57 per cent. Since June, however, the rush had carried it back, and officials estimate it is again now riding at the 85 per cent mark.

At present the Mediterranean zone is sending perhaps 75 to 80 per cent of the arrivals at Ellis island—Italy alone sending about one-half of all newcomers. Russia and the old Austria-Hungary, which before the war were sending annually more than a quarter of a million immigrants each, are isolated from the migratory movement and the sources have swung back where they were years ago.

In 1920 Italy, including Sicily and Sardinia, sent over 95,145, the largest contributor—89,000 went back. England comes next, sending 27,871, or about 50 per cent of its prewar average.

Record British Arrivals.

One table by races places the English immigration in 1920 at 58,366, which is the largest recorded in the last 22 years, or since figures for races were kept, but of this 30,000 came from Canada.

Another surprising feature is that Spain ranked third, sending 18,821, which was three times as many as it was sending before the war. Portugal came next with 15,472, which was more than it sent in 1913 and 50 per cent more than in 1912. France in 1920, too, sent 8,945, which was about equal to prewar days, for in 1913 it sent 9,675.

SERUM MAY REPLACE KNIFE

French Surgeon Reports Satisfactory Results From Experiments With Anti-gangrenous Serum.

Paris.—Treatment of appendicitis by anti-gangrenous serum instead of by operation, has been tested with such satisfactory results that it is likely operations soon will be abandoned for the disease, Prof. Pierre Deibet said in a paper read before the congress of surgery. According to Prof. Delbet the tests have extended over a period of thirteen years.

Where Was Uncle, Waiting for Train?

Muncie, Ind.—When Victor Templeton received word that his uncle, Cloyd Urich, had been found dead at Sweet Grass, Mont., he went west for the body. The uncle, very much alive, met him at the station. A mistake had been made in the identification of a dead man.

Another Ohio Champion.

Duncanwood, O.—This town offers another Ohio champion. It claims the "hot dog" honor for Jack Edgar. His best effort is 24 at one meal.

Sings While They Dine; His Wife Wants Divorce.

San Francisco.—Mrs. Mary Bedig has petitioned the superior court to grant her a divorce from Moses Bedig.

She charges him with singing when they dined in restaurants and with smacking his lips when they dined at home.

The couple were married last May.

After Balbriggan Was Sacked

Scene in Balbriggan, Ireland, after it had been raided and sacked by auxiliary British forces in reprisal for the murder of two police officers there by the Sinn Feiners.

Camp of the Retreating Russian Soviet Troops

View of a camp of the Russian Red army where the troops were able to get a little rest during their retreat before the Poles.

Important to all Women Readers of this Paper

Thousands upon thousands of women have kidney or bladder trouble and never suspect it.

Women's complaints often prove to be nothing else but kidney trouble, or the *result* of kidney or bladder disease.

If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.

You may suffer pain in the back, headache and loss of ambition.

Poor health makes you nervous, irritable and may be despondent; it makes anyone so.

But hundreds of women claim that Dr. Kilmer's Swamp-Root, by restoring health to the kidneys, proved to be just the remedy needed to overcome such conditions.

Many send for a sample bottle to see what Swamp-Root, the great kidney, liver and bladder medicine, will do for them. By enclosing ten cents to Dr. Kilmer & Co., Binghamton, N. Y., you may receive sample size bottle by Parcel Post. You can purchase medium and large size bottles at all drug stores.—Adv.

Shameful!

More than once has comment been offered on the prevailing ignorance of the Bible. Things are credited to the Bible which are distinctly not scriptural either in idea or in phrasing; and quotations from the holy book are sometimes queerly misplaced. In this relation one is reminded of the lady giving her address at a dry goods counter.

"Pocahontas avenue."

"How do you spell it, ma'am?"

"Young man, you ought to know your Bible better. The idea!"

USE "DIAMOND DYES"

Dye right! Don't risk your material in a poor dye. Each package of "Diamond Dyes" contains directions so simple that any woman can diamond-dye a new, rich, fadeless color into old garments, draperies, coverings, everything, whether wool, silk, linen, cotton or mixed goods.

Buy "Diamond Dyes"—no other kind—then perfect results are guaranteed. Druggist has "Diamond Dyes Color Card"—16 rich colors. Adv.

Hadn't Wasted Any.

Two country women were arguing about thrift.

"D'ye see that purse?" demanded one with a triumphant air. "It's the one I bought when I was married, 30 years ago, and it's as good as new yet."

"That's nothing!" sneered her friend. "You know my husband, John?"

"Of course I do. What about him?"

"Well, he's my first husband and you've had three. Don't you preach thrift to me!"—Stray Stories.

A Lady of Distinction

Is recognized by the delicate fascinating influence of the perfume she uses. A bath with Cuticura Soap and hot water to thoroughly cleanse the pores, followed by a dusting with Cuticura Talcum powder usually means a clear, sweet, healthy skin.—Adv.

Kidding the Censor.

When Stephen Crane was reporting the Greco-Turkish war he had occasion to write of a battle in which the Turks turned and fled before the enemy. Crane watched with disgust the Turkish censor toning down his manuscript, and finally that worthy came to the word "routed."

"This won't do," he said; "we must have a euphemism here. What would you suggest?"

"If I were you," said Crane, sarcastically, "I'd simply say that the indomitable Turks changed front and advanced."—Boston Transcript.

Of All Sounds in Nature, Few Thrill Like Bark of Squirrel, Naturalist Says

"As one pushes through the fringe of undergrowth which skirts the forest and seats himself, at daybreak, on a stump or a fallen tree to watch and listen, the woods become instinct with life," says Arthur F. Rice in Boys' Life. "The blue jay sounds his trumpet call, the crows hold noisy consultation over their plans for the day and a ruffled grouse whips the twigs of the pine with her wing as she leaves her roost. The chipmunks scurry about from stump to stump, now rushing precipitately to cover, now coming forth again to take a critical view of the intruder. Their larger cousins, the red squirrels, come out from the hemlocks and, perching on a dead branch, rattle out a challenge to all comers. At last comes the sound for which you have been waiting and which makes the heart beat faster. It is a thrashing among the boughs of the hollow maple nearby, telling you that the gray squirrel is out after his breakfast.

"Away he goes toward some big oak or hickory, scattering a shower of dew from the leaves as he jumps from limb to limb, revealing his course by the springing branches he leaves behind him. If his suspicions are aroused by anything he sees or hears, he stops, cocks himself up on a limb or plasters himself against a tree trunk and barks disapprovingly, accenting each syllable with a jerk of his broad tail. Of all the sounds in nature, there are few which thrill me like the bark of the gray squirrel."

Chinese Schools in Java Established With Hope of Keeping Language Alive

In the hope of preserving a knowledge of the Chinese language, literature and the Confucian ethics, Huel Kuan schools were established in every large town in Java as a bait to the youth of the land. The schools are thoroughly modernized and a youngster can study English and other European languages, geography, history and a score of other things under competent instructors, so long as Chinese is studied at the same time.

As further inducement to attendance, all Chinese instruction is carried on in the mandarin, or official, Chinese language, so that any student who returns to China will be prepared to talk to the educated of all provinces and will not be confined to petty boundaries of any of the numerous Southern dialects. Chinese, however, gets little attention from the students, who seem to regard the study of it as useless drudgery, and who devote their whole time and interests to the subjects which will be of most assistance to them in the commercial world. All local business in Java is conducted in Malay, and all foreign business in English.

Scores of patriotic youngsters who graduate from Huel Kuan schools go to China yearly, upon their graduation, and enter military colleges there, eventually finding their way into the Chinese army.

Evidence Indicates Indian Late Comer, Compared With Residents During Ice Age

Several scientific investigators agree that the Indian as we know him is a comparatively late comer. Whether he arrived by way of Alaska from Asia may never be discovered, but the relics of his civilization are believed to date back not more than a few thousand years at most, observes a writer in Boys' Life. There is much evidence on the other hand to indicate that men lived in North America at the close of the ice age and perhaps during the glacial period. The evidence is found for the most part in the Ohio and Delaware valleys. The rude instruments these men used in their hunting and homes have been found buried deep in gravel which is believed to date back to the close of the ice age. If this be the case men lived in America 10,000 or 15,000 years ago. Some geologists believe that the gravel deposits are considerably older. How these men found their way to America in remote antiquity, how much of the land they occupied and where they disappeared are perhaps the most fascinating problems in American archaeology. The patient investigations of many trained scientists are carrying us every day nearer the answer.

Chipmunk Stores Plenty of Food for Winter Use

The chipmunk is a provident little chap, and stores up a prodigious quantity of food, sometimes a peck or more of nuts and grain; and when snugly hidden in his winding burrow, the mouth of which he closes when the cold season arrives, a hard winter has no terrors for him. His enemies, the hawks, owls and weasels, may go hungry, but safe in the bosom of mother earth, with the warm mantle of the snow above him, the chipmunk passes a cosy winter, in the midst of comfort and plenty, dreaming of the time when the south wind shall blow again and the squirrel cups shall open once more.—Boys' Life.

Bakes and Boils.

A gas oven with which food can be baked and boiled at the same time is a Californian's invention.

FAINTING AND DIZZY SPELLS

The Cause of such Symptoms and Remedy Told in This Letter.

Syracuse, N. Y.—"When I commenced the Change of Life I was poorly, had no appetite and had fainting spells. I suffered for two or three years before I began taking Lydia E. Pinkham's Vegetable Compound and the Liver Pills which I saw advertised in the papers and in your little books. I took about twelve bottles of your Vegetable Compound and found it a wonderful remedy. I commenced to pick up at once and my suffering was relieved. I have told others about your medicine and know of some who have taken it. I am glad to help others all I can."—Mrs. R. E. Deming, 437 W. Lafayette Ave., Syracuse, N. Y.

While Change of Life is a most critical period of a woman's existence, the annoying symptoms which accompany it may be controlled, and normal health restored by the timely use of Lydia E. Pinkham's Vegetable Compound.

Moreover this reliable remedy contains no narcotics or harmful drugs and owes its efficiency to the medicinal extractives of the native roots and herbs which it contains.

BIG ULCER ALL HEALED

"Here is another letter that makes me happy," says Peterson, of Buffalo. "One that I would rather have than a thousand dollars.

"Money isn't everything in this world. There is many a big hearted, rich man who would give all he has on earth to be able to produce a remedy with such mighty healing power as Peterson's Ointment, to sell at all druggists for 60 cents a large box."

Dear Sirs:—

"I was an untold sufferer from old running sore and ulcers. I had tried most everything without any relief from pain. A friend told me of your wonderful ointment and the first box took away the pain that had not left me before in years, and after using just nine dollars' worth of the salve I am cured. The ulcer was 9 inches by 6½ inches, is all healed and I can walk. Never, never will I be without Peterson's again.

"You may use this to recommend your ointment, if you wish. I cannot say enough to praise it." Yours truly, Mrs. Albert Southcott, Medina, N. Y. Mail orders filled by Peterson Ointment Co., Inc., Buffalo, N. Y.

FIGHT ON RATS MUST BE WAGED

Constant Warfare Must Be Made on Pestiferous Rodent to Get Best Resuts.

EXTERMINATION IS POSSIBLE

No Matter How Badly House Be Infested With Pests Methods Perfected Will Absolutely Destroy Little Animals.

Spasmodic rat extermination campaigns are of course beneficial, but to secure lasting results constant warfare must be waged against the rat, say specialists of the bureau of biological survey, United States Department of Agriculture. The necessity for this is plain in the fact that rats begin to breed at three months and have from six to ten litters a year, with an average of ten young to each litter.

Riddance Possible.

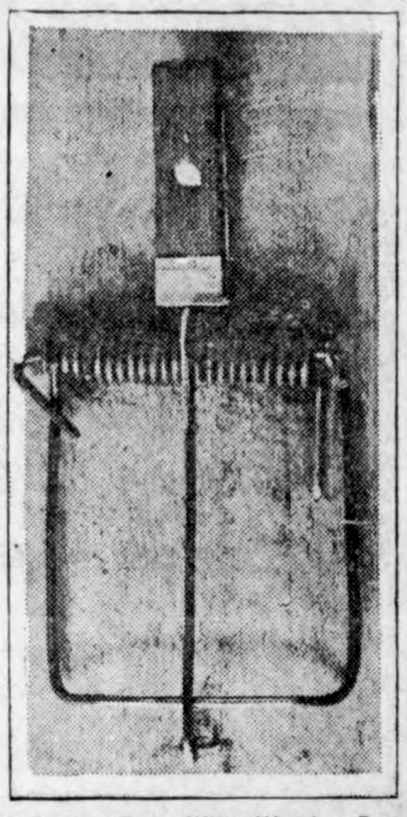
Specialists of the department of agriculture for years have made extensive studies of rats and methods of exterminating them. No matter how badly a house may be infested with rats, these experts maintain, the use of the methods perfected by them will absolutely, and without doubt, rid the house of the rodents.

Throughout the United States health authorities are advocating the use of these methods and gratifying results are being secured. Thus Kansas has designated a special "rat day." Cincinnati is spending thousands of dollars in a rat campaign, and similar movements are being conducted at Norfolk, along the Gulf coast, and in many other cities. In addition the bureau is constantly giving advice to hundreds of correspondents.

Means of Destroying.

"Rat proofing" of buildings is the basic step in rat extermination. Food should be protected and sanitary methods employed for disposal of waste food. Where rats may die in the walls poisoning is not recommended, but where this condition cannot result barium carbonate worked into almost any kind of food is the poison to use. Snap traps, often called "guillotine traps," are the most effective in trapping. The traps should be placed in every part of the house that rats frequent. One or two traps are not enough. The traps should be baited with fresh meats, seeds, nuts, vegetables, fruit, or any other food.

The bureau will be glad to advise anyone regarding the correction of any rat condition, upon receipt of full details. Letters should be addressed to the bureau of biological survey, United States Department of Agriculture, Washington, D. C.



Guillotine Trap With Wooden Base and Trigger Plate.

WATERPROOF WASH FOR SILO

Mixture of Liquid Paraffin and Cement Is Excellent for Inside of Structures.

One of our readers has reported that he has discovered an excellent waterproof wash for the inside of a masonry silo, says Wallace's Farmer. It is simply a mixture of three quarts of liquid paraffin to each 100 pounds of cement. The paraffin may be bought through any of the regular oil companies. The mixture is well adapted to putting on the inside of hollow tile or brick silos.

VALUE OF ALFALFA PASTURE

Live Stock Man Can Use It for Hogs or the Hay as Feed for Various Farm Animals.

The real value of alfalfa is with the live stock man who can either pasture with hogs or use the hay for feeding purposes. There is no doubt about the value of alfalfa as a hog pasture or as a feed for cattle and horses. A yield of four or five tons per acre means a return which will cover any trouble in getting a stand or inconvenience in handling the crop in the busy season.

GOOD CONTAINERS OF HIGHEST IMPORTANCE

Those With Handles Are Not Likely to be Changed.

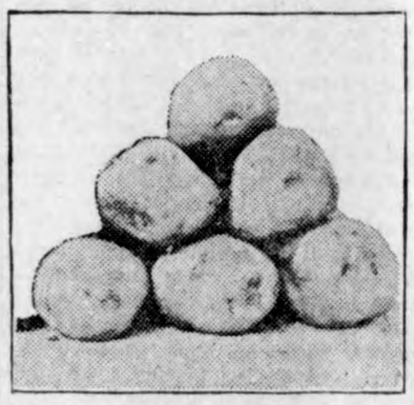
Bamboo Baskets Serve Purpose Quite Satisfactorily and May be Used Long Time—Ordinary Splint Vessel Is Good.

One important requirement for parcel post shipping and marketing is a proper and satisfactory container, the United States Department of Agriculture points out. Sometimes the consumer can secure containers more readily and economically than the producer. Those with handles are much less likely to be damaged in transit in the mails than those which are not thus supplied and which are likely to be tossed or thrown or handled by the string or twine used in tying them. A bamboo basket serves the purpose very well and may be used a long time. Ordinary splint baskets made of strips of veneer may also be used, and if they can be secured at a price sufficiently cheap a new one for each shipment is more economical than having them returned, unless they are sent back in lots of ten or more under one cover. This, of course, necessitates using them without a wooden handle in which case a heavy twine should be used for a handle. This twine can be untied and the baskets nested, or placed in one another, for return shipment. If a basket with a wooden handle is used, care should be taken to see that it is securely nailed, not only at the rim of the basket but further down toward the bottom, so as to prevent undue leverage which may break lose the nailing.

CERTIFIED SEED IS FAVORED

Potatoes Are Treated Before Planting With Corrosive Sublimate or Formaldehyde.

Certified seed potatoes are now demanded by all good farmers. Such potatoes are grown from certified seed treated before planting with corrosive sublimate or formaldehyde. The crop gets the best of care. The fields are visited twice during the summer by the state inspector and all foreign varieties pulled out. At harvest they are carefully assorted, only sound stock true to name being sacked. After each bag is inspected to make sure that it is true to type and not mixed with other varieties, it is tagged with the state label. Wisconsin, Maine, Minnesota and New York state potato growers are doing an increasing business raising certified seed.



The Average Acreage Yield of Potatoes Has Increased 36 Per Cent During the Past Twenty Years.

HOGGING OFF CORN IN FAVOR

North Dakota College Secured Return of $45.54 Per Acre by Using Herd of Shotes.

While corn usually is considered not as a money crop but one to clean up the land, yet the North Dakota Agricultural college received a return of $45.54 per acre by using 48 shotes to hog off 16 acres of flint corn in 1918, according to J. H. Shepperd of the experiment station.

"The hogs were turned in the field September 6, when they averaged 109 pounds in weight, and left there until November 12, making an average gain of 94 pounds, or a gain of 281.75 pounds per acre. They were marketed at 16.31 cents, which, allowing for shrinkage, gave a return of $45.54 per acre."

USE SUNFLOWER FOR SILAGE

When Grown With Corn Yield Was Considerably Increased—Feed Value Not Impaired.

Considerable interest has developed in the past two or three years in sunflowers as a silage crop. A number of farmers in Michigan have grown sunflowers with corn, says the quarterly bulletin of the Michigan Agricultural college. They claim that the yield was considerably increased and the feeding value was not impaired. Most of them, however, said they preferred that sunflowers should not take up more than one-third of the silage material.

HANDLE SQUASH CAUTIOUSLY

Extreme Care Is Essential if They Are to Keep Well—Good Ventilation Is Needed.

Squash should be carefully handled from the field to storage if they are to keep well. Place on wooden racks in storage house one layer deep. The house should be warm and have a good circulation of air.

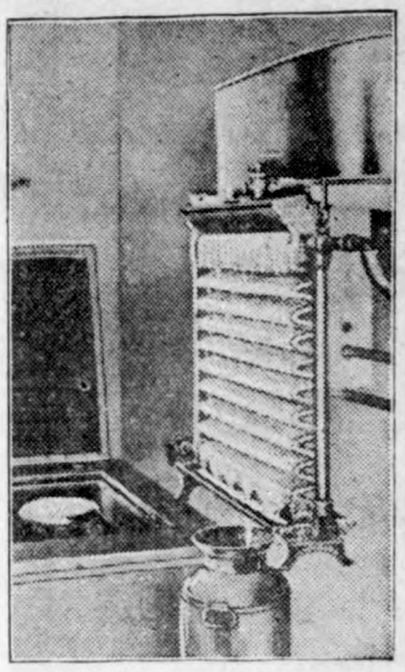
DAIRY POINTS

KEEPING MARKET MILK COOL

Product Held for Several Hours Without Proper Refrigeration Shows High Bacterial Count.

Generally, the larger numbers of bacteria found in market milk when it reaches the consumer are due more to the multiplication of the bacteria than to the original contamination. This great multiplication occurs because the milk is not properly cooled during storage, transportation and delivery. Just now this fact is of particular importance to the person having milk to sell.

Commercial experience confirms the results of experimental work. Milk which has been held for several hours without proper refrigeration nearly always shows higher counts than fresh milk from the same source. At a certain creamery, milk received in the morning consisted of the previous night's milk and fresh morning's milk which were kept separate. During six summer months, from April to September, inclusive, 478 samples of the morning's milk showed an average bacterial count of 800,026, while 355 samples of milk which had been held overnight on the farms had an average bacterial content of 2,406,357 bacteria per cubic centimeter.



Improved Apparatus for Cooling Milk.

DRUGS DETRIMENTAL TO COW

Experiments at Iowa State College Show That Alcohol, Aloes, Etc., Are Harmful.

The use of drugs with the idea of increasing the fat production of test cows has been tried out by Iowa State Agricultural college dairy section. In most cases it was found that drugs decreased rather than increased the fat production.

Such drugs as alcohol, castor oil, pituitrin, aloes, magnesium sulphate, nux vomica and sodium chloride were tried and in all cases they were detrimental to the cows. All cows used were in good normal condition at the start of the tests and various sizes of doses were used.

In some cases it was found that the flow of milk and butterfat was increased slightly, but this soon fell off and in the end a decrease was noticed.

Up to date no drug has been found that will increase the butterfat. Dairymen are strongly advised not to resort to this method as it injures the cows and is not a fair way to gain a record.

BEST TEMPERATURE OF MILK

Only Way to Insure Accuracy in Feeding Calves Is Thorough Use of Thermometer.

Milk as it comes from the cow possesses a temperature near 100 degrees Fahrenheit. When feeding young calves it is well to be very particular in regard to this matter. The only way to insure accuracy in determining temperature is through the use of a thermometer. As calves grow older, eight to ten weeks of age, the temperature may be reduced to 90 degrees Fahrenheit. However, it is always desirable to warm the liquid ration slightly, even for calves six months of age.

FEED COW QUITE LIBERALLY

Silage, Mangles, Rutabagas and Other Root Crops—Should Have Abundance of Feed.

The cow should be fed liberally on succulent feeds, as silage, mangles, rutabagas or other root crops. They induce the cow to consume large amounts of feed, which is desirable. Then, too, feeds of this kind are very palatable and easily digested.

CALVES DO WELL ON PASTURE

Most Economical Manner of Caring for Them, but They Must Have Additional Attention.

Calves do very well on pasture and can be cared for in this manner more economically than in any other way. Care must be taken, however, to see that they receive what additional care is necessary. The calves of today are the herds of tomorrow.

The Flavor Lasts So Does the Price!

BRUSH UP ANCIENT HISTORY

Possibly You May Not Have Heard of This Goddess and Her Temple at "Emphasis."

There is employed in a Richmond household an old darky who prides himself on his learning. On one occasion, when he was engaged in cleaning up the library of his employer, he had with him his son, aged nine.

Now, this youngster became much interested in certain engravings hung on the wall. Stopping before one of them he asked his daddy:

"What picture is that?"

"You don't know what that's a picture of?" demanded the parent. "You ought to read your ancient history more. That is the temple of Dinah at Emphasis."

Savages Poor Physically.

The natives of the African jungle, instead of being the lusty savages of imagination, are for the most part physically below par. The majority of them are malnourished and diseased and marked physical defects are common.

Jud Tunkins.

Jud Tunkins says the old-time statesman who sat down and wrote out his speeches with a pen wouldn't stand any chances whatever in these days of handshaking.

No Place for Personalities.

Two doughboys, one white and one black, were hopelessly lost out in No Man's land. After darkness had fallen the white soldier cautiously stuck his head over the edge of the shell hole to take a look.

Whatcher see, boss?" inquired the other.

"You can't see your hand before your face, it's so dark."

"Look-a-here now, white man," expostulated the negro. "Dis ain't no time for pussonalities. Ah ain't askin' you what Ah kaint see; Ah's askin' you what you can see."—American Legion Weekly.

Matrimonial Boom in Japan.

Japanese find a close connection between money and marriage by reading the lessons of the financial depression in Japan. The passing of easy money-making has caused a rush in the Japanese matrimonial agencies and women are leading in the rush. In prosperous times the agency customers are men looking for wives, but now, say matrimonial managers, the old order is reversed. In view of the approaching "hard times" women seem to be seeking safety in the protection of husbands. One result of the feminine advances is a marked increase in marriages.

No dress is immodest unless the wearer is.

Children Should Not Have Coffee

but they enjoy a cheering hot drink at mealtime just like the older folks.

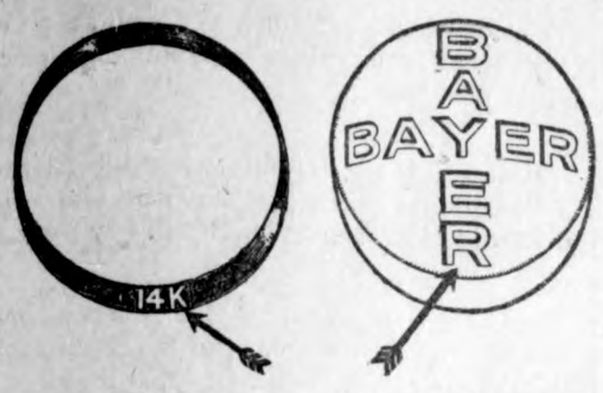
INSTANT POSTUM

is the ideal table drink for children as well as grown-ups. Its rich, coffee-like flavor pleases, but it contains none of coffee's harmful elements. It costs less, too!

Made by Postum Cereal Co., Inc., Battle Creek, Mich.

"ASPIRIN"

WARNING! Unless you see the name "Bayer" on tablets you are not getting genuine Aspirin prescribed by physicians for 20 years and proved safe by millions. Name "Bayer" has same meaning as 14 Karat on gold.



SAFETY FIRST! Accept only an "unbroken package" of genuine "Bayer Tablets of Aspirin," which contains proper directions for Headache, Earache, Toothache, Neuralgia, Colds, Rheumatism, Neuritis, Lumbago, and for pain generally. Strictly American!

Handy tin boxes of 12 tablets cost but a few cents—Larger packages.
Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

Sculptors now make use of the camera as a means of verifying the work of their chisels.

Perhaps a widow finds it easy to get married again because she doesn't expect perfection in a man.

Skin Sufferers Do Not Want Mere Temporary Relief

Of course, if you are content to have only temporary relief from the terrifying itching and burning of fiery, flaming skin diseases, then you are satisfied to remain a slave to ointments, lotions and other local remedies applied to the surface of the skin.

Real genuine relief from eczema, tetter, scaly eruptions or any other form of skin irritations cannot be expected until you free your blood of the germs which cause these disorders. And for this purpose there is no remedy that gives more satisfactory results than S.S.S., the fine old blood remedy that goes down to the source of every blood disorder and routs out the germs which cause the trouble.

S.S.S. is sold by all druggists. Begin taking it today, and if you will write a complete history of your case, our medical director will give you expert advice without charge. Address Chief Medical Adviser, 155 Swift Laboratory, Atlanta, Ga.

MILL GIRLS MARRY YOUNG

Many Villages in the South Where There Are Absolutely No Old Maids Found.

A village without an old maid sounds somewhat like a fairy tale, but several such places exist down below the Mason and Dixon line.

"All the women get married in the mill villages of South Carolina, and at an early age," says a Y. W. C. A. industrial secretary stationed at Greenville, where she works among the girls in 13 mills.

Perhaps economic independence has something to do with it, as marriage is not looked upon by the girls as a meal ticket, but as a fifty-fifty proposition. The wives do not give up their jobs but keep right on working.

That the textile industry in South Carolina absorbs a large number of women as well as men workers is not surprising, considering the fact that there are as many as 15 mills in 29 counties. With the population of the state estimated at 1,500,015 people, 62,004 are mill workers, and 190,268 are dependents on mill pay. The valuation of the mills is $75,000,000 and the weekly pay roll is $1,000,000.

No Great Matter.

"No more brandy on plum pudding."

"No matter."

"Huh?"

"You couldn't eat enough to get a kick."—Detroit Free Press.

HAD FAITH IN OLD ADAGE

John D. Rockefeller Enters Mean Man He Once Knew in the Championship Stakes.

John D. Rockefeller once said to a New York reporter:

"The poorest way to wealth is the mean way. In Richford, where I was born, we had a mean man, a very mean man; yet the fortune he left was a small—you might say a mean one.

"At a church supper one night this man cut the corner of his lip with his knife. All searched their pocketbooks, but nobody had any court-plaster. What was to be done? The cut was bleeding.

"Finally the parson produced a two-cent stamp and said:

"'Put this on the cut, squire. It will stop the hemorrhage, I believe.'

"'Thank you,' said the squire gratefully, and taking out his wallet, he placed the two-cent stamp in it, extracting at the same time a one-cent stamp of his own, which he proceeded to stick on the cut.

"'Thank you, parson,' he repeated. 'A penny saved is a penny earned.'"

The Cause.

"In the camp the other day I came across a young soldier who was weeping so hard that I felt sorry for him.

"Was he reading a letter from home?"

"There's a Reason"

PRODUCTION OF CATTLE IN WEST

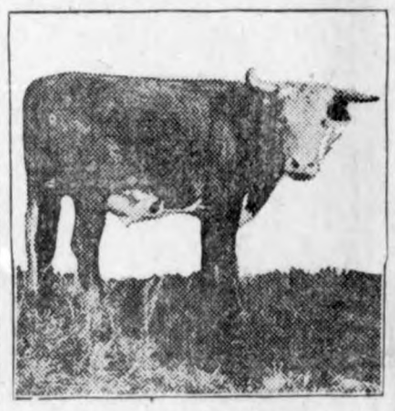
Investigations Conducted in Nebraska Show Wide Variation in Figures.

FEEDING PERILOUS VENTURE

Buying Right and Selling Right Are Controlling Factors—Some Farmers Carried Animals Through With Profit.

According to cost of production investigations conducted by the United States department of agriculture in co-operation with the University of Nebraska in parts of Nebraska during the past two years, the average cost of corn-fed cattle laid down at market was $14.91 per hundredweight for 2,293 head fed in the winter of 1918-19, $13.83 for 3,041 cattle in a survey study during the winter of 1919-20, and an average of $13.39 for an additional 795 cattle upon which detailed cost figures were secured during the same winter. The costs upon some droves were found to vary widely from these average figures, with the major portion going to market the first winter (1918-19) carrying an expense bill of from $13 to $18 a hundredweight, while in 1919-20 the costs of most of the cattle were between $11 and $17. The facts thus far brought out by the investigation would indicate that during the past two years, in the district covered by the survey, cattle feeding was a precarious venture, more likely to be unprofitable than not. There was an average loss per head of $3.17 on the cattle for which records were obtained in 1918-19, and of $10.69 and $14.57 on two groups for which records were obtained in 1919-20.

These figures are the results of the first two years' work of a five-year study of the basic factors of the cost of fattening cattle, which is being conducted in Nebraska by the office of farm management and farm economics, in co-operation with the University of Nebraska and the bureau of animal industry, United States department of agriculture. Similar studies are being conducted in Iowa, Missouri, Illinois and Indiana, and preliminary reports on the work in these states will be forthcoming shortly.



Good Pastures and Good Stock Are Essential for Profitable Beef Production.

Feeding Plays Minor Part.

The greater part of the Nebraska cattle covered in the survey work of 1918-19 made their gains at a cost of from 20 to 35 cents per pound, with extremes ranging from 12 to 48 cents, while of the cattle covered the next year the greater part made their gains at from 15 to 35 cents per pound, with an extreme range of from 8 to 53 cents. While economical feeding is shown to be the major factor in the cost of fattening after the steer is bought, the investigation substantiates the fact that feeding usually plays a minor part in determining profit or loss, and that buying right and selling right are more often the controlling factors.

The cattle in question were bought at about the same figures in both years of the investigation. In 1918-19 three of the droves were bought at between $6 and $7, but most of the cattle covered in the study went into the lot at between $8 and $12. Of the 21 droves covered by the detailed cost-accounting method 11 cost between $10 and $11. The weight of the feeders varied rather widely, averaging about 750 pounds with but few over 1,000 pounds or under 500.

Feed, the most important factor of the cost of fattening the steer after purchase, was found to constitute from 75 to 90 per cent of all the expense involved in handling the steers after being put on feed.

Wide Variation in Cost Factors.

The wide variation in the factors affecting cost was reflected in equally wide variation in the total cost of the finished cattle. During both of the years of the study the cost of the cattle covered in the surveys ranged from about $8 to $22 per hundred fattened, the average for 1918-19 being $14.91, and for 1919-20, $13.83. The droves covered by the cost-accounting method showed a much narrower range, from $10 to $18 with an average of $13.39.

The financial return varied widely, ranging from $50 profit or more per head, reported for 40 head in 1918-19, to $50 or more per head loss, reported for 155 head in 1918-19 and for over 200 head in 1919-20. As has been stated above, on the average there was a loss incurred in handling cattle each year, reaching $14.57 per head as the average loss of the 795 cattle on the detailed route in 1919-20. However, a number of farmers carried their cattle through with profit.

SHRINKAGE OF GOOD HAY DOES NO INJURY

Loss of Water Does Not Affect Feeding Value.

Properly Cured Product Has Bright, Natural Green Color—Information Soon to Be Given Out by Department of Agriculture.

Shrinkage occurring in good market hay is due almost entirely to a loss of water, which has no feeding value, say specialists of the United States bureau of markets. Such shrinkage seldom causes an actual money loss to the farmer, because any loss in weight in baled hay is borne by the shipper, who usually receives the hay as soon as it is baled.

Loss of Water Causes Shrinkage in Weight of Hay, but Does Not Injure Feeding Value.

If the shipper stores baled hay for speculation, there often will be a money loss caused by shrinkage, because he has purchased an excess amount of water.

There is practically no loss of dry matter in market hay that has been properly cured. Proper curing is indicated by a bright, natural green color. Improperly cured hay may lose dry matter, but such hay is not in demand in any of the terminal markets.

The water content of hay at different periods of curing and storage, methods of making hay to prevent excessive shrinkage in storage, methods of determining shrinkage on individual farms, and other general shrinkage information of interest to all agencies engaged in the production and marketing of market hay is given in a publication soon to be issued by the department of agriculture.

MARKETING SHEEP AND HOGS

Figures Furnished by Department of Agriculture Show Cost of Loading, Feeding, Etc.

Of 54 carloads of sheep, including 11 single-deck and 43 double-deck cars, the cost of loading and bedding cars average $0.019 per 100 pounds live weight, according to figures furnished the general trade commission by the United States department of agriculture. Other marketing expenses, including freight, varied from $0.239 to $1.97 per hundredweight. The shrinkage in weight varied from 3.53 to 8.57 per cent, the majority of the shipments averaging approximately 8 per cent.

Similar records on 253 carloads of hogs showed the cost of loading and bedding to average 1.5 cents per 100 pounds live weight; feed at market approximately 8 to 9 cents; commission charges, 4 to 10 cents; miscellaneous expense, 2 to 10 cents, averaging approximately 5 cents; and the total cost of marketing including freight from varying districts approximately from 33 to 50 cents. The shrinkage in weight on 873 carloads of hogs varied from 9.88 to minus 4.59 per cent.

LATE MOLTERS ARE FAVORED

Hens That Undergo Transformation During July and August Are Not Best Layers.

It has been observed that the best layers usually molt during the latter part of September or the months of October, November and December. Hens that molt during July and August are not the profitable hens, as they rest for three or four months while they grow their new feathers and will not start in laying until the following February or March. These hens are not the kind to use either in the breeding pen or the laying pen. In some cases, the early hatched pullets of the year previous will start molting during June, and a little judgment should be exercised in such cases. A check should be made with other tests.

PROPAGATING RHUBARB ROOT

Plants Which Have Not Done Very Well This Season Should Be Dug —Replant Next Spring.

Rhubarb which has not been giving very good results during the past season, should be dug this fall, and the roots allowed to remain in the open during the winter. In the spring as soon as the ground can be prepared, the large root or mother root should be divided into from six to eight parts and planted. A root four to five years old becomes root bound and produces small stems.

Neglected Colds are Dangerous

Take no chances. Keep this standard remedy handy for the first sneeze.

Breaks up a cold in 24 hours — Relieves Grippe in 3 days—Excellent for Headache

Quinine in this form does not affect the head—Cascara is best Tonic Laxative—No Opiate in Hill's.

ALL DRUGGISTS SELL IT

Pleasant Mistake.

"When Willie got a letter this morning he frowned and said he supposed it was another of those uotes from his mother beginning 'Billy, don't.'"

"Was it?"

"No; when he opened it he found it was a billet-doux."

Her Turn.

A wife should be a helpmeet," remarked the near-philosopher.

"That's my view," exactly," replied Mr. Glipping. "Only the other day I reminded Mrs. Glipping that I washed our flivver the last time, but she didn't take the hint."—Birmingham Age-Herald.

Another Royal Suggestion

COOKIES and DROP CAKES

From the NEW ROYAL COOK BOOK

WHEN the children romp in hungry, here are some wholesome delights that will satisfy the most ravenous appetite.

Cookies

½ cup shortening
2 cups sugar
¼ cup milk
2 eggs
½ teaspoon grated nutmeg
1 teaspoon vanilla extract or grated rind of 1 lemon
4 cups flour
3 teaspoons Royal Baking Powder

Cream shortening and sugar together; add milk to beaten eggs and beat again; add slowly to creamed shortening and sugar; add nutmeg and flavoring; add 2 cups flour sifted with baking powder; add enough more flour to make stiff dough. Roll out very thin on floured board; cut with cookie cutter, sprinkle with sugar, or put a raisin or a piece of English walnut in the center of each. Bake about 12 minutes in hot oven.

Cocoa Drop Cakes

4 tablespoons shortening
1 cup sugar
1 egg
½ cup milk
1¾ cups flour
3 teaspoons Royal Baking Powder
½ cup cocoa
¼ teaspoon salt
1 teaspoon vanilla

Cream shortening; add sugar and well-beaten egg; beat well and add milk slowly; sift flour, baking powder, salt and cocoa into mixture; stir until smooth, add vanilla. Put one tablespoon of batter into each greased muffin tin and bake in moderate oven about 20 minutes. Cover with boiled icing.

ROYAL BAKING POWDER

Absolutely Pure

Made from Cream of Tartar, derived from grapes.

COOK BOOK FREE

The new Royal Cook Book containing 400 delightful recipes, will be sent to you free if you will send your name and address.

ROYAL BAKING POWDER CO. 115 Fulton Street, New York City.

Farmers Look---

Cold weather and winter is coming and you will need the following to make your stock gain rapidly and so add more profit to your income.

Hog Wateres and Chicken Waterers

We carry a complete stock in four kinds, all strongly built of galvanized iron.

Tank Heaters

Keep the water warm for your stock and you see good results.

Hog Feeders, Hog Oilers

We have a full supply of the best makes. Put a couple of oilers in your pens--keeps the hogs healthy and glossy.

Try SAL-VET

You read about it in your farm papers--well we handle it. Makes stock healthy.

Poultry Tonics

We also handle all kinds of poultry tonic.

The Oldest Joke.

Johnny Hoy claims that the oldest joke is one about the farmer's wife who went to the door and found an agent. "Can I sell you an exterminator for vermin?" asked the agent. "No," said the farmer's wife, who had been pestered to death with agents. "We have all the vermin we need."—Milwaukee Sentinel.

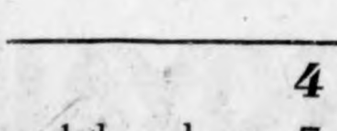
Public Sale!

As I have more stock than I can care for I will hold a Public Sale of cattle and horses at the Klemme Livery Barn, on--

Saturday, Nov. 6

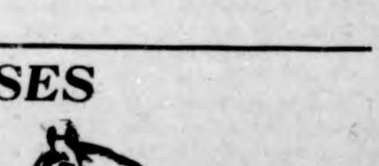
Beginning at 2:00 P. M. Sharp

22 HEAD OF CATTLE



Constisting of 10 good milch cows; 1 white Thorobred Registered Shorthorn Bull three years old; 4 heifers comming two years old; 2 yearling heifers; 5 spring calves.

4 HEAD OF HORSES



1 bay horse 7 yrs. old, wt. 1400. lbs.

We've taken the bull by the horns and lowered your clothes cost

Copyright 1920 Hart Schaffner & Marx

EVERY OVERCOAT in Our House At 20 Per Cent Discount

We'll lose the greater part of our profits, but we'll make many new friends by this effort to lower clothes cost

This firm was the last to advance its prices while merchandise was reaching the pinnacle and we're going to be the first to lower them by giving our customers the very best values possible for the least price, (quality considered.) We could, for an indefinite period, sell our clothing at regular prices, but we are willing to sacrifice a portion of our profits in order to create a greater volume, thereby benefiting our customers as well as ourselves. It's a known fact that there has been a general slight reduction in nearly every line. The farmer is taking his loss on oats, corn and cattle and we're going to take ours gracefully ond give you the very best values for the least amount of money. Chain store buying during the past few years has given our customers a big advantage and now with the added sacrifice in profits we cannot help but look for the largest business in our history. Extra-ordinary values in every department. We will meet and beat any prices offered by legitimate competition within a radius of 40 miles. Get these prices---don't overlook any of the specials.

PROSPECTS GOOD FOR BUSINESS

Business Skies Are Practically Without a Cloud.

IRISH IMMIGRATION WELCOME

No Action Has Been Taken to Discourage it at Washington.—Pro-Leaguers Speak at Omaha.

New York.—Business prospects are unusually bright, both in the United States and abroad, Elbert H. Gary, head of the United States Steel corporation, declared in an address before the American Iron and Steel Institute here.

"Although this is a time for courage, composure and caution," Mr. Gary said, "the business skies are practically without clouds. As always, there may be showers from time to time, but there is nothing in the atmosphere to indicate the approach of dangerous storms."

"If there should be a serious reaction and depression," he continued, which now seems improbable, it will be the fault of those who are connected with business operations or others who by reason of official positions, improperly interfere, and not because of any fundamental deficiencies in our resources and opportunities."

Pro-Leaguers at Omaha.

Omaha, Neb.—Pro-League speakers, consisting of Professor Irving Fisher of Yale university; Herbert Parsons of New York, former republican national committeeman for that state; Secretary of War Baker; Lieutenant Colonel Whittesley, of the "Lost Battalion" of the Argonne; Captain Thomas G. Chamberlain of San Francisco; Captain George H. Gillin of New York city, son of republican United States Senator-elect Patrick H. Gillin of Maine; Mrs. Lucia Ames Mead of Boston, and Miss Anne MacIlvaine of Trenton, N. J.; Mrs. Nancy Schoonmaker, New York; Mrs. Emmous Blaine, made addresses here Friday night at five or six different points over the city, where good audiences greeted them and manifested a deep interest in the subjects presented.

IRISH IMMIGRATION WELCOME.

No Steps Taken at Washington to Discourage It.

Washington.—America has taken no action to discourage Irish immigration, under-Secretary of State Davis said in discussing the statement in the British parliament by Sir Hamar Greenwood, chief secretary for Ireland, that this country no longer welcomed immigration from Ireland because it did not desire to swell the total of disturbing elements in the United States.

"The Irish are as good as any foreign immigrants," Mr. Davis said.

General Strike in Poland.

Warsaw.—A general strike throughout Poland has been proclaimed as a protest against the proposed creation of an upper parliamentary house under the new constitution on which a commission has been working for more than a year.

Coal Goal Reached.

Washington, D. C.—Bituminous coal production has reached the 12,000,000 ton weekly total, which the National Coal association recently declared was necessary to insure against any shortage of the winter supply.

Postal Telegraphers On Strike.

Chicago—Forty telegraphers walked out of the general office of the Postal Telegraph company after two operators had been discharged for protesting against a recent reduction in pay.

Big Payments to Railroads.

Washington, D. C.—Payments made to railroads by the government under the transportation act so far total $289,910,299, according to a statement issued by the treasury.

Published Seditious Literature.

London—Sylvia Pankhurst, daughter of Mrs. Emmeline Pankhurst, was arrested here, charged with publishing seditious literature.

Approve 100 Million Trading Plan.

Washington, D. C.—Approval of a proposal to organize a $100,000,000 corporation to finance the nation's foreign trade has been given by the American Banker's association, in convention here.

Chinese Are Killed in Mine.

Peking.—An explosion and fire in the Tong-Chan mine in Chi-Li province killed 400 Chinese laborers. There were 119 survivors. The explosion occurred in the next to the lowest level, smoke causing most of the deaths.

A Deep Sea Water Way.

New York.—A deep sea waterway from the Great lakes through the St. Lawrence river is urged as an economic necessity by men of national prominence before the international joint commission. Herbert Hoover was the principal speaker for the proponents of the project.

New York.—Brokers who handle campaign bets declare that there is less betting on the coming election than on any presidential race in the last twenty years.

MEXICO WANTS TO DO RIGHT

British Coal Strike Can Only Increase Export Prices

Is Anxious to Fulfill All Her International Obligations. — Transport Men Are Supporting British Miners.

New York.—The coal strike in England will have no abnormal effect on the bituminous coal situation in the United States. While the British labor trouble may tend to increase export prices, the home consumer will not be affected.

This is the consensus of opinion here of representatives of coal export agencies and wholesale dealers who declared that all coal that could possibly be shipped abroad had been going out of the country regularly for several months.

Fully Supporting the Miners.

London—.One feature of the strike situation which bears possibilities of a widening of the strike is the prospect of the 25,000 London commercial road transport men ceasing work. The men passed a resolution declaring themselves as fully supporting the miners. Meantime orders have been issued to branches of the union throughout the country to have their strike organizations prepared. Should the transport workers in all parts of the country walk out, it is estimated that 180,000 men would be involved.

King George has set an example for householders throughout the country in the saving of coal, by ordering that fires in the royal palace shall be lighted only when absolutely necessary. Even then they are to be kept as small as possible.

MEXICO WANTS TO DO RIGHT.

Anxious to Fulfill Her International Obligations.

Mexico City.—Mexico is anxious to comply with her international obligations and exends a hearty welcome to all foreigners. Provisional President de la Huerta declared the Mexican government had not received from Washington any intimation as to conditions upon which possible recognition of the new Mexican regime would be based by the United States. "Our one desire," he said, "is to form part of the concert of civilized nations by respecting all established principles for the development of a free people. Mexican laws are not confiscatory and I formally declare it has never been our intention to give them such an effect. Nothing is more untrue than the assertion that the Mexican government has forcibly deprived foreigners of their property.

"Mexico will pay all it justly owes in conformity with all recognized principles of international law. The ouside world should be satisfied with this solemn promise."

Drive to Extend Membership.

Hastings, Neb.—The holding of wheat for $3 a bushel and a drive to extend the membership of the National Wheat Growers association throughout the state, are urged in calls issued by the officers of the association here. The membership drive is to start on October 20 and continue until the day of the county meetings ten days later. Nearly 30 counties in the south Platte section have been organized.

To Solve Cuba's Financial Difficulties.

Washington.—The State Department has forwarded a communication to the Cuban government informing it that American bankers will be glad to work out with it a solution of Cuba's financial difficulties resulting from the accumulation in Cuba of 300,000 tons of sugar.

Demand Cattle of Germany.

Berlin.—The allied reparations commission has presented to the German government a demand for the immediate delivery of 10,000 bulls and 500,000 cows to France, 11,150 head of cattle to Italy, 210,000 cows to Belgium and 157,000 head of cattle to Serbia.

Boy Killed by Playmates.

Council Bluffs, Ia.—Theodore Welsh, seven, is dead, the victim of the "gang" rule of his playmates. The assault was prompted, according to the boy's associates, by his refusal to steal popcorn from his mother to feed the "gang."

Are Ordering "Cowboy Clothes."

Galveston, Texas.—South America is getting acquainted with the middle-west and the gauchos of the pampas have begun to order "cowboy clothes" from Chicago mail order houses, according to the "business scout" for a Chicago implement concern.

Many Register in Chicago.

Chicago, Ill.—Nearly 1,000,000 men and women have registered for the November election. Of the 900,765 persons who signed the poll books, 339,361 are women.

Lincoln, Neb.—P. A. Barrows, lieutenant governor, recently elected commander-in-chief of the Sons of Veterans, announces the appointment of his national staff. His personal aide will be F. P. Corrick of Lincoln. Other members of his staff are: C. A. Bryson of Iowa Falls, Ia., counsellor; Dr. William B. Hartzog, East Lansing, Mich., chaplain; William H. Hyden, Los Angeles, Cal., patriotic instructor; H. P. Spellman, Washington, D. C., press correspondent, and Charles K. Farling of Boston, Mass., member of the military committee.

POLAND SAVED BY THE FRENCH

Prompt Aid Said to Have Prevented Triumph of the Bolshevik Armies.

POLES SHORT OF OFFICERS

Russian Army Superior as an Effective Fighting Machine—Polish Officers Admit That the French Saved the Day.

Posen, Poland.—An official of the French military mission in Poland has told the Associated Press correspondent that the Polish army would have been conquered by the Bolshevik armies of Russia if the French had not supported the Poles. This, notwithstanding the fact that the Poles beat back the Russian drive on Warsaw.

The French official based his statement upon his belief that the Russian army was superior to the Polish army as an effective fighting machine, with the exception of the German-trained troops of Posen.

The Frenchman said he believed the Russian organization has been, and still is, underestimated and because of this tendency to belittle the Russian armies the menace to Poland's existence, if not to all western Europe, remains imminent and real.

Russ Army Not Rabble.

The official said some Russian units were poorly equipped, but it was not true the army was "a barefoot rabble." He was convinced the majority of the Russian divisions were "well-organized units of good fighting men, much better officered than the Poles."

The Poles had 25,000 officers, but only 5,000 of them ever went to the front, although they were sorely needed there, he said. There was evidence that certain Polish companies had fought without officers, he asserted, and that during the retreat these were without commanders.

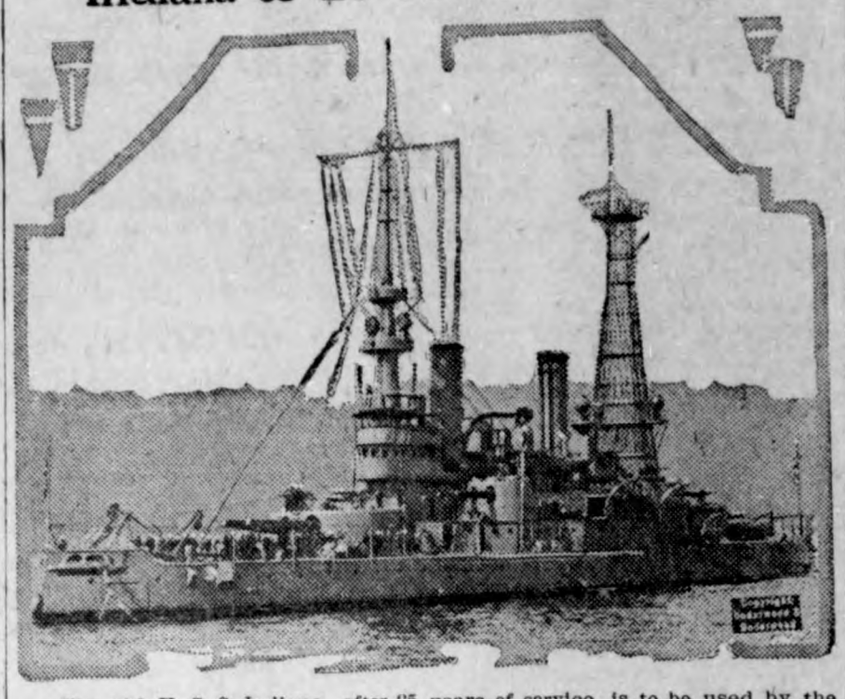
An American artillery officer who had spent a year in Russia and had been under fire at the Polish front, told the correspondent he had seen the Poles "plant their artillery in the most ridiculous places, on the exposed sides of hills and right in the open, when they could have readily concealed it and made it effective."

A neutral aviator who had flown over the front several times when "battles" were said to be in progress, said what he saw of the fighting was "two armies keeping about three hours apart, the Poles retreating when the Russians advanced, and the Russians running when the Poles turned and advanced."

He said this "schedule sometimes got disarranged, and that there was a collision between opposing detachments," but he had not witnessed any of these clashes.

A number of Polish officers with whom the correspondent talked said they were forced to admit the French saved the day, but the weakness of their officers was explained by the fact that in former years Poles had not been permitted to hold commissions in the army, either in Russian, German or Austrian Poland, and that the time had been too short to develop a staff of highly trained officers.

Indiana to Be Used As a Target



The old U. S. S. Indiana, after 25 years of service, is to be used by the navy for a target for battleships and airplanes. The navy will try out a new aerial bomb on this old sea warrior.

Nipponese Is Mental Marvel

Jap Writes With Both Hands, Talks, and Does Other Things at Same Time.

ONLY TWO OTHERS LIKE HIM

He Can Think and Do a Number of Diverse Things Simultaneously—Was Anything but Phenomenon as a Boy.

London.—An amazing person is Tameo Kajiyama, the Japanese mental marvel, who has been appearing at the London Coliseum. Most of us have been taught that no one can do more than one thing at a time. Kajiyama is a striking instance to the contrary, a writer in the continental edition of the London Mail says. He defies all copybook maxims about concentration on the one matter in hand and no more. He can think and do a number of totally diverse things simultaneously. While under a fire of questions he reads a paper and writes backward on a screen with enormous rapidity of the news of the evening. And all the time part of his mind is busy solving arithmetical problems set him by the audience involving the extraction of cube roots of various numbers. He writes with equal facility with either hand or with both hands backward, forward or upside down, different sentences at the same moment that he is talking about something else.

He asks his audience for five names of seven letters. They shout them at him: Ramboda, Portsea, Roberts, Eleanor, Maurice. In a flash he writes backward a jumbled mass of characters containing all the 35 letters. These resolve themselves in precise progression into the five names chosen.

I have only known of two cases in any way parallel to it.

Only Two Others Like Him.

One was a Babu station master in India who would send off telegraph messages with his foot while he was taking down another message with his typewriter and at the same time talking about other matters.

The other case was that of the late Rev. Stainton Moses, founder and first president of the London Spiritualistic alliance. I have seen him writing different messages with both hands while he was talking to me. In his case he ascribed the faculty to supernatural agency and believed his hands to be controlled by spirits.

If Kajiyama, whose powers are far in advance of these two, claimed supernatural assistance many people would believe him. He might have been burned at the stake in another age, but now assuredly he would be feted by spiritualists.

But he makes no claims of the kind nor does he think that he possesses any faculties that might not be acquired by anyone else who takes the trouble to cultivate them.

Thirty-six years old, with a quiet, unassuming, almost deprecatory manner, pleasant, dreamy voice and weird eyes, all the mystery of the East is concentrated in his subtle countenance. He speaks slowly, melodiously and softly. You might imagine him a lotus eater and never guess that beneath the calm exterior a quick and agile brain is working at a speed and in a manner that to the ordinary man seems little short of miraculous.

Was No Boy Prodigy.

He is a teetotaler and nonsmoker and is married to an Englishwoman. As a boy, he will tell you, he was anything but a phenomenon. At ten he could not do the simplest sums in arithmetic. He had a stern father, who used to mete out punishment justly and unmercifully.

They have a pretty little method in Japan. It consists of putting little bits of burning flax down the neck.

Kajiyama had frequent experiences of this torture and bears the marks on his body. But the strict discipline of his early youth brought out his qualities. Ambition awoke and with it a passion for knowledge and longing to do something a little better than his fellows.

Mental concentration is an exercise much prized in the East, and Kajiyama learned to concentrate. It was a slow process. A little more every day, something fresh every day. Now he can command at will the capacities of his brain, switch off or on the various currents of thought and make each cell of the gray matter perform its desired functions. He is master of his mind.

Kajiyama has a theory that there are all sorts of unexplored possibilities lying dormant in the brain. He does not think he has come to anything like the limit of his capacities. He is always experimenting. He is willing, without charge, to explain his views on mental efficiency and concentration to schools or to educational authorities.

Static Electricity in Air Changed to Dynamic

Rome.—Discovered by Gustave Leutner, a widely known engineer, of a system by which static electricity in the atmosphere may be transformed into dynamic current is announced in the newspaper Epoca.

The apparatus, according to the newspaper, consists of antennae bearing a radioactive collector joined to a spiral transformer, which is acted upon by the radioactive matter through a chemical process which is not as yet explained.

Baby's Clothes Made by Armless Mother

Denver, Colo.—Dainty baby garments, made by a mother who is armless, awaited the daughter, who was born to Mrs. J. C. Teagarden here.

"Where there's a will there's a way," Mrs. Teagarden said at the hospital. She made all the clothes for the expected baby during the last few weeks. She guided the cloth under the sewing machine needle with her chin, stitched, cut out patterns and threaded the needle with her feet. Mrs. Teagarden was born in 1894 without arms.

It's all due to an over-abundance of that poison called uric acid. The kidneys are not able to get rid of it. Such conditions you can readily overcome, and prolong life by taking Anuric." This can be obtained at almost any drug store, in tablet form.

MONDAMIN, IOWA.—" For over one year and a half I was afflicted with what the doctors called neuritis in both arms, shoulders, back of neck and head. I took treatment from most all kinds of doctors also at the Spings, but I found no relief until I commenced taking Doctor Pierce's Anuric Tablets. I had not taken them over thirty days until I got relief. I continued taking them for several weeks and am now feeling fine and can do my work without any pain or trouble, altho I am 76 years old."—J. A. YOST, Route 2.

COMRADES OF PERIL

By RANDALL PARRISH

Copyright, A. C. McClurg and Co.

THE FELLOW IN THE PINK SHIRT

She looked from him to the row of breathless men facing her, impatiently, her bosom rising and falling tumultuously.

"And I've got to choose which one I'd rather marry?"

"Well, yes, that is the idea crudely expressed. Not that you are compelled in any way; only we feel it highly desirable; that—well, perhaps I may say, it is the will of God that you make some such choice."

Her eyes wandered up and down the shrinking line, resting calmly on face after face. If she felt any humor in the situation, there was no expression of it visible. She retained an appearance of sullen indifference, which was almost insolent.

"There ain't no more of 'em?"

"No; this is all."

"And I got to pick from these?"

The preacher nodded his head, as she glanced inquiringly in his direction. The pent-up breath came in a sigh from between her lips.

"Well, if I've got to, I have, I suppose, and so far as I can see it don't make no great difference. I'll take the fellow sittin' over there on the window—the one with the pink shirt."

And so they were married. But they didn't live happily ever after, because this marriage occurs right at the beginning of the story. Moreover there was no love or even acquaintance between the young couple. Besides, the bride was kidnaped on her wedding day. So it was just naturally up to the bridegroom to rescue her. And in the adventures that followed the young people became "Comrades of Peril," with Cupid managing the game.

Unusual? Well, it's another of those decidedly out-of-the-ordinary Western stories by Randall Parrish. During the last three years the Western Newspaper Union has released six serials by this popular author—and each has been a great success. Enough said.

CHAPTER I.

—1—

Return of the Wanderer.

Shelby, alone in the buckboard, drove to the summit of the ridge, halting the broncs, as his eyes swept over the scene outspread below. The animals, their dusty sides streaked with sweat, stopped willingly after their sixty-mile trip from the Cottonwood.

Below was a deep, narrow valley, in the midst of which Ponca spread out along the bank of the creek that gave the town its name. To Shelby, wearied with the dull plains, here was a scene of beauty.

Just beyond there was life, fresh, luxuriant, sweet; running water, luscious green grass, and above all, that which he craved most, human companionship. To be sure, he knew Ponca of old, and possessed no illusions. Ugly, dirty, unkempt, Ponca made no pretense to either cleanliness, or respectability; it possessed no pride, no hope of a future. It seemed to recognize its destiny, and be content, a mere mushroom town of the frontier, an adjunct of the cattle trade, permitted to flourish today, but as certainly doomed to perish tomorrow.

The man who sat there on the ridge gazing down, the reins held idly in his hand, his eyes following the winding of the valley, was a perfectly natural part of the picture—he belonged. Beneath the tan and dust was a smoothly shaven face, a face of twenty-five, or twenty-six, the features strong, nose somewhat prominent, lips firm and full, with dark-gray eyes shadowed by heavy lashes. In truth, he appeared all man, a certain reckless gayety about him not to be mistaken, yet as evidently not to be lightly taken advantage of.

"It certainly beats h—l," he muttered, unconsciously aloud, "that a man should dream about visiting a dump like this. Shows what sort o' place Cottonwood is to make a fellow homesick for Ponca. Town looks kinder dead; no cattle in the corrals. H—l, what's the difference? There'll be some of the old bunch hangin' 'round, an' we'll make things hum for awhile. Come, broncs, jog along! Let's show Ponca we're a live outfit!"

It was a rough, curving descent, the trail in places barely wide enough for the wheels, but the driver never lost control, guiding the broncos with expert hand, until they finally swung about the edge of a great rock at the bottom, and went charging at full gallop into the main street. To better express the exuberance of his feelings at this return to civilization, and announce his arrival, Shelby whipped out his gun and began shattering the atmosphere, driving the animals frantic as the sharp reports rang out over their backs.

But if any sensation was expected, it signally failed to materialize. Ponca remained deserted, and unimpressed. Long experience had either rendered the inhabitants indifferent to such a display, or else the town had gone utterly dead. The silence and desolation caused Shelby to utter an oath, and suddenly swing his team up to a hitching rack in front of McCarthy's saloon, the door of which stood invitingly open. An instant the perplexed driver sat there, staring grimly about from end to end of the deserted street.

"What the h—l!" he ejaculated at last, "is up anyhow? Is this a graveyard I've got into? Lord, it can't be all the boys have got out; but something is sure dead wrong. Well, Mac's open anyhow. I'll go in and find out."

He sprang out over the wheel, stiffened from the long ride, yet standing erect nevertheless, and strode up the saloon steps and in through the open door. He had expected a welcome and this strange lack of interest on the part of the citizens of Ponca had already considerably chilled his enthusiasm. Once inside, he stopped, staring about in even deeper perplexity. The big saloon was absolutely empty of patrons—the tables were unoccupied; no one was lined up in front of the long bar, and no sound of voices or of poker chips came down from the room above. The place seemed like a huge grave, and, for a brief moment, he even failed to perceive its only occupant—a red-mustached bartender in front of the mirror, industriously rubbing the immaculate glass. Thoroughly angered by this time, Shelby advanced, his footsteps muffled by the sawdust on the floor.

"What the h—l is the matter with this dump?" he demanded savagely, his fist thumping the bar. "Oh, so it's you, is it, Moran? Well, are you all that's left in Ponca?"

The red-mustached one turned indifferently, yet managed to extend a rather limp hand in fraternal greeting.

"That's 'bout the size of it, Tom," he admitted gravely. "Where yer been the last six months?"

"Over on the Cottonwood, ranching. Say, I ain't seen nothin' but dogs since I struck this valley. What's up? Ponca gone on the bum?"

"No; she's all right mostly. Be all right tomorrow, I reckon, fer Hitchcock's outfit's comin' in with a bunch o' steers. What'll yer drink?"

"Best yer've got, o' course. That looks a bit like old times, an' tastes like it. Take a snort with me, Moran. Where's Mac, an' all the boys, anyhow?"

"Out ter the funeral; that's what's the matter with this town. The whole kit an' caboodle gone, across the creek to help plant old Dad Calkins. You remember Old Dad?"

"No, can't say I do; what was he, a gambler?"

"Kind of a tin-horn; soused most o' the time but still everybody liked him; pretended ter be a blacksmith when he first come, an' put up a shack down there next the hotel. Never worked mor'n three days to my knowledge since—just naturally bummed 'round, but he was a h—l of a good story-teller, an' the boys cottoned to him. Sure, yer must have knowed him."

Shelby shook his head. "What did he die from?"

"Shot himself, I reckon. He was picked up over back o' the dance hall, with a bullet in his nut an' a gun in his hand. The girl was huntin' for him, 'cause he didn't come home, an' so Dan he went along with her. The two of 'em found him out there."

"What girl?"

"Daughter, I s'pose. She's been yere kinder keepin' house ever since I first knew the cuss."

"How old is she?"

"I ain't no jedge o' females' ages, if yer ask me, but maybe sixteen or seventeen. Quite a wisp of a gurl first I saw her, but she don't make up with nobody; sorter sullen-like, an' just stays ter home all the time."

"Where'd you say all this rumpus was goin' on?"

"Over cross the creek, beyond that bunch o' willows. You know where the graveyard is. Goin' ter be some obsequies, you bet. Dan he went clear to Buffalo Gap for ter git a preacher ter do the thing up swell. What's the matter with yer goin' over there, Tom, an' inkin' the show in? Dan'll be mighty pleased ter see yer horn in."

Shelby helped himself to another drink and gazed disconsolately about the big, desolated room. "I reckon I'll turn the broncs into Davis' corral, an' then amble along," he said slowly. "Even a funeral's better than this dump today."

He had waded the shallow waters and reached the edge of the willows before his eyes distinguished the crowd gathered in the open space beyond. It was surely some funeral; there was no doubt about that. A mass of men stood there, bare-headed in the sunshine, and beyond them, on a little knoll, a small bunch of women were crowded together, girls from the dance hall mostly, judging from their clothes and faces, although one or two older women were at the farther end. Shelby caught a glimpse of the ex-preacher, elevated on a box, and his ears caught the sonorous words of exhortation with which he ended his sermon. There followed a faint applause, checked instantly by McCarthy, who politely requested the bunch to stop making d—d fools of themselves, and immediately announced that the Ponca male quartette would sing "Onward, Christian Soldiers," after which those who desired would be given the opportunity to view for the last time the features of the departed. As the last dulcet strains of the hymn rolled away, McCarthy, as though anxious to preserve the lives of the singers by quick action, pushed his way once again to the front.

"Now, you bucks," he roared out tersely, "line up along them willows. I'll go first with the daughter as chief mourners, an' then the females will fall in behind. After that the rest of yer can mosey along. We're goin' ter do this up in some style, an' it ain't just goin' to be showin' proper respect fer the dead, but we're agoin' ter remember the orphaned and the fatherless. That's the way Ponca does business. Now, chip in, gents; there's a box there at the head of the corpse, an' after yer've had a squint at Ol' Dad cough up something fer the gurl."

Shelby dropped into place behind the stage agent, who recognized the newcomer with a hard handgrip and grin of welcome.

"Just blow in? We're givin' Old Calkins the time o' his career; owed me a hundred, but what the h—l do I care! Know the ol' cuss?"

"No; I just dropped around fer to pass away the time. Some spouter that fat preacher."

"Ain't he, though!" admiringly. "He sure shot off some language I never did hear afore. Yer heard our quartette, I reckon?"

"Heard it! Not being altogether deaf, I did. Hullo, the procession is about to start—so that's Old Calkins' girl, is it?"

The stage agent nodded.

"Yep; not so darned much to look at, either. I don't reckon I've seen her afore fer a year."

Shelby could not have described what there was about the girl to interest him even slightly. As Mike said, there was not much to look at, and what there was had been rendered particularly hideous by the ill-fitting black dress in which she was dressed. She walked well, and she held her head straight up, a bit defiantly, looking neither to right nor left as McCarthy led her forward by a grasp on one arm. The corners of her mouth drooped a trifle and her hair was drawn straight back and bound in a wisp. Altogether she made a rather pathetic picture, and this somehow impressed Shelby. He watched her stop at the head of the opened casket and look down at the face of the dead man. There was no sign of a tear, no semblance of a sob, and

There Was No Sign of a Tear.

then she moved on with no change perceptible in her face, outwardly unmoved. To all appearances her only desire was to have the affair ended and be left alone.

Shelby passed and stared down at the face in the casket, that of a man of sixty, possibly, yet exhibiting even in death the marks of a hard life which had unduly aged him. It was rather an intelligent face, framed in a white beard, with the fragment of a scar showing on one cheek. There was something about the face strangely familiar, yet he could not recall the man to memory—some way the sight of him had turned his mind back to army days, yet the two would not connect themselves definitely. As he thrust his contribution into the box, McCarthy gripped him cordially.

"Well, bless me, if here ain't Tom Shelby, lookin' like a white man, and blowin' his money like a good sport. How's things on the Cottonwood? Fine as silk, hey? See yer later, Tom. No, yer don't, Ramsay! You tried that game on me once before. I'm keepin' cases here."

There was a moment's delay, while Ramsay reluctantly dug down into his jeans for an amount satisfactory to the party in charge, and Shelby, still struggling with his elusive memory, bent over and asked hoarsely:

"Say, Mac, who was this guy, anyway?"

"Old Dad, you mean? Furst I knew of the fellow was about three years ago, blacksmithin' down at Kelly's camp. When that moved on he come up here, an' has been hangin' 'round ever since. Wa'n't such a bad sort, 'cept when in liquor; a smart ol' devil, too; read everything he could get hold of."

"Do you happen to know if he was ever in the army?"

"Come to think of it, Tom, I do. Once when he was drunk, he showed me his discharge papers. Lemme see; h—l, yes—the ol' cock wus a sergeant in the Sixth cavalry. That's all right, Ramsay—pass along. Now, whose next; step up lively, boys."

Shelby drifted along with the line, which broke into groups, waiting silently for the ceremonies to be concluded and the body lowered into the grave before wending their way back to the delights of Ponca. The ranchman lingered with the others while the preacher solemnly consigned the body to dust, but when he saw the quartette climbing back into the wagon for a final song, he promptly joined a number who were attempting to escape. Shelby paused and glanced back; the distance was too great to distinguish faces, yet there was no mistaking the pathetic figure of the girl standing in loneliness beside the still open grave. She had not particularly appealed to him before, but now his heart made vague response to her loneliness.

It was doubtless this lingering memory which kept him away from McCarthy's saloon during the next hour. He had lost his earlier inclination for a wild carouse in town, or any desire to renew old acquaintances at the bar. He was almost persuaded to load up in the morning, if he could find the hand he needed and drive back to Cottonwood. There was nothing in it, this getting drunk on vile whisky and blowing in all he had saved at faro. H—l, no! He needed every dollar to make the ranch pay and could not afford to be a d—n fool forever. Here is where he would quit. No doubt, he was honest enough in these intentions, yet the mood passed away so completely that before night he was again with the gang and had stowed away sufficient liquid refreshments to completely overcome any lingering recollection of any higher purpose. In this happy condition he finally wended his way across the street to the shelter of the hotel.

CHAPTER II.

Outlining a Plot.

The Occidental hotel, Hicks proprietor, was merely a place in which one could sleep and eat, if one was thoroughly acclimated to border ideas of comfort. McCarthy, having no home of his own, roomed over his saloon, but was compelled to eat the Hicks brand of cooking, and, with many apologies therefor, had, on this particular occasion, the ex-reverend from Buffalo Gap as his honored guest. Shelby saw the two when he first entered, over in the farther corner and, as there chanced to be a vacant seat beside McCarthy, he made his slightly uncertain way in that direction and succeeded in safely establishing himself on the empty bench. The room was well filled with men, most of them still discussing the important event of the afternoon, and he soon became aware that the conversation of the two next to him bore upon the same subject.

Shelby stared at the smoking, greasy mess outspread before him, prying open a soggy biscuit, and asked a question of McCarthy.

"How'd the collection come out, Mac?"

"What collection? Oh, for the gurl; 'bout five hundred, wa'n't it, reverend?"

"Four ninety-seven," said the preacher in his deep voice. "Quite an assistance for the young woman in this time of bereavement, as I am informed her father left little or no property."

"Property! Old Calkins! Well, I should say not. And what's more," the saloon-keeper becoming interested, "I don't see how that money's goin' ter do her much good. I was just talkin' ter the dominie yere about her. Tom, what is she agoin' ter do? An' what hed this town ought ter do fer her?"

"What do you mean? They done enough, ain't they, with that swell funeral an' five hundred bucks on top of it? What more would she expect?"

"She don't expect nuthin'. That ain't her style. I got an idee she won't even accept this bunch o' coin. She's the ornariest heifer I ever saw. But that's got no bearin' on us. She's an orphan, left yere in Ponca with no visible means of support. She's a decent girl; nobody ever said nuthin' against her, and the way it looks ter me we got a moral duty ter perform. Ain't that it, Reverend?"

"That is the thought I endeavored to convey," returned the visitor from Buffalo Gap seriously. "You heard me, I presume, young man?"

"Only the last few sentences," admitted Shelby. "I don't belong here, but just happened to drift in today."

"Tom's ranchin' over on the Cottonwood," interrupted McCarthy, "but he's a mighty straight guy, an' I'd like ter have him express his feelin's on this yere idee o' yours, Reverend. It's rather a new one on me."

The preacher straightened up and cleared his throat.

"Well, here's the case of a young girl, seventeen or eighteen years old, who has had no experience whatever in life, suddenly left an orphan in this town, without any money or friends, so to speak. Where can she go? What can she do? There isn't a place she could earn a living here, excepting the dance hall; there isn't a place in this town she could call home. That is what I tried to make clear to Mr. McCarthy—that the men of this town ought to give her a chance. Mac here's a married man; got a wife and two daughters of his own back East and he cottoned to my idea right away."

"But what is your idea?"

"Marriage, sir—marriage; honorable matrimony. I even offer my services freely. The girl should be given a husband and a home; this would assure her future and relieve Ponca of every obligation. Do you see the point?"

"Yes," admitted Shelby, yet rather dazed at the project, "but there would seem to be certain obstacles in the way of such a scheme. No doubt you have considered these. Who, for instance, would marry her?"

"There isn't likely to be any trouble about that," confidently. "If she'd fix up she'd be a right good-looking girl, besides, she's got five hundred dollars to start with and that's more money than a lot of these gazabos ever saw in all their lives. I'll bet there's fifty men in Ponca that would jump at the chance."

"Rounders and tin-horns."

"Some of them—sure. But there would be some decent fellows among them. That's about how we figured it, McCarthy?"

The saloonkeeper nodded.

"There's quite a few of the right kind 'round Ponca, Tom, who'd be mighty glad to get a decent woman and settle down. I could name a half dozen right now. What I ain't so sure 'bout is the gurl."

"She might object? Of course she will, and why shouldn't she. You want to know what I think of the scheme, Mac? Well, it's a fool idea and it won't work—that's what I think of it; it's idiotic."

The Buffalo Gap man leaned forward, drawing in his paunch so as to view the speaker around McCarthy. The words of condemnation evidently cut, for his face was flushed, although he held his temper.

"That's what Mac here said at first, but now he believes it will work, and so do I," he explained gravely. "It isn't at all likely the girl will object to getting married, provided she hooks up with a man she sort of likes. The only problem is to discover the right fellow."

"And you think you can go out in this town, rope an' hog-tie any stray maverick you find on the range an' give him the brandin' iron, do yer?"

"You get right out o' here, the whole kit an' caboodle of you."

(TO BE CONTINUED.)

Caves Always of Interest.

None of the peculiar formations of the earth are more interesting than caves, and many are the adventures that have been had by the explorers of these often mysterious caverns. The very word "cave" seems to have a strong attraction for everybody. Some of the best and most interesting stories have been written about adventures in caves, so they have always been well advertised on library shelves. And then we must remember that caves were the only homes of many people who lived in the undiscovered parts of the world thousands of years ago, and this in itself adds much historical interest to these natural tunnels under the surface of the earth.

An Important Letter

Cedar Rapids, Iowa.—"I have used Dr. Pierce's Favorite Prescription for one year. Before I started to take it every month I was in bed three to four days under a doctor's care. I was only 27 years old but the doctors said I would have to have an operation before I could be well. I was so tired all the time and my nerves seemed to be all gone. I could not sleep at night and had headache all the time. I quit the doctors and started to take Dr. Pierce's Favorite Prescription. I took it four times a day, and in three months I did not have to go to bed, did not need a doctor. I gained so much in the three months that my husband said 'You take that medicine for a year,' and I did so. Now I do all my housework and have never had a headache since. I sleep good, eat good, and feel good, my nerves are fine. It has been twenty-one months since I have taken the 'Prescription' and I have not had any return of the trouble so far. I recommend the 'Favorite Prescription' to every suffering sister."—MRS. NOBLE LOCKHART, 1111 I Ave. East.

PISO'S

First Milling Process.

The conversion of wheat into flour was one of the earliest developments of civilization, and even the primitive races in the dawn of history submitted the grain to a coarse pounding between stones. Perhaps the oldest flour "mills" in existence are the rude stones found among the remains of the ancient lake dwellings in Switzerland. By a mortar and pestle arrangement the wheat was reduced to a coarse meal. Crude as this method was, it contained the germ of the modern flour mill.

Declares Filipinos All Want Independence

Former Illinois Congressman, Back From Philippines, Gives Interesting Views on Island Affairs.

By FORMER CONGRESSMAN CLYDE H. TAVENNER.

Clyde H. Tavenner.

The 10,500,000 inhabitants of the Philippines are practically unanimous in their desire for independence.

This is the strongest impression that I have brought back with me after touring the islands from one end to the other, and after having come in contact with all classes of the people.

I found, however, that the viewpoint of Americans in the Philippines, and Americans in the United States, on the subject of independence, is not the same.

The attitude of the American government, and the great mass of the people of the United States, is to consider the Philippine question from the unselfish viewpoint of what is best for the Filipino people Ninety-five per cent of the opposition to independence emanates from American investors in the islands who are quite naturally more interested in the size of their dividends than the freedom of an alien people.

The unfortunate feature of the situation is that the opponents of independence, in order to convince the people of the United States that the Filipinos should not be granted their independence, find it necessary to libel an entire race. To tell a sensitive Christian people that they shall not have their promised independence because they are not fit for it will in the end prove a mistaken policy. It will only make their demand for independence the stronger.

At the present time, however, the masses of the Filipino people still have absolute confidence in the good faith of America. Their loyalty and gratitude to Uncle Sam has not as yet been impaired by the misrepresentations of the retentionists. Their leaders are intelligent enough to distinguish between those Americans who oppose their aspirations to independence for purely selfish reasons, and the great mass of the American people whom they know desire this government to do by the Filipinos only that which is just and right.

In this connection, it is interesting to review the development of the present friendly relationship between the Filipino and American peoples.

Previous to 1916 the Philippine-American relationship is declared to have been not of the best. But with the passage in that year of the Jones law by practically both the Republican and Democratic memberships of Congress, a better feeling developed. This "better feeling" has now grown into a very strong bond of sympathy and affection.

The happy attitude of the Filipino people toward America is due not principally to the fact that Americans have shown the Filipinos how to make their country a better place to live in; not principally to the fact we have superintended the implanting in the Philippines of one of the finest educational systems in the world; nor to the building of high class roads, bridges and public works—but is due principally to the fact that in the Jones law America gave the Filipinos her word of honor that as soon as a stable government could be established we would withdraw our sovereignty from the Philippine Islands.

It might, at first thought, seem strange that in their sincere appreciation of all that we have done for them the Filipino people should place most emphasis on the promise to grant them their independence. For it cannot be successfully denied that on the whole the United States has treated the Filipino people better than any nation ever treated a dependent alien people in all the days since the curtain rose on the dawn of civilization. If we do not spoil it, it is a record that we can be proud of.

But it really isn't so strange that the Filipino should love us more for our promise to give them sovereignty over themselves than for our other good works, for which, after all, outside of army and navy expenditures, the Filipinos have been taxed, and properly so, for every cent of the cost. If we but reverse the situation, and place ourselves in the shoes of the Filipinos, which cannot be said to be an unfair way of getting at the other fellow's viewpoint, we shall see that it is not strange.

Suppose that Great Britain or any other power that you can think of by referring to your geography or history, should impose its sovereignty upon us against our will and then give us an infinitely better government than we now enjoy? Could any such foreign power ever succeed in convincing us that it had our welfare more at heart than we have ourselves.

But to return to my story, the Filipinos heartily thanked us for the Jones law, considering it a sort of a covenant between the Filipino and American peoples, and immediately applied themselves to the task of setting up the prescribed stable government. And they set it up. It is in the Philippines now. America's own representative in the islands, the governor general, officially reports it is there, and recommends that since the Filipinos have earnestly fulfilled their part of the agreement, America should be as prompt in carrying out its part of the contract.

So that, in a few words, it is not the Philippines that now are on trial, but the United States.

There is but one answer. America will carry out its agreement. And since we are going to do it, we cannot afford to quibble and split hairs and hesitate until our tardiness robs us of half the glory of our achievement. Let us act with a promptness and willingness really worthy of America.

And when the people of the United States set up the Philippine Republic as the first Christian democracy of the Far East, they will be building a monument to themselves that will stand throughout eternity. On that day the beacon light of hope, humanity and justice will flash around the world. Such an example by America will accomplish more for the weak and struggling peoples of the earth than the four year world war, with all its cost in life and treasure.

The World's Most Beautiful Volcano!

Nevertheless It Is a Reservoir of Titanic Destructive Powers.

Mayon Volcano, Albay

Mayon Volcano, now quiet, but which in the recent past has taken many lives and destroyed much property. The Philippine Islands are one of the most interesting lands in the world for the American tourist to visit.

Mount Mayon, in the province of Albay, Philippine Islands, is declared to be one of the most beautiful volcanoes in the world. No matter from which side the mountain is viewed, the cone is almost perfectly symmetrical. The setting of the volcano has much to do with its exquisite beauty, as it rises to a height of 7,943 feet from an almost level plain. The peak is visible for more than 60 miles, its regular, bare slopes near the top giving rare reflections from the illumination of the sun, while at its base is one of the most productive and picturesque landscapes to be seen anywhere in the world. A magnificent road, 120 miles in length, circles the mountain at its base, passing through the most varying scenery. Mayon has a history as an active volcano. It has destroyed whole towns. The most destructive eruption was in 1814, when 1,200 persons were killed. It last came to life in 1900, sending a river of lava into the sea at a distance of 8 miles from the crater. Since then it has been quiet.

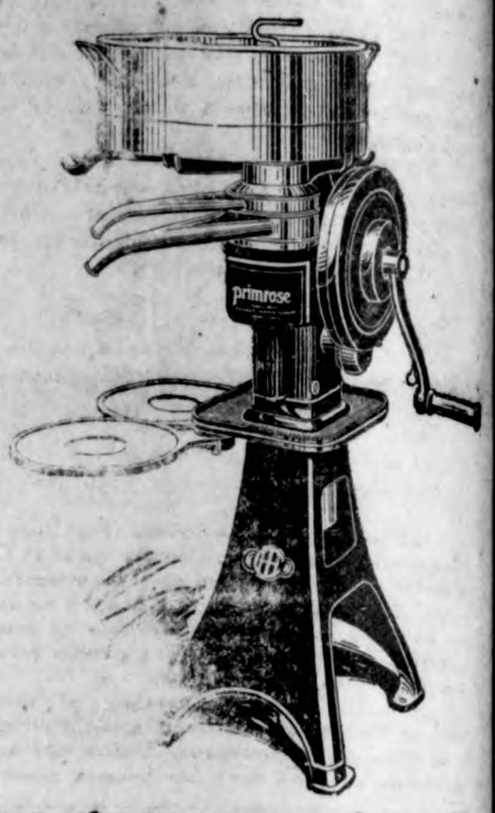
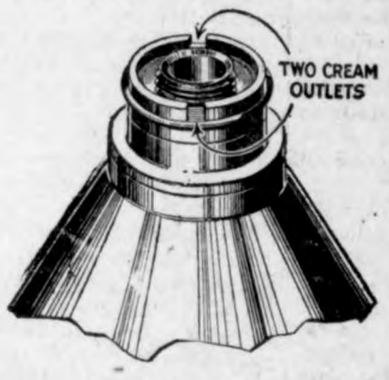
The Primrose Cream Separator



Machine of One Purpose

BUTTER FAT is worth a lot of money today. To save every particle of it is the part of wise business economy. The **Primrose Cream Separator** is the standby of the wise dairyman.

The more you see of the **Primrose** Separator and the longer you use it, the better you will like it. It has but one purpose--to SEPARATE cream from milk. It saves ALL the cream. The escape of a little cream here and there may not strike you as such a serious matter but bunch those losses over a period of time and you will be astonished at the amount. That is where the **Primrose** separator protects your pocket-book.



The **Primrose** is the only cream separator that forces oil thru every bearing, not just to them. This and other special and exclusive features about the machine we would like to show you. Call and let us show you just what this means to you as a money saver. If not convenient to call, phone us, and we will call on you and bring a machine with us.

We have on hand a full line of TANK HEATERS, WOOD TANKS, STEEL TANKS, Hog Waterers. This is the place to buy your feed-- Tankage Bran, Middlings, Oil Meal, Hog Meal

Pure, Rich Blood Will Keep Your Body Vigorous and Healthy

When impurities creep into your blood the first symptoms are usually a loss of appetite, followed by a gradual lessening of energy, the system becomes weaker day by day, until you feel yourself on the verge of a breakdown.

Nearly everybody needs a few bottles of S. S. S., the great vegetable blood remedy, to cleanse out all impurities about twice a year. It is an excellent idea to take this precaution to keep the system in a vigorous condition so as to more easily resist disease to which every one is subject. S. S. S. is without an equal as a general tonic and system builder. It improves the appetite and gives new strength and vitality to both old and young.

Full information and valuable literature can be had by writing to Swift Specific Co., 156 Swift Laboratory, Atlanta, Ga.

HOW TO MARKET WOOD PRODUCTS

Farmer Could Add Greatly to Lumber Supply by Properly Developing Resources

LARGE UNREALIZED PROFITS

Majority of American Farms Include Woodlands Which Could Be Made to Produce an Annual Crop of Logs for Timber.

The American farmer is our biggest woodman—potentially.

In the last word—potentially—lies the "rub" of a serious lumber situation. Manufacturing industries need lumber; builders are calling loudly for lumber; farmers themselves are hindered in carrying on their work because of the scarcity of lumber. And yet the farmer might be the most independent of all these interests with respect to lumber, and could add greatly to the present supply if he would properly develop his woodland resources. Many farmers, of course, have done this already and are profiting by their efforts, but they are in the minority. If all the farm woodlands could be combined they would form one vast forest of 191,000,000 acres. This is approximately two-fifths of the entire forest area of the country. East of the Mississippi the farm woodlands cover 45 per cent of all the forests. The farmers have scarcely begun to systematically develop and use these timbered lands, although they consume 46 per cent of all the wood consumed in this country. Agriculture is the greatest of our wood-using industries.

Choice White Oak Logs From a Tennessee Farm.

Opportunity Overlooked.

Taken as a whole it is an immense item that agricultural interests are overlooking, say officials of the forest service, United States Department of Agriculture, who have made a study of the country's forest resources. The annual growth of timber possible on farm woodlots has been estimated at 8,500,000,000 board feet of material suitable for lumber, staves, boxes, etc., and 114,000,000 cords of fuel wood. In other words, if properly cared for the farm woodlands could produce more than the entire quantity of fuel now consumed by the farmers and 81 per cent of the lumber boxes, barrels, etc., now used by them.

Too often the size of the farm woodlot, the material it contains, and its value to the farm are left entirely to chance. The farmer's problem is to determine what parts of his land are suited to wood rather than other crops and to develop these portions for wood crops just as he would develop land for other crops. The farmer in many of the lake states and the South is inclined to let his woodland be merely the unimproved land in his holdings. Its soil may or may not be inferior for field crops. In the Central States many woodlands occupy undrained land which comprises some of the best soil in the region. In the Eastern States, particularly in New England, farm woodlands are being extended through reversion of hill pastures and the like to forests. In this latter region, and to a more limited extent in the other regions, there is an opportunity to grow commercial crops of timber in relatively short periods for such products as pulp wood, box lumber, telephone poles and railway ties.

To Market Wood Products.

In many communities a co-operative marketing organization of the farmers is suggested by the United States Department of Agriculture as a practical means of selling woodland products. In other instances individual sales prove more satisfactory. The farmer who is interested in finding a market for this crop should ascertain what prices the mills and wood working industries in his region will offer. This applies to sales requiring shipments as well as to local sales. It is advisable also to inquire from neighbors who have recently disposed of their timber, so as to profit by their experiences. Local timber demands should not be overlooked, as often local markets will pay better prices than outside markets because of the saving in transportation charges.

If the farmer has more than a small amount of wood products to sell it will be well for him to advertise in mediums that will secure outside competition for his material. Where possible bids should be secured both by lump and by log scale measure. A choice is thus offered and the more profitable form of bid can be accepted. Prior to making sales a fairly good estimate should be made of the amount and value of the material for sale. Persons experienced in measuring and estimating timber usually can be found in every region where timber has been handled in the past. It is advisable to market the higher grades of timber rather than use them on the farm, where the cheaper material generally will prove quite as serviceable. This should be done in many cases even if it makes necessary the purchasing and hauling to the farm of cheaper lumber. Before following such a procedure, however, the farmer should be sure that he has a high grade product to sell, for markets which pay good prices usually buy on grade and inspect closely. The use of a written timber-sale agreement is recommended by the United States Department of Agriculture in selling woodland timber, particularly where the cutting is done by the purchased.

SHOULD GROW HAIRY VETCH MORE WIDELY

Crop Thrives in Nearly All Soils and Climates.

Acreage Is Far Below That of Several Other Leguminous Forage Plants —High Cost of Seeding Is Big Objection.

Hairy vetch thrives in nearly all soils and climates, is probably as widely distributed as any other leguminous forage crop, and is used for nearly every purpose for which forage crops are employed. It is remarkable for its ability to grow on poor soil, to resist cold, drought, and alkali, and for its comparative immunity from insects and diseases.

Despite all these advantages, hairy vetch is not one of the major forage crops. The acreage is far below that of several others of less value. Forage specialists of the United States Department of Agriculture say that this crop could be profitably grown on a great many more farms.

Hairy vetch, with all its excellent qualities, is not without some objectionable features. Perhaps the most serious is that it will not stand upright without support. As a hay crop, therefore, it must be planted with rape or some other stiff-stalked crop. There is sometimes difficulty in getting a stand and on the other hand in exterminating it when it is once established.

The high cost of seeding has been perhaps the principal factor in preventing its general use. Specialists hold out no hope for cheap seed, but they assert that the advantages of the crop are sufficient to justify its planting even at high cost. This is particularly true, they say, in the states bordering on the Great Lakes and in most of the Atlantic and Gulf coast states.

The subject of seed production in various localities is discussed in detail in Department Bulletin 876, copies of which are available to interested persons, free on application.

FEDERAL GRADES FOR WHEAT ESTABLISHED

Factors Which Closely Limit the Commercial Value.

Country Buyers Are Urged to Equip Themselves With Standard Equipment Such as Used by Licensed Inspectors.

Federal grades for wheat have been established upon the basis of actual commercial value for the various grades. The moisture content of wheat, the percentages of dockage and of other foreign materials present, the extent of damage, if any, and the test weight per bushel all are factors which closely limit the commercial value of wheat. There is no reason why the producer of inferior wheat should expect to receive as much as the careful farmer who has produced a high-test weight, low moisture content wheat which is practically free from foreign matter other than dockage, say grain experts of the bureau of markets, United States department of agriculture.

Many of the country elevator operators have installed grading equipment for the purpose of purchasing all wheat upon the basis of grade. Yet purchase by grade is of but little value unless the grades are fairly administered, and country buyers are urged to equip themselves with standard equipment such as that used by the licensed and federal inspectors. Fairness to all in the handling of grain turns on the purchase of grain according to its actual worth, and not upon the "mine run" basis.

Enthusiasm sets the pace but common sense wins in a walk.

Another Royal Suggestion

DOUGHNUTS and CRULLERS

From the NEW ROYAL COOK BOOK

DOUGHNUTS! There is nothing more wholesome and delightful than doughnuts or crullers rightly made.

Doughnuts

3 tablespoons shortening
⅔ cup sugar
1 egg
⅔ cup milk
1 teaspoon nutmeg
1 teaspoon salt
3 cups flour
4 teaspoons Royal Baking Powder

Cream shortening; add sugar and well-beaten egg; stir in milk; add nutmeg, salt, flour and baking powder which have been sifted together and enough additional flour to make dough stiff enough to roll. Roll out on floured board to about ½-inch thick; cut out. Fry in deep fat hot enough to brown a piece of bread in 60 seconds. Drain on unglazed paper and sprinkle with powdered sugar.

Crullers

4 tablespoons shortening
1 cup sugar
2 eggs
3 cups flour
1 teaspoon cinnamon
½ teaspoon salt
3 teaspoons Royal Baking Powder
⅔ cup milk

Cream shortening; add sugar gradually and beaten eggs; sift together flour, cinnamon, salt and baking powder; add one-half and mix well; add milk and remainder of dry ingredients to make soft dough. Roll out on floured board to about ½-inch thick and cut into strips about 4 inches long and ½-inch wide; roll in hands and twist each strip and bring ends together. Fry in deep hot fat. Drain and roll in powdered sugar.

ROYAL BAKING POWDER

Absolutely Pure

Made from Cream of Tartar, derived from grapes.

If mistakes were crimes all men would be in jail.

Hope for the best and prepare against the worst.

Riches formerly had wings, but now they have wheels.

A lazy man works overtime telling others what to do.

Intervention in love is equal to a declaration of war.

Few love to hear the sins they love to act.—Shakespeare.

It is the motive, the great purpose, that consecrates life.

Idleness travels so slowly that poverty soon overtakes it.

It is a good rule to be deaf when a slanderer begins to talk.

Some people find it easier to get married than to stay so.

He who praises men and flatters women has many friends.

Getting along on a past reputation gives a half-starved look.

No ray of glory lights the breast that beats for self alone.

You would not think any duty small if you yourself were great.

'Twere better to strive and fail, than never to strive at all.

If opportunities were females more men would embrace them.

If a man lives up to his wife's expectations he is always busy.

Why does a man invariably move the chair when he sits down?

Fear makes some dodge responsibility, but laziness makes more.

When doctors disagree the patient has a fighting chance for his life.

After 30 you can't make anybody mad by not inviting him to a picnic.

Some folks' self-admiration proves that there is no accounting for tastes.

Don't meet troubles half way. It is capable of making the entire journey.

Don't put off until tomorrow the thing some one will do for you today.

Time may be money, but doing time in a jail isn't a remunerative occupation.

It sometimes happens that a man hits an enemy a hard blow by ignoring him.

This world owes much to misers. They accumulate wealth for others to enjoy.

Local Mention

Mrs. A. Ahrenkiel of Goodell, was a Klemme visitor Saturday.

Miss Goll was a Garner visitor between trains Tuesday morning.

Mr. and Mrs. Henry Lau and Mr. and Mrs. Wes Lau, drove to Mason City last Thursday on business.

Chas. Gibbs, our office devil No. 1, went to Garner on business Tuesday morning.

Miss Edna Katter of Garner was visiting Klemme friends one day last week.

Mrs. Hans Nielson, of Goodell, was a Klemme visitor between trains last Thursday.

Mr. and Mrs. G. A. Beard, of Belmond, were vsiting in Klemme on Thursday.

Mrs. William Lau and Mrs. Olive Liscomb, of Garner, were calling on Klemme friends Friday evening.

Charlie Schoenwetter of Garner, was around Klemme Monday shaking hands with old friends.

Mrs. L. L. Putnam, of Belmond, was shopping in Klemme between trains last Thursday.

Mrs. C. L. Blumer was a caller at Goodell between trains last week one day.

Miss Gladys Wenig was a Garner caller Tuesday morning between trains.

Mrs. Dan Miller and Mrs. Henry Griffin, both of Goodell, were Klemme shoppers and visitors Monday between trains.

Mrs. Chas. Medaus and children, from east of Klemme a few miles, were visitors at Garner between trains last Thursday.

Mr. Gimer's mother, who has been here visiting with him and his family for the past three weeks, has returned to her home at Abbott, Iowa.

Mr. and Mrs. Roy Jenison and children and Mrs. Pletch and Mrs. Cortland Morse, all of Belmond, were visiting in Klemme ast week Tuesday.

N. L. Palmer was a business caller at the town of Goodell last Thursday.

H. D. Mason and Frank Underkoffer, of Clear Lake, were business callers in this city Friday.

Mr. Fred Baumgartner, of Bonetseel, South Dakota, was here last week on Tuesday visiting with his brother, John the barber, and his family.

Miss Sylvia Brooks spent the week end visiting with friends and relatives at Belmond. Miss Brooks is one of our ura lteachers and teaches in the Barrick school near Klemme.

G. P. McCullough and R. A. Jorgenson drove to Garner Sunday morning. The object of the visit being to participate as main factors in eating a chicken.

Mrs. C. H. Tompkins and children, and Mrs. Riley, of Garner, were in Klemme last Wednesday. They had been to see Mr. Tompkins who was in the hospital at Belmond recovering from a tonsil operation.

Mr. John Baumgartner, Sr., came Saturday fo a short visit with his son, John and family. The elder Mr. Baumgartner has broken up housekeeping since the death of his wife and will spend his time visiting among his sons and daughtrs.

J. P. Jennings and his crew of men left last Thursday for Emmetsburg, Iowa, their home. Mr. Jennings has several contracts to put in water mains but on account of the scarcity of material he was forced to lay off for the balance of the year.

Supt. Cllins spent Sunday with his family at Eldora. The Professor has a good way figured out to go to his hme. He goes to Iowa Falls and then his wife meets him there with the car as Eldra is only a short distance from Iowa Falls. He gets back the same way and gets here in time for school Monday morning.

Miss Hulda Johnson came over from Mason City Saturday evening to spend Sunday with her folks here. She returned Monday afternoon. Miss Hulda and her friend, Mrs. Fredericks of Mason City, plan to leave for California about the first of December to spend the winter months in the land of sunshine. They will make their stay in the west with Mrs. Frederick's parents, who live there.

It will be no trouble for this baby to remember her birthday when she grows up for she was born on Hallowe'en. Mr. and Mrs. Albert Etchen are the happy parents of a fine ten pound girl who arrived Sunday afternoon, October 31st. All concerned are doing nicely with the exception of Albert. He is jubilant over the matter that we doubt if he will recover for some time.

M. O. Barr moved from the rooms over the Gruetzmacher harness shop to the Mrs. Fuller house, located just north of her new residence.

Miss Steffa Fuls, of Baleyville, Ill. has been here for a week or more visiting at the Ben Swalve home. Miss Fuls and Mrs. Sualve are sisters.

N. G. Moberly has a sale ad in this issue of the Times. Look it over, he has some fine stock to offer at the sale.

Mrs. Joe Johnson retnrned last Thursday from a three weeks trip in Illinois. She visited relitives and friends at Chicago, Evanston and Seneca.

For the time being at least, we are going to crown Herman Schleusner champion beet raiser of this section of Iowa. Last week Herman finished hanling the beets from a fonr and one-quarter acre patch, and his weigdts indicated 87½ tons, or $1050 worth of beets. A large per cent of these beets averaged from ten to eleven pounds each. The land upon which these beets were raised has been for a number of years used as a hog pasture, and was very rich. Herman's experience should teach other beet raiserr that the best and most profitable way of raising beets is to plant a small acreage on good fertile ground, aud see to it that they are intensively cultivatec.
—Democrat.

Charles Gibbs came from Big Lake, Minnesota, last Wednesday evening on a business mission. While here he also made lt a point to visit relatives and friends. He left again Friday for the north.

The Faith Cure.

"Mamma," said little Betty, "my kitty is sick and I have been trying to give her some of my medicine, but she won't take it." "Of course not," replied her mother. "Cats never take medicine when they are ill." "Well, I declare!" exclaimed Betty. "Who'd think a little kitten like that would use the faith cure?"

DISPERSION SALE

High Class Holsteins

At the J. T. Galford Farm 6 miles we and ¼ miles south of Mason City. mile south of Moore's crossing on terurban.

Thursday, Nov. 18th

SHOULD RESIGN AND LET HARDING MAKE EARLY PEACE; CLAIM

President Has Opportunity To Regard Voice of People, Says Commoner

CHICAGO:—William Jennings Bryan in Chicago today, gave out a statement suggesting that "President Wilson should resign at once."

"Now that the American people have decisively decided against the League of Nations as written by the president," said Mr. Bryan, "it would seem desirable to carry out the verdict immediately. This can be easily done. The president should resign at once and turn over his office to Mr. Marshall, on the condition that on the convening of congress in December, Mr. Marshall appoint Senator Harding secretay of state and himself resign.

"The law then would make Mr. Harding president and with the Republican support in congress, he could at once put into operation the plan for the United States to enter into an association of nations for peace.

"As world peace is a thing near to the president's heart, he can hardly refuse to hasten the coming of peace by so small a sacrifice if it could be called a sacrifice to escape three months combat with a hostile congress supported as it is by the recent vote.

WINTER CARE OF THE TRACTOR

Useless Used for Odd Jobs it Should Be Properly Stored

Iowa tractor owners, who are not going to use the tractor thruout the winter, should pay some attention to "laying-up" the machine before freezing weather sets in. Here are some pointers given by the agricultural engineering section of Iowa State College.

House the machine in a warm place if possible, since this will save time if any repair work is to be done. If not, see that the water is drained out of the radiator or cooling system. Start the machine up for a few moments so as to circulate the water and work it out of the pump. Running the tractor slowly for a few minutes will drain out all the water and give enough heat to dry the pipes thoroly.

The carburetor, being full of gasolene, should be drained and dried. The carburetor has a float and this will become damaged if allowed to stand in gasolene all winter.

If there is a storage battery on the tractor it should be removed and placed in a place where it will not freeze or dry out. Any garage will give it proper attention for a few dollars for the winter, which will be cheaper than uning it by neglect.

If repairs are needed now is the time to order them so that they will be ready for the spring work.

Minor cleaning, as to grease cups, holes for grease and many things of lesser importance, can be done at odd times. Look over all bearings and see that they are in good shape. A good tractor farmer will give the machine the same care as he used to give his horses.

A "HUMAN TAPE LINE"

In our rounds about the town for news we sometimes run onto queer things and this one is sure a peach. Down at "Zip" McCullough's barber shop the other day they got to arguing as to the height of the room. There being no measuring stick at hand the problem was a deep one but not too deep for that gang. Here is how they measured the ceiling: "Zip" who is six feet and three inches short stood against the wall but his head was far from the ceiling. Henry Suckow was there and he donated one of his crutches to the cause and this was placed on top of "Zip's" head, but then how long was the crutch? Chris Gram solved this as he happened to remember his feet are just 12 inches long. Chris stepped off the distance on the walking stick and made marks. The total was then figured up and they found the ceiling to be nine feet and six inches high. Now anyone having any measuring to do just call on "Zip" the barber, "Hank" the banker and Chris the auto mechanic. They will solve all your measuring problems without the use of a yard stick, rule or tape measure.

YELLOW CORN BEST FEED

Tests Show Better Results Than With White Corn

Yellow corn as a hog feed is better than white corn, says John Evvard, swine expert with the Iowa Agricultural Experiment Station. According to Mr. Evvard, white corn does not contain the necessary vitamines which make the animal grow, vitamines being the new soluble fats found in such products as butter, grains and fresh succulent crops.

Tests have recently shown that pigs which were fed yellow corn in a ration excelled those fed white corn. Tests made with rats show very conclusively in a number of tests that the yellow corn is best.

"Rats," says Mr. Evvard, "do well on the same feeds as hogs, so we can use them for a comparison, since thy are smaller, easier and cheaper to handle.

"Further work is to be done on this test but for the present it would be worth the farmers while to use yellow corn especially if he is buying it. If this is impossible use white and yellow mixed.

"In the winter, added to white corn feed alfalfa hay, skim milk, butter milk, carrots and some pumpkins or tankge . These substances all contain vitamines.

"Sell the white corn to starch factories adn feed the yellow. If not enough yellow is present then feed the young stock the yellow and the older stock the white corn."

OLDEST WOMAN VOTED EARLIEST IN HANCOCK; NO NEGLECTED HOMES

GARNER—The women here voted as though to the manner born and as yet no reports are out because of neglected household duties while prforming this civic duty.

Many women who previously expressed no wish to vote, felt that so long as voting had become their privilege it had now become a duty. Men in general were gratified with the result of the women's first voting. In place of adding to the labors of election, they appeared to be lightened. At any rate the entire count of Concord township was completed at 11 o'clock the evening of election day.

Mrs. Anton Avery, who is in her 90th year, was the first woman to cast her ballot and as it was quite early in the morning, she was probably the first woman in the county to vote. This was most fitting, as she was the first white woman to come to Hancock county and endured the hardships of the early settlers.

FIRST METHODIST EPISCOPAL CHURCH

Communion srvice Sunday morning at 10:30 o'clock in Liberty township church. Rev. G .H. Wessel of Burt, Iowa, will deliver the sermon in the morning and in the evening. There will be no services in the town church next Sunday. All are requested to worshp with us out in the country church.

A. H. Meyer

ANOTHER IMPROVEMENT

Where formerly there stood an old coal house in Main Street near the Rock Island tracks will in the future be a little park. Workmen have put a curb around the half-moon shaped little piece of ground and have it all filled in. In the spring the plot will be seeded down and white cobble stones will form the name "KLEMME" in the center. Passengers alighting from the train or going thru Klemme will be favorably impressed with a beautiful little park and will know that Klemme is a live town and believes in having things look nice.

SALE POSTPONED

The N. G. Moberly sale which was to have been held in Klemme last Saturday has been postponed on account of the bad weather and so will be held at the Klemme livery barn this Saturday afternoon, t 2:00 P. M.

FOR SALE—Five High Grade Holstein Heifers, past two years old. Chas. Ax. 10–2c

FOUND—A watch, owner can have same by proving property and paying for this ad. Reginald Houghton, Goodell. 10–1c.

Through its Health Service the American Red Cross has begun a nation-wide concentrated effort in co-operation with established organizations to reduce greatly the amount of preventable disease and physical defects found among the country's 106,000,000 population. Education is its most powerful tool. Special attention is devoted to children, and this picture shows a typical Red Cross welfare clinic where little ones are treated and mothers instructed in the proper care of them.

Health is at the foundation of human happiness. Through its Rural Service, Public Health Nursing Service and Health Center Service, the American Red Cross aims greatly to strengthen this foundation and to draw more closely than ever the neighborly ties that bind the American people together. Here is shown a Red Cross Public Health nurse attending a young mother with a brand new baby, seeing that both receive scientific care.

But for the work of American Red Cross agents in all regions of Poland during the last twelve months, hundreds of thousands of people in that tragic country today would be under the sod, victims of hunger, disease and exposure. The job in Poland is one of tremendous proportions and cannot be abandoned for many months to come. Here is a typical scene: A Red Cross worker "at the throttle" of a soup kitchen where hundreds of undernourished women and children are fed daily.

We Have.

R. J. S. wants to know if we have ever met the people who never go to bed, but retire; who never sleep, but slumber; who never get up, but rise; who never eat, but dine; who never drink, but indulge; who never talk, but converse; who never read, but peruse; who never buy, but purchase, and who never get sick, but become ill?—Cincinnati Enquirer.

Water-Loving Trees.

Water-loving trees along streams often consume more water than they save. Estimates are that a beech forest will transpire nearly 50 per cent of an annual precipitation of 20 inches, while a coniferous forest but eight per cent of the same or like precipitation.

Fireweed's Good Work.

Fireweed, otherwise known as the "great willow-herb," seems to have been created as an antidote for one of the ugliest sights a landscape may offer—burnt-over ground. The fireweed is a genuine cosmopolite, for it sends its consoling shaft above the ashes of burnt forests not only throughout America but in Europe and Asia.

King David's Militia.

King David organized a national militia, divided into 12 regiments, under their respective officers, each of which was called out for one month in the year. At the head of the army when in active service he appointed a commander in chief.

CENTENARIAN CASTS BALLOT FOR HARDING; IOWA'S OLDEST VOTER

IOWA FALLS,—Ellis township in this county probably holds the record for the oldest lady voter at the polls, last Tuesday Miss Margaret Hillhouse who makes her home with Mr. and Mrs. O. S. Carpenter, cast her vote for Harding and the rest of the Republican ticket. Miss Hillhouse will be one hundred years old on January 4. Another voter well along in years is Mrs. J. R. Brower of this city, who is in her 90th year and cast her vote for the G. O. P. ticket. Mrs. Brower is a pioneer resident of this city.

FLAGS HALF-MAST NOV. 14

President Wilson has issued a proclamation calling for flying flags at half-mast at all forts and naval stations and on all public buidings throughout the land on Armistice Day, which has been designated for Sunday, Nov. 14th, this year. The Armistice was signed November 11th, 1918, but as it is largely the churches that will celebrate the signing of the Armistice with memorial services it was thought best to set aside Sunday as the most convenient day. The president predicts that at some future time congress will by law set aside a day for the observance of this anniversary.

MULCH STRAWBERRIES NOW

Freezing Weather is the Time to Mulch Them for Winter

Strawberres should be covered with straw or leaves as soon as the ground begins to freeze, says C. V. Holsinger, horticulturist at Iowa State College.

In using straw for this purpose it is a good idea to shake the straw over to get rid of all the grain which might have been left in the straw by the threshing process. This will avoid grass growing in the patch next spring. This also will remove weed seeds.

If leaves are used it is a good plan to fasten them down at first so that they wll not blow away. Straw, once it has settled will remain. If straw is placed on snow it will also stay better.

WHY

The Robin Is Not a Foe to the Orchardist

A long time ago some one got the notion that the common American robin is a foe to the orchardist and berry grower. The alleged discovery was promptly published broadcast and the fruit grower loaded his shotgun and went forth to slay the robin.

The fruit grower's investigation into the food habits of the robin went no further than observing that he sometimes ate cherries. It never occurred to the man with the shotgun to examine the contents of his victim's stomach. If he had done so with a mind open to conviction a surprise would have met him. The robins do eat early fruit, but the quantity is small in proportion to the number of insects they destroy.

The robin's diet consists chiefly of moths, butterflies, caterpillars, earth worms, cutworms and other creatures that the farmer can very well spare. The small fruit that the bird consumes is only his dessert after meat.

If the robin plucks small apples from one's trees, it would be well to examine the apples before killing the bird. He may be doing one a great service. Probably you will find that he has not eaten the young apple after all, but has dropped it on the ground. A little further investigation will show that it contained a larva of the destructive coddling moth; the bird was not after the apple, but the larva.

Nestling birds live wholly on insect food. There were once watched a pair of robins that had their nest on a porch cap. From the time the young were hatched until they were ready to leave the nest the parents visited them on the average once every fifteen minutes, and brought at each visit from one to three insects.

FIGURES IN MANY LEGENDS

Why Have Black Cats Been Considered Lucky?—Numerous Superstitions Concerning Them.

Why have black cats nearly always been accounted lucky?

Ireland is by no means the only place where superstitions about black cats are or were rife. In Egypt cats were regarded with great reverence. Archeologists have found them in tombs of kings and princes.

Australians have a curious legend about cats. Mityaro, the moon, they say, was a native cat, who fell in love with some one else's wife, and was driven away to wander ever since. To them a cat, black, gray or white, prophesies only bad luck.

In Japan and China a black cat is regarded as a dangerous demon, often possessing as many as two or three forked tails, and having the power to change itself into an old woman.

The Chinese believe if a cat leaps on or walks over a corpse it will cause the corpse to rise up at once. Any person passing through the room would be in danger of being seized by the corpse when in that state, and would be killed immediately.

Why Chopsticks Are Favored.

Chopsticks as table tools are being used more and more in American families, who find much to recommend them in the way of cleanliness and convenience. Ivory ones can be whipped clean as the proverbial hound's tooth with a single motion, while the more common wooden ones are simply tossed away like a burnt match.

Japanese of the higher order, who ban our idea of pocket handkerchiefs, never travel without their chopsticks, or "hashis," as they call them, and in all Japanese restaurants hashis are served with every order, each pair sealed in a rice paper envelope, appropriately inscribed. These are of wood, separated by a slit which goes only part way, so they must be torn apart before using. This is a further guarantee that each is an original package.

Why Sunshine Is Necessary.

Attempts to avoid the British by-laws that provide a window area equal to one-tenth of the area of the room are frequent, says a writer in the Journal of the Royal Sanitary Institute. Sunshine is generally treated with indifference. In the crowded cities, bedrooms exist into which a direct ray of sunshine never enters.

Investigations on the Continent reveal the fact that children in badly lit schools suffer from short sight eight times more than children in well lighted schools. The effect of cross light is most detrimental to children's sight, yet we find cross lighting in comparatively recent schools in the British Isles.

Similar investigations applied in the case of dwellings would no doubt show that there was a benefit to be derived from direct sunshine.

Why Teachers Die Young.

Persons not in touch with the schoolroom realize only on rare occasions that schoolboy "howlers" flourish as luxuriantly today as ever. Sometimes a few samples published in a newspaper or college magazine serve as reminders, sometimes a street car passenger will garner a choice specimen from the talk of a group of chattering pupils on their way to school. Only the other day two boys were overheard quizzing one another in preparation for their English lesson for the day. "What is personification?" the first boy asked, looking at the book. The second boy's reply was in the nature of a terrific and oblique condensation of the correct answer: "Personification is a metaphor without human intelligence."

Soldier's Preference Was for Something of Which He Could Make General Use.

A British general who was commandant of a district in India had presented the prizes at the garrison sports, and was rather surprised when one of the prize-winners, a private in an infantry regiment, approached him a few days later and begged to know if he would be allowed to change his prize for something more useful.

"What was your prize?" asked the general.

In reply, the man produced a long case under his arm, and showed a handsome pair of meat carvers.

"Very nice, I am sure," said the general. "What do you want to change them for?"

"Well, you see, sir," replied the man, "I would rather have a knife and fork of the size to eat meat with."—Edinburgh Scotchman.

SHE DIDN'T KNOW CHAUNCEY

Or Woman Reporter Would Never Have Asked the Veteran a Question Like That.

Chauncey Depew was accosted in the lobby of a hotel at Chicago by a woman reporter from Los Angeles, who asked his name, and duly recorded it.

"Where are you from?" she asked.

"Peekskill," replied Mr. Depew.

"Where's that?"

"In New York."

"Are you a delegate?"

"Yes."

"Who are you for?"

"Butler."

"Who is your second choice, Mr. Depew?"

"My dear young woman," Mr. Depew replied with a twinkle, "if I were courting you, and you had not answered, do you suppose I would tell you my second choice?"

HAVE A SMILE

Something Worth While.

"This machine will save labor." "Aw, why don't some of you smart guys invent a substitute for work?"

True to Form.

Folly—"The doctor says he has saved her life nine times." Dolly—"I always did think she was a cat."—Judge.

Apprehensive.

"Why do you speak so kindly of pajama drama?"

"Anything to dodge bathrobes."

Injuring the Profession.

"Here's a man says the freak business is falling off." "He's right. Too many outside of sideshows."

Modern Maxims.

"Hitch your wagon to a star."

"What advice have you for motorists?"—Louisville Courier-Journal.

Certainly Not.

Jones—Do as you want to be done by.

Bones—But I don't want to be done.—Chicago Journal.

Seems So.

"Well, the saloon is out of politics." "Sure is. The golf links have the call now."

Naturally.

"What do you think ought to be the typical summer flower?"

"The ice plant."

Waste.

Samson pulled down the temple.

"Heavens, man," we cried, "don't you know how scarce buildings are?"

The Meaning.

"Why does a bride carry a shower bouquet?" "That's easy; to show she intends to reign."

Wise Woman.

"He tells his wife everything." "So?" "Yes, but she only believes a part of it."

So Says Tradition.

"I want to say it with flowers."

"Here are some daisies."

"But daisies won't tell."

The Likeness.

"These labor troubles are proceeding like clockwork." "Yes, they do seem to have the strike habit."

No Use.

"What's the professor working on?"

"A microbe."

"What's the use of inventing more?"

Naturally.

"I put my foot in it today."

"What did you do?"

"Tried on a new pair of shoes."

Her Statue.

"She is perfectly crazy about cake and bread making." "I see; she is a regular dough nut."

Bang!

"Say, dad, what is a vicious circle?"

"A punctured tire, my son."

Society Sports.

Stella—Is she a social climber?

Bella—Yes, indeed, she goes in for uplift, cup lift and pup lift.

Know the Sort?

Stella—Is her temper a flash in the pan?

Bella—No, it is a fireless cooker.—New York Sun and Herald.

SOMETHING NEW TO MOTHER

Dear Old Lady Had a Good Deal to Learn About the Latest Idea in Silk Stockings.

Styles may come and styles may go, but an old-fashioned mother like Bab's can't be expected to keep abreast with the latest creations. She is always looking after the welfare of the family, whether it is preparing father's choice dish or skimping her own needs so that Johnny or Bab may keep up appearances with the twentieth century younger set.

Mother recently was going over the week's washing, putting a patch here, catching a button there and seeing to it that the stockings were carefully mended. She came across a pair of stockings that Bab had purchased the week before. They were the latest thing dictated by fashion, the lisle stocking with lace designs on the sides, which very much resembles the lowly "run."

"And bless you, mother sewed up every one of them," giggled Bab to a friend, a few days later, "and they cost me $8 a pair, too."

NO MERCY FOR THE FLIRT

According to Dream, Modern Girl Met With Deserved Condemnation at St. Peter's Hands.

Cortlandt Bleeker was talking at Piping Rock about the modern girl.

"I had a dream last night," he said. "I dreamed that a modern girl died and appeared before St. Peter.

"She wore a gown of filmy, almost transparent tissue. She was very beautiful, and she had a conquering air.

"'Let me in, please,' she said. 'My sweethearts were numberless, but my virtue remained unspotted. Though I skated over miles of thin ice, I never once fell through. I am a modern girl.'

"But St. Peter frowned and said, pointing downwards with his forefinger:

"'I condemn you to the same flames to which you condemned your foolish lovers.'"

Put to Good Use.

One day my husband invited a former school chum of his for dinner, writes a correspondent. He arrived about four o'clock, but my husband had not yet come home. Our little son Philip was playing around with our guest, who gave him a quarter. When it came time to prepare dinner I discovered that I did not have enough potatoes and the only money I had was a ten dollar bill. Fearing to send the little fellow to the store with it, I called him out and told him to go and get the potatoes with his quarter and when daddy came home I would give it back to him. Seated later at the dinner table the man playfuly pinched Philip's cheek, and asked him what he did with his quarter, to which Philip responded, "O, mother took it to buy potatoes."

A Valley Forge Kettle.

According to the Carthage Press, Charles Sanders, a resident of Carthage, has an iron kettle that has an interesting history. It was used to bake bread for General George Washington and his army during the severe winter at Valley Forge. The kettle was given Mr. Sanders by his mother. It is the heavy iron type that was used for baking before the appearance of ovens and cook stoves. Mrs. William Satterfield used it when she was living at Valley Forge in 1776. It was later given her daughter, who used it until her death, at 110 years of age, when it was given to Mrs. J. V. Sanders, the mother of the present owner.—Kansas City Times.

Popular—Indeed.

Mrs. W. had just brought home her new hat and was exhibiting it to her husband hoping to win his approval thereby. He looked at it critically. "Yes," she chirruped, "it's real old-fashioned. Just look at the flowers—poppies and petunias and nasturtiums and see here—this wheat."

"Um huh," Mr. W. nodded his approval. "But if you wanted this hat to be popular, Mary, why didn't you have them change this wheat on your hat to rye?"

Bamboo for Paper Making.

According to Sir Harry Johnston, the famous African explorer, the inexhaustible supply of grasses, reeds and rushes of tropical Africa can be utilized in making paper. William Raitt, the cellulose expert of the British government, points out many serious difficulties in making paper from these grasses, but says that these are not found in bamboo, which renews itself annually.

Earthquakes in the United States.

In 1919 the United States was shaken eighty-seven times by earthquakes. In 1918 it was shaken 127 times. Few of these quakes were sufficiently strong to be felt except by the seismographs of the United States weather bureau.

Splendid Achievement.

To free oneself from the restraint of outer authority may not be difficult, but to make one's new freedom subject to the shaping and guiding power of inner law is the supreme achievement of the human will.—Ralph Philip Boas.

Waiter, One Dish "Milhi!"

The Chinese are very fond of an extraordinary dish called "milhi," which is made of live new-born mice dipped in honey.

For our readers of the Times who do not live here we will inform them that anothe cold wave has struck this section. Friday evening rain set in and kept going until Monday night when it turned colder and a mixture of rain and snow fell Tuesday. Time to get the furnace going full swing now.

A few from here drove to Mason City last Wednesday evening to see the musical comedy, "My Sunshine Lady."

Paul Stille went to Fort Dodge last Thursday on a business trip.

Marlin Croner returned last Wednesday from his trip to Garnet, Kansas, and Kansas City, Mo. He drove his car all the way and struck bad roads both going and coming.

Playing a Deep Game.

Ethel had been shopping with her mother. When they returned home she was tired and hungry, and, prompted by a desire for a good meal, she said: "Mamma, let's play I'm your guest and am going to stay for dinner."

"SOME SCHEME."

opsis.—Tom Shelby, a rancher, into the frontier town of a looking for a good time r a long spell of hard work loneliness on the ranch. In- d, he runs into a funeral—that Dad Calkins, a retired army of whom little is known. A still in her teens, survives kins. McCarthy, a saloon keep- nd Ponca's leading citizen, de- s that the girl, now alone in world, should marry.

CHAPTER II—Continued.

—2—

ou go at it right—yes. This is ting proposition. That's where make a hit. Say we limit the s to a dozen, or maybe fifteen; fellows will bite at it like hun- h. Everyone of them duffers ink he's a lady's man. I know and there never was a young in pants who didn't secretly be- he was a regular lady-killer. what's going to round them a bunch; we'll give the girl a to take her pick. That's fair , isn't it?"

by laughed, the situation as wiftly outlined appealing sud- to his sense of humor.

t's sure some scheme," he ad- cheerily, "and I'd rather like it pulled off. But it's my no- hat the girl is liable to create disturbance. She didn't noways

Girl Ain't Even Halter Broke Yet."

to me like the sort who could iven. It's my idea that girl ain't halter broke yet, let alone willin' t in double harness. Ain't that uth, Mac?"

lby lit a cigar, waiting for the keeper to deliver his decision.

e's a bit odd, an' sorter bull- d, yer might say," the latter said . "That's true enough, Tom. I time gettin' her to go through ceremonies this afternoon. She wanted Old Dad planted quiet- She's mighty liable to be offish the preacher first puts this pro- on up to her. Likely as not she'll a fit, but we'll fetch her up trough just the same. You ain't y better scheme, have yer? The way ter save a girl out in this ry is ter marry her—ain't that

reckon it is. Got yer gang lined et?"

t yet; there's a plenty to choose an' I aim ter write out the list at the saloon. How about you?" e? Not on your life, Mac; this my funeral."

u'll help us out, though?"

e; I'll talk it over with the boys get 'em interested. I'll even fifty dollars into the jack pot ve the happy couple a start. 's nothin' that will put more 'pep' a prospective bridegroom than a o' money in sight. You two s figure it out an' I'll go over e saloon and, sorter quite-like, he boys out a bit. Where'll you an hour?"

my office. Who was you aiming k with?"

, Cady, Jim Mack, 'Rowdy' Egan hat bunch. They are the boys imin' to interest, I reckon. How of a jack pot do you aim to ?"

Carthy pondered a moment, his cupped in his hand.

ell, I'll blow in two-fifty an' I n there are those who would it to a right smart figure. You talk a couple o' thousand, Tom. er say, that'll be quite a feature, there ain't no reason why we dn't pull the affair off ternight." e delicious and delicate humor of ituation was what particularly ap- d to Shelby—the affair promised ement and a good laugh. He was even convinced that the scheme might work and thus really prove a benefit to the girl, if she only chose wisely; but at present his main interest centered on the fun he expected to extract from the preliminaries.

He had already decided on a general course of action; he would approach those whom he considered worthy, in a strictly diplomatic way, judiciously hinting at the possibility of Old Dad Calkins' girl being an heiress and suggesting the advantage of her being sought in early marriage. It was merely an idea he proposed to advance, to be implanted in their minds, that she should not be allowed to escape from the community with all that money, nor snapped up by some mercenary stranger.

During the next half hour Shelby managed to interview at least a half dozen whom he considered eligible bachelors or lonely widowers, artfully selecting those known to be of a somewhat sportive disposition, to whom such a proposition as he had to offer might naturally appeal. A few of these treated the suggestion profanely; others were rather evasive, but the majority thus diplomatically approached evinced sufficient interest to yield much encouragement. His wares had been brought to a good market and Old Dad's girl, rendered particularly attractive by a "dot" running up into the thousands, would find plenty of eager suitors. Now that the rumor of her eligibility was being privately circulated from mouth to mouth, any unnecessary delay would only render the affair more complicated.

He would report at once the success of his mission and urge his coconspirators to immediate action. It would sure be a fine sight to see these fellows lined up while that girl looked them over, deliberately making a choice. Suddenly his gaze rested on a young man, dejectedly hanging over the end of the bar, arguing with a bartender, who only shook his head impassively. Shelby moved along until he ranged up beside the fellow.

"What's your name?"

"Joe Macklin."

"They call you 'Kid,' don't they, 'round here?"

"Sure; mostly. What are yer drivin' at, anyhow?"

"Why, this. I got a ranch over on the Cottonwood, an' come in here to pick up a cow-hand. I got a half-breed, but I need another. That's where I stand."

"What'll it pay?"

"Forty dollars. You got a horse?"

"Well, the critter looks like one; turned out in Powell's corral, but I ain't got no money to pay fer his feed. Yer'll have ter blow me some coin."

"All right; here's ten and I'll pay Powell for the horse keep. You show up here sober at ten tomorrow, or else I'll leave you here; that's straight."

He strode away across the big crowded room and opened a door at the further end. Stepping across the threshold he closed the door behind him and faced McCarthy and the ex-preacher from Buffalo Gap, both of whom glanced up expectantly. Shelby leaned back against the wall and contemplated the two, chewing on the butt of a cigar.

"Well," he said bluntly, "the cards are stacked, gents; now, all you got to do is to play your hands."

"What do you mean? The boys are for it?"

"Hungry and snapping. I talked to quite a bunch. The one thing I'm afraid of is that some galoot may take a notion to hunt the girl up before we can get things into shape. That's why I hurried in here. We got to pull the affair tonight."

The preacher spread his hands, waving the suggestion aside.

"No, no; that really wouldn't be decent, so soon after the funeral. The poor girl must be given opportunity to mourn in peace."

"Shucks! It will give her something else to think about. Anyhow, that whole bunch will be after her by morning. What do you say, Mac?"

"I don't see no objections. The sooner it's cleaned up the better and there won't be no hard feelin's among the boys if we don't give 'em any time to mill around."

"You aim to run the bunch in on her with no notice?"

"No; that's up to the preacher. He invented this game and has got to take care of that end of it. I don't know nothin' 'bout females and don't aim to learn. We'll leave the girl to this gent from Buffalo Gap. Let him mosey right over and talk it out with her straight. He can put it sorter religious-like. Say we give him an hour an' then shoot the bunch over to the shack; that ought to be long enough for him to get the girl into the right frame of mind, if she's ever goin' to be. Maybe she'll take it all right and maybe she won't. You ready to try your luck, Dominie?"

"There is no question in my mind," he answered solemnly, "but that this is the proper method of procedure. I am therefore resigned to do my part. I shall undertake the mission in the high spirit of my calling."

"Well," said McCarthy who had been writing industriously, "here's the list of gazabos I've made out. There ain't no angels among 'em, but she sure ought to pull a prize out o' that bunch, if she looks 'em over."

The preacher got to his feet.

"'Tis as the Lord wills," he said gravely. "I go humbly forth to do my part."

CHAPTER III.

The Choice of the Lady.

Shelby, accompanied by "Red" Kelly, who had been unceremoniously routed out of bed after a hard day's work, were the last to join the company of selects crowded into Dan McCarthy's office. The majority were unshaven and roughly dressed, inclined to look on the whole affair as a lark, but there were serious faces among them and altogether, in Shelby's judgment as he looked them over, they were not a bad lot. He pushed his way through the throng and joined Mac, who stood with his back to the desk.

"That's all of them," he said quietly. "Now give 'em your spiel an' we'll see what comes of it."

McCarthy cleared his throat and removed the stump of cigar from between his teeth.

"Is the door shut tight? All right. What I've got to say is just fer you, boys, an' ain't ter be told 'round promiscuse. We started in ter give Ol' Dad Calkins a proper kind of a funeral an' sure pulled it off in some style, if I say it myself. Then we decided it was up to us to give the gurl a decent send-off an' this town chucked in about five hundred bucks an' never batted an eye. When that was over with, I sorter considered that Ponca had about done its share, but the preacher what come down from Buffalo Gap didn't think the same. He sed here was a poor girl left with no home an' no protection and that unless she was taken care of she'd maybe

"What I've Got to Say Is Just for You Boys."

drift ter h—l an' back, an' he argued that it was Ponca's business to see that she got started off right. His idee was that she ought ter be married afore she had any chance ter drift and git reckless like a lot o' them females."

There was an uneasy movement among the crowd and Shelby was amused at the varied expression upon the faces before him. McCarthy paused as though gathering himself together for his main effort.

"All I got ter say is when I thought it all over I concluded the preacher sure had it sized up about right. That girl is decent an' has been brought up decent, even if Ol' Dad was a rounder. He kept her straight an' giv' her a good education. Now what's goin' ter become of her when she's left alone? I told the preacher I'd do my share an' see to it that Ponca came up to the scratch. I naturally can't marry her myself, seeing as how I've got a wife and five kids already, but I'll do the next best thing—I'll cough up enough coin to give the fellow who will give her a chance ter make good. She's goin' ter have cash ter back her."

"How much?"

"What's the figure, Dan?"

"Two thousand, besides the five hundred already subscribed. That's more'n some o' you ducks ever saw."

"Say, Mac, what was the plan? Cut the cards for furst chance?"

"No; this is a sportin' proposition, with everyone havin' a fair show," explained the saloonkeeper. "We sorter picked you boys out as the most likely runts 'round town and intend ter line you up an' then let her pick out the one she takes a fancy to. It's only fair she has a chance to take the duffer she'd rather have."

There was a confused murmur of voices, some reckless, others muttering opposition, but it was evident the proposition rather appealed to the majority, who saw in it a chance for some unusual fun and excitement, with only a vague probability of being caught. Shelby slipped in a word.

"I'll bet five to one," he said quietly, "that she turns down the whole gang."

"Ter h—l she will! Not after she gets one glimpse o' Cowan. She'll think he owns the town."

"That's it, boys! Come on, you fellers; the bunch o' us don't run no risk. She'll copper on Cowan an' if she misses him them sideburns o' Archibald's will sure get her goat."

"Is this yere two thousand a sure thing?" It was Cowan who asked somewhat anxiously. "It ain't got no string tied to it?"

A yell greeted the question, punctuated with various remarks.

"Takin' it seriously, old man?"

"Goin' to start an opposition store?"

"I guarantee the sum," said McCarthy, "every last cent of it. Whoever the girl chooses, when he marries her, I'll pay him the money. That's flat an' you boys know whose talking."

There was a surging forward indicative of readiness. Evidently the proposition had caught on, and the bunch was eager to learn the result.

"Lead us to it, Mac," someone cried gayly, "gittin' married is my long suit."

"All right, boys," and McCarthy glanced at his watch. "I reckon the preacher ought ter have her ready for the delegation by this time. How about it, Tom?"

They moved slowly out, jostling each other, and indulging in horse play and rude jokes, none taking the affair seriously, but eager to learn how it would terminate.

McCarthy led the way, directly across the main street, and down the path past the dance hall, which by this time was in full blaze. Beyond they were plunged into darkness, but could see ahead of them the faint gleam of a light through the window of Calkins' shack. One or two sought to drop out, but Shelby collared them promptly, so that the entire bunch finally lined up behind McCarthy as he rapped on the closed door. The preacher opened it, his round face beaming benignantly in the glare of the single oil-lamp within, his bulk absolutely blocking the entrance. Beyond, those close at hand had a vague glimpse of the girl, who stood back against the wall, staring toward them with wide-open eyes. The Buffalo Gap man smiled blandly in welcome, impressed by the number of faces he saw, and stepped heavily aside.

"Come right in, gentlemen," he exclaimed, gesturing impressively with one hand, "our accommodations are not extensive, as you will perceive, yet ample, I trust. Just circle about the wall there—to the left, please. You have explained the circumstances, Mr. McCarthy?"

"Sure."

"Very well, then," his voice assuming a soothing tone. "We need waste no unnecessary time in preliminaries. I have very frankly laid the entire matter before the young lady and have finally convinced her of the righteousness of our purpose. Do I fitly express your state of mind, my child?"

She lifted her eyes slightly, a red flush burning on either cheek.

"I suppose so; that's what you told me to say."

Shelby, slipping in through the door last of all, had found a precarious seat on the sill of the window, where he had a full view of the room. His glance wandered appreciatingly along that solemn line of men backed up rigidly against the wall. They were an odd-looking bunch, crowded together under the glare of the oil-lamp, the most of them roughly dressed and unshaven and all of them visibly embarrassed and a little ashamed. The girl stood alone just before them and to Shelby she appeared younger and far better looking than in the afternoon. She would have been almost pretty but for the pathetic droop at the corners of her mouth and the rebellious, sullen look in her eyes. The preacher spread his hands in disapprobation of her remark.

"Oh, no, my dear," he protested. "I merely labored with you and urged this upon you as the better course. I even made it the subject of prayer that we might be divinely guided. It is now a matter entirely for your own decision."

She looked from him to the row of breathless men facing her, impatiently, her bosom rising and falling tumultously.

"And I've got to choose which one I'd rather marry?"

"Well, yes, that is the idea crudely expressed. Not that you are compelled in any way; only we feel it highly desirable; that—well, perhaps I may say, it is the will of God that you make some such choice."

Her eyes wandered up and down the shrinking line, resting calmly on face after face. If she felt any humor in the situation, there was no expression of it visible. She retained an appearance of sullen indifference, which was almost insolent.

"There ain't no more of 'em?"

"No; this is all."

"And I got to pick from these?"

The preacher nodded his head, as she glanced inquiringly in his direction. The pent-up breath came in a sigh from between her lips.

"Well, if I've got to, I have, I suppose, and, so far as I can see, it don't make no difference. I'll take the fel-

"I'll Take the Fellow Sittin' Over There."

low sittin' over there on the window; the one with the pink shirt."

Shelby was upon his feet instantly, so thoroughly startled by this sudden denouement as to scarcely find words.

"But say, hold on!" he exclaimed excitedly. "I don't belong to this bunch; I don't even live in Ponca. I just came along to help out."

The girl looked from face to face in bewilderment, which, judging from the expression of her eyes, was already verging on anger.

"What does the man mean?" she asked hurriedly of the preacher, who stood nearest. "You said I was to choose and now he refuses. Did this one not come pledged?"

"I am afraid not, my dear. I did not know, but he claims otherwise. He is not a Ponca man."

She fronted Shelby, standing straight, indignant, her eyes flashing coldly.

"And you won't marry me?"

"I—I can't—that's all," he stammered. "Oh, h—l! What did you want to pick me out for?"

The girl's eyes rested hard on his face, then wandered slowly down the line of the others and her lips set firmly.

"Well, then, this play has gone far enough," she said shortly. "I've been square with you all, but I ain't going to be made a fool of no longer. Now it is time for you gents to get out o' here. I pointed out the fellow I'd take an' there ain't another one o' the bunch I'll even look at. I ain't so crazy 'bout gettin' married; it's only because he said it was the will o' God that I have. Now I'm done. I picked my man an' there ain't nuthin' else here I'd touch with a pair of tongs, so you might as well save your breath and get out. I don't want to talk any more to any of you."

"But, my dear child—"

"Stop that! I'm no dear child; I'm a woman; an' this place is mine, even if it is a shack. You get right out o' here, the whole kit an' caboodle of you."

Shelby was the first to slide forth through the half-open door, glad enough to escape into the cool night air, his face burning as though on fire, his mind in a tumult of emotion. He had no sense of humor left, just an ill-defined feeling of mortification and regret. She had been justly indignant and he felt profoundly sorry for the part he had played. By heavens! She was some girl; no mere wishy-washy creature to be laughed at and ignored. He'd like to tell her so. Perhaps he would; there would be reaction after awhile, when those fellows were all gone. Her burst of anger would die away and she would shed tears of mortification. It would be a nice thing then if he could go back there all alone and comfort her; explain how it happened and show her how impossible it was for him to marry.

He could see the men plainly enough, outlined in the light, as they descended the steps one by one and then faded away in the darkness. They were a disconsolate, discomfited bunch, with downcast faces and silent lips. The preacher and McCarthy came last; the former still talking, his voice imploring, but evidently to no purpose, for something behind kept impelling him forward and even while he clung to the step for one final effort the door slammed in his face and Shelby heard the sharp snap of a lock.

"Well, I'll be d——d!" ejaculated Mac, his temper utterly giving way. "If she ain't a wildcat! Lord, but I'd sure pity the feller who did marry her. Come on, old buck, there is no use stayin' here. I wonder where Shelby went?"

"You an' her are in cahoots for that money."

Paradoxical Requiting.

"Why did you turn your late guest out?"

"Because he took me in."

"That was a rare feat."

"Sure, and it was also well done."—Baltimore American.

Thousands Have Kidney Trouble and Never Suspect It

Applicants for Insurance Often Rejected.

Judging from reports from druggists who are constantly in direct touch with the public, there is one preparation that has been very successful in overcoming these conditions. The mild and healing influence of Dr. Kilmer's Swamp-Root is soon realized. It stands the highest for its remarkable record of success.

An examining physician for one of the prominent Life Insurance Companies, in an interview on the subject, made the astonishing statement that one reason why so many applicants for insurance are rejected is because kidney trouble is so common to the American people, and the large majority of those whose applications are declined do not even suspect that they have the disease. It is on sale at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

Cause for Transfer.

Mincepin received the information that he was being transferred to another government department with rather bad grace.

"What's the cause?" he blustered. "Is it because I occasionally fall off to sleep?"

"It's because you snore, and that awakens the minister," came the reply.—La Balonette (Paris).

In District Court, December Term, 1920.
To All Whom It May Concern:

YOU ARE HEREBY NOTIFIED, That an instrument of writing purporting to be the last Will and Testament of Edward Charles Collins deceased, dated Dec. 24 1919, haveing been this day filed, opened and read, and Monday the 6th day of December, 1920 is fixed for hearing proof of same at the Court House in Garner, Iowa, before the District Court of said County or Clerk of said Court; and at 3:30 o'clock p. m. of the day above mentioned, all persons interested are hereby notified and required to appear, and show cause, if any they have, why said instrument should not be probated and allowed as and for the last Will and Testament of said deceased.

Dated at Garner. Iowa, October 11th, 1920.

(SEAL) A. E. Baumgartner
6-3 Clerk District Court

True.

"I understand that once he served a short term in prison. Yet he has redeemed himself and lived it down absolutely." "Well he would have lived it down, if it wasn't for the fools like you and me who continually keep digging it up for conversation purposes."

Washington Honored While Alive.

Washington was the only American whose birthday was publicly celebrated while he still lived. February 22 was quite widely observed while he was president.

ASSORTED CHIPS

Ingratitude is always ready to offer some kind of excuse.

Occasionally man gets rid of a bad habit by swapping it for a worse one.

Real self-sacrifice is to be a benefactor without praise or gratitude.

They are never alone who are accompanied with noble thoughts.—Sir Philip Sidney.

To the receptive soul the River of Life pauseth not, nor is diminished.—George Eliot.

A man who rides a hobby is in danger of riding rough shod over his acquaintances.

Experience is something one can seldom sell or even give away—in the form of advice.

Yes, Alfred, before marriage a woman is pensive, but after marriage she is expensive.

Why wouldn't the pink of propriety be an appropriate flower for our national emblem?

The Lord loveth a cheerful giver, and so does every man, woman and child on earth.

Most amiable man in the world can't be altogether so under a cross-examination in court.

Don't be hasty in jumping at a conclusion. You may not be able to collect your insurance.

If there are millions of people in a movement, the adherence of the foolish can't hurt it.

Fewer men would protest against drinking soda water if it weren't for the name of the stuff.

Although truth is stranger than fiction to many people, they don't seem to care for an introduction.

Youth decides everything by its prejudices; and learns painfully what a poor reasoner Judge Prejudice is.

CAST ASIDE THE TEMPTER

Reason Why Student Could Not Be Forced From the Pathway of Stern Honesty.

Perspiration rolled down his brow as he desperately chewed his pencil and stared vacantly down at the blank sheet of paper before him. It was the final examination of his senior year at college. To fail in it meant that he could not graduate; that he would be disgraced; that his whole life would be ruined. Shudders involuntarily passed through him as he realized that he was a rank failure.

The paper of the man on his left lay inivitingly before his eyes. But he did not glance at it. One could plainly see that he was struggling valiantly against temptation and, though the effort was heartrending, he would sacrifice everything for the sake of honor.

No, he would not copy from the man on his left. The man on his right knew more.—London Tit-Bits.

First Choice.

Down in Terre Haute there are two places of interest, to which every Terre Hautean takes his visiting friends—the Davis gardens and Highland Lawn cemetery. The other day a young society matron started to take her two visiting friends out for a drive. Now, her roadster was new and the way she drove it was exceedingly reckless. Near Main street she turned to the women and asked: "Now which place shall I take you first?"

The most frightened one turned to the other visitor: "Oh, tell her Davis gardens," she whispered, "I'm sure we'll get to the cemetery if she keeps up this sort of driving much farther."—Indianapolis News.

Paging Herself.

While a member of a college society, I was called upon one evening to act as recording secretary in the absence of the one elected to that office. After a short prayer, with which all programs were opened, I began to call the roll. When I came to my own name, which I called several times, I waited so long for the "here" or "present" response that a smile and titter ran around the hall. I then became conscious of what I was doing, and proceeded to finish the roll call in a hurry.—Chicago Tribune.

A Captious Critic.

B. L. T. criticizes a Transcript advertiser for saying that the furnished apartment to let is "ideal for man and wife or bride and groom." Why so fussy, old top? Everyone knows that a wedded pair are bride and groom until the honeymoon is over, and that often lasts quite a spell—until, in fact, she starts cooking or asks him for money.—Boston Transcript.

Sixty-Year Old Apple Tree.

In 1858 a Missouri farmer decided that he wanted to take Greeley's advice and go west to do a little growing up with the country. He took with him a tiny apple tree growing on his farm, to see what luck it might bring him. From all appearances he made a wise move, for the tree is still growing and showering apples all over the orchard each year.

Whaling in the Pacific.

South Georgia and the South Shetland islands in the South Pacific are the centers of a great whaling industry which can be increased to much larger dimensions. The elephant seal also abounds, though the fur seal is almost extinct.

Harmonious Episode.

"Did you notice any unanimity of sentiment during the earlier sessions of the convention?"

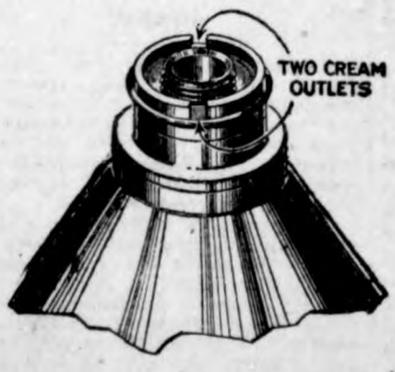
"On one point only," answered Senator Sorghum. "Everybody stood up when the band played 'The Star Spangled Banner.'"

The Primrose Cream Separator

Machine of One Purpose

BUTTER FAT is worth a lot of money today. To save every particle of it is the part of wise business economy. The **Primrose Cream Separator** is the standby of the wise dairyman.

The more you see of the **Primrose** Separator and the longer you use it, the better you will like it. It has but one purpose--to SEPARATE cream from milk. It saves ALL the cream. The escape of a little cream here and there may not strike you as such a serious matter but bunch those losses over a period of time and you will be astonished at the amount. That is where the **Primrose** separator protects your pocket-book.



The **Primrose** is the only cream separator that forces oil thru every bearing, not just to them. This and other special and exclusive features about the machine we would like to show you. Call and let us show you just what this means to you as a money saver. If not convenient to call, phone us, and we will call on you and bring a machine with us.

We have on hand a full line of TANK HEATERS, WOOD TANKS, STEEL TANKS, Hog Waterers.

MAKING WAR ON DISEASE MENACE

American Red Cross Announces Budget of $48,200,000 For Current Year.

NEW DISASTER RELIEF PLAN

Continuance of Heavy Work Abroad Deemed Necessary to Protect United States—$21,000,000 Less Than Last Year.

A program of relief and service toward which appropriations of $48,200,000 have been made has been outlined for the American Red Cross for the fiscal year, July 1, 1920, to July 1, 1921, according to official announcement by national headquarters of the organization at Washington. The figures for 1920-21 are $21,000,000 below those of 1919-20, in which $69,400,000 was spent.

Important among the items of the budget for the present year is the appropriation of $31,500,000 for relief in foreign lands, which includes $11,000,000 in purchased supplies on hand and not distributed.

Must Protect United States.

This will enable the American Red Cross to continue its humanitarian effort to aid stricken peoples to re-establish themselves, to fight the disease epidemics which threaten many countries and to efface largely the remaining traces of the blight left by the World War. It is regarded as social as well as physical sanitation on a large scale that will have a direct bearing on future conditions in America.

Central Europe, the chief sufferer from the conflict, today is facing another winter of famine, pestilence and ruin. Typhus decreased much during the summer months where last winter it had its greatest stronghold, but physicians who investigated the situation at the behest of the League of Red Cross Societies have given their unqualified opinion that this coming winter will see a recurrence on an unprecedented scale. The Red Cross feels it must continue preventive measures abroad to keep this and other deadly maladies from the United States.

Millions for Work at Home.

When the disease was sweeping Central Europe last winter the American Red Cross, with the aid of the governments of afflicted nations, undertook the fight against it. Hospitals were established wherever possible and food and clothing were distributed to the undernourished populations, who by reason of their undernourishment were easy prey to the epidemics. Where disorganization contributed last year to the great inroads made by the disease, by virtue of its knowledge of the disease and the presence of well established hospital centers, the American Red Cross this year will undertake the work with a new confidence.

Including the total of $11,000,000 in supplies left from the last fiscal year, the $31,500,000 is $21,000,000 less than the expenditures for 1919-20.

Appropriations for domestic activities total $16,700,000.

The largest item of this "home" budget is $7,800,000 for civilian relief work. This includes service and assistance for families of soldiers, sailors and marines, and work incidental to disaster. Of the total appropriation for civilian relief, $5,000,000 is held in reserve for the carrying out of actual disaster relief.

Reduced Overhead Expense.

The Red Cross invariably is the first thought of a community visited by calamity. With this in mind, it was determined by the Executive Committee in preparing the budget of 1919-20 to have a fixed reserve fund from which to draw in these instances.

For assistance to soldiers, sailors and marines in hospitals and in camps this year $1,900,000 has been set aside. Four million two hundred thousand dollars has been appropriated for improvement of health and prevention of disease throughout the United States during the current twelve months. The Red Cross is co-operating fully with the United States Health Service in this work and through its Junior Red Cross is doing much to spread among children the principles of sanitation. An appropriation of $1,000,000 has been made for developing the peace time program of the Red Cross by service to its chapters in all regions.

The appropriation of $48,200,000 is exclusive of the local expenditures of the 3,000 or more chapters.

Administration expenses this year will be $1,800,000. Last year they were $2,300,000.

Don't Wait

for workers to come and ask you for a renewal of your membership. Send in your dollar to the nearest local chapter of the American Red Cross. Welcome the opportunity and privilege of repledging your fellowship by promptly answering the

Another Royal Suggestion

Biscuits and Cinnamon Buns

From the NEW ROYAL COOK BOOK

BISCUIT! So tender they fairly melt in the mouth, and of such glorious flavor that the appetite is never satisfied. These biscuits anyone can make with Royal Baking Powder and these unusual recipes.

Biscuits

2 cups flour
4 teaspoons Royal Baking Powder
½ teaspoon salt
2 tablespoons shortening
¾ cup milk or half milk and half water

Sift together flour, baking powder and salt, add shortening and rub in very lightly; add liquid slowly; roll or pat on floured board to about one inch in thickness (handle as little as possible); cut with biscuit cutter. Bake in hot oven 15 to 20 minutes.

Royal Cinnamon Buns

2¼ cups flour
1 teaspoon salt
4 teaspoons Royal Baking Powder
2 tablespoons shortening
1 egg
½ cup water
½ cup sugar
2 teaspoons cinnamon
4 tablespoons seeded raisins

Sift 2 tablespoons of measured sugar with flour, salt and baking powder; rub shortening in lightly; add beaten egg to water and add slowly. Roll out ¼-inch thick on floured board; brush with melted butter, sprinkle with sugar, cinnamon and raisins. Roll as for jelly roll; cut into 1½-inch pieces, place with cut edges up on well-greased pan; sprinkle with a little sugar and cinnamon. Bake in moderate oven 30 to 35 minutes; remove from pan at once.

WAY TO MARKET COUNTRY HIDES

Producer Under Unnecessary Handicap Due to Roundabout Distribution Methods.

STUDY GRADES AND CLASSES

Practice of Farmer, Ranchman and Local Butcher Usually Needlessly Complex and Costly—Omit Immediate Agencies.

There is no magic formula for simplifying distribution. Improvement in methods can only come from careful study of the routes followed by each kind or class of commodity in its "long, long trail" from producer to consumer.

This fact is recognized by every student of present economic processes and likewise has been taken into account in the studies of marketing problems carried on by the bureau of markets, United States Department of Agriculture. One of these specific problems which the department's specialists have studied and regarding which they offer definite recommendations that involve a real saving to consumer and producer, has to do with the marketing of hides, a by-product from which almost every farmer can derive profit if he will give it proper attention.

Knowledge of Grades Needed.

The first need in the present situation is a familiarity on the part of the producer of country hides with the recognized grades and classes of hides and skins. Such an understanding will enable him to prepare and dispose of his products much more intelligently

Handling Hides in Large Quantities Permits Grading and Classifying Product So That It Can Be Sold to Best Advantage.

and profitably. But even if he should produce the best quality of hides and skins, the small producer is at a disadvantage compared with large producers like the packers, for example, because the latter handle large quantities of hides and can sort and grade them according to the demands of various tanners. The extremely scattered sources and the comparatively small individual production of country hides and skins makes it impossible for country producers to sort and classify their product in marketable lots.

Nevertheless, many features of the present methods of marketing country hides can be improved, since these methods support expensive nonessential profit-absorbing and speculating intermediaries which operate, possibly unintentionally but inevitably, to suppress this branch of the industry and to discourage the quality of workmanship displayed.

Distribution Systems.

Three principal methods of marketing domestic hides and skins prevail at present, as shown by studies made by the bureau of markets. The one in which the farmer, ranchman and local butcher usually participates is needlessly complex and costly. The hides which any one of these individuals has to sell are usually disposed of either to a junk dealer or a local buyer. These men, in turn, sell to a traveling buyer. The latter passes on his goods to the large hide dealer, and this dealer sells to a broker or a tanner's buyer, from whom the collected skins are finally disposed of to a tannery. Thus there is maintained a long, circuitous distribution system that adds needlessly to the final cost.

Contrast this system with the direct methods which the packers are able to employ. Each packer having a large assortment of hides is able to grade and classify his output so that he can dispose of it advantageously to a hide broker or a tanner's buyer direct. From these men the hides go direct to the tanner. Thus various intermediate agencies and their profits are eliminated.

So simple a distribution system is, of course, impossible for the small producer. However, experience has shown that the farmer and ranchman and the local butcher can dispense with the junk dealer and the traveling buyer, and in some cases, with the local dealers as intermediaries in the distribution system. When the producers negotiate directly with the large hide dealer, the latter sorts and classifies the hides sent in and is in a position to share with the producer a part of the saving which this simpler method makes possible. At the same time a lowering of prices for the final product will be the tendency, since distribution costs will be less. The use of a local dealer as intermediary between the producer and the large hide dealer in some cases is advisable, since he is in a position to do needed sorting and classifying.

Either of these simpler methods suggested for the producer of country hides—selling direct to the large dealer or through a local dealer—approaches more nearly the packer's methods now prevailing.

Obstacles to Overcome.

Such consignment marketing, however, presupposes mutual confidence and fair dealing by both producer and dealer and, unfortunately, this does not always exist. Another obstacle to the establishment of this method is the producer's preference for ready cash. Many producers prefer to accept any price obtainable from local buyers, such as general stores, produce dealers, junk collectors and traveling hide buyers rather than consign their products to distant car-lot dealers in central markets. The place that traveling buyers or agents occupy in an improved system of distribution is a matter on which one can be less specific, since opinions of the trade differ as to the practicability of traveling hide buyers or agents or large hide dealers.

Already country producers of hides are coming to see the saving that results from the simpler system briefly indicated here and are making contracts with large dealers in whom they have confidence and who in turn see that it is the part of good business to respect and foster this confidence. Farmers and others interested in putting this important side line on a more profitable basis are invited to communicate with the bureau of markets, United States Department of Agriculture, which will supply them with full information regarding the best methods of marketing hides, as well as instructions for proper skinning and curing.

DIFFICULT TASK TO IMPROVE OLD LAWNS

Reseeding and Fertilizing Will Assist Materially.

Loam or Humus Forms Suitable Medium for the Germination of the Seeds and Development of the Young Grass Plants.

To improve an old lawn is frequently more difficult than to make a new one. It is usually impracticable to attempt the improvement of turf that is very poor. Reasonably good turf, however, can be bettered materially by reseeding and fertilizing. Reseeding an old lawn should be done at the same time of the year as new seeding. South of New York it should be done in the early autumn. If the lawn is patchy the small areas should be scratched with steel rake or similar implement and dressed with a mixture of good loam, compost, or humus and the grass seed then sown. The loam or humus forms a suitable medium for the germination of the seeds and the development of the young grass plants. If the turf is thin over large areas, seeding can best be accomplished by a disk seeder, which cuts into the turf and deposits the seed. If a disk seeder is not available, some implement should be used that will loosen the soil but not tear the turf badly. After seeding, a dressing of loam or compost should be given and the area rolled lightly.

In the northern tier of states reseeding should be done early in the spring. At that time the soil is more open than later in the season and offers a better seed bed. Light rolling after seeding in the spring is usually beneficial.

Care should be taken when mowing or watering newly patched areas to avoid disturbing the young grass.

FEEDING STOCK IN TRANSIT

Shippers Who Patronize Roads Without Proper Facilities Must Make Own Arrangements.

When the distance is such that a live stock shipment to destination cannot be made within the time provided under the federal 28-hour law, animals must be unloaded, fed and watered. The railroads which have the heaviest long-distance shipments provide feed-in-transit stations for this purpose at intervals along their lines. Railroads which do a small live stock business often are without feed-in-transit stations, and the shipper patronizing these lines must make his own arrangements for feeding and watering.

GENERAL FARM NOTES

Let's grow more alfalfa.

* * *

Co-operation is a big factor in success.

* * *

Fall is the best time to plant those trees and shrubs.

* * *

A well-fertilized farm is like a high-bred horse—a joy to work with for it accomplishes its task so readily.

* * *

A general movement to do away with the unsightly billboard would improve the country landscape.

DYE RIGHT

Its Style.

"It certainly is a funny tale Ned tells about the time they had using signal guns in the fog."

"I should think they would have threaded their way better with a needle gun."

BOSCHEE'S SYRUP

Allays Irritation, Soothes and Heals Throat and Lung Inflammation.

The constant irritation of a cough keeps the delicate membrane of the throat and lungs in a congested condition. Boschee's Syrup has been a favorite household remedy for colds, coughs, bronchitis and especially for lung troubles, in thousands of homes all over the world, for the last fifty-four years, giving the patient a good night's rest, free from coughing, with easy expectoration in the morning. For sale everywhere.—Adv.

No Stops.

"Hear about old Gottrich and his new sun-dial?" asked the man with the red ears.

"Yes; and he had his electrician conceal an arc light in a balcony above the sun-dial, so it would work at night and on cloudy days."

Shave With Cuticura Soap

And double your razor efficiency as well as promote skin purity, skin comfort and skin health. No mug, no slimy soap, no germs, no waste, no irritation even when shaved twice daily. One soap for all uses—shaving, bathing and shampooing.—Adv.

BEADS PREFERRED TO BREAD

People of the Levant Set Great Stock on Colored Glass of Every Description.

Beads are more necessary than bread to the Levant. Men, women and children wear and carry beads to ward off ill luck. Even the horses and donkeys have strands of beads about their necks "to baffle the evil eye," and the long horns of the work oxen are decorated with blue-and-white beads to keep them from falling prey to diseases.

In Athens, Constantinople, Tiflis, Smyrna and other cities of the Levant men of all classes carry short strands of fidget beads, which they play with while walking in the street, riding in street cars and trains just as nervous men in the West finger their watch-chains. Bead shops abound everywhere in the larger cities and general stores and market stalls sell them in the smaller places. Peddlers hawk them in the streets everywhere.

Light-colored amber beads of large size are the latest thing in beads for women. Meerschaum beads are also popular, and for the moment plain beads of all sorts have displaced highly ornate carved beads of the type which Syrians produce in great quantities for exportation.—Washington Post.

Dyeing his hair will not lengthen a man's years.

Growing Children Thrive on Baker's Cocoa

Healthy children do everything strenuously; they play hard, and study hard, and they need nourishment and a lot of it, and not one of the popular beverages meets their requirements so well as good and well made cocoa.

EMPEROR FRIEND OF LOWLY

Napoleon III Declared to Have Had Genuine Regard for the Humbler of His Subjects.

The friendly feeling of Napoleon III for the toilers is dwelt upon by Agnes Carey in her "An Empress in Exile" in the Century magazine, and she gives as her authority Empress Eugenie, wife of the last of the emperors. "Whatever his failings toward her had been," the author says, "she professed a warm admiration of his love of hard work, his pluck and his great kindness of heart and thoughtfulness for every one. The emperor genuinely loved the poor and humble among his subjects, with no thought of policy. He was too good and generous for his people's understanding. Had he been tyrannical and made use of them and trampled them down like some other sovereigns, they would have behaved better toward him, she (Eugenie) said.

"Napoleon was a dreamer and spent much of his time to the serious thinking out of schemes for the benefit of his people, and all mankind. His life's ambition was to better their lot. He had great magnetism, especially with the working classes. The empress charmed every stranger, but the emperor was really more personally and deeply loved by his entourage than was his consort."

Often a benedict is but an ex-bachelor who was overtaken by misfortune and a widow.

The Full-bodied Flavor of POSTUM CEREAL

wins first place among table drinks with those who value health and comfort.

Boil Postum Cereal full fifteen minutes after boiling begins and the taste is delightful.

Costs less than coffee

MASON CITY'S SHOPPING CENTER

The Season's Climax in Selling

Women's Fur Trimmed Suits

Saturdays Group at - - **$48.89**

The most attractive offer we have made on Suits this season. If it were late in the season it would not seem so extraordinary, but to be prsented at this small price with a whole season ahead makes it the most extraordinary news we could print—the best individual offering that we could make, to womed who appreciate fine apparel and enjoy buying it at such exceptionally small cost.

Every woman in this community who could use another suit this season, will want to see this remarkable collection of clever models.

In the most wanted materials—the favored shades of blue and brown and smartly trimmed with a variety of different Furs.

Prices correspondingly low are now effective on Coats, Dresses and all Millinery. In fact our entire store is full of splendid economies on just the things you want during the EIGHT DAYS of PRICE DEPRESSION which began last Saturday and ends next Monday.

Very Tender Age.

Mrs. Bacon—Is this salad young?

Bridget—Yes, ma'am; so young that I had to wash and dress it.

Details Wanted.

"Ain't it strange the way Cassidy beats his wife?"

"O! dunno. How does he do it?"

Heard on a Car.

"Did you have a potato race at your club picnic?" "Potato race! Do you think we are a lot of millionaires?"

One Instance.

"The office should seek the man."

"It does in the case of the vice-presidency."

More Commercial Candor.

Rational Cause.

"What makes you have such low tastes?"

"High cost of living, my dear."

Very Much So.

"Hungary seems inclined to go back to the monarchy."

"She would find that her crowning mistake."

Camping.

"Yes. I'm going camping. Wouldn't trade my prospects for any other kind of vacations. I've never been camping before."

"I judge as much, seeing you're so set on going now."—Louisville Courier-Journal.

The Main Question.

"Should Lefthook or Plexus win that prize fight?"

"Lefthook should have the best of the argument."

"I am not interested in who has the best of the argument. How about the fight?"

Life.

The Morning After.

Wifey—It's your own fault. You ought to know better than to stay out till 2 o'clock with your good for nothing friends drinking ice cream soda.—Judge.

School Lunches.

Scientific tests have shown that the hot lunch served in the schools is a very big factor in developing the child.

Beatta Wellik, of Britt, was visiting in Klemme last Saturday.

Miss Sullivan spent Sunday with her folks at Iowa Falls.

Mr. N. L. Palmer was a business visitor at Garner last Friday between trains.

Mrs. Knoke came from Garner last Friday for a visit with her son, Louie.

Mr. and Mrs. Denny Conlan, of Goodell, were visiting in Klemme last Wednesday afternoon.

Mr. Chas. Olson, of Goodell, was a business caller in Klemme between trains last Wednesday.

Mrs. Walters came up from Belmond Saturday for a few days visit with Mrs. C. W. Wiles.

Miss Edna Katter of Garner was visiting Klemme friends and relatives last Wednesday.

The Misses Leoda and Edna Smith were Belmond visitors between trains Monday.

Walt Lau was a business visitor at the county seat burg Monday between trains.

M. O. Hocum returned last Thursday from a couple of days business trip to Des Moines.

Miss Faye Letch, of Goodell, was shopping with Klemme merchants Saturday.

Mrs. Otto Pringnitz returned from her visit of a few days at Belmond, Saturday.

Mrs. E. P. Hubbard and Mrs. Mat Avery, of Goodell, were Klemme callers and shoppers the fore part of lastt week between trains.

Henry Johnson, who has been working in the Pool Hall the past few months, has quit the position as he intends to leave soon for Chicago to spend the winter. Charlie White is now the man behind the counter at the local amusement parlor.

The show "Lena Rivers" at the Idle Hour theatre last Friday evening drew a good crowd and all seemed to enjoy the show.

The public schools at Whittemore, Iowa, burned to the ground a week or two ago. Last spring the Catholic school burned down there also. It looks as if a "fire bug" was trying to down education in that little town. The school is being held in the churches there now.

Philip Bock left last Friday for Chicago for an extended visit there and other points. We happen to know one of the "other points" is Pittsburg, Pa. Perhaps besides relatives there Phil has a "friend," and not a gntleman friend either.

Miss Annetta Schuldt returned on Saturday from Gladbrook, Iowa, where she went to spend her fall vacation as her school was closed for corn picking.

No, indeed, Luke, no woman can lace herself as tight as man can drink himself.

All things might come to the man who waits—if starvation didn't get there first.

When a woman's husband isn't appreciative she may take the lecture platform.

Necessity is the mother of invention; and discontent is the father of Ambition.

Nerve and ability both work in the same direction, but nerve usually gets there first.

Geniuses are admired by myriads who don't care for a personal acquaintance.

You can always have your own way if you are making money for the rest of the crowd.

Nothing in nature happens except according to natural laws. Nature has no room for miracles.

Nothing happens to the city man with the same rigid persistence that nothing happens to the village man.

To be always sensible is a great strain. One isn't sure that nature intended that. Nature herself isn't.

Max Willer left Monday for Omaha where he will work this winter. We believe Max has acquired the knowledge of how to lay bricks and is now following that trade. He worked in the city last winter and spring also and has practically made Omha his home.

Fred Henschen and William Bock went to Des Moines last week Tuesday and returned on Thursday. They say they had business to look after and we will take their word for it—but—did you notice by the papers that there were 9,000 school teachers having a convention there? Oh, well of course they wouldn't even look at one, nope!

Miss Warnock and Miss Byer who are teaching in the Gowrie, Iowa, consolidated schools, came Monday for a visit with Klemme friends. They visited the Klemme school as Miss Warnock taught here the past two years. Tuesday evening they left for Iowa Falls to spend the balance of their vacation as their school is closed for a week during corn picking time.

Ye Editor went to Kansas City, Mo., Friday evening and returned on Monday afternoon. It rained almost all the time we were there and the weather was about the same as here. We are still leading a "bachelor's" life as ou wife didn't come home with us but will visit her parents at Lncoln, Nebraska, before coming home.

Members of the train crew on an extra freight on this road found the body of a lifeless man near the railroad crossing at Alexander early last Friday morning. Upon investigation it proved to be Mr. Klinefelter, a prominent farmer living near there. At the coroner's inquest a suicide verdict was reached and the belief is that Mr. Klinefelter was temporarily deranged mentally.—Kanawha Reporter.

The Stars and Stripes.

When the American flag is draped on a flat surface the stars should appear in the upper left hand corner if the stripes are horizontal; in the upper right hand corner if the stripes are vertical.

August Baack believes in helping out the general good appearances of the town and with this in view and also to improve his residence on Main Street he has given the house two coats of nice paint, new shingles hav been put on the roof, a new back porch all enclosed has been built on and new storm windows and doors have also been added. Mr. and Mrs. Baack now have a very desirable home.

The Main street of Garner is paved. The south end of the concrete is about three blocks from the cemetery road, and perhaps later on, this will be hard surfaced. The paving runs as far north as the Milwaukee tracks. In the spring this will be extended to the corner north of the tracks. Positively the finest street to be found is our Main "drag." The parking from the court house south makes a splendid looking job, and the sixty-eight foot downtown paving with a twenty foot sidewalk is surely a hummer. Watch us blossom out in the spring.—Democrat.

The Hancock County Bankers Association met at the First National Bank Thursday evening to perfect an organization to cope with the situation regarding bank robbers. Every bank in the county was represented. C. W. Erwin was elected president of the organization, Isaac Sweigard vice-president and John Vrba secretary-treasurer. A resolution was passed that a "Reward of $1000 will be paid for the apprehension, dead or alive, of any person burglarizing or attempting to burglarize any bank in Hancock county." Some seventy counties of the state have already formed similar organizations, and in most counties the sheriff and county attorney have organized vigilance committees.—Garner Signal.

There is a small boy in the Second ward who will probably never forget an amusing incident that happened Sunday afternoon. He with a half dozen other lads were riding into town on a motor truck. When the truck reached a point opposite the youngster's home he tried to alight without having the driver slow down. His waist caught on the end board of the truck body, and tore the fastenings of his trousers loose, with the result that the latter came down, exposing the whole nether end of his anatomy. Finally the little fellow jerked himsef off the car, and rolled over and over on the pavement. Fortunately he was not hurt, and the spectators were free to shout with laughter as he hastily gathered up his naughty clothes, and, holding them tightly with both hands, ran home.—Algona Advance.

A Good Trader.

"Of course I realize from all I have said that you are the smoothest business man who ever hit this town," the quiet chap observed when the salesman slowed down for want of breath, "but there are some other things. Now, for instance, I'll sell you an article for a dollar that I paid five for and still make a profit on the deal."

"Can't be done. I'll take you!" the salesman responded briskly, as he handed over a dollar.

Whereupon the quiet chap gave him a $5 meal ticket that had been punched for all but ten cents of its value.

Penalty of Borrowing.

Just before leaving for a day's fishing I telephoned a friend of mine and asked her if she would let me take her fishing scarf. She said she would. When my escort arrived, not wanting him to know I borrowed clothes, I said, "We'll have to call at Peggy's to get my scarf." When we rang the bell her small sister came to the door and saw the scarf on her arm and said, "Mother says she's glad to let you take it, but please be careful and don't lose it."—Exchange.

A Student of Steam Rollers.

"Charley, dear," said young Mrs. Torkins, "what do they want with a steam roller in a convention?"

"The term is only a figure of speech."

"I know that. But is it a good figure of speech? All the steam rollers I ever saw at work made a terrific amount of noise, but were in reality very easy to sidestep."

His One Chance.

"I believe," said the impatient man as he put aside the telephone, "I'll go fishing."

"Didn't know you care for fishing."

"I don't ordinarily. But it's the only chance I have of finding myself at the end of a line that isn't busy."—Boston Transcript.

Gildner Bros. & Johnson's Sale Goes Merrily On!

AT GARNER, IOWA

People read advertiseing that's why we advertise. We're not using a big lot of circus stuff to attract your attention. The average intelligent man is not impressed with the headlines and noise that he sometimes receives—but is more interested in values HE RECEIVES FOR HIS MONEY. No doubt you will receive some of those whooping big circulars one of these days. When you do, read it thoroughly and then just think it over. We feel that you will come to this conclusion. I can buy cheaper at home for the reason our home merchants do not have the enormous rents, electric light bills, clerk hire and general over head expenses that is prevalent in the larger places and necessarily is and and must be lower in price. WE KNOW WE ARE AND WANT TO CONVINCE YOU.

Hart Schaffner & Marx Suits and Overcoats are selling great and as our stock is exceptionally large this season, we are going to continue this value giving indefinitely.

Remember 20 Per Cent Off on All Suits and Overcoats.

ILL HELP FARMERS

Board Promises to Be Good

Moines, Iowa, Nov. 11—Fi- support of Iowa's striking has been pledged by the fed- erve board and by city bank- the state, according to M. V. on, Jr., state banking com- er, who returned yesterday meeting in Chicago with fed- serve officials, member bank- d state commissioners of the eventh district.

he strike were to last for six " said Mr. Henderson, "the would be financed. As a of fact, though, it will not o last for more than ninety ecause in that time the prices forced up to somewhere near oper level."

75 Per Cent to Farmers

he present time, according to nking commissioner, all of the the country banks have loaned s gone to the farmers. The banks have got practically their funds from the federal , and Mr. Henderson's esti- that 75 per cent of the money banks have loaned during the ree or four months has gone smaller banks, who, in turn, aned it to the farmers. In his ion, a farmer who makes a able demand will be refused e strike is already sufficiently d to assure its continuation s object is accomplished.

ions of the officials and bank- thered in Chicago, according to enderson, are that the present is the most critical one the has faced financially in but that, at the end of thirty here should be a decided ease- These opinions are based on ct that pork is now bringing high price and that hogs are ing to be shipped.

See Further Easement

le, however, Mr. Henderson re not bringing as high prices should, but, with the general ent of live stock shipments of are also looked for. Practically ment of grains is expected for l months.

easement is further assured by t that transportation facilities atly improved. Mr. Henderson es that foty per cent of the sked for are supplied at pres- whereas, he says, a year ago bout ten per cent could be fur- .

we are getting forty per cent cars asked for as I think we hat means that about seventy- r eighty per cent of the cars ly needed are being secured," r. Henderson. "Shippers during ast year or two have acquired abit of asking for about twice umber actually needed in order ve a chance of getting a fair ntage of those they do require."

HIS WEEK'S BIRTH LIST

following births near Klemme been reported to us this week: and Mrs. Emil Pringnitz are ppy parents of a fine baby girl rrived at their place last Friday

and Mrs. Pat Lyman are the parents of a baby girl who ar- at their house last Friday night.

big bouncing baby son arrived e home of Mr. and Mrs. Henry r Sunday morning.

and Mrs. Earl Quintus are re- g over the arival of a baby boy came to live with them last day.

It's A Boy!

Editor and Mrs. Jorgenson are re- g over the arrival of a baby boy, t Kansas City, Mo., Wednesday, mber 17. He's a howling nine der and his name is R. A. Junior.

FORD TIPS OVER

k Woods started to town the day in his flivver and he got to Billie Suckow place when the threw a fit and for a time acted a bucking broncho. Jack stayed and managed to come out on He examined the critter and d it had a busted stearing gear h caused the accident. No one hurt except the Ford. Jack left remains and came to town and ht a new one as he figured he d a new one any way and didn't to bother fixing the old car up.

POPULAR YOUNG KLEMME PEOPLE MARRIED

Howard Doyle and Miss Edna Smith United In Marriage

"The Little Brown Church In the Vale" near Nashua, Iowa, was the scene of another wedding last Wednesday, November 10th, when Miss Edna Smith and Mr. Howard Doyle, both of this place, were united in the holy bonds of matrimony by the Rev. Carlson, of Charles City. The ceremony took place at two thirty o'clock in the afternoon.

Immediately after the cermony the Bride and Groom left for Alta Vista for a visit with the groom's relatives and from there to Waterloo and other points on a honeymoon trip. They returned to Klemme Monday and began housekeeping in the rooms over the Frank Gruetzmacher harness store.

Both of the young people are well known in Klemme and have a host of frinds who wish them the very best in life. Mrs. Doyle is a daughter of Mrs. Mille Smith of this city and is a very fine young lady who will make an ideal home keeper. The groom is also well known here and is a young man of high ambitions. He holds a good position with the Northern Lumber Co.

The Times joins with the many friends of the happy young couple in wishing them happiness and success.

LARSENS IMPROVE MEAT MARKET

Install New Machine

We stepped into the Klemme Meat Market the other day and noted quite a change in the appearance of the place. Mr. Larsen has had the interior repainted thru-out with a pearl gray finish. The new paint greatly adds to the appearance of the up to date meat shop. Besides improving the appearance of the meat market Mr. Larsen has also purchased a new meat slicing machine of the very latest type. The new machine which has just been installed is a U. S. Slicing Machine, one of the largest models which has all the latest improvements. The machine has safety devices, is entirely sanitary in every way. The old machine has been discarded. The Klemme Meat Market is one of the best equipped and cleanest shops in this part of the country. The same also applies to their shop at Garner.

INSTALLING NEW FIRE ALARM

The steel tower for the new electric siren fire alarm which is being given to Belmond by Emil Bock, has been erected the past two days and the new alarm will shortly be in working order. The new alarm was tied out as soon as it arrived and was found all right. It was not removed from its box and was tried out in the pump station but at that was alarm enough to arouse many people of the town. It will be a great improvement over the old bell. The new tower is just beside the old one back of the city hall and the old one will doubtless be taken down and the bell hung on the new tower.—Belmond Herald-Press.

QUICK JUSTICE

Stealing a Ford automobile early Sunday morning, October 17th; arrested at Sioux City Tuesday; returned to Humboldt on Wednesday; pleading guilty and receiving their sentence of five years in the penitentiary Thursday, and arriving in the penitentiary Monday of the next week to begin their sentence is quick work. But this all happened to Alfred Humble and Stirling Vaughen, aged twenty-one and eighteen and claiming that their homes were in Missouri and Kentucky. The machine was taken from a farmer living two miles this side of Gilmore City, as it stood in his yard. The boys attempted to sell the car at Sioux City, but their actions aroused suspicions—Belmond Independent.

FERDINAND JENSEN MARRIED

Ferdinand Jensen ,a tiler who formerly worked around Klemme, was married recently at Seattle, Washington. We did not get the name of the young lady who became his wife. They have gone to housekeeping at Garner.

THE AMERICAN RED CROSS IN PEACE TIME

Eastern Europe

Americans who contribute to the Red Cross would feel amply repaid for their generosity if they could see what it means to hundreds of thousands of war weary sufferers in the Balkans. Here is a widowed Roumanian mother with her five children just after a visit to a Red Cross relief station. All are barefoot and the boy at the left is wearing clothes made of scraps from the battlefields. They have just received winter clothing, food and condensed milk for the baby. Similar work is being done for Russian refugees driven from home.

HOW

MOTHERS NAMED THE BABIES OF ANCIENT BABYLON. —Whenever an auspicious event occurred either before or about the time a baby was born, Babylonian parents were prompted to call him or her by that name or some cognomen similar to it. Archeologists bless these parents; by means of the children's names in birth records and on tombstones, they discover historical events of which they had before no records.

In like manner, clay documents of a certain period show that newborn children were being given, in large numbers, names alike, one or two names being the favorites. They were being called in honor of some king or some man who had accomplished much about the time they were born.

Presto! the scholars look up to him! They may have to dig through thousands of tablets and spend years over the task before they come across his name or find material to reconstruct his story. But eventually documents concerning him will be dug out of the earth.

It is as though our United States were buried beneath the soil of countless centuries, and men began to dig for birth registers. The number of George Washingtons they would find at one period, and of Abraham Lincolns at another!

One result of the late war in Europe was the naming of babies "Tankie" in England, after the advent of the tanks. Surely, Babylonia's dirt can yield no more eccentric name for us!

BY ARRANGEMENT OF HAIR

How Women of Japan Signify to Their Admirers Their Inclination as to Marriage.

Wouldn't it be helpful if one could tell at a glance whether the fair feminine person who has caught our eye is a maiden willing to wed, a widow who is inconsolable, or one who is willing to be consoled? They have it arranged that way in Japan.

The Japanese women have certain ways of arranging the hair to indicate their state and feelings, and as they do not wear hats, all who run may read. Girls who would wed arrange the hair in front in the form of a fan or butterfly, and adorn it with silver or colored ornaments. Widows who are looking for second husbands fasten their hair at the back of the head by means of tortoiseshell pins, and widows who are resolved to remain faithful to their departed spouses cut their hair short and wear no ornaments in it.

How Ants "Clean House."

The late Professor Garner writes in the Century Magazine about a novel way of exterminating vermin in Central Africa. This was simply to welcome into his house one of the hordes of ants that are always on the move in that country. "When the drivers came," he says, "they worked with the thoroughness of a vacuum cleaner. They swarmed up the walls and roof into every cranny, killing and eating any kind of vermin they found there. Then for a short time at least we would be absolutely free of house pests of every description. When, for any reason, we did not want to receive the house-cleaners, we had the native servants drive them back with torches."

How Wind Built Icebergs.

Two picturesque "icebergs" were formed on the northwest shore of Green bay, last spring, after continued strong winds, breaking the rotting ice in the bay, had pushed it bodily toward the coast. For several miles along the shore of the upper bay the cakes were piled high by the steady pressure. Only at one point, however, about six miles south of Escanaba, were the bergs erected. Here the piled-up cakes mounted higher and higher, until in one instance they built an ice mound 50 or 60 feet high. A neighboring pile measured about ten feet shorter. The bayward sides of the "bergs" were practically perpendicular; the lea sides sloped at about 45 degrees. These sloping sides were composed of a mass of shattered, iridescent chips, produced by the grinding of the cakes.—Popular Mechanics Magazine.

How Fish Foretell Storms.

Codfish have been known to actually take in ballast before a storm. Some time ago a number of cod were caught off the coast of Newfoundland, 12 hours before a severe gale. It was found that all of them had swallowed stones, some of which weighed three or four ounces. Sea urchins will try and wiggle under the mud, or at least cover themselves with sand before a storm, while dolphins never toss or sport about in a rough sea, unless a change for the better is noted. All sailors know that a storm is pending when numbers of stormy petrel flock in the wake of a vessel.

How Scurvy Is Brought On.

Experiments by Doctors Givens and Hoffmann in the research laboratories of the Western Pennsylvania hospital, Pittsburgh, prove conclusively that scurvy is not a bacterial disease, but due solely to deficiencies in diet.

DEALING IN DAYLIGHT STOCK

Beginners in Grand Old Game of Speculation Made Somewhat Humorous Selection.

Two young pretenders of high school age have been noticeable in a local broker's office recently, taking an interest in everything financial.

It had been explained that X on the ticker tape was the abbreviation for United States steel. GQ stood for Great Northern ore, and the figure following was the price at which the stock was selling at that moment.

They had been watching the ticker for some time, when PM was flashed on the tape, along with several hundred other quotations, and they immediately began to hunt through the guide card for the meaning of PM.

"Going to buy something?" inquired the board marker.

"Yep, five shares of this PM stock. I see it's quoted at $1 a share."

"Oh," said the board marker, glancing at the clock, which was then pointing to one o'clock. "I see you are taking stock in the afternoon."—Indianapolis News.

DUCK SHOOTING HAS BEEN GOOD THE PAST WEEK

Klemme hunters have taken advantage of the excellent duck shooting the past week which was brought on by the cold, snappy weather. Hunters say the ducks are flying by the hundreds this year and shooting is very good. Nearly every enthusiast of the sport brings in a good mess of ducks ach time he goes out. We believe Art Kuck perhaps holds the rcord for the number bagged by Klemme hunters as he has brought them in in large numbers, chiefly Mallards. Other hunters also report good hunting.

RED CROSS DRIVE

Why You Should Continue Membership Ln Red Cross

Because it continues to serve the many boys who are in hospitals.

Because it has learned to use its splendid organization of war time activities to the present day needs.

Because it is supporting a County Health Nurse who has since the first of September, visited almost every school in the county.

Has Much Work To D o

Th end of the war did not end the service of the Red Cross and it is as important that this organization be kept now as before. Large numbers of ex-service men who are suffering from their service in the army, and their families, need assistance and the Red Cross is the one organization which can aid in this work. Some of the things it is doing are as follows:

American Army Occupation

Standing by our army of occupation on the Rhine, where nearly 18,000 American soldiers still stand guard over a conquered and penalized foe.

Standing by the army at home which on July 1st amounted to 225,-000 officers and men, and the marine corps which on the same date mustered 22,000.

Home Service Work

Carrying on home service work, acting as advisor and friend of thousands of families still in need of guidance and advice. Facing the stupendous health problems of the United States with a view to lending a hand in the fight against disease and unnecessary deaths. Thousands of babies die annually from preventable causes. The training and providing of public health nurse permanently assigned to communities as instructors and guides.

Each Year Armistice Day

Each year upon the fitting period of Armistice Day, a roll call will be conducted nationally for the purpose of securing the continued support and allegiance of the people, as expressed through memberships. "A heart and a dollar is all you need" is still a potent slogan. Annual memberships are one dollar, contributing memberships $5 and sustaining memberships $10. All but 50 cents of each membership is retained for local Red Cross work, the remainder going to the national organization.

Membership will be received at the following places from now until Nov. 25th: Garner Book Store; First National Bank, Garner; Farmers Nationl Bank, Garner; First National Bank, Klemme; State Savings Bank, Klemme; Bank of Miller, Miller, Iowa; and Bank of Hayfield. Go to any one of these places and leave your membership fee of one dollar.

J. W. K[illegible]ler, Chairman
Garner Chapter, A. R. C.

CADDOCK CONSENTS TO WRESTLE HEDMER MYRE; GARNER WANTS GO

The Garner American Legion, having won the consent of Earl Caddock, former world's mat champion, to wrestle Helmer Myre, Mason City's star and claimant of the world's title in the light heavyweight ranks, is making a strong bid for the match which will bring the two Iowa stars together.

Dr. G. A. Bemis, who promoted the Billy Schrober-Myre match at Garner last August, is heading the group of Legion men who are soliciting donations from Garner business men in an effort to raise a purse lage enough to meet the demands of the two wrestlers. Word reaching here is that Dr. Bemis and his associates are meeting with big success and it looks as if the Hancock county town might land the big grapple.—Forest City Republican

STILL IN CORN FIELD

Farmer Finds Booze Mill In Middle Of Field

Omaha Neb.,—Evidence that an illicit whisky manufacturer operating near Council Bluffs had set up a still in the center of a farmer's cornfield, without the latter's knowledge, and has used up an acre of corn before he stopped work, came to light here today.

The farmer, I. Peary, did not discover his loss until he started husking. In the progress of his work he came across a section of the field where all the corn had already been husked. The still, full of cold mash, remained where its owner had left it. Around it the ground was covered with shelled corn.

KAISER RESTING EASY

Believes That He Is Safe From Harm

Doorn, Holland.—Two years ago yesterday William Hohenzollern arrived at the Dutch frontier, a refugee Emperor. Today he is leading in this little village the life of a Dutch country gentleman, doing just about as he pleases and going almost where he desires, about the countryside, so long as he stays within the territorial limits prescribed by the Dutch government.

The Associated Press correspondent has been told by those in close touch with the former Emperor that during the past few months William has found much contentment in the life on his new estate here. He is said to feel certain that no further demands for his surrender will be made upon the Holland government.

NEXT NUMBER OF LYCEUM COURSE

Hettie Jane Dunaway will appear at the Idle Hour Theatre next Tuesday evening, Nov. 22, in "Just Plain Judy." Don't miss this number as it will be one of the best on the entire course. Miss Dunaway is an excellent reader and will keep you entertained thruout the entire program with her wonderful selections. She makes several costume changes during her program. Miss Dunaway comes highly recommended as an entertainer. See the ad in this issue.

Mr. and Mrs. Chris Gram drove to Mason City Tuesday.

A. D. Gimer and family autoed to Mason City Tuesday.

Prof. Collins went to Eldora Friday evening to spend Sunday with his family. He returned Monday morning in time for school.

The Misses Ebert and Sullivan, teachers in the Klemme schools, went to Mason City Friday for an over Sunday visit with friends.

JOY WHITE—ED. HUGHES

Married at Torrington, Wyoming. Hughes Was With Bamman Bros. Last Summer

Garner friends have been informed of the marriage of Miss Joy White daughter of Mr. and Mrs. A. D. White of Goodell, and Ed. Hughes, brother of John Hughes of this place, and for a long term of years a resident of Goodell. The ceremony took place at Torrington, Wyoming. During the early summer, Mr. Hughes was employed in Bamman Brothers Garage. Both these young people are well known in Hancock county. The Democrat extends congratulations—Democrat.

CHARIVARI MONDAY NIGHT

All the old tin cans, horns, pails and even a grind organ were resurrected Monday night to give the newly weds, Mr. and Mrs. Howard Doyle, a good rousing welcome. The charivari gang and their high class tin music rendered the air for fifteen minutes before the couple could be coaxed to venture forth. Howard, with a box of good smokes, finally appeared on the scene and the music stopped and congratulations were in order. The Charivari Gang are all 'ond up now and WHO IS NEXT?

SKATING IS EXCELLENT NOW

Although it is vey early in the season for skating, nevertheless, skating now is excellent. The winter sport is especially good at the Clark Bredbenner pond west of Klemme a quarter mile down between the sand pit hills. The pond is a good sized one and the ice is frozen over quite thick now. The ice is smooth as glass and being between the hills the wind does not strike the skaters. The boys have rigged up a pole in the middle of the pond and on this have hung a big gas light os that the entire pond is well lighted. Besides regular skating the boys have started various games as "cross tag," etc. The river has not frozen over yet but the ponds about here furnish the best skating in years.

NEW BRITT SCHOOL OCCUPIED

The new Britt school house which has been under construction the past year was thrown open to the pupils and teachers last week Tuesday. The new Britt school is one of the finest schools in this part of the state and the people of Britt have reason to be proud of their educational institutions..

G. O. P. VICTORY IS AN AVALANCHE

Sweeps Everything Before It in North, East and West.

BREAKS INTO SOLID SOUTH

Harding Wins 404 Electoral Votes in 37 States—Carries Tennessee, Oklahoma, Arizona and New Mexico—Big Gains in Congress.

By JOHN DICKINSON SHERMAN.

Here is the story of the election from an airplane:

Electoral vote—Harding, 404 in 37 states; Cox, 127 in 11 states.

Senate—Republicans, 59; Democrats, 37; as against 49 Republicans and 47 Democrats in Sixty-sixth congress.

House—Republicans, 285; Democrats, 148; Independent Prohibitionist, 1; Socialist, 1; as against 240 Republicans, 191 Democrats, 2 Independents, 1 Prohibitionist and 1 Socialist in Sixty-sixth congress.

In comment, the household word avalanche seems the handiest. The Republican avalanche began at the Canadian border, from Maine to Washington, and swept the country clean clear to Mason and Dixon's line and broke the Solid South.

The Republican avalanche swept Tennessee, Oklahoma, New Mexico and Arizona. In Kentucky Richard J. Ernst, Republican, is elected to the senate over J. C. W. Beckham. For the first time in history several counties in Alabama went Republican, and several precincts in the sixth Mississippi district did the same almost unbelievable thing. Harding carried St. Petersburg, Orlando, Daytona and other towns in Florida; nine counties in northern Georgia and a dozen parishes in the sugar belt of Louisiana. The G. O. P. picked up a congressman in Texas; Harry M. Wurzback defeated Carlos Bee, brother-in-law of Postmaster General Burleson.

President-elect Harding, whatever else he does, is going to take a rest. He's already off on a real vacation of a month. His immediate destination is Point Isabel, Tex., via San Antonio and Brownsville. Point Isabel is on the Gulf, 20 miles from Brownsville and six miles from the Mexican line. it has a population of 100 whites and 150 Mexicans. There golf, bathing, fishing and hunting are right at hand. Col. F. E. Scobey, now of San Antonio and formerly sheriff of Marion county, Ohio, made him promise to go, win or lose, the night he was nominated. R. B. Creager, a San Antonio banker, who seconded his nomination at Chicago, has turned over his cottage. Of course, the poor man will be guarded by secret service operatives and pestered by newspaper men and photographers, but he will have a goodly company of golf buddies and other intimate friends along. And politics and visitors will be barred.

Mr. Harding is planning to go to the Canal Zone, after a fortnight at Point Isabel. He has been preaching that the new American merchant marine should pass free through the Panama canal and he wants first-hand information on conditions. Return is set for December 6. He plans to resign his seat as senator January 10, when Governor-elect Davis of Ohio will be inaugurated and Senator-elect Willis will be appointed Mr. Harding's successor.

Alfred E. Smith, Democratic governor of New York, earned a new title in the election—"Miracle Man of American Politics." Why, he almost reelected himself in the face of a Harding majority of more than a million. The presidential vote was about this: Harding, 1,842,222; Cox, 782,693. The gubernatorial vote was about this: Miller, 1,319,586; Smith, 1,256,311. Republicans and Democrats alike say the feat is unprecedented. "Al," as everybody calls him, has come up from an orphan newsboy. Now he is spoken of as the logical candidate for the presidency in 1924.

By-products of the election are many and interesting. Harding shatters a tradition that no sitting senator can be elevated to the White House. Coolidge, who violates every principle of politics laid down by the practical politicians, wins his seventeenth successive candidacy.

Oklahoma elects Alice M. Robertson of Muskogee, Republican, aged sixty-six, to congress; she went to Indian Territory by prairie schooner, has taught in Indian schools most of her life, would let no soldier or sailor pay in her cafeteria and is a heaven-born cook. Harry T. Burn, Republican member of the Tennessee legislature who cast the deciding vote for the suffrage amendment ratification, is reelected by a plurality of about 100, after a bitter fight. Jailer Festus Whitaker of Letcher county, Kentucky, is elected county judge; he made his campaign from his own jail, where he was confined because of a fight over politics last summer.

California overwhelmingly indorses the anti-alien land law recently adopted by the state legislature. Massachusetts approves the act to legalize the manufacture and sale of beer and wines of 2.75 alcoholic content. Wisconsin approves 2.5 per cent beer. New York approves a bonus for soldiers by the issue of bonds not to exceed $45,000,000.

Townley Candidates Beaten.

Crushing defeats for A. C. Townley in seven Northwest states are shown in practically complete returns. Minnesota, South Dakota, Montana, Nebraska, Idaho, Washington and Colorado buried the Townley candidates under an avalanche of Republican votes. In not one of the states did the Nonpartisans succeed in winning an important post.

In two other northwestern states—North Dakota and Wisconsin—Nonpartisan victories are only partial.

IOWA ASSEMBLY HEAVILY G. O. P.

Republican Majority in State Is Still Growing

Returns from 64 of the 99 counties in the state show that 81 Republicans and four Democrats were elected as members of the next house of the Iowa Legislature. There were 29 state senatorial districts in which senators were chosen. Thus far 17 have reported that Republican senators had been elected. No Democrats have been reported as having been elected to the Senate. These results indicate that the next Iowa Legislature will be more overwhelmingly Republican than ever before in recent years.

N. E. KENDALL

Successful State Candidates.

The candidates on the republican state ticket follows:

Governor N. E. Kendall, of Albia.

Lieutenant governor—John Hammill of Britt.

Secretary of state—Walter C. Ramsay of Belmond.

Auditor of state—Glen C. Haynes of Mason City.

Treasurer—W. J. Burbank of Waterloo.

Attorney general—Ben J. Gibson of Corning.

Railroad commissioner—Fred P. Woodruff of Knoxville.

Judges of the Supreme court—Silas M. Weaver of Iowa Falls, Lawrence De Graff of Des Moines, F. F. Faville of Fort Dodge. Thomas Arthur of Logan.

Iowa Congressmen Republican

It is clear that all republican candidates for congress have been elected. They are, by districts:

First—W. F. Kopf, Mount Pleasant.

Second—H. E. Hull, Williamsburg.

Third—Burton E. Sweet, Waverly.

Fourth—G. N. Haugen, Northwood.

Fifth—James W. Good, Cedar Rapids.

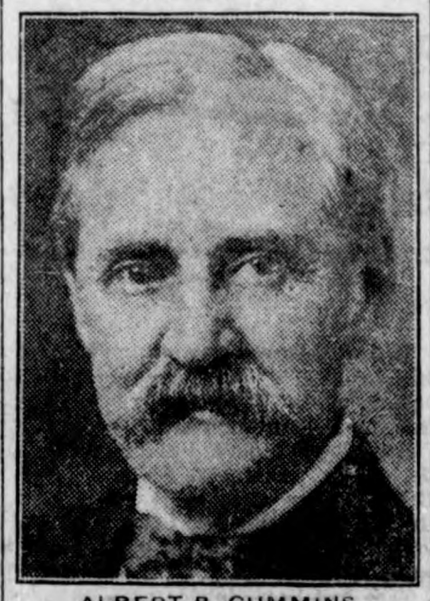
Sixth—C. W. Ramseyer, Bloomfield.

Seventh—C. C. Dowell, Des Moines.

Eighth—H. M. Towner, Corning.

Ninth—W. R. Green, Council Bluffs.

Tenth—W. B. Boies, Sheldon.



ALBERT B. CUMMINS

The re-election of Sen. A. B. Cummins over his democratic apponent is Certain and his majority will be one of the largest ever given him.

Assembly Elections

H. A. Darting of Glenwood, Lloyd Thureton of Osceola, W. S. Baird of Council Bluffs, J. K. Hale of Anamosa, W. G. Haskell of Cedar Rapids, P. C. Holdoegel of Rockwell City, Charles Olson of Beaver, B. M. Stoddard of Sloan, O. L. Mead of Shell Rock, J. M. Slosson of Northwood, J. E. Wichman of Garner, E. H. Campbell of Battle Creek, H. C. Adams of Algona and B. C. Abben, Jr., of Little Rock are known to have been elected.

First "Scoop" Not So Much.

The first big "scoop" in American journalism was "pulled off" by the News-Letter in June, 1704, when a reporter was sent to write a "story" covering the execution of six pirates on the Charles river. This pioneer reporter turned in an excellent story, and it filled nearly half of one issue of the paper. The feature of the article, however, was the prayer uttered by a minister on the scaffold, which was reproduced "as near as could be taken in writing in the great crowd."—Fresno (Cal.) Herald.

IS FAVORED LAND

Western Canada Country of Great Possibilities.

Soil, Climate, and Weather Conditions All Factors in the Production of Unrivaled Fruit, Vegetables and Flowers as Well as Grain.

As recently as last month—to be correct, it was the 18th of October, a time of year when one naturally looks for the "frost upon the punkin," and is inclined to wander through the woods in search of the ripened nuts, and admire the beautiful colorings that the autumn atmosphere has bestowed upon the leaves; when one goes to his closet, or maybe his pawnbroker, to find his heavy clothing—it was that I found myself the guest of a Western Canada housewife in her beautiful home on the outskirts of the pretty little town of Moosomin, Saskatchewan. The dinner! That's what Mrs. Wilde called it. I should have termed it a banquet. There were mallard duck, cooked to a turn, baked potatoes—and such big, mealy fellows they were, too—cauliflower—and say, did you ever taste one of those Western Canada cauliflower?—then dessert. What was the dessert? I can see it now. Strawberries, strawberries that had been picked that morning. Help yourself to the cream—and it was cream that is cream. But what I wanted to write about was the strawberries picked on the 18th of October. As I ate, and turned my back while a second helping was placed in front of me, I could not but think how this goes to refute the once accepted idea that the climate of Western Canada is such that the ripening of strawberries at any season is one of the things that might be looked upon as next to impossible. Fortunately it is rapidly giving place to one which acknowledges that our sister nation to the north possesses a climate that makes it quite possible to develop and ripen strawberries even in October.

But there is more to add. On October 14, just a few days previous, Mr. A. B. Smith, near the same town, plucked a splendid mess of green corn from his garden. Near Rocauville, Saskatchewan, wild raspberries were picked during the same week. The fact of ripening fruit at this date may seem of little moment, but when you are told that corn did not suffer from any vagaries of weather, more attention may be paid to it. The question of Western Canada's climate is no longer the bugaboo it once was, and not so very long ago, either, when it caused thinking people to think, and unquestionably prevented many from going to Canada who under other conditions would have gone.

In various parts of this country, at different state and county fairs, the government of the Dominion of Canada, during the past few weeks, installed exhibits of the grains and grasses grown in Western Canada, and at the same time showed fruits and vegetables that were grown there. None of these was placed in competition with the home-grown article. But to judges and others there came the full understanding of what it would mean to the local exhibitor if they were. The Western Canadian—and many of the exhibits were grown by former Americans—does not lay claim to any special dispensation of intelligence in the matter of the culture of the articles placed on exhibition, but willingly gives credit to the soil, the climate, and such other indigenous conditions as the country as a whole possesses, as being factors that bring about the largest yields of the best of wheat, oats, barley, flax and rye, as well as vegetables. As is pointed out by the gentlemen in charge of these exhibits, and quite evident to all, the possibilities of growing vegetables and grain such as are shown can only exist where conditions such as have been mentioned exist.

In speaking of eating fresh strawberries and green corn in the middle of October I should not fail to refer to the beautiful bouquets that adorned the table, the sideboard, the window sills, and almost every other available vacant place in the room. Flowers!—there were asters phlox, gladioli, peonies, poppies and I can't remember the names of them all, but they were there. Taken right from the garden, having a fragrance that gave the room tropical colors, and filled it with marvelously delightful perfumes. It was a very pretty sight. Then I went out into the garden, and took a photo of it. It was simply wonderful. I asked the good lady how she managed it. She said she had always been fond of flowers. In her old home in one of the central states, she carried on garden horticulture, and had been acknowledged successful. "But my!" she said, "I never got such bloom, and such a variety as I do here." She admitted it was a lot of work, the watering, the weeding, the hoeing, but such work was a pleasure.

Well, such is some of the life in Western Canada, and as I left the farm home I concluded that much of our surroundings are as we ourselves make them.—Advertisement.

PACT IS DEAD, SAYS HARDING

President-Elect of U. S. Pledges New Efforts for World Peace.

YANKS TO HOLD LEADERSHIP

Makes First Speech Since Election at Celebration of His Victory by the Home Folks—"Corpse" at Front Porch.

Marion, O., Nov. 6.—President-elect Warren G. Harding said the last sad rites over the deceased Versailles League of Nations when its "corpse" was brought to the front porch in the midst of a great celebration by his home folks in honor of his election.

The bier bearing the "remains" was carried in the parade on the shoulders of six "pallbearers." A "mourner" held aloft a banner telling the identity of the departed. The President-elect smiled and waved his hat as the cortege passed, a band behind played a funeral dirge and later when the corpse was taken in front of the steps, he turned to Mrs. Harding and said:

"There's the corpse."

In his speech to the crowd of thirty thousand or more, the first address since his election, he said in commenting on the league:

"I saw in the procession the mournful spectacle of the dead League of Nations and I didn't see as much sorrow in your faces as I rather apprehended. But it was not because you or I question the wisdom, the justice, or the desirability of America having its part in a new fraternity of nations, or because we question the high ideals of those who were responsible for the Versailles covenant.

"You just didn't want a surrendered United States of America.

"You wanted America to be free and unmortgaged to the Old World. You wanted the America you have seen made under American ideals to go on under American ideals. That's why you didn't want the league which is now deceased."

Visibly affected by the demonstration, President-elect Harding told his home folks he was not talking in a partisan spirit; "election is over," he added. "The task is such that it makes any man pause. It is too serious to be exultant. I like to stand before you and tell you I don't have to come with a single apology or regret. If I had to seek the presidency at the cost of speaking ill or telling a lie I would spurn the office, because it would not be worth any honest man's occupancy.

"We are the greatest people in the world in America and the world looks to us for leadership. But America is not expecting a superman.

"I told the American people that this was going to be a government of law and not of men. We are going to have in America once more a government of the Constitution, a government of the people through their chosen representatives. We are going to have a government again where it is the will of the people and not the will of the chief executive of this republic.

"Those who know me will agree that maybe I have one qualification that will fit into the present situation. I alone have preached conference, consultation and exchange of ideas. I have never been a radical. Sometimes they have called me a reactionary or an ultra conservative.

"What we need is a little showing up by the radicals and a little speeding up by the ultra-conservatives so we can come to a common understanding and give the stabilizing influence of America to the civilization of the world.

"I am going into office knowing the heart of the American people is right and in the spirit of compromise and desire for an understanding for the promotion of our national interests, and America is going on safe and sure at home and giving its steadying and stabilizing influence to mankind and the civilization of the world.

"My work among you has been as a fellow booster, and, God helping me, I am going to Washington as a booster for the United States of America. But I don't mean that we want America to lead a selfish existence. We don't want to advance our own country at the cost of discouraging or neglecting the rest of the world.

"The United States will meet every obligation it owes to humanity and to the world. There is much to do. A new world relationship is to be established and through you I tell the world when the next administration comes into power we are going to play our part."

O'Callahan Succeeds MacSwiney.

Cork, Nov. 6.—Deputy Lord Mayor O'Callahan, has been elected lord mayor of Cork.

Asks Wilson to Resign.

Chicago, Nov. 6.—William J. Bryan issued a statement calling on President Wilson to resign at once, yielding the presidency to Marshall with the understanding that Harding be made Secretary of State.

U. S. Rule of Sugar Ends.

Washington, Nov. 6.—The last vestige of government control over sugar has been removed through the signing by President Wilson of a proclamation providing for revocation November 15 of licenses held by wholesalers.

Help That Aching Back

Back giving out? Tortured with dull nagging backaches and stabbing pains? Does the least exertion leave you tired played out?" Likely your kidneys are to blame. Overwork, colds, insufficient rest and the hurry and worry of present-day living tend to weaken the kidneys. Backache is often the first warning. Headaches and dizziness may come, too, and perhaps annoying kidney irregularities. Help the overworked kidneys with *Doan's Kidney Pills*. *Doan's* have helped thousands. They should help you. Ask your neighbor!

An Iowa Case

D. A. Ray, a tired farmer, Bedford, Ia., says: "I have had ... were pain through my ... just over my ... neys. I could ... get about by ... use of a cane. ... was sore and lame ... through my ... My kidneys did ... act freely enough. Seeing Doan's Kidney Pills highly advertised I procured some. Three boxes cured me entirely."

DOAN'S KIDNEY PILLS

FOSTER-MILBURN CO., BUFFALO, N. Y.

THE BEGINNING OF A NEW LIFE

Bulgaria and Oriental Europe Produce Sturdiest People.

Do you want to feel from 10 to 20 years younger?

Do you want to know the joy of Perfect Health?

You can get back the spirit of youth, your eyes will sparkle with new life and the rich glow of health will replace the faded yellow skin.

Bulgarian Blood Tea, used for centuries in Oriental Europe, is the most remarkable medicinal family preparation known in the world today. Composed of choice and rare herbs, brewed by yourself and taken once or twice a week, will be the beginning of a new life for you. Your blood will become rich and pure; the flame of life will be rekindled—no more headaches, biliousness, constipation, indigestion or bone-racking aches and pains. Bulgarian Blood Tea is guaranteed to contain just pure herbs of marvelous medicinal and curative power gathered from fields, mountains and valleys of Europe, Asia and Africa. All drug stores now have Bulgarian Blood Tea in stock, but owing to the enormous demand immediate application to your druggist is urged on account of the limited source of supply. Distributors of Bulgarian Blood Tea are authorized to return the full purchase price if it does not materially improve your health in three weeks' time. This evidence of faith in the power of Bulgarian Blood Tea is the guarantee of the Marvel Products Co., Marvel Building, Pittsburgh, who authorize this public announcement.

Undoubtedly.

Mr. Spiffkins observed that the quiet boy at the foot of the class had not yet had an opportunity to display his knowledge of the Bible. So the teacher gave him this one:

"In what condition was the patriarch Job at the end of his life?"

"Dead," said the quiet boy.

Catarrh

Catarrh is a local disease greatly influenced by constitutional conditions. HALL'S CATARRH MEDICINE is a Tonic and Blood Purifier. By cleansing the blood and building up the System HALL'S CATARRH MEDICINE restores normal conditions and allows Nature to do its work.

All Druggists. Circulars free.
F. J. Cheney & Co., Toledo, Ohio.

The clock invariably strikes the hour when you wake up and want to know what time it is.

WHEN A WOMAN IS NERVOUS—WORRIED

The lives of most women are full of worry. Men's troubles are bad enough, but women's are worse. Worry makes women sick. It pulls them down, and in their weakened condition they are subject to pains, aches, weakness, backaches, headaches and dizzy spells.

Most women neglect their health, and for this they pay the penalty. Any woman will find that neglect does not pay. A little more attention to health would brighten up her life. If she asks her neighbors she finds that Dr. Pierce's Favorite Prescription benefits a woman's whole system. It not only acts upon the troubles and weaknesses peculiar to women, but is an all-round tonic that braces the entire body, overcoming nervousness, sleeplessness, headaches, dizziness and a run-down condition.

DIXON, NEBR.—"For the young girl developing into womanhood there is nothing better than Doctor Pierce's Favorite Prescription as a tonic and builder. At that time of my life I was sadly in need of something to strengthen and build me up and I found just the tonic I needed in the Prescription. I would advise its use by all young girls at this critical period of life."—Miss F. Long.

For Irritated Throats

take a tried and tested remedy—one that acts promptly and effectively and contains no opiates. You get that remedy by asking for

PISO'S

HOW

HOUSEWIFE MAY MAKE HER WORK MORE ATTRACTIVE.—How to make household work more attractive is so serious a problem that it is delightful to hear that the operation of washing clothes is "a kind of Greek dance." So, at least a lady who is used to Greek dancing declares. The same authority says that she engages in "rhythmic movements" for every household duty and finds her labors surprisingly lightened. Thus energy can be conserved in the lifting of a kettle if one stoops with one's whole body instead of simply leaning forward a little. The theory is plausible enough to deserve a careful working out. It is one of the principles of modern education that study must be made play for the child. How much more should work become one sweet song for the housewife! Many might find the combination of washboard and Greek dance perplexing. Probably the ordinary worker might resent the interference with fier "ways," no matter how much help she might derive from it. But we have one resource unknown to the ancient in canned music. Put in the record and turn the crank, and the rhythmic movement is easy. In this untrodden field of domestic art—or shall we say science?—the first adventurers will have to walk warily. Only long and careful experiment can determine the exact kind of music for each particular task. It would not do to employ jazz if slow waltz time were required. If a bed were made up to jazz the sheets would probably not be tucked in properly at the bottom. A little comic opera music might suit a hasty luncheon, whereas for a deliberate and formal dinner an adagio from a symphony might blend more harmoniously with the occasion. Since the domestic problem is one of the gravest the modern woman has to face, it is obviously of the highest importance that the connection between the family wash and the Greek dance be carefully investigated and further researches undertaken.—New York Tribune.

BEES' PRODUCTION OF HONEY

How the Transition From Nectar to the Highly Delectable Compound Is Accomplished.

When a bee arrives in the hive with a load of honey, she searches until she finds a cell to her liking and then enters the cell with feet upward. Her mandibles touch the cell where the load is to be deposited. Then the mouth and mandibles open, and a drop of nectar appears. With the mandibles constantly in motion while quite likely some secretion is added to the nectar, the head is moved from side to side and the nectar spread over the upper cell wall. When this honey is first stored it is quite thin, but later the bees evaporate or "ripen" it until it contains less than 25 per cent of water. The work is done mostly at night, the bees standing on the combs with heads upward and then forcing a drop of nectar to the mouth and mandibles, where it gently pulsates for about ten minutes when it is swallowed and another drop appears. This work continues sometimes for nearly half the night. Anyone entering the apiary at this time will note the pleasant odor of the new honey and will also enjoy the drowsy sound of the millions at work ripening the honey.

How to Resilver Mirrors.

Select a sheet of tinfoil of the required size and pour over it three drams of quicksilver for each square foot of foil. Rub the foil with a piece of buckskin until it becomes brilliant. Place a sheet of paper over the foil so as to completely cover it. Then lay a weight on the foil, using a slab of marble or smooth block of wood. Increase the weight so that the foil will be pressed tightly to the glass. Allow to stand four or five hours to set. If properly done the foil will adhere closely to the glass. Usually, however, it is cheaper and more satisfactory to buy a new mirror than to try resilvering an old one.

How Corncobs Yield Dyes.

Of importance to the dye industry is the recent discovery that furfural, or furfuraldehyde—a dye base—can now be extracted, like cellulose, from the common corncob, and at a cost of only 15 cents a pound. This colorless, oily liquid has previously been obtained only in the laboratory, and at something like $17 a pound. In consequence of this announcement the despised corncob will take on considerable commercial value. In the hands of the chemists it will yield dyes of a vivid green, in addition to the rare brown and blue vat dyes.—Popular Mechanics Magazine.

How Esthonian Girls Begin Life.

Almost from infancy Esthonian girls begin to collect a wedding outfit. This is not peculiar to Esthonian girls, but a curious feature is that at the wedding the newly made bride distributes accumulated articles among the guests, receiving in return promises of beehives, sheep, and cattle—promises which are usually redeemed sooner or later.

WHY

Selfish Person Is Likely to Live Long

Utter selfishness and clam-like absence of emotion seem to be the recipe for old age, for the Journal of the American Medical Association quotes a paragraph from the memoirs of Baron de Grimm written on the death at ninety-three of Dr. John J. de Mairen of the French academy, with the query if this be not a text on geriatrics. The paragraph is as follows:

"He was exactly the kind of person to live to a great age; his head was well formed, he had great equanimity of temper, great moderation in his passions, or rather he was destitute of passions; he had sensibility enough to engage the regard of those with whom he associated, and to contract those ties of intimacy which were sufficient for him, which have not indeed the charms of friendship, but which do not draw after them the same obligations. He had not warmth of heart enough to feel the necessity of an attachment which rules despotically; of a friend who disposes of us at pleasure, who forms the happiness or the misery of our lives; he had much prudence and foresight; paid great attention to himself, and was very methodical in whatever he did."

This might have been written of Count Greppi, the former Italian diplomat, who though more than one hundred is taking an active part in the social life of Rome.

BANISH DESPAIR AND DOUBT

Why It Is Foolish to Allow the Past to Cast Any Shadow Over the Future.

Much arrant nonsense has been written and said upon the influence of the past on the present. We have been told that the past is a Nemesis ever upon the trail of puny man. The first morbid threats concerning the power of the past was in Genesis when the Israelites were made to think their suffering due to the sins of their ancestors. All this is false and morbid and poisonous, declares the Rochester Post-Express. Maeterlinck tells us that our past depends upon our present and changes with it. What the past was depends upon the way we employ it today. Men and women have behind them grim and apparently hopeless pasts, but they rise upon these things and triumph over them. Poe thought he was a victim of his past and so wrote the dismal poem, "The Raven," with its croaking "Nevermore." He could have made his past glorious by glorifying his present. But the past was too strong for his weak will. All he saw behind him was hideous mistakes, and ahead more mistakes. Other men with equally dark beginnings have made them minister to their present welfare.

The past is dead, but not the wisdom we learned from it. The faults of the past are with us until we recognize them and correct them. We go ahead as we achieve wisdom out of the raw material of mistake. The past is dead and beneath our feet. We can get down in it and wallow if we want to, or we can step to higher things. The real enemies of man are despair and doubt. Yet they are generally under our feet if we will to trample them there.

Why Old Shoes Are Thrown.

Throwing old shoes after a bridal couple dates back to the Old Testament, the Detroit News observes. When a man transferred a piece of property he took off his shoe and handed it to the purchaser to seal the bargain. In the marriage ceremony it has come to mean that the parents give up all dominion over their daughter.

In ancient times, when the young man was unable to arrange with the parents for the purchase of the girl, he would run off with her and hide. Many times he employed the help of a trusted friend. From these incidents comes the well-known custom of the wedding journey of hidden destination. The trusted friend of long ago is the best man of today, who still helps with the arrangements of the marriage.

Why Show Was Not Success.

David Belasco, at a dinner in New York, found himself seated opposite a brother play producer.

"Well, Bill," he said genially, "how's the new show going?"

"Only so-so, Dave; only so-so."

"Sorry to hear that Bill."

"Oh, there's a reason for it. You see, we produced on Friday—an unlucky day, you know. Then there was the car strike; that hit us where we lived. And we'd hardly recovered from the blow when Lent came on. Of course, Dave, business always falls off in Lent."

Mr. Belasco gave a loud laugh.

"Bill," he said "I'll tell you what's the trouble with that show of yours. You brought it out too soon after the San Francisco earthquake."

Why Path Was Abandoned.

Evidence that walking as a pastime and diversion is rapidly going out of style was discovered by the Observer when he recently visited his home town in southeastern Ohio.

What had been a well-kept gravel path along a road noted especially for its beauty of scenery, had almost entirely disappeared. Grass of the tall, tough kind was growing in the middle of the walk. Alongside, was a cinder road, now well kept, which had completely replaced the walk. The explanation is probably found in the one word, "automobiles."—Observer in Columbus Dispatch.

A Halsted street dealer advertises: "dead shot killer for bedbugs, 30c a pint." killer, or bedbugs?

King Alexander of Greece died from the effect of a monkey bite. Moral: Dont monkey with monkeys.

A haircut now costs 25 cents and a shave 15 cents in Los Angeles. Bnt who wants to go clear to Los Angeles to get his barbering done.

Polite Pete (finishing his handout on the well platform)-"I enjoyed me lunch very much, mum; and now do youse care if I take a little nap in de porch swing while I rest my feet?"

Lady Bountiful—" No you are too heavy; you will break it doun."

Pete—" Ah, I assure youse, mum ,I am a very light sleeper."

"I think I'll sell Fliver an eucyclopedia."

"No chance. He knows it all."

"That means a good chance. He can go through it looking for errors."

"What kind of a time is he having on his motor trip?"

"Guess he's having a pretty lively time. He sent me a picture post-card of a hospital."

They had just become engaged.

"I shall love," she cooed, "to share all your griefs and troubles."

"But, darling," he purred, " I have none."

"No," she agreed; "But I mean when we are married."

A Missonri farmen who called his newly employed hired man out of bed at four oclock in the morning was surprised a few moments later to see the man walking off down the road.

"Say! come back an' eat your breakfast 'fore you go to work!"

"I ain't going to work," the man called back. "I'm goin' to hunt somewhere to stay all night."

Binks (comming out of the theater)—"why did everybody cry during the death scene? They must have known the actor was not dead."

Jinks—"Yes, that was just it."

A child is born in neighorhood; the editor gives the loud lunged youngster and the "happy parents" a send off and gets $00. It is christened and the minister gets $5.00 and the editor gets $00 The editor pushes and tells a dozen lies about the " beautiful and accomplished bride." The minister gets $10 and a piece ef cake and the editor gets $00. In cource of time she dies; the doctor gets from $15 to $100, the minister perhaps gets another $5, the undertaker gets from $75 to 150, the editor publishes a notice of the death, an orbitory two colums long and a card of thanks aud gets $0.00. No wonder so many country editors get rlch. Have you paid your subscription?

An Eagle Grove couple' it is said, came very near quarling over a little matter. In their cellar they had a barrel of apples and a sack of nuts. A large rat headquartered in the cellar. The wife was positive it was there to eat the apples. The husband declared more positively a rat would not eat apples but would eat nuts. Finally they bought two traps, setting one by the apples ond one by the nuts. Next morning friend husband went down and yelled to his wife. "We've caught the rat!" By the apples?" asked the wife. "No," said the husband.

If a fly should bite an up-to-date Klemme girl, it would probably die of paint colorie.

Far by the sunlit, summer sea
She dwelt on love and faith pnd hope-
Her right name was Penelope,
But neighbors called her Penelope.

Fair as a violet was she,
That grows beside a mossy stone ,
Or the wind flower, anemone-
The farmers called it anemone.

She danced like doun along the lea,
She danced like foam along the shore,
A daughter of Terpsichore
Whom hoi polli call Terpsichore.

Alas! one day she went to see
A circus—heard the raucous cope
Of that ecursed caliope
Which most folk call the caliope.

That verv night this maid did flee
With the Big Show to dance and loaf;
Sure, such a sad catastrophy
Might well be called a catastrophy!

Now as a modest trovotore
She dances to the calliope;
O hapeless child of Terpsichore,
O airy, fairy Penelope!

Ye thirsty, rejoice,
Now that autumn is here;
Though empty the flask.
There's a nip in the air.

"I see they'er going to have a world fair in Iceland next year."

"Yes, but I'll bet it'll be a frost."

Most farmers answer Yes

Isn't it better to put your money where you know you can get it back than to put it where you can only hope it will be safe?

Isn't it better to be sure of 5 per cent interest on your money than a mere promise of more with the odds against you?

Isn't it be better to have the control of yourself than to give it to some stranger.

Isn't it better to put your money in our Certificates of Deposit where you know it is safe where it will earn interest for six months or a year, where you can control it than in fake stock schemes?

Will you do it.

WHY

Knowledge Quells Fear in Human Heart

Emerson says: "Always do what you are afraid to do." This is a splendid rule for cultivating courage; but an even better rule would be, "Always investigate what you are afraid of," is the advice of Anne Boyan McCall in Delineator. Examine into the cause of your fear; look into it, and find out what it is.

When we go forward and investigate the things we are afraid of, we are very likely to find in them something actually helpful. Is it the opinion of others we fear? If we could make up our minds to go toward them and try to understand them, we should find that, instead of things to fear, they are either things that are not worth troubling about or else they are things that would be an actual help to us.

Going toward life instead of away from it, learning to face, yes, and investigate, whatever frightens us, whether our fear be a physical fear, a mental one, or a spritual one, this is practicing bravery, and this at last is to attain to self-forgetfulness and the merging of our lives in others.

Brave thoughts (unselfish thoughts), the sayings and doings of brave, unselfish men and women; the biography or autobiography of brave lives; the committing to memory of verses that are full of spiritual bravery; the daily conscious effort to investigate and understand lives and beliefs and interests that are different from our own, all these will help us to cultivate that bravery which is at heart thought of others, and that conscious and loving thought of others which is not alone bravery but a perpetual enrichment of life.

COME NEAR FOR PROTECTION

Why Birds Prefer to Make Their Nests in Proximity to Human Habitations.

What is the real explanation of the fact that so many of our birds nest so near our dwellings and yet show such unfriendliness when we come near them? Their apparent confidence, on the one hand, contradicts their suspicion on the other. Is it because we have here the workings of a new instinct which has not yet adjusted itself to the workings of the older instinct of solicitude for the safety of the nest and young? My own interpretation is that birds are not drawn near us by any sense of greater security in our vicinity. It is evident from the start that there is an initial fear of us to be overcome. How, then, could the sense of greater safety in our presence arise? Fear and trust do not spring from the same root. Hunted animals pursued by wolves or hounds will at times take refuge in the haunts of men, not because they expect human protection, but because they are desperate, and oblivious to everything save some means of escape. If the hunted deer or fox rushes into open shed or a barn door, it is because it is desperately hard pressed, and sees and knows nothing but some object or situation that it may place between itself and its deadly enemy. The great fear obliterates all minor fears.—John Burroughs in Harper's Magazine.

Why "Long Tom" Is Honored.

Long Tom, a 42-pound gun, was originally French property, a part of the armament of the French line-of-battleship Hoche, captured by the British in 1798 and sold to the Americans. It was used during the French attack on Hayti in 1804, then was dismounted until 1812. Next it was placed on the General Armstrong, which ran the blockade of the British at New Orleans, September 9, 1814. This vessel ran into the bay near Horta, Fayal, for water after an encounter with a British squadron, in which she was rendered helpless. Long Tom was dismantled and lay at Fayal till it was brought to New York on the steamship Vega, April 18, 1893, through the efforts of Colonel Reid, the son of the commander of the General Armstrong.

Why Judges Should Visit Prisons.

Lord Phillimore, late lord justice of appeal, holds that it is part of the duty of judges to visit prisons from time to time. "In this way," he said to an interviewer, "a judge gets to know what prison is like, and what the punishment he metes out entails to those he has to sentence."

Lord Phillimore has been on the treadmill and has seen men working on it. The suggestion recently put to an American judge, that judges on their elevation should serve a term of imprisonment by way of apprenticeship, he characterizes as too topsy-turvy to be considered.—Continental Edition of the London Mail.

Why Judge Dons Black Cap.

The custom of putting on a black cap—really a square piece of black cloth—observed by judges when sentencing a prisoner to death is a relic of the ancient days when covering the head was a sign of mourning. The judge, therefore, in putting on the black cap, is assuming mourning in view of the fact that he is about to pronounce the forfeit of a life.—London Tit-Bits.

How to Extinguish Burning Oil.

A fire which water has no power to extinguish is soon caused by the overturning of a kerosene lamp. In every house where kerosene is burned a bucket of sand should be kept in a place accessible to all the inmates, for it will instantly extinguish burning oil.

STANDS OFF A LOT OF DOCTOR BILLS

Recommends Pe-ru-na for Catarrh of the Stomach, Colds and Grip

"I have used Pe-ru-na for several years and can heartily recommend for catarrh of the stomach or entire system. I always get benefit from it for colds and grip. It stands off lots of doctor bills and makes one feel like a new person."
R. F. SUTTLES.

R. F. D. No. 8, Box 51, Waynesburg, Kentucky.

It is wise to keep a bottle of Pe-ru-na in the house for emergencies. Coughs and colds may usually be relieved by few doses of Pe-ru-na taken in time. Nasal catarrh, indigestion, constipation, diarrhoea, rheumatism or other troubles due to a catarrhal condition of the mucous membranes all call for Pe-ru-na as the successful treatment. The health building, strength restoring qualities of this well known remedy are especially marked after a protracted sickness, the grip or Spanish Flu.

PE-RU-NA is justly proud of its record of fifty years as health protector for the whole family.

TABLETS OR LIQUID — SOLD EVERYWHERE

DISEASE AMONG HORSES — the answer is

Spohn's Distemper Compound

Wherever there is contagious disease among horses SPOHN'S is the solution of all trouble. SPOHN'S is invaluable in all cases of DISTEMPER, PINK-EYE, INFLUENZA, COUGHS and COLDS. A few drops a day will protect your horse exposed to disease. Regular doses three times a day will act marvelously on your horse actually sick. 60 cents and $1.20 per bottle at drug stores. Spohn Medical Co., Goshen, Ind., U. S. A.

Will Rheumatism Again Bind You Hand and Foot?

If you had Rheumatism last year and treated only the pains of the disease by rubbing with liniments and lotions, you can be sure that unless again you will be in the shackles of this relentless foe. You may get some slight temporary relief from the pains of the disease by the use of these local remedies, but Rheumatism is too real and relentless a disease to be rubbed away. So many cases of Rheumatism come from a tiny germ in the blood, that you should try a remedy that has proven so thoroughly satisfactory in these cases. S.S.S., the fine old blood remedy cleanses the blood of all impurities, and removes all disease germs that may creep into the blood. Begin taking S.S.S. today, and if you will write a complete history of your case, our medical director will give you expert advice, without charge. Address Chief Medical Adviser, 157 Swift Laboratory, Atlanta, Ga.

Heaps of People There.

A little boy who visited a large city for the first time, was amazed at the number of people on the streets.

When he returned home to the country his mother asked him what he thought of the great city.

"Oh," said he, "there were heaps of people there! I think there must have been a fair on!"

Explained.

"What do you call this home-made brew?"

"I'm undecided between 'Army Mule,' 'Grandfather's Rifle' or "Sixty-Yard Punt.'"—Judge.

The man who imagines he never did a foolish act isn't wise enough to know what folly is.

Kill That Cold With

HILL'S CASCARA BROMIDE QUININE

FOR Colds, Coughs AND La Grippe

Neglected Colds are Dangerous

Take no chances. Keep this standard remedy handy for the first sneeze.

Breaks up a cold in 24 hours — Relieves Grippe in 3 days—Excellent for Headache

Quinine in this form does not affect the head—Cascara is best Tonic Laxative—No Opiate in Hill's.

ALL DRUGGISTS SELL IT

GREETINGS THAT TELL MUCH

Have a Character and to the Initiated Are Like an Open Book.

"Chawmed"—One dance with this one. They always talk about the thatches of the that or G. B. Pshaw's best.

"How do you do?"—Not a question but a statement. Probably accompanied by a smile. This class works slowly, but it is sure to get you in the end.

"Deelighted"—With giggle and invitation from baby-blue eyes. Must never be trusted.

"Very glad to know you, I'm suah"—One is not sure, but it seems best to say so. Last season's deb. Expects to be bored and it is best to live up to expectations.

"Oh, Mr. Stover, I'm so glad to know you. I've heard," etc.—Football hero stuff. Must use skill and ingenuity to escape this type.

"Mere nod—Possibilities, but, oh, man, you'll have to work.—Yale Record.

Not Alike.

Lawyer—So you want a divorce from your wife. Aren't your relations pleasant?

Client—Mine are, but hers are the most unpleasant lot I ever met.—Boston Transcript.

Most of the family skeletons refuse to stay in the closet.

GOT REPORT THAT COUNTED

Coffee Dealer a Little Too Enthusiastic in His Praise of Goods He Had Condemned.

"Have you any of Blank & Co.'s coffee?" the stranger asked.

"Plenty of it, sir! How much would you like?" the dealer responded briskly.

"Do your customers generally like this coffee—I would want only something really good," the customer observed cautiously.

"Never had a more popular brand—it is fine—use it regularly on my own table," the dealer assured him.

"Well, I am glad to hear you speak so well of it now. You wrote me a while back that the goods were so unsatisfactory that you would have to return them unless you were given a further special discount. I'm Blank, you know. Good day!"

The Boob.

"How did Archie happen to lose out with Miss Goldrox?"

"Why, she told him she really disliked flattery."

"And Archie persisted in paying her extravagant compliments?"

"No; he didn't."

The demagogue's pride licks the dust.

The chorus girl is never as red as she is painted.

Made From Our Native Grains

Grape-Nuts

Rich and Nourishing

A blend of wheat and malted barley that costs but little, yet provides a food of most attractive flavor, ready to serve direct from the package.

Grape-Nuts Needs No Sugar

THE DAIRY

DAIRY RECORD QUITE USEFUL

Profitable Practice to Keep Daily Tab on Cows Where There Is No Test Association.

Keeping daily records of the milk yield of each cow, where there is no cow testing association, is a profitable practice. This is shown by reports on herd records received by the United States Department of Agriculture.

An instance where a herd has been greatly improved without increasing its numbers (by more than one cow) is found in a report from Oklahoma.

Weighing and Recording Milk.

The dairyman's cream checks for a given month amounted to $78.42, the cream being obtained from a herd of 27 cows. One year later, after doing herd-record work, he was able with a herd of 28 cows, just one more than he had at the earlier date, to sell cream to the value of $223.60, or nearly three times as much—a pretty good return for care given to culling the herd and improving the management.

While the current prices for butterfat have increased somewhat, they have not trebled in a year, so it is obvious that there has been a large increase in the productiveness of the herd.

WISCONSIN HAS FINE HERDS

Ranks Third Among States Active in Eradicating Tuberculosis—Minnesota Is First.

Recent field reports on official tuberculin testing in Wisconsin show large gains in the number of herds in that state accredited as being free from tuberculosis. In the month of May Wisconsin made the largest gain of any state, with an increase of 47 accredited herds. Although all reports have not yet been analyzed, the June records are expected to show Wisconsin, with a further gain of 92 accredited herds, still making the most rapid progress.

Although last year about eighth in rank compared with other states active in eradicating bovine tuberculosis, the Badger state has recently forged to third place. Minnesota is first with 500 accredited herds, and Virginia is second with 337. On July 31 Wisconsin had 302 accredited herds. The figures are from records of the federal bureau of animal industry based on field reports up to July 31, 1920.

GRIND ALFALFA AND CLOVER

Practice in Some Communities Found to Be Economical—Cattle Eat More of Stalk.

Many of the dairymen who have more than 15 head of cattle would find it profitable to get a grinder large enough to grind alfalfa or clover, especially if they expect to feed mammoth clover. The practice is general in some communities to shred the stover and feed this to cows. The cattle will eat more of the stalk and the remainder makes very good bedding when mixed with the straw.

FALL FRESHENING IN FAVOR

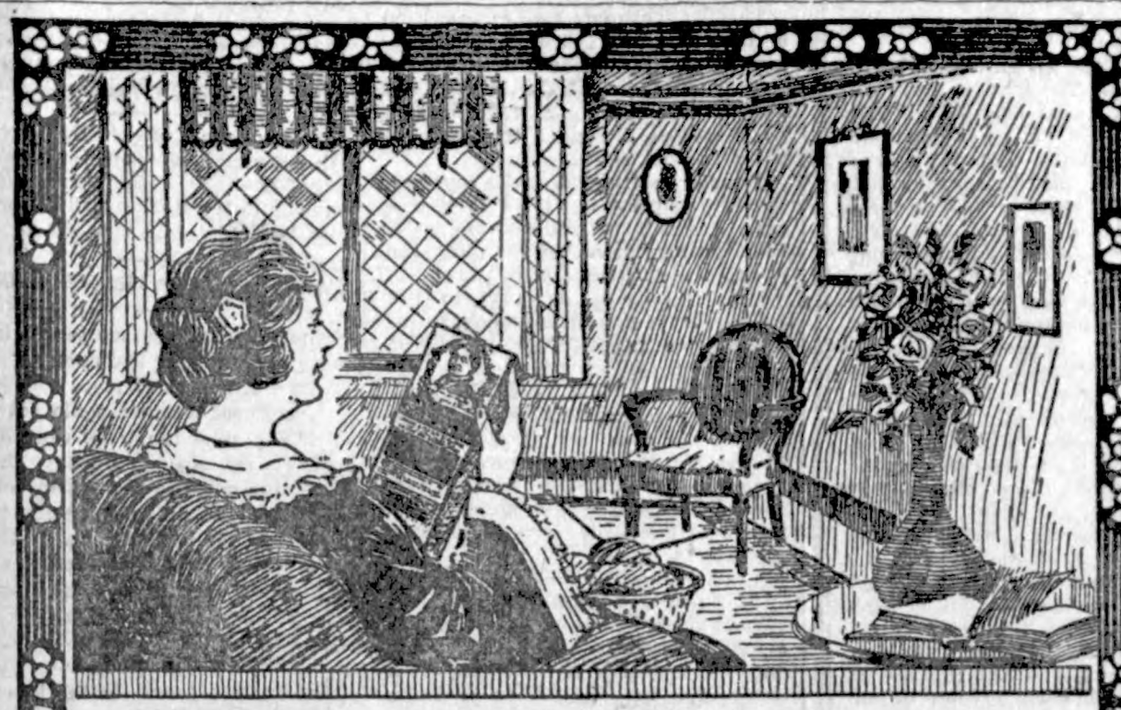
Results in Greater Production of Milk and Butterfat, According to Specialists.

Fall freshening results in greater milk and butterfat production than spring or summer freshening. The dairy husbandry specialists at the Iowa agricultural experiment station who have studied many records say that fall freshening gives about 10 per cent greater production than either spring or summer freshening.

DISCARD UNPROFITABLE COW

Better Than an Empty Stall Providing She Is Producing Offspring Better Than Herself.

The unprofitable cow does not deserve any defense nor should she be allowed to fill a stall in the barn to the exclusion of a better cow. But she is better than an empty stall provided she is given a chance to produce offspring better than herself. Then she is fulfilling a purpose.



Women of Middle Age

Owing to modern methods of living not one woman in a thousand approaches this perfectly natural change in her life without experiencing a train of very annoying and sometimes painful symptoms. Those dreadful hot flashes, smothering spells, fainting spells, nervous troubles and irregularities are symptoms that should have prompt attention. These two letters prove what a successful remedy Lydia E. Pinkham's Vegetable Compound is for women at this time of life.

These Two Women Helped During Change of Life.

Taunton, Mass.—"I could not eat or sleep for six months, had fainting spells and could not walk without help for three months, caused by female trouble. My cousin, who was a doctor, told me to take Lydia E. Pinkham's Vegetable Compound and it helped me greatly. Then during the Change of Life I used the same remedy. I am seventy years old now and am able to do my own housework and walk one mile to church every Sunday morning and evening. I am recommending the Vegetable Compound to my friends having the same troubles as I had. Your remedy is the best on earth. I cannot find words to express my gratitude for it."—Mrs. Susan C. Staples, 157 B School St., Taunton, Mass.

Philadelphia, Pa.—"I want to let you know what good Lydia E. Pinkham's Vegetable Compound has done me. I had organic troubles and am going through the Change of Life. I was taken with a pain in my side and a bad headache. I could not lie down, could not eat or sleep. I suffered something terrible and the doctor's medicine did me no good at all—my pains got worse instead of better. I began taking the Vegetable Compound and felt a change from the first. Now I feel fine and advise any one going through the Change of Life to try it, for it cured me after I had given up all hopes of getting better. I will tell any one who writes to me the good it has done me."—Mrs. Margaret Danz, 743 N. 25th St., Philadelphia, Pa.

Women of Middle Age Should Depend Upon

HOW

CLOTHES AIDED COL. LAWRENCE TO UNITE TRIBES.—In at least one part of the world, and in one important phase of the conflict, it now comes out that clothes played an important part in "winning the war" and these were the clothes in which Colonel Lawrence united the desert tribes against the Turks. It may even be argued that without the clothes the fact could hardly have been accomplished. "The magnificent Bedouin costumes that Lawrence wore much of the time," says Lowell Thomas in Asia, "were not a theatrical pose. They were a carefully worked out part of his plan for complete Arab mastery." Knowing the Arabs as he did, the young English archeologist had found that the adoption of Arab dress carried the wearer much further into the confidence of the Arabs; but that it must be done completely or not at all, for the Englishman in Arab kit must needs live up to his costume and seem as familiar with Arab life and etiquette as if he had been born to it. It was no splendid masquerade of an adventurous being, as many readers have probably imagined, but rather, as Colonel Lawrence has himself described it, like an "actor in a foreign theater, playing a part day and night and for an anxious stake." The part had to be "composed" as well as costumed; the audience was an audience of expert observers; and if the actor had at any point failed in his part the Bedouin tribes could hardly have been held together. Wearing Arab costume himself whenever he was with the tribes, he advised officers unacquainted with Bedouin customs to wear their uniforms. Hats, however, were always better discarded in favor of the Arab headcloth, for Bedouins have a very general prejudice against hats.

DO WITHOUT ANY DENTISTS

How the Natives of Africa Preserve Their Teeth in Practical State of Perfection.

There is a common idea that the diet and climatic conditions of the negroes are the cause of their having beautiful teeth, but some authorities dispute this.

Thus, in some parts of Africa, when an infant has gone through the "teething period," his mouth is rinsed out with an infusion of the leaves of a native tree possessing a constituent which causes the gums to shrink, so tightening the teeth.

The natives living near the source of the Nile employ the roots of a pod-bearing plant to relieve toothache, while another tribe uses an infusion of kasso seeds for the same purpose.

The toothbrush, as used in this country, is, of course, unknown to the savages, but many of them have an effective substitute. They use a piece of wood from certain trees, which contain beneficial qualities. Further, this stick is free from the great objection to brushes. It can be renewed at frequent intervals, and is thus always fresh and wholesome—a great advantage over the toothbrush of civilized races.

How Big Things Are Lost.

Everywhere we see people jeopardizing the big things for the little. While attending to some little picayune detail that ought to be left to a clerk, stenographer, or office boy, men lose some great advantage they might have gained had they been free to attend to it, just as short-sighted economists will lose a chance to make $100 in the future in trying to save 50 cents today. They do not realize that a small coin close to the eye can shut out the sight of a gold eagle.

The great thing is to get the right perspective, not to emphasize the wrong thing. The man whose head is buried in details cannot plan large things.

It is a great art to know what to leave undone, to know how to weed out the less important things and to spend one's energies in doing the things which will count.—Orison Swett Marden in Chicago Daily News.

How to Kill Flies on Ceiling.

Flies that take refuge on the ceiling, at night or in cool weather, may be captured without difficulty. The handle is sawed from an old broom, and a tin lid is attached to the end by driving a large tack through it into the stick. The tack should be driven firmly to make the lid rest solidly and prevent leakage. The lid is partly filled with kerosene and is held for a few seconds against the ceiling directly under a fly. The insect, becoming more or less torpid with the cold, will be further stupefied by the fumes of the oil and will drop into the lid.

How Ancient Dandies Slept.

According to a Greek writer, effeminate dandies in ancient Greece sometimes slept on beds of sponge. Fashionable people in Athens slept under coverlets of dressed peacock skins with feathers on. Cushions of pink and purple were used for their heads.

How Some Coffee Is Made.

In coffee-growing countries a suffusion of the leaves of the plant is held by many to be superior to that made from berries.

SEWER GANG CONTINUES WORK

When the bad weather set in last week the sewer gang had about given up ohpes of doing any more this fall but when good weather again set in the fore part of the week they decided to try again. Monday they blasted dirt and filled in the man holes and got the ground in shape for the winter. At the time of this writing they intend to put the big machine to work again digging trenches with the hopes of getting on better digging ground to open their spring work.

Martin Christensen, better known to his Klemme friends as "Submarine," came over from Garner Saturday on business.

Clara Kirkwood of Belmond, was a Klemme caller last Friday between trains. Clara is working at the big beet factory at Belmond and is employed with the night shift running one of the machines.

Harry Rice and son, Chester, of Garner, were Klemme visitors Monday. They drove over in their car.

Mr. Henry Freie and daughter Miss Viola, left Monday for Cedar Rapids for a week's visit with relatives.

Dr. R. N. Reuber returned Friday from a week's stay at Iowa City and Goldfield. The Doctor visited the hospital at Iowa City and attended clinics while there. He also visited a short time with his cousin, Dr. Zinn, at Goldfield.

Answers the Purpose.

"Your true lover is often at a loss for words." "But nature makes that up to him by supplying him with an extensive vocabulary of gurgles, sniffles and sighs."—Louisville Courier-Journal.

Boiling Cracked Eggs.

Cracked eggs can be boiled safely by placing a little vinegar in their water.

CHANGE IN ROCK ISLAND TRAIN TIME

We want to call the attention of our readers to the fact that the evening passenger train going south will change time Monday. The train will leave Klemme a little later, going at 6:15 P. M.

John Terhufen has purchased another Ford from E. G. Ell. We believe Mr. Terhufen holds all records as a Ford user as we are told this is his sixth Fod besides owning various other cars.

Clarence Cortley and Charley Shirley, two young men who have worked around Klemme for some time, left Saturday fr their home in Missouri to spend the winter. They drove back in their car. They intend to return to Klemme again next season to work on fams.

Wm. C. Gast, of Garner, was a Klemme visitor Monday and also transacted business.

Mrs. C. L. Blumer was a Goodell visior between trains last Friday.

Mrs. Harry Forristall and daughter Esther, of Belmond, were Klemme visitors last Friday.

Miss Leoda Smith had her tonsils removed at Mason City last week Wednesday.

Mrs. John Wiley came from Grinnell, Iowa, last Thursday to spend the winter with her daughter, Mrs. M. O. Hocum. Mrs. Wiley also spent last winter in Klemme.

Clarence Bachman resigned his position at the Ray White restaurant at Forest Ciy last week and returned to Klemme. Thursday evening he left for points in Illinois for an extended visit with relatives and will perhaps work there this winter.

Mrs. Atherton, of Belmond, w... Klemme visitor last Thursday.

Mr. Markle and Ed. Martin... Goodell, were Klemme visitors ... urday.

FOUR NEW HAMPTON YOUTHS JAILED FOR SERIES OF THEFTS

New Hampton—Today County Sheriff Tietjen reports he has placed behind the bars four local young men ranging in ages from 19 to 21. They will be bound over to the grand jury. Out of consideration for parents and relatives, names will not be made public at present.

All four of the young men are implicated in the robbery of $70 from the Leichman pool hall last spring. They art also concerned in the near robbery of the Shaw confectionery in June. City Marshall O'Day heard a noise in the Shaw place. He fished his light through the window and saw some one laying under the shelf and working at the cash drawer. He called to his confederate across the street. In the men time the young man inside skipped out the back door.

These same young men are alleged to have stolen a small diamond ring and a child's bank containing about $7 from the Peter Souekep home.

Last Thursday night the same young men were implicated in taking a car out of Deputy Sheriff Ward Hammonds garage. The car was used to go to a dance at Lawler. It was well battered up before its return.

Blood hounds were put on the trail in the summer but were unsuccessful in locating the parties.

Baptism in Cyprus.

A baptism in Cyprus is a curious ceremony. The infant is rubbed with oil by his godfather, blown upon in the face by the priest and waved in the air, then dipped several times in the font, and again anointed with oil on various parts of the body.

SO CALLED FARMERS "STRIKE"

The Fam Bureau has not ordered a strike. The daily newspapers have bounced onto this term because it makes a "striking" impression upon the ears of their readers. But it gives the public a false impession. It gives the thought that the farmer is holding his grain because he is ordered to by the Farm Bureau, whereas the Farm Bueau does not even demand it of him. In a letter received from President Hunt of the Iowa Federation he says: "It is our thought that the market is voer sold and that prices will be better later on."

In other words the Federation simply advises that with the markets demoralized the farmer had best, if he can, hold his poducts until a little later when he will probably come nearer getting the cost of production. Man farmers know this to be good advice and yet are not able to tke advantage of it because of curtailed credit. The renter or any other farmer who is foced to cash in is caught between two fires—low prices and no money with which to hold.

A satisfactory system of rural credit will obviate this difficulty. It was found that a little change in the state constitution was necessary. The farmers have already started in to get results as we evidenced by their over whelming vote for changing the constitution.

In the meantime let no one become alarmed about a farmers "strike."

There is no such thing and it is quite unlikely that there ever will be.—LuVerne News.

POINTS ON STORING THE AUTO

Paint Will Be Brighter if Mud is Removed at Once.

In storing the Auto for the winter it is a good plan to wash the car and store it clean. According to the engineering department of Iowa College the tires should either be rmoved or else the weight of the car taken off them. Rubber deteriorates when a strain in one place is left over a long time.

If the garage is cold the water must be taken out of the radiator or something will freeze. The fine pipes break easily. A pitcock is found at the bottom of the radiator and it is a good plan to turn over the engine a few times at the end to get all the water out of the cooling system.

It is often a good plan, especially where the car has been run for more than one season, to drain the crank case of the old oil as it contains sediment and which will harden. After the oil is out flush out the case with kerosene and put in good oil. This will insure free working order in the spring.

CAUGHT IN MACHINERY

Walter Blackburn, Young Farmer In Grundy.

What came near being a fatal accident happened on the Lewie Rhoeder farm near Lincoln about eleven o'clock last Friday forenoon resulting in Walter Blackburn, a young man twenty-nine yeas of age being terribly injured.

Mr. Blackburn, whose home is at Plymouth, Mo., has been husking corn for Mr. Rhoeder the past season and while unloading it at the crib last Friday forenoon, his clothing became entangled in the tumbling rod of the elevator. He was drawn into the machinery in such a manner as to have the flesh stripped from the lower part of the abdomen and clear down to the rectum. He was so badly torn that a part of the intestines were exposed through a rupture from which the young man was suffering. He was hurried to the hospital at Grundy Center, given careful attention by physicians, and now is doing well. The young man's parents live at Plymouth, Missouri. —Ackley World-Journal.

The weather of the past week was a new experienec to some of Belmond's residents who have come here from Mexico during the past summer. E. A. Pierce tells of seing one or two men on one of the extremely frosty mornings of last week go out into the yard and break and pick up and examine the ice from a little pool. It was a strange thing for him to see ice laying around right out doors or indeed it may be that it was the first ice he had ever seen. —Belmond Herald-Press.

BOY MEETS DEATH AT FOREST CITY

Archie Ingebretson, of Ellsworth, Iowa, a student of Waldorf College, Forest City, died Monday as a result of an injury received in a dare devil leap-the-gap performance with Carl Otis in a car on Armistice Day. Otis, who it is charged chided Ingebretson, calling him a coward when he expressed fear at taking part in a long leap from an elevated runway, was arraigned before Mayor Oliver Gordon Monday and bound over to the grand jury t answer to a chage of manslaughter. A cash bond of $2000.00 was furnished by his father to secure his liberty.

The mishap which caused his death was part of the excitement furnished Armistice Day at a foot ball game at the fair grounds at Forest City. Theodore Swanson, another student, was in the car with Otis and Ingebretson when the accident happened and received minor injuries.—Britt News-Tribune.

MANLY HUNTER WHO WAS THOUGHT LOST IN CANADA RETURNS

Manly—Suspense over the prolonged absence of Ben Lake of the Rock Island road, who with Lee Andre, a local druggist, went up to the Rainy Wood district in southwest Ontario, Canada, in quest of Big game has been broken. The railroad man returned unannounced Monday with a giant moose to show for his efforts.

During the outing Mr. Andre bagged a fifteen hundred pound moose, and Mr. Lave remained in the land of the antlered tribe until the game laws opened up so he could bring the huge trophy bacg to Iowa with him.

Mr. Lake's leave of absence and railroad pss expired on Oct. 26. At the lst word from him, about a month ago, he stated he expected to return before mentioned date, but approximately a fortnight passed and Mr. Lake had not returned nor had any communication been received from him. Naturally his friends were somewhat apprehensive concerning the meaning of this long-delayed return and made numerous efforts to get in connection with Ben, all of which were of no avail. Several telegrams both to Mr. Lake and to nearby posts were dispatched recently. The ones to Mr. Lake were of course unanswered and the other patis knew nothing of his whereabouts.

Bill Morrow, another local nimrod became so worried about his friend that he left in quest of his missing friend. Mr. Morrow is well acquainted with the country up there, having been in and around there. Meanwhile local friends waited some word from either the "pursuer or pursed."

The return of Mr. Lake brought a sigh of relief from all quarters.

OUR 1920 "THANK YOU"

On the 25th of this month we will celebrate that day which long ago was set aside by our Forefathers as a dy on which to give thanks for the many good things received during the year.

This 1920 Thanksgiving should mean more to us than ever before. Greater things have come to us. Never has this Country been more prosperous. Never has the outlook been so bright. Never was a chance for greater happiness than there is now. Let us consider well our many blessings—and then say a "THANK YOU."

Personally we are thankful for the loyalty and patronage of our many customers. We would like to pay a visit to each one and thank them in person. Since this is not resonably possible, however, we are extending this "THANK YOU" through the pages of the Klemme Times.

Sailed on the Websterian.

The bank cashier, disguised, was boarding the steamer with his loot, when he noticed a man standing by the rail who looked like a detective. "Do you think that when he sees me on the seas he will seize me?" he asked of his accomplice. "I apprehend you need not apprehend that he will apprehend you," responded the other comfortingly.—Exchange.

Prevalent Complaint.

All the world's a stage and one of the most pathetic of all the pathetic features of everyday life is the way mediocre performers so often contrive to get into the leading roles for a time.—Ohio State Journal.

MOTHER AND CHILD DIE FROM BURNS

Mrs. .J F. Handy and Son Tom Die as Result of Burns Sustained in Fire Saturday.

KINLDED FIRE WITH GASOLINE

Hayfield, Iowa, Nov. 16.—Special —One of the saddest accidents that has ever occurred in this locality took place about 3:30 Saturday fternoon when Mrs. J. F. Handy who resides a half mile north of here and her three year old son, Thomas were so severely burned that the accident has proven fatal to both. The son living only a few hours after the accident and Mrs. Handy passing away early Tuesday morning.

Mrs. Handy and the two smallest children and Zella the 17 year old dughter were all that were at home at the time of the accident, Mr. Handy being at Britt on business and the rest of the men in the field husking corn. Mrs. Handy went to the wash room near the house to build a fire and apparently used gasoline instead of kerosene as she supposed and the can exploded throwing fire all over her and little Tom who was following his mother took fire also. Zella was upstairs and met her mother at the door and threw her to the floor and covered her with bedding and did most heroic efforts and finally got the fire extinguished when the agonized mother called her to save "Tommy." This was the first that Zella knew there were two victims and ran to her brother and threw him in the water tank extinguishing the fire at once. Running to the telephone she gave Hayfield the S. O. S. and soon two cars were on the way to give aid. All that medical skill and careful nursing could do was done to relieve the suffering but in spite of all both lives slipped away and the mother leaves seven children taking only one with her.—Britt News-Tribune.

WE ARE "HITTING THE TRAIL" THIS WEEK

You may wonder why the Times is ahead of the regular schedule this week but Ye Editor has fine ideas of his own. You remember last week we announced that we were the happy daddy of a fine boy at Kansas City, well we are hitting the trail for that city just as fast as the railroad will carry us to see that boy and mamma. So far we have learned that he is good looking (don't resemble Ye Editor then) he has black hair and a nice dimple on his chin. He must be some lad and we are very anxious to see him. In the meantime we wish our readers a full stomach for Thanksgiving and if you have too much Turkey stop eating for a week.

Bull Baiting.

This was a sport once popular in England, but declared illegal in 1835. A bull was attacked by dogs, and sometimes the nostrils of the bull were blown full of pepper to increase his fury. Another form of the sport was to fasten the bull to a stake by a long rope and then set bulldogs at him, one at a time, which were trained to seize the bull by the nose. The bulldog seems to have been developed for this sport from a short-eared mastiff called "alaunt."

"King's Tobacco Pipe."

This is a popular nickname for a peculiarly shaped kiln or furnace in the northeast corner of the tobacco warehouse belonging to the London docks. Here contraband goods, such as tobacco, cigars and tea, which had been smuggled in, were burned. Seized and unclaimed goods are now sold at periodical sales, or distributed among public institutions, but damaged and worthless goods are still burned.

Iodine Dangerous Drug.

Fumes of iodine have recently been urged as a method of administering that drug preferable to the usual tincture. It has been shown by experiments that fumes are absorbed through the skin, and when inhaled are absorbed by the lungs, but it was shown also that inhalation is very dangerous even in small quantities, especially when there is any disease of the respiratory passages.

Only Interest Worth Anxiety.

Education is the only interest worthy the deep controlling anxiety of the thoughtful man.

A Bit Too Much.

The new quartermaster on the good freighter Sioux was at the wheel and was rattled. First the ship swung madly to port, then to starboard, and then back again. The old skipper stood her antics as long as he could, and then burst forth: "Say, son," he shouted, "I don't mind your writing your name in the old pond, but for the love of Mike, stop going back to read it!"—American Legion Weekly.

HOLY CITY AS IT IS TODAY

Redeemed but Waiting to Be Clothed in Raiment That Is But Her Just Due.

It is well, as we leave the gentle allurement of flowers in the Garden of Gethsemane and turn toward the city, that our hearts have first been filled with serene joy, writes William D. McCracken in Asia magazine. We regard the fearfully tried city with something of the compassion that the Master felt for it. Seventeen times destroyed—bitterly hated—anxiously sought—how desperate a history since Nebuchadnezzar captured it more than twenty-five centuries ago. And only the othr day, it seems, at Christmas time in 1917, Jerusalem was captured again, this time by its friends, the British, after an agreement with the Turks that the city itself should not be bombarded. There was some fighting on the Mount of Olives, and reconnoitering airplanes dropped a bomb or two in and about the Garden of Gethsemane. But Jerusalem had been captured for the last time, and the last offensive was devoid of evil.

Redeemed today, but in her nakedness, Jerusalem waits to be clothed. She has as yet no grace, no covering for her ugly wounds. Some day her sides will glisten with the brightness of a heavenly radiance; she will be washed and anointed like a bride waiting for the bridegroom.

WILLING TO PAY THE PRICE

Small Boy Satisfied That the Bill for His Three Days' Fun Was Not Exorbitant.

At last little Freddy was allowed to visit grandpa all alone. They were great friends, and had long waited for the great day.

Freddy had the time of his life. Grandpa saw that he wanted for nothing. The small boy ate more cream buns in those three days than he would otherwise have done in three years, while his pockets bulged all the time with candies.

But there comes an end to everything, and Freddy went home again, pale yellow of complexion, and languid and feverish. Mother promptly sent for the doctor, who ordered him to bed, and sent him some very unpleasant, but doubtless healing medicine.

Grandpa came next day and was permitted to creep upstairs to see how the sufferer was faring. He found the small boy lying wan and pale on his pillow, but received a watery smile as a welcome.

"Oh, grandpa," said the weak little voice, "I've been awfully bad—but it was worth it."

Hopelessly Out of Fashion.

Despite his shabby clothing and empty pockets, it was evident that he had seen better days.

A sympathetic soul began to chat with him, anxious to hear his story. Over a—er—cup of cocoa he told his tale.

"Yes," he said, "I've been quite a personage in my time; in fact, the cynosure of all eyes."

His auditor waited in silence for an explanation.

"I was the tattooed man in the circus," he went on.

"And how did you lose your job?" he was asked.

"Public went crazy on moving pictures," he said, "and mine wouldn't budge!"

Same Thing.

Franklin D'Olier, the head of the American Legion said at a banquet in Philadelphia:

"Two doughboys were exchanging war memories the other day.

"'I was never much stuck on myself,' said the first doughboy, 'but, all the same, I brought a cross back with me from over there. Did you bring back a cross, Bill?'

"The second doughboy puffed thoughtfully on his pipe.

"'Well,' he said, 'I brought back a French wife.'"

Couldn't Fool Dorothy.

Dorothy, age three, whose mother had been trying to discourage her use of coffee and tea, one evening at lunch gave her a cup of "tea" in which sugar and cream played the most important part.

Dorothy, after tasting the beverage, looked at her mother and said:

"Mamma, you did not put any tea in this cup, for I can't feel it in my mouth."

Remarkable Diary.

Pepys' diary is a unique work by Samuel Pepys (1632-1703), giving a curious and faithful account of the times in England from 1659 to 1669. It includes almost every phase of public and social life, from the gayeties of the court to the pettiest detail of week-day existence. The book is written in shorthand, and was not discovered until a century after the author's death. It was deciphered and published (although in a mutilated form) by Lord Braybrooke in 1825.

Metered Mail Is Next Novelty

New Electric Device Will Permit Business Concerns to Cancel Their Own Output.

VALUABLE TO LARGE MAILERS

Will Save Several Hours in the Handling of Mail and Will Protect Firms From Loss of Stamps Through Thefts.

Washington.—"Metered mail" is to be the next novelty in the rapidly developing postal system of the country, remarks the Washington Herald. It has received the indorsement of congress and the postoffice department and is scheduled to make its appearance within the next two months.

Metered mail will be sealed, stamped and canceled by the individual owner of a meter. The mail then will be taken to the postoffice and placed immediately upon an outgoing train without necessity of remaining in the postoffice until handled in routine fashion.

Metered mail is provided for in a rider on an agricultural bill passed at the last session of congress. This rider grants to first class mail matter the registered permit privileges now enjoyed by second class mail. Instead of being required to stamp each letter a firm now will have the privilege of obtaining a mailing permit, thus expediting its mail.

Under the postoffice plan, which soon will be in effect, firms will be able to lease postal meters that have been authorized for use by the postal authorities. The local postoffice authorities will register the meter and will issue a permit number to the firm.

Meter Operated by Electricity.

The meter will be a rather heavy metallic box, about the size of a lunch box. It will have two small doors which will be locked by the postal authorities and securely sealed. A firm will take the meter to the postoffice and buy a desired amount of postage. The postal authorities will adjust the meter so that it will stamp and cancel just so many letters and no more. The number of letters for which advance postage has been paid will be automatically registered on the lower of the two doors and the postal authorities will keep a record of the amount of postage sold to each meter owner, so that an absolute check may be kept.

The firm will keep the meter at its offices except when it is necessary to buy more postage. The meter will be operated by a small electric motor. The letters will be fed into the meter in batches and will be sealed, stamped and canceled at the rate of 250 a minute. As the letters are handled the meter will automatically record the number of canceled letters on the upper door. The user will adjust the mechanism of the meter so that the time stamped on the letters will be one hour in advance of the time of delivery of the letters at the postoffice.

Help Large Mailers.

The meter, it is expected, will prove of great value to large mailers. In addition to saving time and labor the meter will enable large firms to expedite their mail by at least several hours. The meters will protect firms from loss of stamps through thefts or carelessness and will also give a mark of distinction to the firm's mail, all of which will bear a private permit number, a mark of big business. The metering of the mail also will lighten the work of postoffices and will lessen the number of postage stamps needed, thereby making it possible to reduce government forces and expenses considerably.

Metered mail will not bear regular postage stamps, but merely a permit number.

TO SEIZE DUKE'S IDLE LANDS

Spanish Peasants Say Luna's Ancestors Stole 25,000 Acres of Fertile Soil.

Huesca, Spain.—The provincial governor has been informed by a delegation representing local peasants that they intend to seize the lands now held by the duke of Luna, contending that he is wrongfully in possession of them.

The delegates argued that the duke's ancestors stole the lands, which he now refuses them permission to cultivate. They declared that the duke's estate in the neighborhood constituted 25,000 acres of fertile soil, the cultivation of which would furnish a livelihood to several thousand persons, who, not being allowed to cultivate the land, were compelled to emigrate.

The governor, while recommending prudence on the part of the peasants, promised to remain neutral in the dispute.

Triplets Lived.

Wellsboro, Pa.—Tioga county has produced at least one set of triplets that have lived to be more than ten years old. On January 12, 1904, two daughters and a son were born here to the wife of Dennis W. Navie. They were named Dorris, Dorothy and Dennis, and always lived in this community until a few weeks ago, when they became residents of Towanda.

Dennis is an athlete and his sisters are strong, robust, normal girls.

Where Are the Cutters of Yesterday?

Greensburg, Ind.—Although corn cutters can average between $9 and $10 a day, farmers say they are unable to get labor and the oldtime "cutters" can't be tempted out of retirement.

Twins Marry at Corydon.

Corydon, Ind.—A double wedding in which sisters became brides of twins took place here. Elmer O. Schweinhart and Josephine Hall and Emery L. Schweinhart and Elizabeth C. Hall were married.

Lot of Balkan Poor Unhappy

Peasants Work From Dawn to Dark and Have Little to Eat Except Corn Bread.

HALF OF CHILDREN SURVIVE

Homes Are Made Attractive on the Outside, Although They Are Bare of Comforts—Peasants Are Simple and Honest.

Belgrade, Serbia.—To the American visitor accustomed to the ordinary comforts of life it is a constant source of wonder how the peasants and poor of the Balkans can live on the meager food they have. Poor cornbread, supplemented by goat's cheese or ordinary leek or onions, forms the diet of a large part of the village population. This slender regime produces robust bodies, strong muscles and rosy cheeks. The adage that bread is the staff of life finds its best proof here.

On the whole, the poor of the Balkan countries have an unusually hard lot in life. Their poverty is practically permanent. Their plight seems to excite little sympathy from those who are well off. There is a calloused indifference to the sufferings of the poor which strikes an American as almost heartless. In few if any of the Balkan states does the government make any provision for care of the poor. This work in the past has been left largely to foreign relief agencies and private charitable organizations.

Eight-Hour Day Unknown.

The eight-hour working day so common in the United States is unknown in the Balkan rural districts. The peasant works from sunrise until after dark. He is so bent and weather-beaten that he looks twice his age after thirty. In some cases he belongs to one of the nomadic tribes and leads an existence unknown in the country districts of America. At night one often passes whole wagon loads of them on the road going from town to town. Every man is asleep on his load, and is not disturbed by thoughts of burglars or highwaymen.

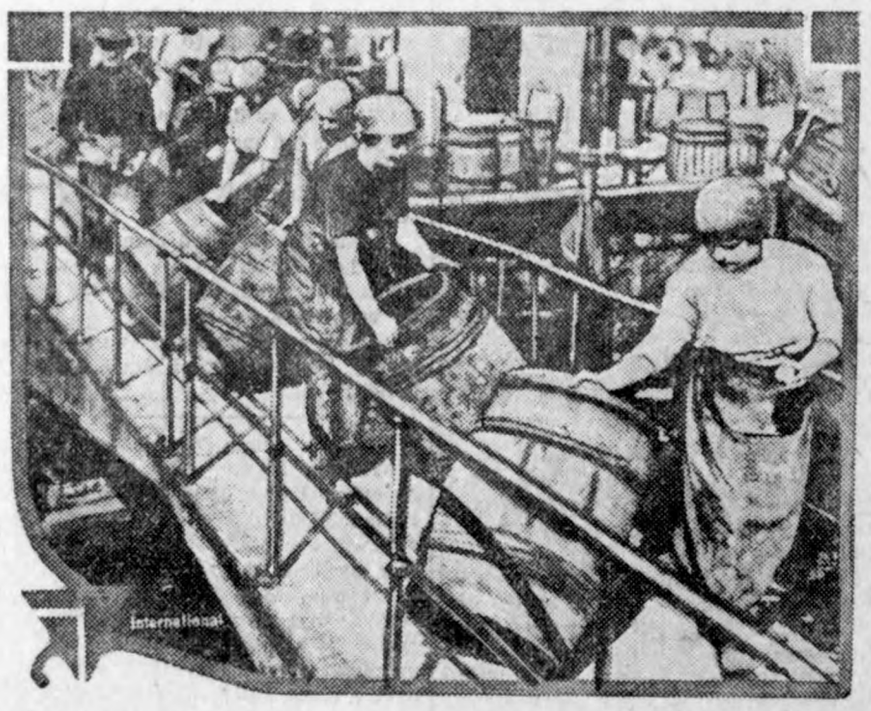
The peasant removes his hat to everyone better dressed than himself and gets his ox-cart off the road for every automobile. He is a simple, honest, home-loving person with much homely virtue. The peasant women have enormous families of children, only about half of whom survive the rigors of child-life in the extreme conditions that prevail in the Balkans.

Cottages Are Crude.

The peasants' cottages are crude structures with thatched roofs and mud walls. But they contrive to adorn them with attractive exteriors and take great pains to produce the utmost decorative effect. This embellishment frequently takes the form of a porch with a small background bearing a border design whose contrasting colors and composition suggest the patterns used by the Navajos of the American Southwest in blankets and carpets.

But while the exterior of the home is attractive, a peep into the interior shows the economic stress under which these people live. There is seldom any kind of food except coarse cornmeal. The cooking utensils are limited to a few home-made pewter pots. The furniture consists of a table and a few rudely constructed benches. The beds usually are upon the floor or upon rough-hewn boards.

Scotch Herring Girls at Work



Scotch herring girls at Scarborough, England, rolling the herring barrels from the deck to a steamer. The herring girls, who understand the curing and packing of the fish, follow the herrings when they migrate south.

Woman With Rolling Pin Knocks Out a Burglar

New York.—When Mrs. Sophie Petrowsky returned to her home at 108 Bedford avenue after shopping, she discovered a man ransacking her home. Seeing her he rushed out with a bag of loot and she followed, first arming herself with a rolling pin. In the street in front of the house she caught up with him and knocked him senseless with the rolling pin.

At the Bedford avenue station the man said he was James Duane, 22, of 108 Bedford avenue, Brooklyn. The police say he has been out of Sing Sing only two months after serving a four-year term for burglary.

The "baby tanks" of the French army have been generally adapted for agricultural purposes.

Jap Governor for 700 Isles

South Sea Group to Have Executive and Thorough System of Administration.

Tokyo.—The 700 islands of varying size in the South Sea group for which Japan obtained mandatory rights at the peace conference will have a Japanese governor and a thorough system of administration.

The governor at present will remain under the direction of the navy, which has been in control of the islands since their acquisition five years ago. It is possible that later all connections between the navy and the islands will be severed.

The League of Nations council in November is expected to work out a detailed scheme for the application of the principle of trusteeship by which Japan retains her control.

The idea involved in enlarging the scope of civil administration is to establish three distinct administrative sections of domestic affairs, colonial affairs and police affairs.

DUTCH STUDY YANK METHODS

Send Officer Observers to Watch Work of United States Army on the Rhine.

The Hague.—The Dutch war department has decided to study American army methods, and with the permission of the United States government has sent a commission of officer observers to the American army on the Rhine.

Chimes Play a Hymn of Death.

Fort Wayne, Ind.—Few understood why the program was changed when Edward F. Yarnelle gave a recital on the new chimes erected in the Presbyterian church tower, but a telephone message from the bedside of a dying woman asked for "I'm Going Home to Die No More."

CORK PRISONERS ABANDON STRIKE

Agree to Accept Food on the Ninety-Fourth Day of Their Fast

TO RECRUIT TO FULL STRENGTH

Orders Have Been Sent Out to Increase Second Division.—Thirty Thousand Aided by the Red Cross.

Cork.—The nine surviving Irish hunger strikers in Cork jail have reluctantly agreed to accept food, thus abandoning the longest fast in history as a protest against their imprisonment. They had refused food in any form for ninety-four days.

This was revealed when a message received by Lord Mayor O'Callaghan from Arthur Griffiths, founder of the Sinn Fein organization, was given out: "I am of the opinion," read the message, "that our countrymen in the Cork prison have sufficiently proved their devotion and fidelity, and that they should now, as they were prepared to die for Ireland, prepare again to live for her."

This message has been transmitted to the nine surviving hunger strikers in the jail.

Thirty Thousand Aided by Red Cross.

Washington, D. C.—Thirty thousand sufferers from seventy-three disasters which occurred in the United States during the last year received aid from the Red Cross, the cost of the work amounting to $900,000. In reaching 164 communities affected by the disasters, the Red Cross called into service virtually every phase of its activities.

Preparedness for disaster alleviated distress and prevented untold suffering, according to a statement issued from the national headquarters and based on the forthcoming report of the organization for the year ending June 20.

The disasters included nineteen tornadoes and cyclones, two hurricanes, two cloudbursts, one hail storm, one landslide, two earthquakes, fifteen fires, one explosion, nine floods, ten shipwrecks, one train wreck, four riots, one motor accident and two droughts.

RECRUIT TO FULL STRENGTH.

Orders Sent Out to Increase the Second Division.

Washington, D. C.—Telegraphic orders have been sent to the army recruiting stations to recruit the Second division to its full strength immediately. It was explained at the War department that under the provisions of the national defense act one division of the army must be kept at full strength, and that the Second division had been selected by the general staff as the unit to be maintained at full strength. The division, which is stationed at Camp Travis, Tex., is 6,000 short of its full strength, and the War department said that the recruiting service never before in time of peace had been given a similar task. Heretofore recruits for the Second division have been drawn from the states of Texas and Oklahoma, but under the new order they will be taken from any place in the country.

Says Due to Lack of Preparedness.

Lincoln, Neb.—Preparation against war and not for war was the exhortation of Major General Leonard Wood, who spoke here to over a thousand veterans of the world war after the big Armistice day parade. A great army of men sufficiently trained in military tactics for immediate call and a standing regular army just large enough for police needs of the country is the remedy the general advocates for the future wars which he is sure will come.

"Many were wounded in the uniform of the United States army," the general said," and many will be in the years to come. Lack of preparedness, lack of the recognition of the fact that was is inevitable are the reasons that one-third of those who died in the world war are now buried across the sea. The men in France, if they could speak to us, would say, 'We are the dead for lack of preparation.'"

Planning for World Exposition.

Philadelphia.—Steps were taken at a meeting of 100 prominent citizens in the mayor's office for the holding here in 1926 of an international exposition marking the one hundred and fiftieth anniversary of the signing of the declaration of independence.

Unemployment Shows Increase.

New York.—A survey of the labor situation in every section of the country shows unemployment is increasing generally, though with few exceptions the situation is not acute.

Will Stand On Her Rights.

El Paso, Tex.—Mexico will not accept recognition from any government "under conditions that will lessen the respect due" the Mexican government, according to an announcement by Provisional President de la Huerta of Mexico. The announcement was received by Luis Montes de Oca, Mexican consul general here. He said it had been sent by the provisional president to the Mexican representative at Washington and by him forwarded to El Paso.

CANNOT ENFORCE 2-CENT LAW

Some Agreement may yet be Arrived at on Versailles Covenant

Federal Court Renders Decision Declaring Three Cents Per Mile is Reasonable Rate.

Paris.—The view is expressed in official circles that the French government will be ready to co-operate with the authorities at Washington in forming something different from the covenant of the league of nations as drawn at Versailles.

This statement was made in official quarters in referring to the declaration of President-elect Harding, as cabled from Marion to the French press, to the effect that the Verasilles covenant was now "deceased." This is interpreted by officials as applying to the covenant as drawn at Versailles, and as indicating that some other agreement must take its place. To that end, it was stated by officials, the French government would be ready to give its collaboration.

CANNOT ENFORCE 2-CENT LAW.

Federal Court Says Three Cents is Reasonable Fare.

Omaha.—Nebraska's people will continue paying 3 cents per mile railroad fare until the legislature meets and enacts a new railroad fare law or the United States court renders a new decision. The federal court, with Judges Sanborn, Wade and Woodrough, has passed a decision making an injunction of the temporary restraining order issued some months ago preventing the Nebraska state railway commission from enforcing the Nebraska 2-cent fare law.

Following the decision of the court, Commissioner Thomas L. Hall said the state commission will hold a meeting next week and decide upon the further steps to be taken in the fight to keep the rates down.

To Create Tax Commission.

Lincoln.—The creation of a tax commissioner by the new constitution of the state will probably be the only appointment which Governor McKelvie will have to make when he again takes the oath of office in 1921, unless he should find some resignations or should "fire" some of the men who have held office for the past two years. Secretary Osborne of the state board of assessment and equalization is likely to secure the appointment.

Bank Earnings Largest in History.

Washington, D. C.—Earnings of National banks during the fiscal year ended June 30, 1920, were the greatest in their history, according to a compilation made by John Skelton Williams, comptroller of the currency. He reports they earned 24 per cent net on their capital, and 13 per cent on capital and surplus. The gross earnings increased $594,000,000 in seven years, or 115 per cent.

Nebraska Team Defeats Rutgers.

New York.—The University of Nebraska football team defeated Rutgers here at the Polo grounds, 28 to 0. The light Rutgers eleven was unable to stand the line pluunging of the Cornhuskers, who did not use the expected open style play, but kept to straight football.

Armenians Are Massacred.

London.—The Armenian town of Hadjin has been captured by Turkish nationalists, who have massacred the inhabitants, numbering 10,000, according to a dispatch to the Armenian bureau in London. These Armenians had been holding out against the attacking forces since March last.

Dry Measure Loses in South Dakota.

Huron, S. D.—The South Dakota direct legislation organization in a statement declares that returns received by it from county auditors showed that the prohibitory law submitted to a direct vote of the people to strengthen prohibition enforcement in this state was defeated by a majority of more than 10,000 at the late election.

Flour Lowest in Four Years.

Minneapolis, Minn.—For the first time in almost four years, flour sold under $10.00 a barrel at the mills here last week. Quotations on family patents broke 35c to 37c, making the range of prices $9.65@10.00 a barrel.

Allied Veterans to Meet in Paris.

Paris.—An inter-allied conference of organizations representing allied combatants in the world war will open in Paris November 28. The United States, through the American Legion in France, Great Britain, Belgium, Italy and Czecho-Slovakia, will be represented.

British Coal Strike Called Off.

London.—The executive officers of the miners federation have decided to declare the coal strike ended and advise the men to resume work.

Asks Leave to Increase Capital.

Washington, D. C.—The Chicago, Burlington & Quincy railroad has applied to the Interstate Commerce commission for authority to increase its capital stock by $60,000,000 and to issue 6 per cent first and refunding mortgage bonds to the amount of $100,000,000. The issue of capital stock would be distributed pro-rata among the stockholders of the road. This would transfer to capital account $60,000,000 of the railroad's account of about $200,000,000

Back Given O

There's surely some reason lame, achy back. Likely it's neys. A cold or strain oftimes the kidneys and slows them may be the reason for that backache, those sharp pains, worn-out feeling. You may aches and dizzy spells, too, ing bladder irregularity. Use *Kidney Pills*. They have helped sands. Ask your neighbor!

An Iowa Case

Mrs. Phoebe Harsch, 132 N. Moore St., Ottumwa, Iowa, says: "I had kidney complaint and suffered with dull, nagging pains in my back, which weakened me. Mornings I was sore and lame and had frequent dizzy headaches. Rheumatic pains caused my joints to ache. My kidneys acted irregularly and my ankles swollen. I used Doan's Kidney they relieved the rheumatic backache and put my kidneys working order."

"I'LL MARRY YOU."

Synopsis.—Tom Shelby, a rancher, rides into the frontier town of Ponca looking for a good time after a long spell of hard work and loneliness on the ranch. Instead he runs into a funeral—that of Old Calkins, a retired army man of whom little is known. A beautiful girl in her teens, survives him. McCarthy, a saloon keeper and Ponca's leading citizen, declares that the girl, now alone in the world, should marry. Shelby enters a hunt for eligible husbands when the minister goes to confer with the girl. She agrees to pick a husband from the score of men gathered up in her home. To his consternation, she selects Shelby, who had come along merely as a spectator. He declines the honor. Instead, the girl dismisses the assemblage.

CHAPTER III—Continued.

—3—

"Right ter h—l, I hope," the Buffalo J. P. burst out, forgetting his judicial role in a sudden expression of feeling. "Whatever caused the old butt in?"

"He didn't intend nuthin'. Tom wasn't that kind. He just drifted 'long for the fun. Yer can't blame him none the gurl took a shine his way." The two disappeared, their voices rumbling, and Shelby got to his feet and moved along the edge of the crowd where he could view the shack clearly. Through the window on that side an unobstructed blaze of light streamed forth, but even as he stood looking at it the girl appeared fully revealed in the glare and drew down the curtain. He saw her clearly, like a picture in a frame, one round arm extended to grasp the shade. He drew in his breath, almost of astonishment, conscious of the rapid beating of his own heart. By heaven, she was pretty! He had never thought of it before; but then, in that ruddy glow the strange impression took possession as something entirely new. Everything served to strengthen his purpose. He would not play the part of coward; he would go in and explain. He would make her understand just how matters were with him and why he acted as he had.

But this was accomplished hesitatingly and in doubt. He was at the door twice before he found sufficient courage to knock lightly. There was no response and he used his knuckles much louder, intensely conscious of desire to turn and run away. But there was no opportunity. The latch clicked sharply and the light streamed suddenly into his face, fairly blinding him.

"So it is you back again?" she asked coldly. "What did you want?"

"It—just to have a word with you privately," he explained lamely, shading his eyes. "I—I thought maybe I could explain."

"Explain what?"

"Why—why how this thing happened—this mess." His confusion rendered him almost incoherent. "You see, I—I don't want you to think I'm that sort."

"But you don't? Well, I'm not that sort either. Come along in, if you want to; I'll hear what you have to say."

Shelby never felt quite so awkward and impotent before in all his life, as he stood standing there, fiddling with his hat in his hand, while the girl quietly closed the door behind him. Her own appearance of ease, even of amusement, only added to his deep embarrassment.

He saw the first time he really took in the room, how plainly it was furnished; a deal table, two chairs, a stove, a few books on a shelf, with a tall clock between. Everything was cheap, but immaculately clean, and as his eyes wandered back to the girl that was what impressed him most about her—cleanliness. It was evident in face and hands, in the simple skirt and white waist, in the rich strands of hair.

"Well," she said pleasantly, "I reckon I might as well sit down, as long as you are here."

She found a chair and dropped into it, and she took the only other one, her hands clasped in her lap and her dark eyes watching him with unconcealed curiosity.

"I didn't expect to see you again," she broke the silence which was becoming awkward. "What was it that brought you back?"

"The fact is I don't know," he explained, flushed at the sound of his own voice. "I—I sorter got an idea you might be lonesome and—and a bit down at me, an' so I thought maybe I'd after drop in an' tell you how it all happened. But it don't look like you was mad."

"No, I'm not mad. I flared up for a minute, but that's all over with. I ain't botherin' none about that outfit."

"Oh I see," somewhat more at ease now, crossing his legs. "I reckon that's about the right way to look at it. Whatever made you pick me?"

"Why, naturally, I took the best-looking gone I saw, Mister—Mister—"

"Shelby, Tom Shelby; so you didn't even know my name?"

"No idea of what it was; I picked you out because you didn't live here—that's why, if you really want to know."

"Then you did know me?"

"No, I didn't. I saw you at the funeral an' I knew you wa'n't no Ponca man. I didn't care who you was or where you came from, just so you gave me a chance to get out o' this hole. I would marry an Indian to get out."

"Then that was why you took me—so as to get out o' here?"

She nodded.

"That's 'bout the size of it. I didn't take no stock in what the preacher said, for I ain't no weeping willow, Tom Shelby, an' I don't need nobody to take care of me."

Shelby laughed.

"You made a mighty poor guess, at that," he said cheerfully, "when you picked me. I'd a took you to a worse place than Ponca."

"There ain't none," positively. "Where is it you live, anyhow?"

"Over on the Cottonwood; 'bout sixty miles north, up near the reservation. H—l! But it's lonely up there; not another white man in thirty miles."

"You are ranching?"

"Just startin', you might say; runnin' a few head on a free range."

"But you've got a house, a place to live in?"

"Sorter shack—yes; a corral an' a sod stable; that's 'bout 'all. I'd be a dandy, wouldn't I, ter ask a girl to go

"I Picked You Out Because You Didn't Live Here."

out there an' live? No, sir; that ain't my style; it wouldn't be decent."

She did not speak for some time, her eyes roving about the room and then returning to rest on his face. There was no smile on her lips, yet somehow she did not look sullen or indifferent.

"And that was why you said no? You came back to explain? It wasn't because you disliked me, then? Because you despised me for doing such a thing?"

"What, me? I should say not. There wa'n't nothing done that wa'n't all right. I don't blame you a mite. You ought to git married."

"Do you really think so?"

"Yes, I do; this ain't no place for a single woman who wants to be decent, to live in. Besides, you're old enough."

"How old am I?"

"Seventeen, maybe; I ain't much on guessing ages—specially women."

"I am nineteen," she paused, her teeth gleaming as she smiled. "I wish you would tell me about yourself."

He glanced up at her surprised and twisting his hat about in his hands.

"That won't take long," he said soberly. "I ain't got much history, so to speak. I was born in Kentucky an' run away when I was seventeen. Been out in this country ever since, soldiering most of the time, and then punching cattle for the Six Stars. Saved a little money and started in to go it alone. That's about all the story."

"With a lot left out. Why did you leave home?"

"Oh, they wanted me to go on in school and be a lawyer."

"You finished high school?"

"Sure; what made you think that?"

She laughed.

"Oh, just a word or two; you've got into the habit of talking like these people out here. So have I, for the matter of that. When you live with them for years, it's bound to twist your tongue. I can speak good English when I try."

"An' the thing yer want to do most is to get away from Ponca?"

"Yes."

"Yer sure don't hold no grudge against me for what happened tonight?"

Her lips and eyes smiled.

"Why, of course not. It was too ridiculous for anything. After you had filed out I put my head down on the table there and laughed until I had tears in my eyes. The expressions on those faces when I picked you out would have made a dog laugh."

Shelby wanted to say something, but his mind seemed to be utterly blank. He could just stare at her dumbly. The silence became so embarrassing that he finally got awkwardly to his feet.

"I'm—I'm awfully glad you took it that way," he stuttered. "You see, I don't know much about girls and so I was afraid you might be mad. I'll have to go now, I think, Miss."

"I'm very sorry, but I'm glad you came. Good-bye, Mr. Shelby."

He took the outstretched hand, conscious of the warm pressure even as he fumbled at the latch of the door. His eyes were downcast and his face flamed; nor did he breathe easily until he was again outside, alone in the darkness of the night.

CHAPTER IV.

The Proposal.

He stared back at the closed door, still dazed but capable of swearing at himself for being such a blame fool. He felt a vague suspicion that he had acted foolishly and that the girl was amused at his awkward embarrassment. The interview had proven altogther different from what he had anticipated; the tears he had come to wipe away were conspicuous by their absence, and instead of bringing comfort and courage to an extremely mortified young lady, he had found her filled with merriment over the affair and quite indifferent as to its outcome. She was different from anything he had previously conceived. He had confidently expected to encounter a rather ordinary young woman of the commonplace frontier type—the kind he had known for years.

She had proven herself nothing like what he had conceived. She had been smiling and self-possessed, mocking him with her good humor and treating the whole affair as a joke. He was the victim, rather than she, evidently, in her estimation; and he had actually felt like a raw boy in her presence, unable to think of a word to say or what to do with either hands or feet. How immaculately clean she was and ready of speech. He saw again the picture of her, sitting there facing him, her eyes meeting him frankly. Yes, she had made a fool of him, all right, and he turned and strode up the path, oblivious to all else but his gloomy thoughts.

There were numerous people on the main street, although the principal groups were before the dance hall and McCarthy's saloon. Shelby stopped in the glare of the former to consider what he had better do, his mind vibrating between joining the others at the bar or seeking his bed at the hotel. He was still undecided when two men suddenly bumped into him and he recognized Cowan and "Red" Kelly, both drunk enough to be ugly and insulting. The first stared into his face with a sneer.

"H—l, 'Red,' if here ain't the bridegroom," he exclaimed insolently. "Say, where you been all this time?"

Shelby drew back slightly, but held his temper, his brain instantly clearing.

"I don't hold that to be any of your business," he replied coldly.

"Well, by thunder, it is, just the same. You butted into this game without no warrant, an' yer playin' us fer a parcel of fools. Fer one, I don't stand fer it. It was a put-up job. You an' her are in cahoots for that money. She didn't never look at one o' us. Your pretendin' to be surprised was too darn thin. H—l! I bet yer just come over from bein' with her an' laughin' at us—yer d—n skunk!"

Shelby's face hardened and his teeth set grimly.

"Don't go too far, Cowan," he warned sternly. "I got some reputation as a fightin' man myself an' I don't take everything peaceably. Now, listen to me, you drunken brute, and keep a civil tongue in your head. I have seen the girl, but we didn't talk none about marriage and, what's more, I wouldn't touch that money, not a cent of it, even if I was to marry her—she ain't that kind, ner I ain't."

"Gosh, you must think I'm a sucker, Tom Shelby. What the h—l you got to git married on? I'll bet yer never seed two thousand before in all your life. Tell that to the marines—there ain't nobody goin' to marry her except for the cash."

"What do you mean?"

"Why, she's homely as a hedge fence. 'Red' was just sayin' that if she'd a picked him, he'd have jumped the reservation, money or no money. Yer can't string me!"

"You say she's homely?"

"I sure do, an' as damn mean as she looks, I reckon."

Shelby's face was like flint and his right fist crashed square into Cowan's sneering lips. The fellow went toppling over and before he even knew what had happened the ranchman was upon him, holding him flat to the earth and pommeling with both hands. It was soon over with, Shelby giving his opponent no chance to break away, interspersing his blows with a frank expression of feeling.

"You measly hound! Goin' to marry her for money, am I? Maybe you'd like to say that ag'in, d—n you! That's 'bout the size o' your soul, Cowan. Take that, you whelp! You won't be so d—n beautiful yourself when I get through. There now! Perhaps you'll lay quiet awhile!"

He got to his feet and glared about into the ring of interested faces defiantly.

"Any more of yer want to say what he did?" he demanded. "Here, you, Kelly; you laughed when that dirty pup said she was homely as a hedge fence! Come here, you red-headed terrier," and he gripped him by the throat shaking the fellow helplessly back and forth in his mad rage. "I'm goin' ter marry that girl, if she'll have me, an' there ain't nobody goin' to slam the looks o' my wife, either. You get that, you coyote? What do yer think of it now—hey? Spit it out; what do you think of her now?"

Kelly had to spit it out; it was all he could do with those fingers gripping him.

"Let go—d—n it—let go! H—l! She's—she's the handsomest woman I ever saw; you—you let go o' me!"

Shelby flung him to one side in utter disgust, hurling an oath after him as he reeled dizzily into the protection of the crowd. He cast his eyes once in contempt about the circle, seeking some other antagonist and finding none.

"To h—l with all of you!" he declared. "Get out of the way there!"

They fell back to give him safe passage and he strode straight on past the dance hall and turned down the dark path leading back to Calkins' shack. He had but one thought now, one purpose; he had burned his bridges behind him. After what he had said and done only a single course remained. Without a pause or a regret he went straight to the door and rapped. It was no timid touch of the knuckles this time; he was still too angry to either hesitate or doubt. And there was no sign of embarrassment in word or act when the door opened and she stood there looking at him in wonderment.

"I've come back to say another word to you," he announced simply. "I'd like to come in."

"Something has happened?"

"It has; I've just had to lick two pups who got too gay 'bout you. They said some things an' I said some things. Now I'm aimin' to make good. You said you'd marry me awhile ago; does that hold?"

She was leaning against the table, staring at him; her face seemed to go white and her hands toyed nervously with a knife she had picked up.

"You—you had trouble with two men, over me?" she asked, her voice trembling slightly. "What men?"

"'Red' Kelly and a gazabo named Cowan; they was both here."

"Oh; they were angry at you for that?"

"Sure; not because you didn't take no notice of them; then they got drunk an' undertook to ride me; said it was a put-up job between us ter get away with that money."

"What money?"

"The twenty-five hundred you was goin' to get. The preacher told you about that, didn't he?"

She shook her head, evidently bewildered.

"Where was I going to get all that money?"

"Why, McCarthy was puttin' it up; he and some other bucks, so as to give you a start after you was married."

She drew a deep breath, looking straight into his eyes.

"You mean those men came here for that?" indignantly. "They were willing to marry me so as to get that money? Good God! I was to be sold!

The Fellow Went Toppling Over.

Is that actually true? Nobody ever hinted such a shameful thing to me."

"Well, I reckon they didn't mean no harm by that," he tried to explain. "You don't just see it right. They figured that Old Calkins had died an' left you without a cent, sorter helpless out here, an' that the town owed you a decent chance ter git married an' settle down. That's what the money was given for."

"But those fellows all knew it. That was what made them agree?"

"I reckon maybe it was—mostly, at least."

She twisted her hands together, a hot, red flush coming into each cheek.

"Well, I'm glad to know that. Now what was it those two men said, the men you had the trouble with?"

"Well, you see, Cowan was drunk an' naturally all worked up. He's a sort o' good-lookin' chap an thinks he cuts quite a swale with women."

"But what did he say?"

"Well, he run into me up there on the street just now, him and 'Red' Kelly, an' said I was after you for that money. I told him he was a liar an' then he sorter let loose a remark I didn't take kindly."

"What remark?"

"He—he sorter insinuated that I'd never marry you for any other reason."

"He did—why?"

"Well," he blurted out desperately, finding no possible way of escape, "he sorter said you wasn't awful good lookin' an' then I pasted him. That's all."

Her lips parted, her eyes opening wide in astonished amusement.

"That I wasn't good looking!" she laughed. "And you actually hit him for that?"

"I sure did; the other pup laughed an' he got his dose about the same time. I didn't hurt 'Red' Kelly none;

"Will You Take a Chance?"

just shook a little sense into him, but I reckon it'll be a week before Cowan gets out much. Then I come down here."

"To ask me to marry you?"

"That's the idea. I told 'em I'd do it. 'Tain't likely you'll feel now the same way you did at first, but if you do, then I'm in the game. I ain't got much; I told you all 'bout that, but if you're a mind to rough it up on the Cottonwood, I'm here to go shares with you."

The girl gazed at him in silence, her breath coming quickly, almost in sobs, a strange, misty light in her eyes.

"You—actually want me to marry you?"

"Sure; that's what I come back for."

"Are—are you after that twenty-five hundred dollars?"

"H—l, no!" emphatically. "I forgot to tell you 'bout that. I won't take a d—n cent of it. That's what I told them hounds an' I'll tell McCarthy the same thing. I ain't that kind to marry no girl cause she's got coin. The five hundred is yours, fair an' square, but there don't none o' that two thousand go into my jeans. That's got to be part o' the bargain."

"But you don't know anything about me?"

He grinned good-humoredly.

"I reckon there may be some things you'll discover about me, fer the matter o' that. Maybe it's 'bout as fair one way as another."

"Yes, I suppose it is. You really mean what you have said?"

"I sure do."

"When? How soon?"

"Tomorrow morning. I aim to get out o' here as soon as I can. How is it—will you take a chance?"

His voice was strangely earnest, and his eyes, as she ventured to glance up, were honest and kindly.

"Yes," she said slowly, "I will, Tom Shelby."

A desolate home-coming.

(TO BE CONTINUED.)

Grateful Carlo.

In Kentucky three men were shot to death in a fight about a dog which one of them had killed. Some men never live long enough to learn that when a dog becomes personal property the tie of pride and affection makes the animal a serious proposition to be trifled with, and that many men were born to love dogs. This reminds us that in the happy days of boyhood our most faithful and devoted friend was an old pointer named Carlo. Never did we eat a lunch out of doors without sharing it with the devoted Carlo, and that noble and loving dog invariably manifested his gratitude by shaking himself vigorously and letting us in a reciprocal way have about 50 per cent of his most active fleas.—New Orleans States.

Easy Part.

Chorus Girl—What am I to do in the new revue?

Stage Director—Nothing! You'll have nothing to sing, nothing to say, and almost nothing to wear.

ASPIRIN

Name "Bayer" on Genuine

Warning! Unless you see the name "Bayer" on package or on tablets you are not getting genuine Aspirin prescribed by physicians for twenty-one years and proved safe by millions. Take Aspirin only as told in the Bayer package for Colds, Headache, Neuralgia, Rheumatism, Earache, Toothache, Lumbago and for Pain. Handy tin boxes of twelve Bayer Tablets of Aspirin cost few cents. Druggists also sell larger packages. Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicycacid.—Adv.

A girl is anxious to be given in marriage and a woman is glad she isn't sold.

GREEN'S AUGUST FLOWER

The Remedy With a Record of Fifty-four Years of Surpassing Excellence.

Those who suffer from nervous dyspepsia, constipation, indigestion, torpid liver, dizziness, headaches, coming up of food, wind on stomach, palpitation and other indications of fermentation and indigestion will find Green's August Flower a most effective and efficient assistant in the restoration of nature's functions and a return to health and happiness. There could be no better testimony of the value of this remedy for these troubles than the fact that its use for the last fifty-four years has extended into many thousands of households all over the civilized world and no indication of any failure has been obtained in all that time where medicine could effect relief. Sold everywhere.—Adv.

Ambition is always boxing contestment on the ears.

Cuticura for Sore Hands.

Soak hands on retiring in the hot suds of Cuticura Soap, dry and rub in Cuticura Ointment. Remove surplus Ointment with tissue paper. This is only one of the things Cuticura will do if Soap, Ointment and Talcum are used for all toilet purposes.—Adv.

One way to keep on friendly terms with your neighbor is to keep off his premises.

PAINS NEARLY DOUBLED ME UP

Nothing Helped Me Until I Took Lydia E. Pinkham's Vegetable Compound.

Wyandotte, Mich.—"For the last four years I have doctored off and on without help. I have had pains every month so bad that I would nearly double up. Sometimes I could not sweep a room without stopping to rest, and everything I ate upset my stomach. Three years ago I lost a child and suffered so badly that I was out of my head at times. My bowels did not move for days and I could not eat without suffering. The doctor could not help me and one day I told my husband that I could not stand the pain any longer and sent him to the drug-store to get me a bottle of Lydia E. Pinkham's Vegetable Compound and threw the doctor's medicine away. After taking three bottles of Vegetable Compound and using two bottles of Lydia E. Pinkham's Sanative Wash I could do my own housework. If it had not been for your medicine I don't know where I would be today and I am never without a bottle of it in the house. You may publish this if you like that it may help some other woman."—Mrs. MARY STENDER, 120 Orange St., Wyandotte, Mich.

Mr. and Mrs. C. W. Wiles were Mason City visitors Thursday.

Miss Blanche Lilljenberg was a Garner visitor between trains Friday.

Miss Esther Yahnke, the telephone operator in the Koerner Office, was a visitor at Garner Friday. Garner is the young lady's home.

The Iowa–Ames Foot Ball Game was the center of attraction the past week for a number of Klemme enthusiasts of the game. Those who drove to Ames early Saturday morning to take in the game were Frank Gruetzmacher, Paul Greisemer, M. O. Hocum and Rev. Meyer. These gentlemen went in Frank Gruetzmacher's car. Those who accompanied Nick Ell in his car were Doctor Thomas, Doctor Missman and Clarence Waterman. The latter car was the scene of a lot of activity on the way to Ames for Dr. Missman is the Iowa City graduate and Dr. Thomas is the Ames graduate. They have been arguing the outcome of the game for weeks and "chewed the rag" all the way to the game.

Mrs. J. Jorgenson, of Garner, was in Klemme between trains Friday to spend the day with her son, Ye Editor

"Bobbie" Henschen and "Billie" Baack drove over to Mason City last Wednesday evening to see the big musical play, "Hitchy–Koo." They njoyed it very much and "Bob" is still laughing over the funny jokes they pulled.

Henry Freie returned from his visit at Cedar Rapids Friday afternoon.

John Waterman, our post master, had "Bobbie" Henschen and Art Cook on the jump Friday laying the tile in the entrance way to the post office. The cement workers used geometry, trigonometry, hocus–pockus and various other sciences to make those little blocks fit just right. However, they did a good job and the post office entrance looks much better.

The sewer gang have had fine digging the past week and made good headway. Friday they struck a little tough luck near the Carl Suckow residence when they hit wet sand and dirt. They expect to stay right on the job now until the snow balls hit them in their necks and the shovels on the machine freeze so tight they will have to pry the dirt off with a crowbar—then they will quit work until the hobins appear in the spring.

Miss Adna Chnrch, of Garner, was a Klemme visitor Saturday.

Mrs. Schroeder has improved her property on main street by putting in a new cement walk leading to the rear door. Henchen and Kuck did the work

A few farmers near Klemme have their corn picked and in the crib. Others report they will soon finish the work.

The past week has been a good sample os Indian summer which was delayed by the weather man.

Do your Christmas Shopping Early.

Last week A. W. Johnson pnrchased a qnanity of a new brand of coal. The price suited him and he concluded that if the coal proved satisfactory in the furnace at the store, that he would bny a quanity of it for the furnace at the Johnson residence. The allotment with which to conduct the experiment at the home was left at the rear of the store. Some light fingered individual with a strong back made an evening visit to the region of Art's coal supply and the following morning the coal was gone. Art is not complaining abont having lost the coal but it seriously interfered that he was about to conduct. What he would have now is for the person who took the coal to report to him what success he had with it, and Art would thus be guided in the matter or not to invest in more of it.
—Democrat

Joe Knadler, deputy in the Clerk's office, of Garner, was in Klemme on Thursday in the interests of the Red Cross organization. Joe was appointed chairman of the east half of the county nd is faithfully following out the details of his work. While here Joe stopped for a few minutes chat with Ye Editor and also to fill his nostrils with the pleasant odor escaping from printers' ink and paper. Joe is an old time pinter and at one time editor of the Garner Signal.

Mr. and Mrs. M. O. Barr and Mr. and Mrs. Elme Fuller drove over to Mason City Thursday on business and pleasure.

Proposing Made Easy.

In Siam a declaration of marriage is very simple. It is considered a proposal merely to offer a lady a flower, or to take a light from a cigaret if she is holding it in her mouth, so that even the most timid youths need not fear the ordeal.

Auction Service

The First National Bank is prepared to take complete charge of all kinds of auctions and to furnish an experienced auctioneer, to clerk auctions and handle every detail of the sale.

Telephone, write or come in and see us if you are planning on a auction. We specialize in this department of our banking service and are sure that you will be well pleased with the result

BLACKSMITH ALSO IN LINE

Farmer Discovered He Was Not the Only One Who Was Taking Down Good Profits.

While Tom Biggers, the village blacksmith, toiled over the plowshare brought in by old Peter Mullins, the farmer, the owner told at length of the remarkable success he had had with three litters of pigs he had sold in market that day.

"Now," said old Peter, "them pigs was less than eight months old; and they brought me ten cents a pound or a little above $400. Why, Tom, only a few years ago them same pigs would have fetched me only about half as much. I tell you, Tom, the farmer is gittin' his harvest, now."

By this time Biggers had completed the sharpening of the share, and he handed it to Peter. From a well-worn purse old Peter took forth two dimes, the usual price for such a job, and dropped them into the blacksmith's hand.

"Say, Peter," observed Biggers, "you'll have to come again. I charge thirty cents since the first of the year for sharpening that plow."

"That's an outrage!" sputtered old Peter. "Why have you raised the price on me?"

"To buy some of that high-priced pork you were just telling me about," said Biggers, with a grin.—Philadelphia Ledger.

FUNGI THAT DAMAGE CANVAS

Frequently Within the Space of Three Months the Material Will Be Made Useless.

Major W. Broughton-Alcock of the British army made some studies on the fungi that cause black and brown spots on canvas tents, awnings, etc., and that bring about a more or less rapid destruction of such articles. A note on the subject by J. Ramsbottom appears in Nature. The investigations were carried out partly in Malta, where, it is said, awnings last only about a year. The principal destructive agents in the case of cotton and flax-made canvas were found to be Macrosporium and Stemphylium. The variation in the color of the spots is found to be due to the presence of various other fungi in association with the genera above mentioned. The first signs of fungoid growth appear on the inner side of the roof portions of tents and marquees. Often within three months pressure on the spots made by the fungi leads to perforation, or a strong wind causes tearing. Experiments showed that the Willesden (cuprammonium) method and cutch treatment prevented the growth of the fungi.—Scientific American.

Medical Triumph.

The successful operations on the brain of epilepsy patients performed by Dr. Walter E. Dandy of Johns Hopkins university, and by Dr. Curtis Burnham have now been verified by a number of other surgeons. When a definite set of muscles are affected in the epilepsy spasms, seizures, attacks, fits, convulsions or loss of consciousness, as it may be called, the disease can often be traced to some fluid matter, scar or cyst which covers the section of the brain whose nerve fibers lead to the tongue or fingers. In other words, the first cure on record of an epileptic who lost consciousness during the attack was triumphantly brought to pass by Doctor Dandy.

Talked Like a Tailor.

The members of the choir were practicing the anthem "As the Hart Pants After the Water Brooks."

The rendering of the open stages was apparently not quite to the satisfaction of the gentleman who wielded the baton.

He considered it necessary, therefore, to tender some advice to the tenors, and caused great consternation and not a little embarrasgment among his flock by the following announcement:

"Gentlemen, your expression is simply splendid, but the time is very poor—really, your pants are far too long."—From Ideas, London.

Dried Flies for Fish.

A New York firm recently imported three tons of dried flies from South America. They were for feeding young fishes, and have found a ready sale to fish culturists.

The United States fisheries bureau bought 100 pounds of them, for an experiment, but results seemed to show that fine-chopped liver was better grub for baby trout. On a diet of liver they grew faster, and a larger percentage of them survived.

Highest Mountain in Idaho.

Hyndman peak is the only named mountain in Idaho that rises above 12,000 feet. It stands near the Blaine-Custer county line and has a height of 12,078 feet. There are, however, several unnamed peaks near Hyndman peak whose elevations are greater than 12,000 feet, as shown by the contours on the Hailey topographic map, published by the United States geological survey.

A Stickler.

"They say Wombat is a man who is insistent about getting his money's worth."

"Yes, he'd put in a vacation counting the Thousand Islands."—Louisville Courier-Journal.

Boasting.

"I was at a banquet where Senator Harding spoke."

"Shucks! I've sat with him on his front porch."

Th[illegible]AN PE[illegible]
G[illegible]RGE[illegible]

[illegible]sible for
[illegible]ndworm[illegible]arge Pro-
[illegible]ant De[illegible]Runts.

BAD[illegible]INED LOTS CAUSE

[illegible]imals Farrowed and Kept in Y[illegible]Infested With Eggs of Para-[illegible]s Are Almost Certain to Pick Up Some of Them.

[illegible]restigations reported in a recent [illegible]nical publication of the bureau of [illegible]mal industry, United States Depart-[illegible]ent of Agriculture, disclosed addi-[illegible]onal evidence of the importance of keeping young pigs in clean pens that have not been contaminated by other swine.

A roundworm of pigs, known as Ascaris suum, is held responsible not only for many deaths among swine but for a large proportion of the runts among these animals. Development and perpetuation of the roundworms is fostered by badly drained and manure-covered hog lots, which are on this account dangerous to young pigs and not good for pigs of any age.

Soil May Become Infested.

Eggs of the parasite may remain alive in soil for five years and even longer. Places occupied by pigs harboring the adult worms in their intestines will become badly infested with the eggs. Pigs farrowed and kept in such places are certain to pick up many of these eggs, and even suckling pigs are liable to swallow eggs present in dirt adhering to the teats of the sows.

Investigations by the bureau have proved that after the eggs have been swallowed and have hatched in the intestine the young worms do not immediately settle down but penetrate the wall of the intestine and travel to the liver and lungs. From the lungs they crawl up the windpipe and then down the esophagus and return to the intestine. Only after they have passed through the lungs do they establish themselves in the intestine and grow to maturity.

May Cause Pneumonia.

In passing through the lungs the young worms cause more or less damage to these organs. Pneumonia may

Creep Arranged So That Young Pigs Can Get in the Pen Under the Fence but Large Hogs Are Kept Out.

result and the animal may die about a week or ten days after infection. Symptoms of this pneumonia among pigs are commonly known as "thumps." Not all cases of "thumps" come from this source but the worms are frequently the cause. Young pigs are more susceptible than older pigs to infection and are also more likely to suffer severely from migration of the young worms through the lungs.

There is no treatment for the lung stage of the parasite. If the pig survives he may later be treated with worm remedies to remove the worms from the intestine. In such cases, however, it commonly happens that the animal has been so seriously injured by the worms during their migration through the lungs that even after their expulsion from the intestines the pig is unable to make up for the setback he has received, although he does better than if allowed to go untreated.

FOWLS TOO FAT TO LAY EGGS

Ohio Specialist Says Hen Becomes Fat Because She Is Naturally a Poor Layer.

Can a hen get too fat to lay? is a question frequently asked by poultry keepers. In answer to this question E. L. Dakan, poultry specialist at the Ohio State university, says: "As a general rule, no. A hen becomes fat because she is naturally a poor layer. Instead of laying eggs she lays on body fat. Some rations which consist of corn and no animal protein, such as meat scraps and tankage, contain no elements capable of producing eggs."

BIRDS MIGHTY GOOD FRIENDS

Farmer Is Amply Repaid for Trouble in Feeding and Sheltering Little Songsters.

What are you doing to protect and bring the birds to your place? Birds are mighty good friends of ours, and if we feed and shelter them, we are amply repaid for our trouble. Try it and see if it doesn't work out that way for you.

EGULAR GROWTH OF CLUBS DURING 1920

Exodus From Country to City Is Being Checked.

Agriculture Dignified in Eyes of Thousands of Boys and Girls and Brings New Interest Into Lives of Members.

During the first six months in 1920, 208,257 boys and girls in the northern and western states enrolled in the clubs which are supervised by the United States Department of Agriculture and the state colleges. The large enrollment in these clubs promises that soon, possibly before the next census is taken, the exodus from the country to the city will be definitely checked. Club work has already dignified agriculture in the eyes of thousands upon thousands of farm boys and girls, and made them satisfied with country life, for the organization brings new interests into the lives of its members and enables them to make money of their own. While club work encourages boys and girls to procure a higher education if possible—987 northern and western club boys and 607 club girls are in agricultural colleges this year—it does not educate them away from the farm.

Members of Pig Club Being Shown Fine Points.

One per cent of the total population of the country, or 1,041,441 persons, were reached the first six months of the current year through the juvenile club events. When the boys and girls put on an exhibit it is popular with all ages and all ages attend. The work in the clubs was carried on by 173 permanent county club agents and 8,046 volunteer local leaders. The number of permanent club agents has nearly doubled in six months. Large numbers of farm bureaus now are paying the salary of a club leader as well as that of a county agent and home demonstration agent.

PIGS REDUCE HUSKING COSTS

"Hogging Down" Corn Shown to Be Profitable by Test Made at North Dakota College.

Here is another bit of evidence received at University farm that "hogging down" corn is good business for many growers of hogs and corn. The North Dakota Agricultural college obtained a return of $45.54 an acre by using 48 shoats to hog down 16 acres of flint corn in 1918, according to J. H. Shepperd of the experiment station. The hogs were turned into the field September 6, when they averaged 109 pounds in weight, and left there until November 12. They made an average gain of 94 pounds, or a gain of 281.75 pounds per acre. They were marketed at 16.31 cents, which, allowing for shrinkage, gave a return of $45.54 per acre. These results are in line with those obtained by the Minnesota experiment stations.

SKUNKS WILL YIELD PROFIT

Besides Destroying Mice, Grasshoppers and Other Insects Their Fur Is Valuable.

Farming is supposed to deal only with domesticated animals. Few persons have considered establishing friendly relations with the skunk, although it has been done under the misapprehension that the animal was a cat.

Skunks destroy mice, grasshoppers, crickets and white grubs and yield a very valuable fur. A couple of dozen skunks running around the farm will produce $100 worth of fur and save much money by the animals that they kill. If the chickens are kept in skunk-proof yards, their dens respected and tact used when meeting them in the dark, a profitable side line will be added to the farm income.

MARKETING BY PARCEL POST

It Should Be Remembered That Not All Farm Products Can Be Handled in This Manner.

While it may be attractive to a city dweller to believe that he can have a vegetable garden grown for him 100 miles or 150 miles away, place his orders for the cost of a stamp, and have the produce delivered at his door, it should be remembered that not all farm products lend themselves to direct marketing by parcel post. Usually it is impracticable to market such heavy products as potatoes by parcel post, whereas eggs, butter, sausage, poultry, many vegetables, and meats may frequently be shipped with profit and at a saving to the purchaser.

POULTRY FLOCKS

KEROSENE CURES SCALY LEGS

One Application Usually Is Sufficient to Remove Trouble — Other Efficient Remedies.

Scaly legs in fowls is a disease, the result of myriads of small parasites which burrow under the small scales of the leg, and as these multiply and burrow under, these scales become enlarged and loosen from the leg, and the birds are seen picking at the legs much of the time which proves that the parasites cause irritation.

If the disease is allowed to go undisturbed it sometimes happens that the body becomes infected and the bird

A Case of Scaly Legs.

may finally die of exhaustion. We once lost a fine hen this way, not knowing the cause or remedy, which is very simple, and has the advantage of always being available at home. There are different remedies which will remove the trouble, but none is better than common kerosene, says a writer in Successful Farming. To apply, take the fowl in the hands, hold the legs together and immerse them, full length, in a can filled with kerosene; hold them there two or three minutes. One application will usually cure, but sometimes a second application is necessary. Lard and kerosene, half and half, is another excellent remedy, as is also common machine oil, or just common axle grease well rubbed in, two or three times at intervals of three days. Soon the scales will drop off and the legs become smooth and clean.

The roosts should also be cleaned off well and rubbed with machine oil, which will help to rid the fowls of scaly legs and red mites, as well. This same remedy is also good in case of lice. Keep roosting poles well oiled and rub a little lard under wings and around vents of infested birds and they may be kept practically free from these pests.

TURKEYS FOR THANKSGIVING

Begin Feeding Small Ration in Morning and Larger One at Night—Boil All New Corn.

The middle of October is not too early to begin fattening turkeys for Thanksgiving. A pound of turkey will bring in far more than the grains that produce it are worth on the market. Begin feeding a small ration in the morning, and a larger one at night. If the turkeys are overfed in the morning, they will not go out to forage, and will thus lose the best part of their fattening ration—the natural food of bugs, grasshoppers and worms; they will also lose the appetite which foraging gives. The night meal may be a mash made of boiled new corn, potato and other vegetable skins, with or without bran. Do not give new corn without boiling, as it is apt to cause bowel trouble in the turkeys. Sour milk is a most valuable addition to the ration. Keep cracked charcoal and grit before them. Don't give them all they will eat the first feed; use the same caution in getting turkeys on full feed that you would use for fattening hogs. They must be kept free from lice, and in clean, dry roosting quarters.

FATTEN COCKERELS IN YARD

Give Two Meals a Day of Mixture of Cornmeal, Beef Scraps and Bran Mixed With Milk.

A healthy cockerel will fatten well in two weeks if confined in a yard of moderate size and furnished two meals a day of a mixture of cornmeal, ground oats, beef scraps and a little bran mixed with milk. Another meal, the evening feed, should consist mostly of cracked corn. Plenty of grit and charcoal should be furnished these cockerels so that their digestion may be of the best.

GRAINS DEFICIENT IN LIME

Material for Manufacture of Egg Shells Is Lacking in Food Given to Fowls.

Fowls need more lime (calcium) than is ordinarily found in their food. Most grains and some other foods are deficient in lime, and neither the hen nor the duck can eat enough bulky food to make good shells during the heavy laying period. The lime in oyster shells or ground bone will supply this need. It is also important to provide a regular supply of vegetable foods rich in lime.

Home Town Helps

CALLS FOR COMMON SENSE

Community Cannot Be Satisfactorily Developed Unless Work Is Proceded With Intelligently.

What would you think of a manufacturer whose product was in demand who would fail to make effective use of sales-creating facilities at hand just because it was not immediately possible to inaugurate a whale of a selling campaign?

But wait a minute. Don't answer that until you ascertain whether the reply would apply with equal force to you and others in your own community whose interests depend upon the growth of your community.

For isn't that precisely the situation with many communities whose commercial organizations are doing nothing toward "selling" the community in a practical manner because the time is not ripe for a big campaign for funds for a survey of resources?

Between that senseless form of "town boosting" in which so many cities indulge on the one hand, and the scientific survey which calls for a considerable fund on the other, there is a happy medium which few communities have attained.

So much so-called community promotion is a concoction of lack-of-plan and meaningless superlatives.

Yet in every community that is capable of healthy growth there are certain things which should be perpectly obvious to those in the city whose interests would be enhanced through development work.

Application of the simplest business methods would discover them, and the community would cease to grow more or less by accident and local people would no longer be called upon to invest, from time to time, in this, that or the other enterprise that has been lured into a community where it does not belong by a bonus that is as silly to accept as to offer.—From the Nation's Business.

PUT WASTE PLACES TO USE

Good Idea During the Winter to Plan for Improvements to Be Made Next Spring.

Every city, village and hamlet has the total of a great area of land which is not only non-productive, but which is rendered hateful to the sight and deterrent to the vicinity, as a haven for rubbish and a breeding place for noxious weeds. These waste areas and the unbeautiful spaces commonly denominated as back yards, as a rule, are not fit for garden work in their present condition. But this condition readily can be changed with some intelligent exertion. The addition to this unpromising soil of manure, of the fallen leaves from the trees, and, sometimes, of ashes sifted from the furnace, soon renders it workable and productive. For a time the co-operation of the community officials might be necessary as a means of encouragement, but each such waste place transformed into a productive garden of vegetables and flowers and small fruits would serve as a compelling example, and in very few years the results would be beyond calculation.

The benefits to be derived from this conversion of waste places into productive beauty spots cannot be measured alone in dollars and cents. An even greater benefit would lie in the improved morals of the community, in the cultivation of habits of industry on the part of the young especially, and in the beautifying thrift and beauty are the rewards waiting these communities which whole-heartedly and intelligently cultivate in the people the natural garden instinct. A national propaganda in this direction would work wonders.

Young Trees in Winter.

All very young trees require some attention the first winter; after that they will be established and be able to take care of their own welfare. Therefore, all recently planted trees will be benefited by the hilling of a mound of earth around them, tramping it very hard. This keeps the tree from rocking with the winter winds. If this precaution is not taken with newly planted stock the trees are apt in swaying back and forth to work a hole around the trunk which reaches clear down to the roots, and it is often fatal to the newly planted tree. A row of silver maples, one of the easiest of all deciduous trees to transplant, for lack of this precaution were all killed during last winter.

Building Bungalow Towns.

In London, as in America, the shortage of homes has resulted in a remarkable expansion of bungalow land. On Canvey island, for instance, homes built chiefly of wood, concrete slabs or, most common of all, corrugated iron, are being run up in all directions. A good many folk are building their own homes, camping meanwhile in tents; others have resorted to converting pantechnicons and such like into homes. What prices are like on the island may be gathered from the fact that a concrete bungalow of four rooms is offered for sale at £600, a pantechnicon with two rooms for £150 and a gypsy van for £75.

Catarrh

Catarrh is a local disease greatly influenced by constitutional conditions. HALL'S CATARRH MEDICINE is a Tonic and Blood Purifier. By cleansing the blood and building up the System, HALL'S CATARRH MEDICINE restores normal conditions and allows Nature to do its work.

RADIUM'S USE IN SURGERY

Its Rays So Powerful That They Can Destroy the Useless or Diseased Tissue.

The use of radium in hospitals is becoming more and more demanded by the medical profession. The Scientific American, in telling of its medical and surgical uses, explains that it is a tool and not a medicine. The radium gives off three rays, known as the alpha, beta and gamma rays. The first, about 85 per cent of the total ray force, can be stopped by tissue paper; the second will penetrate 35 millimeters of lead, while the third has a vibration similar to the X-ray. This ray is the one used in surgery.

The rays are sent into the body, and so powerful are they that they can penetrate to a great depth, and there destroy the useless or diseased tissue. As the good tissue has a greater resistance than the bad, the highly skilled operative can bear the gamma rays on the afflicted part until they begin to destroy the good tissue, when the treatment must stop.

Ready for Hanging.

The prisoner looks the picture of dejection." "Yes, and he says he's been framed."

No Wonder.

"Buttle told me he had had a raw deal." "Yes, he was sore because he was roasted."

WRONG IDEA OF THE BLIND

Statesman, Afflicted With Loss of Sight, Tells Good Story Bearing on the Subject.

Representative Schall, member of the house of representatives from Minnesota, is blind, and has been for ten years. During this time he says that he has discovered that the seeing world has strange ideas as to the limitations of the blind; that it seems to think because a man can't see he can neither hear not feel, and is a strange, detached piece of human mechanism that is not to be reckoned with directly, but through the guiding hand.

Not long ago Mr. Schall was returning from his home in Minneapolis to Washington, accompanied only by his small son Douglas. The first morning they appeared in the diner the waiter assigned to their table inquired of young Douglas: "Son, what does your father want?"

"Why, ask him," quickly replied the child, "he knows what he wants. Ask for me, bring me pancaks and sausage and chocolate!"

Way to Cultivate It.

"Money is the root of all evil."

"Yes, and it grows best by the growing process."

Imagination and Fact.

Little Ernestine, who was spending her vacation in the country with her father, sought him out one day with this announcement:

"Oh, daddy, I have just found a place where there are just millions and hundreds of apples. See, I have brought you two!"

Transgressors should be made to pay a road tax.

Stop the Pain.

The hurt of a burn or a cut stops when Cole's Carbolisalve is applied. It heals quickly without scars. 30c and 60c by all druggists. For free sample write The J. W. Cole Co., Rockford, Ill.—Adv.

It's the little things that count.

Another Royal Suggestion

Griddle Cakes and Waffles

From the NEW ROYAL COOK BOOK

THERE is an art in making flapjack pancakes, griddle cakes or wheats, call them what you will. But it is an art very easily and quickly acquired if you follow the right recipes. The secret, of course, is Royal Baking Powder.

Griddle Cakes

1¾ cups flour
½ teaspoon salt
3 teaspoons Royal Baking Powder
2 eggs
1½ cups milk
1 tablespoon shortening

Mix and sift dry ingredients; add beaten eggs, milk and melted shortening; mix well. Bake immediately on hot griddle.

Waffles

2 cups flour
4 teaspoons Royal Baking Powder
¾ teaspoon salt
1¾ cups milk
2 eggs
1 tablespoon melted shortening

Sift flour, baking powder and salt together; add milk to yolks of eggs; mix thoroughly and add to dry ingredients; add melted shortening and mix in beaten whites of eggs. Bake in well-greased hot waffle iron until brown. Serve hot with maple syrup. It should take about 1½ minutes to bake each waffle.

ROYAL BAKING POWDER

Absolutely Pure

Made from Cream of Tartar, derived from grapes.

FREE

New Royal Cook Book containing these and scores of other delightful recipes. Write for it *to-day*.

INSECTS FROM ABROAD CAUSE OF IMMENSE LOSS HERE EVERY YEAR

Ready to Take Up Attack on Codling Moth.

In discovering America, Columbus not only opened up a vast new home for man, but for insect pests of cultivated crops and domestic animals as well. Fully 100 of these foreigners have made their way to American shores, and incidentally to American gardens and fields, up to the present. They have multiplied so that today their destruction of orchards, garden and farm crops is estimated approximately at $500,000,000 a year—more than $1,000,000 a day. Their havoc would be much more than this were it not for the quarantines and control work conducted by the United States Department of Agriculture through its bureau of entomology and its federal horticultural board.

Only Few Native Pests.

Of all the insect pests and diseases that attack cultivated crops and cut into the profits of the American farmers severely, there are relatively few of the more important ones that are native to the United States. Like many other baneful things, insect pests and diseases have followed the course of civilization. They are carried in many ways from one country to another, and it is the work of the Department of Agriculture to guard the United States against their entry and to prevent their spread once they they make their appearance here.

While many of the pests have come from European countries, Asia has contributed its share of them. Prominent among these for its destructive activities is the San Jose scale, which made its first appearance in the United States forty or fifty years ago, having made its way here from China. It became widespread throughout the United States in the late nineties, and at the present time there is practically not a commercial deciduous orchard in this country that does not have to be sprayed once a year to control this pest.

Some idea of the burden which this insect puts upon the orchardists of the United States can be had when it is realized that the expenditures for apparatus and spraying amount to approximately $10,000,000 annually. In addition to this are the losses that the insect causes in spite of this control treatment, and they are very large, especially in small orchards and household plantings, where spraying is not commonly practiced. This insect alone undoubtedly has cost this country during its presence here upwards of $100,000,000.

The oriental peach moth, which gained entry in 1912 with imported

Codling Moth Cause of Wormy Apples.

oriental cherry trees from Japan, has just begun its spread and depredation. It affects practically all deciduous fruits and bids fair to be as destructive as the well-known codling moth, the cause of wormy apples.

The Japanese Beetle.

The Japanese beetle, brought in about the same time as the peach moth, has already gained such firm foothold that, in view of its habits and prolonged flight, it is probably incapable of extermination and may ultimately overspread the United States. It attacks not only practically all fruits but also many garden vegetables and corn. Attempts to check the spread of this pest are being made by means of federal and local quarantines, particularly in New Jersey. Under this quarantine the government maintains a supervision over the movement of articles likely to carry the pest from infected areas to other sections of the country. Another foreign pest in comparatively recent years which has made its appearance in this country is the European corn borer. Infestations have been discovered in several eastern states and local quarantines by the federal horticultural board have been instituted to prevent its spread to the corn belt. Recently heavy infestations were discovered in Canada, presenting a more immediate menace to the corn belt. Specialists of the department are now considering steps for guarding against this new source of danger.

Mexico has contributed its share of insect pests that are now established in this country to the destruction of American crops. Chief among these are the boll weevil, the pink bollworm, and the little Mexican beetle, known as the bean ladybird. The last, which has been discovered in Alabama, now threatens to spread to other southern states and inflict immense damage to the cowpea and bean crops.

The general public has its duty in aiding the Department of Agriculture to prevent the further spread of insect pests and diseases and in co-operating renders a great service to the American farmer. Automobilists and other persons journeying through infested areas should carefully observe all quarantine regulations, being careful in transporting articles capable of carrying the insect.

GOOD QUALITIES OF CROW ARE OUTLINED

Bird Carries on Warfare Against Certain Insects.

Indiscriminate Killing Is Not Warranted, and Where Harm Is Being Done Preventive Measures Will Abate Nuisance.

The crow is best known by the unfavorable reputation it has acquired in the corn field, the poultry yard and through its attacks on other crops besides corn. It, however, carries on a warfare against certain insect enemies of the farmer. Indiscriminate killing is not warranted, and even in areas where the crow is doing harm preventive measures will often put a stop to the nuisance and allow the bird to continue what good work it may be doing on insects. Among the preventive measures suggested by the United States Department of Agriculture are:

1. The use of coal tar and other deterrents on seed grain.
2. Scattering grain over fields where the crop is just sprouting.
3. Stretching twine about and across fields from poles stationed at intervals. A network of such strands is often effective in protecting poultry yards.
4. The use of frightening devices and the hanging up of the dead bodies of crows in conspicuous places.

In places where more drastic measures are necessary the killing of even a few crows will intimidate others and these will usually shun the area for some time. Such procedures include—

1. The use of poison (strychnine) in places where this is permitted by law. Corn and hens' eggs are the most effective baits.
2. Trapping by means of steel traps, carefully concealed and baited with hens' eggs.
3. Destroying nests—a measure that will most frequently put a stop to the poultry-raiding activities of a pair of crows which have their nest nearby.
4. Shooting—the hunter being aided by the use of a crow call, and, where possible, also by a mounted owl placed conspicuously on a pole. Several night attacks by a number of men equipped with shotguns will frequently remove objectionable winter roosts.

SWEET POTATOES FOR SIRUP

Superior for Table and Cooking, Say Chemists of Department of Agriculture.

Sweet potatoes make a superior table and cooking sirup, say chemists of the United States Department of Agriculture. Thus far no large commercial use has been made of the discovery. The department is prepared to tell how to make sweet potato sirup at home and how to use it in cookery and candy making.

GENERAL FARM NOTES

Liming sour soil will greatly increase its fertility.

* * *

Twenty-one per cent of the tame hay acreage is alfalfa.

All co-operative marketing should be based upon local organization.

* * *

You would not let your live stock starve—why starve your soil?

USE "DIAMOND DYES"

Dye right! Don't risk your material in a poor dye. Each package of "Diamond Dyes" contains directions so simple that any woman can diamond-dye a new, rich, fadeless color into old garments, draperies, coverings, everything, whether wool, silk, linen, cotton or mixed goods.

Buy "Diamond Dyes"—no other kind—then perfect results are guaranteed. Druggist has "Diamond Dyes Color Card"—16 rich colors. Adv.

Who rises every time he falls will sometimes rise to stay.—William C. Morris.

WOMEN NEED SWAMP-ROOT

Thousands of women have kidney and bladder trouble and never suspect it.

Womens' complaints often prove to be nothing else but kidney trouble, or the result of kidney or bladder disease.

If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.

Pain in the back, headache, loss of ambition, nervousness, are often times symptoms of kidney trouble.

Don't delay starting treatment. Dr. Kilmer's Swamp-Root, a physician's prescription, obtained at any drug store, may be just the remedy needed to overcome such conditions.

Get a medium or large size bottle immediately from any drug store.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

Many a shrewd man has purchased a gold brick in the form of experience.

Rosy Cheeks & Satin Skin

Because of her rosy cheeks and satin skin a woman attracts the admiration of all men. When the young woman peers in her glass, she may see pimples and blotches and she immediately goes to the drug store for paint, powders and beauty creams, when she should go there for a blood medicine and stomach alterative known as "Golden Medical Discovery." This vegetable tonic and blood alterative clears the skin, beautifies it, increases the blood supply and the circulation, while pimples, boils and eruptions vanish quickly. Ask your nearest druggist for Dr. Pierce's Golden Medical Discovery in tablet or liquid form or send 10c. for trial package of tablets to Dr. Pierce's Invalids' Hotel in Buffalo, N. Y.

FOR Colds, Coughs AND La Grippe

Neglected Colds are Dangerous

Take no chances. Keep this standard remedy handy for the first sneeze.

Breaks up a cold in 24 hours—Relieves Grippe in 3 days—Excellent for Headache

Quinine in this form does not affect the head—Cascara is best Tonic Laxative—No Opiate in Hill's.

ALL DRUGGISTS SELL IT

Eruptions of the Skin Cause Torturous Itching

If you are afflicted with any form of skin disorder, you are well acquainted with the flaming, burning itching that these diseases produce.

Skin diseases are caused by an impurity or disorder in the blood, and there is no real and genuine relief within your reach until such impurities are removed.

S.S.S. has given great satisfaction in the treatment of these disorders, because it is such a thoroughly satisfactory blood purifier. It cleanses the blood of all impurities, and thus counteracts the effects of the germs that attack the skin.

Begin taking S.S.S. today, and if you will write a complete history of your case, our medical adviser will give you expert advice without charge. Address Chief Medical Adviser, 158 Swift Laboratory, Atlanta, Ga.

Many School Children are Sickly

and take cold easily, are feverish and constipated, have headaches, stomach or bowel trouble.

MOTHER GRAY'S SWEET POWDERS FOR CHILDREN

Used by Mothers for over 30 years

Are pleasant to take and a certain relief. They tend to break up a cold in 24 hours, act on the Stomach, Liver and Bowels and tend to correct intestinal disorders and destroy worms. 10,000 testimonials like the following from mothers and friends of children telling of relief. Originals are on file in our offices:

"I think MOTHER GRAY'S SWEET POWDERS FOR CHILDREN are grand. They were recommended to my sister by a doctor. I am giving them to my little three year old girl who was very puny, and she is picking up wonderfully."

"We have used MOTHER GRAY'S SWEET POWDERS FOR CHILDREN at different times for past nine years, and always found them a perfect children's medicine and very satisfactory in every case."

Get a package from your druggist for use when needed.

Do Not Accept Any Substitute for MOTHER GRAY'S SWEET POWDERS.

Thousands of Happy Housewives in WESTERN CANADA

are helping their husbands to prosper—are glad they encouraged them to go where they could make a home of their own—save paying rent and reduce cost of living—where they could reach prosperity and independence by buying on easy terms.

Fertile Land at $15 to $30 an Acre

—land similar to that which through many years has yielded from 20 to 45 bushels of wheat to the acre. Hundreds of farmers in Western Canada have raised crops in a single season worth more than the whole cost of their land. With such crops come prosperity, independence, good homes, and all the comforts and conveniences which make for happy living.

Farm Gardens—Poultry—Dairying

are sources of income second only to grain growing and stock raising. Good climate, good neighbors, churches, schools, rural telephone, etc., give you the opportunities of a new land with the conveniences of old settled districts.

For illustrated literature, maps, description of farm opportunities in Manitoba, Saskatchewan, and Alberta, reduced railway rates, etc., write Department of Immigration, Ottawa, Can., or

wenty-fifth Year Number 13 | Klemme, Iowa, Thursday, December 2, 1920 | $2.00 In Advance. $2.50 Outside of County

HE FARM BUREAU DRIVE

e Farm Bureau membership e put on in this county in Octo- increased the membership of the ty one hundred and seventy-five. Farm Bureau now has 1433 bers. This leaves approximately non-members in the entire coun- nd there is no doubt but what a t majority of the non-members ld become members if they were e to see the organization in the t light.

he Farm Bureau organization has e an exceptional growth in the year. The organization has se- d excellent results in many lines work pertaining to agriculture, will, in the future, be a wonder- value to the farmers, providing stand back of it and push it as it ld be.

very farmer is interested today he marketing end of the organi- on, and the organization is work- on plans at the present time to in this line. However, this is a problem, it takes time, and it bably will be several years before lts are obtained; but when plans worked out and put into effect, ill be well worth while.

he Farm Bureau organization has organized from the bottom up. find an organization in every ol district, every township, coun- state, and national. It is organ- and controlled by farmers. The ctors, who are actual farmers are elected by the members, e charge of spending every cent money that is paid in. The recent mbership campaign was put on by directors in each school district. ile some did not have time to see the non-members, yet most of them were willing to solicit every non member in their district, and a great many districts in the county were made 100 per cent in membership. In fact we have about forty school districts in the county that are 100 per cent membership and probably twenty in which they only lack one. The other districts run from two to eight non-members. However, there are very few that run as high as eight. One school district in the county has seventeen farmers, and sixteen of them are members, yet the other man stands alone in believing that the organization would be of no benefit to him.

Numerous reasons were given for not joining. Very few claim that the organization would do them no good. A number claimed that they did not have the money, and many of them promised to sign later. Considering the fact that the organization is comparatively new, the membership has made an exceptional growth, and there is no doubt that in a very few years that practically 100 per cent of the farmers will be back of this movement. The farmers have begun to see the need of organization. They see an organization in every other line of business and they must make an organized effort to gain recogni- tion. Ell township has 98 members and Liberty has 92. The former has 88 per cent and the latter 86 per cent of the farmers as members.

Proposing Made Easy.

In Siam a declaration of marriage is very simple. It is considered a proposal merely to offer a lady a flower, or to take a light from a cigaret if she is holding it in her mouth, so that even the most timid youths need not fear the ordeal.

HOME BREW SUSPECT

Flocks of Crows Makes Some One See Green

Sioux City, Ia., Nov. 25.—Attacked by thousands of crows while duck hunting on the Missouri river near here, M. L. Murray, of Salix, killed and wounded more than 500 of the angry birds in three hours of constant fighting, using about 200 shotgun shells. The coming darkness gave him an opportunity to escape.

The fight started when Mr. Murray shot at a lone crow and wounded it. The wounded bird cried for help and soon hundreds of others came to its aid. Soon the ground was covered with dead and wounded crows. The remaining birds attacked Murray, striking with their beaks and wings. When darkness came the hunter was able to retreat to a willow patch and the crows, unable to advance upon him, returned to roost.

REAL CORN PICKERS

We did not gather these facts from the fellows we are going to tell about as they are rather modest in regard to their ability to husk corn. We believe Klemme can claim the champion corn pickers in this part of the country at least. We are referring to Geo. Lawhorn and Homer Butcher. It is as easy for these fellows to pick corn as it is for a dog to chase cats. When they start for the corn field in the morning they select the biggest team on the farm, get the biggest wagon and then put up about a dozen bang-boards until the wagon looks like a sail boat. They always pick from 135 to 150 bushels of corn every day and don't work so long either We heard tell the other day that George had an average of 107 bushels a day for the season and this is counting in rainy days and days he laid off . If there are anybody can beat this let us know. We will consult the pickers and try to get their exact average for the season.

ETCHEN BROS. BUY POOL ROOM

Deal Was Closed Last Week

In our rush to get the paper out early last week so that we could take a few days off to see our new son we overlooked an important news item. Last week Modnay John and Fred Etchen closed a deal with Clark Bredbenner whereby they became proprietors of the Pool Room. They took charge immediately. Mr. Bredbenner started the pool room about a year ago in the old opera house bulding. The place was remodeled and he put in pool and billiard tables, a bowling alley and other fixtures and made the pool room one of the best in this part of the country. He conducted a good clean place of amusement and enjoyed a good business. The Etchen Bros. are stepping into a thriving business and will keep up the place to the standard reached by Mr. Bredbenner. The new proprietors are both excellent young men and are popular with the people of Klemme and surrounding country. They have been in the business only a little more than a week but are taking hold like old timers. John, assisted by Chas. White, is conducting the business now but Fred will step in as soon as he can arrange his farm affairs so that he can step into the business. We wish the boys success and welcome them into the Klemme busines circle.

Several trappers have been arrested recently for spearing muskrats in houses and then chopping into the houses to get the rats out. It seems the law forbids destroying the houses of any fur-bearing animals, and when the houses are chopped into the rats can no longer stay in them. Two game wardens from Mason City were here last week and brought in three fellows from near Eagle Lake. They asked for a continuance until last Friday, and later the trial was continued until Tuesday when another continuance was granted until next Friday. One other fellow who had done the same thing, heard of the arrests, came in and made a plea of guilty and was fined $5 and costs. The game wardens also got two fellows near Goodell who were taken to Goodell and their fines with costs amounted to $28.80 each.—Signal.

Friendly Advice.

"I can sign this pitcher for twenty minutes in vaudeville or I can place him with a four-act play." "I advise him to take vaudeville," said the team manager. "He can't go a long route."—Louisville Courier-Journal

FOUR BARRELS OF SOUR MASH SIEZED TUESDAY BY SHERIFF

There are perhaps a lot of private stills in Kossuth county, but the only one intended for other than personal purposes, so far as known, was discovered Tuesday when Sheriff Moulds raided the W. J. Cook tenant house at the southeast corner of the fair grounds. The premises were occupied by a family of Greeks or "dagoes," names not yet reported. It is said they were beet weeders earlier in the season. The head of the family was not at home when the raid was made, but a young man who lived there and seemed to have an interest in the illicit still was jailed, and the woman, with her children, were held as witnesses. Four barrels of "sour mash" were confiscated.—Algona Advance.

HERE TOO!

Last Saturday while sitting at our desk the readers of the News came tripping in by twos and threes throwing down their dollars to renew their subscription to the great weekly paper and five or six paid from two to five years in advance, all wishing the editr and his flock the best of luck for the coming new year. Then all was quiet and we got busy to see just how many had paid up and the dollars and bills lay in a big heap on the table. We had just counted to two hundred and sixty dollars when the alarm clock went off and we awoke and discovered that we were counting the buttons on our night shirt. Thus was shattered our big plans for a big feed Christmas and paying off some of our debts.—LuVerne News.

NO MEDALS DUE

The Corwith Hustler boasts of the remarkable health record of a man and wife at Corwith who have been married 58 years and have never had a doctor in the house on account of sickness in all that time. The man is 79 years old and has not been visited by a doctor since he was 9 years of age. His wife is 78 years old and has never been under the care of a doctor.

This is certainly a remarkable health record, but it would be more worthy of praise if the doctor had called a few times and given the Hustler a chance to mention a number of healthy children in the same article.—Renwick Times.

OUR HOME TOWN EDITOR

Composed By A Barber

In our rounds about the town for news items Tuesday we stepped into Gearald McCullough's barber shop to inquire what he knew in the news line. He is evidently sprouting out to be a famous poet, we know he is a "Longfellow" for he is some six feet and four inches tall. Here is what he says about the Editor:

"If you see the editor of this little sheet
Tripping merrily down the street,
With his big, round heart all filled with joy,
Please don't think it's another boy!
Now, just a minute, stop and think,
No, no one has given him a drink,
'Though you'll have to admit to gather up news
Is enough to drive any man to booze.
The farmer he mourns o'er the price of his crops,
Just watch Ye Editor when print paper drops,
For the last four years he's had tears in his eye
Because the prices have been so high.
But if he carries a smile instead of a frown,
You can bet your life that
The Prices are DOWN!
—By G. P. McCullough, Barber

Notice to Automobile Owners.

Notice is hereby given that the Automobile Licenses for 1921 are now due. Penalty attaches January 1st, 1921.

ACRES OF BUFFALO BONES

Uncovered By Plow On Oswald Farm In Worth County

Last week, while plowing some sod land, Peter Oswald, an old settler in Worth county, unearthed a number of bones. A careful examination was made and the conclusion reached that these bones were those of buffalo. The plowing progressed and the bones became more unmerous, until several acres of them had been uncovered. The bones were almost a foot in depth and only about six inches below the surface of the ground.

At one time this ground was nothing but a low marsh and it is the general belief that a large drove of buffalos were driven by hunters into this marsh, where they perished, or that during some severe winter storm they had collected there and died of starvation.

Something similar to this was a few years go unearthed in the marsh on the Thos. Hill farm about three miles northwest of Clear Lake.—Clear Lake Mirror.

HERE'S A RECORD FOR RAILROAD TRANSPORTATION

The Fairmont Sentinel is authority for this paragraph—

Some six months ago Allin Catlin had about $400 worth of hardwood flooring shipped to Fairmont from Truman . It hasn't got here yet and can't be located. Mr. Catlin is beginning to wonder if it hasn't been delayed somewhere. The haul from Truman to Fairmont is 13 miles via Omaha railroad.

FOR SALE—A year old Duroc Jersey Boar, also several choice Chester White male pigs. Wm. Bell. 8-tfc

Friends of Terrill Gillet, a farmer residing east of Klemme' gives us the report that he was married a few weeks ago to a Mason City lady. Now there is a little joke connecned with this affair which our readers will perhaps appreciate. The would-be Bride and Groom went to Charles C ty to have the marriage knot tied and had the licence procured and all set for the big affair but as they, knew no one they could find for a wittness Mr. Gillet calcalled up a friend at Clear Lake and he had to go clear over to Charles City to see that the happy couple werh married. Their friends soon found out about the wedding and went to the Gillit farm and the big croud made merry for a time and coaxed the treats from the groom. Both are excellent people and best wishes of their many friends go out with them. The Times joins in congratulations.

SIOUX CITY, Ia., Nov.19.—With the live stock market bordering on the moralization, the members of the Sioux City Livestock Exchange Thursday adopted resolutions calling on the Federal Reserve System and Iowa representatives in Congress to use their influence at once to the end that necessary credit may be extended to the farmers and cattlemen who are now forced to liquidate.

The action of the exchange was the result of the increased cattle receipts which have assumed abnormal proportion for this time of the year.

The resolutions assert the entire livestock industry is jeopardized by the financial situation; say that banks and cattle loan companies are forcing ranchers and farmers even to dispose of their breeding stok on which they have loaned money and point to the fact that the country is filled with hay and grain that will be lost if stock can't be had to eat it.

Immediate action is urged.

As we go to press we letrn that the Earmers Co-Op. Grain Co. which was hrganised sometime a3o completed a deal the other day whereby thoy purchased the elevator and grain business of M. O. Hocum. Mr. Hocum will remain in possession of the business until May 1st, 1920. We hobe to give more complete details of the transaction in a later issue.

How to Keep Rubber Soft.

A prominent tire manufacturer says that an excellent way to prevent hardening of inner tubes when they are stored for the winter is to place them in hot water once a month or every six weeks. They should be immersed for just a couple of minutes, and should then be carefully dried and partly inflated before being hung up again. This treatment serves to keep the rubber pliable and soft.

BRUISED REEDS

By GERTRUDE CUSHING.

(©, 1920, by McClure Newspaper Syndicate.)

"And I contend that it is the experiences and exercises of the mind that cause age to appear in the body. It is the knowledge of good and evil and the consequent ever-increasing obligation to discriminate, together with the sorrow incident to failure, intentional or otherwise."

"Then you think that if the brain ceased at any given minute to develop, from that minute the body would remain unchanged in line and color and expression?"

"Something like that."

"Can you cite a case in point?"

The question came from a third man, who up to this point had taken no part in the discussion.

The three men, until the day before strangers, were gathered in a room in a small hotel in western Massachusetts. A snapping wood fire flamed in the grate, a pack of well-thumbed cards and tall glasses containing some steaming brew were helping to dispel the monotony of a desperately stormy evening.

"Yes," replied the first man, "in a very few words. Do you remember the oddly dressed young woman on the station platform when we left the train yesterday? Well, this is her story:

"She was a girl in this town when I was a boy, some 20 years ago. The winter she was eighteen she spent in New York, visiting an aunt. In the spring she came back, engaged to be married. In the fall her lover came up for three or four weeks and the wedding took place at the end of that time. They went to New York to live. We all liked him, and her letters home always sounded as though she was entirely happy. The next summer he received a letter calling him to a mining district in Montana. It was said that it was business which demanded his personal attention. He brought her here to stay with her people until his return, and from that day to this nothing has been heard from or of him. Whether the letter was a fraud, and that was a way he took to desert her or not, of course, I don't know. I have never thought so, however.

"For a while she put up a good fight. Then one day she collapsed utterly and cried continuously for hours. Nobody could do anything for her. At last it seemed as if something in her brain gave way and a complete change took place. She stopped grieving and declared her belief that her husband would return soon to surprise her and she must be ready for him.

"Each day she dresses with the utmost care, and goes to meet the New York train. Her brain life ceased at that minute, and in mind and body she seems to be the age that he left her. You've heard my theory. Now, what's yours?"

There was silence for a minute, then the third man spoke. He was a tall, stoop-shouldered man, with extremely white hair and eyebrows and a peculiar, sliding gait. A man old for his years, one would have said.

"Twenty years ago the 14th of July," he began, "I opened my eyes in a small room in a sort of improvised hospital ward in a mining town in Montana. They told me that six weeks before I had been struck on the head by a piece of stone from the arm of a derrick which had sprung loose. I was knocked unconscious and had been practically so ever since. When I looked at myself I was as you see me now. To all appearances an old man at twenty-three.

"I gained health and strength rapidly, and soon began to live again, but everything previous to that moment of my awakening on that 14th of July was a blank—an absolute void; and with memory went all capacity for intense feeling of any kind." He paused drearily, then concluded: "I suppose that woman is my wife."

That cold-blooded statement brought the second man erect in his chair. "Suppose she is? My God, man, is that all you have to say? What are you going to do about it?"

The third man rose slowly, thrusting his long arms upward, his fists clenched as though in some dumb, hopeless way he were challenging the Infinite. When he answered, his voice seemed attuned to the play of the elements raging outside.

"She's in a fool's paradise—of hope. Let her stay there. What can I do? I've got a wife and children in Claremont, Wyo. I married the girl who nursed me back to life." With that he shuffled from the room.

"To the devil with your theories!" burst from the second man as he raised his glass unsteadily to his lips.

The first man said nothing, but long after midnight he sat before the smoldering ashes.

Crime in U. S. Beats Europe

Investigator Tells Why "Tolerant America" Is Plagued With Murders and Thefts.

TASK OF POLICE MUCH HARDER

Neither the Police of London Nor Paris Would Be Able to Cope With Crime in New York or Chicago, Says Raymond B. Fosdick.

New York.—Tolerant American cities are overrun with criminals to a greater extent than metropolitan districts in Europe and neither the police of London nor of Paris would be able to cope with crime in this city or Chicago, according to Raymond B. Fosdick, who made public statistics compiled for the bureau of social hygiene.

"The police of an American city are faced with a task such as European police organizations have no knowledge of," said Mr. Fosdick in giving statistics from one part of his forthcoming work on "American Police Systems." "The metropolitan police force of London, with all its splendid efficiency, would be overwhelmed in New York, and the brigade de surete of Paris, with its ingenuity and mechanical equipment, would fall far below the level of its present achievement if it were confronted with the situation in Chicago."

Mr. Fosdick discusses the relation of heterogeneous population in America to the crime rate, and concludes that preponderance of crime in this country is augmented by unassimilated or poorly assimilated races.

We Condone Violence.

"It must not be supposed, however, that our foreign and colored population is the sole cause of our excessive crime rate," continues Mr. Fosdick. "If the offenses of our foreign and colored races were stricken from the calculation our crime record would still greatly exceed the record of western Europe. With all its kindliness and good nature the temper of our communities contains a strong strain of violence. We condone violence and shirk its punishment.

"As to the fact of our excessive criminality the statistics furnish startling evidence. London in 1916, with a population of 7,250,000, had nine premeditated murders. Chicago, one-third the size of London, in the same period had 105, nearly twelve times London's total. In 1918 Chicago had 14 more murders than England and Wales. In 1919 the nummber of murders in Chicago was almost exactly six times the number committed in London.

"In 1918 New York had six times more homicides than London, and exceeded the total homicides of England and Wales by 67. This contrast cannot be attributed to the peculiar conditions in London induced by the war. In each of the years from 1914 to 1918, inclusive, New York had more homicides than occurred in London during any three-year period previous to the outbreak of the war in 1914.

"Statistics of this kind could be multiplied at length. In the three-year period 1916-18, inclusive, Glasgow had 38 homicides; Philadelphia, which is only a trifle larger, had during this same period 281. Liverpool and St. Louis are approximately the same size; in 1915 St. Louis had 11 times the number of homicides that Liverpool had, and in 1916 eight times the number.

More Burglaries Here.

"Equally significant is the comparison of burglary statistics between Great Britain and the United States. In 1915, for example, New York city had approximately eight times as many burglaries as London had in the same period. In 1917 New York had four times as many burglaries as London. In 1918 the burglaries which the police reported in New York were approximately two and a half times those in London.

"While war conditions undoubtedly served to heighten this contrast they were by no means entirely responsible for it; in 1915 New York city had more burglaries than occurred in all England and Wales in 1911, 1912 or 1913. Chicago in 1916 had 532 more burglaries than London; in 1917, 3,459 more; in 1918, 866 more and in 1919, 2,146 more.

"Even more startling are the statistics of robbery. In each of the four years from 1915 to 1918, inclusive, New York city had from four to five times more robberies than occurred in all England and Wales in any one of the five years preceding the war.

Dickens often acted in private theatricals.

RECORD TUNA FISH

This 325-pound tuna fish, caught off San Diego, Cal., is the largest ever taken in California waters. It is a yellowfin tuna; a variety seldom found so far North. Hook and line were used in catching it.

Not a Houn' to Be Kicked Aroun'.

Bowling Green, Ky.—An automobile belonging to Ed Cantrill was the chief factor in a unique trade. John Harris owned an old mare and a surrey, also the best "possum" dog in Warren county. Cantrill gave his car for the horse and buggy and the privilege of hunting with the Harris hound during the coming season.

Prisoners of Reds Go Crazy

Many of Captives Returned to Germany Are Sent to Insane Asylums.

BITTER TOWARD FATHERLAND

Curse Their Flag and Denounce Country for Not Exchanging Them—5,000 Remain in Russian Prison Camps.

Stettin, Germany.—Every contingent of German war prisoners arriving here from Russia contains a number of ragged, unshaven, haggard men who have been made insane by suffering during many months in Russian prison camps.

In three weeks the German government sent 200 of these men to insane asylums and sanitariums for treatment. A few have spells of violence and during these periods must be kept under guard, but the majority present a listless, woe-begone aspect. They look about with dull, unseeing eyes, or sit quietly weeping, unconscious of the fact that they are home again.

The families and friends of the insane soldiers are allowed to greet them and to give them food and clothes before they are sent away for treatment.

Curses His Own Flag.

Nearly all the prisoners exhibit the most intense bitterness not only toward Russia, but toward the German government as well. One of them, who had lost a leg and an arm, and who, it was learned, had been taken prisoner early in the war and has been confined in many Russian prison camps, shook his fist at a German flag when he arrived, and cursed his country, his people, and all other countries and peoples.

"To—— with Germany!" he shouted. "That is not my flag and Germany is not my fatherland."

He then turned to the other prisoners and, pointing to his wounds, said:

"This is what Germany has done to me. This is what a kindly fatherland has permitted. Why didn't they exchange me? Because I have only one leg and one arm? I lost them fighting for Germany and all the thanks I've had for it were the rotten years in a Russian prison."

Tell of Their Sufferings.

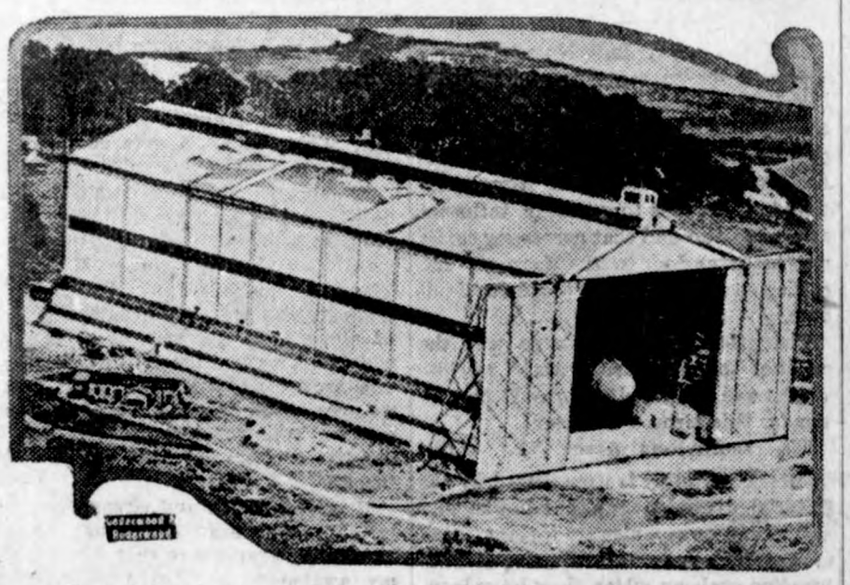
The prisoners generally agreed they had been unable to secure proper medical treatment in the Russian camps, and that their food had been very bad.

At the close of the war there were 250,000 Russians in Germany. The German government estimates that not more than 5,000 Germans will remain in Russian camps this winter.

Before the Russo-Polish hostilities began the Russians were being returned rapidly, but it is now estimated at least 200,000 Russians are still in German camps, 60,000 of whom are the troops interned when they crossed the east Prussian frontier during the Polish offensive.

The German government has expended 30,000,000 marks for transportation of Russians home, and 90,000,000 marks to bring German prisoners out of Russia.

Airship Hangar at Langley Field



View of the immense airship hangar that has been erected on Langley field, Va.

Town of 800 Packs Up to Move 10 Miles Away

Ellisville, Miss.—If you don't like the location of your town move the town.

So say the 800 inhabitants of Kohay, Miss. Some of the buildings are now on wheels and others will be loaded on flat cars and carried over a logging road to a site ten miles north of the present location.

Future Has No Terrors for Him.

Cincinnati, O.—Bernard Parrochni, cellist with the Symphony orchestra, is back in town and will devote his entire time to his art, for he's had a good time for a year. He's spent $24,500 of the $25,000 he inherited, and he spent it all seeing Europe. Parrochni will not have to worry about the future, however, for $180,000 is due him when he becomes sixty-one years old, five years hence.

ARMY MEN HIT HARD

50,000 Former German Officers Are in Bad Way.

Many Compelled to Toil at Hard Labor and Others Try to Exist on Small Pensions.

Berlin.—Many of the 50,000 former German officers discharged since the signing of the armistice have joined the great army of unemployed in Germany, a few have gone to work at hard labor, and others are trying to make small pensions pay for the expensive necessaries of mere existence.

Officers belonging to old, aristocratic, once wealthy families, are in no better situation than their comrades who relied for a living on their army pay.

They have long since disposed of most of their personal property, and it is not uncommon to see one offering to some foreigner a family heirloom for enough money to pay a grocery bill.

The wives and sisters of some of these men have gone into the shops, where they earn 350 marks a month, a sum a guest at any of the international hotels frequently pays for a single meal. The widow of a colonel killed at the front is supporting four children on a pension of less than 700 marks a month.

Former soldiers, and particularly the wounded, whose pensions are inadequate to supply them with food, have been hard hit. Day and night they may be seen standing on the streets with cap in hand, begging or selling matches. They still wear their uniforms, or parts of uniforms, and some of them, to incite pity, exhibit their wounds.

A party of Americans walking down Unter den Linden one night saw a former soldier stagger and fall to the pavement, unconscious. City physicians said he had fainted from hunger.

CHEVROLET DIES IN AUTO RACE

Great Driver Instantly Killed in World's Premier Contest.

O'DONNELL IS NEAR DEATH

Mechanician John Bresnahan Seriously Injured When Cars Crash in Big Thanksgiving Event at Los Angeles.

Los Angeles, Cal., Nov. 27.—Gaston Chevrolet, one of the world's premier automobile race drivers, was instantly killed; Lyle Joles, mechanician for Eddie O'Donnell, was fatally injured and died later at the Speedway hospital, and Eddie O'Donnell is dying of a fractured skull as the result of a collision between Chevrolet's Frontenac and the Deusenberg car driven by O'Donnell in the turn from the stretch in the 250-mile race. John Bresnahan, Chevrolet's mechanician, was seriously but not fatally hurt.

It is reported from the hospital that the surgeons were operating on O'Donnell in an effort to save his life.

In addition to a fractured skull he had both arms broken and was hurt internally.

The accident occurred just after leaving the stretch in O'Donnell's one hundred and fifty-eighth lap. O'Donnell, in an effort to pass Chevrolet, who was leading, crept up beside the Frontenac car, and the latter swerved. The cars came together with a crash and caromed to the outer edge of the course into the fence, a long section of which was torn loose. They then rolled toward the infield. Both cars were demolished.

Chevrolet was killed instantly. John Bresnahan, his mechanician, miraculously escaped with injuries that subsequently proved to be slight. Lyle Joles, his mechanician, was riding with O'Donnell in the Deusenberg entry, No. 9, and died of his injuries at the Speedway hospital, where all four injured men were rushed after the accident.

The accident cast a gloom over the biggest crowd that ever attended an automobile race on the track. There were approximately 100,000 people in the stands, and a majority of them saw the smash-up.

There was scarcely a cheer as Roscoe Searles, driving Deusenberg car, No. 10, with tears streaming down his face as he realized the fate of his teammates, received the checkered flag denoting his victory.

Chevrolet's death occurred when the greatest honor within the reach of an auto driver was within his grasp—the national championship. With Murphy finishing behind the leaders and Melton and De Palma out of the race, Chevrolet would have been crowned speed king for the 1920 season.

HARDING TO INVITE LEAGUERS

New President Will Ask All Foreign Governments to Send Delegates Here.

Washington, Nov. 27.—Shortly after inauguration President-elect Harding will invite all foreign governments to send delegates to Washington for a conference on an entirely new association of nations, it was stated here. Senator Medill McCormick, who sailed for Europe, is understood to be the emissary who will sound out European leaders on the conference. It is pointed out here that on the very day Senator McCormick sailed A. J. Balfour suggested to the league assembly that all amendments be postponed pending the receipt of America's views.

OBREGON ILL FROM POISON

Mexican President-Elect Is Seriously Sick, but Said to Be Out of Danger.

San Antonio, Tex., Nov. 27.—Gen Alvaro Obregon is seriously ill from ptomaine poisoning, according to reports. The Mexican president-elect is said to be out of danger, although death was feared for several hours. The report stated that Obregon will be able to take office December 1.

FATHER OF 3 KILLS WIFE

San Antonio (Tex.) Man Slays Spouse After Quarrel—Three Children Under Nine.

San Antonio, Tex., Nov. 27.—Oliver W. Filteau, thirty-five, shot and killed his wife, Mrs. Katherine Filteau, thirty-one, after a quarrel. He then turned the gun on himself, dying instantly. They have three children, all under nine.

Georgians Lynch Negro.

Dewitt, Ga., Nov. 27.—The body of Curley McKelvey, a negro, brother of Ophelius McKelvey, who shot and killed James E. Adams of Worth county, was found hanging from a tree here.

Blast Kills Five.

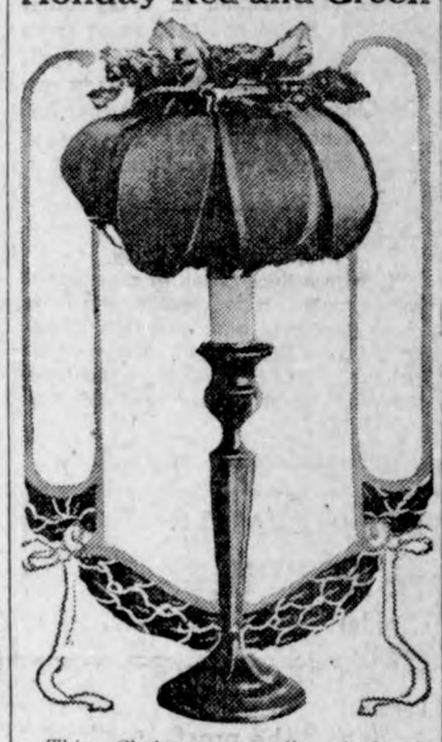
Madison, Wis., Nov. 27.—Five persons, four men and one woman, were hurled to their death when a large boiler in the condensary of the marketing plant at Stoughton, Wis., exploded.

Useful and Decorative Articles Nice for Christmas Presents

For Holiday Time

An unusually pretty breakfast cap is here offered as a suggestion for a gift. It is a spirited model made of taffeta silk and almost covered with crisp, plaited frills of taffeta ribbon. Such a cap requires a crinoline support and a lining of thin silk.

Holiday Red and Green



This Christmas candle shade is made of red and green crepe paper and decorated at the top with a spray of holly and holly berries. The paper is cut in petals, the under ones in red and the outside ones in green.

For Holding Pins

The baby will be served and his mother delighted at Christmas time with little gifts convenient for holding safety pins. A doll and a basket are shown in the picture each suspended by ribbons for hanging them. Little rings attached to the feet, hands and belt of the doll accommodate pins of several sizes. There are assorted pins in the basket.

To Welcome the Baby

Two lovely gifts, with which to welcome the stork, are suggested. They are a little cap of georgette crepe and a silk-lined and ribbon-frilled basket containing everything the baby needs for his toilette.

What Women Love

There is a world of pretty neck wear that every woman will love to receive and almost any woman can make. A favorite piece consists of collar with vestee to match, like that shown above.

Pretty Powder Bowls

Pretty powder bowls and baskets are sure of a great vogue for Christmas gifts. The four pictured include a little basket covered with plaited silk, at the upper left, and just below it the puff attached to its cover and ribbon-covered handle. A similar basket, at the right, is surmounted by a little ribbon-dressed doll—a disguised powder puff. At the lower left a glass bowl supports a puff holding a doll's head and at the right a net-covered jar enthrones a Jap baby.

Lace and Satin Piece

Wide satin ribbon and Val lace give a good account of themselves in the attractive neckpiece shown above. It is a vestee and collar combined, with a small "V"-shaped chemisette of lace, set in the vestee. The collar and chemisette are edged with narrow lace.

Charm to Ribbon

A morning jacket, a boudoir cap, a powder puff and little hand mirror, all owing their charm to lovely ribbons, are gift suggestions appearing above. The jacket and cap are made by setting together strips of narrow satin ribbon and Val lace.

COMRADES OF PERIL

By RANDALL PARRISH

COPYRIGHT A.C.McCLURG & CO.

"OLGA CARLYN."

Synopsis.—Tom Shelby, a rancher, rides into the frontier town of Ponca looking for a good time after a long spell of hard work and loneliness on the ranch. Instead, he runs into a funeral—that of Dad Calkins, a retired army man of whom little is known. A girl, still in her teens, survives Calkins. McCarthy, a saloon keeper and Ponca's leading citizen, decides that the girl, now alone in the world, should marry. Shelby starts a hunt for eligible husbands and the minister goes to confer with the girl. She agrees to pick a husband from the score of men lined up in her home. To his consternation, she selects Shelby, who had gone along merely as a spectator. He declines the honor. Indignant, the girl dismisses the assemblage. Later Shelby goes back to make an explanation. She receives him good-naturedly. Leaving her, Shelby runs into two of the rejected suitors, and in a fight worsts them both. Angered at their remarks, he returns to the girl, determined to marry her, if she will have him. After his explanation she agrees to marry him.

CHAPTER V.

The Wedding.

It was an exceedingly busy afternoon, so filled with details of preparation as to leave Shelby slight opportunity for reflection. He had never contemplated marriage, or imagined himself a benedict. He knew practically nothing as to the disposition and character of the girl or what she might acquire of himself. He had no conception that he loved her or that she felt any especial affection for him. His sudden action had been very largely influenced by his controversy with Cowan and she had quite frankly confessed that her choice of him rested entirely on the fact that he was not a resident of Ponca. There had been no mention of love between them, merely a business-like arrangement, unmarked by the slightest sentiment. He was dimly aware that this made a poor foundation on which to build for future happiness.

This peculiar situation was driven home to him by a vivid recollection of what he was going to take her to—that desolate ranch out there on the Cottonwood. Could she be satisfied? Could she even bear with such conditions?

He saw McCarthy and the preacher from Buffalo Gap, first telling them frankly the whole story and gravely pledging both to secrecy. Refusing firmly to receive a cent of the money which Mac promptly offered, he left these two to arrange all details for the wedding, confident of their discretion and good judgment. There was no necessity for his seeing the girl again, and, indeed, he felt no inclination to do so. He even shrank from the thought of seeing her, and was profoundly thankful that everything was so completely understood between them as to make another conference entirely unnecessary. Satisfied upon this point, he devoted the time remaining at his disposal to purchasing the variety of articles made necessary by this sudden change in life. The buckboard was loaded until nothing remained unoccupied but the narrow seat, a huge box, packed full, occupying the rear portion, with bundles tied securely here and there about the vehicle, wherever they would ride safely. Over all these he stretched a tarpaulin to keep out the dust, strapping the latter firmly into place.

The solemn injunction to secrecy had prevented Ponca from making this occasion one of special celebration, but, nevertheless, rumor had been sufficiently busy so as to prevent any strictly private ceremony. The parlor of the hotel was already crowded with uninvited guests when he finally arrived and there was also an overflow meeting in the adjoining dining room. Shelby swore under his breath, but it was too late to protest outwardly, as the bride-to-be was already waiting his arrival at the foot of the stairs.

In spite of the doubts which had assailed him during the past few hours, the sight of her thus awaiting his coming, her eyes meeting his own frankly, sent a sudden thrill through his veins. She was chaperoned by the wife of the principal storekeeper and doubtless others among the few respectable women of Ponca had combined their taste and possessions to properly fit her out for the occasion. Just how the transformation had been accomplished Shelby, being a man woefully lacking in experience, did not know, but he was vividly aware of the change in her appearance and manner. She was dressed in gray, the outer garment plainly fashioned but fitting well, while a most becoming hat, rather coquettish in its shape, rested on soft, shining hair, fluffed out attractively, forming a most agreeable frame for the young face, the cheeks flushed with excitement. Shelby stood before her tongue-tied, unable to find words of greeting, painfully conscious of his own awkwardness. The embarrassment, however, was but for the instant, for the preacher had been waiting his entrance, eager to begin the ceremony.

What occurred during the next few moments was never wholly clear in Shelby's mind. He did mechanically whatever he was told, but without comprehension. He remembered walking between rows of curious faces, occasionally recognizing a familiar countenance, clear across that crowded parlor to the further wall, which seemed to be decorated profusely with sprays of evergreen. He seemed to recall that the girl joined him, standing at his left, and that she had advanced to his side guided by Dan McCarthy. It was all vague, misty, uncertain, and the next moment all he saw was the fleshy figure of the Buffalo Gap preacher standing there immediately before him, his hands uplifted and his sonorous voice uttering words that sounded like a prayer. Then Dan came forward again and he felt her hand resting in his, realizing how soft and small it was. He remembered a question was asked him and he answered "yes" and then he seemed to hear her whisper a similar response. The preacher said something, using some strange words, and turning once to face the silent crowd pressing close in upon them; then he lifted his hands solemnly and Shelby caught the sentence, "I pronounce you husband and wife and whom God hath joined together, let no man put asunder."

There was an explosion of breath, a faint clapping of hands, an instant buzz of tongues. He felt that he must have shaken hands with a thousand people; was pushed here and there by the efforts made to reach him and finally, bewildered, his mind in a whirl, found himself once more out in the hall, obsessed with a desire to escape. He possessed no idea as to what had become of the girl; no doubt she was somewhere back there in the crush, but he, at least, was free, and would wait for her to join him outside.

He stood there alone, staring down at the team of broncos and the heavily laden buckboard uncomprehendingly. Yet slowly it all came back and his mind began to arouse from blank stupor. His attention was attracted by the approach of a horseman trotting steadily up the deserted street toward the hotel. The rider was a cavalry soldier in uniform, powdered with dust, his horse showing evidences of hard travel.

Shelby watched his coming curiously, his memory still lingering upon the scene within. The man drew up at the hotel, dropped his rein over the horse's head, swung stiffly to the ground and advanced up the steps. He glanced aside at Shelby's motionless figure, took a step toward the door and then wheeled suddenly.

"Say, ain't your name Shelby?"

The dazed bridegroom turned and looked into the face confronting him, his mind snapping back into quick recognition.

"Sure. Well, thunder, you're Shaunessy of the Sixth. What're you doing here?"

The two clasped hands firmly.

"Thought I knew you, Tom, when I first came up the steps, but wasn't quite sure till I got a side view. Must be six years since you left us, ain't it? What am I doing? Oh, they've shoved us up here from Arizona and I've been up at the Reservation watchin' 'em ghost-dance an' am headin' now for Collins to tell the old man the news. Some fun goin' to be pulled off presently."

"You mean the Sioux are goin' on rampage ag'in?"

"Sure thing, unless I miss my guess, an' I reckon I ought to know Injuns by this time. It'll either come this fall or next spring. I figure they'll never hold in over winter. Ol' Sittin' Bull has got the game in his hands an' you know that ol' devil, I reckon."

"I have reasop to. Any troops up there?"

"No; the Injun agent don't believe there's goin' to be any trouble; says it's just a few young bucks who are raisin' h—l. He don't know what is killin' first, unless I'm crazy. I've got to go in and get something to eat."

He started to turn away, but Shelby halted him with a question.

"How long you been in the army, Pete?"

"Twenty-two years."

"And with the Sixth cavalry?"

"Fifteen."

"Did you ever know a sergeant named Calkins?"

"Jeff Calkins; he was my first 'top' after I joined; he left the service 'bout ten years ago. There was a shootin' scrape or somethin' down at Harker. Sorter ugly story, though I've forgotten just what it was all about now. Calkins got out o' that all right, but when his enlistment was up he quit; he didn't get on good with the men. Do you know whatever become of the ol' duffer?"

"He was buried here yesterday—killed himself; left a daughter 'bout nineteen—"

"The h—l he did! Jeff Calkins never was married; not before he left the army, anyhow. I know because I bunked with him nearly two years an' he told me a lot about himself. He wasn't no lady's man at all. Say, what the devil is goin' on here?"

"There's been a wedding." Shelby started to explain, but the outflowing throng cut his sentence in two, and the startled soldier, stepping back to get out of the way, was instantly swept aside, while the gang poured forth between, separating the two completely. The bridegroom found himself once more the center of fervent congratulations and only escaped by pushing a passage down the steps to where his outfit waited for departure. Some moments later she joined him, accompanied by her bodyguard, wearing a long duster which almost reached the ground and a close-fitting cap pulled down over her smooth hair. He silently helped her into the seat of the buckboard, joining her grimly and gathering up the reins in his fingers.

"Now, then," he called, "a couple of you untie those brutes and jump. They're bad starters."

The broncos amply justified his prediction and the party went tearing down the main street, pursued by yells of enjoyment and cat-howls of derision, Shelby struggling with the reins in an endeavor to keep the maddened brutes off the sidewalks.

However, the steep ascent of the bluff brought the plunging animals to their senses and by the time they had surmounted the ridge and struck the prairie trail leading across the upland they were willing enough to slow down to the swift trot they were accustomed to take on long journeys. Shelby loosened his grasp on the leather and rested back in the seat, venturing a side glance at his companion. She was still gripping the iron rail for safety, but evidently felt no fear.

"Mean devil, that bronco," said Shelby, feeling the necessity of speech and flecking his whip lash at the buckskin, whose evil eye was peering maliciously backward, "worst horse I ever owned. The Kid back there seems to be some bronco buster and I'll let him try his luck when we get out to the ranch. I got some outlaws there."

She turned her head and glanced behind through the cloud of dust.

"Who is he? One of your men?"

"Well, I just hired him down at Ponca. Seems to be a mighty good rider. His name is Macklin, but everybody calls him 'Kid.'"

"Somehow I don't just like him."

"Oh, he's harmless enough."

"Perhaps so, but I have that feeling about him just the same."

Shelby made no answer and they rode on in silence through the circling dust. He felt awkward and embarrassed, unable to think of anything to say to keep up conversation and intensely conscious of the peculiar situation in which they found themselves.

Occasionally he stole a surreptitious glance aside at her, but her eyes were averted as though in avoidance, gazing out over the dull vista. To Shelby this quietness on her part, this half turning from him seemed particularly ominous. She was doubtless sorry already at her choice; this drear expanse which they rode was more than she expected to encounter—she was dreading already an approach to the Cottonwood. He had been a fool to even dream that he could ever satisfy her in such surroundings. Well, it was not too late to turn back. He would talk with her and learn the truth.

He drove steadily forward, endeavoring to formulate some pleasant opening sentence, his mind inevitably drifting back to that late conversation with Shaunessy and the doubts it had awakened. Ought he to permit her to become exposed to a possible Indian attack? Was it not plainly his duty to explain fully the exact situation? And then that other matter relative to Old Calkins? Surely it was her place to make that clear?

He straightened up, clearing his voice, and she glanced about, disturbed from revery by his action.

"How dismal it all is," she said, as he failed to speak, "and yet the very silence and loneliness has a charm. Is it like this out on the Cottonwood?"

"No, not exactly. It's lonely enough, but that is broken country, with something to rest the eyes on. I am afraid, though, you're goin' to be awfully sorry."

"Really, I don't," honestly. "I don't mind being alone at all. I've always been alone, so that won't hurt."

"But this is different," he insisted stubbornly. "Besides, I heard something back there in Ponca that makes me think I had no business bringing you along at all."

"What was that?"

"Why, just before we come away I ran into an old friend o' mine in the army, named Shaunessy. He'd been up in the Sioux reservation, watchin' 'em ghost-dance, and he says the bucks up there are goin' to raise Ned before long, an' there ain't no troops anywhere around sufficient to hold 'em. It's Ol' Sittin' Bull who is stirrin' 'em up."

"But surely they could never get down here?"

"Not to Ponca—no; they wouldn't go in that direction. But they'd be mighty liable to come raidin' down the Cottonwood. That's what Shaunessy said; he told me I'd better run my stock over into the Bad Lands, and lie out for awhile, till the soldiers

"Somehow I Don't Just Like Him."

got the devils rounded up again. I been thinkin' ever since I ought to tell you about it, so, if you thought best we could turn around an' take you back to Ponca."

"And then what would you do?"

"Me? Why go on o' course an' take care o' the cattle. 'Tain't the first time I've seen Indians."

"Then I am going with you," she said firmly. "I am not the least afraid. I wonder if you have an extra rifle out there?"

"Sure," he said, grinning. "I sorter like that kind o' talk, little girl. Can you shoot?"

"Some; I'll show you when we get out there. Anyway, please don't turn back on my account. I heard in Ponca that the Sioux were ghost-dancing, but I didn't think about their coming down the Cottonwood. Dad said they were getting ugly, but I don't know where he heard it."

This unexpected mention of Calkins stirred Shelby to ask a further question. She was going on with him, that was evident, and the mystery between them must be cleared away.

"What was your name?" he asked soberly.

She glanced up into his face, surprised at the abrupt question.

"My name! Why, don't you know?"

"I never heard of it; seems sorter odd, maybe, but I never did."

"It is Olga."

"Olga—Olga what?"

"Why, Shelby, I suppose."

"No, I didn't mean that. Of course, it's Shelby now, but what was it before today? 'Twasn't Calkins."

The smile had deserted her lips and her eyes were very serious.

"Just what do you mean, please? Have you heard something?"

"Well, yes. This here soldier Shaunessy has been in the army a long while; he was fifteen years in the Sixth cavalry. Now I happened to learn, accidentally from McCarthy, that Old Calkins was once a sergeant in that outfit, so naturally I asked Shaunessy if he ever knew him."

"And did he?"

"Sure; they were bunkies once an' he said Jeff Calkins never was married an' didn't have no daughter."

"Well, did I ever say I was his daughter?"

"No, o' course you didn't. I never asked, but everybody thought you must be. What was the old man to you, anyhow? I reckon I got a right to know."

"You certainly have, but I cannot tell you very much. Frankly, I don't know. I could not explain even how I came into his care. That sounds strange, perhaps, but it is true. I wasn't much of a girl when he got me first and I've scarcely been out of his sight since. I've asked him a thousand times, but he never would explain. Once he said it would come out all right after awhile. It seemed to anger him for me to ask questions, so, at last, I stopped."

"That's mighty queer. Did he ever tell you what your real name was?"

"Oh, yes; there wasn't any secret about that—it was Carlyn."

"Olga Carlyn," he repeated the words slowly. "Sorter Norwegian-Irish, ain't it? That story sounds rather funny to me."

"My idea is he was hiding me from someone; trying to keep me from being found. I decided that was why he moved about from place to place and always lived in such poverty and alone. I believe he had money or could always get some when needed. Then he seemed to be afraid all the time and watching for something to happen."

"And you don't have no recollection whatever of either your father or mother?"

"Not of my mother; she may have died when I was a baby, but I can remember my father, although I never saw him very often. He was a tall man with iron-gray hair and mustache; once I saw him in uniform."

"An officer, likely."

"I think so. I was at school then and I am sure the lady principal called him colonel. I never lived with him, but always at some school, first one and then another. I am sure I was in St. Louis when Calkins came for me and took me away. That is actually everything I know about it; since then we've just moved around from place to place."

They fell into silence and rode on thus for hours, seldom speaking, each engrossed in their own thoughts. Toward sundown they came into a more rolling country, with patches of green grass, and the trail wound in and out among shallow depressions, yielding greater variety of scenery. Just before dark they toiled up over a high ridge and from the summit looked for some distance down the valley of the Cottonwood. The trail ran slantingly down the side of the bluff, zigzagging here and there in search of easier passage, and it was necessary to descend slowly. Consequently it was an hour after dark when they finally drove up to a small cabin surrounded by trees, a hundred feet back from the stream, and the driver announced their arrival.

CHAPTER VI.

A Blow of Treachery.

It was a desolate home-coming—the great stars overhead, the tinkle of distant water, the silence and blackness all about, and the dim outline of the cabin barely visible amid the surrounding trees. The girl held her breath with lips pressed tight, staring around into the vague shadows and permitted Shelby to gently swing her between the wheels to the ground. Some way the strong grasp of his hands brought back to her a sense of courage.

"Is—is there no one here?" she asked, afraid to venture a step in the gloom. "It is terribly dark."

"I'll remedy that in a minute," he said, pretending a cheerfulness he was far from feeling. "Hey there, Kid, stake out yer horse, and come here and hold these broncs until I light up inside. Don't move, Olga; there is a steep bank just beyond. I'll only be gone a minute."

"But where is your herder?"

"Out with the cattle, probably; he doesn't sleep here, and had no idea when I would be back. Now hang on tight to these reins, Kid, and I'll help you presently. Would you rather go with me, Olga?"

"Yes," she said, her voice trembling slightly in spite of every effort at control, "I would rather not be left out here."

"All right; this is the path; don't be afraid. I won't let you stumble. Now, one step up; that's it."

"A Bit Tough Looking, I Suppose."

He flung open the unsecured door, and stepped into the dense blackness of the interior. She could see nothing, but heard him rummaging about, and finally caught the tiny gleam of a match. The next instant this had become the flame of an oil lamp, and the whole interior of the room became revealed in the yellow flicker. In spite of every attempt to steady herself, her heart gave a sudden throb, and she clutched at the door for support. This was even worse than she had pictured.

"A bit tough looking, I suppose," Shelby said with a hasty glance about. "Sorter surprise, this bringin' a wife back with me. Never reckoned on any such thing, or I'd a cleaned the shack up a bit. However, I'll straighten things around in a jiffy, as soon as I show the Kid the corral. Here's a chair to sit in," and he dumped its load on the floor. "You ain't afraid to wait here, are you?"

"Oh, no; I will be all right. You need not hurry."

Struck down from behind.

(TO BE CONTINUED.)

Clear Field.

"Ah, here is a letter from the old folk!"

"What does it say?"

"Come home your tailor is dead."—Pearson's Weekly.

A LETTER FOR WOMEN

From a Woman Whose Serious Illness Was Overcome by Lydia E. Pinkham's Vegetable Compound.

Garnett, Kas.—"I first took Lydia E. Pinkham's Vegetable Compound for a complete nervous breakdown following the birth of my oldest child. I got up too soon which caused serious female trouble. I was so weak that I was not able to be on my feet but very little and could not do my housework at all. I had a bad pain in my left side and it would pain terribly if I stepped off a curb-stone. One day one of your booklets was thrown in the yard and I read every word in it. There were so many who had been helped by your medicine that I wanted to try it and my husband went to town and got me a bottle. It seemed as though I felt relief after the second dose, so I kept on until I had taken five bottles and by that time I was as well as I could wish. About a year later I gave birth to a ten pound boy, and have had two more children since and my health has been fine. If I ever have trouble of any kind I am going to take your medicine for I give it all the praise for my good health. I always recommend your medicine whenever I can."—Mrs. EVA E. SHAY, Garnett, Kansas.

Thirty Running Sores

Remember, I stand back of every box. Every druggist guarantees to refund the purchase price (60 cents) if Peterson's Ointment doesn't do all I claim.

I guarantee it for eczema, old sores, running sores, salt rheum, ulcers, sore nipples, broken breasts, itching skin, skin diseases, blind, bleeding and itching piles as well as for chafing, burns, scalds, cuts, bruises and sunburn.

"I had 30 running sores on my leg for 11 years, was in three different hospitals. Amputation was advised. Skin grafting was tried. I was cured by using Peterson's Ointment."—Mrs. F. E. Root, 287 Michigan street, Buffalo, N. Y. Mail orders filled by Peterson Ointment Co., Buffalo, N. Y.

Help That Bad Back!

Why be miserable with a "bad back?" It's time you found out what is wrong! Kidney weakness often causes much suffering from backache, lameness, rheumatic pains, headaches, dizziness and kidney irregularities. Neglected, it may lead to dropsy, gravel or Bright's disease, but if taken in time it is usually easily corrected by using *Doan's Kidney Pills*. *Doan's* have helped thousands.

An Iowa Case

Mrs. P. W. Foster, 117 W. Grant St., Shenandoah, Iowa, says: "I had an attack of kidney and bladder trouble. I had dizzy spells and little black specks floated before my eyes. My back was very painful and when I bent over I could hardly straighten up. I read about Doan's Kidney Pills and decided to try them. They soon entirely relieved all the trouble."

Mrs. T. F. Mitchell, of Swea City, Iowa, visited at the home of her sister Mrs. C. G. Waterman last week from Monday evening until Wednesday morning. She had to get back to Swea City in time to prepare a Thanksgiving dinner for Tommy as that gentleman has a ravenous appetite about that time each yera.

As we were coming from the depot Tuesday morning on our return from Kansas City we were attracted by the Thanksgiving display window at the Wellemeyer store. That which attracted our attention was the "wine" on the table and so we went in and accused Art of running a still. He informed us it was only colored water but at that he did not invite us to sample it so we are still suspicious as to the contents of the wine glass.

Atchison upholsterer recently repaired an old sofa and found many articles between the back and the cushion. There were 47 hairpins, 2 mustache combs, 19 suspender buttons, 13 needles, 217 pins, 8 cigaretts 3 cigars, 27 cuff buttons, 6 pocket knives, 15 poker chips, a small bottle ing gum, 50 toothpicks, 28 matches and 14 button hooks. The sofa belonged to a man who has three unmarried daughters.—Exchange.

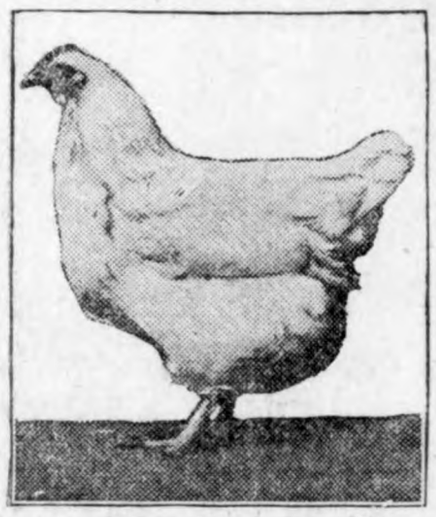
PLAN OF MISSOURI COLLEGE

Fowl Must Be Strong, Active, Healthy, Gentle and Contented and Should Not Molt Before the First Day of October.

Would you know a good laying hen if you should meet one? Hundreds of farmers would. They have found out that the best producing hens have certain characteristics difficult to hide. If they doubt general appearances it is a simple matter to catch the bird and by a few movements either confirm or dispel the doubt. There's no getting away from the fact—a good hen can't hide her good qualities from well-informed poultry raisers. Some not so well informed had to go through the "show-me" stage, and the extension service of the University of Missouri college of agriculture, acting through specialists and county agents proceeded to do the showing. These agents last year held 2,268 culling demonstrations. Out of the 200,000 birds handled, 81,000 were culls. The doubters were instructed to retain the culls and report the number of eggs received. In no case have the culls been found profitable.

Characteristics of Hen.

What are these characteristics by which a laying hen can be picked out? Circular No. 70 issued by the extension service groups them under five heads: Vigor, molt, pigmentation, quality, and laying condition. They are further defined. The hens must be



Quality and Utility Are Combined in This White Plymouth Rock Hen of the Flock on the Government Farm at Beltsville—Though of a Family of Prize Winning Show Birds, She Made a Good Record as a Layer—From January 25 to September 11 of Her Pullet Year She Laid 176 Eggs.

strong, active, healthy, gentle and contented. They should not molt before October 1. Pigmentation refers to color—shanks and beak pale, ear lobes showing no yellow. In seeking quality, observe that the skin is soft, fine and velvety: breast bone thin; bones straight and flexible. To be in laying condition, the abdomen is soft and flexible. Vent moist and expanded. Body depth four inches or more. Width of pin bones at least three fingers.

Pick Out Best Layers.

No difficulty should be met in picking out the best laying or the poorest laying hens in the farm flock. With some birds, however, the distinguishing marks are not so distinct and may sometimes be rather contradictory. Thus one hen may be an early molter and yet show good body depth. Another bird may molt late and at the same time show poor quality. Birds of this type are usually medium producers and the owner must decide whether they should be kept or sold.

If the birds are being culled very closely with the idea of keeping only the highest producers then all those in the doubtful class should be disposed of. If only the unusually poor birds are to be sold then those showing uncertain characteristics should be kept. Any person who will examine a few hens, keeping in mind the characteristics of the good producer as opposed to those of the poor producer, should be able to cull satisfactorily.

FARM WAGON UNDER SHELTER

Average Life of Vehicle Is Six Years When It Should Be Twenty With Hard Work.

The average life of a farm wagon is six years, when it ought easily to be thirty with good care, or twenty with hard work. The thing is to keep it under a shed when not in use. Wash off the mud when it is stored. Give it a coat of paint once a year. This treatment will double its life.

COLLAR BOILS HURT HORSES

Best and About Only Cure for Trouble Is Veterinarian's Knife—Pressure Is Cause.

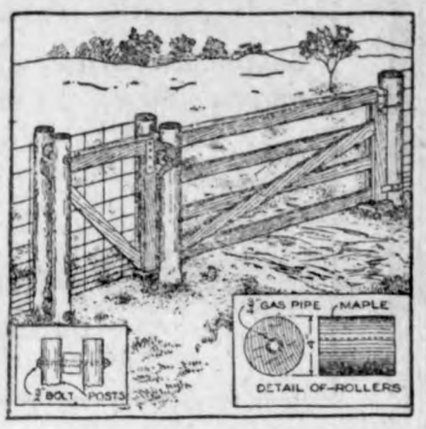
If one of your horses is troubled with collar boils the best (and about the only) cure is the knife of a veterinarian. The cause of the trouble remains in the form of a more-or-less dried-up cyst, and will recur whenever there is continued collar pressure.

SLIDING FARM GATE IS EASILY OPERATED

Must Be Suspended Between Two Strong Posts.

Equilibrium Is Maintained by Principle of Cantilever—Rollers Are Made of Hard Wood, Bored to Hold Gas Pipe.

A sliding farm gate which rides on rollers is easily opened and closed, and such gates would be commoner if it were not for certain difficulties of construction. The gate must be suspended, as the earth it too soft to support the rollers, and if it hangs from a track, barn-door fashion, the passage through the gateway will be obstructed. This difficulty can be overcome by furnishing the gate with a



By Means of a Long Top Rail a Farm Gate Is Made to Ride Smoothly on Wooden Rollers.

long top rail which projects several feet beyond the rest of the structure, as shown in the sketch. The projecting part bears against a roller placed above it, so that equilibrium is maintained by the principle of the cantilever. There is less strain upon the posts than in the case of a hinged gate, but it is necessary to plant them firmly, as the gate will not ride easily if they are bent from the vertical. Each pair of posts should be bolted together before being set in position, and should be set 3 feet deep, with a coat of creosote on the lower part, to prevent rotting, and with wooden blocks spiked around them, to keep them steady. The rollers are made of hard wood, bored to hold a bushing of ¾-inch gas pipe, which should be made a tight fit. They are then placed between centers, or on a mandrel, and turned true, after which they should be boiled in linseed oil to make them weatherproof.—H. A. Shearer, Willits, California.

GOOD BROAD CONCRETE WALK

One of the Greatest Time and Work Savers About the Farm—Prevents Tracking Up the House.

One of the greatest time and work savers about the farm is a good broad concrete walk from the barn to the house. When there is nothing but a dirt walk it is almost impossible to avoid "trackin' in" mud and barn litter, but with a concrete walk raised a couple of inches above the yard level, and with base enough to permit of driving over it where necessary, a lot of the work of the housewife is done away with.

DRILL CUPS ARE NEGLECTED

More or Less Wear Causes Partial Closing or Widening of the Grain Spaces.

One of the too-often neglected jobs about the farm is the tuning up of the cups in the grain drill. After the first few years there is sure to be more or less wear, and this not infrequently results in the partial closing or else the widening of the space through which the grain moves into the spouts. When this happens, even seeding becomes impossible. And often just a little attention will set matters right, and will greatly prolong the life of the drill.

CONCRETE FLOORS FOR BARN

Provision Should Be Made for Sufficient Slope So That It Can Easily Be Flushed.

In laying the concrete floor for the new barn, see that it slopes enough so that it can be easily flushed with a hose. Even if you haven't the water at this time, the day is coming when you will have water pressure, and will do the bulk of your cleaning by means of it.

SUN IS BEST DISINFECTANT

Hard to Beat Plenty of Good Strong Sunshine and Ought to Be Kept at Work.

You can pay out a lot of money for disinfectants, but it's pretty hard to beat plenty of good strong sunshine. Not that the disinfectant may not be needed too, but that sunshine ought to be kept steadily at work.

TRUCK FOR AVERAGE FARMER

Vehicle of One to Two Tons Capacity With Trailers Is Plenty Large Enough.

For the average farmer's use a truck of one to two tons capacity and one or two trailers of equal capacity is preferable and less expensive to buy and operate than a three or five ton truck alone.

SPLENDID RESULTS OBTAINED BY BOYS AND GIRLS WITH CHICKENS

Poultry Club Member Making Up Her Mind Whether This Bird Is Good Enough to Exhibit.

One of the fine examples of profitable poultry club work is the case of Frances Easley, a Tennessee farm girl, who became a member of the boys' and girls' poultry club about two years ago. The first season she was very successful in hatching and rearing her chicks, and in addition to those which were sold she had a nice flock to carry her over and which she used as a breeding pen the following year. At the end of that time the following report was submitted:

Value of market poultry sold.....	$13.86
27 pullets sold as breeders	47.50
17 settings of hatching eggs sold....	22.05
On hand November 1:	
12 cockerels, valued at.....	$24.00
112 pullets and cockerels, valued at..	100.00
Won at county fair	3.00
	$210.41

Frances spent for poultry equipment, eggs for hatching, feet, etc., a total of

Girl Member Feeding Her Flock.

$128.75, leaving her a net profit for the year of $81.66. Miss Frances has a very nice Shetland pony, and furthermore, a sense of independence that is only found in boys and girls who know the value of money as the result of having earned it through their own efforts.

Russel Monroe, a country boy of 14 years of age, raised 120 Golden and Silver Campines from 175 eggs. At the state fair he made six entries and won special for the best display, in addition to other prizes. In this exhibit he competed against three older breeders. Furthermore, he received the state championship loving cup and a free trip to the state fair for his excellent work as a club member.

Orbid Miller, an Oklahoma boy, residing at Elk City, raised 285 chicks. At the end of his first club year he made a profit of $336 over the cost of production through the sale of chickens and eggs sold for commercial as well as breeding purposes.

This Boy Favored Turkeys.

The activities of the poultry club members are not confined to chickens alone, as will be shown in the following report:

Dwight Carroll of Winchester, Jefferson county, Kansas, stands first in his state with respect to profits received from his year's work. Dwight makes the following statement: "When I entered the poultry club work I decided to raise turkeys. We had five turkey hens and I bought a tom. I set most of the eggs of the turkeys under chicken hens, but let the turkey hens keep a few eggs to hatch so that they would claim the little turkey when hatched. I kept the little ones shut up for a week and then let them go with the mother turkeys. Most of their feed was secured around the farm." Dwight records that he raised 56 turkeys to maturity. His total expenses amounted to $20.60 while his total receipts amounted to $261.40, leaving him a net profit of $240.80.

Other Instances.

Numerous other instances can be cited showing what has been accomplished by club members, many of which have been as successful as those mentioned above. Many boys and girls have come to realize as a result of their poultry club work that all of the opportunities are not in the cities and towns. It has been demonstrated that to interest the boy or girl in farm life he or she must be made to realize and appreciate the opportunities to be secured on the farm by not being educated away from the farm. It is not surprising therefore, that we find developing as a result of this and other forms of club work hundreds of boys and girls who intend to make farming their life work.

DUCK FANCIERS TOLD HOW TO BREED DUCKS

Leaflet Prepared by Bureau of Biological Survey.

Simple, Three-Sided Shack Is Quite Sufficient in Most Climates—Breeding Season Opens Rather Early in Spring.

Uncle Sam is the best friend the wild ducks have, and it follows that he has a warm spot in his heart for the wild-fowler, too. In the interests of both he has prepared a leaflet on the propagation of wild ducks which may be had from the bureau of biological survey, Department of Agriculture, by anyone who asks for it.

Mallards are the easiest to handle, with wood duck coming next. Black ducks need more space than either of these because they are more sensitive—a bit "wilder." Widgeon and teal need winter shelter, if grown in the North, to a greater extent than their cousins, but the provisions for shelter need not be elaborate. For most ducks and most climates a simple, three-sided shack is sufficient, though extreme cold weather should find the ducks housed in a tight building with plenty of litter on the floor.

Fresh infusions of wild blood must be introduced from time to time if the birds are to keep their wild conformation.

Wild duck eggs are usually hatched under hens, though they may be hatched in an incubator. Breeding stock of whatever species should be obtained in the fall so as to be settled in its quarters before the breeding season, which comes rather early in spring. The leaflet describes the care and feeding of the young birds at every stage in their development from the yellow fuzz of the duckling to the gleaming iridescent feathers of the mature bird.

ICE HARVESTED FROM PONDS

Saves Much Money to Milk Producers and Provides Wherewithal for Home Comforts.

Ice harvested from ponds on the farm saves many dollars a year to milk producers and provides the wherewithal for many home comforts. The United States Department of Agriculture, in Farmers' Bulletin 1078, which may be had upon request, tells how to build an icehouse in the slack fall season and how to store ice economically and securely. One and a half tons of ice properly stored will serve to cool the milk from one cow for a year and leave some for family purposes.

CHECK BROWN SPOT OF CORN

Careful Field Sanitation, Crop Rotation and Seed Selection Aids in Controlling.

Brown spot of corn is present throughout a large part of the corn-growing section east of the Rocky mountains. The disease is caused by a minute fungous parasite. Damage may amount to 10 per cent, but is lower in most sections. Careful field sanitation, crop rotation, and seed selection are recommended by the United States Department of Agriculture as an aid in controlling the disease.

POULTRY NOTES

Wherever possible, the geese on a farm should have free range.

* * *

There is a great cash difference between 300 quality birds and 300 of medium quality or worse.

* * *

There are six requirements for a good poultry house; fresh air, sunlight, dryness, no drafts, low cost and durability.

DAIRY HINTS

LARGER IMPORTS OF BUTTER

For First Seven Months of This Year 22,855,090 Pounds Shipped to United States.

The record for butter imports established in 1919, when 9,519,368 pounds of butter and butter substitutes were brought into the United States, was short lived. Following the recent announcement of these important figures by the United States Department of Agriculture the department has compiled reports for the first seven months of this year which show that the United States during that period imported 22,855,090 pounds of foreign butter, which is more than ever before.

This remarkable increase is attributed by foreign marketing experts of the department's bureau of markets largely to the foreign exchange situation. With American dollars commanding a premium throughout the world it is obviously good business for foreign butter manufacturers to sell their product in the United States. Foreign manufacturers also have the advantage of low cargo rates. Another reason for the increased imports is that whereas England was formerly Denmark's principal butter outlet, England can now purchase butter more cheaply from Australia and Argentina. Ireland also is producing butter on a larger scale.

The effect of the exchange situation is also reflected in a decrease of American butter exports. Thus, 15,-

Federal Inspector Sampling Imported Butter.

527,271 pounds of American butter were exported during the first seven months of 1920, whereas 22,986,294 pounds were sent out of the country during the corresponding period of 1919.

Imports of butter from Denmark are being curtailed at present because the prices asked by the holders of Danish butter in storage here are higher than the wholesale prices for the American product, and some difficulty is being experienced in moving the Danish stock.

CORRECTNESS OF SEPARATOR

Minnesota Farmer Discovered He Was Losing 364 Pounds of Butterfat Every 30 Days.

Defects in the separator will, in the course of time, make heavy inroads on the dairyman's receipts from butterfat. For instance, the testing of skim milk to ascertain how the separator is working is not regarded important by some dairymen. But in the case of one herd of 35 cows in Minnesota, which produced 1,200 pounds of butterfat last June, the skim milk was tested and found to be carrying off 364 pounds of real butterfat every 30 days. This is vouched for by L. V. Wilson, agent in dairying for the United States Department of Agriculture with headquarters at University Farm. "This farmer," says Mr. Wilson, "purchased a new separator the next day after the skim milk was tested. This incident ought to be a sufficient lesson for prompting many others to determine the accuracy of their separators."

PUNCTUALITY IS ESSENTIAL

Dairyman Should Be Regular About His Work With His Herd—Feed Grain While Milking.

The dairyman should be punctual and regular about his work, for not only does the work itself depend on it, but the amount of milk the cow will give as well. In feeding, the grain should be fed first and while it is being consumed milking should be done. Hay should be fed after milking, for it fills the air with dust which carries immense quantities of mold and bacteria that will hasten the spoiling of the milk if permitted to enter it.

POOR SIRE DOES MUCH HARM

Thousands Pounds of Milk Per Year Is Estimated Improvement Credited to Purebred.

"A few poor cows may do little permanent harm to a dairy herd but a poor sire will do untold damage. One thousand pounds of milk per year is a conservative estimate of the improvement of the daughter's production to credit of a good sire."—Prof. W. J Frazer, University of Illinois.

Another Royal Suggestion

MUFFINS and COFFEE CAKE

From the NEW ROYAL COOK BOOK

BREAKFAST is too often eaten as a duty rather than a joy. The Royal Educational Department presents here some breakfast dishes that will stimulate the most critical appetite.

Muffins

2 cups flour
2 teaspoons Royal Baking Powder
1 tablespoon sugar
½ teaspoon salt
1 cup milk
2 eggs
1 tablespoon shortening

Sift together, flour, baking powder, sugar and salt; add milk, well-beaten eggs and melted shortening; mix well. Grease muffin tins and put two tablespoons of batter into each. Bake in hot oven 20 to 25 minutes.

Coffee Cake

2 cups flour
¼ teaspoon salt
3 tablespoons sugar
4 teaspoons Royal Baking Powder
2 tablespoons shortening
½ cup milk

Mix and sift dry ingredients; add melted shortening and enough milk to make very stiff batter. Spread ½-inch thick in greased pan; add top mixture. Bake about 30 minutes in moderate oven.

Top Mixture

2 tablespoons flour
1 tablespoon cinnamon
3 tablespoons sugar
3 tablespoons shortening

Mix dry ingredients; rub in shortening and spread thickly over top of dough before baking.

ROYAL BAKING POWDER

Absolutely Pure

Made from Cream of Tartar derived from grapes.

GREEN'S AUGUST FLOWER

The Remedy With a Record of Fifty-four Years of Surpassing Excellence.

Those who suffer from nervous dyspepsia, constipation, indigestion, torpid liver, dizziness, headaches, coming up of food, wind on stomach, palpitation and other indications of fermentation and indigestion will find Green's August Flower a most effective and efficient assistant in the restoration of nature's functions and a return to health and happiness. There could be no better testimony of the value of this remedy for these troubles than the fact that its use for the last fifty-four years has extended into many thousands of households all over the civilized world and no indication of any failure has been obtained in all that time where medicine could effect relief. Sold everywhere.—Adv.

Shaft Peculiarly Situated.

A mining shaft in Sombrerete, Mex., is almost exactly on the Tropic of Cancer, and at noon on June 21, the sun shines to the bottom, lighting up the well for a vertical depth of 1,100 feet or more.

WHY DRUGGISTS RECOMMEND SWAMP-ROOT

For many years druggists have watched with much interest the remarkable record maintained by Dr. Kilmer's Swamp-Root, the great kidney, liver and bladder medicine.

It is a physician's prescription.

Swamp-Root is a strengthening medicine. It helps the kidneys, liver and bladder do the work nature intended they should do.

Swamp-Root has stood the test of years. It is sold by all druggists on its merit and it should help you. No other kidney medicine has so many friends.

Be sure to get Swamp-Root and start treatment at once.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

Knows Better.

Home Town Helps

THE DRIFT FROM THE CITY

Foresighted Corporations Are Now Building Their Factories in the Rural Districts.

American corporations have sought, as a rule, to build plants at or near large cities, where there supposedly was an ample supply of suitable labor. But the building of factories at big cities has not proved altogether satisfactory. It has been found that labor union agitators can exercise more inflammatory influence in large centers than where plants are located in the smaller communities. The large-city plant often finds it difficult to establish close, intimate personal relations with its work people, whereas in a smaller town the executives who run the principal industries can and do very often get closer to their folk and build up harmonious relationships which outside professional agitators cannot bedevil.

From now on there will be witnessed more building of new plants away from congested centers. The most progressive employers today attach very great importance to bringing about a spirit of loyalty among their people, and they find that it is not so difficult to do this when their plant is either the only one or one of a few in a community.

This movement away from crowded industrial centers is to be welcomed. It is better for all concerned, for example, that new cotton mills be built in Texas than in Fall River, new woolen mills in the Middle West than in Lawrence, Mass., and huge new automobile plants in small towns than in Detroit.

It may not be feasible for millions of workers to go "back to nature" in the sense of returning to the tilling of the soil, but it is feasible and desirable to draw millions of industrial workers away from metropolitan cities and into more rural districts.—Forbes Magazine.

HOME OWNER BEST CITIZEN

Can Be Relied On as a Bulwark of the State in These Times of Unrest.

In a message to the realtors of the United States, John L. Weaver, president of the National Association of Real Estate Boards, said that no more important campaign could be undertaken in these times of unrest than that exemplified by the "own-your-own-home" movement.

"Own your own home," said Mr. Weaver, "is a slogan country-wide in its use. It is reasonable, comfortable and upbuilding in good citizenship. Where the own-your-own-home movement has worked its beneficent influence there will be found contented, constructive citizenship, composed of men and women who are not only law-abiding, but are ever ready to strike a blow for country or state whenever called upon to do so.

"So I beg you to give the own-your-own-home movement the added impetus of your personal effort, to give the national thrift campaign your hearty support."

Referring to the "own-your-own-home" movement, John Poole, chairman of the district executive committee on national thrift, said: "Persons living at home may feel sure their family circles will be much happier than under other conditions. From a financial standpoint, persons waste less time, money and energy by living at home. Practically speaking, the nation's welfare depends upon the home. Around home life center the characteristics that make a nation weak or strong."—Washington Star.

War Gardens in Peace Times.

From out the chaos and the debris of the World war there shine here and there benefits the value of which we have hardly begun to appreciate. The war garden carried over into the times of peace is one of these benefits which, if encouraged and continued to its fullest degree, will work an immeasurable blessing upon not only the individuals immediately concerned, but upon the nation at large.

It has been conservatively estimated that during the year 1918 no less than 2,500,000 children had gardens and produced fully $48,000,000 worth of food. In 1919 and 1920 there was an increase in the number and value of these gardens in some sections and, unfortunately, a falling off in other sections.

Numerous as these gardens were and are, there is opportunity to multiply them tenfold, perhaps one hundredfold—and this without appreciable financial outlay.

Aimed at Billboards.

A bill recommended by a commission appointed by the Boston city council provides that the owner or user of a sign shall be liable for all damages in any highway accident of which the sign is the approximate cause. The bill provides that no sign shall be placed or be of such a nature that it tends to distract the attention of persons driving on a highway, and every public officer is given authority to destroy any sign which is so placed as to prevent an unobstructed view of a highway from any part thereof for a distance of 300 feet in either direction.

Live Stock News

SELECTING BEST BEEF CALF

Animal Must Have Proper Conformation, Breed Type and Good General Appearance.

If the beef calf selected for raising is to develop into a useful, profitable individual for breeding purposes, it must be a good calf as well as the descendant of good ancestors. Keep in mind that you are either selecting a calf for a herd bull or for a foundation breeding cow. To be classed as a good calf it must have the proper form, which is sometimes spoken of as "type" or "conformation." If you expect to select a calf with these necessary requirements, you should become familiar with them. Study pictures of famous animals; note their form. A score card of the breed you are most interested in would be useful. Learn the different parts of a beef animal and the method of examination in judging them.

In selecting the calf, first get an idea of its general appearance. This you may do by looking at it from a distance of from 10 to 15 feet, observing its weight or growth according to age, conformation, quality, condition, body, breed type, and general disposition. Observe it closely, beginning at the head and neck, then forequarters, body, and hindquarters, in order named. If a bull is selected, it should not have the appearance of a heifer or a steer, but the strong, vigorous, masculine appearance of a bull in every detail. If a heifer is selected, she should have the feminine appearance of a good breeding cow rather than the possible coarseness or roughness of a steer.

Thus observing the calf without putting your hands on it, select one that is stylish and active. When viewed from the front it should have a short face, large muzzle, wide forehead, short neck, and a wide, deep chest, indicating a strong, vigorous constitution. When looked at from the side its back should be straight and level from top of shoulders to the tail. It should have a deep body and smooth, long

Calf of Desirbale Type—Note the Beef Conformation and Excellent Breed Characteristics Shown in This Heifer.

hindquarters. When viewed from the rear it should present a wide, deep appearance. While as much width as possible is desired, it should not be accompanied with roughness about the shoulders and the hips or hocks. The legs should be rather short, stout, and set wide apart. A calf that stands high from the ground, cut up in the flank, and shallow in the heart girth, has little chance of developing into a useful or profitable breeding animal.

After you have found a calf with good general appearance, have someone hold it so that you can put your hands on it. This is the best way to determine what are called "condition" and "quality." Condition means the amount of flesh and fat the calf has. Select a calf in good growing condition, but not excessively fat. The beef calf for breeding purposes should have great depth of natural flesh and be free from roughness or coarseness in any way. By running the open hand along the back and sides with a slight pressure of the finger tips the amount and quality of condition may be determined. A calf in proper growing condition, while not possessing the depth of flesh of a mature animal, should have a smooth, even covering of firm though not hard flesh along its back and sides and over the shoulders.

Quality may be determined by the eye of the experienced judge, but the hand may also be used to advantage. All the following indicate quality: A thick coat of hair that feels soft and silky and looks glossy; a loose, pliable skin that does not seem thick, rough, or tightly stretched over the body; and rather short legs that appear to have strong, clean bones without roughness or coarseness.

A calf showing early maturity, as indicated by the tendency to put on an even covering of rather firm flesh, is desirable.

Color is of little importance as long as the calf selected has the approved color of the breed desired. There are, however, popular shades and color markings of the different breeds, which you will learn from further study of the breed selected.

COMMON SHEEP SCAB CAUSES

Ailment May Be Differentiated From Conditions Caused by Pestiferous Ticks or Lice.

Common sheep scab may be differentiated from conditions caused by other parasites, such as sheep ticks, common ticks and lice by finding the parasite and by the nature of the lesion. If the itching is caused by ticks an examination will reveal the ticks.

say BAYER Aspirin

Then it is Genuine

Warning! Unless you see the name "Bayer" on tablets, you are not getting genuine Aspirin prescribed by physicians for 21 years and proved safe by millions.

Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains proper directions for Colds, Headache, Pain, Toothache, Neuralgia, Rheumatism, Neuritis, Lumbago.

Handy tin boxes of 12 tablets cost but a few cents—Larger packages.

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid.

Famous Fish Family.

Pickerel is diminutive for pike, and is applied to the smaller species of the pike family and to the young of the larger species. It is most often applied to the banded pickerel, which seldom exceed 12 inches in length. The muskellunge is a very large species of pike, sometimes attaining a length of eight feet. It is found in northen fresh waters of North America, and is a famous game fish.

USE "DIAMOND DYES"

Dye right! Don't risk your material in a poor dye. Each package of "Diamond Dyes" contains directions so simple that any woman can diamond-dye a new, rich, fadeless color into old garments, draperies, coverings, everything, whether wool, silk, linen, cotton or mixed goods.

Buy "Diamond Dyes" — no other kind—then perfect results are guaranteed. Druggist has "Diamond Dyes Color Card"—16 rich colors. Adv.

Narrow Minded.

A narrow-minded man is one who won't admit it, but really believes that the world would be better off if there were no one living on it but himself.—Detroit Free Press.

Stop the Pain.

The hurt of a burn or a cut stops when Cole's Carbolisalve is applied. It heals quickly without scars. 30c and 60c by all druggists. For free sample write The J. W. Cole Co., Rockford, Ill.—Adv.

Usage of Language.

"He's all wool."

"I can't cotton to him."—Louisville Courier-Journal.

Don't think a floating debt is necessarily a light one.

Its Nature.

"This bacon is neither very good nor very bad."

"How could you expect it to be either when it is just middling?"

How's This?

HALL'S CATARRH MEDICINE will do what we claim for it—cure Catarrh or Deafness caused by Catarrh. We do not claim to cure any other disease.

HALL'S CATARRH MEDICINE is a liquid, taken internally, and acts through the blood upon the mucous surfaces of the system, thus reducing the inflammation and restoring normal conditions.

All Druggists. Circulars free.

Begin Right Now to Conquer Your Rheumatism

If you are going to again rely upon the liniment bottle to try to rub your Rheumatism away, you will be doomed again to nothing but disappointment. A disease that can cause so much pain and suffering is not on the surface of the skin, and cannot be rubbed away.

Many forms of Rheumatism are caused by a tiny disease germ in the blood, and in such cases the only logical treatment is to search out and remove these germs from the blood.

For this purpose there is no more satisfactory remedy than S.S.S., the fine old blood remedy that has been in use for more than fifty years, and has given such general satisfaction for Rheumatism.

Begin taking S.S.S. today, and if you will write a complete history of your case, our medical director will give you expert advice, without charge. Address Chief Medical Director, 160 Swift Laboratory, Atlanta, Ga.

FREE! FREE!

We, Henry Lau & Son, will give a prize to three farmers or persons who buys the most goods from us, for cash, untill the 18th of December 1920. The highest buyer will get free $10.00 worth of Salvet or Sal-tonic or a chicken feeder. The second highest will get $5.00 worth of Salvet or Sal-tonic or Poultry tonic or Poultry Pep. The third will get $3.00 worth of Salvet or Saltonic or a Sanitary Grit Box for Poultry. The above will also be given to the three partys that bring us that most live or dressed poultry till the 18th of December,

Henry Lau & Sons

We are informed that Miss Anna Griewe will soon leave Klemme as she has a good position at the Damon Igou Store at Mason City, which is one of the largest ladies' furnishing and dry goods stores in this part of the state. As we get it, she will take the position formerly held by Hulda Johnson, as Mis Jsohnson leaves for California. Miss Griewe will be missed from the Wellemeyer store as she is a very pleasant lady and always has a smile for the customers coming to the Wellemeyer store here.

News is rather scarce this week, but thanks to some of our friends, for during our absence the past week they jotted down items for us adn it helps a lot. We wish they would do it every week for it helps to give our readers a better paper. We are rather rushed this week as we have to make up time for what we lost on last week. We promise more news, when our reportr, Mrs. Jorgenson, returns in a couple of weeks.

A baby boy is reported to have arrived at the home of Mr. and Mrs. J. J. Stille on Saturday, November 20.

The Editor of the Times returned Tuesday morning from a week's visit at Kansas City. The object of our trip to that Missouri city was to visit our wife and our baby son. Mrs. Jorgenson and the baby will remain at Kansas City at the home of her sister until about Christmas time when they will return to Klemme again. Both are real anxious to get back to Klemme again. We found the weather in Kansas City ws about the same as that experienced here the past week and the sun only shone a couple of days during our stay.

Notice—Pay up everybody. We ueed the money to pay hur bilis. Henry Lau and Son.

BASKET SOCIAL — The Klemme school will hold a Basket Social at the Idle Hour Theater Friday, Dec. 10th. Good program. Bring your baskets. Everybody invited.

Replacement.

Many Miles of Piping.

If the water and gas mains which underlie the streets of New York city were placed end to end they would form a continuous pipe line sufficiently long to reach from the Atlantic to the Pacific coast.

Fearful and Wonderful.

Helen's mother had told her that her legs and arms were like the limbs of the tree and her body like the trunk. One night Helen bumped her knee and running into the other room cried: "Oh, mamma, I hurt the limb of my suitcase."

Blessed Quality of Mercy.

"Blessed are the merciful; for they shall obtain mercy." Does not that refer to one's mental judgments as well as to one's outward acts, to the spirit with which we view our neighbors as well as to our conduct toward them?

Bell That Worked Miracles.

Many tales of the supernatural are told concerning evil spirits and the efficacy of bells in warding them off; likewise regarding the power of consecrated bells for bringing blessings. In an old chapel at Killin in Perthshire, Scotland, was a bell called that of St. Fillan, which had the reputation of curing lunacy. After the sufferer had spent a night in the chapel he was in the morning placed with great solemnity under the bell, and in many cases recorded in the old chronicles the faith was rewarded.

MS PEOPLE ARE BILKED

Declares Grain Pit Gamblers In Conspiracy

SHINGTON, Dec. 4.—Assert-mbling in grain is the chief for the slump in prices of products, Senator Capper of today declared that there is in gamblers' conspiracy to bilk ople and farmers out of hun-of millions of dollars."

his statement, Capper made the bill he will introduce in nate Monday, to break up grain ing by imposing a tax of 10 nt on all deals in grain futures, except when actual delivery is contemplated.

To Stop All Gambling

"This bill," said Capper," will stop all gambling in wheat, corn, cotton and other farm products. It will eliminate the wheat pit and blackboard. It will put out of business the thousands of wire houses and bucket shops operating in every city in the United States.

"The Chicago Board of Trade, as now conducted, is the world's greatest gambling institution. More wheat was sold in Chicago in October than was raised in the United States this year. This year's corn crop was sold 14 times in Chicago before a bushel of corn had reached the markets. Only about 1 per cent of the trading done in futures represents bona fide transactions for actual delivery.

Farmer Is "Goat"

"Because a lot of gamblers find it convenient to bet on the daily quotations, the farmer, who has been forced to sell his hogs and cattle at a loss while meat still sells at war prices, is again made the goat. The farmer ha aready lost more than a billion dollars by the bear raid on the board of trade."

The Senate and House Agricultural committees continued their joint conference today on measures for relief of farmers. Representatives of cotton growers were to be heard.—Des Moines News.

HOCUM SELLS ELEVATOR TO FARMERS

Last week we briefly mentioned the tarnsaction concerning the new Farmers Elevator. Mr. M. O. Hocum has been in the elevator business here for the past four years and has established a fine business. Last week he sold his elevator interests to the newly organized Farmers Co-Operative Grain Co., of Klemme. The deal included the elevator, office, coal buildings, machinery, etc., and the good will of the business. Mr. Hocum, however, will remain in business until about the first of May next year when the new grain company will take the helm. Mr. Hocum still has other property in Klemme, as he owns a fine residence and a number of lots on Main street, besides some lots located near the railroad tracks. He is undecided at this time as to what he intends to do when he steps from the grain business here. The Farmers Co. will conduct a general grain and coal business and we also understand will handle feed, salt and twine. As yet they have not selected a manager for the concern but they will put a good man at the head of the business when they take possession next year.

IVORY WALRUS TUSKS STOLEN FROM STATE UNIVERSITY

Robbers entered the museum at the State University at Iowa City the other night and stole a number of valuable walrus tusks from mounted animals. Ivory is high priced now and the haul will perhaps net the thieves a nice little sum of money. The tusks will be replaced with plaster of paris imitations.

THE CASH RENTER'S PREDICAMENT.

A renter was talking. This is about what he said: "I had fair crops. But I will be glad to turn every bushel of them over to my landlord and call things square. My cash rent will take all I have ahead."

It is the ebb of the tide. Somehow such periods come and go like the ocean tides. There comes a period of inflation. Renters bid againts each other. It looks to them as tho the high prices will stay long enough for a big clean up. They speculate. And then the tide ebbs and the fish that waited too long find themselves gasping in the puddles.

Years ago over in Illinois rents sprung high. Then came the ebb. Young Cantrell had the finest farm in the section. His renter paid high rates under a cash lease. The pinch came as the pinch comes suddenly. The renter stood to go broke. Young drove out to see him. They took an invoice of all the crops. "Sell them", said Young, "and give me one-half of the proceeds." Then he tore up the lease. A number of others followed his example. And they kept the cream of the renters on their farms. The future justified them.

But there is another side to it. Jones has his 160 paid for by hard work and economy and rents it for cash rent. He finds that living in town comes high. If he got $15 an acre rent it brought him $2,400. Out of that he must pay taxes on the farm and on the city property, repair and the lime and incidentals. He has no other income. What's Jones going to do? When he cuts the rent half in half where is he to find the money to meet obligations already made and falling due? In that case both landlord and tenant are up the same tree.

Yet there should, wherever possible, be an adjustment, so far as humanely possible to make it. The farm needs the thrifty and capable tenant farmer. It will pay the landlord who is able to do it to save a good tenant farmer and keep him on the farm. The best investment a land owner can make is a good renter.—Times Republican.

GREEKS VOTE FOR RETURN OF KING

ATHENS, Dec. 6—Returns from the plebescite held throughout Greece yesterday appear to indicate an overwhelming majority in favor of former King Constantine's resuming the power as king.

The plebescite was considered farcical in this city and in the country at large. Reports for the nation generally already indicate a majority of 500,000 in favor of the return of Constantine, claims are made that the entire electorate of 500,000 voted for him.

All arrangements have been made for the return of Constntine from Switzrland. It is pointed out in this city by adherents of the former king that the allies "do not understand that the people demand Constantine, and are losing time writing notes."

KLEMME MERCHANTS PREPARE FOR HOLIDAYS

We have visited all the stores in Klemme and find that each merchant has or is unpacking his holiday merchandise and we will say right here that the Klemme merchants have as fine a line of goods this year as can be found anywhere and the price is as low as anywhere else, in fact we notice that the prices are lower than can be found in the larger cities. Some of the merchants have decorated their windows in holiday fashion and it looks very much as if Santa Claus will come a little bit earlier this year. And then we also want to remind you to "Do Your Christmas Shopping Early!"

Notice to Automobile Owners.

Notice is hereby given that the Automobile Licenses for 1921 are now due. Penalty attaches January 1st, 1921.

Application cards can be procured at the banks, garages or at the County treasurer's office.

Auto license fees are the same as 1920. If you send your application by mail, remit by draft or cashier's checks. Personal checks will not be accepted unless cetified to by bank drawn on.

THOS. H. THOMPSON,
County Treasurer.

BASKET SOCIAL WELL ATTENDED

The basket social held in the A. G. Lau school last week Friday evening in Liberty township, was a success in every way. A large crowd was in attendance in spite of the bad roads. The bidding was liberal throughout. The fifteen ladies baskets sold for an average of $3.00 each, the school girls' baskets also brought a good price. After the sale of the baskets the committee sold hot coffee, cake and sandwiches and everybody enjoyed a royal good time. The program was fine and was enjoyed by all The teacher, Miss Stromer must have credit for the coaching she did for the play, "Playing Fair" which was given by the pupils that evening as it was superior to most school plays for entertainment. The money realized that evening was about $64. This will be used to build the school to a higher standard as the teacher and the school directors intend to standardize this school within another year.

LITTLE GIRL KILLED WHEN HIT BY AUTO

We clipped the following news item from the Des Moines Register and we believe the A. W. McElmurray mentioned is the young man who formerly conducted the barber shop in Klemme. It is a very unfortunate accident. The article is as follows:

WEBSTER CITY, Ia., Dec. 2nd—Blanche Richardson, 8 years old, daughter of Mr. and Mrs. Charles Richardson, who live on West Third street, was almost instantly killed when she was truck by an automobile driven by A. W. McElmurray.

NOTICE OF MEETING

The members of the Farmers Shipping Association, of Klemme, are requested to meet at the Idle Hour Theatre, on Thursday, December 16, at 1:00 P. M. By the Secretary. 1wp

WORD IS RECEIVED OF THE DEATH OF FORMER KLEMME WOMAN

Word was received in Klemme the fore part of the week of the death of Mrs. Wm. Werner. It will be remembered that the Werners lived in Klemme a couple of years ago and he held a position in the Klemme Meat Market. Later the family moved to Garner and "Billie" worked in the Larsen Market there. He was stricken with influenza during the epidemic and later died of tuberculosis. Mrs. Werner then went to Chicago later and she and the child lived with an aunt and uncle. Mrs. Werner died two weeks ago toay, the exact cause we are not certain. Some tell us she contracted tuberculosis from her husband and that caused her death, others say she died of heart trouble. Both Mr. and Mrs. Werner were fine people. They came to this country from Germany only a few years ago an have always worked hard but their case seemed one of hopeless despair and now the little family is out of existence. We understand the child has been adopted by Mrs. Werner's aunt in Chicago.

NOTICE TO ADVERTISERS

Advertisers are hereby notified that changes of copy for advertisements must be in this office not later than Tuesday noon to insure publication in current issue.

This rule must be complied with especially during the rush of the holiday season, and we trust that our advertisers will lend us this co-operation in the future.

Please bear this in mind and thus save disappointment and confusion.

BANK FAILURE AVERTED

Clarion Monitor:—The nine directors of the State Bank of Belmond came to the rescue of that institution Monday and guaranteed its depositors against loss on account of the defalcation of its cashier, John Berg, when the bank examiner reported him short in his accounts. The amount is in the neighborhood of $140,000 and was largely due to land speculations. To off set this Mr. Berg has turned over to the bank all of his property, which includes his equity in several farms. The other bankers of the county sent representatives to Belmond Monday, each with a large roll of cash, but it was not needed as matters were fixed up as above stated.

A Sure Bet.

The man who carries water on both shoulders generally gets wet.

HARVEY STILLE AND BLANCHE LILLJENBERG MARRIED AT GARNER MONDAY

Harvey Stille and Miss Blanche Lilljenberg, both of this place, quietly slipped to Garner Monday morning on the passenger and very few Klemme people, if any, suspected that they were "stealing a march." But such is evidently the case as far as we can learn for we have it from reliable authority that Harve purchased a marriage license of the county clerk Monday morning and that was all we could learn. But as they say "figger it out for yourself" and we just surmise that they were married at Garner that day by some preacher or other and left from there on a honey moon trip for a week or so. Anyway both are fine young people and are popular in Klemme. Just when or where they will go to housekeeping we do not know but will inquire of the happy Groom and his Bride when they return to Klemme. Now boys, get lined up for the smokes!

MAIL YOUR PARCELS NOW

Christmas is but a little over two weeks away now and so we want to remind you of a very important thing. As we stepped into the postoffice the other morning we noticed a placard over the stamp window which Postmaster Waterman had placed here. It read something like this if we remember right, "Mail your Christmas Parcels now and avoid the rush and chances for loss or delay. Wrap your parcels securely and have the address of the sender and the party to whom sent written plainly on the package." So we will help our good friend the post master to pass the word along. Mail your parcels now!

EAGLE ATTACKS CHILD

Members of Family Beat Bird And Save Baby

Glencoe, Wyoming—It took the combined efforts of the Spaulding family yesterday to save 8-year-old Walter Spaulding from being carried away by a giant eagle at their ranch here.

The huge bird, with a wing spread of eight feet, attacked Walter in the ranch yard. He grasped the eagle by the neck and screamed for help.

John, Walter's 7-year-old brother, came to the rescue, and a third boy ran for help. Mrs. Spaulding beat off the bird with a stick and the eagle attacked her. She was saved when Mr. Spaulding came with a shot gun and killed the bird.

THE PRAYER OF A MAN

Teach me that sixty minutes make an our, sixteen ounces one pound, and one hundred cents a dollar. Help me to live so that I can lie down at night with a clear conscience, without a gun under my pillow, and unhaunted by the faces of those to whom I

Grant that I may earn my meal ticket on the square, and that in earning it I may not stick the gaff where it does not belong.

Deafen me to a jingle of tainted money and the rustle of unholy skirts. Blind me to the faults of the other fellow, but reveal to me mine own.

Guide me so that each night when I look across the dinner table at my wife, who has been a blessing to me, I will have nothing to conceal. Keep me young enough to laugh with my children.

And when the smell of flowers and the tread of soft steps, and the crouching of wheels out in front, make the ceremony short and the epitaph simple: "Here lies a Man."—Selected.

Croquet, Too!

Jeer as the light-minded and frivolous may at the decorous and multifarious game of chess, the finger of suspicion has never been pointed at an international chess tournament and it has never been hinted that any of the players were seduced by the lures of the professional gamblers.—Springfield Union.

Venerate Sandal Wood

No wood is so largely used by Hindus in India as sandal wood. Whether living or dead, it has been connected with their religious ceremonies for over fourteen centuries.

Parents' Caprice.

It is no wonder that during infancy and early childhood life's lessons are so difficult for the small beginner when the laws which govern them must seem to him just or unjust, consistent or inconsistent, according to the knowledge or the caprice of the adult administering them.

PHOTOS SENT BY TELEPHONE WIRE

Demonstration of Teleostereograph, a French Invention, Proves Success.

EFFICIENCY SHOWN IN TESTS

Four Pictures Are Sent From New York to St. Louis, the Negatives Being Reproduced With Distinctness.

New York.—The first American demonstration of the teleostereograph, the invention of Edouard Belin of Paris, was held when four photographs were wired between this city and St. Louis. Each of the pictures went the 1,000 miles in about eight minutes, the negatives being reproduced with distinctness.

The tests were between the office of the World and the editorial rooms of the St. Louis Post Dispatch and were conducted by Mr. Belin who came to New York at the invitation of Ralph Pulitzer, proprietor of the World.

Efficiency Is Demonstrated.

"The instrument has demonstrated its efficiency and utility," Mr. Pulitzer said after the experiment, "and I am quite satisfied with the tests."

"Do you intend to introduce the teleostereograph in American journalism?" he was asked.

"Well, I am hoping to," he said, "but of course it has not quite reached the practical stage yet."

About seventy-five scientists, wire experts and newspaper men gathered to witness the trial. Mr. Belin and several assistants had the instrument all set up and special wires between the two cities were waiting.

"The transmission," declared A. C. Lescarboura, scientific writer, "is simply a matter of preparing a basrelief of the photograph, and then tracing that basrelief with a stylus connected to a telephone transmitter. The latter varies the current flowing over the wire in accordance with the relative height of any point of the basrelief record at any given moment. At the receiving end this current variation is translated into various gradations of light.

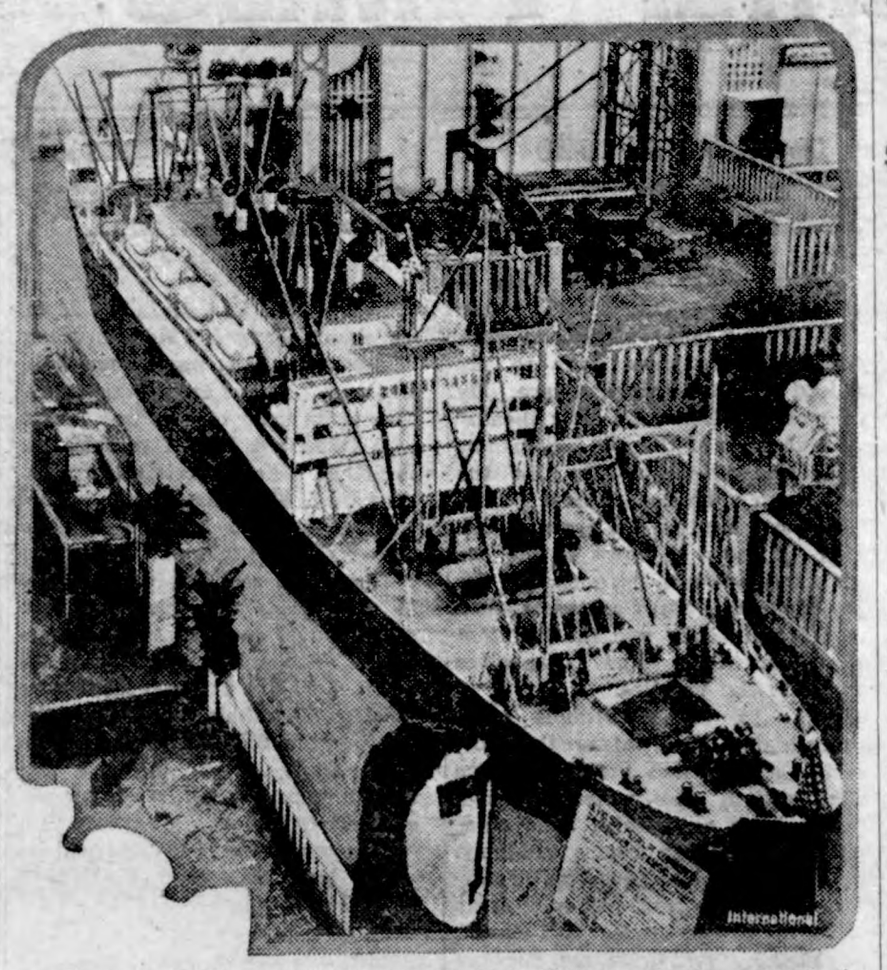
"The first step, then, is to prepare the transmitting record or plate. A copper cylinder forms the base of the record—which, incidentally, is of the size and appearance of the old fashioned phonograph records—and its surface is coated with a five per cent shellac solution.

Care of the Print.

"Meanwhile a carbon print is made in the conventional photographic manner from the photographic negative to be transmitted, after which the print is wrapped face to face with the shellacked copper cylinder. The cylinder with the print is then placed in hot water, with the result that the gelatin of the print adheres to the cylinder in accordance with its own degree of blackness, while the unexposed gelatine is washed away with the paper.

"In this manner a coating of uneven thickness is formed on the cylinder, or a photographic basrelief."

Marine Exposition in Chicago



Scene in the Marine exposition just held in Chicago. In the center is the steamship Port of Chicago, a one-tenth size model of a combined passenger and cargo ship.

EX-FIGHTERS IN CIVIL SERVICE

Sixty Thousand Have Passed Examinations for Positions Under the Government.

PUT SNAP INTO THE WORK

Amendments to the Law Establish Preference for Soldiers—Not Disqualified by War Wounds—Number Increases Steadily.

Washington.—The civil service is undergoing a change, for many former army men are "still in the service" and are injecting some of the old-time war pep into their handling of the mail, keeping records of government insurance, helping to liquidate the nation's war contracts, putting together the results of the 1920 census, opening up and irrigating and draining new government land, clerking in all the various government departments — doing anything that needs to be done around the national household. The number of ex-service men working for the government is increasing steadily, and today numbers 60,000 who have passed the examination and 40,000 who have been certified for appointment. At the present time the actual count is 15,750 ex-service folk now detailed for duty with the government, but with these new appointments the number will be doubled and trebled in the near future.

Like Old Times.

"It reminds a person of old times to wander through some government buildings and hear a head clerk shout out the never-to-be-forgotten 'snap to it,'" writes J. W. Rixey Smith. "Many a sedate and settled-for-the-ages government bureau has had its papers and its calm ruffled recently as the thousands of men who did their hitch in the army or the navy walked in under civil service to occupy desks in just about the same manner as they would take trenches. They hurl papers around as if they were throwing Mills bombs, and they chase in and out as if they were always after a German, bitterly lamented one old-timer about to be retired to make way for the new blood.

"Many amendments looking toward civil service jobs for ex-service men and women and their dependents have been added to the civil-service laws. Five such amendments and two executive orders of the President have been instrumental in opening the gates of government service as wide as possible to the ex-service man.

"One amendment establishes preference for all honorably discharged soldiers, sailors and marines, wives of disabled men and widows of service men in appointments to certain positions in the District of Columbia.

"Another amendment provides for the reinstatement of all civil service employees who went to war. Another restores to their places on the civil service eligibility list all those who lost their civil service status by reason of joining the military or naval forces.

"A fourth amendment makes it possible for a disabled ex-service man to hold a civil service position in spite of his disability upon the certification of the federal board for vocational education that he has been trained for and is capable of performing the work.

"The fifth and last amendment provides that, instead of the percentage of 70 required to be made on the regular civil service examinations, a percentage of 65 made by ex-service persons shall result not only in their passing but in their being placed on the civil service eligibility list above all others regardless of the marks made.

Civil Service Preference.

"Of the two executive orders of the President on the subject of civil service and the ex-service man, one provides for the reinstatement, within five years of an honorable discharge, of those who held positions before the war in the competitive classified service, and the other extends civil service preference regulations to all postmasterships of the first, second and third classes.

"Despite the fact that 60,000 war veterans are on the civil service eligibility list and that these changes have been made in the law in their interest, only 15,750 have so far received civil service appointments. There are two reasons for this: The first and most obvious is that there have not been 60,000 vacancies. The second is that the law requires in the making of the civil service appointments the names of the three highest eligibles shall be submitted to the department head. Where the name of an ex-service man is submitted, along with the names of two other persons who have made the highest marks of any civilians taking the examination, the department head may choose either the ex-service man or one of the other two eligibles for the position. Thus all of the congressional amendments and preference talk notwithstanding, the civil service job for the ex-service man depends in a great measure upon the department heads of the government.

"Salaries in the civil service vary greatly. The average departmental position in Washington pays anywhere from $1,200 to $3,500 a year, while many civil service positions in the work of the different departments throughout the country pay as low as $500 a year with quarters and mount as high as $5,000 a year. All salaries under $2,500 carry a yearly bonus of $240."

Take Her Word for It.

Indianapolis, Ind.—"Jim" the amnesia victim, who was identified by Mrs. James Val Morton of Cleveland as her husband, didn't even remember he had been married. When his wife called at the hospital and identified him Morton said: "If you say you are my wife, I guess you are, but I do not remember you."

Crazy Surgeon Kills Woman Under Knife

Berlin.—The remarkable case of a doctor going insane during an operation is reported from Schwerin. Councilor Surgeon Gebhard, while performing a minor operation on a woman, suddenly was seized with the hallucination he was in a clinic dissecting a cadaver. Doctor Gebhard accordingly cut up the woman, who died on the table.

On another occasion he cut off a soldier's arm and then failed to take measures to prevent the soldier from bleeding to death.

Doctor Gebhard now is in a Berlin sanatorium.

REBUILD THEIR RAZED HOME

French Family of 16 Capture Prize of 15,000 Francs Offered by Norman Davis.

Lens, France.—The Duborepere family of the little village of Meteren, near here, has been awarded the prize of 15,000 francs, given by Norman Davis of Washington through Mme. Jusserand, wife of the French ambassador, for the family which should rebuild its destroyed house in the devastated region without the assistance of carpenters, masons and other expert building workers.

The material was furnished by the David fund through the Secours d'Urgence and in three months the house was finished.

The Doborepere family consists of father, mother and 16 children, all living.

Experts say the house is worth over 50,000 francs. The material cost 15,000.

The Lure of Pickhandle Wine.

Charleston, W. Va.—Although "dry" officers are active, moonshining apparently is on the increase. In the northern part of West Virginia many raids have been made. The net result of the hauls is 31,000 gallons of mash, 631 gallons of moonshine, 500 quarts of other whisky and 3,000 gallons of pickhandle wine. All the raids were made during the month ending Oct. 15. But prison sentences don't seem to scare off the "shiners," though the federal court has been unusually severe and out of forty-five cases tried forty-three of the defendants were convicted.

Seven-Ounce Hen Pet of Pacific Coast Boy

Oregon City. — Eugene Kitzmiller, aged seven, son of Mr. and Mrs. E. P. Kitzmiller of this city, is probably the owner of the smallest hen for her age in the state of Oregon. She is of a black-breasted red game breed, weighing seven ounces. She is six months and seven days old and struts around the yard with the big Rhode Island reds as if she owned the entire poultry yard.

"Miss Jones in the House?"

Lexington, Ky.—Because a girl was not "paged" when her mother was reported dying, all theaters, including the movies, must page people when the request is made.

PLAN U. S. LOAN TO AID FARMERS

Senator Hitchcock to Offer $60,000,000 Relief Measure Next Week.

GOV. HARDING FAVORS SCHEME

Money He Would Advance Is the Government's Share in Profits of the Federal Reserve Banks, Payable Next Month.

Washington, Dec. 4.—Immediate loans of $60,000,000 from government funds to aid farmers in the face of falling prices of their products is proposed by Senator Hitchcock (Dem.) Nebraska, in a bill drawn after a conference with Governor Harding of the federal reserve board.

Senator Hitchcock plans to present the measure when congress meets next week.

The money which Senator Hitchcock would have advanced to the farmers is the government's share in profits of the Federel Reserve banks, payable next month, and which under the law would be used to increase gold reserves or amortize Liberty bonds.

Loans would be made through the federal land banks on chattel mortgages or warehouse receipts with agricultural products or live stock as security. Loans on grain would be limited to six months and those on live stock to one year.

"This would be only a drop in the bucket toward meeting the enormous needs of agriculturists," said Senator Hitchcock, "but it would have a good effect beyond the actual amount of money made available."

Senator Hitchcock indicated that Governor Harding was favorably inclined toward the plan in view of the fact that the profits from the reserve banks would not be large enough to take up any substantial amount of Liberty bonds as compared with the amount outstanding.

Opposition to the revival of the War Finance corporation or any other of the governmental war emergency measures looking to the underwriting of prices and private business was expressed by Senator Edge of New Jersey, member of the senate committee on reconstruction.

The New Jersey senator declared he would support no measure for relief of the farmers which did not afford relief "for the other 90 per cent of the population."

MOSCOW THREATENS JAPAN

Soviet Government May Form Military Alliance With China Against the Japanese.

Berlin, Dec. 6.—The soviet government at Moscow threatens to make a military alliance with China against Japan unless the latter ceases its imperialistic policy at the expense of Siberia, according to advice from Moscow.

The last issue of the official soviet paper declares that the Japanese policy in the Far East is becoming more and more threatening day by day.

The paper closes with the statement that the soviet republic in the Far East and China, whose joint interests are endangered by Japanese imperialism, will be forced to take refuge in a military alliance to counter the Japanese plans on the Asiatic continent.

PLAN A YEAR'S MORATORIUM

Georgia Governor Considers Calling Extra Session of Legislature to Enact Stay Law.

Atlanta, Ga., Dec. 4.—Governor Dorsey has under advisement a request from Commissioner of Agriculture Brown for an extra session of the legislature for the purpose of enacting a stay law, or moratorium, to run for a period of 12 months. The commissioner expressed the belief that it would be necessary for similar laws to be enacted by all the cotton states to get the full benefit of such an expedient.

FRICK ESTATE TAX $2,000,000

Sum of $37,000,000 in Contest in Allegheny County Over Millionaire's Wealth.

Harrisburg, Pa., Dec. 3.—The Henry C. Frick estate, through the register of wills of Allegheny county, sent to the state treasury $2,000,000 inheritance tax in partial payment. The sum of $37,000,000 is in contest and the payment made was subject to disposition of the case.

Lumber Prices Cut Again.

Milwaukee, Dec. 4.—Lumber prices took another tumble when Milwaukee dealers announced a cut ranging from 7 to 11 per cent. The total reduction from the top price now reaches 25 per cent.

Britain Signs Trade Pact.

London, Dec. 4.—Leonid Krassin, Bolshevik minister of trade and commerce, already has been handed the British trade agreement, which has been signed, says a wireless message from Moscow.

ARTHUR GRIFFITH

Arthur Griffith, founder of the Sinn Fein and vice president of the "Irish republic," who was arrested by the British authorities.

SACK KILLARNEY SHOPS

Uniformed Men Smash Windows in Irish City.

Persons to the Number of 673 Have Been Killed or Injured Up to November 27.

London, Dec. 4.—Uniformed men visited Killarney, Ireland, and smashed nearly all the windows in the business section of the city. Damage estimated at several thousand pounds was done with small hammers and stones, says a Cork dispatch to the Evening News.

Glasgow, Dec. 4.—The police arrested six persons of Irish nationality here, three of them women, on charges of treasonable conspiracy. It is stated that gelignite, gunpowder, guncotton, detonators, hand grenades, revolvers and cartridges, as well as Sinn Fein literature, were found in their houses.

London, Dec. 4.—The government suffered a defeat in the house of lords when an amendment to the Irish home rule bill submitted by Baron Oranmore and Browne, providing for the establishment of a senate for southern Ireland, was carried against the government by a vote of 120 to 36. It was explained that the object of the amendment was to safeguard the minority southern unionists. Lord Shannon moved an amendment providing for a joint session of the southern and northern senates as a substitute for the Irish council. This amendment was adopted, 48 to 34. An amendment bestowing a second chamber on the Ulster parliament also was adopted. Persons to the number of 673 have been killed or wounded in Ireland to November 27 of the present year by anti-government elements, according to a statement issued by the home office.

Operatives of Scotland Yard who are dealing with the Sinn Fein organization in London, continued active searching of residences and business houses in various parts of the city.

The police are maintaining the greatest secrecy with regard to their operations.

HARDING TO TALK IN SENATE

President-Elect Considers It His Duty to Speak Out on Weighty Matters.

Aboard the Steamship Pastores, Via Charleston, S. C., Dec. 4.—President-elect Harding will speak in the United States senate on Monday, an unprecedented innovation in American legislative history. He feels it his duty, it was learned, as a senator to attend the opening of the congressional session.

The President-elect, it is declared, feels this action on his part is made necessary by his campaign declarations in which he said he would take congress into conference on weighty matters and thinks this is a good time to give recognition to that new status.

INDICT 2 IN BUILDING-TRUST

New York Grand Jury Takes First Action on Charges of Graft in That City.

New York, Dec. 4.—Two indictments returned by the extraordinary grand jury in connection with investigation of the "building trust" were directed against John A. Philbrick, a dealer in masons' supplies, and Joseph Penny, secretary of the Builders' Supply bureau.

Another Irish Ambush.

London, Dec. 6.—Six policemen were ambushed at Youghal, Ireland. One was wounded and one is missing. At Random the bodies of three volunteers, who were shot near that town, were discovered lying near the road.

Rob Ohio Bank of $177,000.

Columbus, O., Dec. 6.—Five armed auto bandits, in a daylight robbery, secured $5,000 in cash, $3,000 in Liberty bonds and non-negotiable notes valued at about $169,000 at the First National bank of Grove City.

VOTE AUSTRIA INTO LEAGU

Commission on New States Unanimous in Action on Admitting Republic.

WOOD TO HEAD ARMENIA AR

Notification of Wilson's Plan to Mediate in Armenia Is Received by Assembly—Council Drafts Note Accepting His Proposal.

Geneva, Dec. 3.—Austria was unanimously voted a member of the League of Nations by the commission for admission of new states here. It is expected the assembly of the league will ratify this action.

A letter to President Wilson, accepting his offer to act as mediator in Armenia, was drafted by the council of the league here. Mr. Wilson's note, which was received here, was read to members of the council, and was received with marks of liveliest satisfaction.

"Poor old Europe will feel less abandoned," was a remark made by a member of the French delegation when discussing President Wilson's action. The news gave the assembly great relief.

The Armenian commission of the League of Nations assembly reported that it had reached a decision regarding the Armenian situation. The commission announced that it had decided to send an army of volunteers, headed by Gen. Leonard Wood, U. S. A., to assist in the arbitration by the United States between the Armenian republic and Mustapha Kemal."

The council of the league unanimously approved the invitation drawn up by the military commission calling on the United States to name a representative to sit on the commission.

Germany's protest against acceptance by the league of what the Berlin government deemed falsified returns from the plebiscites held in the Eupen and Malmedy districts along the Belgian frontier, has been rejected by the council. In its reply to the German government the council says it finds no reason to modify its decision not to accept the result of the plebiscite.

Washington, Dec. 2.—President Wilson has accepted the invitation of the League of Nations to act as mediator in the Armenian situation.

The President's acceptance is conditioned upon the use of moral influence. He explains that he is without authority to employ force without the consent of congress.

Geneva, Dec. 6.—Presentation and adoption of a resolution eliminating article ten from the covenant of the League of Nations before the end of the present session of the assembly would occasion no surprise here, it was declared in some quarters.

Assertions were made that Thursday's decision of the committee on the admission of new states, which has been in effect, that the article does not guarantee the territorial integrity of any member of the league, represented the view of a majority of the delegates at the present meeting.

This interpretation and the postponement of the consideration of certain changes in the covenant were the principal topics of conversation here.

GREET WIDOW OF MACSWINE

Thousands of Irish Sympathizers Welcome Widow of Late Mayor of Cork.

New York, Dec. 4.—The steamship Celtic, bearing Mrs. Muriel MacSwiney, widow, and Miss Mary MacSwiney, sister of the late Terence MacSwiney, lord mayor of Cork, who died in a hunger strike in Brixton prison, London, arrived here.

Mrs. MacSwiney comes to testify before the committee of one hundred now inquiring at Washington into conditions in Ireland.

Thousands of Irish sympathizers greeted them at the pier, and several squads of police reserves were called out to insure order.

ROB C. M. & ST. P. MAIL TRAI

Men Board No. 6 at Minneapolis and Escape With 100 Pieces of Registered Articles.

Minneapolis, Minn., Dec. 4.—Three young masked bandits held up and robbed the mail car on the Chicago, Milwaukee and St. Paul train No. 6, Mobridge, S. D., to Minneapolis, and after binding and gagging three mail clerks, escaped with a pouch of registered mail and other packages, estimated to contain currency and papers worth between $50,000 and $75,000. This train was bound for Chicago.

Sinn Fein Countess Guilty.

Dublin, Dec. 6.—Countess Markiewicz, M. P., prominent Sinn Feiner, was found guilty by court-martial of conspiring to spread sedition and cause murder in Ireland. Sentence will be imposed later.

Cox Made Life Member.

New York, Dec. 6.—Governor Cox of Ohio, defeated Democratic nominee for President, accepted a life membership in the National Democratic club. "I feel highly complimented," said Governor Cox.

Angered at their remarks, ...eturns to the girl, determined ...arry her, if she will have him. ...r his explanation she agrees to ...y him. The wedding takes ... and the couple set out for ...by's ranch. With them is ... Macklin, whom Shelby has ...d as a helper. On the way the ... tells her husband her name is ... Carlyn, and also tells him ...thing of the peculiar circum...ces of her life.

CHAPTER VI—Continued.

—5—

... made herself say these words ..., looking him frankly in the ...yet as he went outside, closing ...or behind him, seemingly quite ...ed with her readiness to abide ...uation, she bowed her head on ...rty table, and her body shook ...sobs which could no longer be ...ined. So this was what she had ...to—this! She had kept herself ... day with dreams; and this was ...ealization. She lifted her face ...ooked about, the tears still mist... ... her eyes; then she suddenly ...ed, and stood up with cheeks ...g, and lips firmly set. It was ...rible mess, to be sure, yet the ...itself was not so bad; she had ...in far worse; and once put in ... degree of order and cleanliness ...ght prove fairly comfortable in... She surveyed the scene, as re... ...d by the yellow flame of the ... her heart beating faster. This ...o be her home. She had come ...as mistress. It mattered not so ... what it was now, but what she ...d make of it. Her slender form ...htened with new determination. ...e was yet another door, and she ...ed out through it into a small ...o, the lamp held high over her ... This was evidently the kitchen, ...ining, as it did, a small cook ..., a sort of roughly built closet, ...sink, the latter stacked with un...ed dishes. An armful of split ... lay on the floor, and a half slab ...con hung to a nail.

...n gave vent to another laugh, ...his time there was no hint of hys... ... in it. She had found herself. ...sed still in the long duster, she ...down the lamp on a small table, ...dropping upon her knees, swiftly ...ed a fire in the stove. As the ... began to crackle cheerfully, she ...ched the closet for materials, re...ng to discover some dishes yet ...ed, together with remnants of ... sufficient for her purpose. There ... sugar, condensed milk, a few ...ly potatoes, a small sack of flour, ... half can of coffee. She dumped ...e out on the table, and began hum...g a tune, as she added the slab of ...n to these treasures. She was too ... by now to give another thought ...e dirt and disorder about her.

...elby was kept outside considera... ...longer than he had anticipated. ... buckskin, in spite of a sixty-mile ...ney, retained viciousness enough ...ick the lantern out of the Kid's ... and smash it into smithereens, ... compelling the two to work in ...ness. Macklin, unacquainted with ... surroundings, was of little use, ...most of the work had to be done ...Shelby in person. When it was all ... with both men were sweating ...usely, tired and angry, the Kid ...ing everything from the creation ...the world. Shelby, suddenly re...bering the girl left alone in the ...e all this time, lost the last grip ...is temper.

...Shut up!" he barked savagely. ...e had just enough of that. What ... you expect anyway—a reception ...mittee an' a banquet? Come on ...now; we'll hustle up some grub. ...e, you might as well tote a few of ...e things along with you."

...oth men loaded up with packages ...n the buckboard, the Kid still ...aring under his breath, but Shelby ...ly silent. He was remembering ...t that interior looked like, and ...dering how she was taking such a ...e-coming. He could not but con...t the dirt and disorder to which ...had brought her with the immacu... ...cleanliness of the shack where ... lived in Ponca. The memory ...de him half afraid to go in and ...e her eyes. He lifted the latch ...itatingly, the bundles on the other ... piled to his chin, and stepped ...oss the threshold. Then he stopped ...denly, with his mouth wide open, ... Kid pushing in behind him, even ...re heavily laden. She stood in the ...ddle of the floor, with cheeks ...shed, and eyes smiling.

..."You boys can pile that stuff on the ...le," she announced brightly. "I've ...ped those papers up in one corner, so there's plenty of room. Never mind about bringing the rest in now; supper's ready."

Shelby put his bundles down without a word, his eyes quick to perceive the chairs cleared of their debris, the floor swept, the ashes back in the stove. He could hardly comprehend the miracle.

She led the way gayly, leaving her broom in a corner, and carrying the lamp. The lean-to kitchen had been transfigured, and actually presented a homelike appearance. The dirty dishes were shoved out of sight, the floor swept, the fire in the stove blazed cheerfully, and the table was covered with the essentials of a truly appetizing meal. She set the lamp down in the center, fully rewarded by the expression on the faces of the two.

"You boys wash up there in the sink," she commanded; "use that piece of sacking for a towel; it was all I could find. Then we'll get busy."

If Shelby was to live a thousand years he would never lose memory of that meal. The grateful warmth of the stove, the neatness of the table, the good fellowship with which she served, all coupled with the wonderful surprise, left upon him an impression never afterward to be blotted out. She talked about what she was going to do; about what he had purchased in town; about anything which came into her mind that she could manufacture conversation from. He told of their adventures outside, and made her laugh heartily over the struggle of getting the Kid's pony safely into the corral. The Kid himself said little, eating heartily but in silence, only occasionally lifting his eyes from the plate. This pretense at modesty did not seem like the Kid, and Shelby found himself observing the fellow with some wonderment. His looks were not at all prepossessing, now that he saw him more plainly revealed in the lamplight, and he was some years older than he had supposed. The fellow had a hard, dissipated face, and his lips were thin, with a distinctly cruel twist to them. Shelby had intended putting the man in that bunk in the front room, but now decided the stable was good enough for his use.

As soon as they were through he hunted up a second lantern.

"Take the rest of that stuff off the buckboard, Macklin," he said shortly, "and stow it away in the cellar-cave just to the right of the house. I'll be out presently, an' we'll fix things up for the night."

As the fellow disappeared Shelby's eyes encountered those of his wife across the table.

"And what are you going to do?" she asked directly.

"Why, help you with these things, and then clean the shack up a bit; it is in worse shape than I realized."

She shook her head positively.

"Oh, no, mister man. This is my house, and I am going to take care of it—all alone. I have seen your style of housekeeping, and I prefer my own. You go on, and finish the work outside; when you come back it will look better in here."

Shelby went out. Macklin was seemingly busy at the task assigned him, the lantern hung to the broken branch of a convenient tree, lighting his path. Without even speaking, the ranchman passed by down the steep path leading toward the stream below. He was some time in completing his task, and, when he finally emerged once more from the stable, the only gleam of light he could perceive above came through the log chinks of the cabin. He wondered what had become of Macklin, yet gave the matter no special thought as he toiled slowly up the path, his mind more deeply interested in the reception awaiting him within.

He passed close enough to the buckboard to assure himself that his orders had been executed, and, believing the fellow had probably re-entered the house for some purpose, passed on directly to the front door. No one was in the main room, nor in the chamber behind. They remained exactly as he had left them. The silence startled him, and he advanced swiftly toward the kitchen, where the light still burned, visible through the open door. It also was deserted, the dirty dishes yet setting on the table untouched. Good God! what was the meaning of this? What had occurred? The outer door stood ajar, and he sprang anxiously forward, peering insprang anxiously forward, peering into the blackness. There was no sound, no movement; the blaze of light had blinded him, and he stepped outside so as to see better. He had taken but one step beyond the protection of the partially open door, when something struck him, and he went staggering down, as though his skull was crushed by the savage blow.

* * * * * * *

It was gray dawn when Shelby stirred once more, and, with eyes only partially open, stared in bewilderment at the pale arch of sky. Slowly memory came back, and he managed to lift one hand to his head, his numb fingers touching a ghastly scalp wound, the clotted blood matting his hair. He had been struck a desperate blow, and was doubtless left lying there in the belief that he was dead, yet apparently the skull was not crushed, and the night air had congealed the blood. With a supreme effort he drew himself into a sitting posture, and stared rather blankly about at the objects revealed in the gray dawn.

The sight as instantly restored his memory; the cabin door stood wide open, just as he left it, and within the lamp still burned on the table, in the midst of the dirtied dishes. She had not returned, then; he had been lying there alone all night. The realization maddened him to effort, and, by grasping at the door for support he attained his feet, and stood there for a moment, swaying dizzily. Exactly what had occurred he could not determine; the whole affair seemed more like a dream than a reality. He had left her there apparently cheerful and happy, the laughter in her eyes a memory to linger with him; he had not been absent to exceed thirty minutes, and not so far away but what any cry would surely have reached his ears. Yet when he returned she had vanished utterly, leaving everything untouched. Whatever occurred must have been brought to pass almost immediately upon his departure, before she even began the work of cleaning up. But how could such a thing happen without any alarm? Why, the Kid was working within ten feet of the house, and must have heard the slightest sound of a struggle. The Kid! where was he anyway? What had become of the fellow all this time? He was nowhere in sight when Shelby retraced his steps up the path. Could it be that the Kid was the one guilty of this deed? If so, what was his object? Not robbery, surely, for the place had not been ransacked, or anything removed from his pockets. Yet surely this was not Indian work; it bore no resemblance to a savage raid. The questions were unanswerable; no mental effort gave him any clue, yet his strength was rapidly coming back, and with it a grim, determined anger, which urged him into action.

First he went through the deserted house, room by room, seeking for the slightest sign of guidance, but finding none. Everything remained precisely as he remembered seeing it the night before. He blew out the light, took down one of the rifles from the wall, loaded it, and then, feeling his old strength returning, cautiously stepped out through the front door. The buckboard stood there, gaunt and stripped, except for the box between the rear wheels. He peered into this, and found it still half filled with bundles.

He Went Staggering Down.

Macklin had not completed his job, other evidence being furnished by the extinguished and overturned lantern on the ground just beyond. But there was no sign visible of any struggle.

Surely she had not left of her own choice. That was unthinkable. She had appeared cheerful and contented, even actually interested in the new life; besides, if she possessed the slightest desire to escape, he had offered her every opportunity on the way out, and she had refused. Surely she would never have come way out there to make her disagreeable journey over again at night. Even if crazy enough for such an attempt, the effort would never be made upon foot, and all three ponies were in the corral; he had seen them while coming down. No, that theory might be dismissed at once, and secretly he was glad it was so easily disposed of—it had vaguely haunted him at first, causing him to dread the discovery that it might be true.

Then what was true? Who could be guilty of such an outrage? Indians? White outlaws? Joe Macklin? These three possibilities alone remained, but the first two seemed quite impossible. He was used to Indian foray, but this act bore no resemblance to the work of savages on the warpath. There had been no attempt to plunder, or destroy. The very fact that the ponies remained undisturbed convinced him that this was no deed of Indian raiders. That it might have been white outlaws was not quite so easily dismissed. There were desperate men hiding out yonder in the Bad Lands, but he never had known of their venturing to attack any settler, except occasionally to run off cattle on the range. In this case there was no apparent object—they had taken nothing, neither food nor stock. Then it must have been Macklin.

His sudden disappearance was, at least, proof he must have had a hand in it. But why? To what end? Shelby straightened up, a new flash of intelligence in his eyes. Perhaps this all harked back to that early mystery in her life. She had told him that Calkins had taken her from place to place, apparently always afraid that he was being followed. Was it possible that he had been hunted down at last; that he recognized the approach of the end, and had committed suicide on that account? And was this strange seizure of Olga part of the plot, either of revenge, or restitution? This explanation seemed more probable than any other; in a way it appeared to fit the case, although he possessed no more knowledge of what it all meant than he did before. Only, evidently all that had been desired was possession of the girl, and that was deemed of sufficient importance to even justify murder. He had been left for dead, in order that she might be borne away alive.

No longer doubting but what this theory at least approximated the truth, Shelby faced the facts frankly, and with no further hesitation. It was up to him to act promptly; there was no one to whom he could turn for help. His eyes darkened, and his jaws set. All right then, he would certainly give the Kid a run for his money. There must be some trail left; such a deed as this could never be accomplished without leaving some mark behind. Whether they traveled on foot, or horseback, the party must surely leave some trace of passage, and Shelby, who had been the best trailer in his regiment, felt confident of being able to run the outfit down.

With this once settled in his mind, and his plan of pursuit outlined, Shelby threw off his depression, and became cool and resolute. First he searched over every foot of ground within a quarter of a mile of the house, seeking to discover just how Macklin had operated, and, whether or not, he was alone. The result was only partially successful. The hard-packed earth revealed little of value. Down below the cabin on the sloping side of the hill, he found the mark of a high-heeled boot such as the Kid wore, and, a foot or so beyond, the plain impression of a moccasin. A hundred yards to the north the imprints were again visible, making it clear to his mind that the fugitives were then making for the lower ford. The girl was evidently being carried, and two men must have been engaged on the job, one of them possibly an Indian. He passed straight on to the ford to verify this theory, and here the mud exhibited clearly the movements of both the fellows, while close at the water's edge he came upon a narrow pink ribbon, which the girl had evidently hurriedly dropped in guidance.

It was clearly manifest now the direction in which they had disappeared, but Shelby remained unsatisfied. He could not believe that they would attempt to escape thus on foot with their burden. If Macklin had one assistant, it was highly probable there would be others also engaged in the affair. The opposite shore was deserted, and he crossed over, wading to his thighs in the swift water, with rifle flung forward, and eyes intently searching the further bank. The trail was plain at this point; he could easily trace the steps of both men passing up a narrow gully into the first line of bluffs, and there, in a little open glade, he found where horses had been tethered and tramped the turf. They had evidently been held for some time; had entered from the north down a slight coulee, and departed westward along a shelving bank. There were five animals, all mounted, to judge from the deep impress of hoofs, and he followed their passage as far as the crest of the bluff. They were well beyond view, of course by this time, across that rough, broken country, but he satisfied himself that they were heading straight for the Bad Lands.

Shelby knew now something of what he must contend with. The act of abduction, and attempted murder, was no sudden temptation assailing Macklin, but undoubtedly part of a well-organized plot. Whatever their object, five men were concerned in the outrage, their intention probably the making of the girl a prisoner. In Shelby's judgment she was probably in no immediate danger. If the fellows had intended taking her life, she would never have thus been spared and carried away, apparently uninjured. Their purpose evidently required that she be kept alive, but helpless in their hands.

He was cool now; grimly determined, but intent on preparing himself for a long and dangerous quest. He was to be one man pitted against five, and every instinct of long experience on the plains, warned him against being rash. He recrossed the stream, built a fire in the stove, and, after washing the blood from his head, ate heartily; then packed a leather haversack with food, and was ready. He took this time in which to plan out his course, and then went forward unhesitatingly, filling his pockets with rifle cartridges, and flinging the haversack over his shoulder, before starting for the corral. He decided upon the buckskin as being the better animal for his purpose—a vicious brute, harder to handle, but tireless, and able to exist where either of the others would starve. It required a good half-hour to rope and saddle the beast, but he had plenty of time. Once on the trail he could easily outride the party he was following, and he had no desire to approach them closely until well after dark.

Once firm in the saddle, however, rifle under the flap, with haversack strapped on the opposite side, and blanket-roll behind, he gave the plunging, bucking demon between his legs

He Followed Their Passage.

little mercy. The man was in no mood for play of any sort, and set himself to conquering the brute in the quickest possible way. It was a rough, hard struggle, but the human won, and, under the merciless sting of the quirt, the maddened but subdued animal, nostrils distended, and eyes vicious as ever, yielded final obedience to the rein.

CHAPTER VII.

An Hour Behind.

There was no marked trail, but the instincts of a plainsman kept Shelby's course directly to the northwest. The bronco, now thoroughly tamed, and obedient to the slightest pressure of the rider's leg, kept a tireless gait, picking out unaided the easiest paths. From the general direction of the trail left by the raiders he had decided they were heading for a certain portion of the Bad Lands, and, if this theory was correct, he ought easily to cut across their tracks again late in the afternoon. Sitting upright in the deep saddle, with the straight back of the cavalryman, his eyes watchful, his lips grimly set, he rode steadily on hour after hour, thinking, planning, beginning now to realize the depth of his own interest in this effort at rescue. He had hardly comprehended before that this girl was really his wife—that her life had become his to guard. The affair between them had occurred so swiftly, so unexpectedly, he had not before awakened to its true meaning. But now it became very real, and he was positively surprised to learn the strength of hold she already had upon him.

His mind would linger over a thousand little womanly peculiarities which somehow had unconsciously impressed him—the soft glow in her eyes, the wistfulness of her smile; the slight dimple in her chin; the pulsing of blood in her cheeks; the round firmness of the white neck; the peculiar gracefulness of her walk; the nameless attractiveness of poise, all came back now in odd fascination. He was not aware before that he had even noticed these things, but now their memory dominated him, caused his pulses to quicken. He had known little of women since boyhood, and never before had he encountered on terms of intimacy this type of a woman. She had been a revelation to him even in his blindness, but now, under the spell of memory, she had suddenly changed to an inspiration. His wife, Olga Carlyn, his wife! He said the words over, as though he recalled a dream, the sound of the words causing the startled buckskin to cast back an evil eye at his unconscious rider.

"What's the idea of stealin' the girl?"

(TO BE CONTINUED.)

Before asking a favor of a man a wise woman gives him a good dinner—with a little flattery on the side.

} Directors

F. A. Arnold was a business caller at Garner yesterday.

Mr. Jas. Busick, of Goodell, was a Klemme visitor Tuesday.

Mrs. John Josten was a Garner visitor Tuesday.

Mr. Lowenberg, of Goodell, was a Klemme caller Monday.

Alex Ross of Garner, was a Klemme visitor several days last week.

Mr. L. G. Avery of Goodell was a Klemme visitor Saturday.

Mrs. James Christie, of Goodell, was a caller here Wednesday.

M. O. Hocum went to Mason City last Friday on business.

Ed. Jacobs spent Sunday with his folks at Garner.

R. A. Jorgenson ws at Garner Saturday morning on business between trains.

C. C. Tessier, the electrician from Garner, was in Klemme Saturday, transacting business.

Mrs. A. H. Meyer went to Algona last week Thursday for an over Sunday visit with friends.

C. W. Wiles and Walt Schultz drove over to Mason City Tuesday afternoon on business.

Miss Elizabeth Schank of Belmond was a Klemme visitor last Wednesday between trains.

Miss Lydia Bock left last Wednesday for LaCrosse, Wis., to attend the funeral of an uncle.

Miss Laura Brooks, of Belmond, visited her sister here, Mrs. Mille Smith, last Thurday.

Frank Miller and sisters, Charlotte and Bertha, were Garner callers last Thursday afternoon.

E. P. Hubbard and Mrs. Will Heginger, of Goodell, were shopping in Klemme last Saturday.

Mr. and Mrs. Rob Wilson of Cornelia, Iowa, were visiting at the J. P. Larsen home Monday.

Miss Marion Luick, of Belmond, was calling on Klemme friends Monday of this week.

Mr. and Mrs. Henry Church came over from Garner Saturday for a visit with friends between trains.

Mr. Ellsworth of Goodell, was transacting business in Klemme on Tuesday.

Bert Mathews went to Garner Monday morning to have some dental work done.

Geo. Gruetzmacher has been confined to the house for several days suffering with a severe cold.

Chas. Schoenwetter came over from Garner Tuesday for a short visit with Klemme friends.

Al Koerner, our telephone manager, was a business caller at Garner between trains last Saturday morning.

Ed. Jacobs went to Mason City Tuesday afternoon on business. Ed. drove over in his "jitney" and found the roads were not half bad—after he got to the paving.

Miss Sylvia Moberly left Monday noon for Iowa Falls, Iowa, where she will attend school this year at the Ellsworth College.

Peter Merkel returned last Saturday from a few days trip to Paton, Iowa. We believe the Merkels lived near that town before they moved to Klemme.

Mrs. Oscar Rice and child returned to their home at Clarion Thursday, after a week's visit at the home of her parents, Mr. and Mrs. Fred Musfelt.

Mr. and Mrs. Martin Elder, of Eagle Bend, Minn., came Saturday evening for a few days visit at the home of their son, Ralph Elder, and family.

Chas. Steihl and Art Kuck went to Mason City last week Thursday and remained until Saturday. They went over on business but also found time to take in a couple of good shows.

Tuesday was the first day for about two weeks that the sun came out and shone all day. Say, that was sure a grand and glorious feeling. The sun was out last week Wednesday for a couple of hours but soon went back of the clouds again.

A Three-in-One Service

Money collecled in smail amounts is best cared for in a savings account; money for daily routine business is more conviently handled through a checking account.

But funds for investment at a safe rate, always availablo, transferable without loss of interest or awaiting reinvestment should be deposited in one of our 5 per cent Certificates of Deposit.

WHY SOUND POP CORN WON'T POP

Apparently Good Kernels Burst All Right at Times and at Others Fail.

ARE TWO MAIN REQUISITES

Ears Should Be Stored in Cool, Well-Ventilated Place and Not Permitted to Dry Out Too Quickly—Keep Mice Away.

It is a matter of common experience that pop corn varies greatly with respect to popping. A lot of pop corn may pop all right at one time and not at all at some other time. Again, a lot of apparently good pop corn may not pop satisfactorily at any time.

The two main requisites for good popping are: (1) Good pop corn that has a moisture content of about 12 per cent; (2) heat sufficient to cause the kernels to begin to pop in about 1½ minutes.

A number of causes may interfere with the popping of pop corn. The principal ones are: (1) Having the pop corn too dry; (2) having the heat too great, or not great enough; (3) harvesting popcorn before it had ripened; and (4) allowing popcorn to mix with field corn or sweet corn.

Should Ripen on Stalk.

Popcorn should ripen fully on the stalk and should not be harvested until the husks are white and the stalk is dead and has lost its sappy condition. The ears should then be stored in a cool, well-ventilated place. Small wire crates are good receptacles in which to store them. If stored in a warm room in the house, the ears will soon dry out so much that they will not pop. Popcorn that has become too dry for popping may be restored to condition again by putting it in a cool and well-ventilated place, preferably outdoors, for a few weeks. It should, however, be protected against mice.

Popcorn will of its own accord take on or retain the right amount of moisture under natural or suitable atmospheric conditions, as on a shaded porch on the north side of a building.

Picking Some "Good Ones" for Popping.

Exposing the ears to the hot sun for a while will cause them to dry out too much for good popping. They will also dry out too much in a kitchen or other warm room. If popcorn that has become too dry is wanted for immediate use it may be improved somewhat by sprinkling it with water before trying to pop it. Sometimes popcorn that is too dry for popping in a wire popper over a flame will pop all right in oil or grease in a pan.

Time for Curing.

It is not necessary to allow new popcorn to cure for a half year before using it. If it ripens fully and completely on the stalk, the ears can be used at once for popping. In the North it should always be planted early so it will have the full season in which to grow and mature. If planted so late in the spring that the fall frosts kill the stalks before the popcorn has ripened, then there is no way of converting it into a first-class article.

MEAT ANIMALS ARE CHEAPER

Farmers Have Been Selling at Prices 14 Per Cent Lower Than the Preceding Year.

Meat animals have been selling by farmers for a whole year ending with September, 1920, at prices that were lower than they were in the preceding year by 14 per cent. The fall in prices, compared with the former years, began in September, 1919. These statements are based on prices ascertained by the bureau of crop estimates, United States Department of Agriculture.

Prices of these animals were gradually increasing to the calendar year 1914, but they fell 8 per cent in 1915, followed by a gain of 17 per cent in 1916, of 49 per cent in 1917, when the peak was reached, of 17 per cent in 1918, and of less than 1 per cent in 1919. Now, for the last 4 months of 1919 and for 1920 to September, there has been a recession of price movement with a drop of 14 per cent.

SKUNK ONE OF BEST FRIENDS OF FARMER

Destroys Various Kinds of Insects and Furnishes Fur.

Not Advisable to Establish Friendly Relations With Little Animal—Keep Poultry in Animal-Proof House.

Few persons have seriously considered establishing friendly relations with the skunk. It has been done in some cases under the misapprehension that the animal was a cat, and the results have been unpleasant. But the biological survey of the United States Department of Agriculture has investigated the skunk and found him to be the best wild-animal friend the farmer has.

Almost any farmer might have two

A Year's Catch of Skunks in New York State Is Estimated to Be Worth $1,000,000.

or three dozen skunks at work for him destroying mice, grasshoppers, crickets and white grubs, and furnishing him from $50 to $100 worth of fur a year. All that is necessary is that he respect their dens, keep his poultry in skunk-proof yards, kill an old horse for them every fall, and be tactful when he meets them in the evening. There is a marked depression of the fur market at present, but recovery to normal is anticipated.

It has been estimated that a year's catch of skunks in New York state is worth $1,000,000. Only one-fifth of them are black or short-striped. If all were of this higher grade, they would be worth $3,000,000. The department suggests that a preserve stocked with black skunks would eventually double or treble the catch of skunks in the territory surrounding it.

LEADING STOCK BREEDS

Duroc Jerseys comprise 34.2 per cent of all the swine in the United States. The Shorthorn breed comprises 22.6 per cent of all cattle. Holsteins lead among dairy cattle. Merinos lead the sheep breeds, with 25.4 per cent of all sheep. Among swine, Poland Chinas are second, Chester White third, Berkshire fourth. Herefords take second place among cattle and Holsteins third. Shropshire sheep take second place and Rambouillet third.

INCREASED PRICES FOR EGGS

Greatest Advance in Records of Bureau of Crop Estimates Was in January.

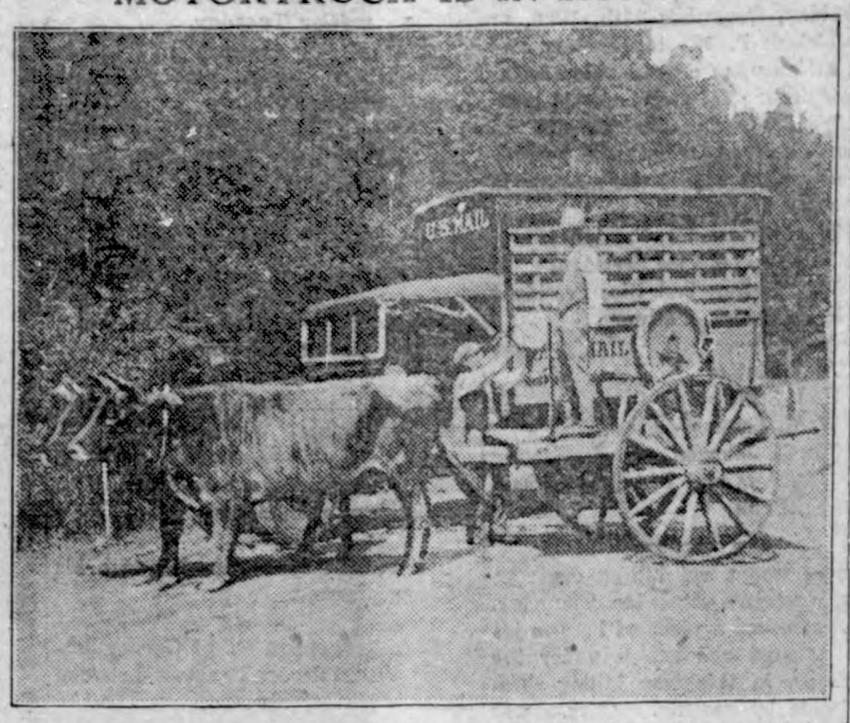
Egg prices received by farmers began to rise in 1916 by 2.4 cents per dozen over 1915, in the average for the year, but the greatest advance in one year since 1915 was in 1917, when it was 9.7 cents per dozen above 1916. The advance of 1918 was 4.2 cents and of 1919 a fraction of a cent more, or 4.5 cents. The highest monthly price reached in the records of the bureau of crop estimates beginning with 1910 was for January, 1920, when it was 64.8 cents per dozen, to which it had risen from 30.5 cents for January, 1910.

HOW PRICES ARE ADVANCING

Mink-Lined Overcoat Returned $845 Clear Profit to Owner in Space of Five Years.

One case reported to the United States Department of Agriculture indicates how fur prices are advancing, with increased demand and decreasing supply. A man bought a mink-lined overcoat for $500 in 1915. Two years later he sold the mink lining for $1,000 and replaced it with nutria for $150. He wore it two years and sold the nutria lining for $250, putting in a muskrat lining that cost $55. In 1919 he sold this lining for $300, and still has the shell and $845 clear profit.

GREATEST ADVANTAGE IN OWNING MOTORTRUCK IS IN SAVING TIME



A Connecticut Farmer Drives With His Produce One Mile and Is Glad to Turn It Over to the Mail Truck—He Says a Motortruck Is Much Swifter Than His Ox Cart, but He Is Pretty Well Satisfied With His Team.

Summarizing the experience of 831 corn-belt farmers who own motortrucks, the United States Department of Agriculture found that in the opinion of nine-tenths of these men, the greatest advantage in owning a motortruck is "saving time;" in the opinions of three-fourths of them the greatest disadvantage is "poor roads," and 91 per cent believe that their trucks will turn out to be a profitable investment.

The reports, however, indicate that on most of these farms the truck has not reduced expense to any great extent, and that it supplements rather than replaces work-stock and other equipment.

On the average these trucks travel 2,777 miles per year, and the cost of operation is between 16½ cents and 17 cents per mile, making a total annual cost from $460 to $470. Each truck displaces an average of 1.2 head of work-stock. With the cost of keeping a horse a year in the corn belt around $200, the reduction in expense for this item is in the neighborhood of $240 per farm. For all farms the average amount of hired help saved by the trucks is $163. On most farms these are the only two items of direct reduction in expense which can be credited to the truck, and on the average they amount to $60 or $70 less than the total cost of operating it.

To offset this added cost, custom hauling done with the trucks amounts to about $50 per year for all farms, leaving only something like $10 or $20 annual net expense which must be more than balanced by the saving of time of the owner and members of the family, the ability to get crops and live stock to market in better condition or at better time, and other benefits which are not directly measurable in dollars and cents, if the average truck is to be a profitable investment.

It must be remembered that most of these farms where trucks are owned are larger than the average, and are located at a considerable distance from market.

The investigation was made during winter and spring of 1920. Farmer truck owners in Indiana, Illinois, Missouri, Iowa, southern Wisconsin, southern Minnesota, southeastern South Dakota, eastern Nebraska and eastern Kansas, who raise corn as one of their principal crops, and who practice the general grain and live stock farming characteristic of the corn belt reported to the department the use they make of their trucks, the cost of operating them, the advantages and disadvantages of trucks for farm use, and other related information.

Study of Reports.

A study of the reports of 831 of these farmers has just been completed by the division of rural engineering of the bureau of public roads and the office of farm management and farm economics.

Some of the important facts revealed by the investigation are:

The average size of the farms is 346 acres and their average distance from market is eight miles.

Only 14 per cent of them are less than five miles from market, and 20 per cent are 15 miles or more from market.

A little over one-fourth of these men have changed their markets, for at least a part of their produce, since purchasing trucks. For those who have changed market, the average distance to the old market was seven miles and to the new market is 18 miles.

The rated capacity of these trucks varies from one-half to two tons. Seventy per cent of them are rated at one ton, and only 9 per cent of them at less than one ton.

Experience with trucks has caused 57 per cent of these men to decide that the one-ton size is best suited for their conditions, 25 per cent that the 1½-ton size is best, and 12 per cent that the two-ton size is best. Practically one man in four has decided that a truck larger than the one he now owns would be better suited to his conditions.

Ninety-one per cent believe that their trucks will prove to be a profitable investment.

In the opinions of these men the principal advantage of a motortruck is in saving time, and the principal disadvantage is "poor roads."

As compared with horses and wagons, the trucks save about two-thirds of the time required for hauling to and from these farms.

On the average there are over eight weeks during the year when the roads are in such condition on account of mud, snow, etc., that these trucks cannot be used. The roads on which nearly 95 per cent of them usually travel are all or part dirt.

The condition of the roads prevented the use of trucks with pneumatic tires a little less than seven weeks during the year covered by the reports, and of those with solid tires a little over nine weeks.

Twenty-four per cent of the trucks are equipped with pneumatic tires, 27 per cent with solid tires, and 49 per cent with pneumatics in front and solids in rear. However, experience has convinced 58 per cent that pneumatics are best for their conditions, 35 per cent that solids are best and 7 per cent that pneumatics in front and solids in rear are best.

These men have return loads for their trucks about one-third of the time.

Still Use Horses.

A majority of these men still use their horses for some hauling on the road.

On more than half of the farms all the hauling in the fields and around the buildings is still done with horses and wagons.

About 40 per cent of these men did some custom hauling with their trucks during the year covered by the reports. The average amount received by those who did such work was $132.

Their owners estimate that on the average these trucks travel 2,777 miles and are used on 112 days per year.

The average estimated life of these trucks is 6½ years, and on this basis depreciation is usually the largest single item of expense in connection with their operation.

The average cost of operation, including depreciation, interest on investment, repairs, registration and license fees, fuel, oil and tires, is 15.2 cents per mile for the one-half and three-quarter-ton trucks, 15.2 for the one-ton, 21.3 cents for the 1¼ and 1½-ton, and 25.8 cents for the two-ton.

The average cost of hauling crops, including the value of the driver's time at 50 cents per hour, is 24 cents per ton mile with the one-half and three-quarter-ton trucks, 24.1 with the one-ton, 23.3 cents with the 1-¼ and 1½-ton, and 21.5 cents with the two-ton trucks.

Nearly 85 per cent of these trucks had not been out of commission when needed for a single day during the year covered by the reports, and 80 per cent of the owners stated that they had not lost any appreciable time on account of motor and tire trouble, breakage, etc., when using their trucks. About one truck in fifteen was out of commission more than five days, however, and one owner in 40 reported a loss of more than 5 per cent of the time when using his truck.

Also Own Tractors.

Half of these men own tractors as well as motor trucks. Most of the tractors are used on the larger farms, however. Only 33 per cent of the men whose farms contain 160 crop acres or less own tractors, while 65 per cent of those with over 320 crop acres own them. The number of work-stock kept on the farms where both trucks and tractors are owned is only slightly less than the number kept on the farms of corresponding size where only trucks are owned.

Seventy-eight per cent of these farmers state that their trucks reduce the expense for hired help. On those farms where there is a reduction the operators estimate that it amounts to $209 per year on the average.

GENERAL FARM NOTES

Keep carrots and root crops in a cool cellar and squash in a warm dry place.

* * *

For deep, rich soil, deep plowing, say from six to nine inches, is best in the fall of the year.

* * *

A few farmers have tried posting their land with signs saying that the hunter or fisherman is welcome, if he will be careful to cause no damage, directly or indirectly.

POULTRY

FENCES USED FOR CHICKENS

Cost of Equipment, Labor and Maintenance Is Increased Where Yards Are Divided.

Fences dividing the land used for poultry into yards increase the cost of equipment, labor and maintenance. There should be as few fences as possible, as land can be cultivated and kept sweet more easily if not fenced. The value, too, of fresh, sweet land for poultry can hardly be overestimated. A grass sward can be maintained on good soil by allowing 200 to 250 square feet of land per bird (217 or 174 birds to the acre), while more space is necessary on poor or light land. A larger number of fowls are usually kept to the acre where double yards are used, and the land is frequently cultivated.

Plymouth Rocks and the heavy meat birds in small yards require fences five to six feet high, while a fence six to seven feet high is necessary for Leghorns, say poultry specialists of the United States Department of Agriculture. The upper two feet of the fence for the latter may be inclined inward at an angle of 30 degrees, or a strand or two of barbed wire may be used on top of the regular wire to help keep them confined, while it is sometimes necessary to clip the flight feathers of one wing of those birds that persist in getting out. It is not advisable to use a board or strip along the top of the fence, as hens will often fly over one so constructed.

Posts may be set or driven into the ground. They should be set eight to ten feet apart for common poultry netting, or 16 to 20 feet for woven wire. Corner posts should be about eight inches in diameter and be set four feet in the ground, while intervening posts may be four or five inches in diameter and set three feet in the ground. Most

Difficult to Keep Yards Clean Where Fences Are Used.

lighter posts driven into the ground may be used for temporary fences. That part of the post set in the ground may be charred or treated with some wood preservative to advantage, while corner posts should be firmly braced or set in cement.

NO CURE FOR FOWL CHOLERA

Afflicted Birds Should Be Killed by Dislocating Necks and Carcasses Burned.

Poultry experts at Iowa State college are warning poultry keepers against fowl cholera which is a very contagious disease of hens often proving fatal without any previous indications of trouble. Indications include a slow movement of the animal, a tendency to crouch and ruffle the feathers, and yellow or bright green stools. Examination of the dead bird shows a congestion of the blood vessels in the liver, kidneys and intestines.

It is useless to treat sick birds. All that show symptoms should be killed by dislocating their necks. Burn the body with oil and bury at least three feet deep all dead birds and all excreta. Place one 7.3 grain bichloride of mercury tablet in a gallon of drinking water in a nonmetal container or use a 30-gallon sodium sulphocarbolate tablet in every gallon of drinking water.

FROST COLLECTED ON WALLS

It Shows That There Is Not Sufficient Ventilation to Carry Off Moisture.

If frost collects on the walls of the henhouse, it shows that the walls are too thin or that there is not sufficient ventilation to carry off the moisture from the birds' breath, or that there are so many birds in the house that reasonable ventilation will not take care of this moisture.

PREFER TO REMAIN OUTDOORS

There Is Nothing to Worry About if Turkeys, Geese and Ducks Prefer Open Air.

Don't worry if turkeys, ducks and geese prefer to stay outdoors until snow comes, for they are often healthier if allowed to live in the open as nature intended they should. The greatest danger is from thieves and prowling animals.

50 Years Ago

a young man who practiced medicine in a rural district became famous and was called in consultation in many towns and cities because of his success in the treatment of disease. This was Dr. Pierce who afterward moved to Buffalo, N. Y. He made up his mind to place some of his medicines before the public, and he put up what he called his "Favorite Prescription," and placed it with druggists in every state in the Union.

For *fifty years* Dr. Pierce's Favorite Prescription has sold more largely throughout the United States than any other medicine of like character. It's the testimony of thousands of women that it has benefited or entirely eradicated such distressing ailments as women are prone to. It is now sold by druggists in tablets form as well as liquid.

AURORA, NEBR.—"My mother was always a great believer in Dr. Pierce's medicines and when I was a girl she gave me 'Favorite Prescription' when I was in a run-down, nervous condition and soon built me up in health and strength. 'Favorite Prescription' is a splendid tonic for girls or women who suffer." MRS. WALTER GUARD, 608 Tenth-St.

WANTED ONLY MINOR CHANGE

Youth Had No Desire to Interfere With the Existing Chronological System, Only—

Ten p. m. There was a lot to do at the office, and, despite the lateness of the hour, the staff still at work.

The head of the firm looked sternly at the young man over his gold-rimmed glasses. Then:

"So you've a complaint to make, have you?" he asked fiercely.

"Not exactly a complaint, sir," said the other, "but there's just one little matter about which I should like to speak to you."

"I gave you more money the other day," growled the chief. "What's it you want this time? Shorter hours—eh?"

"Oh, no—no sir! I do not feel it incumbent on me, I assure you, in any way to tamper with our present quite excellent chronological system. For my part, I am perfectly content that the hours should retain their present length. All I wish is—er—fewer of them as applied to my daily period of work."—Houston Post.

A Shock.

"They had beefsteak for breakfast."

"The idea. I don't know how anybody can eat beefsteak at breakfast time."

"I can understand that, but fancy being able to afford steak for breakfast."

LIVE STOCK

RAISE, KILL AND CURE PORK

Most Profitable Course for Farmer to Pursue—Any Surplus Can Readily Be Sold.

There's a profit in selling pigs and buying pork—but not for the farmer who follows this practice. The farmer's most profitable course is to kill, cure and can enough pork for his own use and sell any additional amounts which he can produce and for which there is a demand. The practice of home curing pork has suffered through neglect, but it is now being revived, according to the bureau of animal industry and the states relations service. These two bureaus of the United States Department of Agriculture are co-operating to encourage the general adoption of this wholesome usage among farmers. Home-cured pork, scrapple, pork pudding, sausage, canned pork, headcheese and lard are among the foods which the farmer should get from his own cellar shelves and not from the city market. All transportation costs and commissions remain in his pockets.

Hogs in Alfalfa, a Good Home-Grown Protein Feed.

A bulletin, "Killing Hogs and Curing Pork," now being revised by the Department of Agriculture, will soon be ready for issue. New methods and improvements have been given space in this discussion, and details of the processes for canning fresh pork have been added. Canning preserves pork with fresh pork flavors and lessens the toil and time incident to some of the older ways of curing the product. Besides being rapid and simple, the new process saves pounds of pork for all periods of the year which formerly had to be eaten soon after slaughter or be wasted.

SUCCULENT FEED FOR STOCK

Silage Is Best and Cheapest Way, Say Specialists of Bureau of Animal Industry.

Silage is the best and cheapest form in which to store succulent feed, say specialists of the bureau of animal industry of the United States Department of Agriculture. Many forage crops can be made into silage, but corn, where it can be grown successfully, makes the best silage.

Good silage depends upon cutting the crop at the right stage, fine cutting, even distribution, thorough packing, and plenty of moisture in the cut material. When rightly put up and carefully fed, there should be little if any loss through spoiling.

Silage is well suited for feeding to all live stock. Dairy cows need it perhaps more than other classes of animals, because the succulence which it supplies is very necessary for large milk production. It is a cheap and economical feed for beef cattle, from breeding cow to fattening steer. Sheep like it, and it is well suited to their needs. Even horses and mules may be fed limited quantities of good silage with good results.

SCARCITY OF HEAVY HORSES

Farmers Advised to Breed Every Good Draft Mare to Best Stallion Within Reach.

A year ago most farmers thought the day of the draft horse had passed, but they have to think differently now. They see that they are not going to be able to produce these good big horses in time to take advantage of the beginning of extremely high prices. Under the circumstances, the best thing to do now is to breed every good draft mare to the best stallion within reach, even though he is a considerable distance away.

IMMUNIZING SUCKLING PIGS

Sixty to Seventy Per Cent of Serum Cost Can Be Conserved by Treating at This Age.

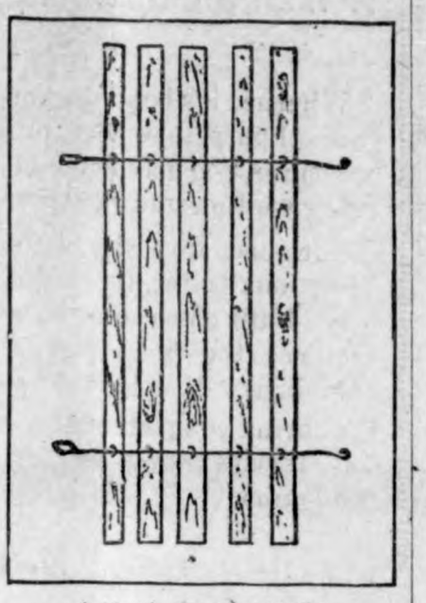
Tests made at Ames, Ia., by government veterinarians indicate that permanent immunity against hog cholera may be secured by treating sucking pigs. Sixty to seventy per cent of the serum cost can be saved by treating at this age. Further tests are necessary before this practice can be safely advised.

ORCHARD NEWS

HANDY PROTECTOR FOR TREES

Laths Fastened to Galvanized Wires Keep Away Rabbits and Prevent Sun Scald.

A handy protector to keep rabbits away from young trees may be made by fastening four or five laths to two galvanized wires by the use of small staples, says a writer in Michigan Farmer. One end of the wire is bent in the form of a hook while the other



A Handy Tree Protector.

is made in a loop. These "hooks and eyes" allow the protector to be put on and taken off with ease. Besides protecting the trees from the rabbits, the laths also protect them from sun scald.

WHERE SURPLUS FRUIT GOES

American Apples Shipped to 80 Different Countries—Demand for Oranges and Lemons.

Despite the greater consumption of fruits in the United States during the past 10 years, there has been a material increase in American fruit exports, while imports have decreased.

According to figures compiled by the bureau of markets, United States Department of Agriculture, the average yearly exports of dried and fresh fruits for the pre-war period 1910-1914 were approximately 504,911,000 pounds. With two low years the average for the period 1915-1919 was 518,259,000 pounds, an increase of 2.6 per cent. The 1910-1914 imports averaged 252,708,000, as compared with 109,321,000 pounds for 1915-1919, showing an annual decrease of 57 per cent since 1914.

The fresh fruit export trade of the United States is chiefly in apples, lemons, and oranges; and of dried fruits, apples, apricots, peaches, prunes, and raisins. The imports of fresh fruits are of bananas, grapes, lemons, and oranges; and of dried fruits, currants, dates, figs, olives and raisins.

American apples are sent to 80 different countries, reaching all parts of the globe. There is a constantly increasing demand for American lemons and oranges, Canada and the United Kingdom being the largest purchasers. The decline in imports of grapes is accounted for by the rapid development of the grape industry in America. The same reason is given with regard to lemons. In pre-war days as much as 150,000,000 pounds of lemons were imported annually from Italy, but the imports have declined greatly with the increase in American production. Several million pounds of oranges used to be imported from Jamaica, Mexico, and Italy, but very few are now brought into this country.

IMPORTANCE OF PLANT FOOD

Something Else Besides Pruning and Spraying Needed for Maximum Crop of Apples.

We are finding out that it takes something more than a pruned and sprayed tree to produce a maximum crop of apples, and that if a continuous crop of apples is expected, there must be ample plant food to produce a thrifty growth every year.

Manure or clover or sweet clover plowed under naturally keeps the soil full of humus and in fit condition to hold moisture, and besides supplies considerable amounts of desirable plant food. But orchardists have found that some quickly available fertilizer applied in the spring just before the trees bloom will make a heavy wood foliage growth, thus insuring larger and better flavored fruit.

DYNAMITING FOR TREE HOLES

Blasting Regarded as Desirable Only in Soils Underlaid With Impervious Hardpan.

Some orchard growers use dynamite to blast out the holes for trees. This is regarded as especially desirable only in soils underlaid with an impervious hardpan or those in which their compactness makes digging slow and difficult. The dynamite should be used only when the ground is dry. When the soil is filled with water the explosion of the dynamite forms a jug-shaped cavity about the size of a barrel in which the soil is very loose. When the tree is planted the settling of the loose soil allows the trees to drop considerably deeper than they should be set.

ASPIRIN

Name "Bayer" on Genuine

BAYER

Beware! Unless you see the name "Bayer" on package or on tablets you are not getting genuine Aspirin prescribed by physicians for twenty-one years and proved safe by millions. Take Aspirin only as told in the Bayer package for Colds, Headache, Neuralgia, Rheumatism, Earache, Toothache, Lumbago, and for Pain. Handy tin boxes of twelve Bayer Tablets of Aspirin cost few cents. Druggists also sell larger packages. Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid. —Adv.

Self-control will succeed with one talent where self-indulgence will fail with ten.

If You Need a Medicine You Should Have the Best

Have you ever stopped to reason why it is that so many products that are extensively advertised, all at once drop out of sight and are soon forgotten? The reason is plain—the article did not fulfill the promises of the manufacturer. This applies more particularly to a medicine. A medicinal preparation that has real curative value almost sells itself, as like an endless chain system the remedy is recommended by those who have been benefited, to those who are in need of it.

A prominent druggist says "Take for example Dr. Kilmer's Swamp-Root, a preparation I have sold for many years and never hesitate to recommend, for in almost every case it shows excellent results, as many of my customers testify. No other kidney remedy has so large a sale."

According to sworn statements and verified testimony of thousands who have used the preparation, the success of Dr. Kilmer's Swamp-Root is due to the fact, so many people claim, that it fulfills almost every wish in overcoming kidney, liver and bladder ailments; corrects urinary troubles and neutralizes the uric acid which causes rheumatism.

You may receive a sample bottle of Swamp-Root by Parcels Post. Address Dr. Kilmer & Co., Binghamton, N. Y., and enclose ten cents; also mention this paper. Large and medium size bottles for sale at all drug stores.—Adv.

THE KLEMME TIMES

Twenty-fifth Year Number 15 | Klemme, Iowa, Thursday, December 16, 1920 | $2.00 In Advance. $2.50 Outside of County

LEMME SCHOOL BASKET SOCIAL A SUCCESS

Last Friday evening the Klemme chool gave a program and basket soial at the Idle Hour Theatre which as a grand success from every tand point. The program given by he children was excellent and the ouse was packed. An admission of wenty-five cents was charged for the rogram and about 180 paid admisions were counted up. All children f school age and ladies with baskets ere admitted free. The total realzed from the sale of the baskets and he admission, after expenses had een deducted, amounted to $141.52. his sum will be used to buy a gradd course ofm usic books for the lemme school. Ben Reemstma aucioneered the sale and got some very ood prices for the baskets.

TO ALL COUNTY TREASURERS:

Some of the County Treasurers in he State do not understand why here is a difference in the rate book n cars of different years, published n the new rate book.

For your information: The manufacturers last year gave the department incorrect weights and list prices n their models for different years, as they did not understand that the Iowa law bases our fee on the selling of the car on June first of that year. About two weeks after our fee book for 1920 was delivered to the County Treasurers, garages and banks, the manufacturers began writing to this department advising that in many instances the wrong list price and weights had been forwarded to this Department and asked for corrections of same. This was impossible as all the book were out over the state, so when this information was asked for for this year, they furnished this department the correct list prices and weights (when available) and models and the price the car sold for on June first of each year up to and including 1920.

The new 1921 rate book is an exact duplication of the rate book for 1920, except that it has included the year 1920 and also corrections in regard ot clerical errors by this department and also clerical errors by the manufacturers when they submitted their list prices, weights and models.

You will use the rate in the new rate book for the registration for the year 1921, regardless of what rate you collected for the year 1920.

The rate book for 1921 does not contain the rate on 1921 models. You will register all 1921 models upon the weight and list price furnished you by the owner or the dealer that is selling this particular car.

As soon as possible we will secure these weights and list prices on all 1921 models and forward to you a mem ographed copy, the same as we did l st year. These rates will be accepted by this department for the registration of all 1921 cars for this year. Our rate book is always one year behind on new cars coming out.

Yours very truly,
F. J. Murphy, Supt.
Motor Vehicle Department

1wc

Will Kirkwood came from Milaca, Minnesota, last Thursday, being called here by the illness of his father, A. Kirkwood. "Bill" likes Minnesota very well and thinks it is a great country. He is located about sixty miles northwest of tht Twin Cities and is farming. Their chief crops there are potatoes and small grain. Potatoes run from 200 to 400 bushels per acre and oats goes from 75 to 125 bushels per acre. A small amount of corn is raised and 50 bushels to the acre is considered a big crop. He says the potato crop was not as good this year as formerly but that they only had about 200 bushels to the acre. Up there they never burn any coal as they are in the timber country and everybody burns wood all year around as they do not have far to go afttr it.

Miss Belken, high school teacher, has handed in her resignation to the school board, so we understand, to take effect Friay of this week. This completes her semester's work here. We have not learned who will be selected to fill the vacancy.

Miss Belken, our High School teacher, enjoyed a visit from her parents and little brother of Iowa Falls who came last Friday and remained until Saturday when Miss Belken accompanied them home for an over Sunday visit.

Optimistic Thought.

CHRISTMAS MERCHANDISE

This week's Klemme Times will serve the purpose of a good Christmas shoppers guide for you will find in the advertisements of the Klemme merchants this week a complete list of very desirable gifts. Just look over the ads of the various merchants in the Times this week and then make out your list of what you will buy for Christmas presents. Then go to the merchants and select the gifts you have on your list and do your shopping early so you will have the best goods to pick from. The Christmas goods offered by the Klemme merchants are low priced compared to the same articles on sale in other nearby towns. You will do well to trade with Klemme merchants and save money. They have the finest holiday goods this year that has ever been in Klemme and the prices are very reasonable in any of the Klemme stores. Do your Christmas Shopping now and avoid the rush during the last days before Christmas.

Mrs. John Graham, of Searsborough, came Monday for a visit with her sister, Mrs. Howard Spitler. Mr. Graham will come Friday and he and his wife will remain visiting with the Spitlers until after the holidays.

Fred Henschen and Philip Bock drove to Garner Monday morning and returned in the afternoon. They said they had business at the Court House and that puts us to wondering if they made the Clerk's office a visit while there.

Announcing a cure for piles in any form (hemorrhoids) by a method that is painless, harmless and sure. Y0u go about your work as usual the next day no hospital bill to pay, no suffering for days and days. Dr. R. W. Shultz, Masonic Bldg, Garner Ia·

GOOD PICTURES SHOWN AT THE IDLE HOUR

Manager Pavey of the Idle Hour Theatre is running some excellent pictures at the local movie house. Paramount pictures are now being hown every Saturday evening and he pictures are drawing a good crowd. Last Saturday night he showed a very good western picture taken from historical facts of the days of '49 when people were rushing to California for gold. The picture was full of interest from start to finish and was wel worth seeing. The series of Paramount pictures being run at the Idle Hour are the very best obtainable.

The young people around town should remember that our night watch is supposed to look into everything that happens on our streets after the lights go out. If you must do your loving at that time of night outdoors, make it snappy, otherwise the night-watch may interrupt you and he as well as you may be placed in a very embarrassing position.—Renwick Times.

Learning From Tumbles.

It does not matter how many tumbles you have in this life, so long as you do not get dirty when you tumble. There is the greatest practical benefit in making a few failures in life. You learn that which is of inestimable importance—that there are a great many people in the world who are just as clever as you are . . . and you very soon find out if you have not found it out before, that patience and tenacity of purpose are worth more than twice their weight in cleverness. —Huxley.

Simple Filter to Clean Oil.

As a means of separating dirt, metal dust, etc., from used oil, the filter which may be made in the following manner will be found very efficient: Fasten a piece of muslin or cotton cloth to a metal or wooden ring large enough to fit over the top of a can, drum or other vessel. The cloth should be left a little slack and into the shallow bag so formed a quantity of sawdust is placed. The oil to be filtered is poured through and leaves its foreign matter behind in the sawdust.

SEWER MEN LAY UP FOR WINTER

The bad streak of weather Monday put a blink on the digging of sewer trenches so the men laid off Tuesday and housed their machinery for the winter. They have made good progress the past two weeks, especially last week. They have finished the sewer as far north as the north corner of the school grounds and will begin work again in the spring from that point. They have in nearly a mile of sewer at this time. The men will spend the winter at their various homes, some at Chicago and Evanston, Ill., and some at What Cheer, Iowa. They will appear early in the spring and get the machines in shape to proceed with thew ork.

FIRST REAL SNOW THIS YEAR

The first real snow storm of the season occurred Monday about noon. The weather man had been grouchy for several days and finally cut loose with some real snow. The snow fell until towards evening when it subsided. About two inches on the level fell, or ptrhaps a little more during the day. The ground is pretty well covered and it looks as if we well have snow for Christmas this year.

Addition of extra windows, particularly near the floor will allow more light to enter the houses in the early evenings of the winter to keep the chickens from going to roost.

This addition according to H. A. Bittenbeoder, will increase the length of the day for the chickens and have a good result on egg production.

Many poultrymen have instrled electrical apparatus in the poultry houses so that lights can be turned on in the early morning to get the poultry to scratching and feeding earlier. The lights can also be kept on in the afternoon with better production results. The difference in the number of eggs produced will more than pay the additional costs of increased light.—Ringsted Dispatch.

World Has Little Influence.

In the course of time the world gets tired of hearing one man or one woman telling it what it should do about this and that.—Toledo Blade.

Seeking a Variation.

"Did you know people are talking about the way you misquoted the piece of poetry you introduced in your speech?"

"I did it on purpose," replied Senator Sorghum. "I thought it would be desirable to do something, however slight, to shift the argument."

Easy Come—Easy Go.

She—Lucius, I cannot be betrothed to you any longer.

He (with a superior manner)—Well, there are others.

She—Yes, I know. I've just become engaged to one of the others.

May Get the Rope.

City Chap—Well done, old chap. You sow and I reap the fruits.

Farmer—Maybe you will. I am sowing hemp.

A Little Late.

Boy in Library—"I want the life of Caesar." Librarian—"Sorry, but Brutus got ahead of you."

Woman Water Carrier.

The "fellaha," the woman water carrier, for centuries an institution in the Holy land, is threatened with extinction because of the use of water carts, growing popular through the demands of sanitary measures.

The picturesque water carrier, gliding along the streets in her colorful costume, with a vase of water balanced on her head, may soon become a memory.

New Antiseptic Discovered.

At Bellevue hospital, New York, they are using a new antiseptic, discovered by F. A. Mardon, a graduate nurse, who has been working on it for 25 years. It is called chlorsal and is similar to several other antiseptics, but has the great advantage over them of not being affected by exposure to the air.

Greatest Timber States.

The forests of western Oregon and Washington contain the largest reservoirs of virgin timber left in the United States, and a very large proportion of the lumber used by the country comes from this region, says the American Forestry Magazine (Washington, D. C.). Washington has since 1905 held foremost place among the states in quantity of lumber produced; Oregon now ranks third in production, but first in volume of standing timber, and it will not be long before the increasing annual cut will place her at the head, or next the head, of timber-producing states.

DOGS ONCE CALLED VERMIN

Only In Comparatively Recent Years Have They Received Recognition Under English Laws.

Our laws regarding dog bites, which Judge Cluer declares to be full of anomalies, are all of modern date, says Tit-Bits.

There seems to be no reference to dogs in any law passed before the accession of Queen Victoria. In a case heard by Mr. Justice Elliot in 1555 it was ruled that dogs were vermin, and for that reason the church would not degrade itself by taking tithes of them. Nor was a dog the subject of larceny at common law, the ruling being that "a man shall not have for a dog."

Parliament first began to notice dogs in 1838, by passing a statute increasing "the resources of civilization" against the lawless doings of Irish curs.

Ten years later, dog fighting, bull baiting and bear baiting were prohibited by parliament. Between 1839 and 1882 no fewer than eight statutes were passed regulating the condition and social status of the dog, one of which placed him in a position of a taxpayer. In addition to these statutes applied throughout the United Kingdom—a special act was framed to curb the sheep-worrying propensities of dogs in Scotland.

WOULD SELL AT THAT PRICE

Broker Declined to Wait for Any Further Advance in Quotations on Prepared Foods.

A prominent curb broker wishing to make his lunch period as brief as possible, forsook his accustomed restaurant, a very exclusive place for a "trust system" buffet.

Glancing up at the price board, he noted "Pot Roast Beef with Corn Muffins, 30 cents," which he ordered. As he "self-served" himself to a vacant place at one of the tables, he again turned his gaze to the board, when he noticed an attendant was now using some sleight-of-hand work.

With much astonishment he saw the 30, denoting the price of beef with C. M. commodity, changed to a 35. When sufficiently recovered from the shock of plate of victuals in hand, he approached the food trader, and indignantly inquired as to the cause of the sudden change in price.

"Why, I bought this hardly three minutes ago," he protested, "when it was quoted 30."

The lunch room profiteer smartly answered, "I know, but the asked price is now 35."

"Well," shot back the broker, "I suppose there's every indication of further rise, but I guess I'll get out. You can sell this for me at that and keep your commission out of proceeds."—Wall Street Journal.

Landed Freak Fish.

A wearied marine monster blundered into the net of a San Diego, Cal., fisherman not long ago. On being hauled into the fishing smack by the astonished captain, it was found to measure a little more than 15 feet long, and in general configuration to resemble a shark, reports Popular Mechanics Magazine. Its upper jaw was surmounted, however, by a clumsy-looking horn of solid bone. A month after its discovery in a fertilizer plant, a prominent scientist notified the fishing captain that he had caught a female of the species basking shark, of which only six are known to have been taken during the history of the world's fishing industry.

Real Beer for Bavaria.

The Bavarian breweries are to resume the production of beer with an alcoholic content of eight per cent, according to a statement made on August 5 by the Bavarian minister of agriculture, following his return from a meeting in Berlin, where the general food situation of the nation had been discussed and certain plans for the future agreed on between the national and state authorities. He also said that the daily bread ration was to be raised from 200 grams to 700 grams per capita and that the state control of the egg market was to be dropped in October.

Fleet to Hunt Sponges.

The enormous rise in prices of sponges has induced Italian ship owners to construct many new craft for sponge-gathering, the fleet setting forth from Sfax, the sponge market, numbers some 60 vessels this year, in contrast to 30 in previous campaigns, writes United States Consul Cookingham of Tunis. The sponges gathered during the summer campaign now in progress will, it is expected, bring at least 50 francs per kilo to the Sfax market.

Policewomen Walk Like Men.

London policewomen work in couples and have adopted the regulation policeman's stride—long, slow-measured. As their work is moral suasion, they carry no weapon, but as a means of self defense they have learned jiu-jitsu tricks.

WARNING

Unless you see the name "Bayer" on tablets, you are not getting genuine Aspirin prescribed by physicians for 21 years, and proved safe by millions.—Say "Bayer"!

say BAYER Aspirin

SAFETY FIRST! Accept only an "unbroken package" of genuine "Bayer Tablets of Aspirin," which contains proper directions for Headache, Earache, Toothache, Neuralgia, Colds, Rheumatism, Neuritis, Lumbago, and pain generally. Strictly American!

Handy tin boxes of 12 tablets cost but a few cents—Larger packages.

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

How Airmen Use Oxygen.

When the airman ascends to heights greater than 20,000 feet, he is sure to use oxygen. He carries it in liquid form in a vacuum tank provided with a mechanism to control the evaporation.

The liquid may be electrically heated to accelerate evaporation; or a heated rod of copper or aluminum in the liquid may be used; or the liquid may be siphoned out into an evaporating chamber from which the gas is conducted through tubes to the airman's mouth. — Popular Science Monthly.

BALL PLAYED BY PRISONERS

...rn Penitentiaries Have Teams ... Put Up Good Exhibitions ... the National Game.

...nd penitentiaries have ...imposed of inmates, ...ort has done much ...alth and spirits of ... baseball teams are ... and play a regular schedule ..., but of necessity these games ...ays played on the prison home ...ds.

One of the best known prison teams is that of Sing Sing. It is known as the Mutual Welfare league team, and last season it won more than 95 per cent of games played with visiting nines. The prison baseball field has a splendidly graded surface, and there are bleachers for spectators. The team plays Saturday and Sunday afternoons. Visiting teams come from New Jersey and Connecticut. The prison team has won from some of the best semi-professional nines in these states. The Eastern penitentiary in Philadelphia has long maintained a baseball team, and has developed many good players.

A Good Memory.

"Has he a good memory?"

"I'll say so. He can even remember his wife's birthday."

Flivver-Jitney Nuptials.

"The wedding was a flivver."

"You mean that it was a tin one?"—Buffalo Express.

Where It Happened.

"He loved her, but never made it known, and remained a bachelor because she was very rich and he was poor."

"Where did that happen? In this town?"

"No; in a book."

SWAMP-ROOT FOR KIDNEY AILMENTS

There is only one medicine that really stands out pre-eminent as a medicine for curable ailments of the kidneys, liver and bladder.

Dr. Kilmer's Swamp-Root stands the highest for the reason that it has proven to be just the remedy needed in thousands upon thousands of distressing cases. Swamp-Root makes friends quickly because its mild and immediate effect is soon realized in most cases. It is a gentle, healing vegetable compound.

Start treatment at once. Sold at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

ANSWERS CALL OF FRIEND

Deer's Remarkable Attachment to Man Who Had Cared for It in Its Helplessness.

A two-pronged buck deer answers the calls of Jerry Shine, employed by the municipal water district at Alpine dam, near San Raphael, Cal.

Long ago Shine one day came upon a dead doe in the trail of the forest, and standing beside the mother was a fawn. It was miles to Shine's cabin, but he carried the fawn home with him, fed it and gave it the name of Billy. After a time Shine left the district. He returned several days ago and asked his fellow workers the whereabouts of his deer. They laughed at him; the deer had gone back to nature, they said.

Shine mounted the parapet of the dam and called for Billy. The deer, now the proud possessor of two-pronged horns, bounded out of the forest. A photograph was taken of the man and the animal, as the latter rested his forefeet on the shoulder of Shine.

Drawing the Line.

"Dancing," remarked Mr. Lightfoot, "is the poetry of motion."

"Possibly," answered Miss Cayenne; "but it is not the kind of poetry that can properly be associated with hymns."

It's Nature.

"One industry in Australia is raising kangaroos."

"I should think that would keep those engaged in it on the jump."

POSTUM CEREAL

used in place of coffee has many advantages, soon recognized.

Postum is better for health, costs less than coffee, yet has a flavor very similar to coffee.

Postum Cereal should be boiled a full fifteen minutes. Another form **Instant Postum** is made instantly in the cup, no boiling required.

Grocers sell both kinds

"There's a Reason"

The Earth Has Grown Old

The earth has grown old with its burden of care,
But at Christmas it always is young;
The heart of the jewel burns lustrous and fair,
And its soul full of music breaks forth on the air,
When the song of the angels is sung.

It is coming, old earth, it is coming tonight!
On the snowflakes that cover thy sod
The feet of the Christ-Child fall gentle and white,
And the voice of the Christ-Child tells out with delight
That mankind are the children of God.

The feet of the humblest may walk in the field
Where the feet of the holiest have trod,
This, this is the marvel to mortals revealed
When the silvery trumpets of Christmas have pealed,
That mankind are the children of God.

—Phillips Brooks

Peter and the Mulberry Tree

By Christopher Grant Hazard

SOME dogs have names.

There was Caspar, the pup. He had a name, but he was too young to know it.

There was old dog Barker.

My father used to make Barker sit up and listen. Father would say to me, "No orderly boy would leave his hat on the floor like that. Barker wouldn't do it, if he were a boy."

Then Barker would bark, once.

Then my father would ask Barker if he was a good dog, and Barker would bark twice.

Some dogs have no names.

The little black and white dog across the street is just a dog, but he will come when you whistle.

There is a dog near here who knows the butcher cart when he sees it coming. He drives all the hens out of the yard, so he can pick up the scraps of meat that fall from the cart while of meat that fall from the cart while the butcher is getting the meat ready.

This dog hasn't any name. He is so selfish that he isn't worth naming.

Once there was a tree, and it had a name. It was a mulberry tree.

The man that owned the tree had a dog, too. His name was Peter, and no little dog was ever more fond of meat than Peter was of mulberries.

He would hunt around in the grass, under the mulberry tree, until he had found every mulberry that had fallen down. Then he would run against the tree and bump down a lot more.

Some children heard about Peter and the mulberry tree and it made them think of something.

It made them think of fixing up a Christmas tree, with many little packages upon it—like mulberries—and then bumping the things off for Christmas gifts.

So, this is just what they did.

Charlie had the first bump.

When he picked up his package he found that he had a round hole with a square peg in it.

There was a bit of paper tied to the peg, and on it was written:

"Get into the right place."

Harry's bump brought down a square hole with a round peg in it. Its paper said:

"Don't get into the wrong place."

Then Frank gave a bump that was a regular butt, and he held up a square hole with a square peg in it. These words were with them:

"A place for everybody, and everybody in his place."

When Dick bumped, he go a round hole and a round peg.

"What does this mean?" he shouted.

"The same thing," answered Frank.

"Sure," said Chauncey.

Chauncey was the littlest. He was so little that he used to take his doll to bed with him and talk over with it, before he went to sleep, the things they had done that day. And he had just learned that word "sure." He was so proud of it that he used to say it to his father instead of "yeth sir." Chauncey would soon learn that "sure" was not as nice as "yeth sir."

Then the girls said it was their turn and they began to bump.

Ruth got an alphabet, so as to learn not to say "hikjlmnop."

Sarah had "a headache in her knee," so Mary bumped for her.

Down came a pair of rubbers and Mary put them on "inside outwards," just to try them.

Then they all bumped the tree for Chauncey, who wasn't big enough to bump hard enough to make anything fall.

Such a lot of things tumbled off.

There was a baseball glove—Ruth tried it on and her hand looked like a hassock; a breastpin—Sarah pinned it on her sleeve, "where she could see it;" two doll dress patterns; a new doll's hat—a small hat; a set of dishes, a doll's high chair; and a toothpick.

Chauncey was like the old woman who lived in the shoe. He didn't know what to do with all his things; but he was careful to use the toothpick every time he took a drink of milk.

There was still one package left. It was in the top of the tree.

One little girl, her name was Lucy, had not had anything. So the children let her pull the top of the tree down to get this package.

And there was the dearest doll that ever came off of a Christmas tree. It had blue eyes that would open and shut and the cunningest frock.

Lucy, now the doll's mother, thought that this was the very best gift of all.

Then, just as they were going to go downstairs, there came a rap at the door.

"Come in," they shouted.

What do you suppose? It was Santa Claus. He marched in with stockings for them that were all bulging and bursting with good things.

What fun they had with him and with all the things he had brought.

They had such a good time that some of it spread away around the corner to a house that Santa Claus had not visited yet.

So, everybody had something.

This is what God meant the Christmas tree for.

After their visit to the poor children, they all went home laughing and happy enough to wait a whole year for a new crop of Christmas cheer—just as the dog Peter, has to wait until another season for a new crop of mulberries.

(©, 1920, Western Newspaper Union.)

A Christmas Day Menu

First course—Gladness.

Entrees — Love garnished with Smiles.

Gentleness, with sweet-wine sauce of Laughter.

Second course—Hospitality.

In some house Hospitality is brought on surrounded with Relatives. In others it is dished up with Dignitaries. In a third, best of all, it is served in simple shapes, but with a great variety of Unfortunate Persons—such as lonely people from lodging houses, poor people of all grades, widows and childless in their affliction. This is the kind most preferred; in fact, never abandoned by those who have tried it.

For dessert—Mirth.

Gratitude and Faith beaten together and run in the molds of solid Trust and Patience.

Bonbons of Good Cheer and Kindliness.

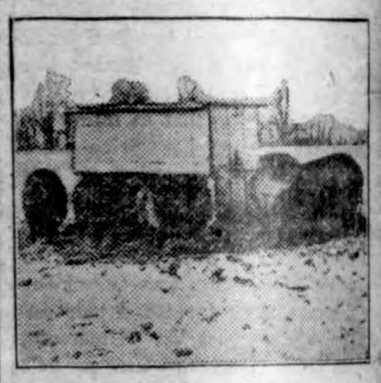
Live Stock Facts

KEEP BROOD SOWS IN WINTER

Animals Must Be Properly Fed in Order to Farrow Large Number of Healthy Pigs.

During the winter the brood sows should be maintained as cheaply as possible, but at the same time they must be properly fed in order to farrow a large number of healthy, well-grown pigs in the spring. Best results are obtained when sufficient food is given to produce daily gains on the sows of one-half or three-fourths of a pound. To do this the grain fed must be limited, and diluted with some roughage, for unless the ration has sufficient bulk, the sows will become constipated and hungry, due to the undistended condition of the digestive tract. Legume hays are the chief roughage available at this season, and their use will cheapen the cost of feeding.

Either alfalfa, clover, soy-bean or cow-pea hay makes an excellent roughage, and when fed, little or no high-priced protein concentrate is needed to balance the corn. Bright leafy alfalfa hay gives the best results of any of these roughages. Alfalfa meal is simply the best grade of alfalfa hay chopped into a meal. Clover hay contains almost as much nourishment as alfalfa hay, and soy-bean hay, cut and cured when the beans are almost ripe, is a very nutritious feed. Cowpea hay should be cut when the first peas are ripening and consequently does not have as high food value as soy-bean hay. Great care must be exercised in curing soy-bean and cowpea hay, for the stalks are very heavy and succulent and unless thoroughly dried are apt to mold. Under no condition should a brood sow be fed upon any roughage which is not bright, nutritious,



Sows Feeding Some Distance From Sleeping Quarters in Order to Secure Necessary Exercise.

and free from smut or mold. She does not relish or thrive on such inferior feed. It is very apt to cause severe digestive troubles, and may lead to the loss of her litter.

WINTER ATTENTION TO EWES

Success or Failure of Lamb Crop Next Spring Depends on Care Given Breeding Flock.

The success or failure of the lamb crop next spring will depend to a large extent upon the care given the breeding flock during the winter. In order to secure active, well-developed lambs, a large percentage of which are twins, it is absolutely necessary to have the ewes in a thrifty condition at mating time, and conditions of feeding and management during the winter months must be such that the flock will be maintained in good flesh, strong and vigorous.

WAY TO AVOID HOG CHOLERA

Prevent Exposure of Susceptible Animals to the Germ Which Causes the Disease.

To avoid hog cholera: First, avoid exposure of susceptible hogs to the germ which causes the disease; second, hogs when exposed to hog cholera should at least be injected with anti-hog-cholera serum, which will protect them through the period of exposure; third, produce permanent immunity in the hogs by administering virus at the same time protective serum is injected.

HIGHER PRICES FOR HORSES

Animals for Breeding and Farm Work Have Advanced Rapidly Within Past Six Months.

Prices on horses for farm work and breeding have advanced rapidly within the past six months and the fact that only about 10 per cent of the mares in the United States are in foal and not more than 10 per cent of the yearlings we should have are here, indicates that prices are due to go higher than we have ever known them to be.

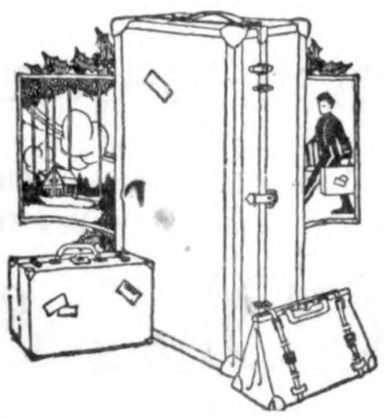
GRADE IS IMPROVED ANIMAL

Strictly Speaking It Is One That Has One Purebred Parent, the Other Being Mixture.

Strictly speaking, the grade is an animal that has one purebred parent, the other being a mixture. The term grade is sometimes applied to an animal that is from improved ancestry whether or not it has one purebred parent. However, not every animal that is not purebred is a grade. The animal with inferior mixed blood lines is strictly a scrub.

Sensible Gifts for Men are Bought at a Men's Store

We know what men and young men as well as boys want--its something to wear, however something different and a little out of the ordinary. It has been our aim to make Christmas purchases to conform with your ideas, something sensible, practical and desirable.



This Will Be a Christmas of Big Saving for All of Our Customers

We have given you the benefit of whatever lowering of prices the market has shown and can safely say you will save from 20 per cent to 30 per cent on all purchases.

We are making a special Xmas offering of

THE COAL QUESTION

question of national control coal is brought squarely to the front by the statements of ators Calder and Edge, members the Senate Committee on Re- ruction who have served notice the coal industry of the United unless that industry "reforms cuts prices to a reasonable by December 6, which is the of the reassembling of Congress will introduce a bill providing most stringent regulation of branch of the coal business. usual, the coal industry has at- ted to shift the burden of re- sib lity by laying its ommissions to the railroads. The Car Service sion of the American Railway ociation punctures coal is being ported this year this claim by statement that more than last , both in the lignite and anthra- coal fields.

There is plenty of talk about the ibility of conferences between tors, jobbers, railroad execu- s and representatives of the Interstate Commerce Commission, the purpose of straightening out coal situation. Doubtless this l help some, but the question es as to how far the authority he Commission could be extended correcting the difficulties. The mmission has no control except r the railroads, and the railroads, ording to official statements, are only ones who are fully meeting r responsibilities.

Notice to Automobile Owners.

Bell Foiled Thieves.

Among records of stolen bells is that of one from Soissons in Burgundy which Clothaire carried away. The bell objected to the act by gradually becoming dumb on the journey to Paris, where its voice was discovered gone. But its voice returned in such full force when the bell was sent home that its tone could be heard seven miles distant.

Three Cents a Bath.

The pet dogs of the gay Parisiennes supply a source of livelihood to many men in Paris. They are stationed along the Seine river, and do a good business bathing dogs for their owners. Milady sits on one of the park benches along the river while Fido is given a good bath and thoroughly dried—all for three cents.

Think Before You Speak.

It is a good thing to say what you think, and to be truthful, but never forget to think what you say and to be thoughtful. A thing may be true, yet should not be said if it helps nobody and hurts somebody.

CHRISTMAS SEALS FIGHT DISEASE

Annual Sale to Finance State Wide Public Health Activities

Every Iowa citizen has an opportunity this month to assist in the improvement of public health conditions through the purchase of Christmas Health seals, which are being offered for sale through county organizations in practically every community.

The seal is being conducted by the Iowa Tuberculosis association, in cooperation with various local organizations all over the state.

Receipts from the seal sale are to be devoted entirely to the furthering of public health, child welfare, school crusades upon disease, anti-tuberculosis work, and similar lines of activity, 95 per cent of the proceeds remaining in Iowa. The National Tuberculosis association, from the small share it receives, supplies literature, engages in a nation wide fight on tuberculosis, and generally cooperates with the state and local organization.

The seal sale is endorsed and assisted by the American Red Cross, and in many counties the Red Cross chapters will have charge of the expenditure of the funds.

In 1919, 91,000,000 of the little red, green and blue stickers were sold in Iowa. This year it is hoped to at least double this number, and a goal of ten seals per capita is set for the sale.

In addition to the seal sale, health bonds and seal buttons are also being sold in many communities.

The purchase of each individual will assist in improving public health conditions in his own community and county. School nurses, women's clubs, school superintendents, public welfare boards, visiting nurses associations, and numerous other organizations interested in social work are planning to finance their work in 1921 through the seal sale.

Particular emphasis is being laid upon extending the work of these social agencies into the rural communities, working in most instances through the farm bureaus, county nurse, and school system.

A Few Facts About Tuberculosis

Every day 5 people die of tuberculosis in Iowa.

One funeral in 10 is caused by tuberculosis.

One in every 13 deaths from tuberculosis is a child under 5.

Tuberculosis kills 1 in every 3 who die between 18 and 45.

Every year a Titanic goes down in Iowa—just that many needless deaths of tuberculosis.

More people died of tuberculosis last year than the entire population of the biggest city and county in Iowa.

Two and a half times as many people die yearly of tuberculosis as died of all causes in the war.

The number of people in Iowa who have tuberculosis now would fill the average rural county.

Iowa spends ten times as much annually fighting tuberculosis in cattle and hogs as it does fighting tuberculosis in its men, women and children.

RED CROSS TO AID

Full co-operation of the American Red Cross in the annual Christmas Health Seal Sale which will be conducted in Iowa under the direction of the Iowa Tuberculosis Association and its affiliated organizations is pledged in a letter received by the National Tuberculosis Association from Livingston Farrand, chairman of the central committee of the American Red Cross.

The letters is as follows:

Dr. Charles J. Hatfield,
National Tuberculosis Association.

Dear Dr. Hatfield:

I am, naturally, watching with very great interest the plans for the annual Christmas seal campaign of the National Tuberculosis Association.

There has never been a time when united effort in the health field was more needed in the country and the world than now, and of all the aspects of the health problem that of tuberculosis in my judgment takes first place. The work already accomplished by the National Tuberculosis Association is so notable that it is recognized everywhere, but there still remains much to be done and success can only be obtained if there is a generous response in the seal campaign.

The Red Cross regards this work of your Association as of primary importance, and for that reason hopes to cooperate with you in every possible way, and trusts that the results of the sale of seals in 1920, will be all that the great importance of the program deserves and calls for.

Sincerely yours,
By LIVINGSTON FARRAND,
Chairman, Central Committee.

SEAL FUNDS HAVE DONE MUCH WORK

Iowa Tuberculosis Association Program Extensive and Far Reaching

The Iowa Tuberculosis association is supported entirely through its modest percentage of the receipts of the Christmas Seal sale throughout Iowa.

In 1920 it:

Directed and introduced the modern health crusade in Iowa schools, enlisting altogether a total of 243,000 young people in the ranks of cleanliness. As a result Iowa won the grand national prize for the modern health crusade work, and of 10 first prize banners awarded in the United States, 6 came to Iowa. Of 101 second prize banners, 58 were won by Iowa schools, including both public and parochial.

The association furnished 1,500,000 pieces of health literature for distribution in Iowa.

Exhibits were provided for 30 county fairs and the state fair.

Twelve county tuberculosis surveys were made by the nursing staff.

Four counties were covered by special nursing demonstrations by staff nurses.

Fifteen county tuberculosis clinics were arranged and held.

A total of 1,050 tuberculosis cases were registered at the state headquarters, and placed under proper care and supervision.

Occupational therapy was introduced in three sanitria, including the state sanitorium at Oakdale.

Sixty-one public health nurses were assisted by visits from members of the I. T. A. staff.

Every public health nurse in Iowa was afforded co-operation through the supplying of literature, suggestions, and information pertaining to their work.

More than 100 strong county and community organizations were established as co-operating agencies with the Iowa Tuberculosis association.

The association maintains a staff of competent nurses engaged at all times in public health work in Iowa, the services of these nurses being devoted to communities where the need is greatest.

Through co-operation with the Iowa Tuberculosis association in the last Christmas seal sale, local organizations were supplied with more than $60,000 in working funds.

Buy Christmas Seals and help keep up the good work.

Health of Iowa School Children

Recent reports of public health nurses' inspections of school children in Iowa counties showed:

3 out of 4 had physical defects.
3 out of 5 had bad teeth.
11 out of 20 had enlarged tonsils.
1 out of 3 had abnormal throats.
1 out of 8 defective vision.
1 out of 20 had defective hearing.
3 out of 5 were underweight.

One health committee reports as result of this work:

113 children had glasses fitted.
414 had teeth fixed.
307 had minor operations.

Another school health committee visited 472 homes giving literature and teaching health.

108,000 school children are absent every day in Iowa.

This costs the state $4,000,000 in tuition.

The state loses $45,000,000 a year on its school investment.

80 per cent of these absences are due to preventable illnesses.

The rural districts suffer most.

The state spends less than 2c per capita for health; 30c per capita for police protection.

Seal Sale funds go to improve the health of your children.

Iowa's Needs

One per cent of population has active tuberculosis (scientific researches of National Tuberculosis Association).

This is 23,586 people in Iowa.

One per cent more have it in negative form.

7,000 children in Iowa are constantly being exposed to tuberculosis.

For this Iowa needs:	For this need Iowa has:
100 dispensary clinics	13
470 Public health nurses.	165
210 open air school rooms.	3
700 preventoria beds	60

How are we to get it?

Buy Christmas Seals, Health Bonds, or give what you can to the Seal Sale.

Plan Ahead for 1921

The old saying that "the man who thinks ahead, gets ahead" still holds true. NOW is the time to make your plans for the comming year. Determine a business course that will bring you a full measure of success in 1920.

Plan to spend more wisely, to be more economical, to make more use of this strong, friendly bank. These suggestions deserve your serious consideration as you start the New Year.

—6—

actually true; impossible d, it was nevertheless an ible fact. He had never er a single word of love; er even kissed her, and both God and man, she . The strangeness of the ewildered him. Why, he en know who she was; he had to claim the family r which he had married strange story of crime w her history. It was all mystery in which he was deeply involved. Calkins ly been hiding her from but whether of good or ot yet be determined. This duction, beyond question, with that concealed past, th some happening before even born. These fellows obbers; their raid was not r any such purpose; they d nothing, even the horses undisturbed in the corral, oment they gained posses- they had hurriedly depart- all been carefully planned, lin to choose the time, and ed quietly. Their only mis- n leaving him behind alive. hat one error no one ever known what had occurred, d of her fate. And now, as- safety, believing the dead no tales, that they had left evidence of their crime, the riding carelessly across the irie, seeking somewhere a zvous.

reined his horse to the left, t a water hole he remem- self drinking first, and then y while the animal quenched Leaving the buckskin there, trailing on the ground, he e steep side of a butte, and distant horizon with a field was a trackless waste, drear ted of all life. Not a thing ed crossed his range of d, at last, he snapped the ses back into their case, own the steep face of the silently remounted.

n was some time past the and he felt convinced those ed could not be far from the was endeavoring to locate. He on it in less than an hour, straight down a narrow val- e general course was directly dismounted, and studied the th care. This was his party doubt—five horses, one with oof.

r later he found where the halted, made a fire among cks, and prepared food. He very sign with care, hoping message of guidance from there was none. Either she too carefully watched by her or had given up in despair ght of rescue. Doubtless she him dead also; perhaps had nessed the blow struck, but if uld assuredly have been in- of what had happened. The g of the ponies' hoofs indi- at the party had remained in t for some time, in no hurry eed. Shelby studied the foot- satisfying himself that four dian, and one white, unques- Macklin. With only five this meant that the girl rode e of the men, probably the Kid. scovered where she probably ting during the meal, a torn of crumpled sacking bearing estimony that her hands had ound, and released so that she t. The fellows were evident- raid of her any longer, and tied her up again when they the journey.

as nearly sundown when the followed swerved to the right up a steep bank, where the ponies' hoofs slipped in their struggle to attain the top. Shelby gave the buckskin his head, and the game little devil went scrambling up, until they came forth on a flat plain above. Shelby dropped his rein, and climbed to a higher point of rock, lying concealed behind its summit, while he swept the scene below through the field glasses. He never had been there before, yet he knew about where he was; this must be Dragoon creek, and not far below would be Wolves' hole, of which he often had heard—a famous hiding place for cattle thieves and border outlaws. These fellows evidently were heading for there, but would they try to complete the journey? His hope centered on their camping somewhere until morning; if sufficiently assured of safety this would probably be their choice. Through the field glasses he studied the course of the stream, and the little patches of wood intently. At last he was rewarded—a faint spiral of blue smoke arose above some distant trees, the evidence of a campfire. He lay there motionless, silent, his eyes glued to the glass, planning his action, and waiting for the night.

As the gloom slowly deepened Shelby was able to distinguish the flicker of that far-off fire, but the distance was too great to permit any knowledge of its surroundings. The trail leading down was narrow, and rock-strewn, and he determined to try the passage while a faint glimmer of twilight yet lingered. Leading the buckskin, and moving with the utmost caution, he began the descent.

The gloom did not greatly retard his movements, for, through the glasses, he had mapped out the salient features, and so impressed them upon his memory as to go forward now confidently. The camp fire was located in the third grove of trees, and there were no signs of human presence between. However, he took no chance, but advanced quietly on foot, leading his horse, and using every precaution against discovery.

He circled the two groves, keeping close in their shadow, and searching their depths anxiously for any sign of life. They were desolate and deserted, but, from the outer fringe of the second he could perceive plainly the dull glow of the fire a hundred yards ahead. It was no longer a flame, but a mere glimmer of red ashes, casting no reflection about, although clearly visible. He fastened the bronco to a limb, within the circle of trees, and crouched forward alone, Winchester in hand, choosing his passage beneath the bank of the stream, and advancing with every precaution, pausing every few steps, to peer over the protecting bank, and thus assure himself that all remained quiet. When almost exactly opposite the red glow of the coals, he lay still, endeavoring vainly to learn the situation, and becoming more and more puzzled.

The camp appeared deserted, as though the party which had halted there had already passed on. He could hear no sound, see no movement. The fire had died down into a mere glimmer of red ashes, barely perceptible amid the surrounding gloom. Shelby

He Circled the Two Groves.

drew himself forward, creeping like a snake, convinced that he was alone, yet no less alert and watchful. His progress was up a shallow depression, and he had attained the deeper shade of the trees, when, suddenly, a voice, apparently speaking not two yards distant, gave utterance to an oath of disgust.

"H—l!" the voice said roughly, "there is no use waitin' for that guy any longer; no tellin' where he is at by now."

Shelby dropped flat on his face almost ceasing to breathe. The unseen party addressed stretched himself lazily, as evidenced by the rustle of leaves.

"I reckon ye're right, Hank," he admitted slowly, his speech heavy and coarse. "No tenderfoot ain't goin' ter make that trail at night. Mor'n likely he's aimin' ter com' through the other way."

"What'll we do, then—ride on?"

"After a bit; it's early yet, an' maybe it'll do no harm to lie quiet awhile. But we kin light up, an' be comfortable."

He struck a match, hollowing the flame in his hands, revealing the bearded face of a man of fifty, shadowed beneath a soft hat brim. Beyond him appeared the obscure outline of the other, a mere smudge. A moment the two puffed away contentedly, Shelby not venturing to move a muscle.

"Say, Hanley, I've allers played my hand the best I knew how, but I do like ter know what the game is I'm playin' at. What do yer know, anyhow?"

The other chuckled in his beard, rustling his feet in the leaves.

"Easier ter ask about than explain, Hank," he answered slowly, "specially as there is things I don't just cotton to myself. Mostly I pulled the facts out of that Kid Macklin when he was drunk, 'cause he wanted me to help him. But it seems he's only hired fer the job; it's that guy we're waitin' for who has got the real dope, and likewise the long-green."

"Churchill's his name, ain't it?"

"That's the duffer; some big feller down East; Virginia, as I understand—Judge Cornelius Churchill; the whole story goes a h—l of a long ways back."

He leaned his head against the tree trunk behind him, puffing away at the cigarette between his bearded lips, the dull glow barely touching his face. The younger man leaned forward waiting.

"Well," he said impatiently, "that ain't all of it; what started the rumpus? What's the idea of stealin' the girl? An' just whar do you an' me come in?"

"Well, as I figure it, we've got to make our own medicine. You saw that outfit go along afore dark—Macklin an' the four reds?"

"Sure; they had a woman with 'em?"

"That's the ticket, an' they was bound for Wolves' hole. I thought maybe they'd camp down here, but they didn't—just kept movin'. Well, that's one thing you an' I laid out here for, to get a line on Macklin. The other thing is that this yere Cornelius Churchill is about due also, an' is most likely to blow in along this same trail. It is my notion to have a word privatelike with that gent before Joe gets to him—see?"

"Can't say that I do, Hanley, exactly. What's it all about—the girl?"

"Mostly, I reckon, an' a h—l of a slice of money down East. This is how the Kid blew it to me. It seems an army officer named Carlyn 'bout the time the Civil war closed, ran away with a Rose Churchill down in Virginia, and married her. All he cared for was the girl, an' he never even knew she was rich, only that her family objected to him, an' that they'd have to skip out. I reckon, maybe, she didn't know it herself at the time, nor the rest o' the Churchill family, for they didn't make no great effort to find her for some while. Then, when they opened a will, they discovered that most all the Churchill fortune had been left to this Rose, and they naturally becom' mighty interested. Cornelius, as I understand, was the brother of Rose's father, an' the property was put in his hands as trustee on behalf of the girl. Maybe he was a straight enough guy generally speaking, but he had expected to get most of this dough after the girl skipped out, an' was consequently almighty hot. Naturally he wanted to keep the stuff, an' he didn't make no great effort to locate the heiress. By the time he did learn who she had married, Rose died, leaving a daughter. By the terms of the will if she died childless the entire estate reverted to Cornelius, and he wasn't the sort o' guy to lose that kind o' bet."

"An' this soldier never suspected nothing?"

"Not a thing. He was a colonel by this time, out at some frontier post, and left his baby to the care of some relatives in the East. There wasn't no fuss made, an' so Churchill sorter let affairs slide along. He had the use of the money, an' begun to think there never would be no trouble. Of course he kept a line on the husband, but lost trace of the kid entirely."

"Yer mean the colonel never even know'd he'd married a rich girl?"

"So it seems. I reckon she didn't even know it, his wife. But after awhile some inkling of the truth must have reached him, for he went East, and began to make inquiries through a lawyer. When Churchill heard about this he got scared. I reckon he'd played h—l with the trust funds by that time, an' with the husband on his trail got mighty desperate. Meanwhile the daughter was in some convent school, and not to be found. Carlyn struck a hot trail all right, but, before he could take any action, was shot and killed in a street fight with some roughs in Sheridan. Nobody knows for sure just how it happened, but it's my opinion Churchill got up the row just to get him out o' the way. It all happened sudden, an' unexpected, the only fellow with the colonel at the time being an old sergeant, named Calkins. Calkins was shot himself, but got away, and took care of Carlyn till he died, maybe an hour later. Enyhow he kept the fellows from getting hold o' any papers, an' I reckon the colonel give him an idea of what was up."

"What makes you think so?"

"The way he acted afterward. Churchill had got Carlyn out of the way, but he couldn't locate the girl. He didn't suspect the sergeant at first, nor for a long time. He was a foxy guy, and stuck to the army for several years, never makin' a move, just payin' for the girl's schoolin', but never goin' near her. Then, when everybody had quit watchin' him, Calkins took his discharge papers, and skipped out, takin' the girl with him."

"How could he do that?"

"That's what I asked Macklin, an' he said they'd finally found out that durin' the time between when Carlyn was shot, an' when he died, he'd signed a paper makin' Calkins the girl's guardian, an' gave him the key

"What's the Idea of Stealin' the Girl?"

to a deposit box in Kansas City, where all his papers was. A lawyer named Weeks, at Sheridan, did it for him. You see the colonel didn't have no near relatives, an' he an' Calkins had been soldiering together for years; he sorter trusted the sergeant to play square, an' he sure did!"

"The h—l he did! Never made a peep for the money, did he? An' just hid out all 'round the country with the girl, I don't call that playin' very square."

"Well, it was, just the same, d—d square, if you ask me. It was what Weeks advised him to do, after he went to Virginia, an' got a peep at a copy of the will on file. This girl had no legal rights till she was of age—see! Churchill knew this, an' he didn't do much o' anything else fer ten years, but try to get his hands on her. Old Calkins was smart enough to fool him. The colonel had money enough in the deposit box, so they could live on it quietlike, an' the sergeant never wasted a cent. He just naturally lived for that girl, till about a month ago. He was smart enough not even to trust her; she never knew what they was hidin' from."

Hank touched a match to another cigarette, impressed with the story.

"Rum kind of a business, I'd say," he admitted at last, "but just where did this devil's imp of a Macklin fit in?"

"I ain't got that all figured out yet," admitted Hanley. "You know pretty near as much about him as I do. Furst time I saw the feller he rode in yere along with Cassady's outfit, after that N. P. holdup, an' he's been trainin' with Cassady more or less ever since. After I had this talk with him, when he was drunk, I put him to bed, an' picked up a letter, or two, what fell out of his pocket. I got some o' this stuff out o' them. One of them was written by Churchill, an' judgin' from the way it read, the Kid ain't really named Macklin at all—he's a Churchill himself, the old cuss' son."

"Well, I'll be d—d!"

"You know the rest; how he stumbled onto ol' Calkins down in Ponca, an' what happened. You can't make me believe the old fellow killed himself; he wasn't that kind. But, however it happened, the girl was left helpless; then d—d if she didn't marry that rancher over on the Cottonwood, an' spoil the whole game."

Hank laughed coarsely.

"Tough luck; but the Kid played his hand all right."

"Sure he did, but he had to bean this fellow Shelby. Except for that job it wasn't so bad, for it was easier to get her where he wanted her. I don't know how he'd have managed at Ponca, but there was just the three of 'em on the Cottonwood."

"And dead men don't talk."

"Well, they're safer than live ones, enyhow. Then this Injun outbreak comin' right now makes the get-away plum easy. He can hide her away back in the Hole as long as he d—n pleases. Everything will be laid to the Sioux for awhile."

"It's a sure break, then?"

"Sure; all the young bucks are already out. Macklin had four with him on this chase—took 'em on purpose, so if they was ever trailed they'd say it was an Injun job. Oh, he's covered up things all right. You got it straight now?"

Hank drew up his feet until his chin rested on his knees, the tip of the cigarette glowing.

"I got it straight enough, so far as that goes, Hanley, but I don't see what the h—l we're goin' to get out of it."

"You've got the same love for the Kid I have, ain't yer?"

"Just about, I reckon. I'd sure like to take a good swipe at the ornary cuss."

"That's what I thought. Well, he ain't goin' to do nothin' desperate to this young woman till he hears from the old man. This affair has been pulled off hurriedlike, an' all the Kid has got in his mind right now is to hide her away somewhere, until old Churchill shows up, and decides what to do with her."

"What do you suppose he'll decide?"

"Well, my notion is that if Macklin is the old man's son, he'll try to force her into marryin' the boy. That would be the easy way, an' I believe that will likely be their scheme. My idea is to put a crimp in it."

"How?"

"By getting hold of her ourselves before the old man shows up, an' then doin' business with him."

"Where'll we take her?"

"Back into Wolves' hole; there's hidin' places there a plenty, an' with them Injuns raisin' h—l up north, it'll be safe enough, until the war's over enyhow. What do yer say?"

"H—l, I don't care; there ain't nuthin' to lose. You got the Kid them Injuns, didn't you?"

"Yes; he never told enybody what was up but me. All right, let's mosey along; there's no use stayin' here."

CHAPTER VIII.

The Trail to Wolves' Hole.

Shelby lifted himself on one elbow, and ventured to breathe easily once more. The vague shadows of the two men had vanished, but their progress through the underbrush could be plainly distinguished. Feeling themselves absolutely alone in that wilderness neither made the slightest effort to proceed silently. Shelby sat upright on the edge of the gully, straining his eyes through the darkness.

A strange fortune had brought him the very information he most needed. His whole thought centered instantly on the fate of the girl. What course would she choose under these circumstances, when the facts were finally revealed to her? Undoubtedly she believed him dead; her captors would impress that fact upon her first of all, so as to make her realize her complete helplessness. Besides, she cared nothing for him; had married him indifferently, merely to thus escape from a worse fate. He could not hope that loyalty to him, under such conditions, would greatly influence her decision. Somehow the thought hurt Shelby, and brought to him the knowledge that he did care. He cared very much indeed, and this truth colored his thought and decision.

He dare not follow those men at present; he could only wait where he was, and plan his course of action. There was no danger of his losing them, for he knew where they were going, and, in a measure, at least, about who they were. Shelby had never been in that strange sink known as Wolves' hole, but he had talked with a man who had. An immense hole in the Bad Lands, through which flowed a branch of the Cottonwood, a strange malformation of nature, so completely concealed as to be invisible until the surprised traveler stood on its very edge, and stared down into the gloomy depths below. The walls were precipitous, impassable except on foot by daylight, and at only two points could the sink be entered on horseback; from the west beneath the protection of a cataract, where the stream plunged headlong over a high ledge of stone, and from the other extremity down a narrow ravine through a tunnel scooped out by some torrent in long-past ages. Originally discovered by wandering trappers, who camped there out of the winter storms, it had later become the headquarters for an illicit Indian trade in liquor, and finally the rendezvous for criminals of all kinds, eager to get beyond the reach of the law. It was rumored that there was actually a town there, with women of a class, with a certain rude attempt at government by a few self-constituted authorities.

"What a hole! What a freak of nature! What a wilderness hiding place!"

(TO BE CONTINUED.)

Odd Newspaper Subscriptions.

Greenland hasn't many newspapers of any kind, but the oddest of them all is a monthly paper called the Kalorikmit. (Did you get your tongue twisted after pronouncing this name?) The most unusual thing about this paper is that a three months' subscription costs two ducks, while it requires a sable skin to pay for a year.

One Thing Certain.

A New York apartment house advertises several six-room suites at $17,500 a year. We know nothing about these suites, but we do know that the tenant who occupies one of them doesn't make his money picking cotton or working in a sawmill.—Houston Post.

CANADA BIG WINNER

Captures Many Prizes at Leading American Fairs.

Remarkable Showing Made at International Live Stock Show at Chicago—Carried Off Sweepstakes For All Wheat.

Something that lends emphasis to, and affords definite proof of, the generosity of the soil and climate of western Canada, is shown by the numerous exhibits made by both the government and individual farmers and stock raisers of that country, at many of the leading state and county fairs in the United States this season. Particularly is this the case with regard to exhibits made at the International Live Stock Show recently held at Chicago.

First and foremost to the average farmer will appeal the fact that Canada carried off the Sweepstakes for all wheat, and that out of a total of twenty-five prizes, Canada took twenty. In oats the Grand Championship was won by a farmer living in the Province of Alberta. Canada also was awarded the championship for Durum wheat, while for Flint Corn out of a total of ten prizes, Canada took first, second, third, sixth and seventh.

Not only in grains did Canada prove her right to rank as a first class agricultural country, but she carried off many prizes for cattle, horses, sheep and hogs, a partial list of which follows:

Cattle, Canada was awarded the championship for Grade Shorthorns, also in the College Special class, Canada gained first, fourth and sixth prizes.

Horses, Grand Championship for Clydesdale stallion, also Grand Championship for American bred mare, as well as first for three-year-old Clydesdale stallion, first for one-year-old Clydesdale stallion, and second for the aged class.

In the Belgian class, Canada obtained first and reserve for Championship Belgians, as well as second for Aged stallion.

Sheep, Canada obtained Championship for block, male and female, in addition to first prize in all group prizes.

Hogs, in the Yorkshire class Canada was very prominent, taking the Championship for pen of Yorkshires, and championship for best single barrow, as well as over twenty first, second and third prizes in other classes of Yorkshires.

With regard to the live stock shown it must be borne in mind that these have not been fed on corn, on which the average western farmer places his reliance, but on the wonderful oats and barley grown in western Canada, supplemented by the native grasses, of which a most artistic display was made by our neighbors to the north.

Canada has conclusively proved that not only can she take prizes for the grain she raises, but can also take prizes with the animals to which these grains have been fed, and this in open competition with the world. —Advertisement.

No Tin From South China.

The supply of tin from the Yunnan district of South China may be cut off entirely at no distant date, even though this district is said to be capable of supplying one-fourth of the world's demand. It is now credited with one-twelfth. The present returns to the mine operators do not justify operation of the mines.

IN YE OLDEN TIME

Hoop skirts were worn by those who first asked the druggist for, and insisted on having, the genuine Golden Medical Discovery put up by Dr. Pierce over fifty years ago. Dress has changed very much since then! But Dr. Pierce's medicines contain the same dependable ingredients. They are standard today just as they were fifty years ago.

Dr. Pierce's Golden Medical Discovery for the stomach and blood cannot be surpassed by any remedy today.

Dr. Pierce's Favorite Prescription for weak women has never been equalled for the distressing complaints incident to womanhood. What others say:

GRAND ISLAND, NEBR.—"For the past fifteen years I have been wonderfully helped by taking Dr. Pierce's Favorite Prescription and his Golden Medical Discovery whenever my system has required a toning up. I would recommend these medicines to all mothers who become run-down, weakened or nervous. They are always reliable and can be depended upon to give strength and renewed health."—MRS. H. O. RODENBOUGH, 418 North Pine Street.

Howard Doyle and Wm. Lau drove to Mason City last Friday on business.

Albert Schmidt and family drove to Britt Sunday for a short visit.

Mr. D. D. Ross of Garner, was a business caller in Klemme Monday.

Ed. Jacobs and Dad Yahnke drove to Meservey Monday on business.

Wm. Trafford went to Garner Monday to have some dental work done.

Mrs. Albert Johnson was a Garner visitor last Thursday afternoon.

Miss Marion Luick, of Belmond, was visiting Klemme friends Monday.

Mrs. Harry Brooks and son went to Belmond Friday to visit relatives.

Mr. and Mrs. John B. Spitler left Tuesday for a few days visit with relatives at Clarion and Btlmond.

R. R. Kester, of Garner, was a business caller here last Friday between trains.

Mike Haskins, of Garner, was in Klemme last Friday reading the meters for the Iowa Falls Electric Co.

Mr. and Mrs. Marlin Croner and Mrs. Schroeder drove to Garner Sunday afternoon.

Mrs. A. Ahrenkiel and baby of Goodell were visiting at the Tom Blank home Saturday between trains.

Deputy Sheriff Eck Raw of Britt, was a Klemme business caller Tuesday.

Mrs. Howard Doyle is assisting at the Wellemeyer store during tht holiday rush.

Mayor Barrry and wife of Belmond were business callers in Klemme last Wednesday.

Miss Thera Fitts and Mrs. Ted Townsan, of Belmond, were shopping in Klemme last Thursday.

Bert Trumbell of Belmond visited at the Mille Smith and Howard Doyle homes here Monday.

Miss Laura Brooks of Belmond, was visiting with Klemme friends on Monday.

Miss Emma Sampson and nephew, Paul, were Garner visitors Monday afternoon.

Mr. Henry Schuldt went to Garner Monday for a visit with her daughter Mrs. Richard Bamman.

Oscar Schuldt of Garner, spent a few days of the past week with his mother here, Mrs. Henry Schuldt.

The town council had a meeting on Monday evening for the transaction of business matters.

Mrs. Chas. Stromer and daughter, of Garner, were Klemme shoppers Tuesday between trains.

Henry Freie and daughter, Miss iVola, drove to Mason City last Friday for a short visit.

Mr. and Mrs. Ben Swalve and daughters Miss Lena and Mrs. Gilbert Schaper, were Mason City callers last Friday.

Bert Mathews, Dr. Reuber and LuVerne Smith drove to Belmond Sunday. While there they went thru the sugar beet factory.

Wm. Lau and family, of Garner, drove to Klemme Sunday afternoon for a visit at the home of his parents here, Mr. and Mrs. Henry Lau.

The Misses Eber tand Sullivan, teachers in the Klemme schools, spent Sunday at Miss Ebert's home at Charles City.

John Henschen drove to Mason City Sunday. That is what he told us but he may also have stopped at Ventura—quite likely.

C. H. Weigman of Garner, was a business caller in Klemme last Friday. Mr. Weigman is seen on the streets of Klemme quite frequently.

John Peterson, who has been visiting the past week at the Joe Johnson home, returned to his home at Seneca, Illinois, Monday of this week.

George Ell of Belmond came Tuesday morning and remained until Wednesday visiting with Klemme relatives and friends. George also transacted some business while here.

Ed. Jacobs, R. A. Jorgenson and G. P. McCullough wert all at Garner for dinner Sunday. The main attraction seemed to be a chicken dinner at the various homes of the boys.

Guy Mitchell of Charles City, was a Klemme visitor last Friday and Saturday. Miss Ebert, Klemme school teacher, claimed most of his attention while in the city.

NOTICE—The fellow who "exchanged" cushions in my car Tuesday night last week is known. Leave my car cushion at the Ell Garage by Saturday night and save trouble. J. A. Wade. 1wpd

Mr. and Mrs. Howard Spitler are rejoicing over the arrival of a fine baby girl who came to their place last week Monday. Grandma and Grandpa J. B. Spitler are much elated over their new ganrd-daughter.

The State Savings Bank have a new improvement on their building. Last week they had a storm front installed at the entrance which will keep out the cold this winter. A like improvement was also installed on the side door leading upstairs to Dr. Missman's office.

ASK PROTECTION

Farmers Want Tariff on Their Product

WASHINGTON, Dec. 13—When the next tariff bill is written farm products may be on the protected list.

Sentiment for the removal of cotton, corn, wheat, cattle, wool and other products from the free list is growing among farmer members of Congress.

Surprisingly large imports of these articles, combined with the depression in the price of all agricultural products is responsible for the sentiment which is particularly strong among southwestern and western members.

Thomas W. Page, chairman of the United States Tariff Commission, at the request of a congressman, recently prepared statistics of farm imports duty free for the year ending June 30th.

Figures Are Astounding

Altho the United States is supposed to feed the world, the figures literally stunned congressmen representing agricultural constituencies.

Free raw materials, according to Representative Blanton of Texas, has "almost bankrupted southern producers who by law are required to buy everything they purchase in a protected market and sell everything they produce in a free market."

Repeal Schedule

Western members are particularly opposed to the free wool and meat provisions of the Underwood tariff law. They will make a strong drive to have repealed the famous schedule "K" providing this.

There is a tariff at present on rice, peanuts and cane products, including sugar. Because of this, farmer congressmen are asking why not on wheat corn, cotton, wool, hides and live stock?

The Ways and Means Committee, recognizing this sentiment, has fixed six days in January at which advocates of a farm products tariff can be heard.

L. C. Lauritzen, from Onida Sonth Dakoto, is visiting with his parents, Mr. and Mrs. E F Salling. After a two weeks visit Mr. Lauritzen intends to go to Florida to spend the winter.

William Bush went to Whittemore Tuesday, where he will be employed in a machine shop.

34,000 YANKS KILLED

And Over 224,000 Wounded In The World War

Washington, D. C. Dec. 16th.—Final figures on army casualties in the world war are contained in the annual report of Surgeon General Ireland, made public tonight, showing 34,249 killed and 224,089 wounded.

The proportion of killed to wounded is about the same as in the Civil War, although mortality from gunshot wounds in the world war was only 8.26 per cent as compared with 13.6 per cent in the Civil War. The report said this indicated that improved surgical and sanitary methods in the recent war had saved the lives of 5.34 per cent of all the American soldiers wounded.

Of every 1,000 men sent to Europe 110 were admitted to hospital as the result of battle casualties, the report says, and nearly seven men out of every 1,000 died as the result of wounds. Infantry losses were heaviest, 215.6 out of every 1,000 men of that arm being wounded and 12.77 killed. The signal corps was next with 52.22 wounded and 3.13 killed per thousand.

Death from wounds totalled 13,693 or slightly more than 6 per cent, while 158,585 of the wounded, or 70 per cent, were returned to duty, the remainder being invalided home for treatment or discharge. Shell wounds were by far the most deadly, the report said, adding that no American soldier lost both arms and both legs in the world war, or both legs or both arms and one other extremity. Eleven lost both legs at the thigh, one both legs at the knee; nine both legs below the knee; one both feet and three one arm.

More than 4,400 soldiers lost a part of one or more extremities, 60 lost the sight of both eyes; 44 lost the partial sight of both eyes and 644 lost one eye or the sight of one eye.

HUNDREDS HUNT CHILD

Fort Dodge Youngster Lost In The Woods

Fort Dodge, Iowa, Dec. 9.—Two hundred men from Fort Dodge, Lehigh and Otho formed a posse last evening to search for Ben Black, Jr., two and a half year-old son of Mr. and Mrs. Irving Black, living near Dolliver Park, when they learned that the little boy was missing.

The little fellow turned up missing about 5:30, when his mother discovered that he was not in the house nor with his father, who was working near the house. Soon after his disappearance was discovered, the news spread rapidly and friends from Otho, Lehigh an Fort Dodge immediately formed a posse and started a search for the missing child.

With the aid of searchlights the men combed the country for hours in the vicinity of Dolliver Park, where it was thought he might have wandered. After what was thought to have been a fruitless search, Bob Longstaff, of Lehigh, heard a faint sobbing and discovered the little boy in a pile of brush in the thick of the woods a mile and a half from home. It was 11:30 when he was discovered.

The war department has ordered that Camp Dodge be sold and bids are to be advertised for at once asking for some wrecking concern to take over the whole business. Here is a complete city capable of caring fore 63,000 men. There is a fine railway system with ample yardage water system, miles of paved streets, sewer and electric lights. A theater, community club house, library, telephone office and a remount equipment capable of stabling 30,000 horses and mules. An interurban railway system with ample yardage encircles the grounds. A hospital covering 62 acres of ground and fire stations, swimming pools and shower baths by the thousand. To attempt to retore it to farms again looks like an endless task. A fine paved highway connects the camp with the city of Des Moines, some twelve or fifteen miles distant. There are over 2,000 buildings, all provided with suitabe plumbing and water connections. Des Moines was selected as the site of an army camp on May 17, 1917, and early in June work on Camp Dodge started. Four thousand men, with a weekly payroll totaling more than $100,000, were employed. Work on the camp was completed about Oct. 1, 1917. It cost the government $9,000,000 and the impresion is that less than one million will take it when it is put up at auction.

RUSH IS HALTED

Mounted Police Bar People From New Oil "Strike."

Vancover, B. C., Dec. 13.—A squadron of Northwest Mounted Police, fur-clad and patrolling on snow shoes, is holding back frenzied oil prospectors at Ft. McMurray to prevent them from risking their lives on the 1000-mile trail to the fabulous field opened up at Ft. Norman by the Imeprial Oil Co.

A reputition of the Yukon gold rush, in which many lives were sacrificed, is feared by the mounted police and by officials of the Hudson Bay Co., and Northern Trading Co., Ltd., whose trading posts are the only white settlements along the Peace and Mackenzie rivers leading to the rich oil strike.

Last winter concluded a period of such prosperity for the Indian trappers that they have neglected to accumulate the usual store of winter food and famine certainly would attend any influx of fortune hunters.

The Ft. Norman gusher not only tops what is believed to be vast reservoirs of oil, but the product is of higher grade than any hitherto discovered in Canada. There are about 20 whites at the scene of this strike and claims have been staked for 15 miles up and down stream from the big find.

BANDITS INTERRUPT CORWITH CRAP GAME; MAN SHOT IN HAND

Algona Advance—Reports from time to time in the Hustler indicate that Corwith, among many excellent people, possesses an undesirable class of citizens, including crap shootres, patrons of soiled women, moonshiners etc. But the latest stunt down there is a hold-up, and the victims were crapshooters in a beet shack at a point where a new bridge is being built over the Boone river. There were three hold-up artists, and they did not use gentle methods, but discharged their guns carelessly, and even shot one victim through the hand.

HANCOCK TREASURER BUYS MILLER BANK; IN OFFICE SIX YEARS

Miller—The bank owned and operated the past 18 years by F. L. Miller will pass into the hands of Thomas H. Thompson on Jan. 1. At this date Mr. Thompson will complete six years of service as treasurer of Hancock county. Before his election to this office Mr. Thompson served as postmaster at Kanawha and previous to that time he was a farmer in the vicinity of Knawha.

Mr. Miller will remain with the bank kuntil March 1 and will continue his residence at Miller, where his holdings will occupy his time. Thompson also buys the Miller residence and farm. The Thompson family will remain in Garner until the close of the school year for the benefit of their children.

Perfect Philosophy.

And as for me, let what will come, I can receive no damage from it, unless I think it a calamity; and it is in my power to think it none, if I so decide.—Marcus Aurelius.

Patented Curves.

The curved edges of the violin are patented by a North Carolina inventor the form being said to improve the tone of the instrument.

Notice to Automobile Owners.

Notice is hereby given that the Automobile Licenses for 1921 are now due. Penalty attaches January 1st, 1921.

Application cards can be procured at the banks, garages or at the County treasurer's office.

Auto license fees are the same as 1920. If you send your application by mail, remit by draft or cashier's checks. Personal checks will not be accepted unless cetified to by bank drawn on.

THOS. H. THOMPSON,
County Treasurer.

HIGH SCHOOL PARTY

The students of the Klemme schools held a farewell party at the Idle Hour Theatre last Friday evening in honor of the high school teacher, Miss Belken, who resigned her position to take a better paid position in another school. Games were enjoyed thruout the evening and a light refreshment was served later. The students presented Miss Belken with a beautiful handbag as a token of their remembrance.

ADVERTISEMENT FOR BIDS

Sealed bids on Bridge Lumber will be received at the office of the County Auditor of Hancock County, Iowa, until 1:00 o'clock p. m., Jan. 4th, 1921 and will be opened at that time.

A certified check of five cent (5) of the bid made payable to the County Auditor should be filed with each bid, which in case of the bidder or bidders receiving the ward, should he fail to execute a contract and file a bond with ten (10) days after the acceptance of his bid, shall be forfeited to the county as liquidated damages.

All bids must be sealed and plainly marked. No bids will be considered which contains a clause in which the contractor reserves the right to accept or reject a contract awarded him.

The successful bidder will be required to furnish a bond for twenty-five per cent (25) of the amount of the contract, issued by responsible security, approved by the Board of Supervisors, and drawn to protect the county and any subcontractor.

All bids and materials must comply with the State Highway Commission Standard Sepcifications now in effect.

Bid to deliver in car lots at any railroad point in the County.

Ability to make prompt shipments and delivery will be considered in the bid.

The county reserves the right to reject all bids.

Payment will be made in warrants drawn against the Bridge fund of Hancock County, warrants to be cashed on presentation.

Tenders will be received on the following item:

2 cars Bridge Lumber.

Chris Jacobs,
County Auditor.

THE DISTRICT COURT

Thus far this term of court has been uneventful. Equity matter have occupied the attention of Judge J. J. Clark. Wednesday the Court's attention was given to the hearing of the case of James Dillon, Executor of the Estate of Daniel Jolly vs. H. O. Chmbers. Eight cases have been labeled "For Trial," but they cannot all be heard at this term. The petit jury has been summoned to appear at 1:30 o'clock today, (Thursday). The criminal docket is a lonely looking affair. Only one action is docketed—State vs. E. L. Spear, the alleged bigamist. Thirty-eight new cases are listed, and in the probate division there are eleven entries. The term is scheduled for three weeks. If adjournment is taken on time, it will be all out and over by Saturday of next week.—Garner Democrat.

YOUTH FOUND DEAD AT BELMOND PLANT

Third Fatal Accident This Season at Sugar Factory in Wright County

Belmond, Ia. Dec. 17.—The third fatal accident at the Iowa Valley Sugar company, occurred yesterday resulting in the death of Henry Lieuwen, oldest son of Mr. and Mrs. Samuel J. Lieuwen of this city.

No particulars of the cause of his death are immediately available, from the fact, that he was found dead, hi shead being crushed, through some gearing against which it is assumed he was accidently thrown by a large belt.

He was a fine young fellow, with an excelent promise and doing his bit to get to the front.

The sympathy of the entire community goes out to this father and mother in this sad hour, so suddenly occassioned, in the loss of a beloved son.

WILES SELLS GARAGE TO HENRY BEIER

C. W. Wiles and Henry Beier completed a deal last week whereby Mr. Wiles sold his building and garage business on Main Street to Henry Beier, farmer of this community. Mr. Beier takes possession of the business on January first. We understand his son Carl will take charge of the business as he is an expert mechanic. Mr. Wiles has been in the automobile business in Klemme for a number of years and has enjoyed a good business. The building which he now occupies was built only about two years ago and is one of the best garages in this part of the state. We wish both the old and the new firms the best of success and cordially welcome the new firm into the Klemme business circle.

COMRADES OF PERIL

By RANDALL PARRISH

COPYRIGHT A.C.McCLURG & CO.

"INDIAN JOE!"

Synopsis.—Tom Shelby, a rancher, rides into the frontier town of Ponca, looking for a good time after a long spell of hard work and loneliness on the ranch. Instead, he runs into a funeral—that of Dad Calkins, a retired army man of whom little is known. A girl, still in her teens, survives Calkins. McCarthy, a saloon keeper and Ponca's leading citizen, decides that the girl, now alone in the world, should marry. She agrees to pick out a husband from the score of men lined up in her home. To his consternation, she selects Shelby, who had gone along merely as a spectator. He declines the honor. Indignant, the girl dismisses the assemblage. Shelby runs into two of the rejected suitors, and in a fight worsts them both. Angered at their remarks, he returns to the girl, determined to marry her, if she will have him. After his explanation she agrees to marry him. The wedding takes place and the couple set out for Shelby's ranch. With them is "Kid" Macklin, whom Shelby has hired as a helper. On the way the girl tells her husband her name is Olga Carlyn, and also tells him something of the peculiar circumstances of her life. Upon arrival at the ranch Shelby is struck down from behind and left for dead. He recovers consciousness to find that Macklin and his wife have gone. He starts in pursuit. He learns his wife is an heiress, that her abduction has been carefully planned and that she has been taken to Wolves' Hole, a stronghold of bandits and bad Indians.

CHAPTER VIII—Continued.

—7—

Shelby visioned all this in his memory, questioning his chance of ever successfully invading such a spot without arousing suspicion. It was plainly proven by their testimony that Macklin was taking his captive to this spot for safe hiding. He and his Indian accessories had ridden on, anxious to reach this security with as little delay as possible. But would Shelby dare to follow? To be sure, except to the Kid, he was unknown, which might make him welcome. Yet the danger of detection was great.

Apparently, there was no other feasible way in which he could hope to serve Olga. He weighed this, with no conscious thought of himself, coldly and deliberately counting the chances, and decided to make the attempt.

Convinced as to his duty, and urged to it by the personal interest he felt in the girl, Shelby cast all hesitancy aside. He would make the attempt; fortune had surely favored him thus far, and might again. He went back to where the buckskin waited, mounted the animal, quiet enough by this time, rode down to the edge of the stream, and sat silently in the saddle while the beast drank. It was a dark, clear night, the stars overhead like lamps in the sky, the air cool and fresh. He turned the pony up the valley, making no effort to hurry the animal, desirous only at present of keeping well in the rear of the two horsemen ahead. He knew the course they would take, must take, up the valley of the Dragoon as far as the great bend, and then across the plateau until they reached the Cottonwood. He would simply follow cautiously until daylight, then search for the trail to make sure, and endeavor, from some elevation, to pick them up with his field glasses.

The grass in the valley was thick, but not long. It presented no obstacle to travel, but the horse's hoofs made no noise. Finding the rider undemonstrative, the buckskin lowered his head and moved forward steadily at a rapid walk, Shelby swaying in the saddle, half asleep, yet keenly awake to any unusual sound.

Hour after hour passed, the valley narrowing as they advanced, the hills on either hand growing darker and more sharply defined, and the ribbon of the sky above constantly contrasting. The man endeavored to think, but found it useless; there was little he could plan in advance—only continue on and trust to fortune. His mind leaped from point to point, yet settled upon nothing. He knew where he was in a vague way, recalling to memory the outlines of this country as traced upon the map, but by this time he was well beyond the range of his own cattle, or any region he had ever hunted over. All about stretched the desert of the Bad Lands; he could picture in his mind the scene presented from those bluffs, either of broken, rocky country, or dismal desert, white with alkali. It was a land devoid even of animal or bird life, waterless and forlorn, avoided even by Indians except for concealment. In all those hours of darkness he heard no sound of life except the distant howl of a coyote.

The first faint gray of dawn gave him glimpse of his surroundings, and, on a slight ridge of land, he finally drew up his tired mount, and gazed curiously about. He dismounted, and, after a few moments' scrutiny of the ground, decided that he was still safely on the trail of those traveling ahead. There were two traces sufficiently defined to indicate the passage within a few hours of both Macklin's party, and the two others. Neither outfit had made any effort at concealment, but Shelby, fearing the latter might be camped for breakfast, left his horse to crop on the short grass, while he advanced on foot. The trail was obscure, but not difficult to follow when once discovered. Hanley and his companion had not ventured the passage until dawn, the marks of their horses' hoofs so fresh as to convince their trailer they were scarcely beyond the sound of his voice. He even found where they had dismounted, waiting for daylight, the ground littered with the ends of burnt cigarettes.

Shelby loitered an hour before venturing to follow. There was no other way out, and so he munched at a cold meal, and permitted the buckskin to browse along the bank of the stream, well concealed by a fringe of willows. Then, both horse and man refreshed, he went forward on foot, leading the animal, and began the upward climb. In places it was not unlike a cave, and Shelby had no idea how far he had gone, when he suddenly emerged out from the gloom into the sunlight of the summit, with a clear view across the level plateau.

Shelby stopped, holding the horse back below the summit and gazed anxiously about. The soil left no trail and, with the naked eye, Shelby was unable to distinguish a sign of life within the radius of vision. Everything had the appearance of death—the death of ages. He stood upright and swept the circle with his field glasses. He was barely in time; for far off there to the left, scarcely discernible even then against the black, overhanging ridges of rock, he made out two slowly moving objects. They were not distinct, he could not have sworn what they were, but there was no doubt in his mind as to their identity. He studied them eagerly until they disappeared down a coulee, and then carefuly marked the course, his point of guidance a high pinnacle of rock standing out against the sky.

He was an hour reaching this objective, but once there he found the trail plainly traced along the edge of the bank. It led in and out amid the intricacies of the hills, taking, of necessity, so winding a course as to give Shelby no view ahead and soon confused him in point of direction. He could only move forward cautiously, fearful lest they might have halted for some purpose, and watchful of every trace of their passage, as other ravines were constantly uniting with this through which he was blindly feeling his way. He came to sand and lost all signs of the trail instantly, searching for it in vain for nearly an hour before confessing himself at fault. Then, leaving the horse below, he climbed the nearest hill for a view of his surroundings.

He Suddenly Emerged Out From the Gloom.

The sun gave him the proper directions, but all about stretched the same dreary, bare ridges of rock, offering no guidance. There was no life visible anywhere and although he waited for some time, sweeping his glasses back and forth, he gained no glimpse of the two he endeavored to follow. They had vanished as though swallowed up by the earth. The sun was already in the west and desperately he determined to try the level. Even this, amid the intricacies of those branching passages between the round hills, was difficult to achieve, yet he finally discovered an exit and ventured toward the north, confident that the Cottonwood would surely lie somewhere in that direction.

He came upon it so suddenly and unexpectedly as to almost daze his faculties. Almost without warning he stood at the very edge of a yawning hole and stared in amazement down into those depths below. Again and again he had heard this scene described, yet had never before comprehended its reality. A huge cut straight down, fully a mile wide, cleft the plain in two, with no visible signs of its presence until one stood at the very crater's edge. At night he would have ridden off without the slightest warning of danger. And below! Feeling sick, dizzy, Shelby swung himself from the saddle, crept cautiously to the edge and looked down. He had no conception of the depth, for it already was hazy down there, as though he gazed through a blue fog, but how small those trees appeared, mere toy trees, and the silvery stream running through the center seemed scarcely a yard wide. A yard, why, if it was actually the Cottonwood, it must be a hundred feet from bank to bank! God! What a hole! What a freak of nature! What a wilderness hiding place!

He lay motionless, with eyes searching up and down the valley. To the right he could not determine how far it extended, but to the left he could discern the silver shield of water where the Cottonwood came tumbling over a precipice. One of the two possible entrances was there; the other must be along some one of those numerous side ravines, whose black entrances he could dimly perceive. It was all so serene, so peaceful, the truth seemed impossible—that he was actually gazing down into a veritable hell on earth, a rendezvous of white thieves and Indian murderers, a border fortress for all the nameless devilry of the frontier.

And he must invade the Hole, alone, if he would be of service to this woman captive! By sheer recklessness he must pierce the thing to the heart. Yet how was it to be done? Not even a mountain goat could find passage down those rocks even by daylight and in another hour all would be darkness. He could not remain there; before night made the search impossible he must at least find water and a place in which to camp. He stared down into those deepening mists below, already beginning to blot out the features of the valley.

"God, what a hole," he breathed; "it is like looking straight into hell. The only way down must be somewhere to the left. Case told me they passed in under that waterfall."

He got to his feet, with the pony trailing behind, moved backward away from the edge of the chasm into the open plain. Suddenly, as his glance wandered searchingly toward the chain of rock hills, the man stopped, his heart pounding. What was that moving yonder, just emerging from out the mouth of that ravine and becoming clearly outlined against the gray alkali? He knew almost instantly—the advance of a drove of cattle, debouching through the narrow defile and spreading out as they attained the wider open space. There must be a hundred head and even as he comprehended, horsemen appeared in their rear, spurring forward to turn them to the left down a shallow gulch.

There was no way he could escape observation; no possibility of hiding on that bare plain. Shelby's brain worked like lightning. There were five riders; he could count them now; Indians mostly, although one was surely white. There was nothing left him but audacity and lies. He must take the chance, the one chance, mad, desperate, yet yielding a possibility of success. He swung the field glasses to his eyes—yes, one rider was white, a squat figure with a red beard, and another, the fellow at this end, appeared to be a Mexican. Then he laughed grimly; the vortex of his glass rested on the exposed flank of the nearest steer and he saw the brand. By all the gods, they were his own cattle! The humor of it flashed in his eyes, but the jaw of the man set sternly. The d——d thieves! He strode forward, the pony trailing at his heels, and then the Mexican saw him, throwing up one hand in a swift signal and spurring his horse recklessly across the gray plain. They met half way, Shelby still afoot, the other sweeping up at full speed, his horse brought fairly to its haunches by the cruel pressure of a Spanish bit.

The fellow was a handsome devil but for the evil in his eyes and a disfiguring scar down one cheek. The eyes of the two met and the rider's hand dropped instantly upon the exposed butt of a revolver.

"Buenas dias, senor," he said harshly, staring. "What is the meaning of —this?"

Shelby smiled, coolly returning his glance.

"The meaning of what, senor?" he questioned shortly.

"Your being here—alone! I have not seen you before. You are not of the Wolves' den."

"Oh, is that it, senor?" indifferently. "Then maybe you will tell me how I am to find a way into this den of wolves? I have looked down yonder," he waved his hand.

"You seek it, then?"

"Sure; otherwise why should I be here? You will guide me?"

"Caramba! It depends," suspiciously, yet somewhat disconcerted by the other's quiet manner. "I would know more first. You are lost?"

"Completely; yet it is a story easily told. I was with a man named Hanley an' a fellow called Hank."

"Old Matt—I know him."

"Good; then I have met a friend. We were there, back in those hills, when my girth broke—see, where I have fixed it. I fell behind and they rode on. I thought to follow easily, but, you must know those hills, the trail was lost; perhaps I took a wrong turn, for suddenly I found myself on this plain."

The Mexican sat motionless, his eyes as suspicious as ever, but his fingers no longer gripped on the revolver. The last of the cattle had disappeared down the coulee and the red-bearded white man was riding toward them across the alkali. Neither changed position until he came up, a lump of a fellow, with staring eyes and complexion the color of parchment.

"What the h—l is all this, Juan?" he questioned roughly. "Who is the fellow?"

"He travel with Matt Hanley an' get lost; so he say."

"Hanley, hey! That's some recommendation. Who else was with your party?"

"A man called Hank."

"Slagin. Well, the story sounds straight so far; them two left here

"You Are Not of the Wolves' Den."

together; I happen to know that. What's your name?"

Shelby looked him squarely in the eye.

"Churchill."

"What! Matt talked to me about that. Fellow named Macklin stalkin' a girl down Ponca way."

"He's got her; so Hanley says, an' that's what I'm here for—see?"

"But you ain't Ol' Churchill. The way I heard it he was sixty anyhow, an' a down-easter."

"Virginia; he's my father."

"Oh, h—l, an' where you been?"

"Soldierin' mostly."

"I see," his eyes wandered. "Sounds kinder fishy, young feller, but I ain't in no shape to tell. I reckon Matt Hanley kin straighten it out, an' if he is down thar, the best thing we kin do is to take yer 'long. If yer lyin' ye'll be d—n sorry 'fore yer get out ag'in. I'll tell yer that to begin with, but if yer game to ride along, we'll see yer get thar all right. Let's hit her up, Juan; them Injuns will need us 'fore long. Come on, stranger."

He wheeled his horse and rode off on a sharp trot and the Mexican followed. Neither man so much as glanced back toward Shelby, seemingly indifferent as to what he chose to do. Yet he knew the customs of the West and that if he failed them now no future falsehood would ever regain their confidence. He swung into the saddle and rode silently forward behind Juan. The cattle were still out of sight ahead, but they could hear the calls of the drivers. Shelby pressed his bronco up closer to the Mexican, who had lit a cigarette.

"Is it far, Juan?" he asked.

"Nom de Dios! I heard you not. To the Hole you mean? Not far, but rough, senor; yet there is no other way to get cattle in."

"The man with you; who is he?"

Juan emitted a cloud of blue smoke in the air, smiling pleasantly.

"Senor Laud."

"Laud!" in undisguised astonishment. "What Laud? Not 'Indian Joe'?"

"Si, senor; they call heem that," confidently. "He verra bad man. You know heem, what?"

Shelby gripped himself tightly.

"I've heard of him, that's all. He's a Sioux squawman, but I never knew what he looked like before."

His pony, no longer urged, fell back, trailing at the rear of the others. Juan rode on, unconscious and indifferent, blowing spirals of smoke into the air, and humming the strain of some Spanish melody, but Shelby was staring beyond him at the red-bearded white man slouched down in his saddle. So that fellow was "Indian Joe" Laud! As never before he realized to the full the danger into which he advanced.

"Indian Joe" Laud! When hadn't he heard of him? For years certainly, ever since he had been in this north country, yet in appearance the fellow was not at all what he previously had imagined that desperado to be. Laud was gross, bearded, dirty, coarse-featured; to all appearances a mere barroom tough, yet no man on the frontier had a worse record or was more dreaded and despised. Why was he here stealing cattle on the very verge of Indian war? True, he was not a Sioux in blood, yet it was well known that he had been adopted into the tribe and never failed to have a hand in their deviltry. Army officers claimed he possessed more influence over them for evil than any chief, and Shelby had heard him mentioned with Sitting Bull as leaders in the ghost-dance. If true, then he must know how far to venture, and just when to draw aside so as to save himself. That must be it—to him war meant only an opportunity to plunder. The final result was clearly Indian defeat; he would keep out, but in the meanwhile profit all he could.

The trail led downward at a rather steep grade, in spite of continual curving. The sure-footed horses moved faster than the cattle, and before the outfit reached the level of the valley the three riders had closed in on the Indian drivers. Shelby knew them at once as young Sioux warriors, and was again able to distinguish plainly the brand on the flank of the steers bringing up the rear of the herd. They were unquestionably his own stock, and, in spite of his rage, he could not be entirely indifferent to the grim humor of the situation—he was being guided into Wolves' hole by the very men who had robbed him.

Yet his thoughts did not dwell upon this so much just then, as on the mad chance he had assumed in this adventure. What could he accomplish? What hope was there that he would ever emerge again alive? He was going forward blindly, led by fate, with not even a plan of guidance. He must work alone, in the midst of enemies, desperate men to whom human life was valueless, and where any incautious word or act would instantly expose him to discovery. In spite of the fact that he was believed dead, Macklin would recognize him at a glance, and the very claim that he was a friend of Hanley's exposed him to discovery. In some way he must avoid them both, and yet no plan presented itself to promise escape. He could only drift helplessly, becoming more despondent of success with every step of advance.

It was already dusk when they attained the level of the valley, and the overshadowing bluffs rose high on either hand, leaving them plodding through the gloom. Yet even here they had not attained the full depression of the Hole, which required another sharp descent along the border of the stream, where a ledge of rock had evidently been blasted out. This passage abruptly ended in a wide, stone causeway, turning sharply to the left, and running beneath a waterfall, where the broad stream leaped over a ledge of high rock. It was a task to get the cattle through, yet once started, they plunged forward, following each other with fright, never pausing until they scattered out over the plain below.

Laud drew up his horse in front of a small log structure, so concealed at the edge of a straggly grove, that, in the gloom, Shelby was not even aware of its existence until voices greeted them.

"Back again, Joe! Where'd yer pick up that bunch?"

"Up on the Cottonwood; easy pickin'," and Laud flung one leg over his saddle in a posture of rest. "Where's Kelly? Oh, Dan; bring me out a drink. Anything new?"

The tall, raw-boned frontiersman who responded, puffed at his pipe, and out through the open door of the cabin there suddenly streamed a light revealing his features, and the indistinct outlines of others idling near by.

"Well, not much, Joe," he answered drawlingly, "most o' the Injuns have struck out; ain't mor'n a dozen bucks left, I reckon. They tell me they're raisin' h—l already over Ponca way; maybe yer heard about it?"

Laud nodded, wiping his lips with the back of his hand. "Whar's Matt Hanley?"

"Oh, he an' Slagin cum' in 'bout five hours ago, I reckon, an' went on up to the cove."

"Have enything with 'em?"

"Not thet I see—they didn't, did they, Jim?—just travelin' light."

"Didn't say enything about another gazabo?"

"Not that I know about. They acted like they was both plum tired out, and wanted ter go asleep. Just took a drink apiece, and mosied along."

Laud let fall an oath.

"All right then, but d——d if I'll ride down to the cove tonight. We'll go up to your shack, Juan, and bunk down. Come on, both o' yer."

"Because you are a woman, I guess, and because I think you are straight."

(TO BE CONTINUED.)

Bower-Bird's Wooing.

A cynical method of enticing a hesitating partner into the bonds of matrimony is furnished by the bower-bird, which builds a structure of sticks formed into a kind of passage or avenue and beautifully ornamented with feathers and shells. On its completion the would-be bridegroom brings the bird of his choice to inspect his fine establishment and entices her to share it.

Queer Cradles for Babies.

An infant in Guiana is usually buried in sand up to its waist whenever the mother is busy, and this is the only cradle it ever knows. The little Lapp on the other hand, fares most luxuriously in its mother's shoe. These Lapp shoes are big affairs of skin stuffed with soft moss, and can be hung on a peg or tree branch safely out of the way.

Bacchus kills more than Mars.—German proverb.

Baker's Cocoa is for Robust Men

and all who must have a great deal of tissue building material to repair the waste caused by physical and mental labor. It is delicious, pure and wholesome, and is made by a perfect mechanical process, without the use of chemicals, so preserving the exquisite flavor, aroma and color of the high grade cocoa beans.

He Took the House.

Mr. Flatbush—I was looking at a house on Pleasant avenue today.

Mrs. Flatbush—Good! And can you get it.

"Why, yes; I took it."

"Splendid, Henry! Does it look better than our present habitation?"

"I'm afraid it won't to you, dear. I took it with my camera."

Important to all Women Readers of this Paper

Thousands upon thousands of women have kidney or bladder trouble and never suspect it.

Women's complaints often prove to be nothing else but kidney trouble, or the *result* of kidney or bladder disease.

If the kidneys are not in a healthy condition, they may cause the other organs to become diseased.

You may suffer pain in the back, headache and loss of ambition.

Poor health makes you nervous, irritable and may be despondent; it makes any one so.

But hundreds of women claim that Dr. Kilmer's Swamp-Root, by restoring health to the kidneys, proved to be just the remedy needed to overcome such conditions.

Many send for a sample bottle to see what Swamp-Root, the great kidney, liver and bladder medicine, will do for them. By enclosing ten cents to Dr. Kilmer & Co., Binghamton, N. Y., you may receive sample size bottle by Parcel Post. You can purchase medium and large size bottles at all drug stores.—Adv.

Looked Like Proof.

Mr. Crimsonbeak—You know, whisky is a medicine.

Mrs. Crimsonbeak—I can't believe it.

"Why can't you?"

"Because you never make a face when you're taking it, and if it was a medicine you couldn't help making a face."

MOST EXCELLENT FOR FORAGE

Most Serious Disadvantage as Pasture or Soiling Crop Is Danger of Prussic Acid Poisoning—Cultivated Rows Best.

The growing of sorghum for forage in this country has increased until the 1918 crop amounted to more than 5,000,000 acres, according to Farmers' Bulletin 1158, just issued by the United States Department of Agriculture. Most of this acreage was located in the southeastern states and in the southern half of the great plains.

Useful Hay Crop.

Sorghum is most useful as a hay crop in the southern states because of its certainty of producing a crop and on account of the failure of ordinary hay crops, such as timothy and alfalfa, in that section. Both the sweet sorghums and the grain sorghums are excellent silage crops. The department advises that stockmen in the great plains area can avoid the loss of thousands of cattle by feeding sorghum silage which has been stored at a small expense in pit silos.

The principal varieties of the sweet sorghum, considered from a forage standpoint, are the Minnesota Amber, Red Amber, Orange, Sumac, Honey and Gooseneck. The grain sorghums most valuable for forage are the Blackhull, Red, Pink and Dwarf kafirs.

One Serious Disadvantage.

The most serious disadvantage in the use of sorghums as a pasture or soiling crop is the danger of prussic-acid poisoning. Almost every farmer who has grown sorghum as a farm

Harvesting Sweet Sorghum for Sirup Making.

crop knows that it is dangerous to allow cattle to eat even a small quantity of green sorghum before it has matured. The wild animals of Africa are said to avoid sorghum instinctively while it is young, refusing to eat it until it has ripened; but domestic animals in America show no such intuition. No sure remedy for prussic-acid poisoning has been found. Doses of glucose (corn sirup) or large quantities of milk will prove beneficial if given in time. Less trouble is experienced in the southern states than in those farther north.

Sorghum yields about equally well whether planted in close drills or rows 40 inches apart, the department finds; but the cultivated rows are most dependable in seasons of low rainfall.

SHORT LIFE OF FARM TOOLS

Farmer Must Stand Pretty High Acre Charge on Most of His Labor-Saving Devices.

The life of farm tools is short at the best and if a tool is given shelter its life depends upon the number of acres it has covered. If the tool is left out all winter its life is not dependent upon the number of acres it covers but upon how long it can resist the elements. It may be interesting to know the average life of some common tools. A manure spreader is useful, on the average, eight years; the sulky plow is good for twelve years of hard work, while the average life of mowing machines, side delivery rakes and gas engines is twelve years. If a person will take the first cost and then add on to it the interest on the investment and annual depreciation, taxes, etc., then divide this sum by the number of acres he has used it over, in most cases he will find that he has a pretty high acre charge on most of the tools he keeps. Grain binders will show an acre charge of about sixty cents; grain drills twenty-six cents; corn planters twenty-two cents; hay loaders seventy-five cents and disk harrows forty-five cents.

OVERCOME CHESTNUT BLIGHT

Hybrid Trees Are Quite Resistant to Disease and Produce Nuts of Good Flavor.

Chestnut orchards which have been practically annihilated by a blight of Japanese origin may be restored through efforts of the United States Department of Agriculture. Ten years' experimentation has shown that it is possible to cross the chinquapin, a dwarf chestnut, with the Japanese chestnut, which is blight resistant, and that the hybrid trees thus produced are quite resistant to the disease and yield nuts of good flavor and quality.

CHOICE OF SOURCES OF POWER FOR FARM

Should Farmer Substitute Tractor for His Horses?

Reliable Information Is Necessary Before Questions Can Be Accurately Answered—Suggestions Made in Bulletin.

With the introduction of practical types of mechanical power on farms the farmer must face the question of whether he should substitute the tractor for some of his horses. If he decides to introduce the tractor he must determine what combination of horse and mechanical power will be the most profitable on his particular farm. To answer these questions accurately requires reliable information as to all the facts involved.

The choice of sources of farm power depends upon their relative profitable-

This Farmer Has Solved the Tractor-Horse Problem.

ness. To determine which is the more profitable it is necessary to consider many facts, among which are the power requirements of the farm, the size of the power units required, the quality of work to be accomplished, the displacement of one form of power by the application of another, the total possible utilization of each form of power, the comparative cost of operations with the different forms of power, the relation between the kind of power and the effectiveness of farm labor, and the effect upon the profits of the farm as a whole.

The United States Department of Agriculture has made a study of power units on a number of representative farms with a view to showing how the various farm operations create demands for different-sized power units, and to what extent power requirements are influenced by the type of farming. The results of this study, summarized in a publication entitled "The Horse Power Problem on the Farm," will be found of value to the farmer who is contemplating a change in the form of power used on his farm.

WAYS OF DISTRIBUTION

"To teach the farmer the best methods of increasing production is exceedingly important, but not more vitally so than the importance of teaching him the best and most economical methods of distribution. It is not enough to teach him how to grow bigger crops. He must be taught to get the true value for these bigger crops, else congress will be put in the attitude of regarding the work of the farmer as a kind of philanthropy."
—Ashbury F. Lever.

GROW SUNFLOWER FOR FEED

Practice Encouraged by North Dakota Agricultural College—Good Yields Are Reported.

A demonstration plot of sunflowers near Carson, Grant county, North Dakota, yielded 13 tons of fodder to the acre, while an adjoining field of corn yielded only three tons, according to R. C. Newcomer, agricultural agent in that county. Growing of sunflowers for fodder has been generally encouraged in the state by the extension division at the agricultural college, and many good reports of yields are coming in from various parts of the state.

PLENTY OF WORK FOR "HAND"

Much Time Can Be Saved in Spring by Building Fences, Making Singletrees, Etc.

If you have a good "hand," find work about the farm for him this winter. Build fences when possible, make panels for the hog lots, extra singletrees, doubletrees and special eveners so that you can save time next spring.

NO EXCUSE FOR SCRUB CORN

Never Stationary in Quality, Either Improves or Retrogrades, Says Specialist.

Corn is never stationary in quality. It either improves or retrogrades, says a United States Department of Agriculture specialist. There is no more excuse for farmers raising scrub corn than scrub cattle.

DAIRY POINTS

GREATER USE OF PUREBREDS

By Fractional Ownership of Bulls Indiana Dairymen Get Benefit of Such Sires.

In Harrison county, Ind., where the "Better Sires — Better Stock" movement is gaining headway, dairymen are making wide use of good, purebred bulls in an economical manner. By fractional ownership of the bulls they receive the benefit of such sires without incurring the entire purchase cost. In one day recently the United States Department of Agriculture received statements from three dairymen in Harrison county, all of whom follow the practice mentioned. The advantage of a choice of several sires is the wider opportunity to make desirable matings, thus hastening progress in grading up a herd.

In many other localities dairymen are combining their forces, sometimes with the object of testing bulls before sending them to the block, sometimes to save expense, and sometimes to give local predominance to one breed or another. An informal combination of this sort is often highly useful.

This is not the same thing as a bull association. The co-operative bull association is an institution designed to accomplish these and many other objects, on a large scale, by a form of organization which has been extensive-

Antoinette's Itchen Rose King, $15,000 Guernsey Bull Owned by Rowan County, N. C., Bull Association.

ly tried and perfected by experience. It is recommended by the department that farmers should give consideration to the benefits they can secure for themselves by a closer and more effective union of interests in a properly organized bull association.

CUT DOWN BIG MILK LOSSES

Marked Effect Upon Prices That the Ultimate Consumer Must Pay for the Product.

To develop better methods for handling and shipping milk from the farms to the city market is the object of an investigation of practices in various milk plants, which is being made by the dairy division of the United States Department of Agriculture. Milk losses during shipment have a marked effect upon the price that the consumer must pay for the product, and upon the price that the farmer receives for the product. The losses are of two kinds; those resulting from milk souring in transit, and those from theft, spoilage and leakage. Both are believed to be avoidable if the farmer, country dealer and city dealer will work together.

Dealers are being asked to give information on various subjects, such as the methods used for transporting milk from the farm to the dealer, the protection provided for milk while in transit between dealer and the city market, and the relative efficiency of different types of refrigerator cars.

IMPORTANCE OF DAIRY BARN

Many Failures Have Been Recorded Because of Poor Structures—Building Cost High.

The dairy barn is more than ever one of the principal factors in dairy farm operation. In many instances dairies have failed or succeeded because of the barn. This year probably there is more thought given to barn construction than ever before. This is because dairymen, farmers and breeders have come to realize the importance of the barn and because the cost of building has mounted so high.

HAY IS ESSENTIAL TO CALF

Roughage Keeps Stomach of Animal Distended and Allows Food to Be Digested.

Milk is very satisfactory to furnish food during the early stages of the calf's life, but it is the roughage that keeps the stomach distended and allows the food to be digested. When a calf is deprived of hay, it will not do its best in growth. Hay is an essential to the young animal and should always be available.

HIGH-PRICED LAND POSSIBLE

Dairying Keeps Up Fertility of Soil and Makes Larger Yields of Various Crops.

Dairying makes high priced land possible. Striking as this statement may seem it is proved by the fact that dairying keeps up the fertility of the soil and makes high yields possible. High yields show that the land is able to earn a satisfactory income on a high valuation.

Stop the Pain.

HAD ANOTHER SHOCK COMING

Modern Young Woman Able to Promise Auntie a Further Surprise for the Coming Evening.

"Young girls nowadays," said Miss Mary G. Kilbreth, the well-known anti-suffragette, "are flippant and totally indifferent to the opinions of their elders. Woman suffrage is to blame.

"On a bathing beach last summer a beautiful young girl appeared in a bathing suit that was extremely daring.

"Her aunt approached her as she was swaggering in this costume beside the water's edge and remonstrated with her.

"'Sylvia,' said the aunt, 'I consider that costume absolutely shocking.'

"'Oh, you do, do you?' the girl replied indifferently. 'Well, wait till you see me in my new evening gown.'"

Reason for Gratitude.

Little Edna was visiting the museum with her aunt. In the Egyptian room the child saw the desiccated remains of an ancient queen and asked what it was.

"That is someone's mummy, dear," replied auntie.

"Goodness!" said Edna. "I'm glad my mummy doesn't look like that."—Boston Transcript.

This world has no very high opinion of a low-salaried man.

ALASKA APPEALS TO YOUTH

Newspaper in Great Northern Territory Promises Fortune to the Young and Adventurous.

The sage advice of Greeley was never more applicable than it is today in Alaska, observes the Alaska Capital. What the country needs is the optimism of youth, coupled with an adherence to the advice of Doctor Kilgor of Trinity college, North Carolina, when he said: "Young men, the sages will tell you to be prudent; prudence belongs to the daring of youth—the spirit of adventure that will develop individuality."

Reduce this philosophy to Alaskan terms, and we find that the territory just now needs youth to finish the structure upon the foundation laid by those wonderful pioneers whom we reverence and admire. The raw materials are here, materially and ethically all that is needed is for the next generation succeeding the pioneers to step into the trails blazed for them and finish the job.

BOTH PARTIES IN GOOD LUCK

Passengers in Auto and Odoriferous "Pussies" Alike Went on Their Way Rejoicing.

An unusual sight was witnessed last week on the road to Onset. A party of Brocktonians were autoing to Bournehurst and on the road this side of Onset there suddenly appeared a black and white patch. The machine approached the spot at a fast rate and as it drew nearer the mass straightened out into a line across the road. There was a gasp of astonishment—and of dismay, also, for the black-and-white mass proved to be a mother skunk leading four little ones across the street. They were moving very slowly, so slowly indeed that it was impossible to stop the car before it reached them.

Admonitions of "Don't hit them" were not necessary to the driver of the machine, but he was wondering how he was going to miss them. As luck would have it, the mother skunk just then separated herself from the four little ones and the machine passed right over her without harming a hair of the odorous animal.

The passengers, looking back, saw the mother polecat huddled in the road, while her offspring had turned and were streaking it across the highway and over the railway tracks into the friendly bushes. They were right in the path of an approaching trolley car, but negotiated the retreat without a casualty. Probably the unharmed but dazed mother rejoined her little flock later. Had the auto and the skunks met in collision it must have cast a gloom over subsequent proceedings for the car and its cargo.—Brockton Enterprise.

DID SEEM LIKE LAST STRAW

According to Discouraged One There Was About Nothing to Do But "Up and Die."

They were talking of the city government.

"They all work together," one man complained. "First they let the trusts put up the price of coffee and tea till a poor man can't afford to drink 'em any more. Then the milk companies get after us and put milk out of our reach. Then comes prohibition and we can't buy beer at all. Thought the limit was reached then, didn't you?"

"Sure," said the Idle Person, "they haven't thought of anything more to do, have they?"

"But haven't they, though?" bitterly replied the discouraged one. "Don't you read the papers? When there's nothing else left to drink but water, this blasted city government suddenly wakes up and raises the price of water. What chance has a poor man to live, anyhow?"

The Time of Heather.

The moors are purple with heather or—more strictly speaking—with ling, for by this time the real bell-heather is pretty nearly over.

Heathers of different kinds inhabit the high moorlands all the world over, in America, Africa and Asia, as well as in Europe. Our own ling may be seen flourishing in Newfoundland and also in New England.

Most people regard heather simply from the aesthetic standpoint, and never give a thought to its varied uses. But every year there is much cutting of heather for the purpose of broom making. Heather again, is an excellent material for thatching purposes, and properly put on a heather thatch will last a century.—John o' London's Weekly.

Which Stone Is Best?

It is strange that, after all these centuries of building and rebuilding, a recent project in London should set on foot a lively controversy as to what really is the stone which best withstands that city's atmosphere. Perhaps a generation hence the answer will be none, says the London Chronicle, and the re-enforced concrete system now on its trial will have established itself. Portland stone has been claimed generally was that city's most useful building stone, but there are doubters now, and the conclusion seems to be that science alone can counteract the ravages of London's atmosphere by artificial coating of exposed faces of the stone.

Soldier Cashed as a Note.

A soldier presented himself at the commonwealth treasury, Melbourne, Australia, and said: "I am a £20 note and want to be cashed." He stated that he had swallowed the note at Fleurbaix when he expected to be captured. He remembered the number, and the note in question turned out to be the only one missing from a particular issue which had been recalled. The man was given a new note.—Central News.

The Greatest Cotton Sheds.

The largest cotton storage sheds in the world are being erected at Hull, England. These accommodate 50,000 bales at one time under ideal conditions. There are all facilities for inspection of the cotton in the best light and also for removing any particular bales regardless of their position in the pile. This is done by a remarkable piece of mechanism recently invented.

Still to Be Considered.

"Of course you are in favor of women voting."

"I'm in favor of votes for women," replied Mr. Meekton. "But I expect the decision will rest entirely with them as to whether or not they take the trouble to go to the polls."

In Modern Times.

Servant girl (at house phone)—"No Mr. Blaithers ain't in—an' he an' the missus can't come over to your house next Sunday, because I'm going out myself."

The Glory of the Oleanders.

This bright morning we looked from the roof of our veranda, and our neighbor's oleander-trees were glowing like a great crimson cloud; and we said, "There! the oleanders have come back!" No nothern ideas can give the glory of these trees as they raise their heads in this their native land, and seem to be covered with great crimson roses.—Harriet Beecher Stowe.

CONGRESS HEARS WILSON MESSAGE

President Urges That Our Democracy Prove Its Purity and Power to Prevail.

WORLD'S HOPE RESTS IN US

America Must Make and Enforce Laws That Are Unquestionably Just, and Stand for Right and Justice as Toward Individual Nations.

Washington, Dec. 7.—President Wilson's message to congress was read in both houses by the clerks, Mr. Wilson having decided not to deliver it in person. The message in full follows:

Gentlemen of the congress:

When I addressed myself to performing the duty laid upon the President by the Constitution to present to you an annual report of the state of the Union, I found my thought dominated by an immortal sentence of Abraham Lincoln's, "Let us have faith that right makes might, and in that faith let us dare to do our duty as we understand it;" a sentence immortal because it embodies in a form of utter simplicity and purity the essential faith of the nation, the faith in which it was conceived, and the faith in which it has grown to glory and power.

With that faith and the birth of a nation founded upon it came the hope into the world that a new order would prevail throughout the affairs of mankind, an order in which reason and right would take precedence of covetousness and force, and I believe that I express the wish and purpose of every thoughtful American when I say that this sentence marks for us in the plainest manner the part we should play alike in the arrangement of our domestic affairs and in our exercise of influence upon the affairs of the world. By this faith, and by this faith alone, can the world be lifted out of its present confusion and despair. It was this faith which prevailed over the wicked force of Germany. You will remember that the beginning of the end of the war came when the German people found themselves face to face with the conscience of the world, and realized that right was everywhere arrayed against the wrong that their government was attempting to perpetrate. I think, therefore, that it is true to say that this was the faith which won the war. Certainly this is the faith with which our gallant men went into the field and out upon the seas to make sure of victory.

This is the mission upon which democracy came into the world. Democracy is an assertion of the right of the individual to live and to be treated justly as against any attempt on the part of any combination of individuals to make laws which will overburden him or which will destroy his equality among his fellows in the matter of right or privilege, and I think we all realize that the day has come when democracy is being put upon its final test. The old world is just now suffering from a wanton rejection of the principle of democracy and a substitution of the principle of autocracy as asserted in the name but without the authority and sanction of the multitude. This is the time of all others when democracy should prove its purity and its spiritual power to prevail. It is surely the manifest destiny of the United States to lead in the attempt to make this spirit prevail.

Two Things for Us to Do.

There are two ways in which the United States can assist to accomplish this great object. First, by offering the example within her own borders of the will power of democracy to make and enforce laws which are unquestionably just and which are equal in their administration—laws which secure its full right to labor and yet at the same time safeguard the integrity of property, and particularly of that property which is devoted to the development of industry and the increase of the necessary wealth of the world. Second, by standing for right and justice as towards individual nations. The law of democracy is for the protection of the weak and the influence of every democracy in the world should be for the profection of the weak nation, the nation which is struggling toward its right and toward its proper recognition and privilege in the family of nations.

The United States cannot refuse this role of champion without putting the stigma of rejection upon the great and devoted men who brought its government into existence and established it in the face of almost universal opposition and intrigue, even in face of wanton force, as, for example, against the order in council of Great Britain and the arbitrary Napoleonic decrees which involved us in what we know as the war of 1812.

Sample Democracy of World.

I urge you to consider that the display of an immediate disposition on the part of congress to remedy any injustices or evils that may have shown themselves in our national life will afford the most effectual offset to the forces of chaos and tyranny which are playing so disastrous a part in the fortunes of the free peoples of more than one part of the world. The United States is of necessity the sample democracy of the world, and the triumph of democracy depends upon its success.

Recovery from the disturbing and sometimes disastrous effects of the late war has been exceedingly slow on the other side of the water, and has given promise, I venture to say, of early completion only in our own fortunate country; but even with us the recovery halts and is impeded at times, and there are immediate serviceable acts of legislation which, it seems to me, we ought to attempt to assist that recovery and prove the indestructible recuperative force of a great government of the people. One of these is to prove that a great democracy can keep hope as successfully and in as business-like a fashion as any other government. It seems to me that the first step toward proving this is to supply ourselves with a method of handling our estimates and expenditures, and bringing them to the point where they will not be an unnecessary strain upon our income or necessitate unreasonable taxation; in other words, a workable budget system, and I suggest that two elements are essential to such a system—namely, not only that the proposal of appropriations should be in the hands of a single body, such as a single appropriations committee in each house of the congress, but also that this body should be brought into such co-operation with the departments of the government and with the treasury of the United States as would enable it to act upon a complete conspectus of the needs of the government and the resources from which it must draw its income.

I reluctantly vetoed the budget bill passed by the last session of the congress because of a constitutional objection. The house of representatives subsequently modified the bill in order to meet this objection. In the revised form I believe that the bill, coupled with action already taken by the congress to revise its rules and procedure, furnishes the foundations for an effective national budget system. I earnestly hope, therefore, that one of the first steps taken by the present session of the congress will be to pass the budget bill.

Marked Gain in Finances.

The nation's finances have shown marked improvement during the past year. The total ordinary receipts of $6,694,000,000 for the fiscal year 1920 exceeded those for 1919 by $1,542,000,000, while the total net ordinary expenditures decreased from $18,514,000,000 to $6,403,000,000. The gross public debt, which reached its highest point on Aug. 31, 1919, when it was $26,596,000,000, had dropped on Nov. 30, 1920, to $24,175,000,000. There also has been a marked decrease in holdings of government war securities by the banking institutions of the country, as well as the amount of bills held by the federal reserve banks secured by government war obligations.

This fortunate result has relieved the banks and left them freer to finance the needs of agriculture, industry and commerce. It has been due in large part to the reduction of the public debt, especially of the floating debt, but more particularly to the improved distribution of government securities among permanent investors. The cessation of the government's borrowings except through short term certificates of indebtedness has been a matter of great consequence to the people of the country at large, as well as to the holders of Liberty bonds and Victory notes, and has had an important bearing on the matter of effective credit control.

The year has been characterized by the progressive withdrawal of the treasury from the domestic credit market and from a position of dominant influence in that market. The future course will necessarily depend upon the extent to which economies are practiced and upon the burdens placed upon the treasury, as well as upon industrial development and the maintenance of tax receipts at a sufficiently high level.

Big Bond Issue to Mature.

The fundamental fact which at present dominates the government's financial situation is that $7,500,000,000 of its war indebtedness matures within the next two and a half years. Of this amount $2,500,000,000 are floating debt and $5,000,000,000 victory notes and war savings certificates. The fiscal program of the government must be determined with reference to these maturities. Sound policy demands that the government expenditures be reduced to the lowest amount which will permit the various services to operate efficiently and that government receipts from taxes and salvage be maintained sufficiently high to provide for current requirements, including interest and sinking fund charges on the public debt, and at the same time retire the floating debt and part of the victory loan before maturity.

With rigid economy, vigorous salvage operations and adequate revenues from taxation, a surplus of current receipts over current expenditures can be realized and should be applied to the floating debt. All branches of the government should co-operate to see that this program is realized.

I cannot overemphasize the necessity of economy in government appropriations and expenditures and the avoidance by the congress of practices which take money from the treasury by indefinite or revolving-fund appropriations. The estimates for the present year show that over a billion dollars of expenditures were authorized by the last congress in addition to the amounts shown in the usual compiled statement of appropriations.

Specific Appropriations Urged.

This strikingly illustrates the importance of making direct and specific appropriations. The relation between the current receipts and current expenditures of the government during the present fiscal year, as well as during the last half of the last fiscal year, has been disturbed by the extraordinary burdens thrown upon the treasury by the transportation act, in connection with the return of the railroads to private control. Over $600,000,000 has already been paid to the railroads under this act—$350,000,000 during the present fiscal year—and it is estimated that further payments aggregating possibly $650,000,000 must still be made to the railroads during the current year. It is obvious that these large payments have already seriously limited the government's progress in retiring the floating debt.

Closely connected with this, it seems to me, is the necessity for an immediate consideration of the revision of our tax laws. Simplification of the income and profits taxes has become an immediate necessity. These taxes performed an indispensable service during the war. The need for their simplification, however, is very great in order to save the taxpayer inconvenience and expense and in order to make his liability more certain and definite. Other and more detailed recommendations with regard to taxes will no doubt be laid before you by the secretary of the treasury and the commissioner of internal revenue.

Would Aid War Heroes.

It is my privilege to draw to the attention of congress for every sympathetic consideration the problem of providing adequate facilities for the care and treatment of former members of the military and naval forces who are sick or disabled as the result of their participation in the war. These heroic men can never be paid in money for the service they patriotically rendered the nation. Their reward will lie rather in realization of the fact that they vindicated the rights of their country and aided in safeguarding civilization. The nation's gratitude must be effectively revealed to them by the most ample provision for their medical care and treatment as well as for their vocational training and placement.

The time has come when a more complete program can be formulated and more satisfactorily administered for their treatment and training, and I earnestly urge that the congress give the matter its early consideration. The secretary of the treasury and the board for vocational education will outline in their annual reports proposals covering medical care and rehabilitation which I am sure will engage your earnest study and command your most generous support.

Permit me to emphasize once more the need for action upon certain matters upon which I dwelt at some length in my message to the second session of the 66th congress: The necessity, for example, of encouraging the manufacture of dyestuffs and related chemicals; the importance of doing everything possible to promote agricultural production along economic lines, to improve agricultural marketing and to make rural life more attractive and healthful; the need for a law regulating cold storage in such a way as to limit the time during which goods may be kept in storage, prescribing the method of disposing of them if kept beyond the permitted period, and requiring goods released from storage in all cases to bear the date of their receipt.

Would Mark Storage Goods.

It would also be most serviceable if it were provided that all goods released from cold storage for interstate shipment should have plainly marked upon each package the selling or market prices at which they went into storage, in order that the purchaser might be able to learn what profits stood between him and the producer or the wholesale dealer. Indeed, it would be very serviceable to the public if all goods destined for interstate commerce were made to carry upon every package case whose form made it possible a plain statement of the price at which they left the hands of the producer. I respectfully call your attention, also, to the recommendations of the message referred to with regard to a federal license for all corporations engaged in interstate commerce.

In brief the immediate legislative need of the time is the removal of all obstacles to the realization of the best ambitions of our people in their several classes of employment and the strengthening of all instrumentalities by which difficulties are to be met and removed and justice dealt out, whether by law or by some form of mediation and conciliation. I do not feel it to be my privilege at present to suggest the detailed and particular methods by which these objects may be attained, but I have faith that the inquiries of your several committees will discover the way and the method.

Asks for Loan to Armenia.

In response to what I believe to be the impulse of sympathy and opinion throughout the United States, I earnestly suggest that the congress authorize the treasury of the United States to make to the struggling government of Armenia such a loan as was made to several of the allied governments during the war, and I would also suggest that it would be desirable to provide in the legislation itself that the expenditure of the money thus loaned should be under the supervision of a commission, or at least a commissioner, from the United States, in order that revolutionary tendencies within Armenia itself might not be afforded by the loan a further tempting opportunity.

Allow me to call your attention to the fact that the people of the Philippine islands have succeeded in maintaining a stable government since the last action of the congress in their behalf and have thus fulfilled the condition set by the congress as precedent to a consideration of granting independence to the islands. I respectfully submit that this condition precedent having been fulfilled, it is now our liberty and our duty to keep our promise to the people of those islands by granting them the independence which they so honorably covet.

I have not so much laid before you a series of reommendations, gentlemen, as sought to utter a confession of faith, of the faith in which I was bred and to which it is my solemn purpose to stand by until my last fighting day. I believe this to be the faith of America, the faith of the nation, and of all the victories which await national action in the days to come, whether in America or elsewhere.

Vast Crater on the Moon.

The moon, of course, is pitted all over with so-called craters, and several of the bigger ones are near the center of the lunar hemisphere which faces the earth. One of these, about 100 miles in diameter, might be described as a huge ring of lofty mountains surrounding a circular plain.

One gets a much more vivid impression of the size of this vast amphitheater when it is explained that it would contain all of the territory between Philadelphia and New York city, together with those centers of population. A striking picture illustrating this fact is presented in the Popular Science Monthly. It shows Long Island sound, New York bay, Brooklyn and Manhattan island within one edge of the crater, while in the distance, and within the opposite edge, one sees Trenton, the Delaware river and the City of Brotherly Love.

Cowboy Is Vanishing.

The cowboy, like the trapper, has almost vanished from the western picture. He lives now chiefly in Hollywood or in barnstorming troupes touring the country to stage such shows as the rodeos at Salinas and Pendleton. He is no longer concerned with cattle, except as theatrical props; he is an actor, not a stockman.

Except in a very few places he is gone from the range, and in these scattered spots where he still persists it is in reduced glory as a greatly modified type. He is likely to be as familiar with flivvers as with horses; he is as handy with the monkey wrench as with the branding iron, and as for six-shooters, he is more likely to carry a kodak.—New York Times.

That Cruel Word.

Flatbush—Did you ever put the all-important question to a girl and have her say no?

Bensonhurst—Yes. I did today.

"What are you talking about? Why, you're already married."

"I know it; but I asked our cook to stay another week, and 'No' was what she said."

NEWS REVIEW OF CURRENT EVENTS

President Urges Independence for the Philippines and a Loan to Armenia.

BOTH OPEN TO OBJECTION

Canadian Delegate Stirs League Assembly by Scoring European Statesmanship—Attacks on Article X—Prospects for Irish Settlement Good, Says Lloyd George.

By EDWARD W. PICKARD.

Congress is on the job again, with plenty of work to do and the prospect of not getting a great deal of it done before March 4, with the exception of appropriation legislation and the possible passage of bills for the creation of a budget and the restriction of immigration. President-elect Harding, who occupied his seat in the senate for a day or two, urged upon his colleagues the need of quick and nonpartisan work, and intimated that an extra session would be called soon after his inauguration.

President Wilson was desirous of appearing in person before congress to deliver his message, but was dissuaded at the last minute by his physicians and the document was read by the clerks. In his opening generalizations Mr. Wilson said autocracy was again to the fore in Europe, and that it was up to the United States to save democracy by giving an example of its successful operation, enacting and enforcing just laws and "standing for right and justice as toward individual nations." Aside from domestic matters he made just two specific recommendations. The first was that a large loan be made to Armenia, the money to be expended under the supervision of an American commission. Compliance of congress with this request is made somewhat doubtful by recent developments in Armenia, where the Russian Reds are now in almost complete control and have set up a soviet government. The President also advised that complete independence be granted at once to the Philippines. This, too, will be opposed by many congressmen who do not agree with Mr. Wilson that the people of the islands have succeeded in maintaining a stable government. Probably most of our law-makers would be glad to get rid of the Philippines, however, if it were not for the proposition that we should guarantee their independence, a policy that likely would involve us in serious complications, if not wars, in the not distant future.

The President recommended the early adoption of a budget system, the institution of rigid economy in government expenditures, better care for disabled soldiers, revision and simplification of the tax laws and protection for the agricultural industry—all of which meets the approval of most of the people.

The message made no mention of the League of Nations, but the prediction was made in Washington that Mr. Wilson would lay the treaty and covenant before the senate again, unchanged, and would continue the fight for ratification up to the moment of his retirement from the White House, and afterward as a private citizen. Another matter which he omitted from his message was the restriction or stoppage of immigration. This was taken by some to mean that if congress passed a drastic act he would veto it.

Senator Harding announced that he would resign from the senate between January 10 and January 15 and that Senator-elect Willis would be appointed his successor. Governor Cox thereupon courteously wired Mr. Harding that if he wished to leave the senate earlier he would gladly name Mr. Willis to fill the vacancy. Mr. Harding returned to his home in Marion to prepare for the series of conferences with national leaders concerning the policy of his administration.

Withdrawal from the League of Nations assembly by the Argentine delegation caused a lot of talk, in Geneva and elsewhere, but it didn't disrupt the gathering by any means. Indeed, Pueyrredon and his colleagues found they had put themselves in a rather ridiculous position and the chief retired to Paris, disappointed but still defiant. Their argument that proposed amendments to the covenant should be discussed and acted on at this session was upheld by the Scandinavians and certain others, but their action in quitting because they found themselves in the minority on the question was not approved by anyone, and was attacked by some of the Buenos Aires papers. Pueyrredon stated that his mission in Paris was to consult with Senator McCormick of Illinois in the hope that the United States and Argentina would become the leaders of a movement to give to the world a substitute for the present league.

Wednesday's session of the assembly was enlivened by a hot speech by Newton Rowell of Canada in opposition to the plan of Hanotaux of France to have three new organizations set up, each with an annual conference, to take care of finance, transportation and health matters, and to be supported financially by the league as is the labor bureau. The labor bureau's budget for the coming year is 7,000,000 gold francs, and Mr. Rowell protested that nations like Canada would not agree to be saddled with the immense additional expense that the three proposed commissions would require. Nor could such nations afford to send their best technicians each year to the conference, he said, and consequently the problem involved would be handled exclusively by European nations, which would not at all suit Canada. "Why," he cried, "do you think we should have confidence in European statesmen and leaders when it was European policy, statesmanship and ambition that drenched the world in blood?" Senator Millen of Australia warmly supported Rowell, and Lord Robert Cecil's compromise, that the existing international health organization continue, under league supervision, and the other two be abandoned, was adopted.

Earlier in the week another Canadian, Minister of Justice Doherty, proposed an amendment to the covenant that would erase article X, and though he was forced to yield to the assembly's determination to put over until next year action on amendments; he made a bitter protest against domination of the league's affairs by the council. On Wednesday Lord Robert Cecil took another wallop at article X, offering a motion to relieve members of the league from obligations laid on them by that article. When France, Holland, Sweden and Czecho-Slovakia objected, the proposal was referred to the legal section secretariat to ascertain if the league could make reservations on its own covenant. The assembly committee on new members decided in favor of admitting Finland and Luxemburg, but deferred action on Albania and the Baltic states.

Considerable time was devoted by the assembly to discussing the war on typhus in the Near East. Several delegates appealed to the world to stamp out the scourge that is gradually spreading over Europe, and good progress was made in raising the 250,000 pounds necessary to set the campaign in motion.

Despite the knowledge that the restoration of Constantine would cut Greece off from all political and financial support by the great powers, the Greek cabinet sent word to the former king that the people had voted in favor of his return, and invited him to resume the throne. Premier Rhallis of course recognizes the seriousness of the situation, but probably he feels he must obey the mandate of the people. Paris had a story to the effect that Constantine plans to overcome the financial troubles of the country by giving concessions for a number of great gambling casinos in various Greek cities that are favorite resorts of tourists. Another Paris report was that the Greek cabinet had asked Constantine to abdicate in favor of the crown prince, but at this writing this has not been confirmed.

D'Annunzio's comic opera "state of war" with Italy has not yet [illegible] out into actual fighting, and as negotiations between Italy and the "regency of Quarnero" are under way affair is likely to be settled with tle or no bloodshed. It is believed poet will yield if his services in ing Fiume from the Jugo-Slavs are ficially recognized. That city is blockaded. Last week two of the ian warships went over to the D'Annunzio side, their crews first [illegible] and gagging the officers.

Affairs in Ireland continued to cupy much of the attention of English-speaking world. As the closed the prospects for a settle according to Lloyd George, were better than they appeared on the face. This the premier said after had conferred with Mgr. Patrick Clune, archbishop of Perth, who been acting as his intermediary consulting with Sinn Fein leaders was said the bishop had conveyed Lloyd George a message from Michael Collins, commander of the Sinn Fein army, which presumably contained Irish terms for a settlement or least a truce. Father O'Flanagan, Roscommon, acting president of Sinn Fein, also sent a message to the premier concerning a truce, and the cabinet, considering this, was reported have decided on a reply embodying these terms: "No amnesty, no public, and a cessation from the present campaign of outrage and murder."

Sir Horace Plunkett, chairman of the Dublin peace convention, who for New York to appear before the American committee of inquiry, before starting said: "I see no hope of a truce in Ireland nor any hope in the overtures reported in the press. There cannot be peace while there is frightfulness on both sides. In my judgment the British government is blamable."

The American committee heard from of its star witnesses, Mrs. Terence MacSwiney, widow of the lord mayor of Cork, whose appearance before it was very interesting though prejudiced her views on the Irish problem were given an exaggerated value. She was preceded by her sister-in-law, Miss Mary MacSwiney, who told the story of the wrongs of her country and freely admitted that in 1916 Ireland turned to Germany for arms and would have accepted from that source all the help it could get. This she justified by the assertion that Ireland was "at war with England." Because of that "war" she defended the killings of British policemen and soldiers, while in the same breath she denounced the killing of Irishmen by the English.

The American committee's delegation named to go to Ireland for a first-hand investigation cannot go. They obtained their passports, but the British embassy in Washington refused to advise them for the stated reason that "the proposed visit to British territory is not agreeable to his majesty's government."

Delegates to the American Farm Bureau federation in Indianapolis adopted a resolution asking congress to prohibit short selling in agricultural products on the Chicago board of trade. Banking and commercial interests were asked to co-operate in their efforts to get immediate relief from the present economic condition by the extension and renewal of credits. The legislative bureau of the federation will make a special study of personal credits. The federal farm loan act was approved and an amendment was asked to increase the limit from $10,000 to $25,000.

F. W. Thompson of Chicago, leading a delegation of farm mortgage bankers, told the senate agriculture committee that bankruptcy was threatened in many quarters through the farmer's being called upon to pay an undue share of the burden of taxation. He urged that the war finance corporation be revived to take up the task in order to prevent financial chaos and save the future food supply of the country and the world.

For the third time the Nobel peace prize has been awarded to an American, the recipient this time being President Wilson. The honor carries with it a gift of $40,000. Theodore Roosevelt and Elihu Root were the other Americans to receive this prize.

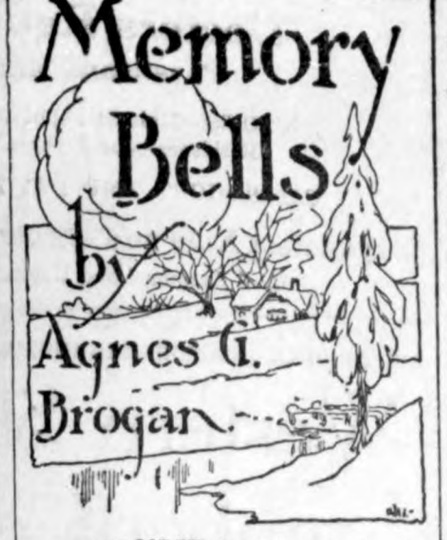
Memory Bells



CONNIE looked down to the busy street, through a blur of snowflakes. At least, Connie told herself determinedly that snowflakes were accountable for the blur; then, she wiped her eyes.

"It's Merry Christmas time," Connie said to her old yellow cat. "Who ever heard of Christmas without the Merry? So cheer up, Prowler, and let's join in the game."

At the little "Shoppe" just around the corner she stood longest of all. And all at once into Connie's bright eyes came a speculative light. The window was full of small framed pictures, most of them with the Christmas spirit. There were the usual night-clad children looking up broad chimneys, there were landscapes of snowy fields with distant windows alight—Connie studied them all; she was seeing in vision the winding hill road of the place where she had spent her last summer vacation; the church with its swaying bell in the steeple, the queer little bridge over the deep and beautiful stream—a bridge with seats along its sides where countless lovers had sat and courted. The old lady who had been Connie's volunteer hostess told her, with the pink coming and going in her withered cheeks, about the lovers. For it was there that her own husband had asked, and had been answered—his question. The way that Connie had chanced to visit this beautiful country place and to meet there the dear old lady was quite remarkable chance too. She had started out on the trolley car for one restful day in the country and had chosen this station at random. And when she had stopped to admire the wonderful roses in the old lady's garden—and they had spent some agreeable time together—the old lady, Mrs. Martha Snow by name, had said:

"My dear! Why don't you come on and visit me for a week or two? I'm lonely for a young sweet face."

And Connie had gone, that was all. Half her later water colors had been glorified memories of that delightful visit. Now Connie had a new inspiration. She would paint the queer little bridge over an icy stream, and its seats should be covered with snow. She could fancy just how the trees would look waving naked branches. And she'd paint the church in the hollow with lights in the windows gleaming over the snow and the bell in the tower a-swaying for Christmas.

Oh, Connie was very happy as she hurried home to her attic, but there, in the temperamental way artists have, she began to draw instead, working in a fever of enthusiasm—the sitting room of the old house where she had been a guest, with Martha Snow herself seated in the firelight, just half of her peaceful profile showing beneath its halo of white hair.

There was holly above the old fireplace and a boy's stocking hanging there. Connie never stopped until she had completed the picture, then ran with it breathlessly to the "Shoppe" around the corner.

"Yes, we will display it," a smiling old man agreed.

The picture sold. Of course you were prepared for that; but the strange part was that before it was sold Connie had added her other views to the "Shoppe" window, and her discerning purchaser had bought them every one. While the other Christmas studies pleased him not at all; Connie could not count the number of times that she passed that window, first closing her eyes childishly in the hope that her picture would not be there when she opened them. And it was the day but one before Christmas that the "Shoppe" manager seeing her pecking about, beckoned her inside.

"You have pleased one of our best customers," said the manager, "and when we mentioned your peculiar condition of sale he suggested talking the matter over with you that you might both come to a satisfactory bargain. Our customer thinks that you possess wonderful artistic ability. We have given him your address."

"Is he," asked Connie falteringly, "a philanthropist?"

Some way she did not want her purchaser to be just a philanthropist and spoil all future ambitious hope.

"Mr. Armstrong is a man who usually drives a pretty shrewd bargain," the "Shoppe" manager said.

So, though it was early afternoon, Connie hurried home to turn on a gas blaze and don her most presentable dress so that she might make a favorable impression as a successful young wielder of the brush. The purchaser might arrive any minute. But it was the next afternoon when he came and Connie was wearing a bungalow apron.

The purchaser was young and tall and good looking, and the golden cat greeted him with a purring rub, which was to Connie a recommendation as to his honesty.

Mr. Hubert Armstrong came directly to business.

"Your sketches have for me a double interest, Miss Carroll," he said.

"You have drawn remarkably some of the happiest scenes of my boyhood. Scenes which I am ashamed to say I had half-forgotten. The world of business absorbs much of human kindness I am afraid, and sometimes a struggle for success causes us to leave much that is tender behind. I am grateful to you for awakening in me that tenderness which I had almost buried."

The man's voice broke huskily. He drew forth an old sitting-room picture.

"Peace on Earth" was the name she had given it.

"That," said Hubert Armstrong, "is the living room of my home in Hillcrest—the place where I was born. This white-haired woman's profile is the peaceful profile of my long-lost mother. That little bulging stocking might have been my own stocking, just as it used to hang there years ago— Tell me—" his tone was eager, "how did you come by your dream?"

"I visited last summer," Connie told him, "in that same old house in Hillcrest with Mrs. Martha Snow, who invited me."

The man nodded hastily.

"I see," he said, "it is quite simple after all. Martha Snow is my mother's widowed sister." A dull red crept to his cheek.

"I had almost forgotten that Aunt Martha asked me years ago to allow her to continue on in the old homestead. It was left mine by will. So she's there yet, and the church bell still chimes out for Christmas!

"You have sounded the memory bells for me, Miss Carroll."

It seemed that the purchaser had almost forgotten her in his musings. Now that she looked at him closely his face was threaded by lines of care, his fine eyes sorrowful beneath their sternness. Connie put forth a friendly hand.

"Why," she said, "so you are Martha Snow's nephew. Then there can be no question of bargain between us, the pictures are freely yours."

The man spoke abruptly.

"You paint to sell do you not?" he asked. "Isn't that what your studio is for?"

Connie shook her head ruefully.

"Mostly," she replied, "my studio is just to live in."

"And you live alone?"

"I am quite alone in the world," she told him gravely.

Then her irrepressible smile broke forth.

"Unless," she added, "you would count Prowler?" She caught the cat in her arms.

"I—live—alone—too," Hubert Armstrong said slowly.

"I know what it means. There's not much difference between the gilded walls of an apartment and these walls of yours here."

"Not when it comes to loneliness," Connie agreed. "We were going to look much more cheerful," she went

Connie Studied Them All.

on, "when you interrupted us with your knock. I was climbing the ladder to hang a holly wreath."

"Let me do it for you," the man said. Before she could could refuse his assistance he was on the ladder, the wreath in his hands.

"That's better," Connie told him as side by side they stood looking up at the crimson berries.

"It's the first time in years," Hubert Armstrong said with a boyish laugh, "that I've done that sort of thing. Gives me a thrill of old Christmas. Makes me wish for a fireplace with a filled stocking before it. The fireplace of your picture makes me long to go skating on a creek—your creek, back at Hillcrest. Makes me want to taste turkey again over the old dining-room table."

"Yes!" breathed Connie, "and hear the church bell ring out across the snow."

Eager-eyed the man gazed into those other eager eyes beneath his own.

"Let's do it," he said impulsively.

"Let us have a real, joyful old-fashioned sort of Christmas, you and I, back at Aunt Martha's. I will call her on the phone. It would delight her heart."

"It would be just 'peace on earth' to me," Connie said happily.

And that Christmas eve as she gazed wideawake through her attic window the moon shone down through the holly wreath.

"Merry Christmas," whispered Connie while the old moon smiled benignly with a promise of happy Christmases to come.

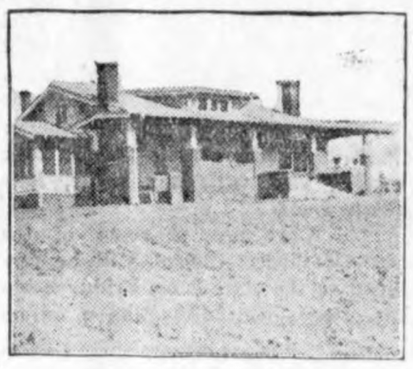
HOME TOWN HELPS

MAKE THE HOME ATTRACTIVE

Results Will Follow a Little Careful Planning and a Small Expenditure of Money.

Right now is a good time to plan how the homestead—perhaps new, perhaps old—can be made more attractive. A few years will pass surprisingly quickly, and the old home will become increasingly unattractive or beautiful, depending on whether the owner and his wife have done a little planning and a little planting, season by season.

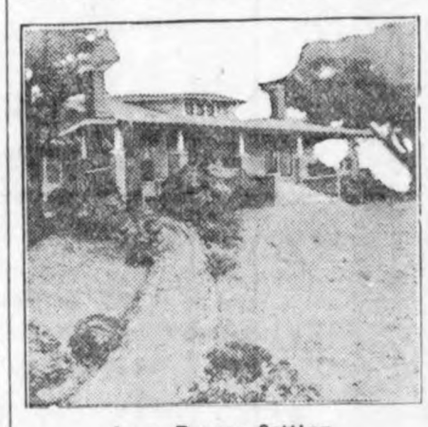
The United States Department of Agriculture suggests in the pictures shown herewith some of the ways of



House Has Bare Look.

beautifying. The changes produced by planting shrubs can be effected in one or two seasons, and even where trees are shown, often only five or six years are required to produce the effects pictured if quick-growing varieties are planted. In such a case, however, provision should be made for better, slow-growing varieties which will be allowed to come up and eventually take the place of the quick growers.

With cultivated land carried to the very door, the house shown in the first picture has no homelike setting. It appears merely as an intrusion in the landscape. But when it is given a dooryard, with lawns, trees, and shrubs, as shown in the second illustration, it takes its proper place



In a Proper Setting.

in the picture, without detracing from the value of the surrounding land.

If you want more information on this subject write the United States Department of Agriculture, Washington, for Farmers' Bulletin 1087, "Beautifying the Farmstead." It will be sent free on request.

Faulty Chimneys Cause Fire.

A summary of the various causes of fire shows that those attributable to chimneys annually amount to from 10 to 26 per cent of the total number, while in winter the percentage has reached as high as 50. This is significant when it is realized that most of these fires result from carelessness and could be avoided by proper attention.

In cities and towns with proper fire protection many fires are arrested without serious loss. It is evident that in rural districts where there are no organized fire-fighting agencies, and where a fire usually results in a total loss, builders should give more attention to making the construction of all new chimneys as nearly fireproof as possible.

Future Belongs to Small City.

It would be rash to conclude from the census figures that the problem of a better distribution of population is unsolvable. The fact that the small cities show the greatest gains is significant. These obviously permit freer living conditions than the large cities and at the same time are free from the isolation of the village or the widely scattered homesteads. The small city in these days prides itself upon its "metropolitan" aspect. It is conspicuously up-to-date and provides comfortable living. The tendency of industrial enterprises to seek locations at a distance from the centers of population has had much to do with the upbuilding of cities of this type.

Community's Real Worth.

After all is said and done, the number of persons residing in a community has little to do with its real greatness. It's the kind of people it has, the kind it turns out and the kind of things it does which bring everlasting fame in the end.

Because a place is not as big in population as its people had hoped for should cause no great regret; but if it is not forging ahead in numbers because of the care it takes of its residents, then there is reason for shame. —Exchange.

The High Cost of Shoes Gets Wallop

"Ten cents to twenty-five cents a pair is enough profit for any maker of work shoes," says Geo. R. Harsh, head of the Harsh & Chapline Shoe Co., of Milwaukee, makers of the famous Lion Brand and Steven Strong work shoes for men and boys.

"For 15 years we have been trying to make the best work shoes in the country. To do this we even had to put up our own tannery, buy the hides and do our own tanning, as we could find no leather in the open market good enough to go into Lion Brand shoes.

"That we have come close to success is evidenced by the sale of more than 10,000,000 pairs through thousands of stores. Last year alone the shoe buying public bought more than $6,000,000 worth.

"Lion Brand Shoes are so popular we could probably go right on doing business through the stores. But I believe there should be fewer profits between the producer and user," continued Mr. Harsh.

"By selling direct to the wearer we cut out the profit of the tanner, jobber and store keeper, as well as the salesman's expense, and are able to save the buyer of Lion Brand work shoes from one dollar to three dollars a pair.

"It took a lot of courage to change our selling policy, but we believe the buying public is ready for the change and that our action in stepping over the middleman to the user will be followed by other large manufacturers of many other well known quality products.

"Our catalog No. 1 is now ready for distribution from factory, Hanover and Maple Streets, Milwaukee, Wis."—Adv.

It Must Be Love.

Father was giving the fair young daughter a lecture about her beau. He exclaimed: "Does he know who pays the light bills? Doesn't he know enough to go home at the right time?"

The daughter replied: "Yes, he knows enough to go, but he was sick last night."

With that father started in again. "Don't tell me that a big husky fellow like him was sick. What on earth was the matter with him?"

As the fair young daughter started for the door, she sang back, "He has heart trouble."

Proved.

Edward Charles was a logical sort of person. Incidentally, he was in love. But love wasn't strong enough to swamp his logic.

Thus it was that Eve Maude, his adored one, received the following strange love letter:

"Eve Maude, I love you.

"First—I love you.

"Second—All the world loves a lover.

"Third—But I am a lover.

"Fourth—Therefore, the world loves me.

"Fifth—You are all the world to me.

"Sixth—Therefore, you love me."—London Answers.

Judging the Depth.

An English rider, coming to a river he was unfamiliar with, asked a youngster he saw playing on the bank if it was deep. "No," replied the boy, and the rider started to cross, but soon found that he and his horse had to swim for their lives.

When finally he reached the other side he turned and shouted, "I thought you said it wasn't deep."

"It aren't," was the reply. "It only takes grandfather's ducks up to their middles."

Cuticura for Pimply Faces.

To remove pimples and blackheads smear them with Cuticura Ointment. Wash off in five minutes with Cuticura Soap and hot water. Once clear keep your skin clear by using them for daily toilet purposes. Don't fail to include Cuticura Talcum.—Adv.

Nervy.

"Pardon me, miss. Although a perfect stranger, I must tell you that you are beautiful."

"Sir, I shall call a policeman."

"I am sure he will agree with me."—Detroit Free Press.

Not Gay, But—

Patience—"Don't you think he is a gay deceiver?" Patrice—"Oh, I never considered him particularly gay."

Genuine
BAYER
Aspirin
You must say "Bayer"
Warning! Unless you see the name "Bayer" on tablets, you are not getting genuine Aspirin prescribed by physicians for 21 years and proved safe by millions.
Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains proper directions for Colds, Headache, Pain, Toothache, Neuralgia, Rheumatism, Neuritis, Lumbago.
Handy tin boxes of 12 tablets cost but a few cents—Larger packages.
Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

...dale Griggs, of Goodell, ... caller Friday.

... Hood, of Goodell, was ... shopper last Thursday.

... Faye Letch, of Goodell, was ...ng in Klemme Saturday.

... and Mrs. Lester, of Goodell, ... Klemme callers Monday.

Mr. C. C. Mayne, of Goodell, was a business caller in Klemme Saturday.

Mr. H. J. Klemme, of Belmond, was a Klemme business caller Saturday.

...lle Busch and George Hoppe returned from Fort Dodge last Friday where they had been working the past few weeks.

Alex Kirkwood, who has been ... sick the past week or more is greatly improved in health and feels like himself.

The Editor of the Times left last night for Lincoln, Nebraska, to spend Christmas with his wife and other relatives. He will return to Klemme Monday.

Rev. A. E. Burtt returned last Wednesday evening from Rochester, Minnesota, where he went to take treatment.

Mr. Ahrenkeil, of Goodell, was a Klemme business caller Saturday morning between trains. He also found time to visit with old friends.

Miss Mabel Waterman came from Iowa City Monday morning to spend her Christmas vacation with her folks and friends. She is attending the State University there this year.

Donald Nissen came from Sioux City Saturday to spend his holiday vacation with the J. N. Day family and other relatives and friends. Donald is attending Morningside College there.

George Lawhorn and "Finnie" Freie went to Rinehart last Wednesday where they have an eigthy acre field of corn to husk. That field won't last long when these huskers get into it.

C. A. Arnold of Klemme passed thru Garner Monday morning enroute to Emmetsburg, to look over some of the herds of purebred Duroc Jerseys that are olcated in that section. Mr. Arnold is one of the fanciers of that breed and when he starts out to add stock to his herd, it must be the bes.—Garner Democrat.

Ed. Jacobs, "Bobbie" Henschen, W. F. Pavey, Wm. Keraus and R. A. Jorgensen drove to Mason City last Thursday evening to attend the musical comedy play "The Katzenjammer Kids". "Bobbie" is still laughing over the funny jokes he heard.

Olaf Brynteson, manager of the Western State Lumber Company here, leaves tomorrow for Odebolt, Iowa, where he will spend the holidays and take a week's vacation visiting his foks and friends. During his absence John Suckow will take charge of the lumber yard.

Bethel Lodge, A. F. & A. M. held its regular election Thursday evening last, and the following officers were elected. W. M., Dr. J. S. Wesson; S. W., C. R. Sweigard; J. W. Paul Laidley; Treasurer, F. M. Hanson; Secretary, E. T. Wesson. The appointive officers have not yet been named by the new Master.

Rev. and Mrs. A. H. Meyer left lats week for Clear Lake, Minnesota, to be present at the wedding of Mrs. Meyer's brother, George Lenz. And to be sure the job was done right Rev. Meyer tied the nuptial knots. The Reverend returned to Klemme Friday evening but Mrs. Meyers stopped at Minneapolis for an over Sunday visit with her sister, Miss Helen Lenz.

The Christmas program of the First Methodist Church will be rendered at the church on Friday evening, December 24. The program consists of Cantata entitled "Thy Light has come" and will be carried out by the Sunday School scholars. Recitations, dialogues, male quartettes and songs by the Junior Choir. All are cordially invited to attend and hear the program.

CHRISTMAS VACATION

The Klemme schools closed Friday for their annual two weeks midwinter vacation. The kiddies are having a great time and are taking advantage of the treat. School will open on January 3rd.

A meeting of the Stockholders of the State Savings Bank, Klemme, Iowa, is called to meet in the banking rooms of the Bank at Klemme, Iowa, on Friday, December 24th, 1920, at One o'clock P. M., to consider and take action upon a proposition to increase the capital stock of said bank from $15,000 to $30,000, and to transact such other business as may properly come before the meeting in connection therewith.

IT'S HERE!

Another Big

NELSON SUPER SALE

Its One of Those Buying Opportunities that Come Just Once in A while

A Personal Message
From Mr. Nelson

This is the second of my special Super Sales that has been put on in this store. Nearly every one of you remember my sale of last August. A double sales force could not handle the crowds, it was beccuse of the bargains. I advertised some seemingly impossible things but everything was found just as described. Every one of the thousands of customers was delighted with their savings. Thats what will make this sale the big success it will be. I am promising you greater values than last August, conditions make it possible, don't miss it. It's worth coming 100 miles to attend.

W. H. NELSON,
Salesmanager.

Local Happenings

r. Engvard Lauritzen returned to gsted, Iowa, Tuesday after spend- Christmas with his folks here, Mr. Mrs. Salling.

Mr. Worthy Usher, of Cedar ids is spending his Christmas va- on at the Tom Blank home in mme.

The Misses Gretchen and Minnie nk and Mr. Worthy Usher were ting relatives and friends at Bel- nd Christmas day and Sunday.

Mr. T. Christensen, of Ringsted, a, returned Wednesday after spend- Christmas at the home of Mr. and . Salling.

Ed. Jacobs was a business visitor Garner Tuesday between trains. ce the heavy snow Ed has parked old "Lizzie Wagon" in the shed now rides the trains.

Mr. and Mrs. Ed Palmby of Eagle nd, Minn., were visiting with Klem- relitives and friends last week.

Coal

Have in transit another car of Glen- e Chunks at $12 per ton off the car. der now. Walter F. Lau. 1wc.

Mrs. Frank Heuer and children of ws came Monday for a week's it at the home of Rev. and Mrs. H. Meyer. Mrs. Meyer and Mrs. uer are sisters.

Ed Jacobs was on the sick list past week suffering with a sore oat. Ed didn't like to be laid up that time as he was rushed in the e with holiday business.

Jerry Brennan of Garner was a siness caller in Klemme Tuesday tween trains. Other members of e Brennan family were also visit- with relatives and friends near lemme over the holidays.

Jack Etchen was a Garner visitor turday. We believe Jack had a re tooth which was seriously inter- ring with his Christmas dinner d he wanted it fixed up so that he uld not lose out on the eats.

Miss Mae Warnock of Iowa Falls a guest at the Frank Gruetz- acher home since Monday. Miss arnock, it will be remembered, ught in the Klemme schools for two ears and is now teaching in the owrie, Iowa, Consolidated School.

Art Kuck went out hunting last Wednesday and reports that he nailed" 13 bunnies and 6 jacks. We didn't see the rabits but took rt's word for it as he is a good hot and generally gets all he can arry home.

Miss Emma Lauritzen, of Ringsted, owa, came last week to spend her hristmas vacation with her folks here. he left wednesday for Spencer to pend a few days visiting her sister be- re returning to Ringsted where she employed in the newspaper office.

Ye Editor left last week Wednes- day night for Lincoln, Nebraska, to pend Christmas with relatives. Mrs. orgenson and baby boy returned with us and all are glad to be back n Klemme again. Ye Editor is prac- icing up in the art of amusing the aby shoud he exercise his lungs when all editors are supposed to be leeping.

Mr. and Mrs. Will Kirkwood, of Milaca, Minnesota, came last Wed- nesday for a visit at the home of his parents, Mr. and Mrs. A. Kirkwood. "Bill" was here a couple of weeks ago but returned to Minnesota to make arrangements to have some one take care of his farm during his absence. His father Mr. Kirkwood has been on the sick list for some time and Will will help his mother care for him.

Curing by Suggestion.

There is nothing new in the attempt to cure disease by means of the mind. Many a shrewd physician of a hundred years ago cured patients with bread pills, and kept his secret. There were probably mental healers in Babylon and Assyria. They are known to have existed in Egypt, Greece and Rome, while the American Indian medicine man was unquestionably an adept in the art of suggestion.

Farm Notes

FEEDING FOR JANUARY EGGS

Exercise and Sanitation Important Feature for Hens

Clean hen houses and plenty of exercise have as much to do with good egg production as the feeding, says R. L. Cochran, with the poultry department of Iowa State College.

Dropping boards should be cleaned every week, especially where the hen house is well filled with chickens, as diseases will thrive in dirty places. Also, the chickens spend more of their time indoors during the cold weather.

During the cold winter months the hens spend from five to six hours longer on the roosts than in the summer and this lack of exercise tends to make them lazy and fat. They also get their feed with less work. To offset this last feature, scatter the grain ration in some straw so that the hens will have a good scratch litter.

A good scratch feed to scatter in the litter, morning and night, consists of two parts whole corn, one part wheat and one part oats. If wheat is not available, two parts of corn and one part of oats can be used. With this good mash should be furnished. This should be kept before the hens at all times. Warm water supplied several times a day also aids in getting eggs for the January market.

GIVE HOGS BUTTERMILK

Tests Show It To Be Excellent Feed for Supplying Protein

Buttermilk is a good feed for the hogs ration according to G. V. Glatfelter of the Iowa Agricultural Experiment Station. Many inquiries have c ome to the station regarding its use and several interesting experiments have resulted.

In an average of four trials in which buttermilk was fed in limited quantity, from 2 to 10 pounds per head daily, to young growing and fattening shoats, it was found that a hundred pounds of buttermilk replaced 6 pounds of corn and 6 pounds of meat meal tankage.

The test was conducted in this fashion,—one group of pigs was self-fed on corn and tankage "free-choice" style; another similar group was fed exactly the same ration with the exception that it was given some butermilk daily. Pricing the corn at 76 cents a bushel or $27.14 a ton, the corn replaced was worth 8 cents and the tankage, at $85.00 per ton, replaced was worth 28½ cents making the total replacement value 36½ cents; hence 100 pounds of buttermilk in these experiments was worth 36½ cents per hundred pounds.

It will be seen from this that as corn and tankage increase in price, the buttermilk becomes more valuable while on the other hand, if corn and tankage go down, it decreases in vaue. The greatest value of buttermilk comes with limited feeding, for when fed in large amounts it is worth less per hundred. In a test when the growing pigs were given all the skim milk the pigs could possibly take, which amounted to a little more than 32 pounds daily, the corn replacement value of 100 pounds of skim milk was worth 25 cents.

Pigs relish buttermilk. Feeding it results in more rapid gains. It has proved to be our best protein supplement for pigs, being an adequate a nd high qualified protein; and does wonders when included in the ration.

ALL READY FOR SHORT COURSE

Plans Made To Handle Record Crowd and Best Program Ever Arranged

Iowa State College is all ready for the largest gathering ever held when the Winter Short Course opens Jan. 3. Not only have the members of he faculty of the division of agriculture arranged for new features to present to the visitors but some of the best speaker in the United States will be on hand to talk on the subjects of the day. Many speakers who will be here will appear on the Iowa Farm Bureau meeting program which follows in Des Moines.

There will be plenty of housing room in Ames for every one. The students are away on vacation and rooming houses are opening up to the Short Course visitors. Women who attend will be allowed to room in the girls dormitories. If these quarters are desired it should be remembered that all bedding except sheets should be brought along. Also bring your own towels. These rooms as well as all others will be moderately priced.

On arriving at Ames first register at the Short Course headquarters at Room 16, Agricultural Hall, where all information regarding courses, rooms and other details can be gotten.

Remember there is a definite program for every member of the family, so bring the boys and girls along too.

There will be plenty of entertainment to go along with the work, including evening meetings and banquets. It has been estimated that 27 different state meetings of the various breed societies and farm organizations will meet at Ames during this week.

If you have any question regarding the farm home operation or live stock bring it to Ames and get the answer.

OBRECHT TO BE CASHIER AT THORNTON

Clarence Obrecht who has for the past several months been employed in the State Bank of Belmond has accepted the poistion of Cashier of State Savings Bank at Thornton, which position was recently made vacant by the sudden resignation and departure of Mr. Jacobson the former cashier. Mr. Obrecht was at one time employed in the Thornton bank leaving that place to take the position in the Belmond bank. His new position is one of much greater responsibility to him. "Pug" as he is universally known here was raised in Belmond and graduated from the Belmond schools and has a great many friends who while sorry to have him leave Belmond will hope for him that his new position will prove but a step to stil better things.—Belmond Herald-Press.

Carl Lenz, night policeman, has possessed himself of a real police dog. The "critter" arrived the first of the week, and already he and Carl have become fast friends. Our understanding is that he came direct from Germany, and that he saw actual service during the great world war. If he is really German he will be a lonely cuss since the "kibosh" has been put on the language here; or if he is French he will not be much better off, as but few of us speak that language fluently. What Carl should have done was to get an Irish police dog, then we would all feel a sort of kin to him.—Garner Democrat.

CASHIER AT CARROLL SHORT FUNDS, SKIPS

Carroll—J. C. Arts, assistant cashier of the American Savings bank, is missing. His accounts were found $15,000 short. The money has been made good by his mother and brothers.

Cashier Leo J. Wegman suspected that there was something wrong with Art's accounts—he had been a high liver. Plans were made to investigate last Thursday night but when the cashier returned to the back the time vault was closed.

Friday Arts was confronted by the charge that he was short and confessed a shortage of $10,5000.

He was discharged and went across the street to another bank from which he withdrew $4,500 on behalf of the American Savings. He then fled with the $4,500.

His relatives made up this sum as well as the $10,500 to the bank in which he had been employed. His mother is a heavy stockholder in the American Savings, which loses nothing.

Arts is 38 years old, is married and has seven children.

NOTICE OF APPOINTMENT OF EXECUTOR

NOTICE IS HEREBY GIVEN, That the undersigned has been duly appointed and qualified as Executor of the Estate of Edward Charles Collins, late of Hancock County, State of Iowa, deceased. All persons indebted to the estate are requested to make immediate payment; and those having claims against the same will present them, duly authenticated, to the undersigned, for allowance.

Dated December 20th, A. D. 1920.

Asa Gibbs,
Executor.

Dec. 29 Jan. 6-13

Obituary Jacob Wenz

Mr. Jacob Wenz was born April 6, 1829 at Soellingen Baden, Germany. He was baptized and confirmed in the Lutheran Church and of which he was a true member all his life. In 1857 he was united in marriage to Miss Karoline Volk and to this union five children were born, three sons and two daughters. In 1859 Mr. and Mrs. Jacob Wenz came to the United States and settled in Clayton County, Iowa, where they lived until 1874 when they moved to Hancock County. The family were at first members of the Ell toun Reformed church but later became members of the Klemme Reformed church. Mrs. Wenz and also one son are dead. Jacob Wenz at the time of his death had reached the grand old age of 91 years, 8 months and 16 days. —Rev. Depping.

KLEMME SOLDIERS AND SAILORS NOTICE

All young men in and about Klemme who were in the Service are invited to join the Gifford Olson Post of the American Legion at Garner. Those wishing to join should see G. P. McCullough at Klemme at once as he has the necessary blanks to sign. The Gifford Olson Post at Garner are making a big drive for members and as there is no post at Klemme the boys here are urged to join the Gifford Olson Post.

DANCE NEW YEAR'S EVE

Both old and young are cordially invited to the good time New Year's Eve dance at the llde Hour Theatre on Friday evenin, December 31st. Good music and good time assured to everybody. Bring your friens.

BIG FAMILY RE-UNION CHRISTMAS DAY

A big family re-union was held at the home of Mr. and Mrs. Henry Wille of this city on Christmas day when thirty-five members and relatives of the family were present. A big dinner well prepared by the good cooks present was thoroughly enjoyed by all. The table was well decorated both with good things to eat and Christmas decorations. After the dinner all enjoyed various sorts of games and amusements. Such a good time was had that they immediately planned to have another such gathering again next year and all are eagerly looking forward to the next Christms re-union.

HERE'S GOOD YIELD OF CORN

Hardin County Farmer Produces 131 Bushels to the Acre On An 8 Acre Tract

J. F. Bachman of Union, Hardin County, has a record of corn production which compares with the best in the state. He raised 73,460 pounds of corn from a trifle under eight acres, which at 70 pounds per bushel gives a yield of 131 bushels per acre. If the moisture content is considered and deducted it will still leave a vield of at least 110 to 112 bushels per acre.

The corn was raised on an old blue grass feed lot which was ploughed up for the first time this season, so that the soil having been manured heavily for many years, was in excellent condition.

A contest is being closed up by the farm crops department of Iowa State College which will bring out some remarkable yields of Iowa corn for the year. Data concerning this contest will be given out during the Farm and Home Week at Ames, Jan. 3-8, 1921.

The yields secured from each of the 128 entries will be graphically represented. One hundred pounds of corn from each plot will be shown as also a sample of the seed.

Results of the corn yield contest are being awaited eagerly by the farmers of the state. By growing high yielding strains of corn under absolutely uniform conditions of soil climate and cutivation the Iowa Corn Growers Association hopes to find the highest yielding strain in the state.

Wasted Labor.

Little Edna, who was watching the men working a pile-driver in the lot opposite, said to her mother. "I'm so sorry for those poor men, mamma; they've been trying and trying to lift out that great weight, and every time they get it almost to the top it falls right back again."—Boston Transcript.

SUPERVISORS SET DAY FOR LETING PAVING CONTRACT

The Board of Supervisors have set a date for receiving bids on the paving of the North Iowa Pike from the east to the west line of the county —January 20. The Board has been working on this proposition for some time, in fact, ever since the county voted for paved roads a year ago last June. The road had to first be surveyed, the route laid out and accepted by the Highway Commission, the road had to be drained, culverts put in, and all this work had to receive the O. K. of the State Highway Commission and the federal commission. The date set had to conform with the desire of the State Highway Cimmission and the federal men in charge, as they have to be represented at the letting.

The road across the County has been divided into five sections. Section A and B constitue the part of the road west of Britt to the County line, C. and D from Britt to Garner, E from Garner to the County line on the east. The notice of letting calls for bids by sections, section B and E to be paid for in cash and A, C, and D to be paid for in bonds. The amount of federal and state money that will be available next seson, or by the time the contract can be completed will be in the neighborhood of $500,000 and this will pay for about the amount of road work contained in the section east of Garner and the section just west of Britt. Bonds will have to be issued for the balance of the work, and the contractor getting the job will have to take these in payment for his work.

We understand that the market for bonds is good and there will be no difficulty for the contractor to arrange for the sale of the bonds at this time. We were told recently that paving contractors were disposing of bonds they were taking at par or near par.

If what seems to the board to be a reasonable bid is received the contract will be let for the entire job across the county and it is likely that it will be completed next season. The bad condition of the roads all fall has caused many to wish that the job be pushed as fast as possible and this the Board of Supervisors has been doing.—Garner Signal.

One week from Saturday, or Jan. 1st, a few changes in the county officiary will take place. The changes are few, however. Thos. H. Thompson will turn over the keys to the treasurer's office to John Suurballe. John is a tried county official, having served the county as sheriff several years ago. E. P. Hanson will succeed Jas. Ross as sheriff. Peck, too, has had previous experience in county government and was always a pains-taking, popular official. These re the only changes. Miss Bernice Laffey, who has been deputy under Mr. Thompson, will remain with Mr. Suurballe. For the present at least, Eck. Raw, deputy under Mr. Ross, will do a like service for Mr. Hanson. Auditor Chris Jacobs, Clerk Baumgartner, Recorder Mrs. H. M. Aldridge, Superintendent Baggs, County Attorney Wood and Supervisors Lawhorn, Meyers and Berhow, all remain at their respective stations.—Garner Democrat.

CAHTOLIC CHURCH AT GOODELL BURNED TO GROUND CHRISTMAS EVE

Tuesday we learned for the first time that the Catholic Church at Goodell was burned to the ground on Christmas Eve after the entertainment. The flames were not noticed until sometime after all had left the church after having a Christmas entertainmeht in the church. It is thought that perhaps the fire originated from candles on the Christmas tree or a spark had dropped on a piece of cotton of tinsel which was not noticed. The church burned to the ground and nothing but the foundation is left to show where the church stood. Goodell seems to have more than their share of losses by fire as last year an entire business block was burned out.

Says the Old Philosopher.

"We can't all be cap'ns, colonels an gin'rals, my son," said the old philosopher. "Providence has so fixed it that somebody must lead an' somebody must follow. The hilltop looks good to us, but we're closer to the thunder up there, an ef we can't stand steady on our feet it's mighty apt to shake us down."—Atlanta Constitution.

Little boats must keep the shore, large ships may venture more.

The man who is happier away from home than in it is really happy.

If a man is wise he never jars a hornet's nest to find out what's in it.

It is easier to touch the average man's heart than his pocketbook.

A good reputation is a valuable possession—but you can't mortgage it.

Human progress comes not by strife but by efficiency and co-operation.

Hand mills were in use among the Britons before the Roman conquest.

The trouble with big cities is that they have too much downtown to go to.

In union there is strength—as many a married man has learned to his sorrow.

Any man ought to be satisfied with his lot if it is worth $5,000 a front foot.

Rapid transit is all right for those who do not happen to step in front of it.

If you take care of the pennies the dollars will probably be blown by your heirs.

CLEAN COWPEAS MOST VALUABLE

Dealer Reaps Profit for Doing Work That the Grower Neglects to Perform.

WIDE DIFFERENCE IN PRICE

Despite Commercial Shortage and High Market Prices Producers Do Not Sell More—Specialists Give Timely Advice.

Until the growers see fit to place their cowpeas on the market in a clean and attractive condition they may expect the wide difference between the price they receive and the wholsale price charged by the dealer to continue, say marketing specialists of the bureau of markets, United States Department of Agriculture. When the dealer is compelled to do work that the grower fails to perform, it is the dealer who enjoys the profits.

Marketing Factors.

According to estimates prepared by the bureau of markets some 100,000,000 pounds of cowpeas enter commercial channels every year. Of this quantity 25 per cent is of mixed varieties and sold at a discount of from 50 cents to $1 per 100 pounds. A large percentage of it also is made up of poorly thrashed, unclean stock containing much foreign matter and packed in second-hand bags, improperly sewed. As a result of the use of these inefficient marketing methods the average wholesale selling price for recleaned stock during the spring of 1920 was 60

Cleaning Cowpeas Pays Well.

per cent higher than the average price paid the growers for the 1919 crop of cowpeas. Similar conditions prevailed with regard to the 1917 and 1919 crops.

To secure higher prices for cowpeas, specialists of the bureau of markets who have made a careful investigation of the matter recommend the following practices:

1. Clean cowpeas thoroughly before marketing. All hulls and other foreign matter, as well as light and immature seed, if any, should be fanned out.

2. Keep the varieties pure. Only straight varieties should be planted for grain or seed production, and precautions taken to prevent mixing at harvest time.

3. Sack in new even-weight bags, well sewed. This prevents waste in handling and the package will be more attractive to the buyer.

4. Market in as large lots as possible. It costs the shipper or local dealer practically as much money to receive, weigh, record and pay for one bag of cowpeas as it does a ten-bag lot. If car lots are available the cost of handling per unit is still smaller.

All efforts made by farmers or growers to improve the quality and marketability of cowpeas add to the initial selling price.

Cause of Shortage.

Cowpeas are usually grown as a catch crop, and on most farms regarded of secondary commercial importance. Yet the farm value of cowpeas produced in the United States is something like $30,000,000 a year. Approximately 750,000,000 pounds of cowpeas are produced annually, about 45 per cent or 340,000,000 pounds of which is required for planting. Of this latter quantity 15 per cent is sold by growers direct to farmers and 30 per cent normally enters commercial channels to be distributed by various dealers. In 1919, and again in 1920, the demand for cowpeas for planting purposes exceeded the commercial new crop supply, and abnormally high prices prevailed. Despite this shortage and the high prices, practically no effort was made to increase the commercial supply.

In the opinion of the bureau of markets the commercial shortage was not due to decreased production, but to failure on the part of the growers to prepare more of their cowpeas for commercial distribution. To increase the commercial supply it is seemingly necessary for growers simply to conserve the supply produced, and to prepare and market more of it for planting purposes. Such action would directly result in a larger profit to producers of cowpeas, and indirectly benefit farmer consumers who desire to grow the crop for purposes other than grain production. To feed cowpeas suitable for planting purposes to live stock is a practice that growers should readily perceive unprofitable in view of the prices that cowpeas now command.

VELVET BEANS MAKE GOOD GRAZING CROP

Excellent for Cattle and Hogs in Fall and Winter.

Usual Period for Pasturing Is About Three Months but This May Be Lengthened or Shortened as Deemed Advisable.

Velvet beans are an important grazing crop for cattle and hogs in the South in autumn and winter, according to specialists of the United States Department of Agriculture. They are not grazed well by horses or mules, or by any live stock until after they are well matured or frosted. As the leaves, vines and pods decay but slowly when subjected to weather conditions, velvet beans will furnish feed until early spring. It is usually better to let the crop stand until it is well matured, or until it is killed by frost, as the leaves will be off the plants at that time and the corn which has been planted at the same time may be gathered with less difficulty.

The amount of grazing which will be afforded will, of course, vary with the growth of the crop and the quantity of corn not gathered, but it is the custom with many cattlemen to allow one-third to one-half acre a month for each steer or cow. The usual period for pasturing velvet beans is about three months, but this may be shortened or lengthened as deemed advisable. When the period is longer because of large acreage in proportion to the number of cattle there is necessarily some loss of feed through decay.

Hogs should be permitted to follow the cattle, as they will consume practically all the beans which the cattle fail to get. A common practice is to allow one or two hogs in addition to the cattle for each acre of beans. A good stand of velvet beans should produce about 150 pounds of beef and 100 pounds of pork an acre.

QUALITY IS URGENT FACTOR

Striking Example Furnished by Kentuckian, Who Markets Eggs, Poultry and Fruit.

An example of the part that quality plays in a business of direct marketing of farm produce is furnished by the experience of a man in Kentucky who markets eggs, dressed poultry, meats and fruits to consumers in Nashville, Tenn.

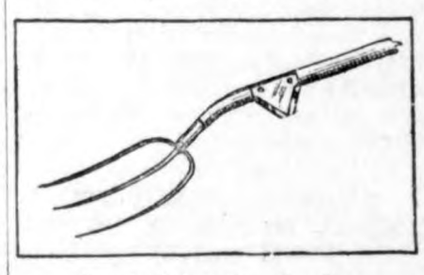
The business was established over two years ago by obtaining a friend as the first customer. From this modest beginning the producer has obtained sufficient customers to buy all of the high-grade produce he can supply. Most of the shipments are made by parcel post.

This business is conducted on the basis of high quality with adequate returns, says the United States Department of Agriculture. Customers are selected with as much care as most consumers show in selecting a producer from whom to buy farm produce. Customers are retained by never breaking the rule to supply only the best produce raised on his own farm. If, when an order is obtained, this farmer does not have produce of the highest quality, he informs the customer and states that unless otherwise instructed the produce will be shipped at the earliest possible date.

USEFUL FOR CUTTING BANDS

Device Illustrated Is Handy for Man Pitching Bundles to Shredder or Silo Filler.

The following is a handy way for cutting bands. The man who is pitching bundles to a corn shredder or silo filler can cut the bands as he pitches them to the machine, thereby saving the aid of one man to cut the bands.



Band Cutter for Bundles.

I also find it handy to cut the shock ties on corn when loading from the field, says a writer in the Farmer. To make same I attached a mower sickle section to the fork handle, as per illustration.

UNITED STATES APPLE CROP

Official Estimate Is Given at 223,000,000 Bushels, an Increase Over July Figures.

The official estimate of the apple crop in the United States is given as 223,000,000 bushels, and the commercial crop at 33,900,000 barrels, which is an increase of 3,666,000 barrels over the estimate given for July.

CLEAN EGGS BRING PREMIUM

Dirty Product, No Matter How Fresh or How Large, Always Sells at Big Discount.

Eggs that command a premium are, first of all, spotlessly clean. A dirty egg, no matter how fresh or how large it is, is always sold at a discount. One or two dirty eggs in a dozen will lower the price for the whole dozen.

VIGILANCE NECESSARY TO KEEP CHICKEN HOUSE FREE OF MITES

For Small Coops a Hand Atomizer Will Suffice for Applying Insecticides.

Poultry raisers are all too familiar with the common red or gray mite which infests poultry houses. In general those who are making a specialty of poultry raising have comparatively little trouble with mites, or at least they keep them reduced to a point where they are of little importance. On the other hand, farmers and others who raise poultry as an incident to other operations frequently find their chicken houses overrun by mites.

Detecting Presence of Mites.

The attack of this blood-sucking mite is of an insidious nature which does not readily draw attention to its presence, and often the poultryman is not aware of an infestation until he is attracted to it by the irritation produced by mites on his own body through coming in contact with the infested coops. The presence of the pest may readily be determined, however, by the detection of small areas on the boards specked with black and white as though dusted with salt and pepper. This is the excrement of the mites, which are hidden in adjacent cracks or rough places. More careful examination will reveal masses of mites in hiding, together with their eggs and the silvery skins cast by the young.

In moderately infested poultry houses the injury to the fowls is not easily apparent, but the constant blood loss and irritation are shown by decreased egg production and the poor condition of the fowls' flesh. In heavily infested coops it is not unusual for the chickens to become droopy and weak, with pale comb and wattles. Sitting hens desert their nests and thus ruin the eggs or, as is often the case, they are found dead on the nest, being killed outright by the attack of thousands of mites. In extreme cases a considerable number of fowls succumb, even though not sitting, and all are so weakened as to be very susceptible to various diseases.

Owing to the fact that mites feed during the night and secrete themselves in cracks and crevices during the day, their presence very often is overlooked until a very heavy infestation has developed. In such cases they should be attacked energetically. Although not hard to kill, the greatest obstacle is the difficulty of reaching them in their hiding places. Dust baths will not control them, as, at most, only the few which remain on the chickens during the daytime will be destroyed.

The first step necessary to destroy the mites is to get rid of the hiding places so far as possible. The roosts should be taken down and all unnecessary boards and boxes removed. In heavily infested houses the mites are to be found in all parts of the building, including the roof. Where they are less numerous the infestations usually are confined to the roosts and nests and the walls immediately adjacent. For small coops a hand atomizer will suffice for applying insecticides as sprays, but for larger houses a bucket pump, knapsack sprayer, or barrel pump is desirable. A rather coarse spray should be applied from all angles and thoroughly driven into the cracks. The floor also should be treated, as many mites fall to the floor when the roosts are being removed.

In tests conducted by the United States Department of Agriculture during the last two years a considerable number of materials used as sprays have proved effective. One of the so-called wood preservers was found immediately effective, and its killing or repelling power lasts for months. As this material is rather expensive (about $1 per gallon), and is too heavy to spray well, it is advisable to reduce it with equal parts of kerosene.

Crude petroleum is almost as effective, retains its killing power for several weeks, and in most localities it is very cheap. It will spray better if thinned with one part of kerosene to four parts of crude oil.

It has been found that one thorough application of either of these materials will completely eradicate the mites from an infested chicken house, but ordinarily it is advisable to make a second application a month after the first, and in some cases a third treatment is required. These subsequent applications may be made with a brush, using the materials undiluted and covering only the roosts, their supports, the walls adjoining, and the nests if they are infested. This method of application is effective for the first treatment also if the houses are not heavily infested. Poultry should be kept out of the treated buildings until the material is well dried into the wood.

Using Pure Kerosene.

Pure kerosene and kerosene emulsion in double the strength ordinarily applied to plants will destroy all mites hit, but these substances have not body enough to destroy those mites which are in more protected situations, and several applications at ten-day intervals are needed to destroy all the mites.

Arsenical dip, such as is used to destroy cattle ticks, has been found fairly satisfactory for use against chicken mites. Several applications are required to eradicate the mites from poultry houses.

SHOCKED CORN GOOD SILAGE

Refilling Silo With Surplus Even in Middle of Winter Is Most Economical Practice.

"Corn cut at the proper time and put into the shock can be made into good silage, even in the middle of the winter," says Alvin Kezer of the agronomy department of the Colorado Agricultural college. "Of course, such silage will not be as palatable as when siloed early and there will be more mechanical waste of leaves and other parts of the corn plant because the shocked corn had been stored for part of the winter, either in the shock or in stacks. But if this dry fodder is run through a silage cutter and the proper amount of water run in with it, it will make good silage and a much more palatable feed than the dry fodder, which will be eaten by the stock with less waste.

"Sometimes, shocking the surplus corn after the silos are filled and refilling from the shocked corn is a very economical practice, a practice worth remembering, especially when the capacity of the silos is not great enough to take care of the entire crop. It is a good way of improving a valuable feed."

VERMIN CARRY HOG DISEASES

Lousy Animal Will Consume More Feed Than Clean One, According to Many Experiments.

A hog affected with lice can't make as profitable use of his feed as one that is free from this pest. No successful hog man will dispute this statement; yet, judging from the condition of some farmers' hogs, it is doubtful whether all realize that it really costs money to feed lice. However, feeding experiments have been conducted from time to time which show plainly that a lousy hog consumes more feed per pound of gain than a clean hog. This loss of feed, however, is not the only reason for keeping hogs free from lice. Lice are also disease carriers. They will carry infection from one hog to another and that, perhaps, is as strong a reason for holding lice in check as any other.

VENTILATION FOR POTATOES

Tubers Tend to Sweat Upon Being Put Into Storage and Air Is Needed to Dry Moisture.

Large piles of potatoes should have ventilation channels provided, either by lattice work or by rows of crates. Potatoes tend to sweat upon being put into storage. Ventilation is necessary to dry this moisture. Only a general rule can be given, but potatoes should be kept as dry as possible, yet avoiding shriveling, and should be kept as near the freezing point as possible, yet avoiding freezing.

WILL AID WATERMELON CROP

Little Sandy Spot 10 by 40 Feet Fertilized Now Will Prove Quite Profitable.

If you have a little sandy spot on your farm measuring 10 by 40 feet, put on a little fertilizer now. Those watermelons will grow so rapidly next summer that you will be amply repaid.

DAIRY FACTS

POOR COW IS LIKE LAZY MAN

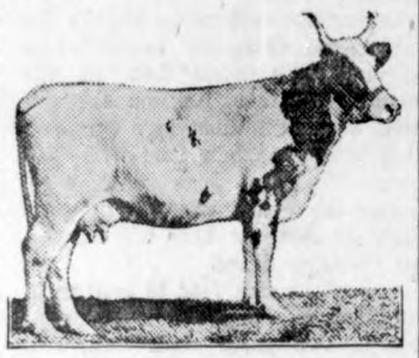
"Boarder" Should Be Discarded Forthwith and Replaced by Profitable Producer.

How many dairymen would keep a hired hand on their place who got up when he felt like it, worked when he felt like it, and did just as he pleased? Such a hired man would be a losing proposition and the man who would keep him would soon become bankrupt.

On the other hand, how many dairymen are keeping boarder dairy cows that produce just as little milk as they feel like producing, with little or no profit to the owner?

A dairyman cannot afford to keep a man that does not do more work than he is paid for doing. Neither can he afford to keep a cow that does not return more money to him than he puts into her in feed and labor.

How many cows in your herd are returning a fair profit for the feed



Easy Matter to Permit Cows to Decrease in Milk Flow but Hard to Bring Them Back.

consumed and how many are returning little or nothing or even costing money to keep? The profit made from a cow depends upon the amount of butterfat produced and the cost of producing same. Monthly records and the Babcock test will detect the boarder cows. Why waste time and money on cows that do not pay for their keep?—W. E. Spangler, Colorado Agricultural College, Fort Collins, Colo.

SALT ESSENTIAL IN RATION

Material May Be Supplied by Mixing With Feed, or It May Be Left in Convenient Box.

Practical observations and scientific investigations have shown that salt is essential in the ration of a dairy cow. From one to three ounces per day is needed, depending upon the amount of milk produced. According to Babcock's investigations at the Wisconsin experiment station, a cow needs one ounce per day per 1,000 pounds live weight with an additional 6-10 of an ounce for each 20 pounds of milk produced. Salt may be supplied by mixing the proper amount with the feed, or it may be placed in some convenient place where the cow can get at it daily and take such amounts as her appetite demands. Many dairymen prefer to place a lump of rock salt where the cow can lick it at will. This is really cheaper and there is less work. But, however you feed it, don't forget that the cows must have it—not once every week or two, but at least each second day and each day is better.

FEEDING COWS SAWDUST

The facetious statement, repeated in a joking way, "Put green goggles on the cows and fool them by feeding sawdust and shavings," is apparently not going to be necessary in future to feed them that product. It has been found by experiment that sawdust from non-resinous soft woods can be used, but it first must undergo a process of treatment with certain acids, which change a part of the dry matter into carbohydrates. However, the low protein content of sawdust as a feed would not augur well for its future use.

GOOD DAIRY HEIFER RATION

Missouri Station Recommends Alfalfa and Corn With All the Silage She Will Eat.

One of the cheapest and best winter rations for the dairy heifer, according to the Missouri station, is an average daily of about six pounds of alfalfa hay, two pounds of corn, and silage at free will (this means on the average about twenty pounds daily). This kind of ration has kept the heifers growing at just about the right rate to make the best kind of mature cows, and yet the expense has not been unduly great.

HIGH COST OF COMMODITIES

Killing of Calves for Veal and Spaying of Heifers to Fatten for Beef Is Cause.

That the killing of so many calves every year for veal, and the spaying of heifers and fattening them for the block, is responsible in a large measure for the present high prices of certain food commodities, there can be no question.

GIVEN HIGH PLACE

International Honors Awarded Western Canada Products.

Proof of What Can Be Done, With Intelligence and Industry, on Good, Low-Priced Land.

The 1920 International Live Stock show at Chicago was probably the best that has ever been held, and as is pointed out by a Canadian newspaper writer, the number and quality of the exhibits "indicated a new milestone on the road of progress." This year it was truly "International." The part that Canada took showed a spirit of friendliness on both sides of the line that was highly pleasing.

Six provinces of Canada were represented in varying degrees, and when the handsome share of the prizes that were carried off by our northern neighbors, achieving phenomenal success in view of tremendous competition, is considered, there is reason to hope that in the minds of these people there will grow an esteem for the International that will be helpful to both countries.

Canada won a number of championships, not the least of which was the sweepstakes carried off by Mr. J. C. Mitchell, of Dahinda, Saskatchewan. In this award may be seen an object lesson, going to show that it is not always the man born with a silver spoon in his mouth to whom the greatest degree of success will attach. It will be interesting to relate that Mr. Mitchell, the recipient of these great honors, came from the manufacturing city of Manchester, England, unacquainted with farming, but with the lure of the land upon him. Because he had been told of the success that followed the tiller of the soil of Western Canada, fifteen years ago he decided to make his home in Canada, and selected as a homestead the land upon which he grew the wheat that has brought him a world's championship. It is true he had his ups and downs, but he continued and is now enjoying the fruits of his labor and the experience gained in a manner of life that was enjoyable. But he is still a simple farmer and will continue growing grains that, with the knowledge he possesses, industry that is essential, and above all, a soil and climate that are favorable, will secure many more world's championships.

Well, then, too, there was born at Stratford, Ontario, a boy named Lucas, now of man's estate. Although a town boy he always had a desire for farming. He moved to Alberta to the neighborhood of Cayley, and those who have had no idea where Cayley is will know now, for Mr. Lucas has placed it "on the map." He had some of his 49.2-lbs.-to-the-bushel oats at the International, and with 240 competitors against him he took the championship and sweepstakes. This was a notable achievement. As has been said, when he was a boy he took a liking to farming, but the greatest obstacle in the way of realization of his dreams was the practical impossibility of a man without a large amount of capital purchasing the high-priced farm lands of the settled parts in the neighborhood he lived in. However, after leaving school he heard of the low-priced lands of Western Canada. This was his opportunity, and he embraced it. Beginning at 15 years of age with 160 acres of virgin prairie, and with no practical farming experience, he has now, by perseverance and industry, increased his holdings to nearly 1,000 acres. Such is the brief history of the man who carried off the championship for the best grown oats, and it is also an example that might well be followed by many who are struggling today against the prices received for the produce grown on high-priced land, or to those who, as was the case with Mr. Lucas, had little means but an abundance of energy and a flood of ambition. Nowhere are there offered inducements such as are offered in Western Canada.

There were 25 prizes offered in the class for hard spring wheats and 20 of them went to Western Canada.—**Advertisement.**

While the Getting Was Good.

"You know Jack Carter?"

"Oh, yes. Jack? Finest fellow you ever met!"

"He seemed to be all right, but I don't know him so well, and before lending him the $100 he has asked for, I thought I'd just inquire a bit."

"Jack has asked you for $100?"

"Yes."

"Well, as a great personal favor to me, I'll ask that you let him have it."

"Favor to you! How so?"

"Well, Jack owes me $50, and if you lend him $100 and I tackle him before he has a chance to get rid of it, there will be an almost even chance that he will settle up with me."—Philadelphia Public Ledger.

Watch Cuticura Improve Your Skin. On rising and retiring gently smear the face with Cuticura Ointment. Wash off Ointment in five minutes with Cuticura Soap and hot water. It is wonderful sometimes what Cuticura will do for poor complexions, dandruff, itching and red rough hands.—Adv.

Airplanes Must Prove Worth.

From time to time a photograph appears, depicting a new airplane of compact dimensions and equipped with a low-power engine. Such airplanes are generally hailed as "every body's" airplane and the coming "flivvers" of the air. Yet an examination of these machines soon discloses the fact that they are of little practical value. They are too small to be steady in flight, too low-powered to fly under moderately adverse conditions, too flimsy to last long, and, taking it all in all, absolutely worthless for serious work of any kind. They should generally be treated as novelties, except in rare instances.—Scientific American.

Constipation can be cured without drugs. Nature's own remedy—selected herbs—is Garfield Tea.—Adv.

Not Safe.

A young doctor was visiting Mary Ellen's single aunt. He made much over the young woman, but she was singularly aloof. Finally the young man asked the little girl to kiss him, but she refused with dignity.

Then auntie came to the rescue. "Don't you like Doctor R——?" she asked. "Why won't you kiss him, dear?"

Mary Ellen raised her head proudly. "My brother Bob told me never to kiss a doctor," she answered. "He said if I did I might get my throat full of germs."

MAKING BEST USE OF PAINT

Coloring Must Be Selected According to the Material on Which It Is to Be Used.

Paints and painting cost less than repairs necessitated by decay or disintegration.

There is no such thing as an all-service paint. Paint should be selected according to the material to be painted and the conditions under which it must give service. The wear on a floor is more severe than on a wall, hence the floor calls for a tougher, more elastic paint.

Painting should not be done when the temperature is lower than 50 degrees Fahrenheit, as the paint will not flow well. It is impractical to paint a hot surface. The old painting maxim is: In spring and fall follow the sun; in summer, follow the shade.

Outside painting should be done in dry weather. Surfaces should not be painted when wet.

Surfaces to be painted should be gotten as smooth and clean as possible. They should be free from grease. If painting new wood, knots and sappy surfaces should be shellacked first. If painting over previously painted surfaces, all blisters and loose or peeled spots should be scraped or burned clean. A brushing with a stiff wire brush followed by sandpaper is good practice.

A priming coat usually pays for its cost. A firm base for the final coats is very essential to insure long service. The primer should be thin enough to penetrate the lumber. It should be well brushed in.

Only pure linseed oil or pure turpentine should be used to thin paint.

TOWN AS PART OF COUNTRY

Southern Magazine Has the Right Idea That Communities Must Stand or Fall Together.

The country town is a part of the country. It is one of the encouraging signs of the time that country town business men are coming to realize this fact. It has not been so long ago that every little town thought that its business was to grow into a city just as soon as possible. Some towns and many town people still think so. Many small-town people, too, still think that their chief relations and interests are with the cities rather than the country. The most far-seeing business men have come to know better. They are seeing more and more clearly that the town, the small city, is an integral part of the country, that it prospers only as the country prospers, and that it has its place in the scheme of things to be the life center of the country about it. The town merchant who opposes co-operative buying or selling by the farmers of his territory, the town banker who would hinder the establishment of farm loan associations in his county, the town editor who neglects the interests of the back-country districts, are becoming more and more out of date. Not until the country and the country town learn that they are yoke fellows and must pull together can either make the progress it should. And both are learning.—Southern Agriculturist.

Easier to Build Homes Now.

A well-known building authority states that the average man is better able to build and own a home today than five years ago. "Money values," he says, "have been batted about, and the condition has been aggravated by ill-advised buying by workers with suddenly acquired wage increases. These wage increases have gone largely into the purchase of luxuries, resulting in a shortage of necessities. The reaction, however, has started in. Through all this period of extravagance and recklessness the solid, substantial element of our people have kept their heads. They have saved money. Prices are on a downward trend and will reach a normal level in three or four years. In spite of the high cost of labor and materials prices can be maintained at a fairly reasonable level. Homes can be built now and the banks are willing to help."—New York Sun.

Need of Home Ownership.

Robert E. Simon told the convention of the Real Estate association of the state of New York held at Rochester, that every effort should be made to encourage home ownership, whether in the single or two-family house, or by co-operative ownership in the multi-family house.

"The large percentage of tenantry is one of the dangers in our country today," said Mr. Simon. "While France has 80 per cent of home owners, the United States census of 1890 showed 48 per cent, and 1910 only 38 per cent; in 1920 it probably will be still less. This tide must be stopped and turned in the opposite direction."

All Forms of Public Wealth.

The shade trees and ornamental plantings of parks and streets, grounds of health and pleasure resorts, public institutions and of city, suburban, country and farm homes, represent a form of wealth which the people realize in health, recreation, enjoyment of the home, and the increased value of property.

PAINT

By VIRGINIA BAKER.

(©, 1920, by McClure Newspaper Syndicate.)

They were just at that stage in the affair when other people were saying: "When do you suppose they'll announce it?" and they were saying to each other all sorts of sweet unrepeatable things.

But, between you and me, what he said was really quite conservative, for he was Scotch. Added to this native circumspectness was an undemonstrativeness fostered by a mother who came from old New England stock. So, because he inherited a conscience and old-fashioned ideas, one of the things he had to whisper to his girl was:

"Philbie, dear, I wish you wouldn't put so much of that red stuff on your lips and cheeks. You really don't need it, you know."

This was just a mild protest. But, as Philbie had no Scotch or Puritan blood in her veins, rather quite a spirited mixture of Irish and French, she replied with a mischievous toss of her bobbed brown curls: "How do you know? Do you know if you've ever seen me without it?"

"Well, really now, as you put it that way, I couldn't exactly say." Angus sidled down, rather embarrassed, because he had only seen Philbie 12 and a half times. The half was when he had first met her—in the paint and varnish department of the Armstrong Hardware company, where Angus was clerk. Philbie had given him quite a large order for white and green and black and red paint. She and her mother were fixing up the little house they had bought with part of dear papa's insurance money. They had never had a real home before because they had traveled around with papa, who had been an animal trainer with Buys Sinko circus.

It was this environment which was responsible for Philberta's pernicious practice of rouging.

Then, as lovers always do at least once, they quarreled. He even went so far as to say that he didn't want to kiss her any more if she smeared that stuff on, because his lips never touched hers—they just tasted that paint.

At first Philbie was furious. "I guess you'll never get the chance again, after that," she flung at him.

Angus took his cue and his hat. But the animal training instinct, which she had inherited from her father, made Philbie stop him when his hand was on the knob of the screen door.

"Angus," she said, "I won't put it on any more." And she meant it, because she saw the truth in his brutal speech. She wanted him to kiss her now, quick!

He turned and saw her there rubbing furiously at her lips with a bit of a handkerchief. But because he was Scotch he did not gather her in his arms and cover the red on the handkerchief as well as her lips with penitent kisses, as a movie lover would have done. Oh, no. Because he was Scotch, he said: "You will promise me, Philberta, never to use or have in your possession again this disgusting red ointment."

Philbie meekly promised, "Yes," because just then he kissed her.

Philbie was very busy finishing the dressing up of the little house, because, on the afternoon of a certain red letter day, ten of her best girl friends were coming to a tea party.

And then one day, a week before the date set for the party, Angus called in the morning when Philbie was not expecting him. His call was very informal.

He almost had her in his arms, and bent down—but he did not kiss her. He had seen her face. There was a red blotch on each cheek.

He stared at her so long that Philbie asked in a troubled voice: "So early in the morning! What do you want?"

"Nothing, now." Angus cut off the words with cold finality. Then, as an after-regret, and with deep reproach in his voice: "You said you wouldn't put it on again!"

"What?" asked Philberta. And because she looked at the can in front of her, she put both hands to her cheeks. Thereupon she began to laugh an ever increasing crescendo of gurgles and trills. Finally, she struck her already slightly discolored finger into the can before her, and with it she touched each of Angus' cheeks.

That outraged gentleman had stood in motionless amazement at her mirth, but now he cautiously put up one of his own fingers to his cheek. It felt wet and rather sticky. He looked at his finger, smelled of the red smooch, and then he, too, began to laugh. When a Scotchman finally does see a joke on himself, he can appreciate it.

"What the deuce were you doing anyway?" Angus asked.

"Oh, just trying to paint up those two old card tables to look oriental, like some lacquered ones I saw in town. Won't the girls think they're sporty when they see them on the veranda next Thursday?"

"George! What a capable little wife you're going to make!" and Angus laughed some more.

The laugh did not last as long as it might have; it was very soon smothered against a daub of red on an otherwise smooth, pink cheek. Yes, Angus not only kissed the paint on Philberta's cheek, but he himself transferred some of it to the place where he had said it was most especially tabooed.

FARM POULTRY

SUCCESSFUL SQUAB RAISING

Birds Must Be Kept Free From Disease and Insect Parasites—Keep House Clean.

There is very little chance of making money from squabs, unless the pigeons can be kept comparatively free from disease and insect parasites, pigeon specialists of the United States Department of Agriculture point out. If healthy breeding stock is obtained, the houses and yards kept clean, and careful attention given to the birds, diseases and parasites should not be a troublesome factor in squab raising.

The stock should be carefully watched and any sick birds removed

Healthy Breeding Stock Is Essential for Success With Pigeons.

from the breeding pens. The house should be kept dry, clean, well ventilated, and free from drafts. Have the floor covered with 1 inch of fine gravel and rake off frequently the manure which collects on the top. Keep the yards clean either by scraping the surface and adding fresh sand or gravel, or by digging over the land and, if possible, planting it to grain.

The nests, nest boxes, and pens should be kept clean, but it is not advisable to disturb more than necessary the nests that contain eggs or squabs. Spray the pens frequently with whitewash containing a little crude carbolic acid, or with a coal-tar disinfectant; examine the birds for feather lice, which are troublesome, especially in hot weather. Birds having many lice should be treated with sodium fluorid, either dusting by the pinch method or dipping in a solution, the latter method being preferable. The nests or nest pans should be cleaned out and the nesting material removed whenever dirty, care being taken not to disturb the squabs any more than is absolutely necessary.

EXERCISE QUITE IMPORTANT

Close Confinement During Winter Months Is Not Conducive to Profitable Results.

During the spring season fowls having free range get abundant exercise, but during the cold months many hens suffer from lack of exercise. Close confinement without exercise is not conducive to getting the best results from a flock, although the feed provided may be the best, for idle hens soon grow too fat to lay. It is almost impossible to give laying hens that are confined too much exercise.

The fowls may be encouraged to exercise in various ways, such as suspending cabbage heads, beets, etc., so that the birds have to jump for them, and scattering grain in the litter. The litter should be from four to eight inches deep and may consist of straw (either cut or whole), hay, leaves, buckwheat hulls, shredded corn fodder, or any like convenient material. The hens should be kept hungry enough so that they will work diligently all day for the corn scattered in this litter, say poultry specialists of the United States Department of Agriculture. Whenever the litter becomes damp or soiled it must be removed and fresh put in.

GREEN FEEDS FOR CHICKENS

Sprouted Oats, Alfalfa Meal, Chopped Alfalfa, Clover Hay and Beets Are Recommended.

Good kinds of green feeds for hens in winter, recommended by the United States Department of Agriculture, are sprouted oats, alfalfa meal, chopped alfalfa and clover hay, cabbages and mangel beets. Cabbages may be hung up in the poultry house; the beets are usually split and stuck on a nail on the side wall of the pen about a foot above the floor to keep the feed clean. Keep oyster shells, grit, charcoal, and plenty of clean drinking water before the hens all the time.

PULLETS MAKE BEST LAYERS

Feeding Stimulants or Highly Concentrated Food Is Most Injurious Practice.

When pullets are forced to lay early, by stimulants or highly concentrated food, it is an injury, as it taxes their vitality. A pullet that is forced will lay very small eggs for a while, and when she ceases, in order to rest, she will not begin again as soon as an ordinary hen. She becomes prematurely old, and, on the average, does not prove as profitable as when she is given time to mature before beginning to lay.

CASTORIA

For Infants and Children.

Mothers Know That Genuine Castoria Always Bears the Signature of Chas. H. Fletcher. In Use For Over Thirty Years

CASTORIA

THE CENTAUR COMPANY, NEW YORK CITY.

Robin Redbreast's Annual Jag.

The robin has been given anything but a kindly greeting upon his visits to the South each winter, and there are perceptibly fewer now than there were a decade ago, due chiefly to the ravages of market hunters with what is known locally as the "$5 single-barrel," meaning a cheap 12-guage shotgun, with which scores of fat robin redbreasts may be killed in a few hours. The robin's bad habit of getting on a red haw jag when he arrives in the South makes him easy prey for small boys with slingshots or even with sticks, for the enticing red berries make him so drunk he isn't able to fly.

Garfield Tea, taken regularly, will correct both liver and kidney disorders.—Adv.

Not Guilty.

Mr. Sanders desired the job he was applying for. He needed it badly. He and the prospective employer were coming to satisfactory conclusions when Mr. Sanders was asked about his habits.

"I never had any," said Mr. Sanders positively.

"Never had any?"

"No, sir, I never had any habits. I can get you a written guaranty that I never had a single habit."

Information Bureau.

A man sent his bumptious son to college and in a month or so wrote inquiring how he was getting along in the grind of knowledge. He got this characteristic reply:

"Fine. Write often and ask me anything that puzzles you."—Everybody's Magazine.

80 Years Old —Was Sick

Now Feels Young After Taking Eatonic for Sour Stomach

"I had sour stomach ever since I had the grip and it bothered me badly Have taken Eatonic only a week and am much better. Am 80 years old," says Mrs. John Hill.

Eatonic quickly relieves sour stomach, indigestion, heartburn, bloating and distress after eating because it takes up and carries out the excess acidity and gases which cause most stomach ailments. If you have "tried everything" and still suffer, do not give up hope. Eatonic has brought relief to tens of thousands like you. A big box costs but a trifle with your druggist's guarantee.

"A few minutes more, Peggy dear, and Daddy will be back with the Kemp's Balsam. Then you can go to sleep and forget that horrid old cough.'

ADVERTISEMENT FOR BIDS

Sealed bids on Bridge Lumber will be received at the office of the County Auditor of Hancock County, Iowa, until 1:00 o'clock p. m., Jan. 4th, 1921 and will be opened at that time.

A certified check of five cent (5) of the bid made payable to the County Auditor should be filed with each bid, which in case of the bidder or bidders receiving the ward, should he fail to execute a contract and file a bond with ten (10) days after the acceptance of his bid, shall be forfeited to the county as liquidated damages.

All bids must be sealed and plainly marked. No bids will be considered which contains a clause in which the contractor reserves the right to accept or reject a contract awarded him.

The successful bidder will be required to furnish a bond for twenty-five per cent (25) of the amount of the contract, issued by responsible security, approved by the Board of Supervisors, and drawn to protect the county and any subcontractor.

All bids and materials must comply with the State Highway Commission Standard Specifications now in effect.

Bid to deliver in car lots at any railroad point in the County.

Ability to make prompt shipments and delivery will be considered in the bid.

The county reserves the right to reject all bids.

Payment will be made in warrants drawn against the Bridge fund of Hancock County, warrants to be cashed on presentation.

Tenders will be received on the following item:

2 cars Bridge Lumber.

REAL BLOW AT RACE SUICIDE; ONE FAMILY INCREASED BY THREE

Northwood—A Northwood doctor reports the birth of triplets Wednesday evening at nine o'clock to Mr. and Mrs. Charles A. Cornell of Gordonsville, two girs and a boy.

Mother and chidren are doing finely while the neighborhood is quite excited over the event. Mrs. Cornell was formerly Miss Elsie Brighley, a well known school teacher. There is another little girl 3 years old in the family. Dr. Sanders of Northwood is the attending physician and these are the first tripets in his experience.

FARMER AT ROWAN BURNED IN BLAST

Spills Gasoline While Filling Lantern Explosion Sets Clothes Ablaze.

Rowan,—H. N. Nettles, a farmer residing two miles, north and one mile west of here, was very badly burned in a gasoline explosion.

Nettles was in an enclosed porch of his house, filling a gasoline lantern preparatory to doing the evening chores. He had the lighted lantern in one hand and an open measure of gasoline in the other. In some manner he stumbled over a block of wood, spilling the gasoline into the flame of the lantern.

In an instant he was ablaze. He rushed out doors, where his hired man, seeing his plight, began tearing the blazing clothing from him. The man's hands were badly burned, but he tore the clothing from Nettles and undoubtedly saved his life.

Nettles was badly burned about the head, shoulders and body, with both hands severely burned and both legs, the right limb from the knee down especially, being in bad shape. Medical attention was immeditely secured and the unfortunate man is slowly recoverign.

Mr. Nettles is a man about 40 years old, and was to hold a closing out sale on his farm Friday.

Bats Not Classed as Birds.

The bureau of biological survey says that bats are not birds. They are mammals, though adapted to life in the air by the possession of wings formed by a membrane attached between the greatly prolonged bones of the arm and hand.

MAKING HER WAIT

By RUBY H. MARTYN.

(©, 1920, by McClure Newspaper Syndicate.)

Grizel had stopped on her way home to put another bit of money in the village bank. But the big house had never seemed so lonely nor her waiting quite so futile as it did this sunny day when her bank credit stood for an even thousand. Grizel held the worn book tightly as she went up through the house where she had lived alone since her father died. She did not need to glance through the open doors to be reminded that the rooms needed renovation. Had she not known the way so well she would have stumbled on the attic stairs because of tears. Living here alone, saving every bit she could to eke out the restoration fund. Grizel was keeping her tryst for the soul and body of Jim Brett.

"I promised always to be waiting, and to believe he will make good," she whispered on the stairs.

Stepping into the attic she locked the door behind her and crossed toward the eaves. She always did lock the door before she opened the old, iron-bound sea chest that smelled of the stuff of much voyaging around the world with some ancestor.

When they were children Grizel and Jim had thought the rambling attic a marvelous place for games and damsels in distress, and kings, and queens and knights errant. Even then Grizel had kept her best treasures in the old sea chest, and what treasure could need more careful guarding than Jim's story of temptation and fall, and his determination to make good the awful deficit he had peculated from the bank? Was not that confidence for her the greatest surety of his love?

So it was that Grizel had kept her tryst these five years since the shortage had been discovered and Jim had fled to escape the punishment. How much time stretched ahead until he should have saved the money to make restitution, and return? She dared not ask to receive one word of assurance from Jim in his far country. She dared not lose for one moment the grip on her own faithful waiting. That simply must have some hold on Jim! And now she knelt there by the open chest to renew her promise.

Somewhere at a distance a shop whistle blew, and Grizel jumped up. She had forgotten the attic door key that had slipped into the folds of her serge gown, and it clattered to the floor, bounced sharply on the plank and slipped into a wide floor crack. Grizel heard it hit the sides of the partition as it fell down and down.

"Now I'm locked up here!" she cried, dismayed by the immediate difficulty.

She could not hope to break down the door of strong, hand-hewn planks. She could not hope to make any neighbor hear from the single, small, back window of the attic. It was a question when she might be searched for. She opened the window to let in the sunny air, and knelt by the sill and laughed softly at her sorry plight. She might well be a real damsel in distress. And Jim had always come to the rescue when it was a game.

The shop whistle blew again, and Grizel settled to watch. The shadows had lengthened to the wall when a boot crunched on the gravel walk below. Some one was at the house door.

"I'm locked into this attic!" called Grizel. "If you will go to the shed you will find a large magnet to tie to a rope I will let down!"

When she had the rope down he came around the corner with the shoe-shaped iron, and tied it on.

"Pull away, my lady Grizel!" he called.

"Jim!"

"Pull away," he said sternly.

Grizel's hands trembled on the cold iron of the magnet, and then she let it down through the floor crack to reach the key. Would the magnet find that iron? Would the key cling fast? The rope in her hand slackened when the magnet touched bottom, and then she pulled it taut. The key was found and held!

Flinging open the unlocked door she saw Jim, older, thinner, with eyes that questioned hers, as he stood there on the attic stairs. Grizel put out her hand, but he had no mind for social amenities.

"I've just handed the money in at the bank," he said, slowly.

"You saved it all?"

"Every cent! I'm ready to start for myself now. I guess I need you more than ever, Grizel, but it isn't fair to ask you to make any such wait as you may have to until I'm on my feet. That is what I came around to say."

"I don't see us waiting, Jim! I've got some money saved that I can use to fix the house up, and we can start having a home right now, my knight!"

"My lady Grizel! A fellow just has to keep making good with yourself having the faith that he will!" said Jim.

Record for Woman Machinist.

Miss Annie Tobey, an operative in the electrical shop at the Portsmouth navy yard, won a contest for women riveters recently when she drove 264 copper rivets into battery boxes in two hours. Machinists said this was a record for women.

Value of an Impelling Idea.

A famous French political economist once said: "What I admire in Christopher Columbus is not that he discovered America, but that he went to look for it under the inspiration of an idea."

GOVERNMENT SUPERVISION

Nineteen Twenty-One

On this 21st birthday of the Twentieth Century the First National Bank of Klemme expresses the hope that you are entering upon a year of health, happiness and prosperity.

This bank can contribute to your prosperity by applying sane counsel to your financial problems, by pointing out wise investments and supplying a general banking service which will meet your every need.

A Happy New Year 1921

New Year's Eve

by Alvah N. Narrington

"RIGHT foot forward, left foot back, double shuffle. Zip!" Thus Hal Burton, with boyish animation, with youthful longing, too, as he glanced through the open window commanding a clear view of the river, frozen solid, packed with a gay throng. He could catch the inspiring clang and whistle of the bright flying skates. The fact inspired him to redouble his present efforts, "parlor skating," for a surety, for Hal had been set the task of polishing the parlor floors. He wore a pair of big felt boots and was executing an ungainly dance. When he paused it was to send flying from a bag at his side a sprinkle of wax. Then he resumed his vigorous gyrations, whirling, singing, barely pausing for breath.

"Right foot, left foot, any foot at all. Done! Now for half a glorious day on real skates, just as sister Marcia promised."

"Sister Marcia" entered the apartment as Hal was removing his impromptu skates from his tired feet. She commended his work and told him there were freshly cooked doughnuts in the kitchen, and Hal darted away with a joyous shout.

She was a fair chatelaine and lady bountiful, this lovely Marcia Burton. Perhaps a subdued sadness in her eyes, a slight firmness about the lips betrayed hidden emotion, but well under curb. It was two days before New Year's and festal occasions always brought memories of the past, of one especial passage in her life where love had flamed for a day to flicker only vaguely, distressingly through the later years.

If she had borne secret disappointment, her gentle winning ways concealed it. There were two Marcia would miss—her father, who had died during the year; the other one who had dropped out of her life three years ago, mysteriously, with an abruptness to this day inexplicable—Bruce Telford.

At that very hour, in the city one hundred miles distant, this selfsame individual was thinking of her. Perhaps it was some seasonal telepathic influence, perhaps unconsciously his thoughts were always fixed upon Miss Burton.

There was reason why this should be so. Their lives—and loves—had been more intimately commingled in the past than the casual world suspected. Marcia had been a friend of Telford for over a year. Each recognized a closer tie as time went on. One eventful night at a social function he

There Were Two Marcia Would Miss.

had been overcome by her rare beauty and kindly consideration. As they parted he had whispered into her ear that he wished to write her something of interest, something that had been in his heart for a long time. The letter was dispatched. One day, two days—no reply. His soul was stricken, not only with bitter disappointment, but with injured pride and chagrin. All womankind foresworn, Bruce Telford had left the town and had plunged into business, cold, exact, systematic, to assuage the sorrow that had crushed his spirit to the ground.

He had prospered beyond his fondest dreams, but at what a sacrifice! He had allowed business to absorb him, fancying he was forgetting the past. This particular afternoon, so close to the end of a year, it seemed as though he reviewed his old life, just as his busy bookkeeper, bent over his desk, was bulking up the twelve months' brokerage operations. So wraiths of the far past flitted through Telford's mind, with Marcia ever a lonely though distracting presence. The memory disturbed him. He arose and paced the floor. Then his glance became fixed on old John Graham, his bookkeeper. Working diligently, Graham was humming softly an old familiar tune.

Bruce Telford felt ashamed as he considered his own selfish self-centered three years and the man before him. Within six months Graham had lost his wife and child. His brave spirit had not sunk. He had adopted two little orphans, sent for his sister and was making life radiant for others, despite his sore affliction.

Telford followed a quick impulse. He returned to his desk and wrote out a check for one hundred dollars. Then he stepped beside his industrious employee.

"Make a happy New Year's for your folks at home, Graham," he said with assumed lightness of tone. "And by the way, we'll close up for the week. I think I'll take a little run to—to—down into the country."

Bruce Telford left the city with a well-stored suitcase. The next afternoon saw him ringing the doorbell of the old mansion where he had spent so many happy hours. The servant recognized him with a start and showed him into the parlor.

There were old familiar aspects to the room, and there in the alcove was the special corner always given to dead Mr. Burton. The caller even recognized his desk, his armchair, his favorite books. It looked as though this was a spot sacred to the memory of the beloved parent, preserved as of old and not disturbed. Involuntarily Telford took up one of the volumes. He instantly recognized a classical author from whom Mr. Burton had frequently quoted. Almost unconsciously he turned over the leaves. He smiled in sad retrospect as he noted a line that had been a favorite with the dead man, and, following the context, turned over a new leaf—

No marvel that he started! That volume had probably remained unopened for years. There between the pages lay three letters. They were yellow and faded with time. Each one bore an uncanceled stamp. Undoubtedly given to Mr. Burton to mail, in his absent-mindedness he had placed them temporarily in the book and they had never been mailed.

"Mr. Bruce Telford"—one was addressed to himself. And in Marcia's handwriting! His heart began to beat wildly. Could it be—he was interrupted. He knew not why, but with almost eager haste he closed the book, thrusting the letter into his pocket. Marcia entered the room.

They became almost jolly over the package of presents he had brought for the little ones. They spoke of old friends, of the New Year's eve only a few hours distant. Would he stay to tea and later join her sister and her husband in a skating party?

Bruce Telford sat in a strange glow as later Marcia left him to direct preparations for tea. His hand stole to the letter in his pocket. What might it not contain—her reply to his letter, so cruelly withered through three long, bitter years!

"No," he said, checking an impulse urged by a rare heart of hope—"later."

It was like a dream, the succeeding hour, as he was greeted by the members of the family, made to feel at home seated at the table with Marcia, flushed, radiant, kindly as always and more lovely than ever.

New Year's eve—how royally the old church bells rang! A slide across the safe bound ice of the river, a delicious moment as, all equipped, Marcia's hand rested in his and they glided over the smooth, shining surface as of yore.

Half a mile from the others, in a swift sweep down the river, she stumbled and he caught her in his arms and insisted on her resting on an old log. He seemed in some dream of delirious delight, a magic force impelled him to speak at last.

"Miss Burton—" he began.

"Surely we are old friends, Bruce," she interrupted, with reproachful wistfulness.

"Yes, Marcia," he corrected himself. "I have a letter I found in a book at your home. Was it an answer to my own in that long ago?" and the words that explained all came from his lips in impetuous rapidity. "See, I have not opened it," he added.

He tendered it to her. Her face had grown colorless, but only from the startling discovery of the delayed

Glided Over the Smooth, Shining Surface.

missive. It fluttered in her clasp for a moment. Then she held it out toward him, her face flushing, her eyes downcast as she almost whispered: "It was yours three years ago; it is yours just the same today."

"Then—then I have come into my own!" he cried in surging hope. "Dare I hope—"

"I have not changed," she said softly. "When you read it—"

Ah! He could read it in her telltale face now, in her happy eyes. His arm stole round her. She did not draw back.

"Through all the years—oh, worth the waiting!" he cried.

(©, 1920, Western Newspaper Union.)

Ring Out the Old! Ring in the New!

AND now we hear the tolling bell,
That sounds the Old Year's dying knell,
And safe within the fleeing past
Its good and evil will be cast,
To oft return, in future hour,
Brought by retentive memory's power.
And what the New Year, ere its close,
May have in store, no mortal knows.
But if all men were good and true,
And would their Christian duty do,
The world would seem to hear again
"Sweet peace on earth, good will to men!"
Then all could shout, the whole world through,
"Ring out the Old! Ring in the New!"

OH, THINK of those bound down by sorrow,
Now longing for some glad tomorrow
To lighten up the heavy load,
That they must bear upon life's road,
Who journey on from day to day,
Along life's cold and rugged way,
Still longing, as they onward tread,
For deeds undone or words unsaid,
Though friendly smile or kindly hand—
Two things at every one's command—
Would help to soothe the gnawing pain,
Or break the links of sorrow's chain.
So, Christian friends, your duty do—
Ring out the Old! Ring in the New!

WITHIN a learned land like this
Some think that ignorance is bliss,
While ruthless hands and scheming fools
Make rule or ruin their vicious tools;
With no respect for God or man,
Destructive methods are their plan;
Not using reason for defense,
Resort they to fool's violence;
Imaginary wrongs they'd right,
By senseless torch or dynamite.
Oh, rulers of our mighty land,
Check this vile scourge with firmer hand!
Then tranquil peace will come in lieu—
Ring out the Old! Ring in the New!

BEAR this in mind, what e'er befall,
The hand Divine rules over all.
And when we greet the glad New Year,
With all its joy and social cheer,
Let each resolve his best to give,
That this old world may better live.
And as we go but once this way,
Let's shed sweet sunshine's golden ray,
And bring good cheer to hearts bowed down
By adversity's cold, sullen frown.
Then when the sands of life are run,
We'll hear the welcome, "Well, well done!
Come, reap the joys prepared for you!"
Ring out the Old! Ring in the New!

—George W. Armstrong.

FIND LIKENESS OF AUGUSTUS

Archaeologist Discovers Splendid Statue of Roman Emperor at Tivoli.

LIFELIKE STUDY BY ARTIST

Valuable Addition to Portraits of Roman Emperors and Is Only One Extant Done During Emperor's Life.

Rome.—Tivoli, that lovely little city perched above Rome, called Tibur by the ancient Romans, has just given to the archaeological world two new art treasures—an augusteum, or hall, and a splendid head of Emperor Augustus.

Prof. Alessio Valle, one of the archaeologists who have made Tivoli a special study, long believed that Tivoli should reveal an ancient hall of importance, considering the flourishing state of the city in Roman days. He began to dig near a newly discovered weights and measures office, also dating from the Roman empire, thinking that the public weights and measures must surely be near some important hall.

He was not mistaken. He has opened up a hall with a Roman pavement of white and green marble which looks as if it were put down this morning, so fresh is it, and the statue of Augustus, broken but with the head intact, as the picture shows, with the lifelike lines cut out of the marble by some unknown sculptor of evident genius.

Likeness of Augustus.

The statue is a likeness of Augustus when he had grown old. An inscription underneath it, which dedicates the statue to the gods, "for the happy return in good health of our Augustus Caesar," proves it was done during the famous emperor's lifetime, a votive offering to the gods by a loyal Tivoli citizen who signs himself M. Veranus Diifilus. The same man gave the public weights and measures to the city.

History lets us date this statue between B. C. 31 and A. D. 14, when Emperor Augustus died near Naples, aged seventy-six. Experts say the face is the face of a man of fifty. In the worn lines, the ill-tempered mouth, its upward twist at the left side, we have no flattering picture of the great emperor, but a lifelike study by an artist who dared to cut his statue as he saw the human model. For this reason, and because of its surely being done in Augustus' lifetime, it is a very valuable addition to the collection of portraits of the Roman emperors, and probably the only one extant of Augustus done during his lifetime.

The figure, which originally sat on the pedestal at the head of the hall, is graceful, as Suetolus, that gossipy historian from whom later scribes have learned nearly all they know about the Roman e... told us, saying:

Graceful Person.

"He was a very graceful... through all the stages of life... he was very careless in his d... would set several barbers ... upon his hair together, and... sometimes clip and sometim... his beard, and at the su... would be reading or writing."

Augustus, though emperor, ... himself a democrat and, su... tolus, "always abhorred the ... lord as a scandalous affron... tells us, too, that the emperor ... cold easily and wore woolen ... wear in winter, "with a thi... toga."

This broken statue, with th... on which it stood, unearthed ... long bridges the gulf of centu... brings one of the greatest ru... world ever saw very near.

300 SPIES IN THE AMERICAN ARMY

Amazing Story of German Espionage During the War Is Disclosed.

DESERTER MAKES CONFESSION

Former Officer Tells of Being Sent From Germany With Other Cadets to Enlist in the United States Army.

New York.—An amazing story of German espionage during the war was disclosed when John Willet, former captain in the Forty-eighth United States infantry, confessd he was really Hans Willers, a cadet in the German army until 1914, when he was sent to this country with 300 other cadets to joint the American army and become United States officers.

Willet admitted he had absconded with $6,000 of his company's funds at Camp Sevier on November 28, 1918, a few weeks after the armistice, and deserted.

It was this offense and not any suspicion of his spy role which resulted in his arrest here when Hugh J. Hannigan, formerly a first lieutenant in the Forty-eighth, recognized the deserter on the street and hailed a policeman.

Hints at Treason in Washington.

"You would be surprised how many high German officials held jobs in Washington during the war, Willet told Detective Sergeant O'Leary. The prisoner made this statement after he had narrated how he came here and what he would have done had his regiment been sent to France.

"I would have led my men to slaughter, and could have been useful to my own country in many other ways," Willet declared, according to the police, in explaining why he and others were sent to the United States to enlist in the American army. Willet was taken to Fort Jay prison on Governor's island.

Confronted by two ex-lieutenants of the Forty-eighth infantry, Sidney P. Howell, a lawyer, and Francis Hatch, Willet began to respond to questions.

As to his pedigree, he said he was born in Germany and educated there.

"I was trained for spy work when I was a boy and later when I was a cadet in a German military academy," the detectives quote Willet as saying.

"When the World war began in 1914 I was selected to join a band of cadets who were to come to the United States with orders to join the American army. Other groups went to the French army and to the British. About 300 others came over here with me. I knew my military training soon would be recognized and that promotion would follow, so I enlisted as a private the first opportunity I got. I had no citizenship papers—I did not need any.

Enlisted as Buck Private.

"I enlisted as a buck private in Albany soon after my arrival in this country. Within a very short time my ability as a soldier was recognized and I was promoted.

"My heart was nearly broken when I discovered my regiment probably would not be sent to France. I would have died for my country gladly. So, 15 days after the armistice, I took the company fund money and left camp.

"I'm telling you this freely because I might as well be dead. Life does not matter much to me."

Willet said that after he deserted Camp Sevier he started traveling. He toured the Pacific coast.

In Chicago about a year ago he married an American girl named Crawford, it is said.

Willet recently opened a mail order business in this city under the name of Crawford.

"When I was in the army, in Arizona."

"I in Arizona once—Tucson; you there? Good. You not soldier now?"

"Oh, no; that was quite a while ago; that is why I have forgotten my Spanish. There aren't many of your people up here."

She shook her head, resting back against the table, and gazing at him frankly with her dark eyes.

"Juan and I all alone here," she confessed. "Eet is not nice—no; I like not these Americanos. You do not look like the senor—vat vas ze funny name he call you?"

"Churchill."

"Shirchil—bah! I not say eet verra good. Maybe you hav' some other name I can say better? You tell me?"

"My given name, you mean; that is Tom."

She laughed, shrugging her shoulders.

"Tom! Oh, I know that; I call you Tom, then. I am Pancha Villemonte. Which you rather say?"

"Pancha, of course; and who is Juan?"

"Juan Villemonte; he is my brother—he. You not know heem, then?"

"No; we just met above. I had lost my way, and we ran into each other

up there. He and Indian Joe were driving cattle, and brought me along with them."

Her eyes opened wider, and her hands interlocked.

"You not here before, then? You never in Wolves' hole till now?"

"No."

"But why you come, then? Why they say you ride with them? Madre de Dios! You know what zis place is?"

"Yes, Pancha," he answered soberly, feeling her earnestness. "I know. I came to help a woman."

"You tell them that? Indian Joe?"

"Not just as I have you; I let them believe I was in on the game being played. In fact, I didn't have to say much of anything, for as soon as I mentioned the name of Churchill, Laud seemed to understand. What I failed to make clear was that my object was to help her."

"Why you tell me this?"

"Because you are a woman, I guess, and because I think you are straight."

She stared at him a moment in silence; then went over and stood with her back against the door. She was breathing hard, and her cheeks were red.

"She come from a ranch on the Cottonwood?"

"Yes."

Her white teeth gleamed angrily between the red of her lips.

"An' what this woman to you, senor? Why you care what happen to her?"

Shelby looked frankly into the girl's face, determined to risk all, suddenly convinced that this young Mexican had an interest in his answer beyond any mere curiosity.

"Because I am her husband," he said quietly.

"You! her husband?" She almost screamed the words, advancing toward him fiercely. "You not lie to me! They say to me you dead! They tell me that; they tell her that."

"Who told you?"

"Macklin; the Indians—all tell eet. Running Horse, he keel you—like zis, see!"

"Yes, he struck me all right, Pancha; at least someone did, also they left me there. But I was not dead."

"An' what he want of her? What Senor Macklin want of her? You know that?"

"I know a little, but perhaps not all. I heard two fellows talking about it; you know them, likely—Matt Hanley and Hank Slagin?"

She nodded.

"Hanley had got Macklin drunk and pumped him. It's some matter of a big fortune down East. It seems Macklin's real name may be Churchill, and if so his father is trustee for all this property, which really belongs to the woman. Macklin has got an idea he can marry her and so cop all the coin."

"He marry her?"

"That is the way Hanley understood it."

"Then your name not Shirchil?"

"No; it's Shelby."

"And Senor Macklin—his name Shirchil?"

"I reckon likely; I don't know."

There was a sound without and she sprang instantly aside to the table, busying herself furiously. Laud and the Mexican entered, throwing their saddles down noisily into one corner and without paying the slightest attention to Shelby, prepared themselves for the meal. To the rather curt invitation of the former the ranchman drew up the bench to the table and joined them. Pancha asked her brother a few questions, but Indian Joe never uttered a word until he had eaten his fill. Once Shelby caught his eyes looking across at him, but except for that one glance the fellow seemed oblivious of any other presence. Finally he pushed back his chair, pulled his feet around to where the butt of a revolver was within easy reach of his hand and his eyes glared straight into Shelby's face.

"Had enough?"

"Plenty; Pancha is a good cook."

"She is that. Thought I'd wait till after supper before we talked business. Now, Churchill, or whatever your name is, maybe you'll tell me where you got that bronc with a Three Star brand on him?"

CHAPTER IX.

The Love of a Woman.

Shelby, while cautiously watchful of Laud's every motion, was yet aware that the girl leaned suddenly against the wall, her face white, her eyes staring toward him, and that Juan was leaning forward across the table, with gleaming teeth exposed. He was calm enough himself, however, for he had imagined this unpleasant discovery might be made and was not entirely unprepared to meet it.

"What brand?" he asked coolly. "You mean the Three Stars?"

"That's exactly what I mean, pardner. I happen to know where that bronc com' from."

"Then you know more than I do, Laud. I bought the pony from a livery man at Gerlasche to ride out here on; some bucker, at that. Say, come to think about it, those cows you were driving in were Three Stars."

"That is just what they were, most o' them. That's what struck me as d—n funny. Those cattle com' from up on the Cottonwood; they belonged to a feller named Shelby."

"You run 'em off?"

"That's none o' your d—n business. That's where they came from, an' Shelby's dead. But what I'm interested in is how the h—l you got his horse."

He dropped his gun down on the table and stared across into Shelby's imperturbable face with hard, threatening eyes.

"Now you look here, young fellow, you know who I am, I reckon. It's Indian Joe Laud talkin' to you. Maybe yer all right an' maybe yer ain't; only I don't take no chances. Your story ain't sounded just right to me from the start, but I'll give yer a chance to prove it. I ain't goin' ter plug you now; not if yer've got sense enough to behave yerself. Tomorrow I'll see what Matt Hanley has to say, but till that time yere goin' to be locked up. Goin' ter make any row over that program?"

"Not the least."

"All right, then. Juan, you take the gent's gun; he's better off without it. That's right; now feel him over an' see if he's got any other weapons. Better stand up, Churchill."

The ranchman, comprehending the utter futility of any attempt at resistance, did as he was told, managing to retain the same cool smile on his lips. The murderous eyes of the squawman never once deserted his face and Shelby realized that the slightest symptom of treachery would prove his undoing. Laud was in no mood to be argued with.

"Nice of you to wait until after I'd eaten," he said easily. "It will give me a comfortable night's rest."

"Glad you take it that way. Cleaned him up, have you Juan? Now, how about that room yonder? Empty, ain't it?"

"Si, senor," it was Pancha who answered, opening the door.

Laud took a step forward and glanced into the apartment. The swift scrutiny apparently satisfied him, for he turned to the prisoner, his revolver still grasped in readiness for instant action.

"Go on in," he commanded harshly. "An' tomorrow we'll settle this case."

Shelby walked past him without so much as a side glance, to all outward appearance quite at his ease. Laud closed the door and the prisoner heard him secure it with a stout wooden bar. He stood there motionless, endeavoring to collect his thoughts, the smile no longer on his lips, adjusting his eyes to the darkness.

There was a window high up, but seemingly too small for the passage of his body, yet a slight gleam of starlight found its way through the opening, which was further barred by two stout wooden stakes. He stepped silently across and tested them, finding them solidly embedded in the logs. He felt his way cautiously about the room, which was of small dimensions, containing only a single stool, and a cot; the floor was puncheon and the walls of log, heavily plastered with mud. The place offered apparently no opportunity for escape, and Shelby sat down on the edge of the cot discouraged.

He could distinguish the voices of the three without plainly enough to determine who was speaking, but their words were indistinguishable. Then the murmur finally ceased, and he thought one of the men had left the house, perhaps both, yet that was hardly likely. Someone remained certainly, for there was movement, and the sound of feet, mingled with the clink of dishes. Pancha was evidently clearing off the table. His thought centered on her. Had he made a mistake in thus suddenly confiding his true story to her ears? Yet, so far as he knew, she had said nothing to injure him, and had made no effort to reveal his secret. Indeed her actions had rather expressed fear of Laud, and a certain sympathy for him; surely that was what he had read in the depths of her eyes. Yet how could this be accounted for? She must certainly be one with these others; brought up probably from childhood in the atmosphere of crime, and certainly loyal to her brother, if nothing else. What then could possibly influence her to show him the slightest consideration?

He sat with head in his hands, endeavoring to solve the mystery, and, out from the dark, a possible explanation flashed into his mind—Macklin. Could any relation she might have with this fellow account for a desire to wish his escape alive? It might; the fact that he was already the husband of the woman Macklin planned to marry would quite naturally explain the entire situation under certain conditions. If that rascal had made love to her, and now deliberately planned to desert her for another, the Spanish blood would account for all the rest. By heaven; that must be it! He recalled the insistence of her questioning; the flash of her eyes, the threatening gleam of her white teeth. Unconsciously he had touched the secret spring, and unloosed the tiger. Jealousy was the weapon—a love turned to hate, the fury of a woman scorned. To get Olga out of her path forever, she would risk anything, dare anything. Here then, was his one and only chance.

But could the girl serve him, even if she desired to do so? He realized the seriousness of his position; his helplessness without some outside aid. He had been a blind fool to venture into this den alone; and even a blinder fool to claim friendship with Hanley. The morning would find him completely exposed, and he had little doubt what form vengeance would as-

"Tomorrow We'll Settle This Case."

sume at the hands of these men. He was like a condemned man in his cell waiting helplessly for the certain hour of execution. Worse than that, even; for his fate must inevitably seal also the fate of his wife. Her only chance of rescue lay in his efforts, and he was helpless. There was not a thing he could do; yet he tried again and again desperately, testing the puncheons of the floor, block by block, digging at the dried mud between the logs of the wall; endeavoring to gain some leverage upon the hinges of the door, and tugging once again furiously at those wooden stakes protecting the narrow window. His fingers bled from the frantic effort to thus loosen something, to yield him an opportunity to really exert his strength. These efforts were utterly useless; there was not a spot of weakness to be discovered. If the place had been originally constructed as a prison it could not have been more securely built. Mentally and physically exhausted, he flung himself upon the floor, and lay there, quivering from head to foot, with nerves completely shattered.

The silence became ghastly; any sound would have been a relief. There was no one moving about even in that other room, and the door between fitted too closely for him to perceive any gleam of light. He listened intently, holding his breath, but his head sank back once more in dejection. Why in God's name hadn't he fought it out like a man? Why had he ever permitted himself to be thus caught like a trapped rat? The frenzy of disgust he felt caused him to sit up and stare once more at the single star shining through the window. What was that? A shadow? Surely something out yonder moved!

Silently, cautiously, he stepped on the stool, and looked out between the bars, his heart beating like a drum. At first he saw nothing, the blood seeming to stand still as he gazed—then the fingers of a hand grasped one of the wooden bars, and a face rose slowly just in front of his own. A whisper revealed the identity of his visitor.

"Senor, come quietly to window; do not speak loud."

"Pancha, you! You would talk with me, then?"

"I must know some things, senor; I must be sure," she said fiercely. "You tell me tonight the truth, senor; you not lie to me."

"Not a single word," he assured her eagerly, his heart beginning to beat with new hope, his face advanced until only the bars divided them. "I trusted you."

"You are Senor Shelby?"

"Yes."

"And she, this woman, is your wife?"

"Yes."

"She is pretty woman, verra pretty; you not married long?"

"No, only a few days; we had just come to the ranch when she was taken away."

"But, senor, why she go away if she be just married like you say? Why she leave you, an' run off with Senor Macklin? She love heem better than you?"

"Love him! She did not run off. He stole her, he and four Indians, after leaving me for dead."

"He not tell eet to me like that; he say she want to marry heem, an' not you. That he took her to save her from you; that she would not let heem leave her. Then you fight, an' so get keeled."

Shelby laughed softly.

"So that was Macklin's story, was it? Well, it is not exactly true. I ain't saying she's in love with me, or nothin' like that, but she sure don't hanker none after that chap. I'll tell yer why he took her—cause she's got a bunch o' money comin' her way down east that Macklin would like to get his hands on."

"He marry her?"

"That's his game, no doubt, if it works. If not, he'll evolve some other. I don't think he gives a cuss how it's done, so he gets it—he and his precious father."

She stared at him with lips parted.

"Maybe I see it more clear now," she exclaimed. "He not love her, then; he just want her money, bah! I care not how he get that, if he not get her. You take her away, Senor Shelby, where he never see her again?"

"Of course."

"An' you keep her married to you?"

"I'll do the best I can. What do you mean, Pancha? Can you get us out of here?"

"You lie hid, Senor, and trust all to me."

(TO BE CONTINUED.)

The Wonder of Eggs.

One cannot find among the multitude of wonders in nature anything more marvelous than the development of an egg, writes Elsa G. Allen in the American Forestry Magazine. Whether it be a butterfly which flourishes for a day only to die after depositing its eggs, or a reptile which lazily leaves its eggs with only the warm sand to mother them, or a fish, like the salmon, which, with incredible strength, jumps the rapids to spawn in the upper reaches of rivers, or most appealing of all, a bird which builds a beautiful nest for its treasures, the egg in every case is structurally the same, and the miracle of life unfolds according to the same laws of cell division.

ASPIRIN

Name "Bayer" on Genuine

say BAYER

Take Aspirin only as told in each package of genuine Bayer Tablets of Aspirin. Then you will be following the directions and dosage worked out by physicians during 21 years, and proved safe by millions. Take no chances with substitutes. If you see the Bayer Cross on tablets, you can take them without fear for Colds, Headache, Neuralgia, Rheumatism, Earache, Toothache, Lumbago and for Pain. Handy tin boxes of twelve tablets cost few cents. Druggists also sell larger packages. Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid.—Adv.

ALL HE HAD IN HIS HAND

Pat Certainly Held No Weapon of Offense, but It Was Deadly for His Case.

In the courthouse an Irishman stood charged with stealing a watch from a fellow citizen. He stoutly denied the accusation, and brought a countercharge against the accuser for assault and battery committed with a frying pan.

The judge was inclined to take a common-sense view of the matter and, regarding the prisoner, said:

"Why did you allow the prosecutor, who is a much smaller man than yourself, to assault you without resistance? Had you nothing in your hand to defend yourself?"

"Bedad, yer honor," said Pat, "I had his watch, but what was that against his frying pan?"—London Ideas.

Thousands Have Kidney Trouble and Never Suspect It

Applicants for Insurance Often Rejected.

Judging from reports from druggists who are constantly in direct touch with the public, there is one preparation that has been very successful in overcoming these conditions. The mild and healing influence of Dr. Kilmer's Swamp-Root is soon realized. It stands the highest for its remarkable record of success.

An examining physician for one of the prominent Life Insurance Companies, in an interview on the subject, made the astonishing statement that one reason why so many applicants for insurance are rejected is because kidney trouble is so common to the American people, and the large majority of those whose applications are declined do not even suspect that they have the disease. It is on sale at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

A New Drug.

Not long ago one of the doctors at Sunnyside promised a patient that he might walk about the next day. He said that he would put the permission on his order book. This he did. He wrote "ambulant," and thought he had cared for his patient. But the next morning the nurse, who was young and new, kept the disappointed patient in bed until she could see the doctor. To the doctor she said anxiously:

"I have not yet given his medicine to Mr. Jones. You did not write how many drams."—Indianapolis News.

Hall's Catarrh Medicine

Those who are in a "run down" condition will notice that Catarrh bothers them much more than when they are in good health. This fact proves that while Catarrh is a local disease, it is greatly influenced by constitutional conditions. HALL'S CATARRH MEDICINE is a Tonic and Blood Purifier, and acts through the blood upon the mucous surfaces of the body, thus reducing the inflammation and restoring normal conditions.

All druggists. Circulars free.
F. J. Cheney & Co., Toledo, Ohio.

Transgression.

The youthful Softleigh seemed so depressed that his friend Moreleigh was moved to ask the reason.

"Alice has broken our engagement," said he of the downcast look.

"Sorry to hear that," said the friend. "Why did she break it?"

"Because I stole a kiss."

"What! A fiancee object to her fellow stealing a kiss from her?"

"The trouble was," Softleigh explained, "I didn't steal it from her."

Cole's Carbolisalve Quickly Relieves and heals burning, itching and torturing skin diseases. It instantly stops the pain of burns. Heals without scars. 30c and 60c. Ask your druggist, or send 30c to The W. Cole Co., Rockford, Ill., for a pkg. Adv.

Big Rat With a Bark.

The attention of the Texas department of health has been called to a new rat which has appeared near Red Rock, which is said to be as large as a squirrel and acts much like a kangaroo. It has a bark like a small dog.

It takes Congress to settle a strike, but an unruly stomach is subdued by Garfield Tea.—Adv.
